Glossary

**Academic Probation**
Academic Probation may be assigned to students whose Grade Point Average (GPA) is at least 3.0 but less than 3.5, will allow a student to continue at the University for one reviewing period.

**Academic Standing**
Academic standing is the statement of the academic performance of a student at the end of Winter or Spring/Summer terms. Good Standing, May Continue in Program - Good standing, May Continue in Program - Good standing, May Not Continue in Program, May Not Continue in Program, May Not Continue at University, Required to Withdraw from University, are examples of academic standings. See Academic Standing Review and Academic Standings in the General Academic Regulations for more information.

**Advanced Standing/Credit**
Advanced Standing/Credit may be granted to an applicant who has completed work at another university or college or who has completed a Certificate/Diploma program at McMaster University, subject to the applicant having met the minimum requirements prescribed by the University.

**Antirequisite**
An antirequisite is a course which cannot be taken for credit before, after, or at the same time as the course with which it is listed.

**Bursaries**
Bursaries are granted based upon demonstrated financial need, a minimum expectation of academic accomplishment and, in some cases, other forms of earned merit. They may vary in monetary value, based upon the level of financial need demonstrated.

**Continuing Student**
A continuing student is a university graduate who is not proceeding to an advanced degree, but wishes to take one or more undergraduate courses after graduation.

**Co-requisite**
A co-requisite is a course which must be taken together with another course in the same term.

**Course Numbers**
Course numbers (e.g. 1A03) can be interpreted as follows: the initial digit indicates the Level of the course; the letter(s) in the middle identifies the specific courses within the Level; and the final digit(s) defines the number of units of credit associated with the course.

**Credentials**
A credential is a body of academic work or collection of course work that stands on its own and for which a parchment is issued. McMaster credentials include certificates, diplomas and degrees. A single course is permitted to be counted toward a maximum of two credentials.

**Cross-listed Course**
A cross-listed course is a course which is listed under two or more subjects.

**Cumulative Grade Point Average (Cumulative GPA)**
The Cumulative GPA is the weighted average based on the Graded Units taken throughout the undergraduate career. The Repeating Courses regulation, effective September 1, 2018, will affect the calculation of subsequent Cumulative GPA.

**Deferred (DEF)**
*Notation*
Courses with the notation DEF have been approved for a deferred examination.

**Degree**
A degree is conferred when a student completes a program of study (e.g. Bachelor of Arts, Bachelor of Science in Kinesiology, Master of Science, Doctor of Philosophy).

**Department**
A department is a subdivision of a Faculty, responsible for a particular subject or group of subjects (e.g. Department of Chemistry, Department of Health, Aging and Society).

**Elective Courses**
Elective courses are those courses taken by a student which are not specifically designated in a student’s program, but which form part of the total number of units required to complete the program.

**Extra**
*Notation*
Courses designated as “Extra” at the time of registration by the Faculty Office are not included as units toward completion of a student’s program. The grades obtained in such courses will not be included in the computation of the Cumulative GPA. However, they will be included in the computation of the Fall-Winter Average and the Spring-Summer Average.

**Faculty**
A Faculty is a major administrative and teaching unit of the University responsible for programs and courses relating to common fields of study or academic disciplines (e.g. Faculty of Humanities, Faculty of Engineering).

**Full Load**
A full load is the number of units specified in the Calendar for an individual level of a program in a given year. If the Calendar does not specify the program requirements by individual levels, divide the total units for all levels by the number of levels, discarding the remainder.

**Full-time Student**
A full-time student, for academic purposes, is an undergraduate student who is registered in at least 9 units in a term, including Extra Courses. Full-time status for students in the Faculty of Science and Engineering Co-op programs is granted to those students registered in at least 9 units in a term.

**Fall-Winter Average**
The Fall-Winter Average is a weighted average based on the grades attained in the Fall and Winter Terms. Overload courses and Extra courses are included in the Fall-Winter Average.

**Grade Point Average (GPA)**
The Grade Point Average is the weighted average based on the grades obtained in all courses taken. Failed courses are included in the GPA calculation.
Graded Units
Graded units refer to the number of units taken at McMaster for which a letter or Numeric Grade is earned. Graded units do not include courses assessed with a Non-Numeric Grade.

Honour Lists
Students are reviewed for Deans’ Honour Lists (DHL) and Provost’s Honour List (PHL) each time a minimum of 30 units (may not exceed 6 units assessed with a non-numeric grade) have been completed. Subsequent assessments are based on all units completed since the previous review. Students will be named to the Deans’ Honour List when a minimum average of 9.5 is achieved. Students will be named to the Provost’s Honour List when an average of 12.0 is achieved.

Letter of Permission (LOP)
A Letter of Permission is a formal document which allows a McMaster student to take one or more courses at another university for credit towards a McMaster degree.

Level
Level is used to describe a student’s progression through a program.

Loans
Loans are monetary advances granted to students currently registered, based upon a demonstrated means and promise of repayment.

Mature Student
A mature student has not attended secondary school or college on a full-time basis for at least two years; and has not previously attended university.

Minors
Students enrolled in a four- or five-level program (with the exception of the Medical Radiation Sciences programs) are eligible to obtain a Minor in another subject area, provided that the subject area is not integral to the requirements of their degree program. At least 18 units must be completed at McMaster. Students who wish to receive a Minor must consult the appropriate department section of the calendar. McMaster also offers Interdisciplinary Minors and Thematic Areas. To apply for a Minor, students must complete the Minor/Certificate Application in addition to their online Graduation Information Centre (GIC) application. The student’s Faculty will verify that the requirements have been met and, if successful, the transcript will indicate that a Minor has been obtained. Minors cannot be revoked once approved.

Multi-Term Fall/Winter Courses
Codes for multi-term Fall/Winter courses have an A/B suffix. Part A must always be taken in the Fall Term immediately preceding Part B. Neither Part A nor B of a multi-term course has academic credit independent of both parts being successfully completed. Students who drop or withdraw from Part A must also withdraw from B. Upon completion of the Fall Term, a grade of MT indicating multi-term will be assigned to Part A and the final grade will be assigned to Part B.

Multi-Session Course
A multi-session course is one taught over the Spring and Summer sessions of the Spring/Summer Term. Students enroll in both the ‘A’ and the ‘B’ parts of the same course. Part ‘A’ is taken in the Spring session. Part ‘B’ is taken in the Summer session. Academic Load and Billing units are assigned to both parts. Units for GPA calculation are assigned to part ‘B’ of the course only.

Graded Units
OSAP Eligible Course Load
OSAP Eligible Course Load or equivalent refers to the 60% minimum course load per term (40% minimum course load per term for students with permanent disabilities) required to be eligible for full-time OSAP government student aid funding.

Part-time Student
A part-time student, for academic purposes, is an undergraduate student who is registered in fewer than 9 units in a term, including Extra Courses.

Pass/Fail Courses
Courses evaluated on a Pass/Fail basis are not included in the calculation of averages. The earned units are counted towards degree requirements.

Post-Degree Student
A post-degree student is a university graduate or a person with professional qualifications who is not proceeding to an advanced degree, but wishes to take one or more graduate courses.

Prerequisite
A prerequisite is a requirement to be fulfilled before registration in a course is permitted. This is usually the successful completion of another course.

Program
A program is a specific combination of courses that fulfills the requirements for a degree.

Readmission
See Readmission in the Admission Requirements section of this calendar.

Reinstatement
See Reinstatement in the General Academic Regulations section of this calendar.

Required Courses
Required courses are those courses which are specifically designated for inclusion in a program.

Requisite
A requisite is an academic requirement that must be met to register in a course. A course requisite may comprise Prerequisites, Corequisites and/or Antirequisites.

Review
A academic review is an assessment of a student’s performance to determine eligibility to continue in a program or to graduate.

Reviewing Period
The reviewing period is the time between two reviews for a student. Reviews will take place in May and August, provided the student has attempted 18 units of work since the last review or is a potential graduand.

Session
A period of study within a Term. Each term may have multiple sessions. For example, the Summer session runs from June to August within the Spring/Summer term.

Spring-Summer Average
The Spring-Summer Average is a weighted average based on the grades attained in the Spring and Summer Term. Overload courses and Extra courses are included in the Spring-Summer Average.
Term
A period within the Academic Year. The Academic Year will have three Terms that may have multiple Sessions within them. For example: Fall Term (September-December), Winter Term (January-April), and Spring/Summer Term (May-August).

Term Grade Point Average (Term GPA)
The Term GPA is a weighted average based on the Graded Units taken in the term.

Transcripts
A transcript summarizes a student’s academic career at McMaster University and is available by electronic request through Mosaic. Transcript requests will not be processed for students with outstanding financial accounts at the University or those under investigation for an academic integrity violation.

Tuition
Tuition is fees paid in consideration for enrolment in a program of study and selected courses.

Undergraduate Student
An undergraduate student is a one who is enrolled in a program of study leading to a bachelor’s degree or to the degree Doctor of Medicine.

Units
Units define the number of credits associated with a course. A unit is roughly equivalent to one lecture-hour per week for one term or two hours of laboratories or seminars per week for one term. Three-unit courses are usually one term in length. Six-unit courses are usually two terms in length.

Unused
Courses designated as “Unused” cannot be used to fulfil the requirements for the student’s current degree program. The grades obtained in such courses will be included in the computation of all averages.

Weighted Average
Weighted average is calculated by multiplying the grade points achieved in each course by the number of units in each course, totaling these results, and then dividing this result by the total number of course units.

With Distinction
Graduation With Distinction standing is awarded when a minimum Cumulative GPA of 9.5 is achieved in a degree program. In this case, the Latin phrase summa cum laude (“with highest honour”) will appear on the graduate’s diploma.

Withdrawal With Academic Penalty
Withdrawal With Academic Penalty is the formal process of discontinuing studies in a particular course or program after the last day to withdraw without failure by default in the term.

Withdrawal Without Academic Penalty
Withdrawal Without Academic Penalty is the formal process of discontinuing studies in a particular course or program before the last day to withdraw without failure by default in the term.
Sessional Dates 2019-2020

The academic year is divided into terms, as shown below. Most undergraduate students register for the Fall and Winter terms, which run from September to December and January to April respectively. The Spring/Summer term starts at the beginning of May and ends in early August.

‡ Follows completion of prior undergraduate degree.

## Second Undergraduate Degree

Provision exists for a university graduate to take a second bachelor’s degree. This program is normally shortened (except for the B.H.Sc. Midwifery program). An application for admission is necessary for entry to a second degree program, and it should be submitted by the application deadlines. (See Application Procedures and General Academic Regulations sections of this Calendar.)

## Combined Programs

There is the opportunity to combine two subjects of study within one Faculty, or between two Faculties. Further information can be obtained by referring to the Faculty sections of this Calendar, or contacting the appropriate Office of the Associate Dean.
## Elective Courses Available To Level I Students

Admission Requirements

1. Admission from Secondary Schools

All Level 1 programs have enrollment limits and admission is by selection.

A. Ontario

GENERAL REQUIREMENTS (FOR ALL LEVEL I PROGRAMS)

To be considered for admission, you must satisfy the general requirements of the university and the specific subject requirements for the program to which you applied plus any specified supplementary application/on-line assessment/audition/portfolio required by some programs at the university.

If you are an applicant from an Ontario secondary school you must meet the following minimum requirements:

1. An Ontario Secondary School Diploma (OSSD) with acceptable standing; AND
2. An overall average in completed Grade 12 U and/or M courses which meets or exceeds the minimum set by the specific program to which you applied; AND
3. Satisfactory completion of six Grade 12 U and/or M courses including the subject requirements for your chosen program.

Note: Music External (Conservatory) 4M is acceptable as a credit and the mark obtained can be included in the calculation of your admission average. Alternatively, you may submit certificates from a recognized conservatory of music in Grade 8 practical and Grade 2 theory to your secondary school for one Grade 12M credit.

ADMISSION AVERAGE RANGE

The Admission Average Range used to determine eligibility for consideration is calculated using the best six Grade 12 U and/or M grades, including those for all of the required subjects. McMaster calculates averages to two decimal points (on six (6) final grades including all required courses for your desired program) of the required subjects. McMaster calculates averages to two decimal points (on six (6) final grades including all required courses for your desired program)

Note: Music External (Conservatory) 4M is acceptable as a credit and the mark obtained can be included in the calculation of your admission average. Alternatively, you may submit certificates from a recognized conservatory of music in Grade 8 practical and Grade 2 theory to your secondary school for one Grade 12M credit.

EARLY CONDITIONAL ADMISSION

Early conditional admission may be granted annually to qualified applicants with strong academic standing. Early conditional admission is based on:

1. six appropriate midterm/interim Grade 12 U and/or M grades, OR
2. at least three final Grade 12 U and/or M grades PLUS enrollment in the appropriate additional three Grade 12 U and/or M courses.
3. In some cases, Grade 11 marks may be considered in extending early conditional offers of admission.

If you do not receive an offer of admission in March, you will automatically be reassessed for admission until May 15 after additional Grade 12 U and/or M grades are received from your secondary school. Due to enrollment limits, McMaster may not be able to consider additional grade data for admission purposes received after May 15.

The University reserves the right to withdraw a conditional offer of admission due to any of the following:

1. You do not meet the minimum final average prescribed for your chosen program; OR
2. You do not receive an OSSD; OR
3. You do not complete six Grade 12 U and/or M courses including all required subjects; OR
4. You do not successfully accept your offer of admission at the Ontario Universities’ Application Centre (OUAC) by the response deadline indicated on your offer letter; OR
5. You do not meet any other condition stipulated on your conditional offer of admission; OR
6. You attend a post-secondary institution prior to beginning your studies at McMaster; OR

C. University Graduates Applying for a Second Bachelor's Degree

All programs have enrollment limits and admission is by selection. If you have a first non-Honours degree, you may apply to take an Honours second degree in the same subject area or a second degree in another discipline. Please note the following exceptions: B.Arts.Sc. [Arts & Science], B.Com. (Bachelor of Commerce), B.Com. (Honours), B.H.Sc. (Bachelor of Health Sciences (Honours)), B.Sc. (Honours) in Integrated Science (ISCI), Honours B.Sc. Kinesiology, Integrated Biomedical Engineering and Health Sciences, Integrated Business and Humanities cannot be done as second degree programs. Honours Music is only available as a second degree to students whose first degree is not a BA in Music. The requirements are set out in the General Academic Regulations section of this Calendar.

If you wish to enter a Second Bachelor's Degree in a subject area from the Faculty of Science, please note that admission to all limited enrollment programs, with the exception of Medical Radiation Sciences I, may not be possible. Second Degree applicants to all Science programs, except Medical Radiation Sciences I, are not eligible to apply to or be admitted to any of the other first year Science programs. Second Degree applicants must have already completed all first year requirements for the second year program they wish to apply to, with the exception of Medical Radiation Sciences I. See Limited enrollment Programs in the Faculty of Science section of this Calendar for a list of programs. Please contact the Office of the Associate Dean of Science (Academic) for further information (see the Application Procedures section).

If you are a McMaster graduate or potential graduate, you may be able to use the McMaster University Returning Student Application (see the Application Procedures section).

D. Continuing Students

At McMaster, a Continuing Student is defined as a graduate from an undergraduate program, who wishes to take more undergraduate courses, either out of general interest or to upgrade or obtain courses required for future applications to graduate studies or other professional programs. To be eligible to take courses as a Continuing Student you will be expected to have an undergraduate university degree and at least a C average, with no failures, in your final year’s work (or the equivalent, in the case of a degree taken through part-time studies), and academic records which are satisfactory to the Department and the Office of the Associate Dean of the appropriate Faculty. *Please Note: not all courses are available to Continuing students and course prerequisites for selected courses must be met. Also note that admission as a Continuing student does not guarantee registration in courses of interest to the student.

MCMASTER GRADUATES

If you are a graduate of a McMaster undergraduate degree program and wish to become a Continuing Student, you do not need to apply for admission. Graduates who have not attended courses for more than two years will need to contact the Office of the Registrar prior to attempting to enrol for courses.

GRADUATES FROM OTHER UNIVERSITIES

As a Continuing Student with a non-McMaster degree, you must apply formally for admission in the first instance. In subsequent sessions, you will only be required to enrol.

Acceptance as a Continuing Student carries no implications with respect to acceptance in the School of Graduate Studies. If you plan to proceed to a graduate degree you should apply directly to the specific department of your program of interest.

E. From Six Nations Polytechnic

McMaster University, along with four other universities, partnered with Six Nations Polytechnic to offer university courses in the community of Six Nations. The courses offered are eligible for transfer credit at any of the universities within the consortium. For more information please contact the Indigenous Student Services at 905-525-9140, ext. 27459 or indigservices@mcmaster.ca.

F. From Post-Secondary Institutions with Religious Affiliation

Undergraduate general academic studies taken at colleges with religious affiliation that are member institutions of specific accredited associations will be considered for admission and transfer credit on a case by case basis. Applicants from a non-accredited postsecondary institution with religious affiliation will be considered for admission based on completion of a Grade 12 high school diploma.

3. Other Categories of Admission

A. Part-time Admission

Students interested in beginning studies on a part-time basis should review the requirements and information found in the following sections of this Calendar:

- Admission Requirements
- Application Procedures
- General Academic Regulations
- Sessional Dates
- Program descriptions found in the specific Faculty sections

Detailed information can be found on our website: http://future.mcmaster.ca/admission/process/105pt.

B. Mature Students (Admission)

If you do not qualify for admission consideration under one of the above categories, McMaster will assess your eligibility as a mature student. You may be considered for limited admission, provided both of the following conditions are satisfied:

1. You have not attended secondary school or college on a full-time basis for at least two years.
2. You have never attended university.

Applicants admitted as mature students will not be granted transfer credit. Programs in the Faculties of Humanities and Social Sciences have no specific course requirements for mature student admission. The following Level I programs have specific course requirements that mature applicants must present from secondary school, as outlined:

- Business I: requires one Grade 12 U Mathematics course (or equivalent).
- Chemical and Physical Sciences Gateway: requires satisfactory standing in four Grade 12 U mathematics and science courses (or equivalent) as specified under the heading Subject Requirements For Specific Level I Programs.
- Environmental and Earth Sciences Gateway: requires satisfactory standing in three Grade 12 U mathematics and science courses (or equivalent) as specified under the heading Subject Requirements For Specific Level I Programs.
- Life Sciences Gateway: requires satisfactory standing in three Grade 12 U mathematics and science courses (or equivalent) as specified under the heading Subject Requirements For Specific Level I Programs.
- Mathematics and Statistics Gateway: requires satisfactory standing in two Grade 12 U mathematics courses -- Advanced Functions U and
Calculus and Vectors U as specified under the heading Subject Requirements For Specific Level I Programs.

Midwifery I: does not offer mature admission directly to the program. However, students interested in Midwifery may be admitted as a mature student to another program in order to complete a minimum of six university courses (18 units) in their program of admission before applying to the Midwifery Education Program.

Nursing I: does not offer mature admission directly to the program. However, students interested in Nursing may be admitted as a mature student to another program in order to complete university prerequisite courses for later consideration for admission to Nursing I. Possession of the minimum admission requirements does not guarantee an offer of admission. Contact the School of Nursing for more details.

The following programs do not admit under the category of Mature Students: Arts & Science I, Automotive and Vehicle Technology I (B.Tech.), Biotechnology I (B.Tech.), Computer Science I, Engineering I, Health Sciences I, Honours Integrated Science (Level I), Honours Kinesiology (Level I), Integrated Biomedical Engineering and Health Sciences I, Integrated Business and Humanities I, Medical Radiation Sciences (Level I), Midwifery I, Nursing I, and Process Automation Technology I (B.Tech.).

If admitted to a program as a mature student, you may register to take up to 18 units of course work (normally Level I courses) during the Fall/Winter session with no more than nine units in each term (three courses). Within the first 18 units, mature students will be limited to taking three units in each term of the Spring/Summer session.

Upon completion of 18 units, your performance will be reviewed according to the general academic regulations of the university. (See Level I Registration and Academic Standing Requirements under General Academic Regulations).

C. Visiting Students (Letter of Permission - For Credit at Another University)

If you are a student currently attending another university, you may apply to take McMaster courses for credit at your own/home institution. Please note, not all courses are available for credit outside McMaster and all are subject to enrollment limits, so it is important that all applicants adhere to McMaster application deadlines.

You must initially apply through the Ontario Universities’ Application Centre (OUAC) and send your Letter of Permission and an official transcript from your home institution directly to the Office of the Registrar, Admissions. Upon receipt, your transcript will be reviewed to ensure you have met the prerequisites for courses you plan to take at McMaster. Approval of your application as a Visiting Student does not guarantee your enrollment in a course.

Subsequent requests to take courses on a Letter of Permission do not require another application; however you must send an updated Letter of Permission and a current official transcript from your home institution to the Office of the Associate Dean of the Faculty offering the course at McMaster. If you are attempting to register in courses offered by more than one Faculty, you must obtain approval from each Office of the Associate Dean.

D. Graduates of McMaster Certificate/Diploma Programs

If you have completed certificate or diploma programs from McMaster, you may be granted advanced credit up to maximum specified by Undergraduate Council upon successful completion of the certificate/diploma program. Faculties will take into account the subject matter of both the certificate and degree programs. The credit will normally be applied against your elective courses. For more information concerning the amount of advanced credit granted, please refer to the Certificate and Diploma Programs section of this Calendar.

E. Post-Degree Students

If you are a university graduate or a person with professional qualifications who wishes to take one or more graduate courses but not proceed to an advanced degree, you may apply to McMaster as a post-degree student. To enroll as a post-degree student, you must apply to the appropriate departments and have your admission and registration approved by the School of Graduate Studies for each session in which you wish to take courses. You will register and pay fees as a graduate student.

Acceptance as a post-degree student carries no implications with respect to admission to advanced degrees, and even if such admission is granted subsequently, credit toward the advanced degree will not normally be granted for the work previously taken.

F. Listeners

If you are uncertain about degree courses, you may register as a listener in a degree course, but not for credit. You attend all classes, but do not complete any of the essays, tests and other formal requirements. You do not receive a grade for courses that you attend. Some students have eased their way into degree study with this option, subsequently applying for admission and enrolling in further courses for credit. Please note not all courses are available to Listeners. Please see http://www.mcmaster.ca/bms/student/index.htm for any applicable fees. For more information please contact the Office of the Registrar.

Written permission to attend must be obtained from the instructor delivering the course. An I.D. card cannot be issued until permission has been obtained.

G. Enrichment Program for Secondary School Students

If you are an outstanding Grade 12 student and wish to enroll in a university-level course while completing Grade 12 U and M courses in your final year of study, you may apply for the Enrichment Program. For more information contact the Office of the Registrar at (905) 525-4600.

H. Former McMaster Degree Students (Returning Students)

READMISSION

If you are a former McMaster student who voluntarily withdrew from an undergraduate program more than five years ago (and have not attended another university or completed a college diploma elsewhere) and you wish to return to your studies, then you must apply for Readmission. Students from the School of Nursing must apply for Readmission regardless of time elapsed following voluntary withdrawal.

If you were enrolled (have a record of course enrolment) within the last five years and you left the university in good academic standing (and have not attended another university or completed a college diploma elsewhere), then it is not necessary for you to apply for Readmission. Normally, you will be permitted to enrol in your previous program or another program for which you qualify. You must contact the Office of the Registrar directly in order to have your status reactivated prior to enrollment: (905) 525-4600.

4. Transfer Credits

A. General Policy on the Transfer of University Course Credits

To facilitate program completion by undergraduate students seeking to transfer course credit from an accredited university to McMaster, the University has implemented the following principles:

1. Acceptance of transfer credits from accredited universities shall be based on the recognition that, while learning experiences may differ in a variety of ways, their substance may be essentially equivalent in terms of their content and rigour. Insofar as possible, acceptance of transfer credit shall allow for the maximum recognition of previous learning experience in university-level courses;

2. Subject to degree, grade and program requirements, any course offered for credit by an accredited university shall be accepted for credit by McMaster when there is an essential equivalency in course content. However, no course for which a grade of less than C- (60%) has been achieved will be considered.

3. Evaluation of all possible transfer credits available at the time of admission must be completed within one year of the date of admission to the University.

B. From Colleges of Applied Arts and Technology

Normally, if you are a well-qualified graduate of a three-year program and the college work is appropriate to your chosen university program, you could receive up to 30 units of transfer credit. If you have completed a two-year program and performed well, transfer credit will be reviewed on a case-by-case basis. Credit beyond this may be given on an individual basis where the college and university programs are in similar areas, and where your academic record warrants special consideration.

In the granting of credit, attention will be given to:

1. your performance in the college program;
2. the duration of the college program;
3. the program taken at the college and the program to which entry is sought;
4. your secondary school record.

Each case will be considered individually on its own merits for the program desired.

C. Advanced Credit

Subject to the discretion of the Faculty, advanced credit may be granted if you have completed the International Baccalaureate (I.B.) Diploma, the Advanced Placement (A.P.) Program and the College Board examinations or the General Certificate of Education (G.C.E.) and you have met the minimum requirements prescribed. Advanced credit may shorten your degree program at McMaster.

D. Credit in Courses by Special Assessment (Challenge Examinations)

Students who have acquired knowledge at a different type of institution or in a manner that makes assessment of their qualifications difficult are permitted to seek degree credit through special assessment (Challenge for Credit). Challenge for credit is not intended to give credit for skills or knowledge gained through high school, college or previous university instruction. The special assessment may include one or more of the following: written examinations, papers, essays, submissions of a substantial body of work, or portfolios, or laboratory tests. Credit can be granted only for those courses listed in the current McMaster calendar. Not all courses in all disciplines are available for challenge. Faculties and departments are free to determine which, if any, of their courses are open for special assessment. Challenges are assessed on a pass/fail basis. The passing grade for a challenge appears on the transcript as COM (Complete) and is not used in computing averages or evaluating honours or scholarship standing, but is counted as a course attempt. Unsuccessful attempts will be noted on the transcript as a grade of F. Special Assessment is not available for a course taken previously and a course may be attempted only once by special assessment. Once you have registered for a course by such means (known as challenge exams) the registration may not be cancelled and you may not withdraw from the course. Waivers of prerequisites only (i.e. no degree credit) will be at the discretion of the department.

5. English Language Proficiency

If you have been asked to meet our English Language Proficiency requirement, you must demonstrate English language proficiency by achieving the minimum requirements as specified by McMaster. The university reserves the right to require applicants with an English Language Proficiency score disparate from their English prerequisite subject grade to present further evidence of achievement. You may review acceptable tests of English Language Proficiency and minimum score requirements on our web site http://future.mcmaster.ca/admission/admission-requirements/language/. It is your responsibility to make all arrangements regarding the writing of the English Language Proficiency tests and to have the official score report forwarded to the Office of the Registrar. Admissions directly from the testing center in a timely manner.

At the discretion of the university, you may be exempted from this requirement if you meet one of the following requirements:

i. Attended immediately prior to application to McMaster, in full-time academic studies (non-ESL), an accredited Secondary School (High School) or Post-Secondary College in an English-speaking country for at least four years, OR

ii. Attended immediately prior to application to McMaster, in full-time academic studies (non-ESL), an accredited English medium Secondary School (High School) or Post-Secondary College for at least four years,* OR

iii. Attended immediately prior to application to McMaster, in full-time academic studies (non-ESL), an accredited English medium University for at least one year, OR

iv. Resided in an English speaking country for at least four years immediately prior to application to McMaster.

*Please note that the Undergraduate MD program requires a minimum of three years of study at an English-medium university. More information about the admission requirements for Medicine at McMaster can be found at: http://www.fhs.mcmaster.ca/mdprog.

Where documentation from a school outside of Canada is in a language other than English, you must provide official transcripts in the original language as well as official, notarized English translations. For specific document submission requirements and processes/procedures, please review: https://future.mcmaster.ca/admission/documents/.

If McMaster concludes based on reasonable grounds that the applicant has falsified any information presented to the University as part of his or her application, without limiting any other rights of McMaster available at law, McMaster reserves the right to revoke the offer and, subject to applicable law and University Policy, to terminate a student’s enrolment.

Without limiting McMaster’s General Statement on Collection of Personal Information and Protection of Privacy, please take note that McMaster University collects and retains personal information of applicants for admissions to McMaster University under the authority of The McMaster University Act, 1976. This information may be used for the administration of admissions and registration and, subject to McMaster University policies (as may be amended or revoked from time to time), McMaster may disclose any evidence of misrepresentation, fraud or falsification of admissions documentation to other educational institutions, to government agencies, to law-enforcement agencies and to other relevant third parties. The information you provide on any application for admissions will be protected and used in compliance with Ontario’s Freedom of Information and Protection of Privacy Act (RSO 1990) and will be disclosed only in accordance with this Act. If you have any questions about the collection and use of this information please contact the University Registrar, University Hall, Room 209, Student Records, Gilmour Hall, Room 108, or the University Secretary, Gilmour Hall, Room 210, McMaster University.

B. Retention of Documents

All documentation submitted in support of your application for admission becomes the property of the University and is not returnable. If you are not accepted, or you fail to enroll following acceptance, your documentation will be destroyed at the end of the admissions cycle. If you reapply, you must submit any new academic information in addition to the documentation submitted previously.

3. Application and Documentation Deadlines

McMaster University reserves the right, at its sole discretion, not to accept, process or adjudicate applications or amendments to applications to any program at any time. Meeting minimum application requirements does not guarantee admission to any program at McMaster University. Application fees are non-refundable so we strongly advise you to review our admission requirements carefully before applying, to determine your academic eligibility for consideration for admission. Please see the Admission Requirements section of this calendar for general information. University transfer applicants should review programs by Degree and Minors requirements before applying. McMaster University has a number of highly competitive by-selection programs that require a mandatory supplementary application/assessment, and all of these programs have early application and supplementary submission deadlines, as specified in the chart below. Failure to apply on time or to submit the required supplementary application/assessment by the specified dates will automatically disqualify consideration for these specified programs. You are advised to submit your application and/or amendments well in advance of the deadlines listed below.

Fall and Winter Terms

The dates and deadlines listed below are for applications submitted for the 2019-2020 academic year. Please refer to http://future.mcmaster.ca for the date and deadline information for new applications.

Academic Counselling for Admitted Students

If you are offered admission to a program at McMaster, you will be asked to confirm that you have accepted the offer of admission and will attend the University. Your admission will include information regarding acceptance procedures for the offer of admission, specified deadline for your acceptance and registration procedures. Offer of admission acceptance deadlines specified in your Offer of Admission letter are strictly enforced. Please ensure that you accept your offer of admission as directed well before the specified deadline date.

If you are admitted to Level I, your Faculty may also arrange a visit to the University so you may meet with a Faculty advisor to set up your program. Although attendance at the summer counselling and registration sessions is not compulsory, you are strongly advised to participate. If you cannot attend one of these sessions, counselling will be provided in September.

If you are offered admission above Level I, you may arrange for academic counselling with the Office of the Associate Dean of the Faculty offering the program, or the Office of the Director of the program.

4. Review of Admission and Re-Admission Decisions

No appeal procedure shall be available for decisions on admission or re-admission to the University. Such decisions may be reviewed within the following framework:

a. An applicant to the University who believes that the admission or re-admission decision, or, in the case of a transfer student the decision to grant credits, is incorrect, or based on incorrect or incomplete information, may, within one week of receiving the decision, request a review of that decision by writing to the Senior Associate Registrar, Undergraduate Admissions, stating why she/he thinks the decision should be reviewed.

b. The Senior Associate Registrar, Undergraduate Admissions, shall determine whether the information on which the decision was based was incomplete or incorrect and, if so, shall refer the request for review to the appropriate Faculty Committee. That Committee shall make a final decision and report it to the Senior Associate Registrar, Undergraduate Admissions, who shall then convey the decision in writing to the student. The Senior
General Academic Regulations

This section outlines the general undergraduate academic regulations of the University. Students must read and comply with both these regulations and those set out by their Faculty elsewhere in this Undergraduate Calendar, as applicable. In the event of a conflict between the Faculty/Program Regulations and these General Academic Regulations, the program regulations take precedence.

Since the Academic Regulations are continually reviewed, the University reserves the right to change the regulations in this section of the Calendar. The University also reserves the right to cancel the academic privileges of a student at any time should the student’s scholastic record or conduct warrant so doing.

Academic Commitments

Students should expect to have academic commitments (e.g., classes, labs, tests, examinations, etc.) Monday through Saturday, normally 8:30 a.m. to 10:00 p.m., but not on Sunday or statutory holidays, as outlined in the Sessional Dates. Students are responsible for meeting all course requirements, including final examinations, as scheduled. Students who require accommodations to meet religious, Indigenous or spiritual observances must make their requests within 10 working days from the beginning of the start of term to their Faculty/Program Office.

Sessional Dates

Please visit the Sessional Dates page for important dates for this academic year.

Student Responsibilities

Academic

McMaster University provides many resources to help students achieve their academic goals, including the Undergraduate Calendar, program advisement reports and academic advisors. The University endeavours to enable students to enrol in required courses so that their program admission requirements and course requisites can be met in a timely manner. The University reserves the right to change a student’s enrolment in classes should the need occur (e.g. low enrolment, urgent timetable changes, etc.).

Students must assume certain responsibilities. They include:

- meeting admission requirements and application deadlines for their intended program(s) of study
- selecting and completing courses in an order that meets requisite and program requirements
- becoming familiar with and respecting University Sessional Dates, the General Academic Regulations, their Faculty/Program-specific regulations, and the Regulations for Aid and Awards as found in the appropriate sections of this Calendar.

Students who do not follow these guidelines may experience academic consequences such as cancellation of course enrolment, completion of courses that are not counted toward their degree, or delayed graduation.

In addition to the responsibilities listed above, students are expected to:

- know and follow the Senate policies
- keep their student account in good standing, paying all charges on time
- be aware that changes to course load and program may affect eligibility for government and University aid and awards (e.g. OSAP, work programs, bursaries, scholarships, etc.)
- consult with Student Accessibility Services in a timely manner to make disability related accommodation requests

Communication

It is the student’s responsibility to:

- maintain current contact information with the University, including address, phone numbers, and emergency contact information
- use the university provided e-mail address or maintain a valid forwarding e-mail address
- regularly check the official University communications channels, including the Mosaic Student Centre. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student’s designated primary e-mail account via their @mcmaster.ca account
- accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student’s @mcmaster.ca account

Academic Obligations

Due dates and evaluations are described in course outlines except where other University policies apply, e.g., SAS accommodations, deferred exams, etc. When students are aware of their progress early in a course they can make informed decisions. Restrictions are placed on academic obligations to enable students to plan their work schedules.

1. Student learning in undergraduate courses should be assessed on more than one occasion. To that end, no single academic obligation (e.g., essay, test, examination, etc.) should have a value of more than 75% of the final grade without approval from the Department Chair or Associate Dean’s Office. Clinical, placement, thesis and capstone courses are exempt.

2. For students requiring relief from an academic obligation, it is at the discretion of the instructor to determine the nature of the relief. In cases such as this, students can be offered the choice of another assessment or the option of writing a final examination which may be worth more than 75% of the course grade.

Early Feedback

1. All students must receive feedback regarding their progress prior to the final date by which a student may cancel the course without failure by default.

2. For Level I and Level II courses, this feedback must equal a minimum of 20% of the final grade.

3. For Level III courses and above, this feedback must equal a minimum of 10% of the final grade.

4. For courses where it is difficult to achieve a numeric grade due to the design of the course (e.g., supervised study, thesis, capstone, inquiry, independent research/study, experiential courses, etc.), clear and early feedback must be provided.

5. When academic obligations are completed by the due dates in the course outline, early feedback will be received by the final date by which a student can withdraw from a course without failure by default. Students who use the MSAF process and other petitionable accommodations may not receive feedback by the early feedback deadline.
Restrictions:

1. Due dates for all term work must be on or before the final day of classes for courses with a final examination. For courses with no final examination, academic assessments can be due on or before the final date of examinations.

2. Tests, quizzes, exams and take home exams worth more than 10% cannot be assigned or due during the last five days of classes plus the day(s) between the end of classes and the beginning of examinations. Assignments worth more than 10% that are assigned at the beginning of the course and noted on the course outline, can be due during this time period, provided students are given sufficient additional detail to enable them to work on the assignment in advance of the due date.

3. Academic obligations cannot be due during the December holiday break or the fall and winter mid-term recesses, with the exception of deferred exams scheduled by the Office of the Registrar.

Residence Requirements

Most students complete all undergraduate work at McMaster University. However, students who complete work at other universities must meet the minimum requirements set out below.

To obtain any four- or five-level, first undergraduate degree:

- at least two levels (approximately 60 units of work) beyond Level I, including the final level, must be completed at McMaster University.
- the final level at least one other level (a minimum of approximately 60 units of work) must be completed at McMaster University, or
- the final level (approximately 30 units of work) including at least 18 units of program-specific requirements must be completed at McMaster University.

Courses taken at another university on a Letter of Permission will not count toward the residence requirements.

All course work for a second bachelor’s degree must be completed at McMaster University.

Notification of Disclosure of Personal Information to Statistics Canada

Statistics Canada is the national statistical agency. As such, Statistics Canada carries out hundreds of surveys each year on a wide range of matters, including education. In order to carry out such studies, Statistics Canada asks all colleges and universities to provide data on students and graduates. Institutions collect and provide to Statistics Canada student identification information (student’s name, student ID number), student contact information (address and telephone number), student demographic characteristics, enrolment information, previous education and labour force activity.

The Federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used only for statistical purposes, and the confidentiality provisions of the Statistics Act prevent the information being released in any way that would identify a student. Students who do not wish to have their information used are able to ask Statistics Canada to remove their identification and contact information from the national database. For further information, please see Statistics Canada’s web site at: http://www.statcan.ca or write to the Postsecondary Section, Centre for Education Statistics, 17th Floor, R.H. Coats Building, Tunney’s Pasture, Ottawa, K1A 0T6.
Record Retention
When individuals apply for admission to and enrollment in programs at McMaster they accept the University’s right to collect pertinent personal information. This information is needed to assess qualifications for entry, establish records of performance in programs and courses, provide the basis for University aid and awards and governmental student aid programs, and to assist the University in the academic and financial administration of its affairs. All documentation submitted to the University in support of applications for admission, residence accommodation, University aid and awards, appeals and/or petitions becomes the property of the University.

All application documents are normally destroyed at the end of each admission cycle for applicants who are not accepted, or who do not enroll following acceptance. For applicants who become McMaster students, their application documents are normally destroyed five years after the last term of their enrollment at the University (regardless of whether or not they graduate).

Supporting documentation relevant to government student aid programs (e.g., OSAP) is kept per the retention policies of the Federal and/or Provincial governments. Supporting documentation, by aid year, relevant to the administration of online aid applications, as well as University aid and awards, will normally be destroyed after seven years.

All information needed to produce official transcripts is maintained permanently.

Second Bachelor’s Degree Programs

For admission to a second undergraduate degree program a student must hold a first undergraduate degree. A second degree is not available in all degrees and/or subject areas. See University Graduates Applying for a Second Bachelor’s Degree.

1. All work for the second degree must be completed at McMaster University.
2. Second degree programs may not be available where there is substantial overlap in the requirements of the first degree. See individual Faculty/Program regulations or consult Faculty/Program Offices for exclusions or further information.
3. Extra courses taken while enrolled in a first degree program, or courses completed as a Continuing Student, may, with the approval of the Faculty, be applied to the second degree program.
4. Students must meet the same regulations for continuation and graduation as are applied to students enrolled in a first degree program.
5. Credit from the first two degrees cannot be applied to a third undergraduate degree. To obtain a third undergraduate degree students must meet all program requirements, i.e., approximately 90 units for a three-level degree and approximately 120 units for a four-level degree.

Requirements for Second Bachelor’s Degree Programs
- Honours Degree following a Three-Level Degree in the Same Subject: For consideration into an Honours B.A. or B.Sc. degree program following a three-level degree in the same subject, a Cumulative GPA of at least 5.0 in the first degree program is required. McMaster Students Studying at Another University: Letter of Permission (LOP) and Exchange (Study Abroad)

1. McMaster students who wish to complete courses at another university for transfer credit towards their McMaster degree must be in good academic standing.
2. Grades obtained in courses at another university will not be included in the calculation of McMaster averages, which may affect consideration for in-course academic awards.
3. Courses taken at another university cannot be used to satisfy McMaster’s Residence Requirements.
4. Students may take up to six units at another university toward a minor.

Letter of Permission (LOP):
1. Students must obtain necessary approval in advance from their Faculty/Program Office.
2. Upon completion of course work, if a grade of 60% or better is obtained, the transcript designation reads T indicating transfer credit. If less than a 60% grade is attained, the transcript designation reads NC indicating no credit. If the student withdraws from the course, the transcript designation reads W indicating withdrawn.
3. Students who do not use their Letter of Permission or drop the course must supply the Faculty/Program Office with a certiﬁed letter from the host university, otherwise a grade of NC will be placed on the transcript.

Exchange (Study Abroad):
1. Students must obtain necessary approvals in advance from both their Faculty/Program Office and International Student Services.
2. Upon completion of course work, if a passing grade (as determined by the host university) is obtained, the transcript designation reads T indicating transfer credit. If less than a passing grade is attained, the transcript designation reads NC indicating no credit. If the student withdraws from the course, the transcript designation reads W indicating withdrawn.
3. Students who return from exchange prior to completion of course work must supply the Faculty/Program Office with a proof of withdrawal from the host university, otherwise grades of NC will be placed on the transcript.

Credit in Courses by Special Assessment (Challenge Examinations)

Students who have acquired knowledge at a different type of institution or in a manner that makes assessment of their qualifications difficult are permitted to seek degree credit through special assessment (Challenge for Credit).

Challenge for credit is not intended to give credit for skills or knowledge gained through high school, college or previous university instruction. The special assessment may include one or more of the following: written examinations, papers, essays, submissions of a substantial body of work, or portfolios, or laboratory
1. Once a student has completed an examination, no special consideration or personal reasons is used when a student misses an examination because of compelling medical

B) The for Deferred Examination (Form B):

Petition for Special Consideration: Request for Deferred Examination (Form B):

The Petition for Special Consideration: Request for Deferred Examination (Form B) is used when a student misses an examination because of compelling medical or personal reasons.

1. Once a student has completed an examination, no special consideration will be granted.

2. A student who misses an examination because of compelling medical or personal reasons may submit a Petition for Special Consideration: Request for Deferred Examination (Form B) to the Faculty/Program Office, normally within five working days of the missed examination.

3. If the reason is medical, the approved McMaster University Medical Form must be used. The student must be seen by a doctor at the earliest possible date, normally on or before the date of the missed exam and the doctor must verify the duration of the illness. Relief will not be available for minor illnesses. If the reason is non-medical, appropriate documentation with verifiable origin covering the relevant dates must be submitted, normally within five working days.

4. In deciding whether or not to grant a petition, the adequacy of the supporting documentation, including the timing in relation to the due date of the missed work and the degree of the student’s incapacity, will be taken into account.

5. It is the student’s responsibility to check Mosaic Student Center > Deferred Exam Approvals or with the Faculty/Program Office for a decision on the request for a deferred examination. If the deferred examination is granted, the student will be informed officially by means of the notation DEF which will appear against the relevant course on the student’s academic record and via Mosaic > Student Center > View My Grades.

6. Deferred examinations are written during the next official University deferred examination period. Default of the deferred examination will result in a fail for that examination.

7. Students who have been granted more than one deferred examination may be required by their Faculty/Program Office to reduce their course load during the term in which the deferred examinations are being written. The decision on a reduced load will be made and communicated with the decision on the request for deferred examinations.

8. At the discretion of the Faculty/Program Office, students who have been granted one or more deferred examinations, may not be allowed to enrol in a subsequent term until all deferred examinations have been completed and the Academic Standing calculated. Students will be notified of this decision by their Faculty/Program Office.

9. Students who will be living more than 160 kilometres from Hamilton during the deferred examination period and wish to write their approved deferred examination at an institution other than McMaster must submit a Request to Write Deferred Examination Off-campus Form at least 15 working days prior to the deferred examination period. Students are responsible for making arrangements for a presider to conduct the deferred examination at an outside institution and for paying any fees such as invigilation and return courier.

10. The authority to grant any petitions lies with the Faculty/Program Office and is discretionary. It is imperative that students make every effort to meet the originally-scheduled course requirements and it is a student’s responsibility to write examinations as scheduled.

Decisions made on Petitions for Special Consideration are final. In accordance with the Student Appeal Procedures, decisions made on Petitions for Special Consideration cannot be appealed to the Senate Board for Student Appeals. However, should students believe a decision violates their human rights, they may wish to consult McMaster’s Policy on Discrimination and Harassment: Prevention & Response and visit one of the four intake offices (Equity and Inclusion Office, Student Support & Case Management, Employee/Labour Relations, Professionalism Office in Faculty of Health Sciences) to initiate a complaint.
be handled under the Academic Integrity Policy and Code of Student Rights and Responsibilities, where appropriate.

1. Relief for missed academic work worth less than 25% of the final grade resulting from medical or personal situations lasting up to three calendar days:
   - Use the McMaster Student Absence Form (MSAF) on-line self-reporting tool. No further documentation is required.
   - Students may submit requests for relief using the MSAF once per term.
   - An automated email will be sent to the course instructor, who will determine the appropriate relief. Students must immediately follow up with their instructors. Failure to do so may negate the opportunity for relief.
   - The MSAF cannot be used to meet a religious obligation or to celebrate an important religious holiday.
   - The MSAF cannot be used for academic work that has already been completed/attempted.
   - An MSAF applies only to work that is due within the period for which the MSAF applies, i.e. the 3-day period that is specified in the MSAF; however, all work due in that period can be covered by one MSAF.
   - The MSAF cannot be used to apply for relief for any final examination or its equivalent. See Petitions for Special Consideration.

2. For medical or personal situations lasting more than three calendar days, and/or for missed academic work worth 25% or more of the final grade, and/or for any request for relief in a term where the MSAF has been used previously in that term:
   - Students must report to their Faculty/Program Office to discuss their situation and will be required to provide appropriate supporting documentation (see Documentation Requirements below).
   - If warranted, the Faculty/Program Office will approve the absence, and the instructor will determine appropriate relief.

**Documentation Requirements**

If the reason for a request for relief is medical, the approved McMaster University Medical Form covering the relevant dates must be submitted. The student must be seen by a doctor at the earliest possible date, normally on or before the date of the missed work and the doctor must verify the duration of the illness.

If the reason is non-medical, appropriate documentation with verifiable origin covering the relevant dates must be submitted, normally within three working days. In some circumstances, students may be advised to submit a Petition for Special Consideration (Form A) seeking relief for missed academic work. In deciding whether or not to grant a petition, adequacy of the supporting documentation, including the timing in relation to the due date of the missed work and the degree of the student’s incapacitation, may be taken into account. Failure to do so may negate the opportunity for relief.

If the petition is approved, the Faculty/Program Office will notify the instructor(s) recommending relief. It is the prerogative of the instructor of the course to determine the appropriate relief for missed term work in their course.

**Examinations**

(See also Office of the Registrar (Examinations))

Examinations conducted by the Office of the Registrar will appear in the Mosaic Student Center and may be scheduled in the morning, afternoon, or evening, Monday through Saturday. Other instructor-scheduled tests and examinations may be held throughout each term in compliance with Academic Obligations: Restrictions. Full details regarding examination procedures conducted by the Office of the Registrar are found in the Undergraduate Examinations Policy.

McMaster student photo identification cards are required at all examinations. Examinations are not rescheduled for purposes of travel. Students must be available for the entire examination period as listed in the Sessional Dates section.

The Office of the Registrar will reschedule final examinations within the examination period for the reasons listed below. Application to reschedule examinations must be made at least 10 working days before the scheduled examination period. Failure to meet the stated deadline may result in the denial of the application.

- Conflict with religious obligations
- More than one examination scheduled at the same time
- Three examinations in one calendar day (midnight to midnight)
- Three consecutive examinations over two days (e.g., December 14th at 4:00 pm and 7:30 pm and December 15th at 9:00 am)

Students who miss a final examination for medical or personal reasons may submit a Petition for Special Consideration: Request for Deferred Examination (Form B) to their Faculty/Program Office, normally within five working days of the missed examination.

Students who begin a final examination, but are unable to complete it for medical reasons, may submit a Petition for Special Consideration (Form A) to their Faculty/Program Office, normally within five working days of the examination.

Students with disabilities are required to inform Student Accessibility Services of accommodation needs for examinations on or before the last date for withdrawal from a course without failure by default. This allows sufficient time to verify and arrange appropriate accommodation.

**Request to Write Deferred Examinations at an Off-Campus Location**

Students living more than 160 kilometers from Hamilton during the deferred examination period and wishing to write their approved deferred examination at an institution other than McMaster must submit a Request to Write Deferred Examination Off-Campus Form at least 15 working days prior to the deferred examination period.

If the deferred examination is written at an off-campus location, any fees incurred are the responsibility of the student. This includes the fee to courier the written examinations back to the Office of the Registrar, Scheduling and Examinations (GH 114).

For information regarding application for Deferred Examination, see Petition for Special Consideration: Request for Deferred Examination (Form B).

**Academic Evaluations**

**Numeric Grading System**

The results of all courses attempted will appear on the transcript. The method for determining final grades will be given in the course outline. Unless otherwise specified in the course outline, course results determined on a percentage scale will be converted to an official letter grade, as indicated in the following equivalent percentage scale.

WITHDRAWN
After the last day for enrolment and course changes, students may withdraw from courses until the last day to withdraw without failure by default. Withdrawn courses will be shown on the student’s transcript with a grade of W. After the last day to withdraw without failure by default, the student will remain enrolled, whether or not they fulfill any further academic obligations, and a final grade will be assigned.

DEF
Courses with the notation DEF have been approved for a deferred examination.

EXTRA
Courses designated as “Extra” at the time of registration by the Faculty Office are not included as units toward completion of a student’s program. The grades obtained in such courses will not be included in the computation of the Cumulative GPA. However, they will be included in the computation of the Fall-Winter Average and the Spring-Summer Average.

UNUSED
Courses designated as "Unused" cannot be used to fulfill the requirements for the student’s current degree program. The grades obtained in such courses will be included in the computation of all averages.

GRADED UNITS
Graded units refer to the number of units taken at McMaster for which a letter or Numeric Grade is earned. Graded units do not include courses assessed with a Non-Numeric Grade.

PASS/FAIL COURSES
Courses evaluated on a Pass/Fail basis are not included in the calculation of averages. The earned units are counted towards degree requirements.

MULTI-TERM FALL/WINTER COURSES
Codes for multi-term Fall/Winter courses have an A/B suffix. Part A must always be taken in the Fall Term immediately preceding Part B. Neither Part A nor B of a multi-term course has academic credit independent of both parts being successfully completed. Students who drop or withdraw from Part A must also withdraw from B. Upon completion of the Fall Term, a grade of MT indicating multi-term will be assigned to Part A and the final grade will be assigned to Part B.

CUMULATIVE GRADE POINT AVERAGE (CUMULATIVE GPA)
The Cumulative GPA is the weighted average based on the Graded Units taken throughout the undergraduate career. The Repeating Courses regulation, effective September 1, 2018, will affect the calculation of subsequent Cumulative GPA.

FALL-WINTER AVERAGE
The Fall-Winter Average is a weighted average based on the grades attained in the Fall and Winter Terms. Overload courses and Extra courses are included in the Fall-Winter Average.

SPRING-SUMMER AVERAGE
The Spring-Summer Average is a weighted average based on the grades attained in the Spring and Summer Term. Overload courses and Extra courses are included in the Spring-Summer Average.

TERM GRADE POINT AVERAGE (TERM GPA)
The Term GPA is a weighted average based on the Graded Units taken in the term.

WEIGHTED AVERAGE
Weighted average is calculated by multiplying the grade points achieved in each course by the number of units in each course, totaling these results, and then dividing this result by the total number of course units.

Example of a weighted average calculation, using the grade points and units for courses attempted:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
<th>Units</th>
<th>Total Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A-</td>
<td>10</td>

</tr>
<tr>
<td>Total</td>

</tbody>
</table>

To calculate average: 153 ÷ 24 = 6.4

HONOUR LISTS
Students are reviewed for Deans’ Honour Lists (DHL) and Provost’s Honour List (PHL) each time a minimum of 30 units (may not exceed 6 units assessed with a non-numeric grade) have been completed. Subsequent assessments are based on all units completed since the previous review. Students will be named to the Deans’ Honour List when a minimum average of 9.5 is achieved. Students will be named to the Provost’s Honour List when an average of 12.0 is achieved.

WITH DISTINCTION
Graduation With Distinction standing is awarded when a minimum Cumulative GPA of 9.5 is achieved in a degree program. In this case, the Latin phrase summa cum laude (“with highest honour”) will appear on the graduate’s diploma.

TRANSCRIPTS
A transcript summarizes a student’s academic career at McMaster University and is available by electronic request through Mosaic. Transcript requests will not be processed for students with outstanding financial accounts at the University or those under investigation for an academic integrity violation.
CREDENTIALS
A credential is a body of academic work or collection of course work that stands on its own and for which a parchment is issued. McMaster credentials include certificates, diplomas and degrees. A single course is permitted to be counted toward a maximum of two credentials.

MINORS
Students enrolled in a four- or five-level program (with the exception of the Medical Radiation Sciences programs) are eligible to obtain a Minor in another subject area, provided that the subject area is not integral to the requirements of their degree program. At least 18 units must be completed at McMaster. Students who wish to receive a Minor must consult the appropriate department section of the calendar. McMaster also offers Interdisciplinary Minors and Thematic Areas. To apply for a Minor, students must complete the Minor/Certificate Application in addition to their online Graduation Information Centre (GIC) application. The student’s Faculty will verify that the requirements have been met and, if successful, the transcript will indicate that a Minor has been obtained. Minors cannot be revoked once approved.

OVERLOAD WORK
Students wishing to take more units than prescribed for their Level/program in the Fall-Winter Term or more than 12 units in the Spring-Summer Term (no more than 6 units in either session of that term) must seek permission from their Faculty/Program Office. Normally, a Fall-Winter Average of at least 7.0 in the immediately preceding review period will be required if an overload is to be permitted. Additional academic fees will be assessed for overload work.

OSAP ELIGIBLE COURSE LOAD
OSAP Eligible Course Load or equivalent refers to the 60% minimum course load per term (40% minimum course load per term for students with permanent disabilities) required to be eligible for full-time OSAP government student aid funding.

REPEATING COURSES
Effective September 1, 2018, students may repeat a course twice (i.e. attempt a course three times). Cross-listed courses count as attempts. Grades from every attempt will appear on the academic transcript. The Cumulative GPA will include only the grade earned on the most recent attempt. Units earned will be counted once toward the student’s program requirements, regardless of the number of times the course is repeated. Prior to September 1, 2018 the grades from all attempts are included in the GPA calculation.

AUDITING COURSES
Students currently enrolled in a degree program wishing to audit a course must obtain approval from the course instructor and their Faculty/Program Office. Additionally:
- course prerequisites must be met
- academic obligations (assignments, test, examinations, etc.) are not completed
- a grade of AUD (audit) will be assigned
- units will not be earned nor applied toward the student’s program requirements
- tuition fees apply
- students will not be permitted to enrol for credit in the course after the Last Day for enrolment and course changes
- students enrolled in a course for credit will not be permitted to change the course to ‘audit’ after the Last Day for enrolment and course changes

Non-McMaster students wishing to audit a course must enrol as a Listener.

PERSONAL INTEREST COURSE (PIC)
McMaster University encourages interdisciplinary study and believes undergraduate studies provides an excellent opportunity to explore topics which are new and unfamiliar. Students, however, may be reluctant to take a course if they are unsure of their academic performance for fear of compromising their Cumulative GPA. The Personal Interest Course (PIC) option is designed to encourage students to explore interests outside of their program without affecting their Cumulative GPA.

1. A student can declare a PIC to signify they want an elective course to be assessed on a Credit or No Credit (CR/NC) grading scale.
2. To receive the grade of CR, the student must earn a final mark of at least 50%. Units earned from a successfully completed PIC will be counted in the units required for a student’s degree as applicable.
3. Courses with a final grade of NC do not count as degree credits or as failures, nor are they included in the GPA calculation or averages. Please note, government student aid (e.g., OSAP) will consider a NC grade as a failure.
4. The PIC option is not available for any course that is considered a program requirement (which includes courses listed as possible required courses), independent study, thesis, field study or placement course, or on a list of required courses. Students are responsible for ensuring the course is an elective course for their program. Engineering students should note the PIC option is available only for complementary studies electives.
5. Students may declare a maximum of 3 units of PIC per term to a maximum of 12 units per four- or five-level degree or a maximum of 9 units per three-level degree. A maximum of 6 units of PIC may be used to satisfy requirements toward a Minor.
6. The PIC option is available to undergraduate students registered in a program above Level I, with a Cumulative GPA of at least 3.5, who are enrolled in a Program/Faculty which is participating in the PIC option. Exchange students should seek advice from the International Study Office and Faculty/Program Office.

The PIC option is not available to students who:
- are enrolled in the School of Medicine, or
- are enrolled in a Program/Faculty which is not participating in the PIC option (see Faculty Academic Regulations), or
- have graduated and are in a second degree or a non-degree program, e.g., continuing, etc.
7. If a percentage grade in a course is required for future applications to graduate or professional school, the PIC option should not be selected for that course. Students may not subsequently request to have a PIC grade recalculated to a numeric grade. Students must carefully review any government (e.g., OSAP) and University aid and award eligibility rules which may be affected by the use of the PIC option.
8. If the student changes their program of study and a course taken as a PIC becomes a required course, the new Faculty/Program Office may accept the course grade of CR or NC or have the grade converted back into a numeric grade. If a grade is converted back into a numeric grade, there will be no retroactive reconsideration of aid and award.
9. Students cannot use the PIC option for courses in which they have been found guilty of academic dishonesty. In these cases, the grade will be converted into a numeric grade.

Deadlines:
1. Students must declare a course as a PIC on Mosaic by the last day for enrollment and course changes date. The student progresses in the course as per normal, and has the option to withdraw from the course as per the normal procedures and deadlines.
2. If the student would rather keep the numeric grade, they must indicate the grade will appear on their transcript.
3. If the student changes their program of study and a course taken as a PIC is a required course, the new Faculty/Program Office may accept the course grade of CR or NC or have the grade converted back into a numeric grade. If a grade is converted back into a numeric grade, there will be no retroactive reconsideration of aid and award.
4. If the student changes their program of study and a course taken as a PIC becomes a required course, the new Faculty/Program Office may accept the course grade of CR or NC or have the grade converted back into a numeric grade. If a grade is converted back into a numeric grade, there will be no retroactive reconsideration of aid and award.

ACADEMIC STANDING REVIEW:
Each year in May and August (and after deferred examinations) academic standing is reviewed and determined for students who have:
- attempted at least 18 units of work since the last review, or
- may be eligible to graduate.
In the academic standing review, three determinations are made:
- whether a student may graduate
• whether a student may continue at the University
• whether a student may continue in a program.

ACADEMIC STANDINGS:

Good Standing
A student who satisfies the minimum requirements to continue in their program without restriction.

May Continue in Program - Academic Probation
Academic probation is assigned when a student:
• achieves a Cumulative GPA between 3.0 and 3.4. If at any future academic standing review their Cumulative GPA falls below 3.5, the academic standing assigned will be "May Not Continue at the University."
• returns to studies after being Reinstated. If at any future academic standing review their Cumulative GPA falls below 3.5, the academic standing assigned will be "Required to Withdraw from the University."

May Not Continue in Program
This standing is assigned to:
• students who fail to achieve the minimum Cumulative GPA to remain in the program, or
• students previously on Program Probation who fail to achieve Good Standing.

To continue at the University, the student must apply to transfer to another program.

May Not Continue in Faculty
May Not Continue in Faculty is assigned when:
• a student enrolled in a program in the Faculty of Engineering or Business has achieved a Cumulative GPA between 3.0 and the minimum requirements to remain in their Faculty, or
• a student enrolled in a program in the Faculty of Business in Level II or above receives a grade of F in more than 6 units.

To continue at the University, the student must apply to transfer to another program or continue as a transition student for one reviewing period.

May Not Continue at University
May Not Continue at University is assigned when:
• a student achieves a Cumulative GPA below 3.0, or
• a student previously on Academic Probation fails to achieve Good Standing.

The student cannot enroll in courses at the University unless granted Reinstatement.

Required to Withdraw from University
A student who at any time received a standing of Academic Probation and at a future academic standing review achieves a Cumulative GPA below 3.5 will be required to withdraw from the University. The student will be unable to apply for Reinstatement for at least 12 months.

REINSTATEMENT
Students must contact the Office of the Registrar to apply for reinstatement within the application deadlines. Reinstatement is not guaranteed.

If reinstatement is granted, the student is placed on academic probation and their Cumulative GPA is re-set to 0.0 on zero units. At the discretion of the Faculty, the student may retain credit for courses successfully completed. If at any academic standing review after reinstatement the student’s Cumulative GPA falls below 3.5, the student will be required to withdraw from the University.

The student must complete a minimum of 60 units of work after reinstatement to be eligible for Graduation With Distinction or other recognition based on the Cumulative GPA.

Level I Registration and Academic Standing Requirements

When you are admitted to McMaster University for a first degree, you will enrol in one of the following Level I programs: Automation Engineering Technology I Co-op (B.Tech.), Automotive and Vehicle Engineering Technology I Co-op, Arts & Science I, Biotechnology I Co-op, Business I, Chemical and Physical Sciences Gateway, Computer Science I, Economics I (effective 2019-2020), Engineering I, Environmental and Earth Sciences Gateway, Health Sciences I, Honours Health and Society I (effective 2019-2020), Humanities I, Honours Integrated Science (Level I), Honours Kinesiology (Level I), Integrated Biomedical Engineering and Health Sciences (IBEHS) I, Integrated Business & Humanities I, Life Sciences Gateway, Mathematics and Statistics Gateway, Medical Radiation Sciences (Level I), Midwifery I, Music I, Nursing I, Process Automation Technology I, Social Sciences I, and Studio Art 1. If you enter the University without Advanced Standing being granted, you must normally attempt a full load of Level I work before proceeding to the work of higher levels.

If you are studying part-time, the Office of the Associate Dean has the discretion to permit you to take some of the work in the higher levels prior to having attempted the full load of Level I. Decisions will be made on an individual basis, according to the special circumstances that apply in the particular case.

At any review during Level I before you complete the Level I work, as in the case of a part-time student, you must attain a GPA of at least 3.5 to continue at the University in good standing. If you attain a GPA of 3.0 to 3.4 you may remain at the University for one reviewing period, but will be placed on academic probation. You may be on academic probation only once during your University career. If your GPA is less than 3.0 you may not continue at the University.

At the review when you complete the Level I work, if you attain a GPA of at least 3.0 and have not previously been on academic probation, but fail to meet the admission requirements of any program, you may continue at the University for one additional reviewing period on academic probation. You will be enrolled in your original Faculty, and will be classified as a Level I transition student if your work may only qualify you to be considered for admission to a program in another Faculty. If, at the end of the next reviewing period, you again do not qualify for admission to a program, you may not continue at the University. If your GPA is less than 3.0 you may not continue at the University.

Students in Arts & Science I should refer to the Arts & Science Program regulations listed below.

Health Sciences I, Nursing I and Midwifery I students should refer to the program regulations listed in the Faculty of Health Sciences section in this Calendar.

Minimum Requirements for Entering and Continuing in a Program Beyond Level I

Admission to the programs beyond Level I is based on performance in Level I. You must meet both the minimum requirements to continue at the University, as described above, and program-specific requirements of each Faculty, as described in this Calendar.

Arts & Science Program

B.ARTS SC. (HONOURS) AND B.ARTS SC. PROGRAMS
You must have a Grade Point Average (GPA) of at least 6.0 to continue in the program. If your GPA is from 5.5 to 5.9, you may remain in the program, but will be placed on program probation for one reviewing period. You may be on program probation only once.

If your GPA is 3.5 to 5.4, you must transfer to another program for which you qualify, or enrol in the Arts & Science Program as a transition student for one reviewing period.
period. During that period you cannot take Arts & Science Program courses. At the end of that period, you may apply for readmission to the Arts & Science Program. If your GPA is 3.0 to 3.4, you will be placed on academic probation. You may continue in the program for one reviewing period as a transition student but cannot take Arts & Science Program courses. The purpose of this period is to prepare yourself for a program outside the Arts & Science Program. You may be on academic probation only once. If your GPA is less than 3.0 you may not continue at the University.

School of Business

BUSINESS I
For specific admission requirements to Commerce II at the end of Business I, you have the following options available to you. If your cumulative Grade Point Average is 3.5 or greater, you are still in good standing at the University. You may continue at the University in a program outside the School of Business or as a transition student in Business. To continue in a program outside the School of Business you must apply for admission to that program through the Office of the Associate Dean appropriate for that program. You should consult that office for more details.

If you are not admitted to another Faculty you may enrol in the School of Business as a transition student for one reviewing period. During that period you cannot take upper-level Commerce courses. The purpose of your registration as a transition student is to make yourself eligible for admission to a degree program. If you have a cumulative Grade Point Average of 3.0 to 3.4, you will be on academic probation and may continue at the University for one reviewing period as a transition student in the School of Business but will not be permitted to take any upper-level Commerce courses. The purpose of the probation period is to make yourself eligible for a degree program. If you have a cumulative Grade Point Average of less than 3.0 at the end of Business I, you may not continue at the University either on a full-time or part-time basis.

COMMERCE II
Upon satisfactory completion of Commerce II, qualified students may continue in one of the following programs:

HONOURS B.COM. PROGRAM:
You must have a cumulative Grade Point Average of at least 5.0 to continue in the Honours B.Com. Program in Level III or IV or to continue in the Honours B.Com. Program. Once admitted to Honours B.Com., if your cumulative GPA is 4.5 to 4.9, you may continue in the Honours B.Com. Program, but will be placed on program probation. You may be on program probation for only one reviewing period. If your GPA is a 3.5 to 4.4, you may transfer to the B.Com Program. If your GPA is less than 3.5, you may not continue at the University. Regardless of your cumulative GPA, if you receive more than six units of failure (in required or elective course work) after entry to Level II Commerce, you will not be permitted to continue in a program in the School of Business.

B.COM. PROGRAM:
You must have a cumulative Grade Point Average of at least 4.0 to continue in the B.Com. Program. If your GPA is 3.5 to 3.9, you are permitted to continue in the B.Com. Program on program probation for one reviewing period. If your GPA is less than 3.5, you may not continue at the University. Regardless of your GPA, if you receive more than six units of failure (in required or elective course work) after entry to Level II Commerce, you will not be permitted to continue in a program in the School of Business.

INTEGRATED BUSINESS & HUMANITIES:
To be admitted to Level II of the Integrated Business & Humanities (IBH) program, students must have completed at least 24 units of the required Level I courses with a minimum Cumulative Grade Point Average (GPA) of 5.0. In Level II and above, you must maintain a cumulative GPA of at least 5.0 to continue in the IBH program. If your cumulative GPA is 4.5 to 4.9, you may continue in the Integrated Business & Humanities program, but will be placed on program probation. You may be on program probation for only one reviewing period. If your cumulative GPA is a 3.5 to 4.4, you must transfer to another program for which you qualify, or enrol in the IBH program as a transition student for one reviewing period. During that period you cannot take IBH program courses. The purpose of this period is to prepare yourself for a program outside the IBH program. If your GPA is 3.0 to 3.4, you will be placed on academic probation. You may continue in the program for one reviewing period as a transition student but cannot take IBH program courses. The purpose of this period is to prepare yourself for a program outside the IBH program. You may be on academic probation only once.

If your GPA is less than 3.0 you may not continue at the University.

Regardless of your cumulative GPA, if you receive more than six units of failure (in required or elective course work) after entry to Level II, you will not be permitted to continue in the Integrated Business & Humanities program.

Faculty of Engineering

B.ENG., B.A.SC. PROGRAMS
Admission to Level II Engineering programs requires completion of all 31 units of required Engineering I courses. Students must maintain a Cumulative Grade Point Average (GPA) of at least 4.0 to continue in an Engineering program. If your GPA is less than 3.5, you may not continue at the University.

B.TECH. PROGRAMS
For specific minimum requirements, please see the descriptions for the individual programs within the Faculty of Engineering section in this Calendar.

Faculty of Health Sciences

For specific minimum requirements, please see the descriptions for the individual programs within the Faculty of Health Sciences section in this Calendar.

Faculties of Humanities and Social Sciences

HONOURS B.A. PROGRAMS; B.MUS. (HONOURS) PROGRAM; BFA (HONOURS) PROGRAM
You must have a Grade Point Average (GPA) of at least 5.0 to continue in an Honours B.A. program. If your GPA is 4.5 to 4.9, you may continue in the Honours program, but will be placed on program probation for one reviewing period. If your GPA is a 3.5 to 4.4, you may transfer to another program for which you qualify. If your GPA is less than 3.0, you may not continue at the University.

Academic Integrity and Academic Dishonesty

The Academic Integrity Policy explains the expectations the University has of its scholars. Some departments and instructors have also developed more specific rules and regulations designed to maintain scholarly integrity. It is the responsibility of each instructor to make students aware of these expectations.

The main purpose of a university is to encourage and facilitate the pursuit of knowledge and scholarship. The attainment of this purpose requires the individual integrity of all members of the University community, including all graduate and undergraduate students.

The University states unequivocally that it demands scholarly integrity from all its members. Academic dishonesty, in whatever form, is ultimately destructive to the values of the University; furthermore, it is unfair and discouraging to those who conduct their research with integrity.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. In an academic setting, this may include any number of forms such as:

- copying or the use of unauthorized aids in tests, examinations and laboratory reports,
- plagiarism, i.e., the submission of work that is not one’s own or for which previous credit has been obtained, unless the previously submitted work was presented as such to the instructor of the second course and was deemed acceptable for credit by the instructor of that course,
- aiding and abetting another student’s dishonesty,
- giving false information for the purposes of gaining admission or credit,
- giving false information for the purposes of obtaining deferred examinations or extension of deadlines, and
- forgling or falsifying McMaster University documents.

For a complete definition and examples, please refer to the Academic Integrity Policy, Appendix 3. Students are encouraged to view: www.mcmaster.ca/academicintegrity for further information on academic integrity and how to avoid academic dishonesty. Allegations of academic dishonesty will be handled according to the procedures described in the Academic Integrity Policy. Penalties may be imposed on students who have been found guilty of academic dishonesty. Examples of penalties include a mark of zero on an assignment, zero for the course with a transcript notation, and suspension or expulsion from the University, etc.

Research Integrity and Research Misconduct

The Research Integrity Policy explains the expectations the University has of its institutional personnel to maintain research integrity.

One of the main purposes of a university is to encourage and facilitate the pursuit of research (e.g., an undertaking intended to extend knowledge through a disciplined inquiry or systematic investigation). The University states unequivocally that it demands research integrity from all of its members. Research misconduct, in whatever form, is ultimately destructive to the values of the University; furthermore, it is unfair and discouraging to those who conduct their research with integrity.

This Policy applies to all faculty, postdoctoral fellows, graduate students and undergraduate students taking part in research, directly or indirectly, and other research support staff (for complete definition of Institutional Personnel please see page 4 of the Research Integrity Policy).

All institutional personnel who are involved in research have a responsibility to report what they, in good faith, believe to be research misconduct. The Office of Academic Integrity is the appropriate office to receive concerns and questions regarding an allegation of research misconduct. Responsible allegations, or information related to responsible allegations, should be sent directly to the Office of Academic Integrity in writing.

For the complete definitions and examples, please refer to the Research Integrity Policy: www.mcmaster.ca/academicintegrity
Financial Information

Upon receiving official acceptance from the Registrar’s Office and upon submission of registration, you are responsible for the payment of all fees as defined in this Calendar. Payment of academic fees does not imply your acceptance to the University. Academic requirements have to be fulfilled before your enrollment is completed.

If you are a new student, you may not forward academic fees to Financial Services until you have both: accepted your Offer of Admission before the stated deadline and enrolled in courses.

You should not send residence fees unless you have received notification of acceptance.

You are responsible for the full fees for each academic term. No fee credits can be transferred from one academic session to another.

It is the policy of the University not to accept enrolment until all previous accounts are paid in full. Any payments received are, therefore, first applied to previous debts and any balances to the most recent debts.

The following fees and regulations were the most recent available at the time of publication. All fees are subject to approval by the Board of Governors. For the most current fee information, please visit http://www.mcmaster.ca/bms/student/. The University reserves the right to amend the fees and regulations at any time.

For information on student awards and financial aid, please refer to Undergraduate Academic Awards and Student Financial Aid sections of this Calendar.

Undergraduate Fees

If you are a full-time student, fees cover your portion of the tuition cost, enrolment, library, campus health services, student organizations, and athletics, and are payable by all students.

No caution deposits are required, but students will be assessed for any unwarranted loss or breakage.

The University reserves the right to assess other supplementary fees or charges in some courses or programs to recover - in part or in full - the cost of providing course materials, accommodation and transportation for field trips, and the costs of breakages.

Fees charged by the University are approved annually by the Board of Governors for the academic year beginning September 1.

Tuition fees include a base per unit fee plus mandatory non-tuition related supplementary fees.

Base Per Unit Tuition Per Faculty

Below is a breakdown of Canadian, International (new admissions for 2012-2013 onward) and Visa Undergraduate (returning visa students.) Fees shown below are for 2019-2020. The fee schedules for 2019-2020 will be available on the Student Accounts & Cashiers website at http://www.mcmaster.ca/bms/student/ in the spring of 2019.

**Expenses**

**Costs Other Than Fees for Students in Clinical Courses**
You must buy uniforms, shoes and uniform accessories, for clinical practice. If you are a Nursing student, your uniform and accessories are ordered under the direction of the School of Nursing. The approximate cost is $200.00. Level I Nursing students are also required to purchase a stethoscope at approximately $100.00 and a basic blood pressure cuff at approximately $40.00.

**Registration Examinations**
Graduates of the B.Sc.N. program can expect to pay fees (currently, approximately $600.00) to write the comprehensive registration examinations administered by the College of Nurses of Ontario.

**Insurance of Personal Property on University Premises**
The University cannot assume any responsibility for the personal property of any employees, faculty members, or students, nor does the University carry any insurance that would cover their personal property. In most cases, personal fire insurance policies provide an automatic 10% extension covering property away from home. You should inspect your insurance policies to be certain that this is the case.

**Death and Dismemberment Insurance**
The University considers that the purchase of insurance coverage for death and dismemberment is the individual responsibility of its students. There are various insurance plans available, and although the University does not specifically endorse any one of these plans, it has no objection to explanatory brochures and literature being posted on bulletin boards or distributed in appropriate places. If you are involved in laboratory or field work, you are particularly encouraged to investigate such coverage.
The Arts & Science Program provides students with a broad-based, liberal education. By means of electives, the Program also allows for substantial specialization in a particular discipline or area. The interdisciplinary Program has been designed for students who wish to further their intellectual growth through the study of significant achievements in both the arts and the sciences and through practice in methods of inquiry.

The integrated curriculum consists of courses offered by the Council of Instructors of the Arts & Science Program, together with other courses offered by departments across the University. The curriculum is designed to meet three major objectives:

1. to enable substantial work in both the arts and the sciences;
2. to develop skills in writing, speaking, and critical thinking;
3. to foster the art of scholarly inquiry into issues of public concern.

Meeting the last of these objectives is the particular aim of inquiry courses, which are required and are taken in Level III or IV. INQUIRY SEMINAR REQUIREMENTS

Upper-Level Inquiry are required and are taken in Level III or IV. Nine units of Upper-Level Inquiry are required and are taken in Level III or IV.

Students who decide to conclude their studies in the program on completion of Level IV are required to complete a minimum of 120 units of Level III or IV courses. Students who intend to undertake graduate study in Arts & Science should consult with the appropriate department concerning requirements.

The Program begins in Level I and leads to the degree, Bachelor of Arts & Science (Honours) on completion of Level IV. The four-level program provides an opportunity for specialization through electives and through an individual study or thesis course. Students who decide to conclude their studies in the program on completion of Level III may qualitify to graduate with the degree, Bachelor of Arts & Science (B.Arts Sc.). Students must have a GPA of at least 6.0 to continue in the program.

The Arts & Science Program is governed by the General Academic Regulations of the University, (See the General Academic Regulations section in this Calendar) and the regulations described below. The Program begins in Level I and leads to the degree, Bachelor of Arts & Science (Honours) on completion of Level IV. The four-level program provides an opportunity for specialization through electives and through an individual study or thesis course. Students who decide to conclude their studies in the program on completion of Level III may qualify to graduate with the degree, Bachelor of Arts & Science (B.Arts Sc.). Students must have a GPA of at least 6.0 to continue in the program. In the case of some Combined Honours programs, the average must include specified courses.

Registration in Level I of the Arts & Science Program is limited to approximately 70 students.

INQUIRY SEMINAR REQUIREMENTS

Inquiry courses comprise ARTSSCI 1C03 and a set of Upper-Level Inquiry seminars on a variety of topics. ARTSSCI 1C03 must be completed in Level I. Nine units of Upper-Level Inquiry are required and are taken in Level III or IV.

COMBINED HONOURS PROGRAMS

Students in the Arts & Science Program may undertake Combined Honours Programs in many disciplines within the Faculties of Business, Engineering, Humanities, Science, and Social Sciences. See Arts & Science and Another Subject for a list of combined programs that are already established. Students should consult the Director of the Arts & Science Program for consideration of other possible
combinations. On-line application for Admission to Level II (April) is required for all Combined Honours Programs.

**INDIVIDUAL STUDY/THESIS**

Students in the B.Arts Sc. (Honours) Program are required to complete an individual study or thesis (ARTSSCI 4A06 A/B or 4C06 A/B). Students in many Combined Honours Programs are also required to complete an individual study or thesis, often through a course in the discipline of their Combined Honours Program (offered by the relevant department). Students should consult the Combined Honours Program description for specific requirements (http://artsci.mcmaster.ca).

For further information, please see Academic Standing and Program Requirements in the General Academic Regulations section in this Calendar.

**INTERNATIONAL/CANADIAN EXCHANGE PROGRAMS**

One calendar year before study abroad: Interested students should consult the Director, Arts & Science Program.

Calendar year of planned travel: No later than the end of December, students must propose a program of study for approval by the Director. Credit will be adjusted accordingly.

To be eligible for study abroad students must have completed 60 units with a GPA of at least 7.0. The B.Arts Sc. (three-year) degree is not granted on the basis of international study; the 30 final units of work must be done at McMaster.

Information concerning student exchanges can also be found in the Academic Facilities, Student Services and Organizations section of this Calendar under the heading International Student Services. Inquiries can be directed to the office at: International Student Services / MacAbroad

Faculty of Business Degree Programs

HONOURS BACHELOR OF COMMERCE PROGRAM

The Honours Bachelor of Commerce (B.Com. (Honours)) requires the completion of 120 units, including specific courses from each level of the program. The Honours Bachelor of Commerce allows substantial concentration in business subjects beyond the essential core of studies. Students must apply and qualify for the Honours Bachelor of Commerce program. Please see the admission requirements below to qualify for the Honours Bachelor of Commerce program listed for each year of entry.

BACHELOR OF COMMERCE PROGRAM

The Bachelor of Commerce program also requires the successful completion of 120 units, including specific courses from each level of the program. The Bachelor of Commerce program provides students with the same core business courses as the Honours Bachelor of Commerce, but focuses elective work on courses outside of the business discipline and Faculty.

INTEGRATED BUSINESS AND HUMANITIES PROGRAM

The Integrated Business & Humanities program also leads to an Honours Bachelor of Commerce degree. Students will be exposed to a variety of learning opportunities via coursework and co-curricular activities, with an emphasis on responsible leadership and management tactics for the changing global economy. The program also focuses on community engagement and sustainable business practices. The Integrated Business & Humanities program is a limited enrolment program and students begin the program in their first year of studies.

ENGINEERING AND MANAGEMENT PROGRAMS

In addition, the School of Business and the Faculty of Engineering offer nine five-level joint programs for the Bachelor of Engineering and Management (B.Eng. Mgt.) degree.

Change of Program

Business students may be permitted to transfer between programs, or students in other Faculties may apply to transfer to a program in the Faculty of Business, provided they have obtained a GPA of at least 5.0 and have completed the necessary admission requirements as described on the Faculty undergraduate website. However, the Integrated Business & Humanities program does not accept transfer students into the program. The Faculty of Business will include the grades of all courses attempted (including failures) in the calculation of the GPA.

Commerce Internship Program

This program is designed to provide students with an opportunity to engage in a career-oriented work experience with one host employer, following their third year of study, for a period of 12 - 16 months. Students compete for opportunities with participating companies through an application and interview process with employers directly. Applications to participate in the internship program will be accepted in the Fall semester (deadlines will be communicated in the Undergraduate Faculty of Business Bulletin and on the website for DeGroote Career and Professional Development services). As a prerequisite to participating in the internship program, students must register in and pass COMMERCE 2IN0 (formerly 3IN0), a comprehensive, non-credit, ten-hour...
career development course. Only students in good standing with a minimum cumulative GPA of 7.0 at the time of application, who have completed Level II and have “passed” COMMERCE 21N0 (formerly 31N0) and completed the mandatory workshops, will be eligible to participate in the Commerce Internship Program. Should a student’s academic standing fall below a cumulative GPA of 7.0, or is no longer in good standing during the recruitment cycle, the student may be removed from CIP. Due to legal considerations, only students who are able to work full time in Canada will be eligible to participate. Upon completion of the internship, students must return to campus full-time to complete their degree program.

After securing an internship, students must successfully complete a minimum twelve months of work experience, obtain satisfactory employer evaluation(s) and submit a detailed work term report prior to their return to campus. All internship students will be enrolled in COMMERCE 4IA0 (Internship Program: 12 Months) and/or COMMERCE 4IB0 (Internship Program: 16 months). Upon successful completion of the internship requirements, a notation including the name of the employer and dates of employment will be added to the student transcript. Commerce 4IA0 and Commerce 4IB0 will be evaluated as a pass/fail.

For more information, please contact Student Experience - Career & Professional Development in DSB-112 or at cip@mcmaster.ca.

Exchange Programs

There are a number of official exchange programs offered to undergraduate students registered in the School of Business. The countries involved include Australia, China, Denmark, France, Germany, Japan, the Netherlands, New Zealand, Norway, India, Ireland, Mexico, Singapore, and the United Kingdom. Official exchange programs offer students the most inexpensive means of studying abroad as students participating in these exchanges avoid the foreign student fees by paying fees to McMaster. All students must be in good standing with a cumulative Grade Point Average of at least 7.0 to be eligible to participate in an exchange. In most cases, students who participate in exchange programs go abroad for Level III of their program. Students are only permitted to take one exchange opportunity, regardless of whether it is a one or two term exchange. Information is available from the Student Experience - Academic Office, DeGroote School of Business, Room 112.

Additional information may be found under International Study in the General Academic Regulations section of this Calendar. Information concerning student exchanges can also be found in the Academic Facilities, Student Services and Organizations section of this Calendar under the heading International Student Services.

It should be noted that not all courses are offered in the evenings or in the Spring/Summer term.

CONTINUING STUDENTS

Graduates of a DeGroote undergraduate Business program, or one of the Engineering and Management programs may take, as part-time students, Commerce courses (to a maximum of 18 units), subject to space availability. Other than those graduates specified above, undergraduate courses in the Faculty of Business are not open to Continuing Students.

SECOND UNDERGRADUATE DEGREE

A student with an undergraduate degree will not be admitted or readmitted to any DeGroote undergraduate program. Such a student may wish to apply for admission to the M.B.A. program.
CREDIT TOWARDS PROFESSIONAL DESIGNATIONS

Educational requirements toward professional designations can be met in varying degrees within the Honours and non-Honours Bachelor of Commerce programs, as well as the Engineering and Management programs. The professional accounting designation Chartered Professional Accountant (C.P.A.) is awarded by the Chartered Professional Accountants of Ontario. The designation C.H.R.P. is awarded by the Human Resources Professionals Association. Further opportunities for meeting educational requirements for professional designations are available to students in all Business and Engineering and Management programs. Additional course work may be taken while in the program provided the student is satisfying all course requirements for their degree. Further units of credit may also be taken after graduation. Information concerning credit towards these professional designations can be obtained from the Student Experience - Academic Office in the School of Business (DSB 112).

Minor

A Minor is an option available to a student enrolled in a four- or five-level program. A Minor consists of at least 18 units of Level II, III or IV courses beyond the designated Level I course(s) that meet the requirements set out in the program description of that Minor. A student is responsible for ensuring that the courses taken fulfill these requirements. Those who have completed the necessary courses may apply for recognition of that Minor when they graduate. If recognition is granted for a Minor, a notation to that effect will be recorded on the student’s transcript. For further information, please refer to Minors in the General Academic Regulations section of this Calendar.

ACADEMIC REGULATIONS

STUDENT ACADEMIC RESPONSIBILITY

You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations of this calendar.

ACCESS TO COURSES

All undergraduate courses at McMaster have an enrolment capacity. The University is committed to making every effort to accommodate students in required courses so that their program of study is not extended. Unless otherwise specified, registration is on a first-come basis and in some cases priority is given to students from particular programs or Faculties. Students will be informed of their enrolment periods and are encouraged to enroll as soon as online enrolment is available to them in the Student Centre in Mosaic.

- maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- use the university provided e-mail address or maintain a valid forwarding e-mail address.
- regularly check the official University communications channels.
- Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student’s designated primary e-mail account via their @mcmaster.ca alias.
- accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student’s @mcmaster.ca alias.

A student enrolled in a DeGroote undergraduate program, in addition to meeting the General Academic Regulations of the University, shall be subject to the following School of Business Regulations.

QUALIFYING FOR THE HONOURS BACHELOR OF COMMERCE PROGRAM (FOR STUDENTS ENTERING BUSINESS I IN SEPTEMBER 2016 OR LATER)

To be considered for entry to the Honours Commerce program, students must have successfully completed Business I (as described in the Program Notes for Students who Enter Business I in 2016 or Later) with a cumulative Grade Point Average of at least 5.0.

QUALIFYING FOR THE HONOURS BACHELOR OF COMMERCE PROGRAM (FOR STUDENTS ENTERING BUSINESS I IN SEPTEMBER 2013, 2014, OR 2015)

To be considered for entry to Level III of the Honours Bachelor of Commerce program, students must have successfully completed Business I and have successfully completed at least 24 units of course work for Level II Commerce (as described in this section of the Calendar) with a cumulative Grade Point Average (GPA) of at least 5.0 and no more than six units of failures (in required and/or elective course work) after entry to Level II Commerce.

Students who wish to take more courses than recommended for a single Level of their program may do so only if their Fall-Winter Average in the immediately preceding review period is at least 7.0. Students registered in the final Level of their program are permitted to overload by up to six additional units during the Fall and Winter terms, with no more than three units of overload per term, in order to become eligible to graduate.

DEFERRED EXAMINATIONS

See the heading Deferred Examinations under Examinations in the General Academic Regulations section of the Calendar for application procedures. Students who are in a precarious position with respect to achieving the minimum GPA or otherwise meeting the Commerce program requirements for continuation in the program will not necessarily be permitted to undertake further work before clearing deferred examinations.

REPEATED COURSES

Business I students may not repeat a passed course in order to qualify for entry into Commerce II. Continuing students who have graduated in the last five years from a DeGroote undergraduate Business program may apply to repeat courses, subject to space availability.

LEVEL I COURSES

Students are not permitted to take more than 48 units of Level I courses in their program.

LEVEL OF REGISTRATION

Work of the next higher level may be undertaken only when necessary to fill a program load. Courses must be taken in the sequence specified by the School of Business.

READMISSION

A student in Level II, III or IV of an undergraduate Business program, who becomes ineligible to continue in the School of Business, may apply for readmission to their respective program in a subsequent calendar year up to a maximum of five years following the year in which the student becomes ineligible to continue. Readmission is not guaranteed.

Application for readmission must be made in writing to the Undergraduate Recruitment, Admissions, and Student Affairs Committee by June 30 for entry in September. This application should explain why the applicant would expect to succeed in the program if readmitted. Forms for this purpose may be obtained from the Student Experience - Academic Office in the DeGroote School of Business, Room 112.
A student who is readmitted after having become ineligible to continue in an undergraduate Business program must repeat all the courses of the level at which he/she became ineligible to continue unless specific course exemptions or credits are granted. The earliest possible term for readmission is the term starting in September of the year following the year in which the student became ineligible to continue.

Former undergraduate Business program students who have not been registered in an undergraduate Business program within the past five years, including those who were in good standing at the time of their most recent registration, must apply for readmission through the Office of the Registrar.

**INTEGRATED BUSINESS & HUMANITIES I**

An IBH student who May Not Continue at the University may apply for reinstatement. Applicants must have been registered in IBH I within the past five years, have exceptional or extraordinary circumstances that affected their performance*, and have not been registered in another McMaster program or at another University during that time.

Students seeking reinstatement must complete the Reinstatement Request Form available at the Office of the Registrar. The completed form and the $100 fee must be submitted to the Office of the Registrar by June 30 for entry in September.

*The application must clearly demonstrate extraordinary circumstances which caused inadequate performance and indicate whether the circumstances surrounding their academic situation have been resolved. The application should also include relevant supporting documentation. Reinstatement cases will be carefully screened and the evidence considered will include the student’s academic performance before and after admission to McMaster, as well as the nature of the reasons cited in the application letter and the accompanying documentation. Such exceptional cases will be considered on their merit. Reinstatement is not guaranteed.

Upon reinstatement, the Grade Point Average for a student is reset to 0.0 on zero units. If at any review after reinstatement the student’s cumulative Grade Point Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

**FORMER STUDENTS FROM THE FACULTY OF BUSINESS**

A student who was previously registered in a DeGroote undergraduate Business program, was in good standing and did not attend in the preceding year, but did attend another post-secondary institution must write to the Student Experience - Academic Office to seek readmission. The letter should describe the student’s activities (academic and otherwise) since he/she was last registered. If five years have passed since the student was last registered at McMaster, he/she should consult the heading Readmission in the Admission Requirements section of this Calendar.

**INQUIRIES REGARDING ACADEMIC REGULATIONS**

A student seeking relief from the School of Business academic regulations must apply in writing to the Undergraduate Recruitment, Admissions, and Student Affairs Committee with appropriate documentation attached. Guidelines for such requests may be obtained from the Student Experience - Academic Office, in the DeGroote School of Business, Room 112.

Engineering is a profession concerned with the creation of new and improved systems, processes and products to serve human needs. The central focus of engineering is design, an art entailing the exercise of ingenuity, imagination, knowledge, skill, discipline and judgment based on experience. The practice of professional engineering requires a mastery of engineering methodology together with a sensitivity to the physical properties of materials, to the logic of mathematics, to the constraints of human, physical and financial resources, to the minimization of risk, and to the protection of the public and the environment.

BACHELOR OF APPLIED SCIENCE PROGRAMS
The Faculty of Engineering offers a four-year Computer Science programs leading to the Bachelor of Applied Science (B.A.Sc.) degree:
- Honours Computer Science
Admission procedures and criteria can be obtained from the Office of the Associate Dean, Academic.

BACHELOR OF TECHNOLOGY PROGRAMS
McMaster University’s Faculty of Engineering and Mohawk College’s School of Engineering Technology have partnered since 1997 to deliver the unique Bachelor of Technology program in response to the needs of today’s innovation-based organizations. The Bachelor of Technology programs operate within the Faculty of Engineering’s W. Booth School of Engineering Practice and Technology. This type of program is targeted to individuals whose technological interests are applications-oriented. The programs being offered are of two kinds:
1. A four-year degree program (leading to both a Bachelor of Technology degree from McMaster and both an Advanced Diploma in Technology and a Business Management Certificate from Mohawk College) with entry directly from high school and
2. A degree completion program (leading to both a Bachelor of Technology degree from McMaster and a Business Management Certificate from Mohawk College) for graduates of the Mohawk College Advanced Diploma in Technology (or graduates of similar programs at other Colleges).

A major thrust of all of the programs is the inclusion of a significant component of management education in order to ensure that graduates are able to perform supervisory and management responsibilities as they advance in their technical careers. The management component is designed to form a cohesive segment which complements the technical program content.

For information concerning the Bachelor of Technology programs, please see the Programs for the Bachelor of Technology (B.Tech.) Degree in this section of this Calendar.

At McMaster, Engineering students take a common Level I program comprised of Mathematics, Materials, Physics, Chemistry, Engineering Graphics, Introduction to Professional Engineering and Design, Computation and complementary studies electives. Integrated Biomedical Engineering & Health Sciences I students take a separate common Level I program comprised of Mathematics, Materials, Physics, Chemistry, Cellular and Molecular Biology, Introduction to Professional Engineering and Design, Computation and complementary studies electives. The specialized programs are entered at Level II. Students interested in the Engineering and Management programs must take ECON 1B03 as one of their complementary studies electives in Level I. Students interested in one of the Engineering and Society programs are advised to choose the six units complementary studies in Level I to be consistent with their chosen focus of the program. Students interested in one of the Engineering and Biomedical Engineering programs must take IBEHS approved technical electives. Programs offered by the Faculty of Engineering include five types of elective courses, which are governed by regulations, as follows:

**Complementary Studies Electives** are broadening courses with subject matter that deals with central issues, methodologies and thought processes of the humanities and social sciences.

In addition to ENGINEER 4A03, or equivalent, and ENGINEER 4B03, complementary studies electives are required in all Engineering programs; except IBEHS does not require ENGINEER 4B03.

The Associate Dean, Academic must authorize each student’s complementary studies elective courses. An approved list is published each spring and is available from the Office of the Associate Dean, Academic. Engineering I students should refer to the Degrees and Programs section of this Calendar to determine which Level I Complementary Studies electives are possible (http://www.eng.mcmaster.ca/documents/electives.pdf).

**Technical Electives** are Engineering or Applied Science courses in subjects relevant to the particular program. A list is available in each Engineering Department office.

**Commerce Electives** are required in Level V of Engineering and Management programs.

**Engineering and Society Focus Electives** are courses offered by various departments throughout the University. These courses are selected in consultation with the Director of the Engineering and Society program, such that they form a proper sequence of the focus electives.

**IBEHS Technical Electives** are approved courses offered by the Integrated Biomedical Engineering & Health Sciences (IBEHS) program or various departments throughout the University in subjects relevant to the particular program. A list is available on ibiomed.mcmaster.ca.

**ENGINEERING CO-OP PROGRAM**

Undergraduate students in the Faculty of Engineering or registered in the Integrated Biomedical Engineering & Health Sciences (IBEHS) program can enroll in a Co-op version of each program. Students enrolled in the former will be required to complete 12 months of industrial/practical experience prior to graduation. The 12 months experience may be acquired through a combination of three four-month experience terms, or a combination of a four month and eight month experience terms, or an experience term of 12 or 16 months duration. Students may enter the Co-op version of their program at any time up to the beginning of Term 2 of their next-to-last level of undergraduate studies.

As well as completing the academic requirements as specified in this Calendar, students in a Co-op program must complete ENGINEER 1EE0.

**ENGINEERING CO-OP FEES**

An Engineering Co-op fee will be charged for students registered in an Engineering Co-op Program and the Integrated Biomedical Engineering & Health Sciences (IBEHS) co-op program.

**EXCHANGE PROGRAMS**

Formal exchange programs with a number of universities in other countries are available for B.Eng. students wishing to attend a foreign university and receive credit at McMaster. For further information please see International Study in the General Academic Regulations section in this Calendar. Information concerning student exchanges can also be found in the Academic Facilities, Student Services and Organizations section of this Calendar under the heading International Student Services.

**LEVEL OF REGISTRATION**

A student is required to register in the lowest level for which more than six units of work is incomplete. Work of a higher level may be undertaken only with the permission of the Associate Dean of Engineering.

**REINSTATEMENT TO FACULTY OF ENGINEERING, OR INTEGRATED BIOMEDICAL ENGINEERING & HEALTH SCIENCES**

A student who is ineligible to continue in the Faculty of Engineering or Integrated Biomedical Engineering & Health Sciences or who May not continue at the university may normally not apply for reinstatement for one full academic year. Exceptions may be made when there are extenuating circumstances which are supported by documentation.

Students seeking reinstatement must complete the Reinstatement Request Form available at the Office of the Registrar or the Office of the Associate Dean of Engineering. The completed form and the $100 fee must be submitted to the Office of the Registrar by June 30. The form must be accompanied by a written explanation of the reason for the student’s previous unsatisfactory academic performance, reasons for reinstatement at this time (including documentation of what has been done to correct previous problems), reasons why the student would expect to succeed in the desired program if reinstated (i.e. what was the previous problem and what has been done to correct it), activities since last registered at McMaster including all academic work. Reinstatement is not guaranteed.

A student who is reinstated after being ineligible to continue at a given level must repeat all the courses of that level, unless specific course exemptions are granted explicitly in the letter of reinstatement. Students who are reinstated will be placed on academic probation, and calculation of their Cumulative Grade Point Average (GPA) will begin anew. If at any review after reinstatement the student’s Cumulative Grade Point Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

ADMISSION TO LEVEL II ENGINEERING PROGRAMS

Admission to Level II Engineering programs requires completion of all 31 units of required Level I courses. Students must maintain a Cumulative Grade Point Average (GPA) of 4.0. All programs have limited enrolment; there should be more applicants than the limiting number in any program, admission to that program will be based on the student's Cumulative Grade Point Average.

In addition, admission to a B.Eng. Mgt. program requires the completion of ECON 1803 with a minimum grade of 5.0; an interview may also be required.

Students admitted to a B.Eng. Mgt. program are required to submit a statement indicating the educational objectives for the focus electives.

Students seeking admission to the Engineering and Management program, or the Engineering and Society program must first be admitted to the relevant department. Thereafter, they will be considered for admission to one of these two programs.

NOTES

1. Students entering Level II will register in the Civil Engineering program following the requirements outlined below. Students entering Levels III and IV should follow the program requirements as specified in the Undergraduate Calendar of the year of their entry into Level II. Such students are advised to refer to their degree audit for the program for which they are registered and to consult with the Department of Civil Engineering for further information.

2. As well as completing the academic requirements as specified in this Calendar, students in a Co-op program must complete ENGINEER 1EE0. ENGINEER 2EC0 will be added to the academic record for each 4-month work term.

3. Before the end of Level III, students must complete a Civil Engineering elective form, and ensure that it has been reviewed by the Department before completing Level IV Registration.

ADMISSION TO LEVEL II IBEHS PROGRAMS

Admission to either the B.H.Sc. (Honours) Health, Engineering Science and Entrepreneurship (HESE) specialization or the B.Eng. BME Biomedical Engineering (BME) specialization requires successful completion of all non-elective Level I IBEHS courses with a minimum Grade Point Average (GPA) of 4.0.

All students who successfully complete the first year of the program will have a space in one of the two degree options. As enrolment is limited in each of the two degree options (HESE or BME), where there is more demand than spaces, competition will be based on first-year academic achievement.

Students seeking admission to the BME specialization will be admitted to one of eight Level II Engineering programs (Chemical, Civil, Electrical, Engineering Physics, Materials, Mechanical, Mechatronics, or Software). Admission to a Level II Engineering program is guaranteed for all students who meet the general progress requirements. All engineering programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on GPA.

Students who do not meet the requirements to proceed to Level II in May will have a Pending flag put on their allocation. The Pending flag will be removed in August if the student completes the requirements over the summer.
NOTES

MECHATRONICS AND BIOMEDICAL ENGINEERING, MECHATRONICS AND BIOMEDICAL ENGINEERING CO-OP (B.ENG.BME)

ADMISSION TO LEVEL II IBEHS PROGRAMS

Admission to either the B.H.Sc. (Honours) Health, Engineering Science and Entrepreneurship (HESE) specialization or the B.Eng.BME Biomedical Engineering (BME) specialization requires successful completion of all non-elective Level I IBEHS courses with a minimum Grade Point Average (GPA) of 4.0.

All students who successfully complete the first year of the program will have a space in one of the two degree options. As enrolment is limited in each of the two degree options (HESE or BME), where there is more demand than spaces, competition will be based on first-year academic achievement.

Students seeking admission to the BME specialization will be admitted to one of eight Level II Engineering programs (Chemical, Civil, Electrical, Engineering Physics, Materials, Mechanical, Mechatronics, or Software). Admission to a Level II Engineering program is guaranteed for all students who meet the general progress requirements. All engineering programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on GPA.

Students who do not meet the requirements to proceed to Level II in May will have a Pending flag put on their allocation. The Pending flag will be removed in August if the student completes the requirements over the summer.

ADMISSION TO LEVEL II ENGINEERING PROGRAMS

Admission to Level II Engineering programs requires completion of all 31 units of required Engineering I courses. Students must maintain a Cumulative Grade Point Average (GPA) of 4.0. All programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on the student’s Cumulative Grade Point Average.

In addition, admission to a B.Eng.Mgt. program requires the completion of ECON 1B03 with a minimum grade of 5.0; an interview may also be required.

Students admitted to a B.Eng.Society program are required to submit a statement indicating the educational objectives for the focus electives.

Students seeking admission to the Engineering and Management program, or the Engineering and Society program must first be admitted to the relevant department. Thereafter, they will be considered for admission to one of these two programs.

NOTES
1. As well as completing the academic requirements as specified in this Calendar, students in a Co-op program must complete ENGINEER 1EE0.

2. Level V Mechatronics Engineering and Management students interested in completing the Entrepreneurship Stream must apply to the Engineering and Management Program Office.

ELECTRICAL ENGINEERING, ELECTRICAL ENGINEERING CO-OP (B.ENG.)
Admission to Level II Engineering programs requires completion of all 31 units of required Engineering I courses. Students must maintain a Cumulative Grade Point Average (GPA) of 4.0. All programs have limited enrollment; should there be more applicants than the limiting number in any program, admission to that program will be based on the student’s Cumulative Grade Point Average. In addition, admission to a B.Eng. Mgt. program requires the completion of ECON 1B03 with a minimum grade of 5.0; an interview may also be required. Students admitted to a B. Eng. Mgt. program are required to submit a statement indicating the educational objectives for the focus electives. Students seeking admission to the Engineering and Management program, or the Engineering and Society program must first be admitted to the relevant department. Thereafter, they will be considered for admission to one of these two programs.

NOTE
1. As well as completing the academic requirements as specified in this Calendar, students in a Co-op program must complete ENGINEER 1E00. ENGINEER 2EC0 will be added to the academic record for each 4 month work term.

**ELECTRICAL AND BIOMEDICAL ENGINEERING, ELECTRICAL AND BIOMEDICAL ENGINEERING CO-OP (B.ENG.BME)**

**ADMISSION TO LEVEL II IBEHS PROGRAMS**

Admission to either the B.H.Sc. (Honours) Health, Engineering Science and Entrepreneurship (HSE) specialization or the B.Eng.BME Biomedical Engineering (BME) specialization requires successful completion of all non-elective Level I IBEHS courses with a minimum Grade Point Average (GPA) of 4.0.

All students who successfully complete the first year of the program will have a space in one of the two degree options. As enrolment is limited in each of the two degree options (HSE or BME), where there is more demand than spaces, competition will be based on first-year academic achievement.

Students seeking admission to the BME specialization will be admitted to one of eight Level II Engineering programs (Chemical, Civil, Electrical, Engineering Physics, Materials, Mechanical, Mechatronics, or Software). Admission to a Level II Engineering program is guaranteed for all students who meet the general progress requirements. All engineering programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on GPA.

Students who do not meet the requirements to proceed to Level II in May will have a Pending flag put on their allocation. The Pending flag will be removed in August if the student completes the requirements over the summer.

**NOTES**

ADMISSION TO LEVEL II ENGINEERING PROGRAMS

Admission to Level II Engineering programs requires completion of all 31 units of required Engineering I courses. Students must maintain a Cumulative Grade Point Average (GPA) of 4.0. All programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on the student’s Cumulative Grade Point Average.

In addition, admission to a B.Eng.Mgt. program requires the completion of ECON 1B03 with a minimum grade of 5.0; an interview may also be required.

Students admitted to a B.Eng.Society program are required to submit a statement indicating the educational objectives for the focus electives.

Students seeking admission to the Engineering and Management program, or the Engineering and Society program must first be admitted to the relevant department. Thereafter, they will be considered for admission to one of these two programs.

NOTES

1. Approved electives for a total of 39-42 units:
   - Students must take 6 units of Approved complementary studies electives (in addition to the 6 units taken in Engineering 1)
   - Students must take at least 3 units of Approved Engineering technical electives outside of Engineering Physics
   - Students must take at least 17 units of Approved technical electives from the Engineering Physics course offerings
   - Remaining units: Students may take any approved Engineering or Science technical elective (including Engineering Physics)

2. Approved technical electives are available in a list on the Engineering Physics website. ENGINEERING PHYSICS AND BIOMEDICAL ENGINEERING, ENGINEERING PHYSICS AND BIOMEDICAL ENGINEERING CO-OP (B.ENG.BME)

ADMISSION TO LEVEL II IBEHS PROGRAMS

Admission to either the B.H.Sc. (Honours) Health, Engineering Science and Entrepreneurship (HESE) specialization or the B.Eng.BME Biomedical Engineering (BME) specialization requires successful completion of all non-elective Level I IBEHS courses with a minimum Grade Point Average (GPA) of 4.0.

All students who successfully complete the first year of the program will have a space in one of the two degree options. As enrolment is limited in each of the two degree options (HESE or BME), there is more demand than spaces, competition will be based on first-year academic achievement.

Students seeking admission to the BME specialization will be admitted to one of eight Level II Engineering programs (Chemical, Civil, Electrical, Engineering Physics, Materials, Mechanical, Mechatronics, or Software). Admission to a Level II Engineering program is guaranteed for all students who meet the general progress requirements. All engineering programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on GPA.

Students who do not meet the requirements to proceed to Level II in May will have a Pending flag put on their allocation. The Pending flag will be removed in August if the student completes the requirements over the summer.

ADMISSION TO LEVEL II ENGINEERING PROGRAMS

Admission to Level II Engineering programs requires completion of all 31 units of required Engineering I courses. Students must maintain a Cumulative Grade Point Average (GPA) of 4.0. All programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on the student’s Cumulative Grade Point Average.

In addition, admission to a B.Eng. Mgmt. program requires the completion of ECON 1803 with a minimum grade of 5.0; an interview may also be required.

Students admitted to a B.Eng. Society program are required to submit a statement indicating the educational objectives for the focus electives.

Students seeking admission to the Engineering and Management program, or the Engineering and Society program must first be admitted to the relevant department. Thereafter, they will be considered for admission to one of these two programs.

NOTES

1. The Department of Materials Science and Engineering offers a common core with four streams of study in Levels III and IV. Students may complete the required units as listed in the calendar in Levels III and IV by choosing a course selection according to the following elective streams:
   - Biomaterials
   - Data Analytics & Computational Materials
   - Materials for Manufacturing & Infrastructure
   - Smart Materials & Devices
   - A list of approved technical electives for each stream is available on the Department of Materials Science and Engineering website.

2. Note that a course in a stream may not be taught when the enrollment is (expected to be) too low.

3. Students entering Level II should register in the Materials Science and Engineering program and follow the requirements outlined below. Students entering Levels III, IV or V should follow the program requirements as specified in the Undergraduate Calendar of the year of their entry into Level II. Such students are advised to refer to their degree audit for the program in which they are registered and to consult with the Department of Materials Science and Engineering for further information.

4. As well as completing the academic requirements as specified in this Calendar, students in a Co-op program must complete ENGINEER 1ECD. ENGINEER 2ECD will be added to the academic record for each 4 month work term.

REQUIREMENTS

Level II: 37 Units

   - Materials for Manufacturing & Infrastructure
   - Smart Materials & Devices

   A list of approved technical electives for each stream is available on the Department of Materials Science and Engineering website.

2. Note that a course in a stream may not be taught when the enrollment is (expected to be) too low.

3. Students entering Level II should register in the Materials Science and Engineering program and follow the requirements outlined below. Students entering Levels III, IV or V should follow the program requirements as specified in the Undergraduate Calendar of the year of their entry into Level II. MECHANICAL AND BIOMEDICAL ENGINEERING, MECHANICAL AND BIOMEDICAL ENGINEERING CO-OP (B.ENG.BME)

ADMISSION TO LEVEL II IBEHS PROGRAMS
Admission to either the B.H.Sc. (Honours) Health, Engineering Science and Entrepreneurship (HESE) specialization or the B.Eng BME Biomedical Engineering (BME) specialization requires successful completion of all non-elective Level I IBEHS courses with a minimum Grade Point Average (GPA) of 4.0.
All students who successfully complete the first year of the program will have a space in one of the two degree options. As enrolment is limited in each of the two degree options (HESE or BME), where there is more demand than spaces, competition will be based on first-year academic achievement.
Students seeking admission to the BME specialization will be admitted to one of eight Level II Engineering programs (Chemical, Civil, Electrical, Engineering Physics, Materials, Mechanical, Mechatronics, or Software). Admission to a Level II Engineering program is guaranteed for all students who meet the general progress requirements. All engineering programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on GPA.

Students who do not meet the requirements to proceed to Level II in May will have a Pending flag put on their allocation. The Pending flag will be removed in August if the student completes the requirements over the summer.

The Bachelor of Technology (B.Tech.) programs, within the Faculty of Engineering’s W. Booth School of Engineering Practice and Technology, provide a degree-level technological education that is distinct from that offered in Bachelor of Engineering programs. These programs are more oriented to applications in specific technologies, with less emphasis on broader mathematical and scientific foundations than a corresponding engineering program. Graduates will have considerably more breadth and depth in their area of technology than graduates of college technology diploma programs. For degree completion programs, a second objective is to provide a path for college diploma graduates to gain an education leading to a university degree. The programs are being offered in two specific configurations:

- **Four-year programs** with direct entry from secondary school leading to a Bachelor of Technology Degree from McMaster and both an Advanced Diploma in Technology and a Business Management Certificate from Mohawk College. The Four-Year Degree Programs are:  
  - Automation Engineering Technology Co-op  
  - Automotive and Vehicle Engineering Technology Co-op  
  - Biotechnology Co-op
CO-OPERATIVE EDUCATION

The successful completion of Co-op work terms is a mandatory component of all B.Tech. degree programs; co-op work terms provide explicit experiential learning which is related to the technologically-oriented careers for which students are being prepared. Testing and enhancing their skills through a co-operative education experience is important in enabling graduates to function effectively in an industrial environment. All Co-op work terms must be completed prior to the start of the final academic term. The co-op component is managed by Engineering Co-op and Career Services.

Four-Year B.Tech. Programs

ACADEMIC REGULATIONS FOR FOUR-YEAR B.TECH. PROGRAMS

STUDENT ACADEMIC RESPONSIBILITY

You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations of this calendar.

ACCESS TO COURSES

All undergraduate courses at McMaster have an enrolment capacity. The University is committed to making every effort to accommodate students in required courses so that their program of study is not extended. Unless otherwise specified, registration is on a first-come basis and in some cases priority is given to students from particular programs or Faculties. Students will be informed of their enrolment periods and are encouraged to enroll as soon as online enrolment is available to them in the Student Centre in Mosaic.

STUDENT COMMUNICATION RESPONSIBILITY

It is the student’s responsibility to:

- maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- use the university-provided e-mail address or maintain a valid forwarding e-mail address.
- regularly check the official University communications channels.
- Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student’s designated primary e-mail account via their @mcmaster.ca alias.
- accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student’s @mcmaster.ca alias.

Students enrolled in a Four-Year program for the B.Tech. degree, in addition to meeting the General Academic Regulations of the University, shall be subject to the following regulations.

Minimum Requirements to Continue in a Program Beyond Level I

In Level II and above, the student must maintain a Grade Point Average (GPA) of at least 3.5 to continue in the B.Tech. program.

SEQUENCE OF COURSES

Courses must be taken in the sequence specified in the requirements for the program as outlined in this Calendar. Students must register for all outstanding work of one level before attempting work for a higher level.

REPEATED COURSES

All failed courses must be repeated if they are required courses for the B.Tech. program or may be replaced if the courses are not explicitly required.

LEVEL OF REGISTRATION

A student is required to register in the lowest level for which more than six units of work are incomplete. Work of a higher level may be undertaken only with the permission of the B.Tech. Academic Advisor, Office of the Associate Dean (Academic).

MINIMUM WORK LOAD

The minimum workload for students registered in Level I of the Bachelor of Technology program is 30 units. The workload for students registered above Level I will range from 30 to 36 units per year and is specified within each academic program.

REINSTATEMENT

A student who is ineligible to continue in a Bachelor of Technology program (May not continue at university) may normally not apply for reinstatement for one full academic year. Exceptions may be made where there are extenuating circumstances that are supported by documentation.

Students seeking reinstatement must complete the Reinstatement Request Form available at the Office of the Registrar. The completed form and the fee must be submitted to the Office of the Registrar by June 30. The form must be accompanied by a written explanation of the reason for the student’s previous unsatisfactory academic performance, reasons for reinstatement at this time (including documentation of what has been done to correct previous academic problems), reasons why the student would expect to succeed in the desired program if reinstated (i.e.
what was the previous problem and what has been done to correct it), activities since last registered at McMaster including all academic work. Letters of reference may be submitted but are not required. Reinstatement is not guaranteed. A student who is reinstated after being ineligible to continue at a given level must repeat all courses of that level, unless specific course exemptions are granted explicitly in the letter of reinstatement. Students who are reinstated will be placed on program probation, and calculation of their Grade Point Average will begin anew. If at any review after reinstatement the student’s Grade Point Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

TRANSFERS FROM ENGINEERING

Students in good standing in Engineering I can apply to transfer directly to Level I B.Tech. Programs. (Automation Engineering Technology I, Automotive and Vehicle Engineering Technology I, Biotechnology I). Advanced credit will be given for Engineering I courses completed with minimum grade of C- which are equivalent to courses in the Bachelor of Technology program. Students who anticipate making such a transfer should consult with the B.Tech. Academic Advisor, Office of Associate Dean (Academic) at the earliest possible opportunity. Applications for transfer must be submitted to the Academic Advisor (Four-Year Bachelor of Technology Programs) no later than June 15.

REQUIREMENTS FOR ADVANCED MOHAWK DIPLOMA

Students registered in the Four-Year Bachelor of Technology Program may elect to leave the Program upon the successful completion of Level III and 8 months of co-op. Students will be awarded a Mohawk College Advanced Diploma.

OVERVIEW

The concept of Health Sciences Education is based on the view that health is a broad subject encompassing both the problems of ill health and the impact of biology, environment and lifestyle on health. Each health sciences program has specific educational requirements, but by learning together in shared facilities there exists an opportunity to establish effective interprofessional working relationships. The programs in the Faculty attempt to meet these goals through a variety of learning approaches. Emphasis is placed on problem-based, small group learning experiences and inquiry. Other approaches to learning, including interdisciplinary educational experiences, are used where appropriate.

In July 1974, the School of Nursing and the School of Medicine were brought together to form the Faculty of Health Sciences. In 1989, the School of Occupational Therapy and Physiotherapy (School of Rehabilitation Science) was added and in 1993 the Midwifery Education Program was established. A further innovation was the implementation of the Bachelor of Health Sciences Program in 2000, followed by the establishment of the Bachelor of Health Sciences (Physician Assistant) in 2008. In 2014, the Faculty implemented a new Biomedical Discovery and Commercialization Program, which has an optional fifth year Master degree component beyond the Bachelor’s degree. In 2017, the Faculty implemented a new Integrated Biomedical Engineering and Health Sciences Program (IBEHS) jointly offered by the Faculty of Engineering and the Faculty of Health Sciences. These programs lead to a B.Eng.BME, or a B.H.Sc. (Honours) Health, Engineering Science and Entrepreneurship (HESE) degree. The Faculty offers the following undergraduate degree programs: Doctor of Medicine (MD), Bachelor of Science in Nursing (B.Sc.N.), Bachelor of Health Sciences (Honours) (B.H.Sc. Honours), Bachelor of Health Sciences in Midwifery (B.H.Sc.), Bachelor of Health Sciences in Physician Assistant (B.H.Sc.), Bachelor of Health Sciences (Honours) in Biomedical Discovery and Commercialization (B.H.Sc. Honours) and most recently the Honours Biology and Pharmacology Co-Op Program (B.H.Sc.).

In addition to its undergraduate programs, the Faculty of Health Sciences also has responsibility for Residency Programs in Postgraduate Medical Education. The Clinician Investigator Program (CIP) allows Residents in the Royal College of Physician and Surgeons of Canada (RCPSC) specialty or subspecialty program to do research as a key component of their medical career. The CI Program at McMaster University is one of the largest Clinical Investigator Training Programs in Canada. The University offers nine distinct research-oriented graduate programs in Health Sciences. Both Masters and Ph.D. programs are offered in: Biochemistry, Biomedical Sciences, Biomedical Engineering, Chemical Biology, Health Research Methodology, Medical Sciences, Neurosciences, Nursing and Rehabilitation Sciences. Masters degrees are offered in: Biomedical Discovery & Commercialization, Child Life and Pediatric Psychosocial Care, eHealth, Global Health, Health Science Education, Occupational Therapy, Physiotherapy, Public Health and Speech-Language Pathology. A Ph.D. is also available in Health Policy.

The Faculty of Health Sciences developed the MD/PhD Program to bridge the gap between medical sciences and clinical application and train the future leaders of healthcare. The program is uniquely structured to allow optimal integration of medical education and research training that starts on the first day and extends throughout this 7 year program.

The Faculty of Health Sciences collaborates with the Division of Health Sciences at Mohawk College in educational programs for other health professions based at the College. Research programs encompassing the broad spectrum of health have been established, including basic and applied research and various aspects of health-care delivery. The graduate programs in medical sciences are related to the various areas of health research.

The Health Sciences Centre at McMaster provides educational and research facilities for medicine, nursing and other health professions. It includes a teaching hospital (the McMaster Site of Hamilton Health Sciences) with extensive ambulatory clinics for primary and specialized aspects of patient care. The building has been designed to bring into close proximity the programs for the various health professions and to integrate the facilities for education, research and patient care in the Faculty of Health Sciences.

In addition to the Health Sciences Centre, education, research and clinical programs are based at other Hamilton Health Sciences sites (Chedoke, General, Juravinski), St. Joseph’s Centre for Mountain Health Services, St. Joseph’s Hospital, St. Peter’s Hospital, Juravinski Cancer Centre and the Health Sciences Education Centre, Mohawk College. Extensive use is made of a variety of community agencies. In accordance with the plan to coordinate the development of specialized health services among the Hamilton and District hospitals, the Postgraduate Education programs in medicine have been developed on a regional basis.

The University reserves the right to change the admission requirements at any time without notice.

As places in the degree programs of the Faculty of Health Sciences are limited, admission is by selection, and possession of published minimum requirements does not guarantee admission. The University, therefore, reserves the right to grant admission to a limited number of students, and to refuse admission to any student whose academic performance or general conduct has been unsatisfactory, or who has withdrawn from the program for a period in excess of one academic year.

An evaluation of Unsatisfactory in the School of Medicine signifies that the student has failed to meet these objectives and the University may require the student to withdraw from the School at any time.

The University reserves the right to require the withdrawal of a student should his or her conduct so warrant.

**FALSIFICATION OF ADMISSION INFORMATION**

An applicant supplying documentation or evidence which, at the time, or subsequently, is found to be falsified will be withdrawn from consideration. Any student admitted to the program having submitted false evidence will be withdrawn.

**HEALTH SCREENING RECORD FOR ADMISSION**

Before registering in a clinically based program, students must submit a McMaster Faculty of Health Sciences Health Screening Record. This form details a student’s immunization history and tuberculosis (TB) screening. It must be completed by a health care professional and submitted before the submission deadline. More detailed information will be provided upon acceptance into the program or visit https://fhs.mcmaster.ca/healthscreening/index.html.

**POLICE RECORDS CHECK**

Incoming students must provide an original Police Records Check, including Vulnerable Sector Screening (VSS). International or Visa students are required to provide an original Police Certificate from each country or territory they have resided for more than six months consecutively for the past five years. More detailed information will be provided upon acceptance into the program or visit https://fhs.mcmaster.ca/pcbe/police_records_check.html.

**CLINICAL COURSE REQUIREMENTS**

Where the performance of the student in clinical practice may jeopardize or endanger the welfare of the patient or the patient’s family, the student may be removed from clinical experience any time during the academic year, until continuation in the course is reviewed.

**INFORMATION AND ACADEMIC COUNSELING**

In certain programs, a faculty member is selected for each student in the September of entry to a degree program and provides each student with advice on evaluations, electives and other educational needs throughout the program. Changes in advisors may be entertained as each student becomes acquainted with Faculty well enough to choose his or her own advisor. The academic advisory role for B.Sc.N. students is fulfilled by the Coordinator of Studies (Nursing). Students are also encouraged to consult individual faculty members regarding career planning.

**TRANSPORTATION**

Students are responsible for expenses involved in transporting themselves to community agencies, making home visits, or in connection with clinical study.

**LICENSE TO PRACTICE**

All graduates who wish to engage in clinical practice in any of medicine, midwifery, nursing, occupational therapy and physiotherapy are subject to any qualifying examinations and other requirements by the licensing bodies for each of these professions. In addition students should be aware that a license may be denied if they have been convicted of a criminal offence for which a pardon has not been granted. A student in such a position should consult the respective licensing body about such a situation.

**Occupational Therapy Examination and Practice Preparation Project (OTepp)**

The OTepp Certificate Program, in partnership with the Canadian Association of Occupational Therapists (CAOT), aims to assist re-entry and internationally educated occupational therapists meet their learning needs in order to successfully transition into Canadian practice.

For students who are unable to join the online class in real time, the sessions are recorded and archived, and can be viewed at the student’s convenience. This is an intense study experience where students are expected to complete readings in preparation for two 3 hour classes each week. Students who successfully complete the first four academic courses may engage in an eight-week practicum, supervised by a registered occupational therapist. Students who complete
the entire program are awarded an undergraduate certificate from McMaster University. More information is available at http://www.otep.ca/.

Program Overview

This program, first offered in September 2000, is an innovative interdisciplinary program in which students take responsibility for their learning and in which there is recognition that both the knowledge and skill sets developed are integral parts of preparing for either further study or entry into the workforce. The principles of independent learning and an emphasis on both content and process are central to the provision of education within the Faculty of Health Sciences, and are reflected in this program. In addition, this program reflects the established tradition within the Faculty of understanding health from biological, behavioural and population-based perspectives. The program will draw on individuals from within the Faculty of Health Sciences and the larger university community to provide students with exposure to basic and applied researchers as well as health care practitioners, enabling students to learn about and experience the study of health from these various perspectives. The program will utilize both a small group, inquiry-based format as well as traditional lecture, lab, and tutorial based teaching formats to provide students with a solid knowledge base in health-related sciences as well as the skills necessary to critically evaluate and synthesize health-related information.

The program is designed to emphasize flexibility, recognizing that students may use this program to prepare for a variety of post-graduate options including graduate work in medical sciences, professional schools and entry into the workforce. Beyond the first year, students may select to focus on one perspective of health and develop relative expertise in this area, while other students may find that their needs are better met by pursuing a broader-based program of study through their senior years.

The program begins in Level I and leads to the degree Bachelor of Health Sciences (Honours) upon successful completion of Level IV. The four-level program offers the opportunity for specialization and focus areas through electives and through individual study or thesis courses.

SPECIALIZATIONS AND FOCUS AREAS

The B.H.Sc. (Honours) Program offers a number of options to allow students to pursue a focused area of study on a particular topic. At the present time, we are offering a specialization for entry in Level II in Child Health. Two concurrent certificate programs are available in Biomedical Sciences and Immunology, Microbiology & Virology. As well, the Global Health curriculum is part of the McMaster Certificate in Immunology, Microbiology, & Virology (IMV), which will provide students with the option of concentrating their studies in these fields. Building on existing strengths of the B.H.Sc. (Honours) Program and expertise in the Faculty of Health Sciences, Science, and Engineering, this course of study will give students a solid grounding in the function of the mammalian immune system, the classification and life cycle of various microbes, and the mechanisms of host defense. Undergraduate degree students in any program may declare the IMV Certificate at the time of graduation provided that they have completed the course requirements. Course requirements and details are available in the Certificate and Diploma Programs section of the Calendar.

GLOBAL HEALTH

Understanding the complex web of relationships and interactions in global health requires an interdisciplinary academic experience. The curriculum in global health in the Bachelor of Health Sciences (Honours) Program provides students with an environment that incorporates insight from the traditional academic fields of anthropology, philosophy, ethics and law, while drawing heavily on the expertise present within the Faculty of Health Sciences in the domains of biostatistics & epidemiology, health economics & policy, molecular medicine & pathology, and health research methodology while simultaneously exploring personal developmental and an academic skill set necessary for the role as contributors to global health issues. Students interested in focusing their studies around Global Health topics can pursue global health curriculum as part of the Interdisciplinary Minor in Globalization Studies, choosing courses from the theme list in Globalization & Health.

CHILD HEALTH SPECIALIZATION

The Child Health Specialization offers students a unique opportunity to apply the inquiry problem-based learning model within the dynamic context of child health, development and community involvement.

The Child Health Specialization curriculum based on three thematic pillars - education, research, and experiential/community learning - cuts across academic disciplines related to child health such as paediatrics, psychiatry, psychology, social work, developmental rehabilitation, education, etc.

The Child Health Specialization utilizes existing expertise within the McMaster University and Hamilton communities; by doing so it allows for the integration of theory and knowledge with experiential learning and research skill development within the challenging context of child health. World-renowned teachers/facilitators, researchers and clinicians from across disciplines serve as supervisors/mentors for students with an interest in child health.

Upon acceptance into the B.H.Sc. (Honours) program and the completion of Level I, students will apply to this specialization in March.

PROGRAM GOALS

The overall goal of the program is to educate students in such a way that upon graduation students have a firm foundation in the health sciences, and the skills necessary to learn and adapt in subsequent educational or occupational environments.

KNOWLEDGE

To acquire a broad knowledge base that reflects the Faculty’s commitment to studying health from biological, behavioural and population-based perspectives. This should include an understanding of the structure, function and behaviour of the human body, the environmental determinants of health and the ways that these factors interact to result in disease or illness.
SKILLS
To acquire and apply the following skills as a student and member of society:
1. Self-directed learning skills: The ability to identify gaps in one’s own knowledge that prevent solving a problem, to formulate a plan that uses appropriate educational resources, and to obtain and synthesize the information needed to solve that problem.
2. Critical thinking skills: The ability to evaluate the merit of information obtained in various ways and to present information in a way that shows evidence of a critical, reflective approach to information and problems.
3. Synthesizing skills: The ability to understand that most problems can be analyzed from a number of perspectives, to identify these perspectives and to formulate solutions that are comprehensive and adequate reflections of various levels of analysis.
4. Communication skills: The ability to communicate an issue in oral and written form, both effectively and concisely.

PERSONAL QUALITIES
Individuals who successfully complete this program should be prepared to accept responsibility for a life-long process of learning and personal and professional growth. They should respect the various approaches to the study of health, and the beliefs associated with these studies, and should be open to new ways of learning and understanding. They should understand that health is a multi-faceted discipline requiring collaboration and be capable of working collegially with others, while being prepared to contribute to the well-being of those around them.

Admission Procedures and Requirements
Please note that the admission policy may be reviewed annually and the admission requirements may be changed in future years. As places in this program are limited, the admission process is competitive. Possession of the minimum requirements does not guarantee admission to the program.

Application to the B.H.Sc. (Honours) Program of the Faculty of Health Sciences implies acceptance of the admission policies, procedures and methods by which applicants are chosen.

Global Health
The Global Health Specialization has been restructured in collaboration with the Interdisciplinary Minor in Globalization Studies to create a theme in Globalization & Health. Students interested in pursuing a focus in global health can pursue the Interdisciplinary Minor in Globalization Studies with a focus on globalization and health.

Child Health Specialization
Students registered in Health Sciences I who are interested in this specialization will apply during March to April via MOSAIC by completing the Program Application for Current Level I Students. Applicants may be asked to submit a statement of interest and may be interviewed. Enrolment is limited to approximately 30 students entering in Level II.

ADMISSION REQUIREMENTS
Applicants From Ontario Secondary Schools
The selection method for Ontario Secondary School applicants is by academic qualifications and a mandatory Supplementary Application. The majority of Level I offers of admission are made in early May. A minimum of 90% is required for consideration. In early May, the following grade information will be used: Semester schools: all final Grade 12 U and/or M courses from first semester or prior years, and second-semester mid-term grades for Grade 12 U and/or M courses. Non-semester schools: second term grades for full-year Grade 12 U and/or M courses. Offers based on interim and/or mid-term grades will be conditional upon maintaining satisfactory performance on final grades. Supplementary Applications are to be submitted electronically via the web at: bhsc.mcmaster.ca. A review of the mandatory Supplementary Application is a very important component of the admission selection process. Applicants who do not complete the Supplementary Application are not considered for admission.
Requirements
The following are the minimum Grade 12 U and/or M requirements under the Ontario Secondary School curriculum:
1. English U;
2. Biology U;
3. Chemistry U;
4. one of Advanced Functions U, Calculus and Vectors U or Mathematics of Data Management U. For those applicants who present with more than one of these Mathematics courses, the highest grade on the transcript at the time of review will be used to calculate the admission average;
5. One U or M non-math/non-science (note: courses in technological education, science, or mathematics are not acceptable);
6. One additional U or M course in any other subject area to total six courses.

Applicants With Qualifications Equivalent to Ontario Secondary School
Applicants from other provinces and countries must achieve the equivalent to the qualifications listed in the Grade 12 U or M course requirements in their secondary school graduation year.

Transfer Applicants
Transfer applicants will be admitted to the B.H.Sc. (Honours) Program from other programs at McMaster and from other post-secondary institutions. The process will be competitive and will be based on the student’s academic qualifications and a Supplementary Application. Enrolment is limited. Students interested in being considered for admission to Level II of the B.H.Sc. (Honours) Program must have completed the equivalent of six units of university Level I Biology and six units of university Level I Chemistry. A Grade Point Average of at least 10.0 (minimum overall average of A-) will be required for admission consideration. Transfer applicants who receive an admission offer to B.H.Sc. (Honours) and express an interest in the BHSc Child Health Specialization may be considered on a case by case basis if space permits. However, there is no guarantee that space will be available in the specialization. In this case, Level 2 transfer students are admitted to the BHSc (Honours), core program.

Bursaries
B.H.Sc. (Honours) students are eligible to apply for one of the following bursaries provided they are Canadian citizens and demonstrate financial need. Applications are available in Mosaic each Fall. The following bursaries have been generously donated to assist Bachelor of Health Sciences (Honours) students in financial need:
- Ron and Gina Fraser Health Sciences Bursary
- Loucks Family and Friends B.H.Sc. Bursary
- Ron and Gina Fraser Health Sciences Bursary

For further information about bursaries, please refer to the Financial Aid & Scholarships website.

Academic Regulations

STUDENT ACADEMIC RESPONSIBILITY
You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations of this calendar.

ACCESS TO COURSES
All undergraduate courses at McMaster have an enrolment capacity. The University is committed to making every effort to accommodate students in required courses so that their program of study is not extended. Unless otherwise specified, registration is on a first-come basis and in some cases priority is given to students from particular programs or Faculties. Students will be informed of their enrolment periods and are encouraged to enroll as soon as online enrolment is available to them in the Student Centre in Mosaic.

Minor
This information is directed to B.H.Sc. students who are interested in completing a minor in another subject area. A minor is not available in the B.H.Sc. (Honours) Program.

A Minor is an option available to a student enrolled in a four- or five-level program. A Minor consists of a minimum of 24 units in the Minor subject. No more than six of these units can be at Level I, unless otherwise stated in the specific requirements of the Minor. A student is responsible for registering for courses to be applied towards a Minor using elective units only. In the case of cross-listed courses, students must ensure that they register in the appropriate subject for the Minor designation. Those who have the necessary requirements may apply for recognition of that Minor when they graduate. If recognition for a Minor is granted, this recognition will be recorded on the student’s transcript. Minors cannot be revoked once approved. Students may return for a second degree in the subject in which they have obtained a Minor, but only at the Honours level. For further information please refer to Minors in the General Academic Regulations section in this Calendar.

CONINUATION IN THE PROGRAM
Students who have a minimum GPA of 6.0 may continue in the program.

If a GPA of 3.0 to 5.9 is obtained a student may remain in the program but will be placed on program probation for one reviewing period. A student may be on program probation only once.

Students previously on program probation who achieve a GPA between 3.0 and 5.4, may transfer to the B.H.Sc. General Program and, with permission, take B.H.Sc. required courses (for which all course prerequisites have been met). Students in this situation must attend a mandatory prereregistration academic advising session in the BHSc Program office. Students who, at next review, achieve a GPA of at least 5.5 may transfer to the B.H.Sc. (Honours) program. Students who fail to meet the minimum requirements for transfer to B.H.Sc. (Honours) by the end of 90 units, must transfer to a non-BHSc program for which he/she qualifies or graduate with a B.H.Sc. three-year degree provided a minimum 3.5 GPA is achieved and all program requirements have been met.

Students whose GPA is less than 3.0 at any academic review may not continue at the University.

CONCURRENT CERTIFICATES
Concurrent certificates are an option available to any student in an undergraduate degree program, and may be completed as part of a student’s elective credit. Some concurrent certificates will require a student be admitted to this option, while others may involve completion of the course requirements and declaring the certificate at the time of graduation. Students should refer to the course requirements and details available in the Certificate and Diploma Programs section of the Calendar. Two concurrent certificate programs are administered by the B.H.Sc. (Honours) Program: Biomedical Sciences and Immunology, Microbiology, & Virology.

LETTERS OF PERMISSION
Students enrolled in the B.H.Sc. (Honours) Program may apply to take courses at another university on a Letter of Permission via MOSAIC. Students must achieve a grade of at least C- to receive credit.

Students are responsible to forward the transcript from the other university directly to the Assistant Dean (MDCL-3300). If a grade of C- or better is attained, the transcript designation reads T indicating transfer credit, or NC indicating not complete if less than a C- grade is attained.

Courses taken at another university cannot be used to satisfy the university’s minimum residence requirements, will not be included in the calculation of the Cumulative or Fall/Winter Averages, and therefore cannot be used to raise standing. Students may take up to six units of courses towards a Minor on a Letter of Permission.

Students must be in good standing to be eligible to take courses on a Letter of Permission.
LEVEL OF REGISTRATION
A student with six or more units incomplete at any level may proceed to the next level of the program only with the permission of the B.H.Sc. (Honours) Program Office.

REINSTATEMENT TO THE B.H.SC. (HONOURS) PROGRAM
A student who may Not Continue at the University may apply for reinstatement. Students seeking reinstatement should complete the Reinstatement Request Form available at the Office of the Registrar (Gilmour Hall, Room 108). The completed form and the $100 fee must be submitted to the Office of the Registrar by July 15 for September entry and November 30 for January entry. The form should explain the reasons for the student’s inadequate performance, corroborated by two letters of support, and should also include relevant documentary evidence such as, for example, a physician’s letter documenting an illness that may have impacted upon the student’s prior academic performance. Reinstatement cases will be carefully screened and the evidence considered will include the student’s academic performance before and following admission to McMaster, as well as the nature of the reasons cited in the letter, the letters of support and the accompanying documentation. Reinstatement is not guaranteed.

If students are reinstated to the University, their Grade Point Average will be re-set to 0.0 on zero units, although students may, at the discretion of the Faculty, retain credit for prior work. Following reinstatement, students will be on academic probation and must complete a minimum of 60 units of work after reinstatement to be eligible for graduation with Distinction or other recognition based on the Grade Point Average. If at any review after reinstatement the student’s Grade Point Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

REGISTRATION AND COURSE CHANGES
It is the responsibility of the student to ensure that the program of work undertaken meets the requirements for the degree. It is highly recommended that you review your advisement report in MOSAIC each time you drop or add courses and seek academic counselling from the B.H.Sc. (Honours) Program Office if you have any questions. Dates for final registration and course changes appear in the Sessional Dates section of this Calendar and are enforced.

ACADEMIC COUNSELLING
Academic counselling is available throughout the year from the B.H.Sc. (Honours) Program Office. It is recommended that students make an appointment with an advisor from the program office if they have any questions.

GRADUATION
A GPA of 5.0 is required for graduation.

Students who successfully complete Level III of the program may request permission from the B.H.Sc. (Honours) Program Office to graduate with a three-level B.H.Sc. degree. Please refer to the General Academic Regulations section in this Calendar for additional information related to graduation.

Honours Bachelor of Health Sciences in Biomedical Discovery and Commercialization Program

ASSOCIATE DIRECTOR
Andrew McArthur/Biochemistry and Biomedical Sciences/B.Sc. (Western Ontario), Ph.D. (Victoria)

PROGRAM MANAGER
Nancy McKenzie/B.Sc., Ph.D. (McMaster)

Program Overview
The Biomedical Discovery and Commercialization (BDC) program is a multidisciplinary training program, concentrated in the biomedical sciences that will produce graduates with the combined strengths of discovery research skills and business acumen. An important goal of the BDC program is the exposure of students to business curriculum in the DeGroote School of Business to complement a strong foundation in the biomedical sciences obtained in the Faculty of Health Sciences. Further, the program seeks to make strong connections with the health research business community in order to provide internships and community mentors for its trainees. With this unique combination of skills and knowledge, BDC graduates will be well positioned for employment in the biotechnology, pharmaceutical and other biomedical science sectors of the economy. Likewise they will be equipped to pursue further training in, for example, graduate studies in research, Master of Business Administration, Law or Medicine. The format of the BDC program is a ‘4+1’ Bachelor plus Master program. It is a four-year undergraduate Bachelor’s degree that begins in Level III, followed by a fifth year Master’s degree. Thus candidates who successfully graduate from the four-year undergraduate BDC program may choose to apply for admission to the one-year non-thesis, course-based Master’s program. Upon successful completion of each of the degree requirements, candidates will have graduated with an Honours Bachelor of Health Sciences degree in BDC and subsequently a Master of Biomedical Discovery and Commercialization.

Admission Procedures and Requirements
Please note that the admission policy may be reviewed annually and the admission requirements may be changed in future years. As places in this program are limited, the admission process is competitive. Possession of the minimum requirements does not guarantee admission to the program.

ADMISSION REQUIREMENTS
Selection will be based on academic achievement, a written statement of interest and an interview but requires, as a minimum, submission of an on-line application by the stated deadline, completion of Level II (or above) of a Science or Health Sciences program with a Grade Point Average of at least 8.0 on the McMaster 12-point scale (equivalent to a grade of B). Refer to the “Apply” tab on the BDC website (bdcprogram-mcmaster.ca/apply) for further information and important dates and deadlines. Applicants from other disciplines may also be a good fit depending on their educational background. Successful completion of both CHEM 20A3 and 20B3 (or equivalent) is strongly recommended prior to entry into the program. CHEM 20A3 must be completed by the end of Level III and CHEM 20B3 must be completed by the end of Level IV. The program will be open to applicants who have completed equivalent Level II courses at another university. Applicants who have completed a University degree are also eligible to apply as a second degree student.

Academic Regulations

STUDENT ACADEMIC RESPONSIBILITY
You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations of this calendar.

ACCESS TO COURSES
All undergraduate courses at McMaster have an enrolment capacity. The University is committed to making every effort to accommodate students in required courses so that their program of study is not extended. Unless otherwise specified, registration is on a first-come basis and in some cases priority is given to students from particular programs or Faculties. Students will be informed of their enrolment...
periods and are encouraged to enroll as soon as online enrolment is available to them in the Student Centre in Mosaic.

In addition to the regulations in the General Academic Regulations section of this Calendar, the following Program regulations apply.

MINOR
This information is directed to BDC students who are interested in completing a minor in another subject area. A minor is not available in the Honours Bachelor of Health Sciences in Biomedical Discovery and Commercialization Program.

A Minor is an option available to a student enrolled in a four or five–level program. A Minor consists of a minimum of 24 units in the Minor subject. No more than six of these units can be at Level I, unless otherwise stated in the specific requirements of the Minor. A student is responsible for registering for courses to be applied towards a Minor using elective units only. In the case of cross–listed courses, students must ensure that they register in the appropriate subject for the Minor designation. Those who have the necessary requirements may apply for recognition of that Minor when they graduate. If recognition for a Minor is granted, this recognition will be recorded on the student’s transcript. Minors cannot be revoked once approved. Students may return for a second degree in the subject in which they have obtained a Minor, but only at the Honours level.

For further information please refer to Minor Designations in the General Academic Regulations section in this Calendar.

CONTINUATION IN THE PROGRAM
Students who have a minimum GPA of 6.0 may continue in the program. If a GPA of 3.0 to 5.9 is obtained a student may remain in the program but will be placed on program probation for one reviewing period. A student may be on program probation only once. Students previously on program probation who achieve a GPA between 3.0 and 5.4, may transfer to a non-BDC program for which he/she qualifies or graduate with a B.H.Sc. three year degree provided a minimum 3.5 GPA is achieved and all program requirements have been met.

Students whose GPA is less than 3.0 at any academic review may not continue at the University.

LETTERS OF PERMISSION
Students enrolled in the Honours Bachelor of Health Sciences in Biomedical Discovery and Commercialization Program may apply to take courses at another university on a Letter of Permission (LOP) by submitting an LOP request in Mosaic. Students must achieve a grade of at least C- to receive credit. Students are responsible to forward the transcript from the other university directly to the BDC Program Office (HSC-4H30). If a grade of C- or better is attained, the transcript designation reads T indicating Transfer Credit, or NC indicating Not Complete if less than a C- grade is attained.

Courses taken at another university cannot be used to satisfy the university’s minimum residence requirements, will not be included in the calculation of the Cumulative or Fall/Winter Averages, and therefore cannot be used to raise standing. Students may take up to six units of courses towards a Minor on a Letter of Permission. Students must be in good standing to be eligible to take courses on a Letter of Permission.

LEVEL OF REGISTRATION
A student with six or more units incomplete at any level may proceed to the next level of the program only with the permission of the BDC Program Office.

REINSTATEMENT TO THE HONOURS BACHELOR OF HEALTH SCIENCES IN BIOMEDICAL DISCOVERY AND COMMERCIALIZATION PROGRAM
A student who may Not Continue at the University may apply for reinstatement. Students seeking reinstatement should complete the Reinstatement Request Form available at the Office of the Registrar (Gilmour Hall, Room 108). The completed form and the $100 fee must be submitted to the Office of the Registrar by July 15 for September entry and November 30 for January entry.

The form should explain the reasons for the student’s inadequate performance, corroborated by two letters of support, and should also include relevant documentary evidence such as, for example, a physician’s letter documenting an illness that may have impacted upon the student’s prior academic performance. Reinstatement cases will be carefully screened and the evidence considered will include the student’s academic performance before and following admission to McMaster, as well as the nature of the reasons cited in the letter, the letters of support and the accompanying documentation. Reinstatement is not guaranteed.

If students are reinstated to the University, their Grade Point Average will be reset to 0.0 on zero units, although students may, at the discretion of the Faculty, retain credit for prior work. Following reinstatement, students will be on academic probation and must complete a minimum of 60 units of work after reinstatement to be eligible for graduation with Distinction or other recognition based on the Grade Point Average. If at any review after reinstatement the student’s Grade Point Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

REGISTRATION AND COURSE CHANGES
It is the responsibility of the student to ensure that the program of work undertaken meets the requirements for the degree. It is highly recommended that you review your advisement report in MOSAIC on the working day following each time you drop or add courses and seek academic counselling from the Program Office if you have any questions. Dates for final registration and course changes appear in the Sessional Dates section of this Calendar and are enforced.

ACADEMIC COUNSELLING
Academic counselling is available throughout the year from the Program Office. It is recommended that students make an appointment with the Program Office if they have any questions.

GRADUATION
A GPA of 5.0 is required for graduation. Students who successfully complete Level Ill of the program may request permission from the BDC Program Office to graduate with a three-level B.H.Sc. degree. Please refer to the General Academic Regulations section in this Calendar for additional information related to graduation.

PROGRAM MANAGER

The Integrated Biomedical Engineering and Health Sciences (IBEHS) Programs are offered jointly by the Faculty of Engineering and the Faculty of Health Sciences. These programs lead to the B.Eng.BME or a B.H.Sc. (Honours) degree.
At McMaster, IBEHS students take a common Level I program comprising Mathematics, Materials, Physics, Chemistry, Cellular and Molecular Biology, Graphics Design, Introduction to Professional Engineering and Design, Computation and complementary studies electives. The specialized programs are entered at Level II. Courses offered by the IBEHS program include two types of elective courses, which are governed by regulations, as follows:

· Complementary Studies Electives are broadening courses with subject matter that deals with central issues, methodologies and thought processes of the humanities and social sciences. In addition to ENGINEER 4A03, or equivalent, complementary studies electives are required in the IBEHS program.

· IBEHS Technical Electives are approved courses offered by the Integrated Biomedical Engineering & Health Sciences program or various departments throughout the University in subjects relevant to the particular program. A list is available on the program website.

IBEHS I:
· Integrated Biomedical Engineering and Health Sciences (IBEHS) I / Integrated Biomedical Engineering and Health Sciences (IBEHS) I Co-op

LEVEL II PROGRAM(S) LEADING TO THE B.ENG.BME DEGREE INCLUDE:
· Chemical and Biomedical Engineering, Chemical and Biomedical Engineering Co-Op (B.Eng.BME)
· Civil and Biomedical Engineering, Civil and Biomedical Engineering Co-Op (B.Eng.BME)
LEVEL II PROGRAM(S) LEADING TO THE B.H.SC. (HONOURS) DEGREE INCLUDE:

ADMISSION TO LEVEL II IBEHS PROGRAMS

Admission to either the B.H.Sc. (Honours) Health, Engineering Science and Entrepreneurship (HESE) specialization or the B.Eng.BME Biomedical Engineering (BME) specialization requires successful completion of all non-elective Level I IBEHS courses with a minimum Grade Point Average (GPA) of 4.0. All students who successfully complete the first year of the program will have a space in one of the two degree options. As enrolment is limited in each of the two degree options (HESE or BME), where there is more demand than spaces, competition will be based on first-year academic achievement.

Students seeking admission to the BME specialization will be admitted to one of the eight Level II Engineering programs (Chemical, Civil, Electrical, Engineering Physics, Materials, Mechanical, Mechatronics, or Software). Admission to a Level II Engineering program is guaranteed for all students who meet the general progress requirements. All engineering programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on GPA.

Students who do not meet the requirements to proceed to Level II in May will have a Pending flag put on their allocation. The Pending flag will be removed in August if the student completes the requirements over the summer.

NOTE

1. As well as completing the academic requirements as specified in this Calendar, students in a Co-op program must complete IBEHS 1EE0. IBEHS 2EC0 will be added to the academic record for each 4 month work term.

REGIONAL PROGRAM ADMINISTRATOR - NIAGARA REGIONAL CAMPUS
C. Henderson
REGIONAL PROGRAM ADMINISTRATOR - WATERLOO REGIONAL CAMPUS
T. Everding

The School of Medicine, established in 1965 and renamed the Michael G. DeGroote School of Medicine in 2004, offers major programs in undergraduate, postgraduate and graduate medical education. The clinical programs use not only the teaching hospital and ambulatory care and research facilities at the McMaster University Medical Centre division of Hamilton Health Sciences, but also the clinical teaching units at several of the major Hamilton hospitals and community health-care centres.

The Undergraduate Medical Program for the MD degree was initiated in 1969, graduating its first students in May 1972. Currently, 203 students will be admitted to the program.

WATERLOO REGIONAL AND NIAGARA REGIONAL CAMPUS

For the incoming classes, 28 of the 203 positions are designated to the Waterloo Regional Campus and 28 positions are designated to the Niagara Regional Campus. All applicants invited to the McMaster Multiple-Mini Interview (MMI) will be asked to rank their site choice (Hamilton, Waterloo Region or Niagara Region) as 1, 2, 3 or no preference. Offers of admission to the medical school will be made from the master rank list irrespective of geographical preference. Subsequent to filling the 203 positions, registrants to the class will be offered a position based on their preference and geographical background.

The offer of admission is binding to a specific site.

Students accepted into the Waterloo Regional Campus and the Niagara Regional Campus will spend the first Medical Foundation in Hamilton. The costs associated with transportation and/or accommodation will be covered by the student. Each Regional Campus is approximately a one-hour drive from Hamilton.

The academic program operates on an 11 months-a-year basis in first and second year, and 8 months in third year and students qualify for the MD degree at the end of the third academic year. The curriculum has been designed to involve medical students in a broad range of human health problems throughout their education and to prepare them for effective working relationships with patients, colleagues and society.

Postgraduate training programs currently include: Anesthesia, Community Medicine, Critical Care, Emergency Medicine, Family Medicine, Internal Medicine (and subspecialties), Laboratory Medicine (and subspecialties), Obstetrics and Gynecology, Pediatrics (and subspecialties), Psychiatry, Radiology, and Surgery programs.

More details on these postgraduate programs are available from the Postgraduate Medical Education Office.

Undergraduate Medical (M.D.) Program

The three-year program in Medicine uses a problem-based approach to learning that should apply throughout the physician’s career. The components have been organized in sequential blocks with early exposure to patients and case management.

UNDERGRADUATE MD PROGRAM GOALS

The Undergraduate MD Program at McMaster University fosters a cooperative, supportive and respectful environment. The curriculum evolves continuously, responsive to the changing needs of Ontario society, nurturing the development of the following competencies at the time of graduation:

1. **Medical Expert:** Students will be able to apply scientific principles from human biology, behaviour and population health to the solution of health problems; they will have the ability to seek out new information and evaluate this information critically.
2. **Communicator/Collaborator:** Students will demonstrate effective communication skills, sensitive to the needs of patients and cognizant of the roles of other members of the health care team in delivering patient care.
3. **Advocate/Resource Manager:** Graduating students will be knowledgeable about the determinants of health and be proactive advocates for their individual patients and for healthy public policy within the context of the health care system.
4. **Scholar/Learner:** Students will be self-directed lifelong learners, whose exposure at McMaster to role models in research and clinical care will encourage them to apply innovative approaches to solving health care problems.
5. **Self-Reflective Practitioner:** Graduating students will be expected to have developed an awareness of the influence of their attitudes, values and assumptions, how these affect their practice of medicine and the impact of the practice of medicine on themselves as individuals.

The study habits and sense of responsibility to self and others provide a basis for session students to develop a series of learning objectives from each tutorial case into small groups of approximately 6-8 students, each with a tutor. In the tutorial, the central focus of the pre-clerkship program is the tutorial. The class is divided or guides. Learning by a process of inquiry is stressed.

To achieve the objectives of the Undergraduate Medical Program, students are introduced to patients within the first Foundation of the curriculum. In this way, students understand the relevance of what they are learning, maintain a high degree of motivation and begin to understand the importance of responsible participation is a hallmark of the Program.

THE COMPASS CURRICULUM

The COMPASS curriculum focuses on the mastery of fundamental concepts in medicine. It continues the McMaster tradition of problem-based learning but incorporates research findings from cognitive psychology. The curriculum is structured on the integration of critical concepts and each step of the curriculum is based on the growth of important concepts learned previously. Tutorial problems are selected to illustrate these concepts in a clinical setting and when students are exploring tutorial problems, which remain the focus of learning, they will be directed towards asking questions of “what”, “why” and “how” as much as “what is the diagnosis?”.

The Pre-Clerkship curriculum is divided into five foundations: four Medical Foundations that provide an introduction to all major organ systems and an Integration Foundation that focuses on purposeful and structurally-supported consolidation of important concepts to improve readiness for Clerkship, as shown in the curriculum outline. A novel feature of the curriculum is a horizontal Professional Competencies curriculum which runs throughout the three years of the program. The Clerkship program consists of rotations in medicine, medical subspecialties, orthopedic surgery, surgery, family medicine, anesthesia, psychiatry, pediatrics, obstetrics and gynecology and emergency medicine. There is also elective time. The program concludes with a short unit dedicated to review and consolidation of concepts.

LEARNING METHODS

To achieve the objectives of the Undergraduate Medical Program, students are introduced to patients within the first Foundation of the curriculum. In this way, students understand the relevance of what they are learning, maintain a high degree of motivation and begin to understand the importance of responsible professional attitudes.

In the Pre-Clerkship Foundations, the students are presented with a series of tutorial problems, requiring for their solution the understanding of underlying biological, population and behavioural principles, the appropriate collection of data and the critical appraisal of evidence. The faculty function as learning resources or guides. Learning by a process of inquiry is stressed. The central focus of the pre-clerkship program is the tutorial. The class is divided into small groups of approximately 6-8 students, each with a tutor. In the tutorial session students develop a series of learning objectives from each tutorial case and negotiate how they will approach their learning tasks. They then acquire the knowledge and skills to meet the objectives of the Foundation in which they are working. They also learn to work as a team, helping and learning from peers. The study habits and sense of responsibility to self and others provide a basis for lifelong working and learning habits. Attendance is mandatory.

In the Professional Competencies curriculum, students work in groups of 8 to 10, with two facilitators, one an MD, the other a non-MD, clinician from an allied health care field. Learning formats include Large Group Sessions, small group tutorials, work with Standardized patients, role-plays, written projects and reflections which are collected as the student’s Reflective Physician Portfolio. Students admitted to the Undergraduate Medical Program have the responsibility and privilege of taking an active role in the planning and evaluation of the education program. Through representation on most policy-making and implementing committees, students can influence decisions in such areas as education, philosophy, faculty recruitment and curriculum design. It is expected that all students will participate in the continuing reappraisal and improvement of the program. Such participation is a hallmark of the Program.

STUDENT ASSESSMENT METHODS

The assessment format has been designed to complement learning in the Undergraduate Medical Program. Assessment methods have been developed to measure how well the student achieves the stated educational objectives in the various components of the program. Continual assessment of the student occurs within the tutorial setting with input from their peers, faculty preceptors and the tutor. Several short assessment exercises are required during each Foundation and at regular intervals during the Professional Competencies component of the program. At the completion of the Foundation or the Professional Competencies assessment period, the tutor or facilitator is responsible for the final summary statement of student learning progress. The tutor prepares a summary of the student’s performance in the tutorials and all associated activities during that Foundation. The summary is provided to the student and to the student advisor electronically while the original is kept in the student’s electronic file.

In addition to the tutorial-based assessment, the accumulation of medical knowledge is assessed at regular intervals by means of the Personal Progress Index. This is in a multiple-choice format. Results are given to the students for self-assessment and, in summary form, to the student advisor. The Personal Progress Index is in addition to, and does not replace, tutorial- and performance-based evaluation. The Program monitors student progress, and responds to students showing persistently low progress.

The acquisition of clinical and professional skills is assessed by clinical skills preceptors in each Foundation and in Clerkship. Also, students participate in an Objective Structured Clinical Evaluation (OSCE) on an annual basis. The Student Assessment Committee has the responsibility of working with the Medical Program to assist with the development and implementation of valid and reliable assessment methods to provide timely and helpful information to assist students and faculty in assessing progress and performance. Continuation in the Program is subject to satisfactory performance.

CURRICULUM PLAN - COMPASS CURRICULUM

LAPTOP REQUIREMENT

The MD Program delivers lectures and course materials online, and communications with students and faculty between the three campuses through the use of email as well as various software programs, including web conferencing capabilities.

TRANSPORTATION COSTS

Students are expected to travel outside their home campus area for mandatory teaching sessions, clinical placements and clerkship rotations. Students are responsible for their own transportation and associated costs in order to complete program requirements. It is anticipated that further rotations will be developed in rural, under-serviced and remote areas. In certain cases, there will be some external funding available.

For students who are accepted into the Waterloo Regional Campus and the Niagara Regional Campus, the first Medical Foundation will be spent in Hamilton and students will be expected to cover the cost of commuting and/or accommodation. Each Regional Campus is approximately a one-hour drive from Hamilton.
The elective experience can be spent in various activities utilizing local, regional or distant resources. Students are expected to cover all transportation and associated costs for electives. Funding may be available for elective travel expenses through a number of funding programs.

**MEDICAL FOUNDATION 1:**
This 11-week Foundation begins with an in-depth introduction to:
- the areas of professional and personal development that will be required to study medicine;
- the pedagogies and assessments that are employed in the Program;
- the healthcare systems in which students will be learning and working; and
- the policies and practices of the MD Program.

Students’ knowledge- and skill-development then focuses on the respiratory and cardiovascular systems’ contributions to concepts of oxygenation and homeostasis. All students study in Hamilton for this Foundation.

**MEDICAL FOUNDATION 2:**
This 8-week Foundation focuses on the renal and hematologic systems’ contribution to concepts of oxygenation and homeostasis. Students’ knowledge- and skill-development also addresses the immunologic, host defense, and neoplastic aspects of hematology. Students study in their assigned campus for this Foundation and subsequent Foundations.

**MEDICAL FOUNDATION 3:**
This 12-week Foundation focuses on concepts of nutrition, energy, homeostasis, and reproduction through knowledge- and skill-development that centers on the digestive, endocrine, and reproductive systems. Following this Foundation, students have a one-week break from study.

**MEDICAL FOUNDATION 4:**
This 12-week Foundation focuses on concepts of locomotion and of neurosensory and behavioural responses to the environment through knowledge- and skill-development that centers on the musculoskeletal system, the neurological system, and psychiatric (brain & behaviour) medicine.

**INTEGRATION FOUNDATION:**
This 12-week Foundation focuses on review of key concepts from the four Medical Foundations in the context of:
- complex, multi-system diseases;
- chronic illness; and,
- concepts centering on immunology, host defense, and neoplasia.

The Integration Foundation allows students to consolidate medical concepts and skills, clinical skills, and professional competencies, offering an opportunity to enhance clinical transfer and support students’ transition to and readiness for Clerkship.

**PROFESSIONAL COMPETENCIES**
The Professional Competencies curriculum is longitudinal. There are seven learning domains of this component of the curriculum: effective communication; health equity and determinants of health; interdisciplinary education; medical decision-making; moral reasoning and ethical judgment; professionalism and self-awareness; and social, cultural, and humanistic dimensions of health.

During the Pre-Clerkship, students are assigned to a small group of 8-11 students at the beginning of MF1 and they remain with this group until the end of MF5. Each group is co-facilitated by a physician and an allied health professional who bring a complementary skill and model inter-professional relationships. During the Clerkship, the curricular content relating to the Professional Competencies domains becomes integrated into the core teaching in each clerkship rotation and is developed by the clerkships in their own formats.

**THE CLERKSHIP**
Clerkship is the prime opportunity for students to participate in the direct care of patients while continuing to learn about the management of health and illness. The Clerkship curriculum is firmly linked to the Pre-clerkship concept-based curriculum and includes continuation of the Professional Competencies curriculum. The student moves from “virtual” tutorial cases to experiencing the care of real patients and populations. Students integrate good habits of learning and assessment into the hospital and clinic environment. The core Clerkship program consists of rotations in Internal Medicine, Medical Subspecialties, Orthopedic Surgery, Surgery, Family Medicine, Anesthesiology, Psychiatry, Pediatrics, Obstetrics and Gynecology, and Emergency Medicine. Clerkship Electives allow students to hone their skills in a variety of clinical areas as well as the opportunity for dedicated research time. The Clerkship rotations take place in hospitals and clinics in the Hamilton, Niagara, Brant, Haldimand-Norfolk, Waterloo, and Halton regions. In the winter of their third year of medical school, students have a three-week break aligning with the national residency interview period.

**ELECTIVES**
Elective studies form an integral part of the Curriculum Plan. They may be considered the epiphenomena of self-directed learning, since students must define goals for electives which are appropriate for their own learning objectives. These objectives represent specific areas of educational need or interest. The responsibility for planning electives rests with each student in collaboration with the student advisor. The two types of electives in the Undergraduate Medical Program are:
1. **Block Electives:** These are blocks of curriculum time dedicated to full-time elective activities. Their satisfactory completion is a mandatory component of the Undergraduate Medical Program. Block Electives occur after Medical Foundation 4 and during the Clerkship, for a total of 24 weeks. Students must organize clinical electives in the MD Program to experience a minimum of three different disciplines, each with a minimum duration of two weeks, to achieve diversification.
2. **Horizontal Electives:** These are undertaken concurrently with other parts of the curriculum. Horizontal electives are entirely optional, not being required for completion of the program, but are used to explore or review a specific area of knowledge or practice in more detail. Horizontal electives must be a minimum of two half days or one full day.

It is particularly important that the student’s advisor be involved in all decisions concerning the selection and carrying out of horizontal electives.

**CONCEPT INTEGRATION AND REVIEW (CIR)**
Concept Integration and Review (CIR) is the final 6-week block of the program, after Clerkship and before graduation. The aims of the block are to help students review and synthesize important concepts that are essential for transition to residency and to help prepare students for the MCCQE Part 1 exam through concept review and exposure to sample questions. Dedicated self-study time throughout the 6-week block is provided and students are expected to review area content prior to attending scheduled sessions. Large group sessions focus on highlighting key concepts and exam writing skills are provided by content experts.

**ENRICHMENT PROGRAM**
The purpose of the Enrichment Program is to stimulate an interest in research and scholarly activity among medical students and to attract some to careers in academic medicine and medical research. There are arrangements in place for a small number of students from each class to devote longer periods of time to the pursuit of special academic experiences. These experiences will not normally begin until the pre-clerkship is completed. Applications will not be considered for the post-clerkship period.

**MD/PH.D. PROGRAM**
The McMaster MD/PhD Program has been training future clinician-scientists since 2007. The rapid pace of healthcare-related research and discovery requires exceptional people who are trained to bridge the gap between basic sciences and clinical application. The McMaster MD/PhD program combines the strength of a unique, patient-oriented medical education with a strong, internationally renowned healthcare research environment.

At present time, students enrolled in the MD/PhD program may carry out the PhD component of their studies in one of the following graduate programs affiliated with the Faculty of Health Sciences at McMaster University: Medical Sciences, Biochemistry, Health Research Methodology, Neurosciences, Biomedical Engineering, Chemical Biology and Health Policy.
Minimum criteria for admission is a 4-year Honours BSc or BHSc with a Grade Point Average (GPA) of 3.8 or greater on a 4 point scale in the final two years of Bachelor’s degree study (with an overall 4-year GPA of at least 3.00/4.00), and a score of 127 or higher on the Critical Analysis and Reasoning (CARS) section of the MCAT 2015 or a Verbal Reasoning (VR) score of 10 or greater on the pre-2015 MCAT. The MCAT must be written within five years of the application year. Please note that McMaster will use the most recent MCAT score for those who write the MCAT more than once.

As some PhD programs may have additional requirements specific to their program, applicants should review the relevant sections of the McMaster School of Graduate Studies Calendar.

Eligible students will have a proven record of research involvement at the undergraduate or graduate level. Existing in-program Master’s students or students in their first year of PhD training in an eligible Health Sciences Affiliated Graduate program at McMaster University are also welcome to apply to the MD/PhD Program with the written consent of his or her research supervisor. Students from other Universities may apply if they will finish their degree requirement before enrolling in the McMaster MD/PhD program. Existing McMaster MD students with a strong research background are also welcome to apply in their first year of medical school.

To apply to the MD/PhD Program, applicants must submit a separate application in addition to the OMSAS application. To gain admission, applicants must be accepted to both the MD Program at the Michael G. DeGroote School of Medicine and one of the PhD programs listed above. Application to the MD component is through OMSAS and must be submitted by the deadline they set. The PhD component of the application is due on November 1st of the application year. Further information and the PhD application can be found at: http://fhs.mcmaster.ca/mdphd/

REGULATIONS FOR LICENCE TO PRACTISE

A degree in medicine does not in itself confer the right to practise medicine in any part of Canada. To acquire this right, university graduates in medicine must hold a certificate of the College of Physicians and Surgeons of the province in which they elect to engage in practice. Students in Ontario medical schools will be required to register with the College of Physicians and Surgeons of Ontario (CPSO). Students intending to practise outside Ontario are urged to consult the licensing body of that province regarding registration.

Licensing requirements vary somewhat among the provinces. The current Ontario requirements for issuance of a Certificate of Registration Authorizing Independent Practice are:

1. Certification by the Royal College of Physicians and Surgeons of Canada or the College of Family Physicians of Canada;
2. Parts I and II of the Medical Council of Canada Qualifying Examination;
3. Canadian Citizenship or Landed Immigrant Status.
4. In general, students are expected to obtain a certificate from either the College of Family Physicians of Canada or from the Royal College of Physicians and Surgeons of Canada in order to be licensed in the province of Ontario.

CANADIAN RESIDENT MATCHING SERVICE (CARMS)

The Matching Service is a clearing-house designed to help final year medical students obtain the post-MD program of their choice, and to help program directors obtain the students of their choice. It provides an orderly method for students to decide where to train and for program directors to decide which applicants they wish to enroll. For both students and directors, it removes the factors that generate unfair pressures and premature decisions. In the winter of their third year of medical school, students have a three-week break aligning with the national residency interview period.

BASIC LIFE SUPPORT TRAINING

All students are required to provide evidence of a current Basic Life Support (BLS) for Health Care Providers (C) certificate (i.e. Red Cross CPR/AED Level HCP, St. John Ambulance Level C HCP, Heart and Stroke BLS for Healthcare Provider C) prior to registration in the medical program. Information is sent to successful applicants prior to registration. The cost of this course is the responsibility of the student. Courses are readily available in most communities.

IMMUNIZATION

The Ontario Public Hospitals Act requires that all persons working in a hospital setting meet certain criteria regarding surveillance for infectious diseases. In order for the requirement of the legislation to be met, students are required to complete the immunization screening process prior to registration in the medical program and annual recertification before starting each academic year. Failure to do so will result in suspension of clinical work. Information will be sent to successful applicants prior to registration.

POLICE RECORDS CHECK

Through the course of their medical school program, all medical students will serve vulnerable populations. In an effort to protect these vulnerable people against potential risk of harm, the Ontario Faculties of Medicine and many clinical agencies require that all medical students provide confirmation of the absence of a criminal conviction or outstanding criminal charges. An offer of admission is contingent upon provision of a Police Records Check, at the applicant’s expense, by early August of the year of admission and at the beginning of each academic year they are registered in.

The Police Records Check includes a Vulnerable Sector Screening and check of the Royal Canadian Mounted Police (RCMP), National Canadian Police Information Centre (CPIC) database for the following:

- All records of Criminal Code (Canada) convictions
- All pardoned sexual offences
- All records of convictions under the Controlled Drugs and Substances Act
- All records of convictions under the Narcotic Control Act
- All records of convictions under the Food and Drug Act
- Any undertakings to enter into a Surety to Keep the Peace
- Any Restraining Orders issued under the Criminal Code (Canada) or the Family Act
- All outstanding warrants and charges

The Michael G. DeGroote School of Medicine will review the files of any applicants who have presented a Not Clear Police Records Check to determine what action, if any, will be taken.

ADMISSION POLICY FOR THE MEDICAL PROGRAM

The official admission policy and deadlines for the Undergraduate Medical Program shall be as published in the Ontario Medical School Information Booklet. This booklet is available through:

Ontario Medical School Application Service (OMSAS)
170 Research Lane
Guelph, Ontario, N1G 5E2
(519) 823-1063
http://www.ouac.on.ca/omsas
omsas@ouac.on.ca

Please note that the admission policy is reviewed annually, and the admission requirements from the previous year may not apply. Because of the nature of the selection procedures, deadlines are strictly enforced. All relevant documentation must be provided by the specified deadlines. Applicants must follow the instructions precisely. All applicants should be aware that the Admissions Office is committed to the protection of personal information. Use of personal information is strictly limited to the appropriate handling of applications, record-keeping for those admitted to the program, and research intended to further the efficacy of Medical Education Program procedures. The University reserves the right to change the admission requirements at any time without notice.

ADMISSION AND REGISTRATION

Registration in the Undergraduate Medical Program implies acceptance by the student of the objectives of the program, and the methods which evaluate progress toward the achievement of those objectives. The following describes the regula-
ADMISSION POLICY AND PROCEDURE

The intention of the McMaster Undergraduate Medical Program is to prepare students to become physicians who have the capacity and flexibility to select any area in the broad field of medicine. The applicant is selected with this goal in mind. Faculty, medical students and members of the community are involved in the admissions process.

Application to the medical program implies acceptance by the applicant of the admission policies and procedures, and the methods by which candidates are chosen for the program. Applicants who will not be ready or able to begin studies as expected may withdraw their applications without prejudice. Application fees cannot be refunded.

Several hundred applicants will be invited for interviews in Hamilton in March or April. From this group a class of 203 is selected.

All applicants are notified in writing, by McMaster University, of the results of their application. These letters will be sent electronically to applicants on the second Tuesday in May.

FALSIFICATION OF ADMISSION INFORMATION

Applicants should understand that where it is discovered that any application information is false or misleading, or has been concealed or withheld, the application will be deemed to be invalid. This will result in its immediate rejection. If the applicant has already been admitted and registered as a student, withdrawal from the University may be required. The MD Admissions Committee will normally not allow the applicant to reapply to the Medical Program for seven (7) years.

ACADEMIC ELIGIBILITY REQUIREMENTS

In addition to obtaining an MD degree, and completing an accredited residency training program, an individual must pass the licensing examinations of the Medical Council of Canada (MCC) in order to practice medicine in Canada. Therefore, MD programs have embedded expectations of both knowledge- and skills-based competencies. Prospective candidates should be aware that, cognitive abilities, physical examination proficiencies, management skills, communication ability, and professional behaviours are all evaluated in timed simulations of patient encounters.

All students must therefore have the required skills and abilities described in the Section on Technical Standards. These are standards that are necessary for success in the MD Program, and to be sufficiently competent to participate in supervised residency training. All individuals are expected to review this document to assess their ability to meet these standards. The document can be found at https://mdprogram.mcmaster.ca/md-program-admissions/who-should-apply.

ACADEMIC ELIGIBILITY REQUIREMENTS

Applicants must report on the Post-Secondary Education Form of the OMSAS application all grades received in the degree credit courses in which they have ever registered. Failure to report courses, programs or grades on the Post-Secondary Education Form will result in the disqualification of the application. All grades are converted by the applicant on the Post-Secondary Education Form to a 4.0 scale according to the OMSAS Undergraduate Grading System Conversion Table. (The Conversion Table is provided with the OMSAS Application.)

All applicants must fulfill the requirements described below:

a. By May of the year of entry, applicants must have completed a minimum of three years of undergraduate work. To satisfy the minimum requirements, academic credentials obtained from a Canadian University must be from an institution with academic standards and performance consistent with those of member institutions of the Council of Ontario Universities (COU). The applicant must be able to demonstrate a high level of academic achievement consistently throughout their undergraduate career.

b. A minimum of 15 full-courses, or 30 half-courses (three years) of Undergraduate university work from a recognized university is required. There is no requirement that applicants carry a full course load. Marks from supplementary and summer courses will be included in the grade point average calculation. If requested, applicants must provide evidence that this requirement has been met by May 30th of the year of entry. Courses graded only by the assignment of Pass or Credit are counted for credit, but will not be included in the GPA calculation. In this case, a minimum of five half-year or five full year courses with letter or numerical grades is required.

c. An applicant who has completed a diploma at a CEGEP must have completed by May of the year of entry, at least two additional full academic years of degree credit work at an accredited university.

d. Applicants who have completed the requirements for a baccalaureate degree in less than three years by the October 1st deadline, are also eligible.

e. By October 1st, applicants must have achieved an overall simple average of at least a 3.0 on the OMSAS 4.0 scale. While an overall simple average of at least 3.0 on the OMSAS 4.0 scale meets the minimal criterion for consideration for admission, prospective applicants should be aware that given the rapidly rising level of competition for a limited number of positions, a significantly higher GPA would provide them with a more reasonable chance of admission. Due to changes from year to year in the level of competitiveness, an exact figure in this regard cannot be provided.

f. Medical College Admissions Test (MCAT) - The MCAT is required for application and must be written within five years of the application year. The score from the Verbal Reasoning section for those who write the MCAT prior to February 2015 or the Critical Analysis and Reasoning section for those who write the MCAT after February 2015 will be used in both formulae (offer of interview and offer of admission). A minimum score of 6 on the Verbal Reasoning component or a minimum score of 123 on the Critical Analysis and Reasoning component is required. All other MCAT component scores will not be considered in the selection process. For those applicants who write the MCAT more than once, the score from the most recent MCAT will be used.

g. Computer-based Assessment for Sampling Personal characteristics (CASPer): All applicants to the Michael G. DeGroote School of Medicine, McMaster University will be required to complete a 90 minute computer-based test, called CASPer, as part of the selection process. CASPer is a web-based assessment of interpersonal skills and decision-making, to be completed at a computer. Applicants must register for CASPer, which is offered in the Fall of each application year, at www.takecasper.com.

No other aspects of the application will be considered if these requirements are not met.

INDIGENOUS APPLICANTS

In accordance with the Self-Identification policy of the Faculty of Health Sciences, Indigenous (First Nations, Inuit and Métis) applicants who wish to apply to a program that has a facilitated Indigenous admissions stream must complete the supplementary Self-identification Application. Information on the policy, application requirements and the online application can be found at: https://ishs.mcmaster.ca/admissions/self-identification.

One self-identification application is used for all Faculty of Health Sciences programs that have a facilitated Indigenous admissions stream, and should only be completed once even if an applicant applied to multiple programs. Applicants identify the program(s) they applied to on the Self-identification Application. The
application will receive a small amount of extra weighting in the formula used to determine the likelihood of invitation to an interview. Individual grades for course work taken as part of a graduate degree will not be included in the calculation of the grade point average.

Graduate students enrolled in a graduate program at the time of application must arrange for their Supervisor, a member of their Supervisory Committee, or the Chair of the Department to provide a letter indicating they are aware the applicant is intending to apply to medical school. Applicants should arrange for this letter to be received at OMSAS by October 1st. If the applicant’s graduate degree supervisor is acting as one of their references, a second letter is not required.

CREDENTIALING OF NON-CANADIAN GRADES

Applicants, Canadian or non-Canadian, who have not met the minimum course number criterion utilizing their Canadian data and require inclusion of their international education data to meet the minimum course number criterion are required to have their foreign transcript assessed by World Education Services (WES). Credentialing assessment means converting foreign academic credentials into their Ontario educational equivalents. A course-by-course evaluation along with the calculation of an overall GPA is required. Applicants must have their transcripts sent directly from their university to WES and OMSAS and be able to prove (with dated letter and dated post office receipt) that an attempt was made to have the transcript issued by their university and sent to OMSAS by October 1st. Those requiring WES assessment must also ensure that transcripts are received by WES in time for their assessment to reach OMSAS by October 1st. A WES Assessment is not required for foreign exchanges.

ENGLISH LANGUAGE PROFICIENCY

Applicants whose first language is not English must satisfy by October 1st, at least one of the following conditions:

1. Provide evidence of a combined score on the TOEFL iBT test with an overall score of at least 86 with minimum scores of 20 in each of the four components, or the equivalent on other recognized tests has been achieved (McMaster University code for TOEFL test score submissions is #0836); or
2. Have attended an educational institution, where instruction was in English, for at least three years; or
3. Have resided for at least four years in an English-speaking country.

INTERVIEWS

Several hundred applicants will be invited to Hamilton for an interview. Because the interviews involve many other people, applicants must attend on the date and time specified. Attendance at an in-person interview is mandatory in order to be considered for admission. Applicants are responsible for their own travel expenses. The interview process entitled the Multiple Mini Interview (MMI), is primarily composed of a series of ten-minute encounters over a two-hour period. Due to the nature of the MMI, videoconference or telephone interviews are not possible.

SELECTION

All the information resulting from the process described above, as well as the Confidential Assessments from referees, may be reviewed and used in the final selection. Applicants will be notified in writing by McMaster University of the results of their application. These letters are sent electronically to applicants on the second Tuesday in May. Anyone accepting an offer of admission must provide, within two weeks of acceptance, a deposit in the amount of $1,000 (Canadian), non-refundable, which will subsequently be applied towards tuition. The MD Program begins in late August with a mandatory Orientation Week. Students accepting their offer of admission must provide to begin the program at the start of Orientation Week and must attend all day-time program-related sessions.

APPLICATION FOR DEFERRED REGISTRATION

Deferred registration may be granted only under exceptional circumstances. The request for deferral must normally be submitted within two weeks of the offer of admission and will be considered by the UGME Deferral Board. Deferral for parental/family, illness or other personal/compassionate reasons may be considered if received after this deadline where circumstances did not allow the applicant to meet the deadline.
INTERNATIONAL APPLICANTS
Interested International applicants may apply through the regular process. International (Visa) students should be aware that admission to the Undergraduate MD Program does not confer eligibility to apply subsequently through the Canadian Residency Matching Service (CaRMS) for a residency training position in Canada. Applicants should check the CaRMS web site (http://www.carms.ca/) for further information.

ADVANCED STANDING/TRANSFER
The structure of the McMaster Program requires that all students begin in Medical Foundation 1. There is no provision for advanced standing or transfer into the program.

UNSUCCESSFUL APPLICANTS
Application files, including transcripts, from one year are not held over to another year. If an unsuccessful applicant wishes to reapply, a new application package, including supporting documentation must be submitted, using the OMSAS Application and the OMSAS Information Booklet, for the next admission selection cycle.

RETENTION OF DOCUMENTS
All documentation submitted in support of an application for admission becomes the property of the University and is not returnable. If an applicant is not accepted, or fails to enroll following acceptance, the identifiable documentation will be destroyed at the end of the admissions cycle in keeping with university policy.

FINANCIAL INFORMATION
Financial difficulties are among the most frequent problems experienced by students in undergraduate medical schools. At McMaster, these are intensified by the lack of opportunity for summer employment. In this situation, it is incumbent on students admitted to the MD Program to clarify immediately their personal financial situation and to secure or identify sufficient support to meet their financial obligations over the subsequent three years. The Undergraduate MD Program cannot assume this responsibility.

In 2018-2019, the academic fees (tuition and student supplementary fees) for a student in the McMaster Undergraduate Medical Program were:

<table>
<thead>
<tr>
<th>CANADIAN CITIZENS AND LANDED IMMIGRANTS</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Year I</td>
<td>$28,893.73</td>
</tr>
<tr>
<td>Year II</td>
<td>$28,893.73</td>
</tr>
<tr>
<td>Year III</td>
<td>$28,893.73</td>
</tr>
</tbody>
</table>

INTERNATIONAL (VISA) STUDENTS
Each Year $95,971.55

In addition, the cost of books and diagnostic equipment for a Year 1 student was approximately $3,000. It is strongly recommended that students purchase the full complement of medical equipment necessary for clinical skills. Equipment lists and special prices will be offered to medical students within the first few months of medical school. Students are also responsible for their transportation costs related to their training.

Financial assistance is available to Ontario residents from the federal and provincial governments through the Ontario Student Assistance Program (OSAP). To be eligible a student must be a Canadian Citizen or permanent resident of Canada and fulfill certain requirements for residency in Ontario. Students who are legal residents of other provinces need to check with their respective provincial financial aid programs about eligibility for support prior to acceptance. In addition, the following sources of funding are available to undergraduate medical students:

Bursaries
There is a bursary program which has been developed by the Faculty of Health Sciences and the central University campus. Bursaries are awarded to students who are Canadian citizens and demonstrate financial need. All bursaries are distributed during the late fall of each year. Bursaries are intended to offset provincial financial assistance and cannot supplement the full cost of medical education.

ELECTIVE TRAVEL AWARDS
The Undergraduate Medical Program has in the past indicated its preparedness to recognize students who distinguish themselves and the University by virtue of their scholarship and their contribution to the university community. At the same time, the School has indicated that the terms of reference for such awards should neither compromise the spirit of cooperative scholarship which characterizes its MD Program nor replace its priority of concern for financial assistance awards. A growing number of estates and agencies have donated funds to the University and the Undergraduate Medical Program for purposes of recognizing scholastic merit among medical students. In order to meet the requirements of these awards within the spirit of cooperative scholarship, these funds are available to support individual students in their pursuit of specific elective projects or activities. Both bursaries and elective travel awards can be accessed through MOSAIC during the annual USME Bursary Program in September/October.

NOTE
The School of Nursing has a large number of part-time faculty appointed from community health-care agencies. A complete list is available from the office of the Vice-Dean (Health Sciences) and Executive Director, School of Nursing.

The B.Sc.N. Program
In 1942, McMaster University began its first program in Nursing, a cooperative effort between the University and the Hamilton General Hospital. Since the establishment of McMaster University’s School of Nursing in 1946, students have received a Bachelor of Science in Nursing (B.Sc.N.) degree upon graduation. The program has functioned completely under the supervision of the University, while enjoying the full cooperation of community hospitals and agencies in the operation of its professional practice courses. In July 1974, the Schools of Nursing and Medicine became the Faculty of Health Sciences.

The B.Sc.N. Program promotes the development of nursing as a caring, client-centered, scientific and humanistic profession. With an emphasis on person-based learning within a problem-based approach, and group and self-directed learning, the program provides a general baccalaureate education in nursing for the preparation of professional nurses who will practise in a variety of health-care settings. Central to our mission is the preparation of nurses who will work to advance the health and well-being of individuals, families, communities and society. In fulfilling its mission, the B.Sc.N. Program promotes skills in its graduates to prepare them for life-long, self-directed learning, critical thinking, evidence informed decision making, advocacy and collective action. Provincial legislation on entry to practice requires all new graduating nurses to have a baccalaureate degree in nursing. In response, McMaster University, Mohawk College and Conestoga College have formed an educational consortium to offer the McMaster Nursing degree through the McMaster Mohawk Conestoga B.Sc.N. Program. Currently the Basic (A) and Accelerated (F) Streams are offered at the McMaster site. Students wishing to register in the B.Sc.N. Program at McMaster should pay particular attention to the information which immediately follows this introduction. The Basic (A) and Post Diploma R.P.N. (E) Streams are offered at the Mohawk and Conestoga sites. Students who wish to register in the B.Sc.N. Program at either Mohawk or Conestoga College should refer to the Collaborative B.Sc.N. (A) and (E) Stream references throughout the School of Nursing section of the Calendar. Students are also advised to contact the Office of the Registrar at either Mohawk or Conestoga College for additional information. Please note that any information that is site specific is noted in the appropriate section of the Calendar; otherwise, information can be assumed to apply to students at all sites and in all streams of the B.Sc.N. Program. In 2014 the B.Sc.N. Program and the Schools of Nursing at McMaster, Mohawk and Conestoga all received seven-year accreditation from the Canadian Association of Schools of Nursing, the highest level of accreditation possible.

In 2009, the B.Sc.N. Curriculum was renewed and is now called the Kaleidoscope Curriculum. All streams share a common curriculum in their final year of the program. Students will be expected to meet the program goals that were in place the year in which they entered. All students from all years have seen a change in emphasis in small group, tutorial classes with a renewed focus on the McMaster model of nursing and nursing education which has been in place since 1989. Consistent with the philosophy, the person is re-emphasized as the central focus for learning, and person-based learning within a problem-based approach has been adopted. In addition, students are exposed to different ways of knowing including empirical, ethical, personal, aesthetic and emancipatory.

Three types of courses are taken within the curriculum: (1) required nursing (NURSING) courses (professional practice and classroom); (2) required health sciences (HTHSCI) courses (e.g. anatomy, physiology, biochemistry); and (3) elective courses (non-professional, liberal arts or sciences). Additionally, the Basic (A) Stream includes required non-health science courses (e.g. psychology).

As students move through the program the focus of learning progresses in the following ways. In Levels I and II students are provided with a strong basis in the health and social sciences and are able to choose a variety of electives. They learn about themselves and their clients as individuals. The focus is on health, health assessment and the promotion of health. In Levels III and IV students begin to consider the family and the community as client. Students begin to deal with more acute and complex situations. In Levels III and IV, there is a strong focus on nursing and the integration and appraisal of knowledge based on the different ways of knowing into client care in both the classroom and professional practice setting. Students also begin to consider health care from the national and global perspective. Students initially learn about the roles of nursing in health care and, through inter-professional education opportunities, they gain greater understanding of the interprofessional health care team.

Themes are a logical grouping of prominent or frequently recurring concepts that provide direction to sequence and unify concepts throughout the curriculum. The themes that guide the renewed curriculum include:

1. **Personhood and Caring:** This theme focuses on the humanistic aspect of nursing beginning with a focus on the nurse and client as person and the professional, therapeutic relationship between nurse and client.

2. **Context, Health and Healing:** This theme focuses on the internal and external influences on health and the nurse’s ability to provide safe and competent care as part of the health care team within a health care system and broader community.

3. **Learning and Knowing:** This theme focuses on critical inquiry, discovery and appropriate use of technology within nursing to facilitate life-long learning and reflective practice.

Evaluation by self, peers and faculty is part of an on-going assessment process of the achievement of clinical, course, and program outcomes.

**GOALS FOR STUDENTS**

Graduates of the B.Sc.N. Program will be prepared to engage in competent professional practice in a variety of health care contexts and with diverse clients across the lifespan (individual, family, group, communities, populations) who have stable and unstable outcomes and multi-factorial influences (internal and external) on their health status. Graduates will:

1. Provide competent care with a holistic awareness of the impact of the internal and external context on health and healing.

**REGISTRATION TO PRACTISE NURSING IN ONTARIO**

On receiving the B.Sc.N. degree after successful completion of the program, graduates are eligible to write the National Council Licensure Exam (NCLEX) which is administered by the College of Nurses of Ontario (CNO) which is one requirement of registration to practice nursing in Ontario. To facilitate this process, the School of Nursing provides information to the CNO confirming each student’s expected program completion term and verification of program completion. Students will be contacted in their final year of the program to consent to the release of this information to the CNO. If you have any questions related to the Regulated Health Professions Act, please contact the College of Nurses of Ontario directly.

**Admission Policy, Procedure, and Requirements**

**ADMISSION POLICY**

Enrolment in all B.Sc.N. programs is limited. Possession of the minimum admission requirements does not guarantee an offer of admission.

Application to the B.Sc.N. Program in the Faculty of Health Sciences implies acceptance of admission policies, procedures and the methods by which applicants are chosen for the program. The selection method for all applicants is by academic qualifications and assessment of personal and professional characteristics.

There are three streams of study leading to the completion of the B.Sc.N. degree.

- **Basic (A) Stream** requires four years of full-time study, and is available to those applying directly from an Ontario secondary school with Grade 12 U or M courses; to those who have qualifications equivalent to Grade 12 U or M courses; and to applicants with other qualifications who meet the admission requirements. **Note:** Any differences in the application process or course of studies are noted in the appropriate section below.

- **Post Diploma R.P.N. (E) Stream** is available to diploma prepared Registered Practical Nurses only. Graduates of an approved Diploma Practical Nurse Program who are admitted are granted 30 units of advanced credit. This program requires three years of full-time study. **Note:** The Post Diploma R.P.N. (E) Stream is offered only at Mohawk and Conestoga Colleges.

- **Accelerated (F) Stream** is open to applicants who have completed another university degree or have completed a minimum of 54 units (2 years) of university degree credits. Applicants with a nursing background will not be considered for this Stream. This program is available on a full-time basis and requires five consecutive terms of study. **Note:** The Accelerated (F) Stream is offered only at McMaster University.

The requirements and application deadlines vary depending on the applicant’s background. An applicant supplying documentation or evidence which, at the time or subsequently, is found to be falsified will be withdrawn from consideration. Any student admitted to the program having submitted false documentation will be withdrawn.

The School of Nursing is committed to equality of opportunity. Disability is not grounds for exclusion from the School. Every attempt will be made to remove barriers and create accommodation provided any accommodation maintains the same academic and professional practice standards for all students and does not require significant program change. Applicants should consult Student Accessibility Services at (905) 525-9140, ext. 29852 or TTY (905) 528-4307.

The College of Nurses of Ontario (CNO) has released a statement about Requisite Skills and Abilities for Nursing Practice in Ontario. This statement can be found at [https://www.cno.org/globalassets/docs/reg41078-skillsabilities-4pager-final.pdf](https://www.cno.org/globalassets/docs/reg41078-skillsabilities-4pager-final.pdf). The CNO states that “Individuals considering a career as a nurse in Ontario should review this document and assess their ability to meet the criteria. The requisite skills and abilities serve as a benchmark, outlining the requirements to meet the minimum standard necessary to ensure public safety.” (CNO, pg 3)

In accordance with the Self-identification policy of the Faculty of Health Sciences, Indigenous (First Nations, Inuit and Métis) applicants who wish to apply to a program that has a facilitated Indigenous admissions stream must complete the supplementary Self-identification Application. Information on the policy, application requirements and the online application can be found at [https://ishs.mcmaster.ca/admissions/self-identification](https://ishs.mcmaster.ca/admissions/self-identification).

One self-identification application is used for all Faculty of Health Sciences programs that have a facilitated Indigenous admissions stream, and should only be completed once even if an applicant applied to multiple programs. Admission Requirements

NON ACADEMIC REQUIREMENTS FOR ALL STREAMS

The B.Sc.N. Program is committed to ensuring that Standards of Practice in Nursing are adhered to by requiring students to maintain their certification in CPR, seek a police records check and comply with surveillance for infectious diseases. Failure to comply with these requirements may result in an offer of admission being withdrawn or the student not being allowed to enroll in/complete required course(s).

Immunization

The Ontario Public Hospitals Act requires all students working in a hospital setting to meet certain criteria related to surveillance for infectious diseases. Detailed medical information, including a record of completion of required immunizations, will be required upon acceptance and annually thereafter. Failure to produce this information will result in a student being precluded from commencing professional practice course(s) or a suspension from professional practice course(s) until such time that they are able to produce the information, which may result in the student having to take the course(s) in a different term. Clarification on specific medical information that is required will be sent to successful applicants prior to commencing their studies.

Police Records Check

During the B.Sc.N. Program, all nursing students will work with vulnerable populations. As a result, in order to protect these vulnerable people from potential harm, the Council of Ontario University Programs in Nursing recommends and many professional practice agencies require that all nursing students provide confirmation of the absence of a criminal conviction or outstanding criminal charges. All students are required to have a satisfactory Police Record Check completed prior to commencing their studies and annually thereafter. The Police Records Check must include Vulnerable Sector Screening (VSS). Expenses for the Police Records Check are the responsibility of the student. Students may be required to produce their Police Records Check at some professional practice placements. Registered students who have been convicted of an offense under the Criminal Code (Canada) for which they have not been pardoned may be denied the opportunity to enter professional practice course(s) or a suspension from professional practice course(s) until such time that they are able to produce the information, which may result in the student having to take the course(s) in a different term. Clarification on specific medical information that is required will be sent to successful applicants prior to commencing their studies.

CPR Certification

Students are required to provide evidence of a valid certificate in cardiopulmonary resuscitation (CPR) at the Basic Cardiac Life Support for Health Care Provider level with training in AED prior to commencing their studies. Please note that for health care providers, certification is valid for one year from the date of the course. As a result, annual re-certification is mandatory. The cost of a course is the responsibility of the student. Courses are readily available in most communities. Certification obtained through an online provider will not be accepted. CPR certification must be completed in Canada.

CASPer™ ASSESSMENT REQUIREMENT FOR ALL STREAMS

All applicants to the B.Sc.N. Program are required to complete a mandatory, online 90-minute computer-based assessment called CASPer™, as a component of the selection process.

INDIGENOUS SECTION OF THE POST DIPLOMA

R.P.N. (E) STREAM - MOHAWK SITE

Mohawk College has targeted 5% of its enrolment to seats in Health Science, Human Services and Applied Arts postsecondary programs to qualified Indigenous students in oversubscribed programs. Barriers such as highly competitive grade-point averages or overall ranking was removed, while still ensuring all participating students meet the minimum program admission requirements. By eliminating the competitive barriers with an oversubscribed program, an additional pathway for Indigenous students has been created in postsecondary education. Preference is given to Indigenous students in the Indigenous Section of the Post Diploma RPN (E) Stream, but if not completely filled, qualified non-Indigenous applicants are offered admission to this site to facilitate integration of cultural learning and experiences for both Indigenous and non Indigenous students. This mixture of Indigenous and non-Indigenous students ensures a full cohort to achieve financial sustainability and supports the partnership’s goals of integrating learning opportunities for both groups of students, enriching the learning outcomes for all students and strengthening partnerships with our Indigenous Communities. Applicants should contact the Associate Dean Nursing, Mohawk College for further information. Applicants should apply to Ontario College Application Services (OCAS) along with the required fees by February 1. All applications must be received by OCAS on or before this date to be given equal consideration by the colleges. Please note that February 1 is not a deadline for submitting applications as OCAS will continue to process applications received after this date. You are encouraged, however, to submit your application as early as possible, especially in the case of oversubscribed programs where there are often enough applications from qualified applicants received by the equal consideration date (February 1) to fill the program.

Students are considered for reinstatement for September entry only and must apply by January 1. Students will be required to outline the reasons for previous unsatisfactory academic performance, reasons for requesting reinstatement at this time, reasons why the student would expect to succeed in the B.Sc.N. Program if reinstatement is granted (including documentation of what has been done to correct the previous problems/barriers), and an outline of their activities since last registered in the program including an outline of all academic work. Reinstatement is not automatic or guaranteed. Decisions are normally communicated between May and June for September entry. A student who is granted reinstatement to the B.Sc.N Program will be required to complete a reintegration plan that will facilitate returning to the B.Sc.N. Program prior to enrollment of courses. Additionally, the student may be required to repeat any or all of their previously completed courses in the program, which will be explicitly outlined in the terms and conditions of their reinstatement.

Students who are granted reinstatement to the B.Sc.N. Program will be placed on program probation for a period of one academic year, and calculation of their Grade Point Average (GPA) will begin anew. If at any review after reinstatement the student’s GPA falls below 5.0, the student will be removed from the program. Students who are approved for reinstatement to the program may not apply for subsequent re-entry or reinstatement if removed again.

**TRANSFER BETWEEN SITES**

Students attend the institution to which they are admitted for the entire program. Transfer from Mohawk College or Conestoga to McMaster University site is not an option. Similarly, transfer from McMaster University to Mohawk College or Conestoga Colleges is not an option. Transfers may be permitted between the College sites, based on availability of space in the B.Sc.N. Program at the desired site. Students are considered for transferring to their requested site for September entry only. To request transfer between College sites, the student must submit a Request for Transfer Between Sites petition to the Academic Advising Services by February 1, and apply to the desired site via OCAS by February 1. Final decisions are at the discretion of the Mohawk College and Conestoga College Admissions Offices and the School of Nursing.

**TRANSFER BETWEEN STREAMS**

A transfer between streams of the B.Sc.N. Program is not permitted.
The following courses are designated professional practice Nursing (NURSING) courses:

- Accelerated (F) Stream: NURSING 2J04, 2U03, 2U04, 3Q03, 3ZA3, 3ZB3, 4J07, 4K10

**Removal from Courses**

The B.Sc.N. Program reserves the right to remove a student from a professional practice course or laboratory setting at any point during the term if the student exhibits unsafe professional practice or behaviour that places the patient or others at risk or is deemed a serious breach of professional behaviour. Such removal will result in the student receiving a grade of F in the course and may result in dismissal from the program. The professional practice activities associated with any professional practice course must be successfully achieved for attainment of a passing grade in the course.

**Clearance to Participate**

If the School of Nursing has substantiated concerns that a student’s participation in a professional practice course or mobility may pose a risk to the health and safety of the student, their peers, instructors, clients/patients, or staff members of the professional practice setting the student may be required to produce documentation from a health care practitioner (typically the student’s attending physician) indicating that the student is medically able to perform the full duties required in the professional practice placement. Students may be precluded from participating in the professional practice course until such time that they are able to produce the documentation, which may result in the student having to take the course in a different term if, as a result, the student is absent from the professional practice setting for a significant portion of the course.

**Reintegration to Professional Practice**

Any student who has either (a) failed a professional practice course, and/or (b) has experienced a gap between professional practice courses as a result of a leave of absence from the program, repeating mandatory NURSING/HTHSCI course(s), or following a reduced course load, is required to complete a reintegration plan in consultation with a faculty member designated by the School of Nursing. The purpose of the reintegration plan is to refamiliarize the student with nursing and health sciences concepts and refresh their professional practice skills to ensure the student’s return to a professional practice setting is safe and successful for all stakeholders. The reintegration plan must be completed to the satisfaction of the faculty member over the term (approximately four months) immediately prior to returning to the student commencing professional practice course(s). In some instances, a reintegration plan may be planned over the course of more than a single term at the discretion of the School of Nursing and/or designated faculty.

**EXAMINATIONS**

A Mohawk College or Conestoga College and a McMaster student photo identification card is required at all examinations.

**NON-ACADEMIC REGULATIONS**

A student must comply annually before the start of classes with all non-academic requirements as outlined by the program. Failure to do so will result in removal from class and/or professional practice courses.

**NON-ACADEMIC REQUIREMENTS**

The B.Sc.N. Program is committed to ensuring that Standards of Practice in Nursing are adhered to by requiring students to maintain their certification in CPR, seek a police records check, and comply with surveillance for infectious diseases. Failure to comply with these requirements may result in a student not being allowed to enroll in complete required course(s).

**IMMUNIZATION**

The Ontario Public Hospitals Act requires all students working in a hospital setting to meet certain criteria related to surveillance for infectious diseases. Detailed medical information, including a record of completion of required immunizations, will be required upon acceptance and annually thereafter. Failure to produce this information will result in a student being precluded from commencing professional practice course(s) or a suspension from professional practice course(s) until such time that they are able to produce the information, which may result in the student having to take the course(s) in a different term. Information on
specific medical information that is required will be sent to students prior to commencing their studies in the program and each year thereafter prior to the start of the academic year.

POLICE RECORDS CHECK
During the course of the B.Sc.N Program, all nursing students will work with vulnerable populations. As a result, in order to protect these vulnerable people from potential harm, the Council of Ontario University Programs in Nursing recommends and many professional practice agencies require that all nursing students provide confirmation of the absence of a criminal conviction or outstanding criminal charges. All students are required to have a satisfactory Police Record Check completed annually. The Police Record Check must include Vulnerable Sector Screening (VCC). Expenses for the Police Record Check are the responsibility of the student. Students may be required to produce documentation of their Police Record Check at some professional practice placements. Registered students who have been convicted of an offense under the Criminal Code (Canada) for which they have not been pardoned may be denied the opportunity to enter professional practice placement.

CPR CERTIFICATION
Students are required to provide evidence of a valid certificate in cardiopulmonary resuscitation (CPR) at the Basic Cardiac Life Support for Health Care Provider level with training in AED. Please note that for health care providers, certification is valid for one year from the date of the course. As a result, annual recertification is mandatory. The cost of a course is the responsibility of the student. Courses are readily available in most communities. Certification obtained through an online provider will not be accepted.

TRAVEL WITHIN THE PROGRAM
Students are responsible for arranging their own travel to and from learning settings external to their site and for covering any costs incurred. All students who enrol in the B.Sc.N Program are expected to travel to any learning setting in Hamilton and the surrounding area, including but not limited to Halton, Peel, Brant, Halidmand-Norfolk, Niagara and Wellington regions (McMaster and Mohawk sites); and Kitchener-Waterloo and surrounding area, including but not limited to Wellington, Brant and Halton regions (Conestoga site).

ACCESS TO CLINICAL COURSES
Students in any stream who register for a clinical NURSING course in Level III or above must also submit a placement request to the Placement Coordinator. Students who fail to meet the published deadline but who register for the course at least two months prior to the date is commences will be assigned a placement setting without consideration of their preferences. Students who do not register two months in advance and who fail to meet the submission deadline will normally be required to defer their placement until the next term in which the course is offered.

The final assignment of learning settings for any course is constrained by the availability of the requested setting and faculty resources. Students may therefore be required to complete the practicum component of a course in a learning setting that is not of their choosing.

GLOBAL HEALTH PROFESSIONAL PRACTICE
Level IV students in Basic (A) Stream and Post Diploma R.P.N. (E) Stream have the option to complete global health professional practice placements in international or outpost settings for NURSING 4J07. Prerequisites include, but are not limited to, (1) attaining a GPA of 8.0 in all mandatory NURSING/HTHSCI courses; (2) a pass in all professional practice NURSING courses; (3) a minimum grade of C- in either HTHSCI 4H03, or NURSING 4K10, or COLLAB 4H03.

SPECIALIZED/ATYPICAL PROFESSIONAL PRACTICE PLACEMENTS
Specialized/atypical placements in NURSING 4J07 and/or NURSING 4K10 are only available to students who have met the following criteria:

1. A cumulative GPA of 8.0 in all mandatory NURSING/HTHSCI courses completed prior to entry to Level IV course work
2. A pass in all professional practice courses on the first attempt.

Additional criteria (e.g. reference from a professional practice preceptor) may also be required and considered by the School of Nursing in allocating specialized/atypical placements. Achieving the above noted criteria is not a guarantee that a student will receive a specialized/atypical placement as placements are limited.

DOCUMENTATION FOR LICENSURE OUTSIDE OF CANADA
Documentation for Licensure outside of Canada is done by the B.Sc.N. Program Office. A fee of $250, for each request, is charged for providing the documentation and sending, by courier, to the agency requesting such documentation. Forms requesting this documentation are available on the School of Nursing website http://nursing.mcmaster.ca/currentstudents/graduation-designations.

BASIC (A) STREAM (B.SC.N.)

MCMASTER SITE

CONESTOGA SITE

MOHAWK SITE

The Faculty has planned the curriculum so that the study of nursing, the physiological, psychological and social sciences, and the humanities are interrelated and span the entire program. In Level I, the amount of nursing experience is relatively small; the major proportion of study is in the behavioural and natural sciences. The nursing component increases progressively through Levels II, III, and IV, as the study of natural sciences is completed. Because of timetable constraints, courses must be taken in the level indicated in the curriculum.

REQUIREMENTS (EFFECTIVE AS OF 2018-2019)

Electives

Eighteen units of electives are to be selected from disciplines of the student’s choice, of which a minimum of six units are to be chosen from courses designated as Level II or above. A maximum of six units of electives may be selected from NURSING and/or HTHSCI elective courses (i.e. those courses that are not required for any of the program streams). For some courses, the amount of duplication of required content will preclude their being used for elective credit in the B.Sc.N. Program. Mandatory NURSING and/or HTHSCI courses from the Post Diploma R.P.N. (E) Stream or the Accelerated (F) Stream of the B.Sc.N. Please note that the last intake for this stream at McMaster was Fall 2010. Any applicants interested in this stream should see information for Post Diploma R.P.N. (E) Stream (Mohawk and Conestoga) below.

The program of study for the Post Diploma Registered Practical Nurses (E) Stream prepares students for practice as Registered Nurses. It builds on the knowledge and skills acquired in the diploma practical nurse program. (E) Stream students receive 30 units of advanced credit and enter at Level II. The two Level II nursing courses are designed to assist in the transition of students to baccalaureate studies. Students are integrated with both Basic and Post-Diploma students for most courses. The curriculum is planned for three academic years of full-time study.

Fifteen units of electives are to be selected from disciplines of the student’s choice of which a minimum of six units are to be chosen from courses designated Level II or above. PROGRAM OVERVIEW

Midwives are primary health care providers who provide care and advice to women during pregnancy, labour and the postpartum period; conduct deliveries and provide care for newborn babies. Midwives have well-developed interpersonal skills and are competent in areas of health education, counselling and interpersonal collaboration. Midwives’ expertise in the care of normal pregnancy and childbirth arises from their understanding of childbirth as a social, cultural and biological process and from their ability to competently exercise clinical skills and decision-making. Midwifery is potentially one of the most important components of women’s health care in Ontario. Midwifery education provides the base for sound professional practice. The educational program is an integral part of the evolution of the profession of midwifery in Ontario and is a leader in midwifery education in Canada. The program helps create future leaders and teachers. It assures practice and teaching as a continuum so that learning environments become available across Ontario.

The Midwifery Education Program at McMaster University is a collaborative venture shared by McMaster, Ryerson and Laurentian Universities, and leads to a Bachelor of Health Sciences (B.H.Sc.) in Midwifery.

ADMISSION PROCEDURES AND REQUIREMENTS

Enrolment in the Midwifery Education Program is limited. Admission into the Midwifery Education Program is by selection and reserved for candidates who meet all requirements and who satisfy the academic regulations of the university. Possession of the minimum requirements does not guarantee an offer of admission. It is recommended that applicants have completed at least one year of university prior to applying. All certified transcripts from secondary and post secondary education previously attended must be forwarded to the Office of the Registrar. The application deadline is February 1 each year for the following September intake. Applications received after February 1 will not be considered. Please note that all
required courses must be completed, with final grades available on any and all official transcripts at the time of application (excluding current Secondary School students.) All official transcripts must be submitted by the February 1 deadline. All documents submitted with the application become property of the university. All applicants must have completed the following course requirements in order to be considered for admission:

A full course credit in:
1. Biology
2. Chemistry
3. English

A minimum grade of 75% in each course is required. It is recognized that applicants apply to the program with varying educational backgrounds. Applicants can fulfill the courses required from the following educational backgrounds:

**Applicants Directly from Ontario Secondary Schools**
The following are the minimum grade 12 U and M requirements under the Ontario Secondary School Curriculum for applicants directly from an Ontario Secondary School:
1. English 12 U
2. Biology 12 U
3. Chemistry 12 U

Completion of additional 12 U or M courses to total six credits. Students must obtain a minimum grade of 75% in each of the three (3) required courses listed in points 1, 2 and 3 above AND a minimum overall average of 75% on grade 12 U or M courses including the required courses. Current Ontario Secondary School Students may apply if one or more of the three (3) required courses are in progress at the time of application; however, the grade 11 prerequisite(s) must be completed at the time of application so that a preliminary assessment of the subject area(s) can be made. Admission is based on in progress secondary school grades for current secondary students only if the grade 11 prerequisite in that subject area is at least 75%.

**Applicants with Prior College Diploma Studies**
No Admissions will be based on College standing. For applicants with prior college/diploma studies who completed their college education within the last two years of applying to Midwifery, admission will be based on secondary school eligibility. If college education was completed more than 2 years ago at the time of applying to Midwifery, please refer to the Mature Applicants section for eligibility and admission requirements.

**Applicants from Ontario Secondary Schools (within one year of obtaining OSSD)**
The following are the minimum grade 12 U and M requirements under the Ontario Secondary School Curriculum for applicants from an Ontario Secondary School who have obtained their OSSD in the previous calendar year and have never attended University:
1. English 12 U
2. Biology 12 U
3. Chemistry 12 U

Completion of additional grade 12 U or M courses to total six credits. Applicants must have obtained a minimum grade of 75% in each of the three (3) required courses listed in points 1, 2 and 3 above AND a minimum overall average of 75% on grade 12 U or M courses including the required courses. All required courses must be completed at the time of application.

**Applicants with Qualifications Equivalent to Ontario Secondary School**
Applicants from out-of-province, with qualifications equivalent to Ontario Secondary School (i.e. Advanced Placement Students, American Style Curriculum Students, International Baccalaureate Students, General Certificate of Education Students, etc.) should refer to the Future McMaster website for general requirement and required course information.

**International Students**
Applicants must be Canadian Citizens or have Permanent Resident status prior to applying to the Midwifery program.

**Mature Applicants**
A mature student is someone who has been out of full time secondary school or college for the past two years, and who has never attended university (http://future.mcmaster.ca/admission/admissionrequirements/mature-applicants/). Midwifery does not offer mature admission directly to the program. However, students interested in Midwifery may be admitted as mature students to another program in order to complete university pre-requisite courses for later consideration for admission to Midwifery. Enrolment in this program is limited. Possession of the minimum admission requirements does not guarantee admission.

In order to apply for admission to the Midwifery Education program, mature applicants must have successfully completed a minimum of 18 units of university level course work with a minimum cumulative average of 75% prior to acceptance. Applicants must have grade 12 U courses from high school or full university courses in the three (3) required subject areas of Biology, Chemistry, and English with a minimum grade of 75% in each. A full university course is equivalent to 6 units or 1.0 credit, depending on the university.

**Prior Midwifery Education or Experience**
For applicants with prior Midwifery Education or Experience, Ryerson University, through the division of Continuing Education, offers the International Midwifery Pre-Registration Program. The purpose of this program is to provide internationally educated midwives with assessment and education which will prepare them to register as midwives in Ontario. (Refer to the Midwifery Education Program website for more information.)

**Indigenous Applicants**
In accordance with the Self-Identification policy of the Faculty of Health Sciences, Indigenous (First Nations, Inuit and Métis) applicants who wish to apply to a program that has a facilitated Indigenous admissions stream must complete the supplementary Self-identification Application. Information on the policy, application requirements and the online application can be found at: https://ishs.mcmaster.ca/admissions/self-identification.

One self-identification application is used for all Faculty of Health Sciences programs that have a facilitated Indigenous admissions stream, and should only be completed once even if an applicant applied to multiple programs. Applicants identify the program(s) they applied to on the Self-identification Application. The applicant is responsible for ensuring the Self-identification Application is submitted by the application deadline(s) for the program(s) they applied to in addition to completing any other application required for that program(s). If you applied to multiple Faculty of Health Sciences programs, the Self-identification Application must be completed by whatever the earliest deadline date is for the programs for which you have applied to.

Indigenous applicants will also be required to apply to the Midwifery Program by February 1 of the year in which they are applying. All appropriate transcripts from secondary and post-secondary education must be submitted to the Office of the Registrar by February 1. Applicants must meet the same minimum academic criteria for admission as set out for the general pool of candidates.
Transfer Credit
Students with previous university education may be eligible for transfer credits for non-clinical courses in Levels I and II. Transfer credits will be determined on an individual basis, after the admitted students have accepted their Offer of Admission.

Selection Procedure
The Midwifery Education Program has a limited number of placements and the admission process is very competitive. The admission requirements stated are minimum requirements. Preference will be given to applicants with the best qualifications. The actual standing required for admission in recent years has been an average in the mid to high 80s. The program has a two-step selection procedure:
1. Assessment of academic eligibility. Applicants must be successful at step one to be considered for step two.
2. Admission interview - selected applicants will be invited to Hamilton for an interview. The interview process will consist of ten, ten-minute interviews. The interviews typically take place on a Saturday at the end of April, but this is subject to change. Candidates must attend on the date and at the time specified.

Application for Deferred Registration
Applications are not held over from one year to another; if an applicant is selected for admission, they cannot defer this to a future year and will be asked to reapply.

Unsuccessful Applicants
If an unsuccessful applicant, or an applicant who refuses their offer of admission, wishes to reapply to the Midwifery Education Program, a new application, including transcripts and supplementary materials must be submitted.

Application Deadline
Submission of completed application forms to the Ontario Universities’ Application Centre must be received by the University no later than February 1 of the year in which registration is expected. All certified transcripts from secondary and post-secondary education previously attended must be forwarded to the Office of the Registrar and received by February 1. Applications received after February 1 will not be considered.

Immunization
The Ontario Public Hospitals Act requires that all persons working in a hospital setting meet certain criteria regarding surveillance for infectious diseases. In order for the requirement of the legislation to be met, students are required to complete the immunization screening process by July 15th in the year of admission and each subsequent academic year. Failure to do so will result in suspension of clinical work. Information will be sent to successful applicants prior to registration.

Police Records Check
An offer of admission is contingent upon provision of a Police Records Check, by July 31st of the year of admission. All registered students are required to have a satisfactory Police Records Check completed by July 31st annually. Expenses for the Police Records Check are the responsibility of the student.

The Police Records Check includes a Vulnerable Sector Screening and check of the Royal Canadian Mounted Police (RCMP), National Canadian Police Information Centre (CPIC) database for the following:
- All records of Criminal Code (Canada) convictions
- All pardoned sexual offences
- All record of convictions under the Narcotic Control Act
- All records of convictions under the Food and Drug Act
- Any undertakings to enter into a Surety to Keep the Peace
- Any Restraining Orders issued under the Criminal Code (Canada) or the Family Act
- All outstanding warrants and charges

Financial Information
In 2018-2019 the tuition fees for a student in Level I of the Midwifery Education Program were $3,179.11 for an eight month academic term. Supplementary fees are estimated at $500.00 per year. Additional costs include books, supplies, and other learning resources estimated at $1,200.00 - $1,700.00. Students must have access to a vehicle for all placement courses.

Academic Regulations

STUDENT ACADEMIC RESPONSIBILITY
You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations of this calendar.

ACCESS TO COURSES
All undergraduate courses at McMaster have an enrolment capacity. The University is committed to making every effort to accommodate students in required courses so that their program of study is not extended. Unless otherwise specified, registration is on a first-come basis and in some cases priority is given to students from particular programs or Faculties. All students are encouraged to register as soon as Mosaic is available to them.

STUDENT COMMUNICATION RESPONSIBILITY
It is the student’s responsibility to:
- maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- use the university provided e-mail address or maintain a valid forwarding e-mail address.
- regularly check the official University communications channels.

In addition to meeting the General Academic Regulations of the University, students enrolled in the Midwifery Education Program will be subject to the following program regulations.

The Midwifery Education Program reserves the right, at any point during the term, to remove a student from a clinical placement or laboratory setting if the student exhibits unsafe clinical practice or behaviour that places clients or others at risk and/or violates the Midwifery Act of Ontario. Such removal will result in the student receiving a grade of F and may result in dismissal from the program.

CONTINUATION IN THE PROGRAM
All courses (clinical and non-clinical) with the subject abbreviation MIDWIF and HTHSCI (as outlined in the Curriculum Plan) are required for the degree. Students are reviewed at the end of each term. Students must achieve a Grade Point Average (GPA) of at least 6.0 in all graded courses and achieve a Pass/Satisfactory performance in all clinical courses at each review to continue in Good Standing in the program.

The student must:
1. complete all required courses, including electives, with a GPA of at least
   6.0 including a minimum grade of C- in HTHSCI 1D06 and a minimum grade
   of B- in MIDWIF 1D03, 2G06; 3F03; and 3J06;
2. complete HTHSCI 1C06, 1J03, 2M03, MIDWIF 1F03 (or HTHSCI 3C04), 2F03
   with a minimum grade of C- with the exception of a D in one of those
courses;
3. complete all clinical courses with a Pass/Satisfactory grade;
4. complete all courses for the degree within five years (not inclusive of
   approved leaves of absence).

The practice of midwifery is regulated by the College of Midwives under the
The Midwifery Education Program monitors and documents students’ clinical
experience in order that students meet minimum practice requirements to be eligible
for registration to practice. Graduation from the Midwifery Education Program does
not guarantee registration with the College of Midwives of Ontario. All applicants
to the College must meet additional registration requirements. New graduates
are required to work in an established practice for their first year of registration.
Regulatory requirements are subject to change from time to time.

MIDWIFERY PROGRAM (B.H.SC.)
The four year program which spans nine terms, includes courses from basic
sciences, social sciences, health sciences, women’s studies and electives, in ad-
tion to clinical courses. A variety of course formats include classroom, distance
learning through web conferencing and print-based self-study courses. Teaching
methods include lecture format, small group tutorials, self-directed activities and
practical learning experiences in both laboratory and clinical practice settings.

INTENSIVES
An Intensives course is 5-7 days in duration and consists of workshop-style
presentations focussing on clinical skills. Attendance (100%) is mandatory.

Clinical Courses
Clinical courses consist of a practical and theoretical component and concurrent
problem-based weekly tutorials. Students are assigned to a midwifery practice
as well as to interprofessional placements including nursing, neonatal intensive
care nursery, and obstetrical practices. Throughout the program, students will
be placed in more than one midwifery practice within the McMaster Midwifery
Program catchment area and will gain clinical experience in a hospital setting
and with an obstetrician. Students should expect to relocate for clinical placements.

Travel and living expenses are the responsibility of the student.

The Midwifery Education Program reserves the right, at any point during the
term, to remove a student from a clinical placement or laboratory setting if the
student exhibits unsafe clinical practice or behaviour that places clients or others
at risk and/or violates the Midwifery Act of Ontario. Such removal will result in
the student receiving a grade of F and may result in dismissal from the program.

PROGRAM OVERVIEW
McMaster was among one of the first institutions in Canada to launch a Physician Assistant Education Program in 2008. The PA Education program will lead to the Bachelor of Health Sciences (Physician Assistant) degree. The program is taught using inquiry and problem-based learning, which enhance each student’s ability to think critically, solve problems, demonstrate initiative and independence in practice, and promote lifelong learning.

MISSION STATEMENT
The mission of the McMaster University Physician Assistant Education Program is to educate energetic, innovative, committed and caring individuals to become role models in a new health care delivery model practicing medicine under the supervision of a physician to expand health care access for the people of Ontario.

CURRICULUM PLAN
The twenty-four month program begins in September. The first year focuses on the study of the clinical sciences underpinning health care delivery. In the second year, students enter into clinical placements.

YEAR I: CLINICAL SCIENCES
The clinical sciences curriculum is modeled on the McMaster Medical School COMPASS Curriculum and is designed to meet the competencies outlined in the Canadian Association of Physician Assistants Occupation Competency Profile and the Canadian Medical Association accreditation requirements. The curriculum is delivered in small group problem-based learning modules with a focus on the physician assistant’s role in health care and the promotion of inter-professional education and training.

The clinical sciences curriculum consists of three Medical Foundations each composed of four components:

1. Clinical Sciences
2. Interviewing, Examination and Reasoning (IER)
3. Professional Competencies
4. Longitudinal Clinical Experience Program (LP)

Medical Foundation 1 (MF1)
- Clinical Science: Oxygen Transport: cardiovascular, respiratory and hematologic physiology and disease.
- IER: Basic communication skills, history taking and physical examination.
- ProComp: Professionalism, the role of the PA, principles and structure of the health care system, chronic disease, determinants of health
- LP

Medical Foundation 2 (MF2)
- Clinical Science: Homeostasis: energy balance, GI, endocrine, nutrition, fluid and electrolyte balance (including renal, acid base, BP) and reproduction, and pregnancy
- IER: Continued development of communication skills, history taking and physical examination with additional focus on GI, endocrine and obstetric and gynecologic systems.
- ProComp: Medical ethics and medical decision making.
- LP

Medical Foundation 3 (MF3)
- Clinical Science: Infection, neoplasia, neurologic, psychiatric and musculoskeletal physiology and disease

**CERTIFICATION**
Graduates will qualify to take the Physician Assistant Certification Council of Canada National examination.

**ADMISSION REQUIREMENTS**
Applicants must achieve a minimum GPA average of 3.0 by February, and complete a minimum of 2 years undergraduate coursework by June - this criteria must be met to start the program in September of the same year. To satisfy the minimum requirements, academic credentials obtained from a Canadian University must be from an institution that is a full member of the Association of Universities and Colleges of Canada (AUCC) or the Council of Ontario Universities (COU). A minimum of 10 full-courses or 20 half courses (two years) is required. Courses that employ small group, self-directed or inquiry learning are excellent preparation for the PA Education program. There is no requirement for applicants to have carried a full course load. Applicants are expected to have achieved an overall simple average of at least 3.0 on the OMSAS 4.0 scale for consideration, but higher grades may be required to be competitive with other applicants.

Upon acceptance, successful applicants will be required to provide detailed medical information, including a record of completion of required immunizations, evidence of Basic Cardiac Life Support certification (Adult and Child CPR) and a satisfactory Police Records Check (at the applicant’s expense) upon entering the program and annually thereafter.

**ADMISSION PROCEDURES**
Application (including the appropriate fee) is to be made through the:
Ontario Universities’ Application Centre (OUAC)
170 Research Lane
Guelph, ON, N1G 5E2
http://www.ouac.on.ca

This form is required by February 1st, for admission into the September class of the same year. Access to the supplementary application will be sent by email in mid-February. Please refer to the program’s web site for full application details and information regarding the supplementary application form. Upon receipt of the application, supplementary application and certified transcripts, selected applicants will be invited to an interview.

**THE ADMISSIONS COMMITTEE WILL CONSIDER:**
- University transcripts and GPA
- Supplementary application
- Interview

**APPLICATION FOR DEFERRED REGISTRATION**
Deferred registrations will not normally be granted in the PA Education Program. Deferred registration may be granted only under exceptional circumstances. Request for deferral must be submitted within two weeks of the offer of admission.

**ADVANCED STANDING/TRANSFER**
The structure of the PA Education program requires that all students complete the entire program starting with Medical Foundation 1. There is no provision for advanced standing or transfer into the program.

**FULL-TIME STATUS**
The structure of the program requires that all students be registered in the program on a full-time basis and attendance in all components of the program is mandatory.

**FINANCIAL INFORMATION**
In 2019-20 the tuition fee for a student in Year I of the PA Education Program is expected to be approximately $12,000 for a 12 month academic term, plus supplementary fees estimated at $1,300.00 per year. Additional costs include books, diagnostic equipment and other learning resources estimated at $2,500.00. Students are also responsible for their transportation costs related to clinical study.

There is a bursary program which has been developed by the University. Bursaries may be awarded to students who are Canadian citizens based on demonstrated financial need. Bursaries are intended to offset provincial financial assistance and cannot supplement the full cost of education. For further information, please contact the Education program web site or the Student Financial Aid and Scholarships Office at McMaster University.

AT MCMASTER, HUMANITIES MEANS LEADERSHIP.
LOOK AT ANY LIST OF THE ATTRIBUTES OF EFFECTIVE LEADERSHIP, AND WHAT DO YOU FIND?

- Strong personal and ethical values;
- The ability to influence others by making reasoned, well thought out arguments;
- Emotional intelligence, achieved both by knowing oneself, and by being able to see the world from the perspective of others;
- Social intelligence, the ability to collaborate, to engage others in conversation, to be sensitive to social situations and to work with those culturally different from ourselves;
- Communication, the ability to effectively convey complex ideas in clear and inspiring ways;
- Creativity, an openness to new ideas and a willingness to question everything, not for the sake of asking questions, but to make this a better world.

These are the skills that build leaders in our communities, in our neighbourhoods, in our classrooms, in our social agencies, in our arts organizations, and in businesses, from corporations to start-ups. Employers in all sectors are finding that these soft skills are hard.

That’s where Humanities comes in. In our disciplines, we focus on values, on developing persuasive and rational arguments, on communicating complex and challenging ideas, on collaboration, on creativity, and on critical and constructive thinking. Our students go on to successful leadership roles as lawyers, doctors, teachers, professors, policy analysts, journalists, museum curators, artists, musicians, translators, speech language pathologists, and business executives, to name just a few.

How you get there is up to you. We offer a broad range of programs, many of which can be taken in combination. They include: Studio Art, Music, Theatre and Film, Art History, Classics, History, Communication Studies, Multimedia, English and Cultural Studies, French, Cognitive Science of Language, Linguistics, Peace Studies, Philosophy, and Justice, Political Philosophy and Law. You can combine most programs with those in Social Sciences, Mathematics with English, French, History or Philosophy, or Biology and Philosophy. We offer courses in a variety of languages and in women’s studies, many of which can lead to a Minor. Students may also take a Specialized Minor in Commerce, an Interdisciplinary Minor in African and African Diaspora Studies, Archaeology, Community Engagement, Social Justice and Inclusive Communities, or Sustainability.

We look forward to having you in our classrooms, our workshops, our performance spaces and our laboratories. We will work with you and help you work with others to build the skills you need to be the agents of change that our world so desperately needs.

TYPES OF DEGREE PROGRAMS

Upon successful completion of Humanities I, a student may be admitted to a program of study leading toward a Bachelor of Arts degree. Completion of Music I may lead to a Bachelor of Music (Honours) or Bachelor of Arts degree. Completion of Studio Art I leads to a Bachelor of Fine Arts (Honours) degree. Three types of programs lead toward a Bachelor’s degree in the Faculty of Humanities.

SINGLE HONOURS PROGRAM

Honours Bachelor of Arts programs consist of a total of 120 units of work typically completed over four years of full-time study. Honours programs provide a concentration in the work of a single discipline (e.g. History). The Honours Bachelor of Music (B. Mus. Honours) consists of 123 units total, with three years of full-time Music study beyond Music 1. The Honours Bachelor of Fine Arts (B.F.A. Honours) is completed in 120 total units, or three years of full-time Art study beyond Studio Art I.

COMBINED HONOURS PROGRAM

Subject to possible timetable restrictions, and provided that the student meets the requirements for entry into each of the relevant Honours programs, a student may combine work in any two disciplines within the Humanities for completion of a Combined Honours Bachelor of Arts degree (e.g. English and Peace Studies). These combinations are available within the Faculty, in combination with programs in the Faculty of Social Sciences (e.g. History and Political Science), and with select offerings in the Arts and Science Program, or select combinations with Math or Biology. Students will complete 120 units, including approximately 36 units of work beyond Level I in each component of the program (normally 12 units per level in each subject). The Honours B.A. in Justice, Political Philosophy and Law is not available in combination with another subject.

B.A. PROGRAM

Bachelor of Arts programs consist of a total of 90 units, typically completed over three years of full-time study, and concentrated in the work of a single discipline. The content and the requirements of Single Honours, Combined Honours and other B.A. programs are found after the Academic Regulations below. There are a number of Humanities courses without prerequisites which may be taken as electives. Individual course descriptions are listed by department in the Course Listings section of this Calendar.

Not only are students from other Faculties able to take individual courses which have no prerequisites, but they are also able to transfer into any of the degree programs offered by the Faculty of Humanities. For the majority of programs in the Faculty, admission may be gained after the successful completion of any Level I program at the university, providing this includes the necessary program requisites as outlined in the admission statement for each Humanities program as described under Programs for the B.A., B.A. (Honours) and B.Mus. (Honours) Degrees.

Specialized Minor in Commerce for Students Completing a Single Honours B.A. in Humanities

The Specialized Minor in Commerce for Humanities students is administered by the DeGroote School of Business. A maximum of 30 students will be admitted each year to this Specialized Minor.

NOTES
1. For admission, Humanities students (Level 1) must complete an application for admission to the Minor by using the Service Request function in the Student Centre in Mosaic during the Program/Plan Selection process in April.
2. Students must also be admitted to a Single Honours B.A. in one of the following programs: Art History, Classics, Cognitive Science of Language, Communication Studies, English and Cultural Studies, French, History,
Justice, Political Philosophy and Law, Linguistics, Multimedia, Philosophy, or Theatre & Film Studies.

3. Students seeking the Specialized Minor in Commerce for Humanities must have completed ECON 1B03 with a grade of at least B-, and one of MATH 1M03 or ECON 1BB3.

4. Students must have a Grade Point Average of at least 6.0 to be considered for entry into the Minor.

5. Students planning to apply to the accelerated MBA program at McMaster are strongly encouraged to consult with MBA Admissions at the Ron Joyce Centre regarding admission requirements. In addition to meeting all other admission criteria students must complete, with a minimum grade of B-, the following courses:
   - all three of ECON 1B03, 1BB3, and MATH 1M03;
   - all level 2 Commerce courses listed below;

Minor

A Minor is an option available to a student enrolled in a four-level honours program. Normally, you must complete a minimum of 24 units in the Minor subject. No more than six of these units may be at Level I, unless otherwise stated in the specific requirements of the minor. At least 18 units must be completed at McMaster. Students are responsible for ensuring that they take courses that meet these requirements (using elective units only). When enrolling in cross-listed courses to be applied towards a Minor, students must ensure that they enrol in the appropriate subject for the Minor designation. Those who have the necessary requirements may apply for recognition of a Minor when they graduate. If recognition for a Minor is granted, it will be recorded on the student’s transcript. Minors cannot be revoked once approved. Students may return for a second degree in the subject in which they have obtained a Minor, but only at the Honours level. For further information please refer to Minors in the General Academic Regulations section in this Calendar.

Concurrent Certificates

Concurrent certificates are an option available to any student in an undergraduate degree program, and may be completed as part of a student’s elective credit. Some concurrent certificates will require a student be admitted to this option, while others may involve completion of course credit and declaring certificate completion at the time of graduation. Students should consult the relevant certificate’s guidelines for admission and completion, and/or the department offering the concurrent certificate for additional information. Concurrent certificate programs offered by the Faculty of Humanities include:

- Concurrent Certificate in Essential French (offered by the Department of French)
- Concurrent Certificate in Professional French (offered by the Department of French)
- Concurrent Certificate in International Engagement (offered by the Faculty of Humanities)
- Concurrent Certificate in Leadership & Cross-Cultural Literacy (offered by the Faculty of Humanities)
- Concurrent Certificate in the Language of Medicine and Health (offered by the Department of Classics)
- Concurrent Ethics and Policy for Technological Innovation Certificate (EPTIC) (offered by the Department of Philosophy)

Second Language Proficiency

Students embarking on Humanities programs should be aware that most graduate schools require, for admission, proficiency in at least one, and frequently two, languages other than English. In this Faculty, proficiency in at least one language other than English is regarded as an essential tool for students interested in Linguistics. Generally, proficiency in more than one language is a hallmark of most highly-qualified Humanities’ graduates seeking the widest range of post-graduation academic and employment opportunities.

Part-Time Study

Students wishing to enter any program offered by the Faculty of Humanities and pursue a program on a part-time basis should consult the appropriate Departmental Counsellor(s) before making their plans.

Academic Regulations

STUDENT ACADEMIC RESPONSIBILITY

You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations of this calendar.

ACCESS TO COURSES

All undergraduate courses at McMaster have an enrolment capacity. Unless otherwise specified, registration is on a first-come basis and in some cases priority is given to students from particular programs or Faculties. Students will be informed of their enrolment periods and are encouraged to enrol as soon as online enrolment is available to them in the Student Centre in Mosaic.

STUDENT COMMUNICATION RESPONSIBILITY

It is the student’s responsibility to:

- maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- use the university provided e-mail address or maintain a valid forwarding e-mail address.
- regularly check the official University communications channels. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student’s designated primary e-mail account via their @mcmaster.ca alias.
- accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student’s @mcmaster.ca alias.

Students enrolled in Humanities programs, in addition to meeting the General Academic Regulations of the University, shall be subject to the following Faculty Regulations and Policies.
APPLICATION FOR LEVEL II PROGRAMS/PLANS
For students applying for Honours Justice, Political Philosophy, and Law, the mandatory supplementary application is due prior to the end of Program/Plan Selection in April: http://philos.humanities.mcmaster.ca/jppl-program.

Step 1: Attend the Humanities Majors Fair (in early March)
The Faculty hosts a Majors Fair for Level I students to provide information regarding program and plan options for Level II, the range and nature of subjects studied in particular discipline areas, as well as possible career and postgraduate options.

Step 2: Selecting a Level II Program (prior to the end of Program/Plan Selection in April)
Student seeking admission to a Level II program/plan for the following Fall and Winter terms must complete an application by using their MacID to log-on to Mosaic.

- Click the “Student Center” tab.
- Click the “My Academics” link.
- Click “Program/Plan Application” link.

Please note the following IMPORTANT information:
- Students must rank order their program choices carefully, especially if they want to be considered for admission to a limited enrolment program such as Multimedia or Justice, Political Philosophy & Law.
- Students who are admitted to their FIRST choice program, will NOT be evaluated for any other program selections.
- Students who are NOT admitted to their first choice, will be evaluated for their second choice, third choice, and so on.
- Students may apply to a maximum of four programs.
- For students applying for Honours Justice, Political Philosophy, and Law, the mandatory supplementary application is due prior to the end of Program/Plan Selection in April: http://philos.humanities.mcmaster.ca/jppl-program

Step 3: View your Program (Late May)
In late May, students must check the Student Centre in Mosaic to see their program for the Fall and Winter terms.

MINIMUM REQUIREMENTS FOR ENTERING AND CONTINUING IN A PROGRAM BEYOND LEVEL I
Honours B.A. Programs, BFA (Honours) Program, and B.Mus. (Honours) Program:
You must have a Grade Point Average (GPA) of at least 5.0 to continue in an Honours program. If your GPA is 4.5 to 4.9, you may remain in the Honours program, but will be placed on program probation for one reviewing period. You may be on program probation only once. If your GPA is 3.0 to 4.4, you must transfer to another program for which you qualify. If your GPA is less than 3.0, you may not continue at the University.

B.A. Programs
You must have a Grade Point Average (GPA) of at least 3.5 to continue in, or graduate from, a three-level B.A. program. If your GPA is 3.0 to 3.4, you may remain in the program, but will be placed on academic probation. You may be on academic probation only once. If your GPA is less than 3.0, you may not continue at the University.

DEFERRED EXAMINATIONS AND DEFERRED TERM WORK
Students who have been granted more than one deferred examination or term-work privilege may be required by their Faculty/Program office to reduce their course load during the term in which the deferred examinations are being written. The decision on a reduced load will be made and communicated with the decision on the application for deferred examinations.

TRANSFER TO THE FACULTY OF HUMANITIES
Students from other Faculties are able to transfer to degree programs offered by the Faculty of Humanities provided that they have obtained a Grade Point Average of at least 3.5 and have completed the necessary requirements for admission to a program.

REINSTATEMENT TO THE FACULTY OF HUMANITIES
A student who may not continue at the University may apply for reinstatement; however, reinstatement is not automatic or guaranteed. Application for reinstatement must be made to the Office of the Registrar using the Reinstatement Request Form by the deadline for the session. See the Sessional Dates section of this Calendar.

The form should explain the reasons for the student’s inadequate performance, and should include relevant documentary evidence, for example a letter from a physician outlining any medical condition that might have affected the student’s academic performance or final grades. Reinstatement cases will be carefully screened and the evidence considered will include the student’s academic performance before and after admission to McMaster, as well as the nature of the reasons cited in the application letter and the accompanying documentation.

If students are reinstated at the University, their Grade Point Average will be re-set to 0.0 on zero units, although students may (at Faculty discretion) retain credit for prior work. Following reinstatement, students will be on academic probation and must complete a minimum of 60 units of work after reinstatement to be eligible for Graduation with Distinction or other recognition based on the Grade Point Average.

If, at any review after reinstatement, the student’s Grade Point Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

COURSE SELECTION AND COURSE CHANGES
Students are responsible for ensuring that their course selection meets the requirements of the degree program in which they are enrolled, that prerequisites have been met, and that, where necessary, permission to take courses has been obtained. They should review their personal advisement report each time they cancel or add courses, and contact an Academic Advisor if they have questions, particularly if the advisement report shows unused courses. Students should also be aware that changes to their course load may affect their fees and their eligibility for scholarships and financial aid such as OSAP.

OVERLOAD
Fall/Winter Session: Normally students may not enrol in more than 30 units during the Fall/Winter Session (33 units for students in Music). A student with outstanding deferred examinations or incomplete term-work will not be permitted to overload in the following term. Students may take an overload up to six units under the following circumstances:
1. if a student has a Sessional Average of at least 7.0 in the immediately preceding review period; or
2. if the student is enrolled in the final Level of his/her program.

Spring/Summer Session: Students wishing to enrol in more than 12 units during the Spring/Summer Session or more than six units in either term of that Session, may do so only with the permission of the Assistant Dean of Humanities.

LETTER OF PERMISSION
Students in good academic standing, who wish to attend another university to take courses for credit toward a McMaster degree, must first request a Letter of Permission in the Student Centre in Mosaic. A Letter of Permission is automatically cancelled if a student is placed on academic probation, program probation, or required to withdraw from the University. Students should take note of any conditions on the Letter of Permission that might apply, including the requirement of a grade of at least C- for transfer credit. Courses taken at another university cannot be used to satisfy the University’s minimum residence requirement, will not be included in the calculation of the averages at McMaster, and therefore cannot be used to raise standing. The transcript designation will read T, indicating transfer credit has been granted, when a C- or better is attained. It is the student’s responsibility to ensure that an official transcript from the host university is sent to the Academic Advising Office to receive credit for work taken.

SUMMER IMMERSION PROGRAMS IN FRENCH
- Students must obtain approval from the Academic Advising Office prior to participating in any language immersion program. Failure to obtain prior approval may result in transfer credit not being accepted.
- The government-sponsored Explore summer language program offers university students the opportunity to take French courses at a large
number of accredited institutions. Students wishing to attend another university in order to participate in a language immersion program must:
(a) petition the Academic Advising Office, (b) submit detailed course descriptions for assessment, and (c) obtain a Letter of Permission.
 Students enrolled in a program in French may take a maximum of six units of credit in this manner as elective work only. Students not enrolled in a program in French may take up to 12 units of credit.

**HUMANITIES STUDY ABROAD**

**Humanities Study Abroad During Level III of Honours Programs**

There are two ways to undertake international studies during Level III of an Honours program: (i) a Formal Exchange Program or (ii) Independent Study Abroad through a Letter of Permission.

(i) **Formal Exchange Program During Level III of Honours Programs**

Formal Exchange Programs are those where McMaster University has an agreement with another institution involving a temporary exchange of students. Exchange students pay tuition fees and supplementary fees to McMaster. No tuition is paid to the other institution. See the General Academic Regulations section of this Calendar and the sections on Eligibility and Application below.

- Eligibility for the McMaster Exchange Program
- Students enrolled in any Honours or Combined Honours program in the Faculty of Humanities may apply to replace all or part of the work of their third year with an acceptable program of study taken at a university approved by the Faculty of Humanities.
- To be eligible to take part in this program, students must have completed at least 60 units of work with a Grade Point Average of at least 7.0. Individual programs may have additional requirements. All requirements must be satisfied by the end of the Fall/Winter session (September-April) preceding the commencement of study elsewhere. Students taking part in this program do not have the option of graduating with a three-year B.A. degree on the basis of work completed in this program, but must return to McMaster University to complete their final 30 units of work.
- Students may receive up to 30 units of credit for a full year of study at another institution. The awarding of transfer credit for work completed elsewhere may be confirmed only after the Academic Advising Office has received transcripts and reviewed students’ academic achievements following their return and after they have officially enrolled for Level IV.
- Application for the McMaster Exchange Program
- Students interested in applying for this program should consult the Academic Advising Office approximately one year before they anticipate studying abroad (i.e. during the Fall term of the year in which they enter Level II.) Applications are submitted through International Student Services and are normally due in January of Level II.

(ii) **Independent Study Abroad**

Qualified students may undertake studies at a university abroad through a Letter of Permission. Students enrol at and pay tuition fees to the other institution. See the General Academic Regulations section of this Calendar and the sections on Eligibility and Application below.

- Eligibility for Study Abroad through Letter of Permission
- Students in good standing in the Faculty of Humanities may apply for a Letter of Permission to take coursework abroad towards their degree. The coursework must be approved in advance by the faculty office. Students must apply directly to, and be accepted by, the other school.
- The awarding of transfer credit for work completed elsewhere may be confirmed only after the Academic Advising Office has received transcripts and reviewed students’ academic achievements following their return.
- Application for Study Abroad through a Letter of Permission
- Students should consult with an academic advisor on the coursework to be taken abroad prior to applying. A Letter of Permission must be given by McMaster to be permitted to take coursework elsewhere for transfer credit. Theatre & Film Studies is a liberal arts program that integrates critical analysis with experiential learning. We study performance in a range of media, cultures, and historical periods. Students learn to critically engage with the processes of conception, design, production, and reception of theatre, film, performance art, video art, and with the performativity of our everyday lives. Our experiential learning courses use current devised theatre practices to engage students with performance through studio work and public productions. All our courses encourage students to adopt inventive and critical perspectives on creative processes and foster collaborative understandings of artistic creation.

PROGRAMS IN THEATRE & FILM STUDIES
Theatre & Film Studies is a liberal arts program that integrates critical analysis with experiential learning. We study performance in a range of media, cultures, and historical periods. Students learn to critically engage with the processes of conception, design, production, and reception of theatre, film, performance art, video art, and with the performativity of our everyday lives. Our experiential learning courses use current devised theatre practices to engage students with performance through studio work and public productions. All our courses encourage students to adopt inventive and critical perspectives on creative processes and foster collaborative understandings of artistic creation.

DIPLOMA IN MUSIC PERFORMANCE

The Diploma is intended to recognize a concentration and achievement in the area of music performance. Students should contact the Academic Counsellor for Music in the School of the Arts for direction on completing the requirements.

NOTES

1. Lesson fees: Lesson fees are charged over and above tuition for MUSIC 2E06 A/B, MUSIC 3E66 A/B, MUSIC 3S33, MUSIC 4E99 A/B, and MUSIC 4S33.

2. With the approval of the Department of Classics and the Office of the Dean of the Faculty of Humanities, students who have completed 60 units of work of any Honours program in Classics may replace all or part of their Level III work by courses of study at a university or equivalent institution abroad. Consult the Department for further details.

3. Students may receive up to six units of credit for archaeological field work at an approved Classical site. Consult the Department for further details.

4. Students are encouraged to include at least six units of Greek or Latin in their program. GREEK 1203, 1223 and LATIN 1203, 1223, if not completed in the Level I program, may be taken to fulfill the degree requirements. **HONOURS LINGUISTICS (B.A.)**

This program is designed for students who are concentrating on the scientific study of language (phonology, morphology, syntax, semantics, etc.). Students should speak with the Departmental Counsellor for Linguistics to determine which linguistics electives are most appropriate for their academic and professional objectives.

**ADMISSION**

Completion of any Level I program and a Grade Point Average of at least 5.0 including an average of at least 5.0 in LINGUIST 1A03 and 1AA3. It is strongly recommended that students include six units of a language other than English in their Level I program.

**NOTES**

1. In this program students are required to study at least two languages for a total of 24 units of language study. The department has defined four language groups (see below) for this purpose. Of the 24 units, students must take at least 12 units from one language group of their choice, and 6 units of a language from another group. Please note that some languages have only 6 units of study available. Example: A student completes 12 units of Language A plus 6 units of Language B; the remaining 6 units of language study (to total 24 units) may be completed as the student chooses - by adding 6 units to Language A or B, or by completing 3 or 6 units of another Language C or D. Courses taught in English do not satisfy this requirement.

4. It is recommended that students interested in pursuing TESL Certification after graduation include the following courses in their program of study: LINGUIST 4E03 and 4TE3. They should also consult the TESL Ontario website for certified programs and requirements of certification.

5. Students registered in Level IV of any Honours or Combined Honours program in Linguistics or Cognitive Science of Language with a Grade Point Average of at least 9.0 may apply for the Honours Thesis course (LINGUIST 4Y06 A/B) where they would conduct an individual research project under the supervision of a faculty member.

Students who meet the academic admission requirements for their choice of Level 1 program, but do not meet McMaster’s English Language Proficiency requirement may be admitted to the MELD bridging program which has been developed for international students, providing them with a supportive environment in which they can succeed. The diploma is a two-term, full-time intensive bridging program in English language development, acculturation and engagement.

Students accepted into MELD are given a conditional offer of admission to their program of choice, pending successful completion of the MELD diploma. Once the diploma in MELD has been successfully completed, the student may register in the program to which he/she was given conditional admission and will have completed 6 units of degree credit courses in Linguistics that may be applied as electives to that program. In exceptional circumstances, MELD will consider transfers from other McMaster programs.

COMBINED HONOURS IN PEACE STUDIES AND ANOTHER SUBJECT (B.A.)

Peace Studies is interdisciplinary, drawing from many disciplines, and inviting creative intellectual and practical contributions from instructors and students seeking to support social justice, sustainability and health. We recognize, and adopt the principles and the recommendations of the Truth and Reconciliation Commission of Canada, and to implement our commitment, we strongly encourage students in Peace Studies to consider the Combined Honours Program in Indigenous Studies and Peace Studies. McMaster offers a number of Peace Studies courses devoted to experiential, community-oriented, service learning. We also emphasize individual and peer to peer learning, while placing intensive research opportunities within reach of undergraduates at all program levels. Study abroad through consultation with the Faculty of Humanities Office is encouraged. In alignment with our commitment to the UN Declaration on the Rights of Indigenous Peoples and the UN 2030 Agenda for Sustainable Development and the Sustainable Development Goals (SDGs), Peace Studies students are also encouraged to consider minors, such as the Minor in Sustainability, the Minor in Indigenous Studies, and the Minor in Community Engagement.

ADMISSION

Completion of any Level I program and a Grade Point Average of at least 5.0 including a grade of at least C in PEACEST 1A03 or, if not taken, three units acceptable to the Peace Studies program. Students who have not completed PEACEST 1A03 should contact the Director of the Peace Studies Program.

NOTES

1. Students must be aware that some courses in the Course Lists have their own disciplinary prerequisites. Given the multidisciplinary nature of the Peace Studies Program, with its different approaches and expectations, it is the responsibility of students in the Peace Studies Program to meet other Faculties’, departments’ and programs’ requirements.
2. Upon completion of 60 units of work and with the approval of both the Director of the Peace Studies Program and the Office of the Dean of the
Faculty of Humanities, one or both terms of Level III of this program may be replaced by courses of study at a university or universities under the Humanities Studies Elsewhere program.

Degree Programs

HONOURS BACHELOR OF SCIENCE PROGRAMS

An Honours B.Sc. normally requires the completion of 120 units, including a set of courses in a specific discipline and allows for interdisciplinary, and/or liberal arts studies through electives from other Departments and Faculties. An Honours B.Sc. with Specialization or Sub-Plan requires the completion of the same courses required for the Honours program, as well as designated upper level courses in a specialized area of study. Please refer to departmental program descriptions for details.

Honours Integrated Science is a limited enrolment, interdisciplinary research-based science program designed to develop students as broadly educated research scientists capable of contributing to all modern fields of science. Program courses will develop scientific understanding through integration of multiple disciplines in the study of a series of relevant themes or problems. Many disciplines of science will contribute toward courses offered in the Integrated Science program. Students will be involved in individual and team research projects throughout the program. Students who successfully complete the first three levels of any Honours B.Sc. degree may request permission from the Office of the Associate Dean of Science (Academic) to transfer to graduate with a three-level B.Sc. degree.

HONOURS BACHELOR OF SCIENCE KINESIOLOGY PROGRAM

Similar to the Honours Bachelor of Science, the Honours Bachelor of Science Kinesiology (Honours B.Sc.Kin.) requires 120 units, including the completion of a set of required courses and electives. Honours Bachelor of Science Kinesiology, a limited enrolment, direct-entry program is only available to students who completed Level I Honours Kinesiology. Kinesiology students who successfully complete the first three levels of the Honours B.Sc.Kin. degree may request permission from the Office of the Associate Dean of Science (Academic) to transfer to graduate with the three-level B.Sc.Kin. (exit) degree.

HONOURS BACHELOR OF APPLIED SCIENCE PROGRAMS

An Honours Human Behaviour (B.A.Sc.) program is available, as well as two Specializations offered in collaboration with Mohawk College of Applied Arts and Technology. Graduates of the Specializations will be eligible to receive both the McMaster B.A.Sc. (Honours) and either the Mohawk College Certificate in Autism & Behavioural Science or the Early Childhood Education (ECE) Diploma. The Honours B.A.Sc. requires the completion of 120 units, including a set of courses in a specific discipline and allows for interdisciplinary and/or liberal arts studies through electives from other Departments and Faculties. The Honours B.A.Sc. with a Specialization requires the completion of 150 units, including similar courses for the affiliated Honours B.A.Sc. program, as well as designated upper level courses and applied placements, in the area of the Specialization. Levels II through IV of the program run consecutively from September of Level II to completion of the program at the end of April in Level IV. Honours B.A.Sc. students who successfully complete 90 units, including the first three levels of the Honours B.A.Sc. degree, may request permission from the Office of the Associate Dean of Science (Academic) to transfer to graduate with the three-level B.Sc.Kin. (exit) degree.

CO-OP PROGRAMS

The Faculty of Science has Cooperative Education programs, beginning in Level III, in Honours Actuarial and Financial Mathematics, Honours Biochemistry, Honours Biology and Pharmacology, Honours Chemical Biology, Honours Chemistry, Honours Earth and Environmental Sciences, Honours Environmental Sciences, Honours Geography and Environmental Sciences, Honours Life Sciences, Honours Mathematics and Statistics, Honours Medical and Biological Physics, Honours Molecular Biology and Genetics, and Honours Physics.

Co-op programs have limited enrolment and admission is by selection. Please see the admission statement for each program in this section of the Calendar. Students must complete SCIENCE 2C00 and all mandatory orientation activities, including SCIENCE 3C00, prior to the start of the first work term. It is strongly recommended that students complete SCIENCE 2C00 in Level II. Employment must be full-time, academically relevant and approved by the Science Career and Cooperative Education office. Students enrolled in Co-op programs must be
registered in full-time studies, including all prescribed courses, during the academic terms of their program (a minimum of 9 units in a term) and will be charged per unit registered. An annual administrative fee of $150 will be charged in each of the three years a student is enrolled in a Co-op program, and additional Science Co-op fees will be charged for each work term of a Co-op program. With written permission from the work term supervisor, academic work may be taken during each four-month period of a work term and the student will be responsible for the additional tuition. For further information, please consult Science Career and Cooperative Education in the Faculty of Science.

INTERNSHIPS
The Faculty of Science offers students the opportunity to participate in 4, 8, 12, or 16 month full-time, paid work placements in academically relevant areas, as approved by the Science Career and Cooperative Education office. Internship placements are available to students registered as full time students in good standing in Level II or III of an Honours B.Sc. program and who will have at least 8 units left to complete upon their return. Students must complete SCIENCE 2C00 and all mandatory orientation activities prior to the start of their internship. Students self-generate placements, in consultation with the Science Career and Cooperative Education office, with participating companies through an application and interview process. A fee is assessed following the start of the placement. For further information, please consult Science Career and Cooperative Education in the Faculty of Science.

MINORS
Within the Faculty of Science, Minors are available to students registered in an Honours program only. In addition to the University’s regulations governing the designation of a Minor, all Departments in the Faculty of Science require the inclusion of at least six units of Level III or IV courses to complete a Minor in a Science subject. At least 12 units (above Level 1) toward the Minor must be considered elective to degree. Please see Minors in the General Academic Regulations section of this Calendar for further information. All courses have an enrolment capacity and the Faculty cannot guarantee registration in courses, even when all requisites have been met. Therefore, the completion of a Minor is not guaranteed.

Minors offered by the Faculty of Science include:
- Astronomy
- Biochemistry
- Biology
- Chemical Biology
- Chemistry
- Environmental Sciences
- Environmental Studies
- Geographic Information Systems (GIS)
- Geography
- Geography and Earth Sciences
- Mathematics
- Physics
- Psychology
- Statistics

BACHELOR OF SCIENCE PROGRAMS
Three-level B.Sc. programs offered by the Faculty of Science include: Environmental Sciences, Life Sciences, Mathematical Science and Chemical and Physical Sciences (formerly Physical Sciences). B.Sc. programs require completion of 90 units, including a set of required courses and electives.

Students interested in the Environmental Sciences program are encouraged to see School of Geography and Earth Sciences in this section of the Calendar. Students interested in the Life Sciences program are encouraged to see School of Interdisciplinary Science (SIS) in this section of the Calendar. Students interested in the Mathematical Science program are encouraged to see Department of Mathematics and Statistics in this section of the Calendar. Students interested in the Chemical and Physical Sciences are encouraged to see Chemical and Physical Sciences in the Department of Physics and Astronomy section of the Calendar.

Students who successfully complete the first three levels of any Honours B.Sc. program may request permission from the Office of the Associate Dean of Science (Academic) to transfer to graduate with a B.Sc. degree.

BACHELOR OF MEDICAL RADIATION SCIENCES PROGRAM
The Bachelor of Medical Radiation Sciences Program is offered jointly in partnership by McMaster University and Mohawk College of Applied Arts and Technology. Students pursue two qualifications simultaneously, and graduates receive the McMaster Bachelor of Medical Radiation Sciences degree and the Ontario College Advanced Diploma in Medical Radiation Sciences from Mohawk. The program requires 150 units. Levels II through IV of the program run consecutively from September of Level II to completion of the program at the end of April in Level IV.

Academic Regulations

STUDENT ACADEMIC RESPONSIBILITY
You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations of this calendar.

ACCESS TO COURSES
All undergraduate courses at McMaster have an enrolment capacity. The University is committed to making every effort to accommodate students in required courses so that their program of study is not extended. Unless otherwise specified, registration is on a first-come basis and in some cases, priority is given to students from particular programs or Faculties. Students will be informed of their enrolment periods and are encouraged to enrol as soon as online enrolment is available to them in the Student Centre in Mosaic. In addition, in the Faculty of Science, there are two types of courses for which permission must be obtained prior to registration. For these courses, students will be given seat authorizations rather than being admitted on a first-come basis.

STUDENT COMMUNICATION RESPONSIBILITY
It is the student’s responsibility to:
- maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- use the University provided e-mail address or maintain a valid forwarding e-mail address.
- regularly check the official University communications channels. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student’s designated primary e-mail account via their @mcmaster.ca alias.
- accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student’s @mcmaster.ca alias.

Students enrolled in Science programs, in addition to meeting the General Academic Regulations of the University, shall be subject to additional Faculty Regulations.

ADMISSION TO LEVEL II PROGRAMS
All Level I students who wish to be reviewed for admission to a Level II program in the Faculty of Science for the following Fall/Winter term must submit an Application for Admission to Level II through MOSAIC by the University stated deadline (normally in April). Students may rank up to four program choices. Rank ordering must be done very carefully because once admitted to a program, no further consideration is given to lower ranked choices.

Level I students must meet the admission criteria for a Level II program according to the Calendar in effect when they registered for Level I. Students must follow the program requirements of the Calendar in effect when they enter Level II, except when a later Calendar explicitly modifies such requirements.

Students who are in good academic standing, but who do not achieve the admission requirements for any Level II program may continue in the Faculty of Science in the undeclared ‘Science’ program, or may seek transfer to another Faculty.
LIMITED ENROLMENT PROGRAMS
Admission at Level I (and above) is limited for the following programs:
- Honours Integrated Science
- Honours Kinesiology
- All Medical Radiation Sciences programs
Admission at Level II (and above) is limited for the following:
- Honours Actuarial and Financial Mathematics
- Honours Astrophysics

MINIMUM REQUIREMENTS TO CONTINUE IN THE FACULTY OF SCIENCE
Further to the information found in the General Academic Regulations section of this Calendar:

REINSTATEMENT
Students with an Academic Standing of May Not Continue at the University who wish to be considered for undergraduate studies must apply for reinstatement. Application for reinstatement must be made to the Office of the Registrar using the Reinstatement Request Form by the stated deadline. The Faculty of Science does not consider Requests for Reinstatement for the Spring/Summer session. See the Application Procedures section of this Calendar. Reinstatement forms will be carefully reviewed and the evidence considered will include the student’s academic performance before and after admission to McMaster, a letter of explanation and other appropriate documentation. Reinstatement is not automatic or guaranteed. Decisions are normally made after June 30 for September entry. Effective September 1997, the Grade Point Average (formerly Cumulative Average) for students who are reinstated is reset to 0.0 on zero units. Credit is retained for courses in which passing grades have been achieved. Note: If at a review after reinstatement the Grade Point Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months. Former Kinesiology students will be considered for reinstatement to Kinesiology upon completion of a minimum of 24 units of university work taken on a full-time basis in a non-Kinesiology program with a minimum average of 7.0 (B-). Application forms are available from the Office of the Associate Dean of Science (Academic) or the Department of Kinesiology. The application deadline is April 30 for September entry. Reinstatement is not guaranteed.

Former Medical Radiation Sciences students will be considered for reinstatement to their program upon completion of a minimum of 24 units of university work taken on a full-time basis in a non-Medical Radiation Sciences program with a minimum average of 7.0 (B-). Application forms are available from the Office of the Associate Dean of Science (Academic) or the School of Interdisciplinary Science. The application deadline is April 30 for September entry. Reinstatement is not guaranteed.

DEADLINES
The Faculty of Science will not consider applications for admission, admission to a second degree or continuing studies, registration, deleting, cancelling, or adding of courses after the deadlines stated in this Calendar under Sessional Dates and Application Procedures sections, unless documentation showing good cause is submitted to the Office of the Associate Dean of Science (Academic).

LIMITED ENROLMENT COURSES REQUIRING PRE-REGISTRATION BALLOTING
The Life Sciences program pre-registration ballot will include all Level IV Life Sciences research seminar courses. Students entering Level IV Honours Life Sciences (excluding those enrolled in a Specialization) must complete and submit a ballot, rank ordering their preference for enrolment in Level IV seminar offerings by the end of March. Students will be informed of their ballot result by the end of May. Failure to submit a ballot by the stated deadline may compromise enrolment in preferred seminar. Ballots will be sent directly to students in Honours Life Sciences in the Winter term. The Department of Psychology, Neuroscience & Behaviour pre-registration ballot will include the thesis courses (PNB 4006 A/B, 4009 A/B, 4006 A/B) and the Individual Study courses (PNB 3003 A/B S, 3003 A/B S, 4003 A/B S, 4003 A/B S). Students wishing to take these courses must complete and submit a ballot by mid February. Students will be informed of the outcome of the first phase by mid March. Specific dates will be announced during the Fall term. Ballots can be obtained from the Department of Psychology, Neuroscience & Behaviour’s website at http://www.science.mcmaster.ca/pnb/.

WORKLOAD
All programs in the Faculty of Science may be taken by full-time and part-time students, with the exception of all Honours Co-op programs. Students enrolled in Co-op programs must maintain a full academic load during the study terms of their program. Students must maintain a full academic load during the Fall/Winter term to be eligible for scholarships available to full-time students.

Students are expected to avoid timetable conflicts among their courses, and students on a full academic load should ensure the number of courses is balanced in each term. Students who wish to take more courses than recommended for a single level of their program may do so if their Grade Point Average on completion of the previous Fall/Winter term is at least 7.0. Students registered in the final level of their program are permitted to overload by up to six additional units in order to become eligible to graduate.

COURSES REQUIRING AN ADDITIONAL FEE
The Faculty offers courses that may require a payment of a fee, above the regular associated tuition. Examples include: field courses and experiential offerings. Some of these courses may be taken outside of the University’s Sessional Dates. Students who enrol in these types of offerings must pay both:
- a fee to the Department to cover travel expenses, room and board and
- the associated tuition fee to McMaster at time of registration.

Although students initially register for field courses through the appropriate departmental offices, it is their responsibility to include field courses on their registration forms for the appropriate session. Detailed information regarding field courses and deadlines for registration may be obtained from the individual departmental offices.

LETTER OF PERMISSION
All students in good academic standing, with the exception of students enrolled in second degree programs, may apply to the Office of the Associate Dean of Science (Academic) to take courses at another university on Letter of Permission.

Students must achieve a grade of at least C- for transfer of credit. The transcript designation reads “T”, indicating transfer, when a grade of C- or better is attained, or “NC”, indicating not complete, when a grade of less than C- is attained.

Required courses given by the department offering the program may not be taken elsewhere unless departmental approval is given. Electives may be taken elsewhere. Courses taken at another university cannot be used to satisfy the University’s minimum residence requirements, will not be included in the calculation of the Grade Point or Term Averages, and therefore cannot be used to raise standing. Students may take up to six units of courses towards a Minor on Letter of Permission.
STUDENT EXCHANGES
McMaster University has agreements with institutions in Canada and abroad including Australia, Denmark, France and the United Kingdom to provide students with the opportunity to participate in an exchange program for one year or term. Exchanges allow students to gain a varied perspective on their course of study and enhance their professional and personal goals. In addition, exchange programs offer students the most inexpensive means of studying abroad as students participating in these exchanges avoid the foreign fees by paying fees to McMaster. All students must have completed at least one year of continuous study and be in good standing to be eligible to participate in an exchange. In most cases, students who participate in exchange programs go abroad for the third level of an Honours program.

Students interested should begin discussions with the Office of the Associate Dean of Science (Academic) about one year before they plan to enrol elsewhere. Students must propose and submit an academic program to their Department for approval. Academic approval must be completed by the end of February for registration in the following Fall/Winter session. In certain cases, students may be recommended for the Deans’ Honour List on the basis of work undertaken while on exchange.

For further information please see International Study in the General Academic Regulations section in this Calendar. Information concerning exchanges can also be found from International Student Services / MacAbroad Gilmour Hall, Room 110 Telephone: (905) 525-9140, extension 24748

TRANSFER
Science students may be permitted to transfer between programs or students in other Faculties may apply to transfer to a program in the Faculty of Science provided they have obtained a Grade Point Average of at least 3.5 and have completed the necessary admission requirements. The Faculty of Science will include the grades of all courses attempted (including failures) in the calculation of the Grade Point Average to determine eligibility to transfer into the Faculty. Students who do not meet these requirements must consult with the Office of the Associate Dean of Science (Academic).

Students in Levels II or III who wish to transfer to another program in the Faculty of Science must speak with an Academic Advisor in the Office of the Associate Dean of Science (Academic).

TRANSFER/APPLICATION TO LEVEL I HONOURS KINESIOLOGY
In-course, McMaster students seeking transfer/admission to Level I Honours Kinesiology for the following Fall or Winter term must submit an Application for Admission through Mosaic by the stated deadline (normally April). Additionally, transfer students must submit the mandatory Supplemental Application to the Department of Kinesiology by the stated deadline. Students will be notified of their eligibility for transfer to Level I Honours Kinesiology through their Student Centre on MOSAIC in June. McMaster students interested in transferring may contact the Undergraduate Administrative Assistant (Kinesiology) or the Office of the Associate Dean of Science (Academic). Students transferring from another university should see the Admission Requirements and Application Procedures sections of this Calendar. A limited number of exceptionally qualified students are admitted each year. To be considered, applicants must have an average of at least 9.0 (B+) in a minimum of 24 units of university work, taken during the Fall and Winter terms, including an average of at least 6.0 in BIOLOGY 1A03 and 1M03. Given the number of required units and prerequisites of Kinesiology courses, transfer students may not be able to complete the requirements in three additional years of study.

GRADUATION
From an Honours B.Sc., Honours B.A.Sc. and B.Sc. Programs

To graduate from a program, students must meet all course requirements for their degree program.

The requirements for graduation from these programs are described under the heading Graduation in the General Academic Regulations section in this Calendar. Transferring to Graduate with a Three-Level B.Sc. Degree from an Honours B.Sc. Program

Students who successfully complete at least 90 units including all admission requirements and expected course requirements up to the end of Level III of any Honours B.Sc. degree, with a minimum Grade Point Average of 3.5 may request permission from the Office of the Associate Dean of Science (Academic) for transfer to graduate with a corresponding three-level B.Sc. degree as follows:

- Honours Biology, Chemical Biology, Life Sciences, Molecular Biology and Genetics and Psychology, Neuroscience & Behaviour programs qualify for the B.Sc. Life Sciences degree.
- All Environmental Sciences programs qualify for the B.Sc. Environmental Sciences degree.
- All Mathematics and Statistics programs qualify for the B.Sc. Mathematical Science degree.
- All Biophysics, Chemistry, Medical Physics, and Physics programs qualify for the B.Sc. Chemical and Physical Sciences degree.

Students enrolled in Honours Biology and Environmental Sciences may be given the option of either the B.Sc. Environmental Sciences or Life Sciences degree.

Honours B.Sc. Kinesiology qualifies for the B.Sc. Kin. degree. Integrated Sciences (iSci) programs, with a concentration, will qualify for the exit degree most relevant to the concentration. Integrated Sciences (iSci), without a concentration, qualifies for the B.Sc. Science degree. Students who do not qualify for the degrees, as stated above, may request to be considered to graduate with the B.Sc. Science degree. Transferring to Graduate with a Three-Level B.A.Sc. Degree from an Honours B.A.Sc. Program

Students who successfully complete at least 90 units including all admission requirements and expected course requirements up to the end of Level III of any Honours B.A.Sc. degree, with a minimum Grade Point Average of 3.5 may request permission from the Office of the Associate Dean of Science (Academic) for transfer to graduate with the B.A.Sc. (exit) degree.

NOTES APPLICABLE TO ALL HONOURS BIOCHEMISTRY PROGRAMS

1. In addition to the Honours Biochemistry program, the Department offers a Specialization in Biomedical Research. The Honours program has a specified set of basic requirements and a wide choice of electives (including those from outside the Faculty of Science), allowing for interdisciplinary studies or the opportunity to complete a Minor in another subject. Alternatively, students may wish to apply to the Biomedical Research Specialization which is strongly recommended for students intending to pursue graduate studies.

2. Admission to the Honours Biochemistry program is limited. Selection is based on academic achievement but requires, as a minimum, completion of the Level I requirements listed below.

3. Admission to the Honours Biochemistry - Biomedical Research Specialization program is limited. Effective September 2021, admission to
this program will begin at Level III and will require, as a minimum, completion of Level II Honours Biochemistry. Last cohort of students to enter at Level II will be in September 2019 and selection is based on academic achievement but requires, as a minimum, completion of the Level I requirements listed below.

4. Transfer between programs is possible at any time, subject to satisfying the admission requirements and availability of space.

5. Students considering graduate studies in Biochemistry are recommended to complete one of BIOCHEM 4F09 A/B or 4T15 A/B.

Honours Biology and Environmental Sciences (B.Sc.)

Honours Biology and Environmental Sciences is a flexible program that focuses on interdisciplinary studies among these two fields. Jointly offered by the Department of Biology and the School of Geography and Earth Sciences, this program enables students to select courses according to their interests; to develop broad knowledge, and understanding of the linkages between biological and environmental processes; and to apply these to questions of biological, biomedical, or environmental interests. This program prepares students for graduate studies, careers in industry or academic research laboratories.

PROGRAM NOTES

1. The Biology and Environmental Sciences program allows students (especially those focused on ecology and conservation) to choose Biology and Environmental Science courses that reflect their own interests. Students are strongly encouraged to discuss their course selections with an academic advisor in the Department of Biology or the School of Geography and Earth Sciences.

2. Prerequisites for upper year courses must be checked carefully when selecting courses in Level II. Biochemistry and Organic Chemistry prerequisites exist in many upper year biology courses. Students are encouraged to take six units from CHEM 2E03, 2O3, 2O6, 20C3, 20C6, 20G3.

3. Students interested in completing a thesis may take one of BIOLOGY 4C12 A/B S, 4F06 A/B S or EARTHSC 4MT6 A/B in Level IV, subject to meeting the prerequisites. Students considering graduate studies are recommended to complete a thesis course.

4. Only one of BIOLOGY 4C12 A/B S, 4F06 A/B S or EARTHSC 4MT6 A/B may be completed as part of the program requirements. Completion of EARTHSC 3RD3 in Level III is required preparation for EARTHSC 4MT6 A/B.

NOTES APPLICABLE TO ALL HONOURS PROGRAMS IN THE DEPARTMENT OF CHEMISTRY AND CHEMICAL BIOLOGY
1. The Honours programs consist of a specified set of basic requirements and a wide choice of electives, allowing for interdisciplinary studies or the opportunity to complete a Minor. Honours Chemistry and Honours Chemical Biology are also available as five-year co-op programs, with entry beginning at Level III.
2. In some cases there are Level II and III prerequisites for Level III and IV courses. The prerequisites should be considered when choosing your Level II and III courses.
3. Students are encouraged to seek academic advising from the Departmental Undergraduate Advisor (email: advisor@chemistry.mcmaster.ca).
4. Certain Level IV courses are offered in alternate years. Students are advised to consider course offerings carefully in planning their course selection for Levels III and IV.
5. The Honours Chemistry, Honours Chemistry Co-op, Honours Chemical Biology and Honours Chemical Biology Co-op programs fulfill the academic requirements of the Canadian Society for Chemistry.
6. CHEM 3RP3 and CHEMBIO 3RP3 provide the opportunity for students to integrate a one-term work/research experience into an elective course. CHEM 3EP3 A/B S and CHEMBIO 3EP3 A/B S allow students to participate in an experiential placement. Further details may be obtained from the Undergraduate Advisor, in the Department of Chemistry and Chemical Biology (email: advisor@chemistry.mcmaster.ca).

NOTES APPLICABLE TO ALL HONOURS CHEMISTRY PROGRAMS
1. McMaster’s Honours Chemistry program is structured such that part of the laboratory experience in the conventional sub-disciplines of organic, inorganic, physical, and analytical chemistry is obtained through two integrated laboratory courses that are distinct from the lecture courses - CHEM 2LB3 in Level II and CHEM 3LA3 in Level III. This program provides in excess of 55 hours of “Organic Chemistry” laboratory experience. The Level III course focuses on more advanced skills.
2. For those considering postgraduate studies in Chemistry, it should be noted that 18 units of Level IV Chemistry or related subjects are required for consideration for admission at McMaster and most graduate schools in Canada. CHEM 4G12 A/B is strongly recommended.
3. BIOCHEM 2EE3 or any Biochemistry course that has a Biology course as the prerequisite is an acceptable alternative to BIOCHEM 3G03. CHEM 4IB3 or a Level III or IV Chemical Biology course are also acceptable substitutes providing these units are taken as elective to the Honours Chemistry program requirements.
4. CHEM 2PC3 is recommended for all Chemistry students, but not required for students who complete MATH 1B03 (or 1C13) in either Level I or II and who complete one of MATH 1AA3, 1LT3, 1X03 (or 1ZB3) in Level I.
5. CHEM 4G12 A/B cannot be taken concurrently with CHEM 3LA3 or CHEM 3RP3 given the time commitment required for the Senior Undergraduate Thesis.

B.S.C. THREE-LEVEL DEGREE
A three-level program with a Chemistry orientation is available through the B.Sc. in Chemical and Physical Sciences.

Program Specific Academic Regulations

ENGLISH LANGUAGE PROFICIENCY

While the minimum English language requirements may gain admission to the Medical Radiation Sciences I program, students will find a need for a high level of verbal proficiency. Students lacking these skills may be required to participate in additional ESL training. Lack of English proficiency may impact a student’s ability to complete performance requirements in skills and clinical courses and, therefore, jeopardize the ability to attain a passing grade in these required courses.

QUALIFYING FOR LEVEL II PROGRAMS

Enrolment in each of the Level II program specializations is limited. All Medical Radiation Sciences I students who meet the admission requirements by the end of the previous Fall/Winter session will be guaranteed entry to a Level II program specialization. Level I students who, at the end of the review period, require the completion of additional academic work in order to meet the Level II admission requirements are not guaranteed admission to a Level II program specialization. Such students may be considered for admission after meeting the admission requirements, if space is available. Level I students whose Level I Fall/Winter Average (on at least 24 units) is less than 5.0 and/or whose Grade Point Average is less than 5.0 can no longer continue in the Medical Radiation Sciences program without approval from the Reviewing Committee.

CONTINUATION IN THE PROGRAM

A student may not proceed to the next level until he/she has completed all required courses for the current level, and has attained a Grade Point Average of at least 5.0. In Level I, students are reviewed at the end of Winter term. Beginning at Level II, students are reviewed at the end of each term to determine eligibility to continue. To continue in the Medical Radiation Sciences program, a student must maintain a minimum Grade Point Average of 5.0 and successfully complete all Medical Radiation Sciences courses. Failure to do so may prevent progression to the next term and/or level.

A student whose Grade Point Average is at least 4.5 may, at the discretion of the Reviewing Committee, proceed in the program but will be placed on Program Probation for one reviewing period of two consecutive terms. A student may be placed on Program Probation only once during the program. A student may not continue in the program if any of the following criteria is met.

The student:
1. Fails to obtain a Grade Point Average of at least 5.0 at the completion of the Program Probation;
2. Obtains a Grade Point Average of less than 5.0 and has not been granted Program Probation;
3. Fails any course that is required for completion of the level in which the student is registered;
4. Fails the second attempt at any required course following re-entry to the program;
5. Fails any skills or clinical course following re-entry to the program;
6. Fails to complete the program requirements for graduation within the maximum allowable time (five years from the time of registration in Level II of the student’s current specialization).

A Level I student who may not continue in the program and whose Grade Point Average is between 3.5 and 4.4 may apply to transfer to a program for which he/she qualifies. A Level I student who may not continue in the program and whose Grade Point Average is between 3.0 and 3.4 may apply to transfer into Science on Academic Probation.
An upper level student who may not continue in the program may apply to transfer to a program for which he/she qualifies.

DEFERRED EXAMINATIONS/INCOMPLETE COURSE WORK
See the heading Deferred Examinations under Examinations in the General Academic Regulations section of the Calendar for application procedures for Deferred Exams. Students who have not completed all prerequisites for a clinical practicum will not be permitted to commence the clinical practicum. Such students will be reviewed by the Reviewing Committee to determine if the minimum prerequisite knowledge and skills have been attained to begin the clinical practicum. Failure to begin clinical practicum at the scheduled time could result in an extension of the time required to complete the program.

REPEATED COURSES
Any failed course must be repeated if it is a required course for the program, or must be repeated or replaced if it is not explicitly required. The grades for both the failed course and its repetition or replacement, as appropriate, will be included in the calculation of the Grade Point Average.

LEVEL OF REGISTRATION
Students must register for all outstanding work of one level before attempting work for a higher level. Courses must be taken in the sequence specified by the program requirements.

SKILLS AND CLINICAL COURSES
All professional skills and clinical courses are graded on a pass/fail basis. The performance activities associated with each course are detailed in the course outline and manual, and must be successfully achieved for attainment of a passing grade in the course. Students who are not meeting the conditions of their Learning Contract will be required to cancel the course. A student must meet all the domains of practice, achieve all of the required Skills Assessments and Competencies and attendance requirements by the end of week 15, in order to receive a passing grade. Eligibility to complete the placement course in a subsequent session will be determined by the Review Committee.

Attendance is mandatory in all professional skills laboratory courses and clinical practica. Students are required to attend each clinical practicum on a full-time basis (i.e. 37.5 hours/week as scheduled by the clinical agency). Excessive absenteeism may jeopardize a student’s ability to meet course performance requirements and result in a Fail grade for the course. The Medical Radiation Sciences program monitors and documents students’ experience and performance in skills and clinical courses to provide evidence of the students’ ability to meet program requirements and to meet the minimum practice requirements to be eligible for registration to practice.

STUDENT CONDUCT IN THE PROGRAM
The University reserves the right to cancel the academic privileges of a student at any time should the student’s scholastic record or conduct warrant so doing. The Medical Radiation Sciences program reserves the right to remove a student from a skills-based course, clinical placement or laboratory setting at any point during the term if the student exhibits unsafe clinical practice or behaviour that places the patient or others at risk or is deemed a serious breach of professional behaviour. Such removal may result in the student receiving a grade of F in the course and may result in dismissal from the program.

INTERNAL RE-ENTRY TO THE PROGRAM
A student who becomes ineligible to continue in the program may apply for re-entry. Applications for Re-entry may be obtained through the School of Interdisciplinary Science. Request for re-entry may be made up to a maximum of two calendar years following the year in which the student becomes ineligible to continue. Re-entry is neither automatic nor guaranteed.

GRADUATION
A student is eligible for graduation when all of the following criteria are met:

1. Complete all required courses, including electives, with a Grade Point Average of at least 4.5;  
2. Complete all skills and clinical courses with a Pass grade;  
3. Complete all required courses in Levels II - IV within five years of registration in Level II.

LEAVE OF ABSENCE FROM THE PROGRAM
Students wishing to suspend their studies from the program must apply for a Leave of Absence (LOA). Approval is not guaranteed.

Students should note that the program requirements, including all required courses in Levels II - IV, must be completed within five years of first registration in Level II, and that the leave may jeopardize the student’s ability to meet this requirement. Application for a leave of absence must be made in writing normally within two months prior to the intended start of the leave. Forms are available through the School of Interdisciplinary Science.

Any student who returns from a leave of absence into a clinical practicum term will be required to complete an additional non-credit course (for which a fee is involved) to ensure the student’s professional knowledge and skills meet the minimum requirements for entrance to that clinical practicum. This course must be completed in the term immediately preceding the clinical practicum. Re-entry is not guaranteed for students who suspend their studies from the program without an approved Leave of Absence. Such students must contact the Director of the School of Interdisciplinary Science to determine eligibility and appropriate procedures for re-entry. Students re-admitted to the program must adhere to the rules, regulations and program requirements of the Undergraduate Calendar in the year of re-entry into the program. Former Medical Radiation Sciences students who obtain permission for re-entry to a Specialization will not be guaranteed protected status in the allotment process, regardless of their previous placement history.

NOTES
1. The overall program comprises ten terms within four calendar years. Three full terms are spent in clinical placement.
2. Students apply for their Level II program selections during Winter Term of Level I. At the end of Level I, eligible Medical Radiation Sciences students are streamed into one of two specializations: Radiography and Ultrasonography. Both have limited enrolment. Selection of students into Level II specializations is on the basis of academic achievement (for Level I students, the Fall/Winter Average, on at least 24 units of study). Depending on a student’s relative academic ranking in the list of those applying to enter a specialization, he/she may or may not be placed in the specialization of his/her choosing.
3. Transfer within Medical Radiation Sciences: Any Medical Radiation Sciences student currently registered in one program specialization who wishes to transfer into another specialization must submit the transfer request in writing to the program by the end of April. As admission into Level II programs is a competitive process normally based on the Level I Fall/Winter Average, such transfer requests will be considered only after all eligible Level I students have been allocated into their specializations, and only if there is space remaining. Transfers are made into Level II only, and would result in an increase in the length of time required for the student to complete the program. Transfers may not be made into Level II from any other program. Transfers are neither automatic nor guaranteed.
4. Placements will be with agencies that have contracted in advance with Mohawk College to provide specific experiences and resources during the normal clinical semester schedule; therefore, placements are not available at any other agencies or during other times. The College, in accordance with established policy, will determine allocation of students to these clinical facilities. The final assignment of learning settings is constrained by the availability of site resources. Students may be required to attend...
clinical practica in a setting that is not of their choosing. The College cannot accommodate any student requests for special consideration. Students must prepare financially and personally to relocate and/or commute to their assigned clinical placements. Students are responsible for arranging their own travel to and from assigned placements and are responsible for covering any costs incurred.

5. All students may be required to attend full-time clinical practica at a minimum of two different clinical agencies that may be located across Ontario.

6. Basic Cardiac Life Support Training: All Level II students are required to have obtained a current certificate in Basic Cardiac Life Support - HCP (Health Care Provider) and First Aid Training prior to commencing Term 2 of Level II. Current certificates are also required for Clinical Practica 2 and 3 in Level IV.

7. All students will be required to act as simulated patients for their peers in skills course labs and during skills practice sessions.

8. Immunization and Health Screening: The Ontario Public Hospitals Act requires that all persons working or on educational placement in a hospital setting meets criteria regarding surveillance for infectious diseases. All Level II students will be required to provide evidence of compliance with completion of mandatory immunization requirements as well as completing pre-clinical disease screening. Updated screening may be required for Level IV clinical practica.

9. Mask fit testing and a satisfactory Police Records Check are required prior to the commencement of each clinical placement.

10. All costs associated with pre-clinical requirements are the responsibility of the student.

11. All students are required to submit pre-clinical requirements by dates specified by the program. Failure to meet required deadlines may result in delay or loss of the clinical placement.

12. Levels II through IV run consecutively from September of Level II to completion of the program at the end of April in Level IV. The pattern of semesters of clinical practicum and academic courses is shown in the chart below.

PROGRAM NOTES

1. This is a five-level (year) co-op program which includes two eight-month work terms which must be spent in life sciences related placements.

2. Students must be registered full-time and take a full academic workload, as prescribed by Level and Term.

3. Students are required to complete SCIENCE 2C00 in Level II.

4. Registration in the Honours Life Sciences Co-op program does not guarantee access to all courses. Some courses have program restrictions and students are responsible to read course prerequisites carefully.

5. Students interested in completing a thesis or independent study course should consider completing LIFESCI 3RP3 in Level III.

6. Students interested in graduate school may wish to consider completion of a thesis or independent study course (see LIFESCI 4A03, 4B03, 4D15 A/B S, 4EP6 A/B S, SCIENCE EXPLORE 3IS3, LIFESCI 3RP3, 3XX3, 3YY3, 4A03, 4B06 A/B S, 4D15 A/B S, 4EP6 A/B S, SCIENCE 2A03, 3A03, 3IS3, 3M03, 3WT0).

7. Level IV Research Seminar topics may change from year to year. Research Seminar topics and descriptions are available on the program web site (https://www.science.mcmaster.ca/sis/undergraduate/life-sciences.html).

8. Students entering Level IV or V of Honours Life Sciences Co-op must complete and submit a ballot, rank ordering their preference for enrolment in Level IV seminar offerings by the end of March. Students will be informed of their ballot result by the end of May. Failure to submit a ballot by the stated deadline may compromise enrolment in preferred seminar.

9. Effective September 2017, students must complete at least one of EXPLORE 3IS3, LIFESCI 3EP3, 3RP3, 3XX3, 3YY3, 4A03, 4B06 A/B S, 4B09 A/B S, 4C09 A/B S, 4C12 A/B S, 4D15 A/B S, 4EP6 A/B S, SCIENCE 2A03, 3A03, 3IS3, 3M03, 3WT0.

10. LIFESCI 4CM3 is required for students completing the Honours Life Sciences - Origins of Disease Specialization and is not included in the pre-registration ballot.

11. LIFESCI 4X03 is required for students completing the Honours Life Sciences - Sensory Motor Systems Specialization and is not included in the pre-registration ballot.

12. The Co-op option is not available with either the Origins of Disease or Sensory Motor Systems Specializations.

13. Course planning is extremely important. Students must review and consider the requisites on Level II, III and IV courses when enrolling in the previous Levels.

NOTES APPLICABLE TO ALL PROGRAMS OFFERED BY THE DEPARTMENT OF PHYSICS AND ASTRONOMY

1. The Department offers the following programs:
   - Honours Astrophysics
   - Honours Medical and Biological Physics
   - Honours Physics

2. These programs consist of a specified set of basic requirements and a wide choice of electives (including those from outside the Faculty of Science), allowing for interdisciplinary studies or the opportunity to complete a Minor in another subject. Students are encouraged to read the Program Notes of each program for a list of additional sets of courses which are appropriate preparation for graduate studies in Physics, Astronomy, Medical Physics or Biophysics.

3. Transfer between options may be possible at any time, subject to satisfying the admission requirements.

4. Admission to Honours Biophysics Co-op (last entry in September 2017), Honours Medical and Biological Physics Co-op and Honours Physics Co-op is in Level III.

5. A Minor in Astronomy is not permitted in the Honours Biophysics, Honours Medical and Biological Physics or Honours Physics program.

6. Students wishing to take additional Level III, IV Mathematics courses should consider MATH 2XX3.

B.SC. THREE-LEVEL DEGREE
A three-level program with a Physics orientation is available through the B.Sc. in Chemical and Physical Sciences.

The program is offered jointly in partnership by Mohawk College of Applied Arts and Technology and the Department of Psychology, Neuroscience & Behaviour, McMaster University. Students pursue two qualifications simultaneously, and graduates receive the Ontario College Graduate Certificate from Mohawk and the McMaster Honours Bachelor of Applied Science degree.

ADMISSION
Enrolment in this program is limited and possession of the published minimum requirements does not guarantee admission. Selection is based on academic achievement but requires, as a minimum, completion of any Level I program with a Grade Point Average of at least 5.0 including:

0-3 units
• BIOLOGY 1P03 - Introductory Biology
  (or SBI4U - Biology)

0-3 units

PROGRAM NOTES
1. The timing of the Spring/Summer sessions may not adhere to the Sessional Dates as published in this Calendar.
2. Students who enrolled in this program prior to September 2019, may use PNB 3Q03 A/B S towards the units required from the Human Behaviour (Autism and Behavioural Science) Course List.
FIELD PLACEMENT NOTES

1. Applying for Placements - Prior to the start date of a placement, students are required to submit a completed Field Placement Request Form to the Program Coordinator.

2. Placements will be with agencies that have contracted in advance with Mohawk College. The College cannot accommodate any student requests for special consideration.

3. Students are responsible for arranging their own travel to and from assigned placements.

4. Eligibility for Placements - All students must meet academic, social, and health requirements before they can attend a site for field placement.
   - Non-Violent Crisis Intervention - All Level II students are required to have obtained a current certificate in Non-Violent Crisis Intervention in order to attend their placements. Failure to meet this requirement will result in loss of placement. Additionally, students will be required to complete a refresher half-day workshop in Non-Violent Crisis Intervention prior to their Spring/Summer placement between Levels III and IV.
   - Social/Professional Requirements - All students within the program are expected to consistently demonstrate Social/Professional behaviours that are typical of those expected by employers. If, in the opinion of program faculty, a student has failed to demonstrate appropriate behaviours, the university may refuse to offer a placement.
   - Health Requirements - In the interest of the student and the placement, students are required to submit documentation (e.g., Health Record Form) that they have had a satisfactory physical examination including many routine vaccinations. All students must submit this documentation prior to placement or the student will not start the placement. Students should refer to their field placement coordinator to determine health requirements specific to their college and placement agency.
   - Police Reference Check - All students are required to have a Police Reference Check prior to the commencement of their field placement.

5. All costs associated with pre-placement requirements are the responsibility of the student.

PROGRAM NOTES
1. The timing of the Spring/Summer sessions may not adhere to the Sessional Dates as published in this Calendar.
2. Students who enrolled in this program prior to September 2019, may use PNB 3003 A/B towards the units required from the Human Behaviour (Early Childhood Education) Course List.
3. Students interested in pursuing post-graduate studies are encouraged to take HUMBEHV 3MD3 in Level III or IV.

EARLY CHILDHOOD EDUCATION (ECE) FIELD PLACEMENT NOTES
1. Applying for Placements - Prior to the start date of a placement, students are required to submit a completed Field Placement Request Form to the Program Coordinator.
2. Placements will be with agencies that have contracted in advance with Mohawk College. The College cannot accommodate any student requests for special consideration.
3. Students are responsible for arranging their own travel to and from assigned placements.
4. Eligibility for Placements - All students must meet academic, social, and health requirements before they can attend a site for field placement.
   · Social/Professional Requirements - All students within the program are expected to consistently demonstrate Social/Professional behaviours that are typical of those expected by employers. If, in the opinion of program faculty, a student has failed to demonstrate appropriate behaviours, the university may refuse to offer a placement.
   · Health Requirements - In the interest of the student and the placement, students are required to submit documentation (e.g., Health Record Form) that they have had a satisfactory physical examination including many routine vaccinations. All students must submit this documentation prior to placement or the student will not start the placement. Students should refer to their professional practice coordinator to determine health requirements specific to their college and placement agency.
   · Police Reference Check - All students are required to have a Police Reference Check prior to the commencement of their placement.

5. All costs associated with pre-placement requirements are the responsibility of the student.

The social sciences are concerned with the study of human activities and relationships and their social, political, economic, cultural and spatial contexts. Through the pre-industrial to the post-industrial eras, social scientists examine social, economic, cultural and political issues experienced by individuals, groups, and societies as well as the interactions between people and their environments, both natural and built.

There are various opportunities for students to link their academic goals with their career interests. These experiential education initiatives include, but are not limited to, inquiry, internships, academic placements, a career planning course, student project grants, and undergraduate summer research awards. Students are strongly advised to take advantage of the extensive advisory services provided by the Faculty. New students in particular should plan a program of study that will allow them a number of options for Level II.

The Faculty of Social Sciences encourages students to become engaged in a wide variety of learning opportunities. These experiences can enrich learning, open new fields of study, and build transferable skills that prepare you for further academic work and for a range of careers.

Degree Programs

HONOURS PROGRAMS (HONOURS BACHELOR OF ARTS)
Honours Bachelor of Arts programs consist of a total of 120 units of work normally completed over four years. Honours programs provide a concentration in the particular field, as well as an extended time of study, and are normally a requirement for those who contemplate proceeding to graduate studies.

COMBINED HONOURS BACHELOR OF ARTS PROGRAMS
Subject to possible timetable restrictions, and provided that the student meets the requirements for entry into each of the relevant Honours programs, a student may combine work in any two departments and be graduated with a Combined Honours degree. These combinations are available within the Faculty, with programs in the Faculty of Humanities, and with the Arts and Science Program. All Combined Honours programs must be approved by both Departments concerned as well as by the Office of the Associate Dean(s) Studies. Students will normally complete approximately 36 units of work beyond Level I in each component of the program (normally 12 units per level in each subject). The Honours B.A. Social Psychology and Honours Bachelor of Social Work programs are not available in combination with another subject.

HONOURS BACHELOR OF SOCIAL WORK (B.S.W.)
The Honours Bachelor of Social Work (Honours B.S.W.) program is a professional Honours program consisting of 120 units of work, typically completed over four years. Students who have already received one or more undergraduate degrees may apply to the Bachelor of Social Work (B.S.W.) program consisting of 60 units of work, typically completed over two years.

BACHELOR OF ARTS PROGRAMS:
B.A. programs consist of a total of 90 units of work, normally completed over three years. Three-level Combined Bachelor’s degree programs are available only in Indigenous Studies and Another Subject. The other subject may be from the Faculty of Social Sciences or the Faculty of Humanities.

Options to Combine with a Degree

MINOR
A Minor is an option available to students enrolled in a four- or five-level program. Normally students must complete a minimum of 24 units in the Minor subject. Students are responsible for ensuring that the courses taken meet the requirements for a Minor. Students who have the necessary requirements may apply for recognition of that Minor when they graduate. If granted, this recognition will be recorded on the student’s transcript.

Within the Faculty of Social Sciences, Minors are available to students registered in an Honours program provided that the subject area of the Minor is not integral to the requirements of their degree program. At least 12 units (above Level 1) toward the Minor must be considered elective to the degree.

Please see Minors in the General Academic Regulations section of this Calendar for further information. All courses have an enrolment capacity and the Faculty cannot guarantee registration in courses, even when all requisites have been met. Therefore, the completion of a Minor is not guaranteed.

Minors offered by the Faculty of Social Sciences include:

· Anthropology
· Economics
· Health, Aging and Society
· Health, Well-Being and Religion
· Indigenous Studies
· Japanese Studies
· Justice, Law and Order
· Labour Studies
· Mental Health, Addiction and Society
· Political Science
· Public Leadership
· Religion and Diversity

Academic Regulations

STUDENT ACADEMIC RESPONSIBILITY
You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations of this calendar.

ACCESS TO COURSES
All undergraduate courses at McMaster have an enrolment capacity. The University is committed to making every effort to accommodate students in required courses so that their program of study is not extended. Unless otherwise specified, registration is on a first-come basis and in some cases priority is given to students from particular programs or Faculties. Students will be informed of their enrolment periods and are encouraged to enroll as soon as online enrolment is available to them in the Student Centre in Mosaic.

STUDENT COMMUNICATION RESPONSIBILITY
It is the student’s responsibility to:

- maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- use the university provided e-mail address or maintain a valid forwarding e-mail address.
- regularly check the official University communications channels. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student’s designated primary e-mail account via their @mcmaster.ca alias.
- accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student’s @mcmaster.ca alias.

Students enrolled in a program in the Faculty of Social Sciences, in addition to meeting the General Academic Regulations of the University, shall be subject to the following regulations of the Faculty of Social Sciences.

APPLYING FOR ADMISSION TO LEVEL II PROGRAMS
Any student seeking admission to a Level II program in the Faculty of Social Sciences for the following Fall/Winter session must submit an Application for Admission to Level II through the Mosaic Student Centre (My Academics; Program/Plan Selection application) no later than April 30. The application allows students to rank four program choices, in order of preference. Students are advised to rank program choices carefully, especially when seeking admission to limited enrolment programs. If admitted to the first program choice, admission to other program choices will not be evaluated. If a student is not admitted for the first program, the second program choice will be evaluated, followed by third and then fourth choices. Students ineligible for an Honours-level program of choice will be considered for the corresponding B.A. program. Students must check the Mosaic Student Centre in late May to confirm their program for the following Fall and Winter terms.

Students applying to the Honours B.S.W. program must also apply directly to the School of Social Work well before March 1, and must refer to department admission notes.

LIMITED ENROLMENT PROGRAMS
Admission at Level II (and above) is limited for the following programs. Possession of the published minimum requirements does not guarantee admission.

- All Honours Bachelor of Social Work and Bachelor of Social Work programs
- All Honours Aging and Society programs
- All Honours Health and Society programs
- All Honours Labour Studies programs
- All Honours Psychology, Neuroscience & Behaviour (B.A.) programs
- Honours Social Psychology

HONOURS B.A. PROGRAMS:
You must have a Grade Point Average (GPA) of at least 5.0 to continue in an Honours B.A. program. If your GPA is 4.5 to 4.9, you may remain in the Honours program, but will be placed on program probation for one reviewing period. You may be on program probation only once. If your GPA is 3.0 to 4.4, you must transfer to another B.A. program for which you qualify. If your GPA is less than 3.0, you may not continue at the University.

HONOURS B.S.W., B.A./B.S.W. AND B.S.W. PROGRAMS:
To continue in an Honours B.S.W., B.A./B.S.W. or B.S.W program, you must have a Grade Point Average (GPA) of at least 6.0, and achieve at least the minimum grade in all Social Work courses as listed the program notes for Progression Within Program in the Honours Bachelor of Social Work (B.S.W.), Combined Bachelor of Arts/Bachelor of Social Work (B.A./B.S.W.) or the Bachelor of Social Work (B.S.W.). If your GPA is 5.5 to 5.9, you may remain in the program, but will be placed on program probation for one reviewing period. You may be on program probation only once. If your GPA is 3.0 to 5.4, you must transfer to another program for which you qualify. If your GPA is less than 3.0, you may not continue at the University.

TRANSFERRING TO HONOURS B.A. PROGRAMS BEYOND LEVEL II
Students who are not admissible to an Honours program from Level I to Level II, may request admission for the following Fall/Winter academic session. Program entry requirements and academic requirements for continuation at the level for which application is made, must be met. Transfer requests must be submitted through the Mosaic Student Centre (Service Request application) by March 30.

GRADUATION
From Honours B.A. and B.A. Programs
To graduate from a program, students must meet all course requirements for their degree program. The requirements for graduation from these programs are described under the heading Graduation in the General Academic Regulations section in this Calendar.

Transferring to Graduate with a Three-level B.A. Degree from an Honours B.A. Program
Students who successfully complete at least 90 units including all expected course requirements up to the end of Level III of any Honours B.A. degree, with a minimum Grade Point Average of 3.5 may request permission from the Office of the Associate Dean of Social Sciences (Studies) to transfer to graduate with the corresponding three-level B.A. degree. Students enrolled in Honours Social Psychology may be given the option of either transferring to graduate with a B.A. in Psychology or a B.A. in Sociology based on the degree that is most relevant to the subject concentration and for which they meet all the degree requirements. Students who do not qualify for a specific three-level B.A. degree may petition to the Office of the Associate Dean to be considered to graduate with a Social Sciences B.A. (General) exit degree.

All requests to transfer to graduate must be submitted to the Office of the Associate Dean of Social Sciences by April 15th for the Spring Convocation and by September 1st for the Fall Convocation.

Letter of Permission Courses to Graduate
Students taking the final courses for completion of their degree program on a Letter of Permission at another university must ensure that the official transcripts are sent to the Office of the Associate Dean of Social Sciences at McMaster University. For students expecting to graduate at the Spring Convocation, transcripts must be received by May 15 and for Fall convocation, by September 30.

Transfers to the Faculty of Social Sciences
Students from other Faculties are able to transfer to degree programs offered by the Faculty of Social Sciences provided they have obtained a Grade Point Average of at least 3.5 and have completed the necessary program admission requirements. Students approved to transfer to the Faculty of Social Sciences may be required to fulfill additional requirements at the time of admission. Failure to comply with these conditions may result in an academic standing of May Not Continue in Faculty at the following reviewing period.

REINSTATEMENT
A student who may not continue at the University may apply for reinstatement. Application for reinstatement must be made to the Office of the Registrar using the Reinstatement Request Form by the application deadline for the session. See the Application Procedures section of this Calendar. Reinstatement forms will be carefully reviewed and the evidence considered will include the student’s academic performance before and after admission to McMaster, a letter of explanation and documentation of any extenuating circumstances.

Reinstatement is not automatic or guaranteed. Decisions are normally made after June 30 for September entry. The Grade Point Average for students who are reinstated is reset to 0.0 on zero units. Credit is retained for courses in which passing grades have been achieved. NOTE: If at a review after reinstatement the Grade Point Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months. Failure to comply with the conditions outlined at the time of reinstatement may result in withdrawal from the university at the following reviewing period.

DEADLINES
The Faculty of Social Sciences will not consider applications for admission, admission to a second degree or continuing studies, reinstatement, registration, or dropping and adding of courses after the deadlines stated in this Calendar under Sessional Dates and Application Procedures, unless written documentation is provided showing good cause, as determined by the Faculty.

ACADEMIC BREADTH REQUIREMENT
The Faculty of Social Sciences encourages all of its students to embrace academic breadth in both knowledge and skills. Therefore, every Social Sciences student is required to successfully complete at least 6 units of course work outside of their department/discipline(s) of study to satisfy degree requirements. These course units must be over and above the 30 units required for Level I Social Sciences.

ACADEMIC ADVISING
The aim of academic advising is to help students tailor a program of studies to fit their interests. Advising also involves reviewing these interests from time to time to accommodate changing plans, needs and academic performance.

Advising is available throughout the year from the Office of the Associate Dean of Social Sciences and the departments or academic units in the Faculty of Social Sciences. It is strongly recommended that students consult with a Departmental Undergraduate Advisor during March in conjunction with the Level II program application.

AWARDS
For conditions and terms of awards for full-time and part-time students, please refer to the Undergraduate Academic Awards section of this Calendar.

COURSE SELECTION AND COURSE CHANGES
Students are responsible for ensuring that their course selection meets the requirements of the degree program in which they are enrolled, that prerequisites have been met, and that, where necessary, permission to take courses has been obtained. They should review their personal advisement report each time they cancel or add courses, and contact an Academic Advisor if they have questions, particularly if the advisement report shows unused courses. Students should also be aware that changes to their course load may affect their fees and their eligibility for scholarships or sources of financial aid such as OSAP.

OVERLOAD
Normally students may not register in more than 30 units during the Fall/Winter Term. In the following circumstances an overload of up to six units may be taken:
credit for work completed elsewhere may be confirmed only after the Office of credit for a full year of study at another institution. The awarding of transfer the commencement of study elsewhere. MINOR IN MENTAL HEALTH, ADDICTION AND SOCIETY

The minor in Mental Health and Addiction provides students with opportunity to develop an in-depth understanding of the relationship between mental health, addiction, and society. It involves examining the links between mental health and wider social processes, including marginalization, the construction of deviance, and the social determinants of health. Students will also gain a solid understanding of mental illness and some of the ways in which social change and other non-biomedical interventions can be harnessed to address issues related to mental health and addiction and promote wellbeing.

Students will select courses from the Faculties of Social Sciences, Science that address these themes, developing a strong interdisciplinary grasp on the links between mental health, addiction, and society. Beyond the required courses, students will be able to select from a wide variety of courses that cater to their own interests.

It is the student’s responsibility to check carefully for prerequisites, co-requisites and enrolment restrictions of all courses in this list. Students are encouraged to speak to their Faculty advisors about Faculty-specific rules about double-counting courses for the minor.

MINOR IN PUBLIC LEADERSHIP

This minor is intended to provide students with a strong theoretical, practical and applied understanding of leadership and the role that political and/or public actors can play in the public domain of both democratic and non-democratic states to achieve their policy goals, affect positive social change and impact the policy choices of governments. Students will be prepared for further studies or careers in politics, government, public policy, community organization and activism, education, human rights and law.

Students will select courses from the Faculty of Social Sciences that address these themes, developing a strong interdisciplinary grasp on the different concepts of leadership and their application to different policy and public environments. Beyond the required courses, students will be able to select from a wide variety of courses that cater to their own interests.

It is the student’s responsibility to check carefully for prerequisites, co-requisites and enrolment restrictions of all courses in this list. Students are encouraged to speak to their Faculty advisors about Faculty-specific rules about double-counting courses for the minor.

Students study various aspects of Social Psychology from a multidisciplinary perspective to gain an understanding of how individuals behave, how small groups and communities interact, and how societies form practices and priorities. Students will learn how to locate themselves in the complex fabrics of their cultures, their geographies and their power relationships. Students who are interested in many social science perspectives on how people develop over the lifespan and how they behave in different environments and circumstances should consider this program.

- SOCWORK 4W03 - Child Welfare
- SOCWORK 4Y03 - Critical Issues in Mental Health & Addiction: Mad & Critical Disability Studies Perspectives for SW

2. Progression Within Program: Students must achieve a minimum grade of C+ in each of SOCWORK 2A06 A/B, 2BB3, 2CC3, 3D06 A/B S, 3E03, 3F03, 4D06 A/B S, 4I03, 4X03 and 4Z03, a Pass in their field placements SOCWORK 3D06 A/B S and 4D06 A/B S, and a CA of at least 6.0. If a student fails to meet the minimum grade requirements in those required social work courses or a Pass designation in either field placement (SOCWORK 3D06 A/B S and 4D06 A/B S), the student may not proceed in the program; however, the student may make a request in writing to the Director of the School of Social Work to be allowed to repeat the course in which the minimum grade or Pass requirement has not been met. Such requests will be reviewed by the Director of the School of Social Work in consultation with the Chair of the Undergraduate Studies Committee and/or the Chair of the Field Education Program and the course instructor. These courses and/or placements may only be repeated when approval is given by the Director of the School of Social Work following consultation as described above. Students who subsequently fail to meet the minimum grade or Pass requirement after repeating the course or placement may not continue in the program.

3. Students who have completed SOCWORK 2E03 but not 3A03 must take both SOCWORK 3E03 and 3F03 and reduce their selections from the Social and Political Context Group to 9 units (selection must still include SOCWORK 4IJ03). Those students who have taken SOCWORK 2A06 but not 2E03 must contact the School of Social Work for guidance on completion of program requirements.

4. Students who were admitted to this program in 2017-2018 or later must complete INDIGST 1A03 - Introduction to Indigenous Studies. If this requirement was not completed prior to admission to the B.S.W. program, students must replace three units from the Social and Political Context of Social Work courses with INDIGST 1A03.

5. Students must complete three units of Social Sciences Research Methods (e.g. SOCIOL 2Z03 or SOCPsy 2K03 or HLTHAGE 2A03). If this requirement was not completed prior to admission to the B.S.W. program, students must replace three units from the Social and Political Context of Social Work courses with a research methods course. A statistics course may not substitute for a research methods course.

6. Graduation: To qualify for the B.S.W. students must complete a total of 60 units. The B.S.W. will be granted only if the student has achieved a grade of at least C+ in each of SOCWORK 2A06 A/B, 2BB3, 2CC3, 3D06 A/B S, 3E03, 3F03, 4D06 A/B S, 4I03, 4X03 and 4Z03, a Pass in SOCWORK 3D06 A/B S and 4D06 A/B S, and a CA of at least 6.0.

7. Students are expected to assume the cost of travelling to and from field practice agencies and for any related expenses.

8. Students in the social work program must apply for third and fourth year field placements (SOCWORK 3D06 A/B S and 4D06 A/B S), and are able to rank their placements in terms of preference. While efforts are made to match placements with student preferences, the final assignment of placement settings is constrained by many factors, including the availability of settings and field and faculty resources. Students may therefore be required to complete a field placement in an agency that is not among their preferred options.

Such requests will be reviewed by the Director of the School of Social Work in consultation with the Chair of the Undergraduate Studies Committee and/ or the Chair of the Field Education Program and the course instructor. As stated in the McMaster University’s Senate Policy on Diplomas and Certificates, “academic credits can be applied to another credential. Examples include, but are not limited to, transfer of credit from a certificate to a degree or from a degree to a diploma. Normally, credits can be applied to a maximum of two credentials.” Further, “[pending approval by the student’s Faculty office], up to 100% of the academic credit courses completed toward undergraduate diploma and certificate programs may be used for credit toward another credential at the discretion of and in accordance with the normal academic rules specified by academic unit offering the subsequent credential.”

A specific way that undergraduate students can benefit from study through Continuing Education is to use their elective credits within their degree programs to complete a Continuing Education Certificate or Diploma. INTERDISCIPLINARY MINORS AND THEMATIC AREAS

INTERDISCIPLINARY MINOR IN SUSTAINABILITY

Addressing sustainability in our society poses interdisciplinary challenges that require interdisciplinary solutions. Sustainability is frequently taught in silos within individual Faculties, and most often within individual and isolated courses. The goal of the Minor is to alter this pedagogy and teach sustainability both within and across Faculties. The Minor provides a path for students to study diverse aspects of sustainability from different disciplines and integrate them into a cohesive whole. The primary responsibility for governance of the Minor is held by the Interdisciplinary Minor in Sustainability Committee comprised of an interdisciplinary group of faculty and administrators from the Faculties of Business, Engineering, Health Sciences, Humanities, Science, Social Sciences, and the Arts & Science Program. The Arts & Science Program hosts the Minor by managing administrative obligations such as the submission of curricular revisions. Responsibility for advising students rests with the student’s home Faculty. More information on the Interdisciplinary Minor in Sustainability can be found at http://asp.mcmaster.ca/minor.html or by contacting asp@mcmaster.ca.

ENGLISH 1CS3 - STUDYING CULTURE: A CRITICAL INTRODUCTION

The course will introduce fundamental concepts and questions in the field of cultural studies, and will prepare students to use those tools in analyzing culture as a site of meaning, identities, power, and pleasure. The course aims to develop your ability to think critically about your own engagements with a broad range of manifestations of culture (e.g. popular culture, social institutions, everyday practices, digital culture, consumer culture). Considerable emphasis will be placed on the development of critical skills in reading and writing.

ENGLISH 1F03 - THE WRITTEN WORLD

What does the world look like when it takes a literary form? We will read and write about one or more literary genres or forms from various times and places, and reflect on the shape of literature, its place in the world, and the place of the world in it. The course functions as an introduction to the study of literature, equipping students with conceptual, analytical and writing tools that will help them become informed readers of the many modes and manners of imaginative expression. Considerable emphasis will be placed on the development of critical skills in reading and writing.

We will trace how particular literary traditions emerge in relation to developments in the cultural movements of, for example, gender and sexuality, selfhood, nation and empire, capitalism, and the environment. We will consider how a literary text is an expression of a particular cultural moment, with all its social and material preoccupations, and yet makes meaning through a complex dialogue with past traditions. The course functions as an introduction to the study of literature, equipping students with conceptual, analytical, and writing tools that will help them become an informed reader of the many modes and manners of imaginative expression. Considerable emphasis will be placed on the development of critical skills in reading and writing.

ENGLISH 1H03 - WORDS IN PLACE

Many public ceremonies in Canada now include acknowledgements of whose land we are meeting on. What does it mean to acknowledge the place where we live and work? How do places come into focus when we write and speak about them? Considerable emphasis will be placed on the development of critical skills in reading and writing.

Canadian business history has fallen out of favour among recent historians. While the field was extensively studied in previous decades, it became displaced by the growing popularity of social and cultural history. However, Canadian business history is deeply intertwined with broader questions about the economic, social and political climate of the country. Through examining key themes in business history in the last two centuries, this course will provide a broader perspective on the role and perception of Canadian business and industry in the country’s past. It will also question what these lessons can tell us about its present economic state and its potential futures. This course includes discussion sessions which, along with the assignments, are intended to help students develop their critical reading and communication skills. Students do not need a background in economic or business history to succeed in this course.

Students will gain valuable field experience, and do guided research at their placement which they will use to write a final report. There is also a thesis option, which allows students to choose their own topic in Labour Studies, research it in depth, and write a major analytical paper. Enrollment in the field experience option is limited; students must apply to the Labour Studies Office by March 1.

LABRST 4D03 - WORK AND THE ENVIRONMENT
Who bears the cost of environmental degradation? How does our current economic system shape possibilities for environmental justice? Is there such a thing as working class environmentalism? And how do issues of environmental justice get taken up by trade unions? Struggles for environmental justice include everything from fighting against climate change and fighting for access to clean drinking water, to battles over health and safety in the workplace. In this course we will examine how social relations under capitalism shape our interactions with nature and create patterns of work and inequality. We will also explore the varied ways workers and workers organizations have responded to issues of environmental injustice.

Precarious work is rising. In the Global North, these insecure, often low-wage jobs are now becoming commonplace. How did precarious work arise and how does it affect our lives? How does race, gender, location and citizenship impact who is more likely to be precarious? What processes and policies enable precarious work? What strategies have workers used to challenge precarious work? How effective are they? In this course we will explore the nature of precarious work, its effects, and the range of strategies available to workers and workers’ organizations to fight precarity including new forms of unionism, innovative workplace tactics, growing linkages between labour and social movements, and new types of political initiatives.

MEDICAL RADIATION SCIENCES

Courses in Medical Radiation Sciences are administered by the School of Interdisciplinary Science.
General Sciences Building, Room 105, ext. 21181

Department Notes
1. Courses for Levels I, II, III and IV Medical Radiation Sciences, Radiography, Ultrasonography or Radiation Therapy specialization are available only to students registered in the Medical Radiation Sciences program unless otherwise stated.
2. Lab courses may be held at learning settings external to the University.
3. Students are responsible for arranging their own travel to and from or accommodation in learning settings external to the University and for covering any costs incurred. All students enrolled in the Medical Radiation Sciences program are expected to be able to travel to any learning setting in Ontario. The final assignment of learning settings for any clinical practicum course is constrained by the availability of the requested setting and resources. Students may, therefore, be required to complete a clinical practicum course in a learning setting that is not of their choosing.

4. For all clinical practicum courses, the prerequisite skills and patient care courses must have been completed within the previous twelve months; otherwise, the student must complete a skills reassessment course during that twelve-month period.

POLITICAL SCIENCE

Courses in Political Science are administered by the Department of Political Science. Kenneth Taylor Hall, Room 527, ext. 24741
https://politicalsemence.mcmaster.ca/

Department Notes
1. The Department of Political Science offers courses in the fields of Canadian Politics, Comparative Politics, International Relations, Political Theory and Public Policy, as well as courses that are not field specific. The Department does not require students to concentrate in any field of study (please see Department of Political Science in the Faculty of Social Sciences section of this Calendar for specific program requirements.) However, students should note that prerequisites for upper year courses normally come from the specific field of which those courses are part. In some instances, prerequisites call simply for prior coursework in a particular field, in which case students may consult the lists below to determine which courses satisfy these requirements.

2. Not every Political Science course listed in this Calendar is offered every year. Students are advised to consult the Master Timetable published by the Office of the Registrar or contact the Department after April 1st for the list of courses that will be offered in the following academic year.

3. All students are encouraged to seek advice from members of the Department in developing a program of study. All Honours students are strongly advised to discuss their program with an undergraduate advisor to ensure that it meets Departmental requirements.

4. POLSCI 2N3/uni00A0and POLSCI 3N3/uni00A0or POLSCI 3N06 A/B/uni00A0/uni00A0are required for students in Honours Political Science programs.

5. POLSCI 2006 A/B is required for students enrolled in Honours Political Science programs and is recommended for students in the B.A. program.

6. Students should be alerted to those Level II and III courses that are required to qualify for a number of Level IV courses. Students who wish to enter courses but who lack the necessary prerequisites must obtain the permission of the instructor.

7. Some Level III courses do not have course prerequisites. However, students without related Level II courses should contact one of the Department's
undergraduate advisors or the course instructor to determine whether they have the appropriate academic background for any specific Level III course.

8. Political Science Honours and Combined Honours students are encouraged but not required to take one or more of the Level III Honours Issues courses (POLSCI 3B03, 3H03 and 3J03). The topics of the courses will be described on the Department’s website in advance of the date on which registration for them begins. Normally they will correspond to the research interests of the permanent faculty members (if available) who will teach them.

The Office of the Registrar, Student Financial Aid & Scholarships (SFAS) is committed to professional student service. We deliver government and University aid and award programs that support financial wellness and excellence at the post-secondary level. Government student aid such as the Ontario Student Assistance Program (OSAP) is administered on behalf of the Ministry of Training Colleges and Universities. McMaster aid and awards programs include academic grants, awards, bursaries and work programs. For more information about our programs and services, visit the SFAS website at http://sfas.mcmaster.ca.

Regulations for Aid and Awards

The University promotes access to available Aid and Awards and seeks to maximize opportunities for students while ensuring equity and consistency in administration. In doing so, the University operates within the Senate approved University Aid and Awards Policy to ensure its responsibilities to students and donors are met. While all regulations for Aid and Awards are established within this approved policy, the University may choose to offer additional Aid and Award programs, establish regulations through which to administer these programs, and/or modify existing regulations with Senate approval after the Undergraduate Calendar has been published.

It is important to note that Financial Awards are not covered by the University Aid and Awards Policy and are not administered through the Aid and Awards regulations that follow. Financial Awards support students in a manner consistent with the goals of the University, but do not necessarily meet all of the policy regulations of established Aid and Award programs. Financial Awards may be administered centrally through the Office of the Registrar, Student Financial Aid & Scholarships (SFAS), through the School of Graduate Studies (SGS), or through designated representatives in University faculties and departments that have established processes to administer their own funds (e.g. Athletics and Recreation). Financial Awards are not Senate-approved awards and thus, are not recognized at convocation or included on University transcripts. Information about Financial Awards is made available through department websites.

The following regulations apply to all Undergraduate Aid and Award Programs (and excludes Financial Awards, as detailed above):

Application Requirements

Some Aid and Awards require students to submit an application:
1. Application records for Aid and Awards, supporting documentation (e.g. transcripts, letters of reference, income tax notices of assessment, student loan entitlements, etc.) and responses to applications shall be handled by the administering office in accordance with the Freedom of Information and Protection of Privacy Act (FIPPA).
2. Where advertised Aid and Award application deadlines fall on a non-business day (i.e. Saturday, Sunday or University-recognized holiday), the deadline is 8:30 am the next business day.
3. Requirements for Aid and Awards by application typically include -
   · An online application submitted electronically through Mosaic with a completed and signed cover page, or a completed signed paper-based application form
· A statement of eligibility
· A curriculum vitae/academic resume
· A transcript (McMaster University transcripts may be unofficial)
· In addition, for the types of awards noted below, at least one academic or personal (non-family member) letter of reference may be required -
  i. University-wide Aid and Awards
  ii. Aid and Awards with a value exceeding $2000
  iii. Renewable Aid and Awards
  iv. Aid and Awards at the discretion of the Office of the Registrar, Student Financial Aid & Scholarships
4. The University may choose to audit and verify any or all information provided to complete an Aid or Award Application.
5. Application records and supporting documentation is used by the Office of the Registrar, Student Financial Aid & Scholarships, Award Chairs and Selection Committees for the sole purpose of administering Aid and Award programs, including, but not limited to, determining student eligibility.
6. All application records and supporting documentation submitted by unsuccessful applicants will be retained for a minimum period of twelve months after last use. All application records and supporting documentation submitted by successful applicants will be retained for a minimum period of seven years after last use.
7. All application records and supporting documentation remain the property of McMaster University.

Gender Criteria
For the purpose of Aid and Award criteria and eligibility, references to "Woman" or "Female" include all students who identify as Woman/Female and references to "Man" or "Male" include all students who identify as a Man or Male.

Maximums
To ensure a fair and wide allocation of Undergraduate Aid and Awards, the University restricts the number and value of aid and awards which students may receive for an academic year.

An eligible entering student may receive:
- a. One Entrance Award granted solely on the basis of academic merit (e.g. a McMaster Honour Award); and
- b. One Indigenous Student Entrance Award or one Entrance Award granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition; and
- c. One Entrance Academic Grant or Indigenous Student Entrance Academic Grant; and
- d. One Entrance Bursary granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition, and additional bursary funding up to the amount eligible; and
- e. Fall/Winter and Summer Work Program funding; and
- f. Any number of Financial Awards

An eligible in-course or graduating student may receive:
- a. Awards granted on the basis of academic merit, limited to either one award greater than or equal to $800 (considered a 'major' award) and one academic award less than $800 (considered a 'minor' award), or two academic awards less than $800; and
- b. Two awards granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition; and
- c. Academic Awards continued from a previous year to a maximum of one Entrance and one In-Course Renewable Award; and

One In-Course Bursary granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition, and additional bursary funding (including any renewable Entrance or In-Course Bursary continued from a previous year) up to the amount eligible; and
- i. Fall/Winter and Summer Work program funding; and
- j. Any number of Financial Awards

T4A tax slips are issued to students for all Aid and Award amounts received during the tax year.

It is important to note that Aid and Award income may affect federal and/or provincial student aid (e.g. full-time OSAP) entitlements. Students are advised to review the status of their government student aid applications often and refer to the appropriate government website for further information.

Review of Aid and Award Decisions
1. Decisions made by Aid and Award selection committees are final. Students may not appeal these decisions.
2. Students who believe an error occurred at the University, that may have impacted an Aid and/or Award decision, are asked to write to the Senior Associate Registrar, Student Financial Aid & Scholarships requesting a review of their file.
3. Students who have compelling personal circumstances that preclude them from receiving initial payment and/or renewal of Aid and/or Award funding may submit a petition for special consideration to request that an exception to the policy and/or regulations be made. Petitions should be submitted to the Senior Associate Registrar, Student Financial Aid & Scholarships and should include a cover letter explaining the need for special consideration, as well as any relevant documentation. Petitions must be submitted in a prompt and timely manner and will be accepted no later than one year after the decision being petitioned.

Privacy
1. The Freedom of Information and Protection of Privacy Act (FIPPA) and McMaster University’s Notice of Collection statement shall govern the information provided to donors and others concerning award recipients, including publications such as convocation programs and Award booklets. As such, the University is permitted to publish an individual’s name, Faculty, program, plan, level, and Award information. The University may publish the names of recipients of scholarships listed in the Undergraduate Calendar in the University’s convocation program and other Award publications.
2. With permission, the University may also release an Aid recipient’s first name, last name, Faculty, program, plan, level, Aid received and amount to the donor(s) of the Aid.
3. With permission, the University may also release an academic grant recipient’s first name, last name, email id, faculty, program, plan, level, Academic Grant received and amount to the Faculty for the purpose of Faculty award ceremony invitations and Award booklets.
4. From time to time, the Office of the Registrar, Student Financial Aid & Scholarships may reach out to Award recipients with requests for thank you letters, invitations to donor luncheons and events, invitations to discuss summer job opportunities or internships, interviews for McMaster University Advancement or Communications and Public Affairs, etc.
Responses to these requests and/or attendance at these functions is entirely voluntary. While a response is appreciated, acceptance or rejection of these offers in no way impacts Aid and Award eligibility.

5. Mandatory annual reporting to Undergraduate Council Awards Committee, Undergraduate Council, and Senate include the release of an Award recipient’s first name, last name, Faculty, program, plan, level, Award received and amount, submitted Travel Award reports, Aid and Award summary information and identification of participating University-wide Selection Committee members.

6. Students with concerns regarding Aid and Award privacy, are asked to write to the Senior Associate Registrar, Student Financial Aid & Scholarships.

11. In some cases, students may receive more than one Entrance Bursary (e.g. where a student meets a particular donor fund requirement or applies via a separate earned merit application process). In these cases, the bursary is awarded to the eligible student who demonstrates the greatest financial need as determined by the Office of the Registrar, Student Financial Aid & Scholarships.

12. Entrance Bursaries may specify a minimum admission average requirement and may consider one or more McMaster University calculated admission averages. An admission audition or portfolio score or equivalent may be included in the calculation of an average. Final grades for courses completed after June 30th in the year of admission application will not be considered in assessing eligibility for Entrance Bursaries.

13. Entrance Bursaries may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application.

14. In order to be considered for an Entrance Bursary by application, students must submit a completed application by the specified deadline date.

15. Entrance Bursary applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.

20. All Entrance Bursaries are disbursed September through the end of December.

Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.

22. Students who withdraw before November 1 may see an adjustment in the value of their Entrance Bursary or see the full amount returned to the University.

23. Any adjustment made to a student’s account, in order to return all or a portion of an Entrance Bursary to the University, will be calculated on the balance available at the time of the adjustment and will not put a student’s account into deficit.

25. The University may choose not to grant an Entrance Bursary in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for bursaries by application, where complete applications have not been received.

MICHAEL G. DEGROOTE SCHOOL OF MEDICINE AID REGULATIONS

Emergency Bursary Regulations for School Of Medicine (M.D) Students
1. An Emergency Bursary is a non-repayable grant sometimes available to students enrolled in the M.D. Program who find themselves in extreme circumstances or are experiencing unexpected financial hardship.
2. Students with emergency needs must meet with the designated representative from their M.D. Program Office to discuss their financial circumstances.
3. Students are required to complete a bursary application.
4. Students may be required to submit supporting documentation to confirm financial need and/or extreme circumstances, as determined by their M.D. Program Office.
5. The M.D. Program Office determines eligibility for emergency support.
6. All Emergency Bursary payments are disbursed through the McMaster Student Account.

M.D. Bursary Regulations
1. M.D. Bursaries are non-repayable grants, allocated on the basis of demonstrated financial need, which may also include a minimum expectation of academic achievement or other miscellaneous criteria.
2. M.D. Bursaries are available to students in good standing enrolled in the M.D. Program.
3. M.D. Bursaries are available to students who are Canadian Citizens, Permanent Residents, Convention Refugees or Protected Persons of Canada.
4. Students who are not Canadian Citizens, Permanent Residents, Convention Refugees or Protected Persons of Canada are not eligible for M.D. Bursaries.
5. M.D. Bursaries are allocated on the basis of highest financial need, as demonstrated through a completed Canadian federal and/or provincial government student aid application (e.g. full-time OSAP), completed standard University need profiles and/or discussions with designated staff on campus (e.g. the M.D. Program Office) who confirm the need for bursary assistance through submission of additional supporting documentation, for the academic year in which the student is being considered.
6. M.D. Bursaries are allocated in adherence with the Ministry Training, Colleges and Universities (MTCU) policies, procedures and guidelines in place for the given academic year. The MTCU Student Access Guarantee (SAG) currently specifies bursary amounts and payment deadlines for M.D. Program students. M.D. Program students who are eligible for SAG will receive bursary support without need of an application.
7. M.D. Program students may receive more than one M.D. Bursary up to the amount for which they are eligible.
8. The greater demonstrated financial need is used to break any tie.
9. M.D. Bursaries may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements.
10. In order to be considered for an M.D. Bursary that is a named donor bursary, students must submit a completed application by the specified deadline date.
11. All M.D. Bursary applications are evaluated for eligibility, and reviewed and ranked according to level of financial need. A selection committee may be struck depending on the bursary and donor requirements.
12. Students must be enrolled in the M.D. Program to have the M.D. Bursary payment processed.
13. If an M.D. Bursary is renewable, students must meet the renewal requirements specified in the bursary terms to receive a renewal payment.
14. All M.D. Bursary payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the M.D. Program Office.
15. All M.D. Bursaries are typically disbursed no later than the end of November.
16. Forfeiture of a renewable M.D. Bursary also cancels all future instalments of the bursary.
17. Change in course load may result in forfeiture or adjustment in the value of the M.D. Bursary. Students are advised to consult with their M.D. Program Office prior to making any changes to their course load.
18. Students who withdraw or take a leave of absence from the program may see an adjustment in the value of their M.D. Bursary or see the full amount returned to the University.
19. Any adjustment made to a student’s account, in order to return all or a portion of an M.D. Bursary to the University, will be calculated on the balance available at the time of the adjustment and will not put a student’s account into deficit.
20. The University may choose not to grant an M.D. Bursary in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for bursaries by application, where complete applications have not been received.
21. The University may remove specific M.D. Bursaries from the University Calendar, may revise the terms and stated value and/or suspend the granting of M.D. Bursaries (e.g. donor funds).
22. M.D. Bursaries supported by donor funds may have additional eligibility requirements.

Entrance Awards

**ENTRANCE AWARDS REGULATIONS**

Entrance Awards are monetary awards allocated on the basis of academic merit and, in some cases, other forms of earned merit.

1. Entrance Awards are available to students admitted full-time on the basis of high school admission requirements.
2. Entrance Awards are available to students entering Level I of their first baccalaureate degree program.
3. Students who have enrolled at any post-secondary institution after graduation from high school are not eligible for Entrance Awards unless:
   i. They are completing a certificate or diploma at McMaster University as a requirement of admission (e.g. the McMaster English Language Diploma), and/or
   ii. They have withdrawn from post-secondary studies before attending or before the deadline to drop and add courses in their first term of study.
4. Entrance Awards are available to students (including WUSC sponsored students) who are Canadian Citizens or Permanent Residents of Canada regardless of where they completed their high school education.
5. Canadian Citizens and Permanent Residents of Canada may receive a maximum of one Entrance Award granted solely on the basis of academic merit (e.g. a McMaster Honour Award) and one Entrance Award granted on the basis of an application or other earned merit.
6. Students who are not Canadian Citizens or Permanent Residents of Canada who complete their final year and graduate from a high school in Canada are eligible for Entrance Awards open to Canadian Citizens and Permanent Residents.
7. Students who are not Canadian Citizens or Permanent Residents of Canada who complete their final year and graduate from a high school outside of Canada are limited to one award from a limited number of International Student Entrance Awards. See International Student Entrance Awards section.
8. Entrance Awards first consider one or more McMaster University calculated admission and scholarship averages (e.g. final admission average).
9. Students must achieve a minimum 80% in the average(s) used to determine Entrance Award eligibility. An admission audition or portfolio score, or equivalent, may be included in the calculation of an average.
10. Averages for Entrance Awards are calculated using the course grades that form the basis for admission to the Level I program. Final grades for courses completed after June 30th in the year of admission application will not be considered in assessing eligibility for Entrance Awards.
11. Entrance Awards may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements, including, but not limited to, submitting an application, participating in an interview, performing an audition or developing a portfolio.
12. In order to be considered for an Entrance Award by application, students must submit a complete application by the specified deadline date.

13. Entrance Award applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
14. Students must enrol in the fall term to have an Entrance Award payment processed.
15. All Entrance Award payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
16. Entrance Awards are typically disbursed no later than the end of September.
17. Entrance Award recipients will have their awards noted on their University transcript.
18. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the award. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
19. Students who withdraw before November 1 will forfeit their Entrance Award.
20. Students who forfeit their Entrance Award will have their award cancelled and their transcript notation removed. Students must return the Entrance Award funding to their McMaster Student Account.
21. Some Entrance Awards are renewable (see In-Course Award and Renewals Regulations).
22. Students wishing to defer the benefits of an Entrance Award to the following academic year should apply to the Office of the Registrar, Admissions, for deferral of both admission and stated scholarship value. Approval of applications for deferral is not automatic, and deferrals are not normally granted for more than one academic year.
23. The University may choose not to grant an Entrance Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for awards by application, where complete applications have not been received.
24. The University may remove specific Entrance Awards from the University Calendar, may revise the terms and stated value, and/or suspend the granting of Entrance Awards (e.g. donor funds).

In-Course Academic Grants

In-Course and Renewal Academic Grant Regulations

1. In-Course Academic Grants are monetary awards allocated on the basis of academic merit, and in some cases other forms of earned merit, and demonstrated financial need.
2. In-Course Academic Grants are available to full-time and part-time students enrolled in their first baccalaureate degree program who are not in their graduating term.
3. In-Course Academic Grants requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter terms.
4. In-Course Academic Grants will require either a minimum Cumulative Grade Point Average of 8.0 calculated on at least 18 graded units or a Fall-Winter Average of 9.5 calculated on the basis of graded units in at least a full-time OSAP eligible course load per term in the prior academic year.
5. In-Course Academic Grants first consider available averages, units upon which averages are calculated, program level and enrolled units in the ranking of academic merit.
6. In-Course Academic Grants may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application, participating in an interview, performing an audition or developing a portfolio.
7. In order to be considered for an In-Course Academic Grant by application, students must submit a complete application by the specified deadline date.
8. In-Course Academic Grant applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
9. In-Course Academic Grants are allocated on the basis of an eligible course load and financial need as determined by a completed full-time OSAP application for the current academic year.
10. The greater calculated financial need is used to break any tie.
11. Some In-Course Academic Grants are renewable.
12. Entrance, Indigenous Student Entrance and In-Course Academic Grant renewals may be based on a minimum Cumulative Grade Point Average of 8.0, or a minimum Fall-Winter Average of 9.5 from the prior academic year based on their full-time OSAP eligible course load or equivalent. An OSAP application for the current year is not required to renew an Entrance or In-Course Academic Grant.
13. Students may receive a maximum of one In-Course Academic Grant or renewal of a prior year Entrance, Indigenous Student Entrance or In-Course Academic Grant.
14. Students must be enrolled in at least the full-time OSAP eligible course load or equivalent used to determine their eligibility to have an In-Course Academic Grant payment processed. Students must be enrolled in the fall term in a full-time OSAP eligible course load or equivalent to have the renewal of a prior year Entrance or In-Course Academic Grant payment processed.
15. All In-Course Academic Grants and Academic Grant renewal payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
16. In-Course Academic Grants are typically disbursed no later than the end of December. Academic Grant renewal payments are typically disbursed no later than the end of September.
17. In-Course Academic Grant recipients will have their awards noted on their University transcript. Academic Grant renewals are not noted on transcripts.
18. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the In-Course Academic Grant or Entrance or In-Course Academic Grant renewal. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
19. Students who withdraw before November 1 will forfeit their Academic Grant renewal.
20. Students who forfeit their Academic Grant will have their grant cancelled and their transcript notation removed if forfeited in first year of payment only. Students must return the Academic Grant funding to their McMaster Student Account.
21. Forfeiture of a renewable Academic Grant also cancels all future installments of the Academic Grant.
22. Students wishing to defer the benefits of an Academic Grant renewal to the next academic year should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships. Approval is not automatic and deferments are not normally granted for more than one academic year.
23. Students holding renewable Academic Grants who choose to accelerate their program and to complete their degree earlier than normal by completing Spring/Summer courses and who wish to employ the benefits of their renewable Academic Grant to defray the tuition and compulsory fees for those courses should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships.
24. The University may choose not to grant an In-Course Academic Grant in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for awards by application, where complete applications have not been received.
25. The University may remove specific In-Course Academic Grants from the University Calendar, may revise the terms and stated value and/or suspend the granting of In-Course Academic Grants (e.g. donor funds).
26. In-Course Academic Grants supported by donor funds may have additional eligibility and renewal requirements.

8. Indigenous Student Entrance Academic Grants requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter.

13. The greater calculated financial need is used to break any tie.

Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.

Approval is not automatic and deferments are not normally granted for more than one academic year.

27. The University may choose not to grant an In-Course Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools where complete applications have not been received.

2. In-Course Awards are available to full-time and part-time students enrolled in an undergraduate degree program (excluding the Physician Assistant and M.D. Programs), at the time of award application and selection, who are returning to McMaster to continue their studies.
3. In-Course Awards requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter terms.
4. In-Course Awards requiring part-time status are available to students who are not enrolled full-time in the fall and/or winter terms. In addition, true part-time awards are only available to students who have completed at least 50% of all units attempted at McMaster on a part-time basis.
5. In-Course Awards are available to all domestic and international students.
6. In-Course Awards are not available to second degree students unless the terms of a particular donor award specify eligibility and they have not received the award previously.
7. In-Course Awards are not available to students in their graduating term.
8. In-Course Awards may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements, including, but not limited to, submitting an application.
9. In-Course Awards requiring an application that are determined by Cumulative Grade Point Average require a minimum Cumulative Grade Point Average of 8.0 on at least 18 graded units, while those determined by Fall-Winter Average require a minimum Fall-Winter Average of 9.5 on at least 18 graded units.

11. Available averages, units upon which averages are calculated, program level, and enrolled units, may be used to break any ties in an award competition.
12. In order to be considered for an In-Course Award by application, students must submit a complete application by the specified deadline date.
13. In-Course Award applications which meet award eligibility criteria are forwarded to a selection committee for review and ranking.
14. Some In-Course Awards are renewable.
15. Entrance, Indigenous Entrance, and In-Course Award renewals determined by Cumulative Grade Point Average or Fall-Winter Average require a minimum 8.0 on at least 18 graded units.
16. All In-Course Award payments are disbursed through the McMaster Student Account and applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
17. In-Course Awards are typically disbursed no later than the end of September.
18. In-Course Awards will be disbursed if the recipient continues to be enrolled in a McMaster degree program, or a specific McMaster program, when explicitly required by the terms of the award, or the student’s record reflects they are on exchange, on letter of permission, or participating in a coop or internship opportunity at McMaster University.
19. In-Course Award recipients will have their awards noted on their University transcripts. Entrance and In-Course renewals are not noted on transcripts.
20. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture of an In-Course Award or Entrance or In-Course Award renewal. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
21. If a student is approved to graduate or transfers to graduate in the fall, after the awarding decision and/or disbursement is made, the student will forfeit the award.

25. Students wishing to defer the stated value of an In-Course Award or Entrance or In-Course Award renewal to the next academic year should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships. Approval is not automatic and deferments are not normally granted for more than one academic year.

27. The University may choose not to grant an In-Course Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools where complete applications have not been received.
28. The University may remove specific In-Course Awards from the University Calendar, may revise the terms and stated value and/or suspend the granting of In-Course Awards (e.g. donor funds).
