This course focuses on food and the complex field of networks, expectations, and choices that are contested, negotiated, and often unequal.

Seminar (three hours); one term

Prerequisite(s): Registration in Honours Anthropology or Level IV of any Honours program or permission of the instructor

Not open to students with credit in ANTHROP 4B03, if the topic was "Cultural Politics of Food and Eating."

ANTHROP 4D03 - PRACTICING ANTHROPOLOGY: ETHICS, THEORY, ENGAGEMENT

An examination of how anthropology is applied to solve human problems. Includes discussion of how students can use their anthropological training in non-academic occupations. Students may be involved in academic placements within the community.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level IV Honours Anthropology or permission of the instructor

ANTHROP 4DD3 - ANTHROPOLOGY OF ZOMBIES AND THE UNDEAD

This course explores ethnographic and popular culture narratives of zombies and the undead through the lens of nationalism, colonialism, race, gender and other phenomena.

Seminar (3 hours); 1 term.

Prerequisite(s): Anthropology major or minor or with permission of the Instructor.

Antirequisite(s): Students who have taken 4B03 or 4BB3 (Special Topic: Anthropology of Zombies and the Undead) cannot enroll in this class.

ANTHROP 4DN3 - DIET & NUTRITION: BIOCULTURAL AND BIOARCHAEOLOGICAL PERSPECTIVES

Study of diet and nutrition in past and contemporary populations using a biocultural approach. Focus on methods, interpretations of data and perspectives.

Lectures (three hours); one term

Prerequisite(s): ANTHROP 2AN3 or ANTHROP 2E03; registration in Level IV Honours Anthropology or permission of the instructor

Antirequisite(s): ANTHROP 4J03, if the topic was "Diet and Nutrition: Biocultural and Bioarchaeological Perspectives"

ANTHROP 4E03 - ADVANCED TOPICS IN ARCHAEOLOGY I

Study at an advanced level of selected topics in the sub-discipline. Topics may change from year to year.

Seminar (three hours); one term

Prerequisite(s): ANTHROP 2PA3 or permission of the instructor

ANTHROP 4EE3 - ADVANCED TOPICS IN ARCHAEOLOGY II

As per ANTHROP 4E03; but on a different topic.

Seminar (three hours); one term

Prerequisite(s): ANTHROP 2PA3 or permission of the instructor

ANTHROP 4F03 - CURRENT DEBATES IN ARCHAEOLOGY

A seminar in current topics and issues in archaeological theory.

Lectures and discussion (three hours); one term

Prerequisite(s): ANTHROP 2PA3 or permission of the instructor

ANTHROP 4G03 - INDEPENDENT RESEARCH I

Independent study of a research problem through published materials and/or fieldwork. Study may include museum internship, participation in faculty research, or student-initiated practica or library research. Students will be required to write up the results of their inquiry in scholarly form. It is incumbent upon the student to secure arrangements with the supervising instructor prior to registration in this course; otherwise, no grade will be submitted.

One term

Prerequisite(s): Registration in any program in Anthropology or permission of the instructor.

ANTHROP 4GG3 - INDEPENDENT RESEARCH II

As per ANTHROP 4G03, but on a different topic.

One term

Prerequisite(s): Registration in Level IV Honours Anthropology or permission of the instructor.

ANTHROP 4GS3 - GENETICS AND SOCIETY

The word 'DNA' has perfused almost all aspects of society and culture. This class will explore the uses and misuses of DNA in politics, consumerism, ethics, forensics and the film and arts community.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Anthropology; or permission of the instructor

ANTHROP 4H03 - HUMAN EVOLUTIONARY GENETICS

The use of population genetics for resolving the origins of modern humans.

Prerequisite(s): Registration in any Level IV Honours program and ANTHROP 2D03, or permission of the instructor.

Seminar (three hours); one term

ANTHROP 4HF3 - ARCHAEOLOGY OF HUNTER-FISHER-GATHERERS

Study of the prehistoric technologies and organizational strategies used in making a living from the natural environment and examination of the cultural contexts of foraging economies.

Seminar (three hours); one term

Prerequisite(s): ANTHROP 2PA3 or permission of the instructor

ANTHROP 4HH3 - ARCHAEOLOGIES OF SPACE AND PLACE

This seminar explores how archaeologists study space, place and landscape, drawing on theoretical frameworks and global case studies from the deep past and recent history.

Three hours (seminar); one term

Prerequisite(s): ANTHROP 2PA3 or permission of the Instructor.

ANTHROP 4J03 - ADVANCED TOPICS IN BIOLOGICAL ANTHROPOLOGY I

Topic: TBA

Study at an advanced level of selected topics within the subdiscipline. Topics may change from year to year.

Seminar (three hours); one term

Prerequisite(s): ANTHROP 2E03 or permission of the instructor

ANTHROP 4J03 may be repeated, if on a different topic, to a total of six units.

ANTHROP 4JJ3 - ADVANCED TOPICS IN BIOLOGICAL ANTHROPOLOGY II

Topic: TBA

Study at an advanced level of selected topics within the subdiscipline. Topics may change from year to year.

Three hours (seminar); one term

Prerequisite(s): ANTHROP 2E03 or permission of the instructor

ANTHROP 4JJ3 may be repeated, if on a different topic, to a total of six units.

ANTHROP 4KK3 - THE ARCHAEOLOGY OF NEANDERTHALS AND OTHER EARLY HUMANS

This seminar engages with the archaeology of our early ancestors, asking: what constitutes humanity, when did we become modern, and what became of the Neanderthals?

Three hour seminar; one term

Prerequisite(s): ANTHROP 2WA3 or permission of the Instructor.

ANTHROP 4R03 - ADVANCED BIOARCHAEOLOGY AND SKELETAL BIOLOGY

The analysis of human skeletal samples, including such topics as paleopathology, paleodemography, paleonutrition and biological distance analyses.

Lectures and discussion (three hours); one term

Prerequisite(s): ANTHROP 2FF3 or permission of the instructor

ANTHROP 4S03 - THE ANTHROPOLOGY OF INFECTIOUS DISEASE

The critical examination of the role of infectious diseases in the course of human history and contemporary society. Self-directed learning format.

Seminar (three hours); one term

Prerequisite(s): ANTHROP 2E03 and registration in Level IV Honours Anthropology; or permission of the instructor

ANTHROP 4W03 - EXPLORATIONS IN EXPERIMENTAL ANTHROPOLOGY

This course explores visual, narrative and other experimental approaches in anthropology.

Lectures (three hours); one term.

Prerequisite(s): ANTHROP 2F03, or permission of the instructor

ARABIC

ARABIC 2AA3 - INTRODUCTION TO MODERN STANDARD ARABIC

This course introduces students to the basics of the Arabic language. Students will learn the Arabic alphabet, pronunciation, verb forms, and basic grammar. No prior knowledge of Arabic is necessary.

Lectures and tutorials (four hours); one term

Cross-list(s): RELIGST 2AA3

ARABIC 2AR3 - INTRODUCTION TO MODERN STANDARD ARABIC II

This course builds on the fundamentals covered in RELIGST 2AA3/RELIGST 2AA3. The course expands students vocabulary, reading fluency, composition skills, and knowledge of grammatical constructions.

Lectures and tutorials (four hours); one term

Cross-list(s): RELIGST 2AR3

Prerequisite(s): RELIGST 2AA3

ARABIC 3GH3 - SPOKEN MOROCCAN ARABIC

Intensive training in spoken Moroccan Arabic through Latin transliteration and communicative method; no previous Arabic necessary. Students will learn to ask questions and understand responses, express facts and opinions, and engage in basic conversations in Moroccan Arabic.

Spring; one term

Prerequisite(s): Permission of the instructor

Co-requisite(s): ANTHROP 3GH3, HISTORY 3GH3, RELIGST 3GH3

Available as a study abroad experience in the Spring only. This course is intended for students who are entering Level III or above in the following Fall/Winter Session. Students interested in this course must contact Dr. E. Amster by February 15 for application instructions. There is an additional cost associated with this course.

ART

Courses in Studio Art are administered by the School of the Arts.

Togo Salmon Hall, Room 414, ext. 27671

<http://sota.humanities.mcmaster.ca/>

Notes

1. Please note that students enrolled in the Studio Art program must be committed to full-time study for the duration of the first two years of their degree. This program does not allow part-time enrolment.
2. Many **Art** courses are open **only** to students registered in a program in Studio Art. However, the following **Art** courses **are open** to students enrolled in **any** program:
 - ART 1TI3 - Making Art and Understanding Technology & Images
 - ART 1UI3 - Making Art and Understanding Images

- ART 2AT3 - Art Today
 - ART 2DP3 - Digital Practices
 - ART 2ER3 - Environmentally Responsible Art
 - ART 3FW3 - Field Work: On-Site Explorations
 - ART 3J03 - Concentrated Study - Collaborative Community Projects
3. Studio Art courses may involve field trips off campus.
 4. All students taking Studio Art Courses must wear CSA approved steel-toed footwear in the studio at all times.
 5. Students in Honours Studio Art must complete ART 2DG3, 2IS3, 2PG3, 2PM3, 2SC3 before registering in Level III or IV Art courses.
 6. Students in Honours Studio Art must complete ART 3GS6 A/B before registering in Level IV Art courses.
 7. Students wishing to obtain a Minor in Art History should note that six, and only six, of the Art History units required in the Honours Studio Art program may be counted toward the Minor of 24 units.

Courses

Students who wish to enroll in Level I Art courses must be registered in the Studio Art 1 program which leads into the Honours Studio Art program and a Bachelor of Fine Arts (BFA Honours) degree. The Honours Studio Art program is a limited enrolment program for which entrance requires the permission of the School of the Arts and a successful portfolio interview. The portfolio should contain a variety of works in different media that represent the applicant's creative abilities and interests. Aptitude in art, academic ability and demonstrated commitment to the discipline are considered in the selection process.

In exceptional circumstances, where distance does not allow for an interview, portfolios may be submitted in the form of electronic digital images or photographs. Portfolio interviews occur between January and April each year for entrance in September of the same calendar year. Only those students who call the Office of the School of the Arts (905-525- 9140, ext. 27671) before March 1st to book appointments for portfolio interviews will be guaranteed consideration for entrance into the Level I Art program. (Late applicants will only be interviewed if space availability permits).

ART 1DM3 - DIMENSIONAL MATERIAL INVESTIGATIONS AND CONCEPTS

This course facilitates development of tacit knowledge, intuitive judgment, perception and theoretical understanding through direct material engagement with metals, plaster, clay, forest products, and use of fabrication technologies. Four hours; one term

Prerequisite(s): Registration in Studio Art 1 program

Co-requisite(s): WHMIS 1A00 if not already completed; successful completion of WHMIS is required prior to studio work

ART 1MI3 - MATERIAL INVESTIGATIONS AND CONCEPTS

This course is designed to facilitate development of tacit knowledge, intuitive judgment, perception and theoretical understanding through experiential engagement with two-dimensional forms including drawing, painting, printmaking, photographic and/or digital image production. Four hours; one term

Prerequisite(s): Registration in Studio Art 1 program

Co-requisite(s): WHMIS 1A00 if not already completed; successful completion of WHMIS is required prior to studio work

ART 1OS3 - OBSERVATIONAL STUDIES

This course focuses on observation-based studio activities and development of critical perception to deepen understanding of visual information and phenomena related to art practice. Four hours; one term

Prerequisite(s): Registration in Studio Art 1 program

Co-requisite(s): WHMIS 1A00 if not already completed; successful completion of WHMIS is required prior to studio work.

ART 1SI3 - STUDIO INVESTIGATIONS

Working individually and in groups, students will be introduced to concepts, questions, research strategies and contexts related to art production. An integrated approach will combine dialogue, production and information gathering utilizing sketchbooks, digital technologies and University collections.

Four hours; one term

Prerequisite(s): Registration in Studio Art 1 program

Co-requisite(s): WHMIS 1A00 if not already completed; successful completion of WHMIS is required prior to studio work.

ART 1TI3 - MAKING ART AND UNDERSTANDING TECHNOLOGY & IMAGES

Creating art utilizing a range of media, including digital tools and creative research, students will gain an understanding of art, images and cultures of technology. No previous artistic experience is required.

Three hours; one term

Prerequisite(s): Registration in Level I or above of any program

Antirequisite(s): Enrolment in or completion of MMEDIA 2B06

Not open to students in the BFA program.

ART 1UI3 - MAKING ART AND UNDERSTANDING IMAGES

Utilizing sketchbooks, collage, colour exercises and creative research, students will gain widely applicable skills in manipulating and analyzing the communicative power of images. No previous artistic experience is required.

Three hours; one term

Prerequisite(s): Registration in Level I or above of any program

Not open to students in the BFA program.

ART 2AT3 - ART TODAY

This course will introduce students to contemporary Canadian and International artists working today across a broad range of disciplines. Through lectures, class discussions, readings and independent research projects, students will explore key themes and concepts that are currently addressed in contemporary art discourse.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

ART 2DG3 - CONTEMPORARY APPROACHES TO DRAWING

This course provides insight into the varied functions of drawing including expressive purpose, communication, information organization, idea synthesis and drawing as a form of thinking. A variety of media including graphite, charcoal, conte, wet media, collage, digital media, mixed media and hybrid approaches are included. Four hours; one term

Prerequisite(s): Registration in Level II Honours Studio Art program

ART 2DP3 - DIGITAL PRACTICES

Comprehensive introduction to digital image-making in the context of artistic and creative practice. Students will develop essential technical and conceptual skills in digital photography, video/film-making, and/or sound recording. Limited access to equipment will be available, but students are encouraged to provide their own digital SLR cameras with manual control capabilities, and a tripod. No previous background required.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): Enrollment in or completion of MMEDIA 2B06

ART 2ER3 - ENVIRONMENTALLY RESPONSIBLE ART

This course focuses on environmentally sustainable studio production with a comprehensive approach that promotes understanding of how materials are manufactured, why they are selected, how they are used and implications of disposal. A student-centered approach will determine media use and concepts.

Four hours; one term

Offered on a rotational basis

Prerequisite(s): Credit or registration in WHMIS 1A00 (successful completion of WHMIS is required prior to studio work) and registration in Level II or above of any program. Recommended for students pursuing a Minor in Sustainability.

ART 2IS3 - INDEPENDENT STUDIO METHODS

This course focuses on self-directed studio strategies responding to concepts and questions generated by the student. Students will integrate beliefs, values and individual experience with ongoing research to guide studio production.

Four hours; one term

Prerequisite(s): Registration in Level II Honours Studio Art program

ART 2PG3 - CONTEMPORARY APPROACHES TO PAINTING

This course develops pictorial thought processes through the vocabulary of painting. Balanced emphasis is placed on expanding conceptual and practical knowledge utilizing a variety of pigments, mediums, supports, tools, alternative and hybrid approaches.

Four hours; one term

Prerequisite(s): Registration in Level II Honours Studio Art program

ART 2PM3 - CONTEMPORARY APPROACHES TO PRINT MEDIA

This course develops techniques and aesthetic tactics of print media utilizing woodblock, linoleum, collagraph, image transfers and embossing.

Four hours; one term

Prerequisite(s): Registration in Level II Honours Studio Art program

ART 2SC3 - CONTEMPORARY APPROACHES TO SCULPTURE

This course develops spatial thought processes through the vocabulary of sculpture. Balanced emphasis is placed on expanding conceptual and practical knowledge through metal fabrication, woodworking, plaster and clay, assemblage, site-specific, time-based and hybrid practices.

Four hours; one term

Prerequisite(s): Registration in Level II Honours Studio Art program

ART 3BA3 - CONCENTRATED STUDY - BOOK ARTS

This course integrates traditional techniques with contemporary concepts and applications of the artist book. Hand-made, imported and found paper will be utilized in a variety of formats responding to student-centered concepts. Sustainable practices, collaboration and exchange will be promoted.

Four hours; one term

Prerequisite(s): Registration in Level III or IV Honours Studio Art (B.F.A.) program
Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 3CC3 - CONCENTRATED STUDY - CERAMICS

Focused on contemporary applications and concepts of 2D and 3D ceramics, this course fuses traditional techniques and alternative methods incorporating a range from hand building to new technologies. Concepts are student-centered.

Four hours; one term

Prerequisite(s): Registration in Level II, III or IV Honours Studio Art (B.F.A.) program
Students completing an Interdisciplinary Minor in Archaeology may be given special permission to register in this course if space is available.

Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 3CE3 - COMMUNITY EXHIBITIONS

This course offers students an opportunity to propose, plan and implement an exhibition in a community venue. All aspects of exhibiting including, selection, arrangement, installation, writing an exhibition text, photo documenting, promotion and writing reviews will be addressed. Students will work in groups according to connections related to their personal interests and work.

Four hours; one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Studio Art or Art History

ART 3CF3 - CONCENTRATED STUDY - FOUNDRY

This course offers an in-depth investigation of foundry practices and the application of metal casting processes focused on lost-wax in bronze and sand-casting in Aluminum. Concepts are student-centered.

Four hours; one term

Prerequisite(s): ART 2SC3 and registration in Level III or IV Honours Studio Art (B.F.A.) program

Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 3CI3 - CONCENTRATED STUDY - INTAGLIO

This course focuses on intaglio processes exploring traditional and alternative approaches including hand-drawn, found impression, Estisol transfers and photographic/digital image making and etching.

Four hours; one term

Prerequisite(s): Registration in Level II, III or IV Honours Studio Art (B.F.A.) program
Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 3CL3 - CONCENTRATED STUDY - LITHOGRAPHY

This course provides concentration on lithography processes without the use of Volatile Organic Compounds. It includes stone lithography using Estisol, Computer-to-Plate photolithography using a Xante Platemaker and other planographic methods involving hand-drawn, transferred and digital applications.

Four hours; one term

Prerequisite(s): Registration in Level II, III or IV Honours Studio Art (B.F.A.) program
Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 3D03 - PRACTICAL ISSUES

This course is designed to familiarize students with an extensive range of topics associated with creative careers and the professional infrastructure that supports them. Students will gain experience in situating their art into community contexts.

Three hours; one term

Prerequisite(s): Registration in Level III of Honours Studio Art program

ART 3FW3 - FIELD WORK: ON-SITE EXPLORATIONS

This course investigates the campus environment and its resources to promote the potential of place and local opportunities as they inform the production of site-based drawing and mixed-media work. This course may be offered as a concentrated week-long session (e.g. camping excursion). Extra cost will apply. One term. Consult the School of the Arts for details.

Prerequisite(s): Registration in Level II or above of any program and credit or registration in WHMIS 1A00

ART 3GS6 A/B - GUIDED STUDIO PRACTICE

Under the guidance of a team of studio faculty, students will produce a body of independently motivated work selectively building on the knowledge base of Levels I and II. Work will be presented and discussed at open critique sessions attended by faculty, students, alumni and invited guests.

Four hours; two terms

Prerequisite(s): ART 2IS3 and registration in Level III of Honours Studio Art (B.F.A.) program

Antirequisite(s): ART 3GS3 and 3TS3

ART 3ID3 - INTEGRATED DIMENSIONAL MEDIA CONCENTRATION

This course investigates points of intersection where installation, site-specific approaches, performance, time-based practice, kinetics and digital technologies interweave.

Four hours; one term

Prerequisite(s): Registration in Level III or IV Honours Studio Art (B.F.A.) program
Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 3IM3 - INTEGRATED MEDIA CONCENTRATION

Student-centered concepts will direct investigations where print, drawing and paint media interweave to create hybrid practices. Environmental compatible materials and processes will be promoted.

Four hours; one term

Prerequisite(s): Registration in Level III or IV Honours Studio Art program

Offered on a rotational basis. Consult the Master Timetable for offerings

ART 3IP3 - MEDIA INSTALLATION AND PERFORMANCE

Studio production course exploring interdisciplinary approaches to site-specific and site-responsive media installation and performance. Students will work individually and in groups to develop a series of projects that will focus on activation and creative/critical engagement with public spaces and architecture through sound, image and performative gestures. There will be a particular emphasis on sensitivity to the implications of site and public interaction with works of this kind, as well as interdisciplinary approaches which integrate material-based research and exploration with digital modes of creative production.

Four hours; one term

Prerequisite(s): Registration in Level III or IV of a Studio Art or Multimedia program; and credit or registration in WHMIS 1A00 (successful completion of WHMIS is required prior to studio work)

ART 3J03 - CONCENTRATED STUDY - COLLABORATIVE COMMUNITY PROJECTS

Utilizing team-based approaches that connect student learning with community, this course explores an interdisciplinary spectrum of collaborative activities. Student-centered interests and available local opportunities will direct projects.

Four hours; one term

Prerequisite(s): Registration in Level III or IV of any program; and credit or registration in WHMIS 1A00 (successful completion of WHMIS is required prior to studio work)

ART 3J03 may be repeated, if on a different topic, for a total of six units.

ART 3PB3 - PHOTOGRAPHY BEYOND THE FRAME

Studio production course exploring interdisciplinary/hybrid approaches to photographic practice beyond the presentation of standardized, two-dimensional printed images in the gallery/museum context. Students will develop a series of projects that will focus on re-thinking the potential of the photographic image, capitalizing on existing/emerging technical developments, and expanding on avenues of presentation/dissemination. There will be a particular emphasis on interdisciplinary approaches which integrate material-based exploration with digital modes of creative production.

Four hours; one term

Prerequisite(s): Credit or registration in WHMIS 1A00 and registration in Level III or IV of a Studio Art or Multimedia program

Offered on a rotational basis.

ART 3PD3 - NEW DIRECTIONS IN PAINTING/DRAWING

This course explores new directions and technologies that expand definitions of painting and drawing incorporating digital technologies, installations, urban interventions, sculptural approaches and alternative materials.

Four hours; one term

Prerequisite(s): ART 2PG3, ART 2DG3 and registration in Level III or IV Honours Studio Art (B.F.A.) program

Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 4AR3 - ADVANCED RESEARCH AND PRESENTATION STRATEGIES

This course refines and focuses research strategies relevant to the student's artistic direction. Problem-solving sessions focus on connecting exploration and presentation options to ideas. Attendance at Visiting Artist lectures is mandatory.

Four hours; one term

Prerequisite(s): ART ART 3D03; ART 3TS3 and ART 3GS3, or ART 3GS6 A/B; and registration in Level IV Honours Studio Art program.

ART 4AS6 A/B - ADVANCED STUDIO PRODUCTION AND CRITICAL DISCOURSE

This advanced course combines self-directed studio production with critical discourse, under the guidance of a team of studio faculty. Open critique sessions attended by faculty, students, alumni and community guests provide feedback. A written thesis is required connected to a cohesive body of work.

Four hours; two terms

Prerequisite(s): ART 3GS3 or ART 3GS6 A/B and registration in Level IV Honours Studio Art program

ART 4CA3 - 20TH CENTURY AND CONTEMPORARY ART PRACTICES: HOW ARTISTS THINK, ACT AND ENGAGE

The course will study the provocation of early to mid-20th century manifestos (e.g. the viral impact of futurisms in Europe, Eurasia and Japan; the post-colonial/cultural cannibalism of the Manifesto Anthropophagi and post-1960 Tropicalia; the Angry Penguins and Antipodean Manifesto; Refus Global). Will also study enactments and interrogative strategies in a post-1950 global view (e.g. from Mono-ha and Fluxus, to Aboriginality.)

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Studio Art or Art History

Cross-list(s): ARTHIST 4CA3

This course is administered by the Studio Art program.

ART 4CC3 - CONCENTRATED STUDY - CERAMICS

This course is an advanced study of contemporary applications and concepts of ceramics, which students will build on techniques and process taught in ART 3CC3. Students are required to work independently to fulfill a body or work that fuses traditional techniques and concepts in order to hone their skills in the area of ceramics.

Four hours; one term

Prerequisite(s): ART 2SC3 and ART 3CC3 and registration in Level III or IV Honours Studio Art (B.F.A.) program. Students completing an Interdisciplinary Minor in Archaeology may be given special permission to register in this course if space is available.

Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 4CI3 - CONCENTRATED STUDY - INTAGLIO

This course provides an in-depth concentration on intaglio processes exploring traditional and alternative approaches of etching, which students will build on techniques and process taught in ART 3CI3. Students are required to work independently to fulfill a body or work that fuses traditional/contemporary techniques and concepts in order to hone their skills in the area of etching.

Four hours; one term

Prerequisite(s): ART 2PM3, ART 3CI3 and registration in Level III or IV Honours Studio Art (B.F.A.) program

Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 4CL3 - CONCENTRATED STUDY - LITHOGRAPHY

This course provides in-depth concentration on lithography processes without the use of Volatile Organic Compounds, which students will build on techniques and process taught in ART 3CL3. Students are required to work independently to

fulfill a body or work that fuses traditional/contemporary techniques and concepts in order to hone their skills in the area of Lithography.

Four hours; one term

Prerequisite(s): ART 2PM3, ART 3CL3, and registration in Level III or IV Honours Studio Art (B.F.A.) program

Offered on a rotational basis. Consult the Master Timetable for offerings.

ART 4EP3 - EXHIBITION PREPARATION AND DOCUMENTATION

This advanced course provides hands-on experience in exhibition preparation including: catalogue and invitation design, development of advertising/publicity, fundraising strategies, and project documentation.

Four hours; one term

Prerequisite(s): ART 3TS3, ART 3GS3, or ART 3GS6 A/B and registration in Level IV Honours Studio Art program

ART 4PR3 - PROFESSIONAL RESIDENCY

Students may obtain credit for a self-initiated, professional residency resulting in a portfolio equivalent to 3 units. Residency applications must be approved by a Faculty Supervisor prior to submission. Final portfolio must be submitted to the Supervisor for presentation and assessment. Students are responsible for all associated expenses.

Prerequisite(s): Registration in Level III or IV Honours Studio Art (B.F.A.) program and departmental approval

ART HISTORY

Courses in Art History are administered by the School of the Arts.

Togo Salmon Hall, Room 414, ext. 27671

<http://sota.humanities.mcmaster.ca/>

ARTHIST 1A03 - WORLD ART AND CULTURAL HERITAGE I

A global perspective of art and architecture of the Americas, Africa, Middle East, Asia, and Europe within their historical and cultural context. Material extends from objects by itinerant First Peoples to the monumental buildings created by settled agrarian societies during the Middle Ages. Lectures and tutorials examine art produced in a range of media and address the designation and preservation of world Cultural Heritage sites.

Two lectures, one tutorial; one term

ARTHIST 1AA3 - WORLD ART AND CULTURAL HERITAGE II

A global perspective of art and architecture of the Americas, Africa, Middle East, Asia, and Europe within their historical and cultural context. Material includes Italian Renaissance frescoes, Japanese Zen Buddhist gardens and Contemporary Art. The course examines a range of cultural practices and artistic media, and addresses current issues for world Cultural Heritage sites.

Two lectures, one tutorial; one term

ARTHIST 2A03 - VISUAL LITERACY

A course of lectures and discussions that explores the concept of visual literacy and examines the ways in which fine and popular arts structure our understanding through images.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 2I03

Offered on a rotational basis.

ARTHIST 2AA3 - INTRODUCTION TO THE PRACTICE OF ART THERAPY

An introduction to the practice of art therapy, with an overview of its history, the diversity of its applications within psychodynamic, solution focused, cognitive

behavioural principles, embodiment theory, and its clinical implications including neuroscience, mindfulness, Post-traumatic Stress Disorder, and pain management.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

ARTHIST 2B03 - GREEK ART

The architecture, sculpture and painting of the Greek and Hellenistic worlds.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Cross-list(s): CLASSICS 2B03

This course is administered by the Department of Classics.

ARTHIST 2C03 - ROMAN ART

The architecture, sculpture and painting of the Roman world.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Cross-list(s): CLASSICS 2C03

This course is administered by the Department of Classics.

ARTHIST 2DF3 - ART AND REVOLUTIONS IN FRANCE, 1789-1914

This course examines the intersections of visual culture and the political revolutions of 1789, 1830, 1848 and 1870, as well as stylistic innovations in art including Romanticism, Realism, Impressionism, Pointillism, Fauvism, and Cubism.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): HISTORY 2DF3

This course is administered by the Department of History.

ARTHIST 2FA3 - FILM ANALYSIS

An introduction to an interrelated set of approaches to film study, all of which are defined by their attention to the filmic text and which provide students with a grasp of the fundamentals of film analysis.

Two lectures, plus one weekly film screening; one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): THTRFLM 2FA3

This course is administered by the Theatre & Film Studies (B.A.) program.

ARTHIST 2H03 - AESTHETICS

An introduction to some main theories of the nature of art, criticism and the place of art in life and society.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 2003

Cross-list(s): PHILOS 2H03

This course is administered by the Department of Philosophy.

Offered in alternate years.

ARTHIST 2I03 - RENAISSANCE ART

An introduction to the history of European art in the period 1400 to 1580.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Offered on a rotational basis.

ARTHIST 2J03 - ARCHITECTURE FROM THE PRE-ROMANESQUE TO PALLADIO

The course will survey European architecture from the Early Middle Ages to the High Renaissance. It will analyze references to Greco-Roman technical and stylistic traditions manifested in varying degrees during different periods, including the innovative adaptation of ancient forms and its iconological significance in the 'Carolingian Renaissance', the Romanesque, and the Renaissance, culminating in the work of Andrea Palladio (16th century.)

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Offered on a rotational basis.

ARTHIST 2R03 - THE HISTORY OF FASHION AND IDENTITY

This course will study selected aspects of the history of fashion and identity throughout the ages and across cultures. The course will examine issues related to changes in dress and their representation as well as the construction of identities in the broader social, political and economic context.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Offered on a rotational basis.

ARTHIST 2S03 - THE HISTORY OF PRINTING AND PRINTMAKING

This course will study the history of printing and printmaking throughout the ages and across cultures. Themes include related techniques and technologies, such as paper-making; impact on the transmission of knowledge and artistic practices.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Offered on a rotational basis.

ARTHIST 2T03 - ART, THEATRE AND MUSIC IN THE ENLIGHTENMENT

This course will examine the intersection of the arts in the period 1600 to 1800 by studying the major artists and patrons as well as the cultural and social environments in which they worked. The issues treated in this course will provide students with a panoramic understanding of the dynamic and creative cultures in which artists, composers and architects competed and collaborated.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Offered on a rotational basis.

ARTHIST 2Y03 - EARLY ISLAMIC ART TO THE MIDDLE AGES

This course will explore the formation of an architectural and artistic vocabulary for the new religion of Islam, including prior traditions (Sasanian, Late Roman, Byzantine) in the regions of Early Islam. It will also analyze the establishment of new canons and styles in different areas of the Islamic world and their development and interactions from the Near and Middle East over the North of Africa to the Iberian Peninsula and Sicily until the 15th century.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Offered on a rotational basis.

ARTHIST 2Z03 - ART AND VISUAL CULTURE IN EAST AND SOUTH ASIA

An introduction to the history of the arts in China, Korea and Japan from antiquity to modern times, highlighting the impact of cultural exchange and diversity.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Offered on a rotational basis.

ARTHIST 3AB3 - APPLIED ART HISTORY: EXPERIENTIAL LEARNING WITH PLACEMENT AS AN INTERN

This course offers a student the opportunity of learning to research or catalogue art works in either a private or public collection, or other aspects of curatorial research, collection management, exhibition design or art education. The student-initiated internship could take place at arts institutions such as: museums, galleries, heritage sites, historical societies, and other such possibilities reviewed and approved by program faculty.

Prerequisite(s): Registration in Level III or IV of an Honours Art History Program
Departmental permission required.

ARTHIST 3B03 - ASPECTS OF CANADIAN ART

A survey of the visual arts in Canada from the earliest explorations and settlements to the present.

Three lectures; three hours; one term

Prerequisite(s): Registration in Level III or IV of any program

Offered on a rotational basis.

ARTHIST 3BB3 - INDIGENOUS ART AND VISUAL CULTURE IN CANADA, 1960 TO THE PRESENT

A survey of the visual art production from Indigenous Canadian communities since c. 1960 including: painting, sculpture, installation, film/video, performance and hip hop. The course focuses on First Nations' and Métis' artistic practices and examines how those are framed in the context of museums in the 21st century.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in Art History, Art or Indigenous Studies, or permission of the instructor

Cross-list(s): INDIGST 3F03

Offered on a rotational basis.

ARTHIST 3D03 - SEVENTEENTH-CENTURY ART

An examination of art and architecture produced in the seventeenth century and global variations of Baroque Art.

Three lectures; one term.

Prerequisite(s): Registration in Level II or above; prior completion of ARTHIST 2I03 is recommended

Offered on a rotational basis.

ARTHIST 3DF3 - ART AND POLITICS IN SECOND EMPIRE FRANCE

This course examines the intersections of politics and visual culture in France 1852-1870 and critical issues related to photography, painting, sculpture, printmaking, architecture and the Universal Expositions of 1855 and 1867.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): ARTHIST 3J03

Cross-list(s): HISTORY 3DF3

This course is administered by the Department of History.

ARTHIST 3FL3 - EARLY CINEMA HISTORY

An introduction to the history of narrative film from its beginnings to the Second World War. It focuses on narrative cinema's development from aesthetic, social, technological and economic perspectives while also touching on a selected number of issues in film theory.

Two lectures, plus one weekly film screening; one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): THTRFLM 3FF3

Antirequisite(s): ARTHIST 2FL3, THTRFLM 2FF3

ARTHIST 3H03 - ARCHAIC GREEK ART

The formative period of Greek Art from its rebirth after the Dark Ages to the Persian Wars (c. 1000-480 B.C.) and its relationship to the art of the Near East.

Three lectures; one term

Prerequisite(s): ARTHIST 2B03

Cross-list(s): CLASSICS 3H03

This course is administered by the Department of Classics.

ARTHIST 3I03 - ITALIAN PAINTING AND SCULPTURE 1400-1580

An advanced level lecture course dealing with selected artists and works from the Early Renaissance to Mannerism.

Three lectures; one term

Prerequisite(s): Registration in Level II or above; prior completion of ARTHIST 2I03 is recommended

Offered on a rotational basis.

ARTHIST 3JA3 - THE HISTORY OF ART 1970 TO THE PRESENT

An examination of global issues in art and visual culture from 1970 to the Present, applying a range of theoretical approaches including: modernism, postmodernism, post-structuralism, gender, post-colonial and queer theories.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): ARTHIST 3AA3, HISTORY 3JA3

Offered on a rotational basis.

ARTHIST 3P03 - ISSUES IN STUDIO CRITICISM

A course that allows non-Art students to explore current studio practice and to investigate approaches to the evaluation of quality in contemporary art. Students taking this course are required to attend a preset number of Studio Critiques and Visiting Artists' Talks.*

Seminar (two hours); one term

Prerequisite(s): Registration in Level II or above; and at least 12 units of Art History
**Studio Art Critiques are regularly scheduled sessions during which the work of Art students is discussed by their peers, faculty members and visiting professionals from the art world. Visiting Artists' talks are held on weekday evenings on the same day as the Studio Critiques.*

Offered on a rotational basis.

ARTHIST 3Q03 - COLOURS OF THE WORLD

The traditional ways of extracting colour from plants, minerals, and animals and the ways for using colour that range from 1) making art, 2) ornamenting food, clothing, housing and transportation, and 3) symbolic/ritual purposes and visual communication (for example, sexuality, theatre, and warfare) in different cultures in early times.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): HISTORY 3QA3

Offered on a rotational basis.

ARTHIST 3Q03 - GREEK SANCTUARIES

Ancient Greek sanctuaries and their social and political context. Topics will include architecture and art, as well as activities such as sacrifice, athletic games healing and oracular consultation.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Cross-list(s): CLASSICS 3Q03

Alternates with ARTHIST 3SS3 (CLASSICS 3S03).

This course is administered by the Department of Classics.

ARTHIST 3SS3 - POMPEII, HERCULANEUM, AND OSTIA

The archaeology of three cities in Italy (Pompeii, Herculaneum, Ostia) will be examined, with a focus on urbanism, public space, and domestic architecture and decoration.

Three lectures; one term

Prerequisite(s): One of CLASSICS 1A03, 2LC3, 2LD3 or ARTHIST 2B03 or 2C03, and registration in Level II or above of any program

Cross-list(s): CLASSICS 3S03

Alternates with ARTHIST 3Q03 (CLASSICS 3Q03).

This course is administered by the Department of Classics

ARTHIST 3XX3 - CINEMA HISTORY FROM WWII

An exploration of narrative film from 1941 to the present day, incorporating a study of a variety of narrative cinema styles. Theoretical issues will include questions of cinema's relationships to other art forms, narrative, genre and authorship.

Two lectures, plus one weekly film screening; one term

Prerequisite(s): One of ARTHIST 2FL3, ARTHIST 3FL3, THTRFLM 2FF3 or THTRFLM 3FF3 is recommended

Antirequisite(s): CMST 3XX3

Cross-list(s): THTRFLM 3L03

This course is administered by Theatre & Film.

ARTHIST 3Z03 - THE SILK ROAD IN THE FIRST MILLENNIUM

An examination of how recent archaeological finds are changing our understanding of the pluralistic achievements in the arts accomplished by peoples of different cultures along the Silk Road and beyond in the first millennium.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): HISTORY 3ZA3

Offered on a rotational basis.

ARTHIST 4AA3 - SEMINAR IN CONTEMPORARY ART AND VISUAL CULTURE

An in-depth examination of one or more significant movements in contemporary art, theory and criticism from c. 1970 to the present.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Art or Art History; prior completion of ARTHIST 3JA3 is recommended

ARTHIST 4AA3 may be repeated, if on a different topic, to a total of six units.

Offered on a rotational basis.

ARTHIST 4BB3 - SEMINAR IN ANCIENT ART

Consult the School of the Arts concerning the topic to be offered.

Seminar (two hours); one term

Prerequisite(s): Nine units of ARTHIST including six units from ARTHIST 2B03, 2C03, 3Q03, 3H03, 3SS3 or registration in Level III or IV of an Honours program in Art History

Cross-list(s): CLASSICS 4BB3

ARTHIST 4BB3 may be repeated, if on a different topic, to a total of six units.

This course is administered by the Department of Classics.

ARTHIST 4C03 - SEMINAR IN ART AND VISUAL CULTURE 900-1400

A focused study of issues concerning art and visual culture of the tenth through fourteenth centuries. Consult the School of the Arts concerning the topic to be offered.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Art or Art History; prior completion of one of ARTHIST 3I03, 3S03 or 3Z03 is recommended

ARTHIST 4C03 may be repeated, if on a different topic, to a total of six units.

Offered on a rotational basis.

ARTHIST 4CA3 - 20TH CENTURY AND CONTEMPORARY ART PRACTICES: HOW ARTISTS THINK, ACT AND ENGAGE

The course will study the provocation of early to mid-20th century manifestos (e.g. the viral impact of futurisms in Europe, Eurasia and Japan; the post-colonial/cultural cannibalism of the Manifesto Anthropophagi and post-1960 Tropicalia; the Angry Penguins and Antipodean Manifesto; Refus Global.) Will also study enactments and interrogative strategies in a post-1950 global view (e.g. from Mono-ha and Fluxus, to Aboriginality.)

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Studio Art or Art History

Cross-list(s): ART 4CA3

This course is administered by the Studio Art program.

ARTHIST 4E03 - SEMINAR IN ART AND VISUAL CULTURE 1400 - 1750

A focused study of issues concerning art and visual culture of the 14th through 18th centuries. Consult the School of the Arts concerning the topic to be offered.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Art or Art History; prior completion of one of ARTHIST 3D03, ARTHIST 3I03 or ARTHIST 3S03 is recommended

ARTHIST 4E03 may be repeated, if on a different topic, to a total of six units.

Offered on a rotational basis.

ARTHIST 4H03 - SEMINAR IN ART AND VISUAL CULTURE 1750 TO THE PRESENT

A focused study of issues concerning art and visual culture of the 18th through 20th centuries. Consult the School of the Arts concerning the topic to be offered.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Art or Art History; prior completion of one of ARTHIST 3DF3 or 3JA3 is recommended

ARTHIST 4H03 may be repeated, if on a different topic, to a total of six units.

Offered on a rotational basis.

ARTHIST 4LP3 - THE CULTURAL HISTORY OF PARIS, 1789-1914

Topics to be examined include: developments in architecture and city planning; the conservation of historic buildings and monuments; cultural institutions such as museums and art exhibitions; and the impact of gender, race and economics on experiences and concepts of identity in France's capital.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of any Honours program in Art or Art History

Cross-list(s): HISTORY 4LP3

Departmental permission required. This course is administered by the Department of History and students should apply using seminar ballots that will be available from the History Department following Reading Week.

ARTHIST 4O06 A/B - THESIS

Supervised study of a problem in the history of art of special interest to the student.

Tutorials; two terms

Prerequisite(s): Registration in Level IV of any Honours program in Art History; and a grade of at least A- in a previous course in the chosen field; and permission of the School of the Arts

ARTHIST 4U03 - THE SEVERE STYLE IN GREEK ART

This course examines the birth of the Classical Greek style and its earliest manifestation, the Severe style. Sculpture, vase painting and architectural examples will be considered and placed in their appropriate political and cultural contexts.

Seminar (two hours); one term

Prerequisite(s): Nine units of ARTHIST, including ARTHIST 2B03, or registration in Level III or above of an Honours program in Art History

Cross-list(s): CLASSICS 4U03

This course is administered by the Department of Classics.

ARTHIST 4V03 - THE STUDY, CRITICISM AND EVALUATION OF ART

A seminar to introduce students to the history, theory and practice of connoisseurship. Its focus will be to develop skills in confronting the single work of art.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of a program in Art or Art History, Communication Studies or Multimedia

Offered on a rotational basis.

ARTHIST 4X03 - INTRODUCTION TO ART GALLERIES AND MUSEUMS

A study of the history and methods of institutions created for the purpose of collecting, preserving, displaying and interpreting art objects.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of a program in Art or Art History

Offered on a rotational basis.

ARTS & SCIENCE

Courses in Arts & Science are administered by the Arts & Science Program.

L.R. Wilson Hall, Room 3038, ext. 24655, 23153

<http://artsci.mcmaster.ca>

Notes

1. Prerequisites: The prerequisite for all Level I, II, III and IV Arts & Science courses is registration in the Arts & Science Program.
2. Limited Enrolment: Enrolment in Level I of the Arts & Science Program is limited to approximately 70 students.

ARTSSCI 1A06 A/B - PRACTICES OF KNOWLEDGE

An examination of significant themes in intellectual history through a reading of major works in philosophy and literature that shed light on the conceptual foundations of contemporary life.

Three hours; two terms

Prerequisite(s): Registration in Level I of the Arts & Science Program

ARTSSCI 1B03 - WRITING

This course aims to develop students' ability to use language in written communication, with a focus on academic writing in particular. Students will develop their writing skills through assignments and activities that ask them to produce, analyze and reflect on written work in a range of genres.

Three hours; one term

Prerequisite(s): Registration in Level I of the Arts & Science Program

ARTSSCI 1BB3 - ARGUMENTATION

This course provides students with some of the conceptual tools needed to recognize, understand, evaluate, formulate, and attack arguments. Students will have the opportunity to develop such skills in their oral and written work.

Three hours; one term

Prerequisite(s): Registration in Level I of the Arts & Science Program

ARTSSCI 1C03 - INQUIRY: GLOBAL CHALLENGES

This inquiry course, designed to develop skills basic to the systematic, evidence-based investigation of public issues, focuses on issues relevant to global development.

Three hours; one term

Prerequisite(s): Registration in Level I of the Arts & Science Program

ARTSSCI 1CC3 - CONTEMPORARY INDIGENOUS STUDIES

This course will explore the relationship between Indigenous peoples and mainstream society in the 20th century with regard to governmental policy, land claims, economic development, and self-determination.

Three hours; one term

Prerequisite(s): ARTSSCI 1C03

Cross-list(s): INDIGST 1AA3

ARTSSCI 1D06 A/B - CALCULUS

This course aims to provide a thorough understanding of the principles and major applications of differential and integral calculus of functions of one variable, as well as an introduction to multivariate calculus and differential equations.

Lectures (three hours), tutorial (one hour), lab (one hour); two terms

Prerequisite(s): Registration in Level I of the Arts & Science Program

Antirequisite(s): MATH 1A03, 1AA3, 1LS3, MATH 1LT3, 1X03, 1XX3, 1ZA3, 1ZB3
ARTSSCI 1D06 A/B serves as a prerequisite for all courses for which MATH 1AA3 (or equivalent) is a prerequisite.

ARTSSCI 2A06 A/B - SOCIAL AND POLITICAL THOUGHT

Development of political, moral and religious thought in the writings of such major figures as Hobbes, Locke, Rousseau, Adam Smith, Burke, Marx, Mill, Weber, von Hayek, Nietzsche, Freud and Arendt.

Three hours; two terms

Prerequisite(s): Registration in Level II of the Arts & Science Program

ARTSSCI 2D06 A/B - PHYSICS

This course explores many of the great concepts of physics in a quantitative way. Beginning with Newtonian mechanics, it moves into Einstein's relativity, wave phenomena, atomic physics, quantum mechanics and cosmology. Selected laboratory projects will be carried out.

Lecture (three hours), tutorial (one hour); two terms

Prerequisite(s): Registration in Level II of the Arts & Science Program

ARTSSCI 2E03 - ECONOMICS: PRINCIPLES AND POLICY

An introduction to the core principles of economics with the objective of helping students to apply economic reasoning to issues that are central to modern societies, such as: the role of government in a market-oriented setting; equity and efficiency; growth and the environment; and fiscal and monetary stability.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): Registration in Level II of the Arts & Science Program

Antirequisite(s): Not open to students who have completed both ECON 1B03 and ECON 1BB3.

ARTSSCI 2R03 - APPLIED STATISTICAL INFERENCE

Inferential statistics, with an emphasis on applications. Topics include data description, graphical methods, probability, confidence intervals, hypothesis testing, one-way ANOVA, analysis of categorical data, regression and correlation. Use of a statistics software package.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): Registration in Level II of the Arts & Science Program

Antirequisite(s): STATS 2B03, STATS 2MB3

ARTSSCI 3A06 A/B - LITERATURE

Literary works drawn from a variety of genres, cultures and historical periods will be examined with a focus on how great writers have treated enduring ethical concerns. It aims to show how literature is an indispensable means of thinking about human life and society.

Three hours; two terms

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ARTSSCI 3B03 - TECHNOLOGY AND SOCIETY I

The Culture of Technology. Technological practices and approaches are studied as cultural activities in the contexts of beliefs, philosophies, values and social structures both past and present.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ARTSSCI 3BB3 - TECHNOLOGY AND SOCIETY II

The Social Control of Technology. The dominant mechanisms of the social control of technology will be studied, with attention to the role of ethics.

Three hours; one term.

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ARTSSCI 3BC3 - TECHNOLOGY AND SOCIETY III

This course explores the current explosion of publically available data and the manipulation of this data as both a positive and a negative societal development. Our focus of inquiry will be on the use of spatial data and cartography as a tool to inform society through the visualization of complex data.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program.

ARTSSCI 3CL3 - THEATRE, SELF, AND SOCIAL DEVELOPMENT

Theatre skills are life skills. Class exercises, creative work, and online discussions will allow students to explore the practice and ethics of Applied Drama and to learn how theatre can be used as a tool for social development and change.

Three hours; one term

Prerequisite(s): Registration in Level II or above of the Arts & Science Program

ARTSSCI 3CU3 - ALUMNI EXPERIENCE INQUIRY

Using an inquiry methodology, students will explore the practical applications of an interdisciplinary degree through interaction with, and mentorship from, graduates of the Arts & Science Program. Emphasis will be on problem-based learning, with the professional experiences of alumni informing the exploration of complex and multifaceted issues.

Three hours; one term

Prerequisite(s): Registration in Level II or above of the Arts & Science Program

ARTSSCI 3EH3 - EXPLORING HAMILTON INQUIRY

This course encourages students to ask questions and explore topics focused on the City of Hamilton, Ontario. Through the exploration of Hamilton from a number of disciplinary perspectives, including cultural, economic, and geological, students will have an opportunity to gain insight into the city that McMaster University calls home. This course will include excursions during class time and may require small fees for travel.

Three hours; one term

Prerequisite(s): Registration in Level II or above of the Arts & Science Program.

ARTSSCI 3F03 - EXPERIENTIAL PROJECT IN TEACHING AND LEARNING

This course allows students to explore in depth an issue related to teaching and learning in higher education under the supervision of faculty/staff affiliated with the Paul R. MacPherson Institute for Leadership, Innovation and Excellence in Teaching (MacPherson Institute). Students may propose research questions of their own or contribute to the development of existing initiatives within the Institute. Proposal form and deadlines are available on the Arts & Science Program website <https://artsci.mcmaster.ca>.

One term

Prerequisite(s): Registration in Level II or above of the Arts & Science Program and permission of the Arts & Science Program.

ARTSSCI 3GJ3 - GLOBAL JUSTICE INQUIRY

Using an inquiry methodology, students will explore issues pertaining to global justice through an interdisciplinary lens.

Three hours; one term

Prerequisite(s): Registration in Level III or above

ARTSSCI 3L03 - THE INDIAN RELIGIOUS TRADITION

Readings of Indian texts in translation will centre around themes such as the nature of human nature, free will and determinism; renunciation and social action; violence and non-violence; altruism and selfishness.

Lecture (two hours), tutorial (one hour); one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

Cross-list(s): RELIGST 3L03

This course is administered by the Department of Religious Studies.

ARTSSCI 3S03 - THE EAST ASIAN RELIGIOUS TRADITION

Readings of East Asian texts in translation will centre around themes such as culture vs. nature, virtue vs. power, social responsibility vs. personal cultivation, bookish learning vs. meditation.

Lecture (two hours), tutorial (one hour); one term

Prerequisite(s): Registration in Level III and above of the Arts & Science Program

Cross-list(s): RELIGST 3S03

This course is administered by the Department of Religious Studies.

ARTSSCI 3TR3 - TREES INQUIRY

Inspired by the trees on McMaster's campus, this course examines trees and their significance through a number of different lenses and from a variety of discipline perspectives: biology; colonial and economic histories; visual, material, and performing arts practices; psychology; indigenous and environmental studies; poetry and prose.

Three hours; one term

Prerequisite(s): Registration in Level II or above of the Arts & Science Program.

ARTSSCI 3X03 - INDIVIDUAL STUDY

This course consists of study under the supervision of a McMaster faculty member. Proposal form and deadlines are available on the Arts & Science Program website <https://artsci.mcmaster.ca>.

One term

Prerequisite(s): Registration in Level III and above of the Arts & Science Program and permission of the Arts & Science Program

ARTSSCI 4A06 A/B - INDIVIDUAL STUDY

This course consists of study under the supervision of a McMaster faculty member. Proposal form and deadlines are available on the Arts & Science Program website <https://artsci.mcmaster.ca>.

Two terms

Prerequisite(s): Registration in Level IV of the Arts & Science Program and permission of the Arts & Science Program

ARTSSCI 4A09 A/B - INDIVIDUAL STUDY

The same as ARTSSCI 4A06 A/B S but based on more extensive study. Proposal form and deadlines are available on the Arts & Science Program website <https://artsci.mcmaster.ca>.

Two terms

Prerequisite(s): Registration in Level IV of the Arts & Science Program and permission of the Arts & Science Program

ARTSSCI 4BP3 - BODIES AND BODIES POLITIC: FROM PUBLIC HEALTH TO GLOBAL HEALTH

This course explores the politics of health through the body, from public health to colonialism to transnational global health. The rights to health care originated at the national level, in political systems. We consider global health in historical perspective and what happens when pharmaceuticals and RCTs travel, with examples from North Africa, the Philippines, India, Doctors Without Borders, and the Middle East.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the BHSc (Hons) Program or Specializations or the Arts & Science Program; or registration in Level III or above of any Honours program and permission of the instructor

Cross-List(s): HTHSCI 4BP3

This course is administered by the BHSc (Hons) Program.

ARTSSCI 4C06 A/B - THESIS

This course consists of original research under the supervision of a McMaster faculty member. Proposal form and deadlines are available on the Arts & Science Program website <https://artsci.mcmaster.ca>.

Two terms

Prerequisite(s): Registration in Level IV of the Arts & Science Program and permission of the Arts & Science Program

ARTSSCI 4C09 A/B - THESIS

The same as ARTSSCI 4C06 A/B but based on more extensive research. Proposal form and deadlines are available on the Arts & Science Program website <https://artsci.mcmaster.ca>.

Two terms

Prerequisite(s): Registration in Level IV of the Arts & Science Program and permission of the Arts & Science Program

ARTSSCI 4CA3 - LEGAL INQUIRY

The course aims to equip students with basic skills and knowledge to demystify 'law' and empower them to conduct a critical legal inquiry into an area of social relevance.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program.

ARTSSCI 4CB3 - EDUCATION INQUIRY

Students will have the opportunity in this course to use an inquiry-based approach to focus on social, cultural, political, and economic issues that influence and are influenced by education.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ARTSSCI 4CD3 - RESEARCH AND CREATIVE WRITING

The course exposes students to creative writing that is grounded in research. It also invites students to explore ways in which research findings might be disseminated through creative expression.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program.

ARTSSCI 4CF3 - HOW SCIENCE SPEAKS TO POWER

A case study approach is used to examine how science is shaped by politics and how science advice is filtered by political processes. Possible case studies include Mad Cow disease, the ozone hole, and genetically modified foods.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science or Integrated Science Program.

ARTSSCI 4CI3 - DIVERSITY AND HUMAN RIGHTS INQUIRY

This course explores issues of diversity and the role of human rights protection regimes in both Canadian and international contexts.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ARTSSCI 4CP3 - MEDIA INQUIRY

This course consists of four sections dealing with theoretical and analytical perspectives, political economy of the media, news media, and entertainment media and their cultural effects.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ARTSSCI 4CT3 - MEDICAL HUMANITIES INQUIRY

This course exposes students to the rapidly developing international field known as medical humanities. It explores the interconnections between health, medicine, the arts, and the humanities, with a particular focus on issues of medical ethics and narrative in medicine.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ARTSSCI 4EP3 - ENVIRONMENTAL POLICY INQUIRY

This course provides a critical analysis of the relationship between public policy-making and environmental issues. Students will engage in critical discussion of a range of literature that has direct bearing on explaining how environmental issues, scientific evidence, and the policy process converge. The course also includes a current policy case study designed to help students gain further insight into how course themes and concepts unfold in reality.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program and replaces ARTSSCI 4CM3 Environmental Education Inquiry.

ARTSSCI 4HS3 - HISTORY OF SCIENCE INQUIRY

An exploration of theoretical questions and case studies from the history and sociology of science. Students will undertake inquiry projects on selected topics and present their work to the class.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ARTSSCI 4MN1 - LOCAL EXPLORATIONS

An experiential learning course, which offers students the opportunity to explore issues of local significance and global relevance. Students may pursue independent study options or, when available, participate in assorted modules. Details are available on the Arts & Science Program website <https://artsci.mcmaster.ca>.

One term

Prerequisite(s): Registration in Level II or above of the Arts & Science program or as an international exchange student and permission of the Arts & Science Program *This course is evaluated on a Pass/Fail basis. Some experiential learning opportunities may require a fee to cover costs of travel and other logistics.*

ARTSSCI 4MN2 - MOVEMENT AND INTEGRATION

This course brings together Arts & Science students and international exchange students to assess the experience of movement away from familiar terrain and reflect critically on ways of integrating that experiential learning into their lives as an ongoing practice of reflective, intentional living.

One term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program or as an international exchange student and permission of the Arts & Science Program. This course is evaluated on a Pass/Fail basis.

ARTSSCI 4VC3 - VISUAL CULTURE INQUIRY

This course allows students to explore the ways in which images and other visual texts intersect with issues of social concern. Drawing from a range of disciplinary perspectives, it considers histories, theories, and practices of the visual, and provides students with an opportunity to conduct self-directed, creative inquiry into visual culture.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the Arts & Science Program

ASTRONOMY

Courses in Astronomy are administered by the Department of Physics and Astronomy. A.N. Bourns Science Building, Room 241, ext. 24559

<http://www.physics.mcmaster.ca/>

Department Notes

1. The Department reserves the right to withdraw a Level III or IV course which is not specifically required in a Physics program if the registration falls below ten.
2. Students in Level III or IV of Physics programs will find a number of relevant electives among the offerings of the Department of Biology, the Department of Engineering Physics and the School of Geography and Earth Sciences.
3. Courses in Physics and Astronomy are not open to students registered in the Bachelor of Technology program.

Courses

If no prerequisite is listed, the course is open.

ASTRON 1F03 - INTRODUCTION TO ASTRONOMY AND ASTROPHYSICS

Topics include orbital motion, electromagnetic radiation, the solar system, stars and stellar evolution, the Milky Way Galaxy, galaxies and quasars, the evolution of the universe.

Three lectures; one term

Prerequisite(s): One of Grade 12 Calculus and Vectors U, Grade 12 Advanced Functions and Introductory Calculus U, MATH 1F03

Antirequisite(s): PHYSICS 1F03, SCIENCE 1D03

ASTRON 2B03 - THE BIG QUESTIONS

Formerly SCIENCE 2B03.

Ultimate questions in modern science are surveyed with emphasis on physical sciences: origin of space-time, elements and structure in the cosmos (stars, planets, galaxies).

Three lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): ORIGINS 2B03, SCIENCE 2B03

Not open to students who are registered in an Honours (Origins Research Specialization) program.

ASTRON 2E03 - PLANETARY ASTRONOMY

Physical and mathematical foundation of planetary astronomy. Historical development of ideas about the solar system. A modern view of the planets; the origin and evolution of the solar system and planets around other stars.

Three lectures; one term

Prerequisite(s): One of ARTSSCI 2D06 A/B, PHYSICS 1A03, 1B03, 1C03, 1D03; and one of ARTSSCI 1D06 A/B, MATH 1A03, 1LS3, 1N03, 1X03, 1Z04, 1ZA3; or ISCI 1A24 A/B

ASTRON 3X03 - GALAXIES AND COSMOLOGY

Stellar populations, star formation and the interstellar medium in galaxies. The Milky Way Galaxy; normal and active galaxies and large scale structure in the universe; observational and theoretical cosmology.

Three lectures, occasional lab periods; one term

Prerequisite(s): Six units from Level II PHYSICS, PHYSICS 1E03, ENGPYS 2A04, 2H04, 2P04, 2QM3

Alternates with ASTRON 3Y03.

ASTRON 3Y03 - STELLAR STRUCTURE

The physics of stellar interiors. The main sequence and the life cycle of a star. Stellar evolution, including white dwarfs, neutron stars, and black holes.

Three lectures; one term

Prerequisite(s): Six units from Level II PHYSICS, PHYSICS 1E03, ENGPYS 2A04, 2H04, 2P04, 2QM3. PHYSICS 2G03 is strongly recommended.

Alternates with ASTRON 3X03.

ASTRON 4X03 - ASTROPHYSICS DATA ANALYSIS PROJECT COURSE

A project-based course covering the basics of modern observational astronomy techniques. Students will complete a series of projects in data analysis covering topics such as the fundamentals of image analysis, photometry and spectroscopy.

Lectures, discussions, exercises; one term

Prerequisite(s): Registration in Level IV of Honours Astrophysics (B.Sc.), Honours Biophysics (B.Sc.), Honours Physics (B.Sc.) or the Honours Mathematics and Physics (B.Sc.) program

AUTOMOTIVE AND VEHICLE TECH

Courses in Automotive and Vehicle Technology are administered by the Bachelor of Technology Program.

Engineering Technology Building (ETB), Room 509, ext. 20195

<http://mybtechdegree.ca>

Note

For the Four-Year Program, registration is only permitted for courses of the same level in which the student is registered, unless otherwise specified.

AUTOTECH 2AC3 - ADVANCED CAD

Parametric solid modeling for parts with complex geometry. Wireframe and complex surfaces. Multi-component assemblies with kinematic constraints. Fitting and kinematic animations for assemblies. Simulation analysis on solid models.

One lab (four hours); second term

Prerequisite(s): AUTOTECH 2AE3, 2CD3, and registration in level II or above of the Automotive and Vehicle Engineering Technology program

AUTOTECH 2AE3 - DESIGN OF MACHINE ELEMENTS

Stress and strain; load analysis; failure prediction; impact; fatigue; lubrication and sliding bearings; rolling bearings; shafts and associated parts; gears; fasteners; brakes and clutches; disassemble and reassemble vehicle systems.

Three lectures, one lab (three hours); first term

Prerequisite(s): ENGTECH 1ME3, 1PH3, and registration in level II or above of the Automotive and Vehicle Engineering Technology program

AUTOTECH 2CD3 - COMPUTER AIDED DESIGN

Two-dimensional drafting: drawing environment and commands, drafting settings, drawing editing, plotting output, dimensioning, orthographic projections and views, sectional and auxiliary views. Three-dimensional solid modeling: parts, assemblies, 2D drawings generation.

One lecture, one lab (two hours); first term

Prerequisite(s): Registration in level II or above of the Automotive and Vehicle Engineering Technology program

AUTOTECH 2MT3 - STRUCTURE AND PROPERTIES OF MATERIALS

Physical properties including tensile and impact of materials, ductile and brittle fracture, testing, applications and selection of ceramics, metals and alloys, polymers and advanced materials used in automobiles and vehicles. Metal casting for automotive applications. Case studies.

Three lectures, one lab (three hours); first term

Prerequisite(s): ENGTECH 1CH3, 1ME3, 1PH3, and registration in level II or above of the Automotive and Vehicle Engineering Technology program

AUTOTECH 2TS3 - THERMODYNAMICS AND HEAT TRANSFER

Thermodynamic principles; heat engines; gas turbine cycles; air conditioning; conductive, convective and radiative heat transfer, heat transfer coefficients, heat exchangers, vehicle thermal management components and systems.

Three lectures, one lab (three hours); second term

Prerequisite(s): AUTOTECH 2AE3; ENGTECH 1CH3, 1MT3, 1PH3, and registration in level II or above of the Automotive and Vehicle Engineering Technology program

AUTOTECH 3AE3 - AUTOMOTIVE ENGINEERING TECHNOLOGY

Spark ignition engines; diesel engines, ignition systems, emission control devices, computers and on-board diagnostics; clutches; manual and automatic transmissions and transaxles; driveline; steering systems; suspension systems; brakes; tires and wheels; case studies.

Three lectures, one lab (two hours); first term

Prerequisite(s): AUTOTECH 2AE3, 2TS3, and registration in level III or above of the Automotive and Vehicle Engineering Technology program

AUTOTECH 3AV3 - ELECTRIC AND HYBRID VEHICLES

Alternate vehicular power systems: electric hybrid and fuel cell technology. Current and future vehicular powertrain design and control principles for series, parallel and complex hybrid vehicles; conversion of combustion engine vehicles in electric and hybrid vehicles.

Three lectures, one lab (three hours every other week); first term

Prerequisite(s): AUTOTECH 3AE3, 3CT3, and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 3CT3 - CONTROL THEORY

Analysis and design of closed loop control systems course to include: control system characteristics and performance, stability analysis, system types and performance improvement, digital control systems, compensation, filtering and motion control system analysis and tuning.

Three lectures, one lab (three hours); first term

Prerequisite(s): ENGTECH 1EL3, 2MT3, and registration in level III or above of the Automotive and Vehicle Engineering Technology program

AUTOTECH 3MP3 - MANUFACTURING PROCESSES AND SYSTEMS

Metal-casting processes and equipment; forming and shaping processes and equipment for metals, ceramics and plastics; material-removal processes and machines; joining processes and equipment; surface technology; engineering metrology and instrumentation.

Three lectures, one lab (two hours); first term

Prerequisite(s): AUTOTECH 2AE3, 2MT3, 3AE3 and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 3MV3 - MECHATRONICS

Sensors and actuators: analysis, selection and implementation. Programmable logic controllers. Ladder logic and sequential programming. Micro-controller analysis, implementation, and programming. Communication interfaces. Case studies of mechatronic systems, simulation, and testing.

Three lectures, one lab (three hours); first term

Prerequisite(s): AUTOTECH 3CT3, ENGTECH 1CP3, 1PR3, and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 3TS3 - FLUID MECHANICS

Fluid statics; forces on submerged and floating bodies; kinematics of flow and Bernoulli's equations; dimensional analysis and similarity; flow in closed conduits. Automotive turbomachines, fluid flow around bodies, lift and drag minimization by proper vehicle design.

Three lectures, one lab (two hours every other week); first term

Prerequisite(s): AUTOTECH 2AE3, 2TS3, and registration in level III or above of the Automotive and Vehicle Engineering Technology program

AUTOTECH 3VD3 - MECHANICAL VIBRATIONS

Single degree of freedom systems; free vibration; harmonically excited vibration; vibration under general forcing conditions; two degree of freedom systems; multi-degree of freedom systems; natural frequencies and mode shapes; vibration control; vehicle oscillations.

Three lectures, one lab (two hours every other week); first term

Prerequisite(s): AUTOTECH 3AE3, 3CT3, and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 4AE3 - INTERNAL COMBUSTION ENGINES

Internal combustion engine operating characteristics; engine maps; engine cycles; engine configuration and design; air and fuel induction; fluid motion within combustion chamber; heat transfer in engines; friction and lubrication.

Three lectures, one lab (two hours every other week); second term

Prerequisite(s): AUTOTECH 3AE3 and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 4AT3 - CONCEPTUAL DESIGN OF ELECTRIC AND HYBRID VEHICLES

Problem based learning course in which groups of students research, discuss, and implement conceptual design aspects of electric or hybrid electric vehicles for modern transportation approaches. The major aspects of vehicle design are analysed from the vehicle specification phase to the environment assessment and sustainability.

Three lectures; first term

Prerequisite(s): AUTOTECH 3AE3, 3AV3, 4EC3, ENGTECH 4EE0, and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 4CI3 - ROBOTICS AND COMPUTER INTEGRATED MANUFACTURING

Manufacturing planning; flexible manufacturing systems; CIM and quality; emerging CIM technologies; vision systems; robotics; workspace analysis; homogeneous transformation; angle and axis of rotation; Euler angles; manipulator kinematics; trajectories planning; displacement and velocity analyses; Jacobian matrix; redundant sensing of manipulators; manipulator statics; singularities; robot programming.

Three lectures, one lab (three hours); first term

Prerequisite(s): AUTOTECH 2AC3, 3AE3, ENGTECH 1CP3, ENGTECH 4EE0, and registration in level IV of the Automotive and Vehicle Engineering Technology program.

AUTOTECH 4DV3 - VEHICLE DYNAMICS

Acceleration performance; braking performance; aerodynamics and rolling resistance; ride; tires; steady-state cornering; suspensions; steering systems; rollover.

Three lectures, one lab (two hours every other week); first term

Prerequisite(s): AUTOTECH 3VD3, 4MS3; ENGTECH 4EE0, and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 4EC3 - ELECTRICAL AND ELECTRONICS CONTROL SYSTEMS

Intelligent vehicles; vehicle controllers, protocols buses and applications areas such as chassis, steering, braking, traction and stability control etc; and safety critical systems.

Three lectures, one lab (three hours); second term

Prerequisite(s): AUTOTECH 3CT3, 3MV3, and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 4MS3 - KINEMATIC AND DYNAMIC MODELLING AND SIMULATION

Kinematic and dynamics of rigid bodies; multi-body dynamic modelling and simulation of automotive dynamics; multi-body systems simulation software; modelling of the full vehicle; complex multi-body dynamic models.

Three lectures, one lab (three hours); second term

Prerequisite(s): AUTOTECH 3VD3, ENGTECH 3FE3 and one of ENGTECH 3FE3 or 3MN3, and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 4TR1 - CAPSTONE DESIGN I

This course requires students to research, design, develop, and implement an independent project and continues as a Technical Report II. The project plan and a model developed will be documented as a technical report and presented in a seminar.

One tutorial, one lab (two hours); second term

Prerequisite(s): AUTOTECH 3AV3, 3MV3, 3VD3, GENTECH 3MT3, and registration in level IV of the Automotive and Vehicle Engineering Technology program

AUTOTECH 4TR3 - CAPSTONE DESIGN II

This course is a continuation of AUTOTECH 4TR1 and it requires the students to conduct further research, modify/refine project design, develop and implement the independent project proposal submitted as a part of the Capstone Design Project I course load. The project will be documented as a technical report and presented in a seminar.

One tutorial, one lab (three hours); first term

Prerequisite(s): AUTOTECH 3MP3, 4AE3, 4EC3, 4MS3, 4TR1, ENGTECH 4EE0, and registration in level IV of the Automotive and Vehicle Engineering Technology program.

BIOCHEMISTRY

Courses in Biochemistry are administered by the Department of Biochemistry and Biomedical Sciences.

Health Sciences Centre, Room 4H45, ext. 22059

<http://www.fhs.mcmaster.ca/biochem/>

Courses

If no prerequisite is listed, the course is open.

BIOCHEM 2B03 - NUCLEIC ACID STRUCTURE AND FUNCTION

Fundamental concepts and experimental methods in studying both DNA and RNA. Nature of genetic information and its storage. Molecular basis of replication, transcription and translation. Students will be required to participate in a seminar outside of regular class hours.

Three lectures; first term

Prerequisite(s): Credit or registration in one of CHEMBIO 20A3, 20G3, CHEM 2BA3 or 20A3, and registration in Honours Biochemistry, Honours Chemical Biology or Honours Molecular Biology and Genetics; or registration in Honours Biophysics or Honours Medical and Biological Physics

Antirequisite(s): BIOCHEM 3G03

Not open to students with credit or registration in ISCI 2A18 A/B.

BIOCHEM 2BB3 - PROTEIN STRUCTURE AND ENZYME FUNCTION

Fundamental concepts and experimental methods in studying structures of proteins, including membrane proteins. Nature of enzyme catalysis. Introduction to enzyme kinetics and mechanism.

Three lectures, one tutorial; second term

Prerequisite(s): BIOCHEM 2B03, credit or registration in one of CHEMBIO 20B3, 20D3, CHEM 2BB3 or 20B3, and registration in Honours Biochemistry, Honours

Chemical Biology or Honours Molecular Biology and Genetics; or BIOCHEM 2B03 and registration in Honours Arts & Science and Biochemistry or Honours Biophysics or Honours Medical and Biological Physics

Antirequisite(s): BIOCHEM 3G03

Not open to students with credit or registration in ISCI 2A18 A/B.

BIOCHEM 2EE3 - METABOLISM AND PHYSIOLOGICAL CHEMISTRY

A brief introduction to proteins, enzymes and gene expression followed by a more detailed treatment of energy and intermediary metabolism with emphasis on physiological chemistry.

On-line, web modules; second term

Prerequisite(s): One of CHEM 2BA3, 2E03, 2OA3, 2OC3, HTHSCI 2D06 A/B, 2E03; or credit or registration in BIOPHYS 2S03 and registration in Honours Medical and Biological Physics (B.Sc.)

Antirequisite(s): BIOCHEM 3D03, LIFESCI 2EE3

Not open to students registered in an Honours Biochemistry (B.Sc.) or Honours Chemical Biology (B.Sc.) program.

BIOCHEM 2L06 A/B - INQUIRY IN BIOCHEMICAL TECHNIQUES

An inquiry approach to learning about current techniques in biochemistry research. Students will work in small groups in labs and workshops, with a focus on how to search the primary literature, prepare and deliver written and oral presentations. One lecture (two hours), one lab or workshop (four hours); two terms

Prerequisite(s): Credit or registration in BIOCHEM 2B03, 2B03, BIOSAFE 1BS0 (or HTHSCI 1BS0) and registration in Honours Biochemistry (B.Sc.) or Honours Biophysics (B.Sc.) or Honours Medical and Biological Physics (B.Sc.) or Honours Arts & Science and Biochemistry; or Honours Integrated Science (Biochemistry Concentration). BIOSAFE 1BS0 (or HTHSCI 1BS0) must be completed prior to the first lab.

Antirequisite(s): BIOCHEM 3L03

BIOCHEM 3A03 - BIOCHEMICAL RESEARCH PRACTICE

A twelve week research project undertaken in a biochemistry laboratory during the fall, winter or summer term which requires the submission of a formal report. Students are responsible to arrange a suitable project, location and agreement of the supervisor. Refer to http://fhs.mcmaster.ca/biochem/undergraduate/forms_and_procedures.html for information about applying for a position.

Prerequisite(s): BIOCHEM 2L06 A/B; and registration in an Honours Biochemistry (B.Sc.) program; and permission of the Department

Antirequisite(s): BIOCHEM 3LA3, 3R06 A/B

May not be taken concurrently with BIOCHEM 4F09 A/B, 4T15 A/B, 4Z03, HTHSCI 4R12 A/B.

Not open to students with credit or registration in ISCI 2A18 A/B.

BIOCHEM 3BP3 - PRACTICAL BIOINFORMATICS IN THE GENOMICS ERA

Introduction to bioinformatics theory, tools, and practice with an emphasis upon high-throughput DNA sequencing technologies. Areas of emphasis include gene sequence analysis, functional prediction, genome assembly and annotation, gene expression analysis, gene regulation analysis, genome databases, and microbial genomics. Includes introduction to the command line, software development, and cloud computing.

Two lectures, one tutorial; first term

Prerequisite(s): One of BIOCHEM 2B03 (or ISCI 2A18 A/B), 3G03, BIOLOGY 2C03, MOLBIOL 2C03

BIOCHEM 3D03 - METABOLISM AND REGULATION

Principles of bioenergetics. Major pathways for carbohydrates and lipids in energy production. Photosynthesis. Nitrogen metabolism. Biosynthesis of small biomolecules. Integration and regulation of metabolic activities.

Three lectures; first term

Prerequisite(s): One of BIOCHEM 2BB3, ISCI 2A18 A/B, or BIOCHEM 3G03 and registration in Honours Chemical Biology (B.Sc.) or Honours of Biophysics (B.Sc.) or Honours Medical and Biological Physics (B.Sc.)

Antirequisite(s): BIOCHEM 2EE3

BIOCHEM 3EE3 - RESEARCH ADVANCES IN CELL BIOLOGY AND BIOCHEMISTRY

A critical study of the literature from recent primary manuscripts on gene regulation and inter-related regulatory pathways. Emphasis is on the molecular and cellular biology of multiple pathways that interact to affect phenomena in biology and disease.

Three lectures; second term

Prerequisite(s): BIOCHEM 2B03 (or ISCI 2A18 A/B); and registration in any Honours Biochemistry (B.Sc.) program, Bachelor of Health Sciences (Honours) - Biomedical Sciences Specialization (B.H.Sc.) or Honours Arts & Science and Biochemistry, or registration in Bachelor of Health Sciences (Honours) - Biomedical Discovery and Commercialization (B.H.Sc.)

Antirequisite(s): BIOCHEM 3C03, 4EE3

BIOCHEM 3G03 - PROTEINS AND NUCLEIC ACIDS

Chemical and conformational properties of proteins and relationships to their function including regulation of enzyme activity. Chemical and physical structure of DNA and RNA relevant to biological function.

Three lectures; first term

Prerequisite(s): One of CHEM 2BA3, 2OA3, 2OC3, 2E03, CHEMBIO 2OA3, 2OG3, HTHSCI 2D06 A/B, 2E03 or registration in Honours Biophysics (B.Sc.) or Honours Medical and Biological Physics (B.Sc.) or Biomedical Discovery and Commercialization (B.H.Sc.) or Honours Chemical Biology (B.Sc.). Completion of at least Grade 12 Biology is strongly recommended.

Antirequisite(s): BIOCHEM 2B03, 2BB3

Not open to students registered in an Honours Biochemistry program or to students with credit or registration in ISCI 2A18 A/B.

BIOCHEM 3H03 - CLINICAL BIOCHEMISTRY

An outline of clinical chemistry; its relation to disease and relevance to health care.

Three lectures; second term

Prerequisite(s): Credit or registration in one of BIOCHEM 2EE3, 3D03, HTHSCI 2D06 A/B or 2E03

BIOCHEM 3LA3 - ADVANCED BIOCHEMISTRY TECHNIQUES

Laboratory course focusing on module-based advanced biochemistry techniques such as protein purification and analysis using Fast Protein Liquid Chromatography (FPLC) and Immunodetection techniques, CRISPR-Cas9, quantitative PCR, cell culture techniques, etc.

One lecture (two hours), one lab (three hours); second term

Prerequisite(s): Registration in Level III Honours Biochemistry - Biomedical Research Specialization (B.Sc) or registration in a Level III Honours Biochemistry program and permission of the department

Antirequisite(s): BIOCHEM 3A03, 3R06

BIOCHEM 3MI3 - MICROBIAL INTERACTIONS

This course examines how interactions with bacteria influence all cellular life on earth. Topics include conflict and collaboration between bacteria, host-pathogen and host-symbiont interactions, and biological innovations arising from battles between bacteria and bacteriophages.

Two lectures, one tutorial; first term

Prerequisite(s): BIOCHEM 2B03 and one of BIOCHEM 2BB3, BIOLOGY 2B03, 2C03, 2EE3; or BIOCHEM 3G03 or ISCI 2A18 A/B

BIOCHEM 3R06 A/B S - RESEARCH PROJECT

A project supervised by a member or associate member of the Department of Biochemistry and Biomedical Sciences. Assessment is based on laboratory work, a poster presentation and a final report. Refer to http://fhs.mcmaster.ca/biochem/undergraduate/forms_and_procedures.html for information about applying for a position.

Prerequisite(s): Registration in Honours Biochemistry or Biomedical Discovery and Commercialization program. Permission of the Department is required. Refer to http://fhs.mcmaster.ca/biochem/undergraduate/forms_and_procedures.html for information about applying for a position.

Antirequisite(s): BIOCHEM 3A03, 3LA3, 3P03, ISCI 2A18 A/B, 3A12 A/B

May not be taken concurrently with BIOCHEM 4F09 A/B, 4R12 A/B, 4T15 A/B, 4Z03. Consent of the Department is required.

BIOCHEM 3Z03 - STRUCTURAL DETERMINATION AND ANALYSIS OF MACROMOLECULES

Introduction to methods used in the determination of protein and macromolecular structures, which include x-ray crystallography, electron microscopy and small-angle x-ray scattering. Interpretation of protein structure data with practical emphasis on solving structures by x-ray crystallography.

One lecture, three hours; second term

Prerequisite(s): One of BIOCHEM 2BB3, BIOCHEM 3G03, or ISCI 2A18 A/B

Antirequisite(s): BIOCHEM 3X03

BIOCHEM 4C03 - INQUIRY IN BIOCHEMISTRY

Broader aspects of biochemistry such as those relating to food, drugs, health and environment discussed in small groups. Group and individual projects, seminars and lectures as appropriate to the subject matter.

Three hours; second term

Prerequisite(s): Registration in Level IV or above of an Honours Biochemistry (B.Sc.) program

Antirequisite(s): BIOCHEM 4B06 A/B, 4F09 A/B, 4P03, 4R12 A/B, 4T15 A/B, 4Z03, ISCI 4A12 A/B

BIOCHEM 4E03 - GENE REGULATION IN STEM CELLS AND DEVELOPMENT

Mechanisms of gene regulation, emerging concepts in transcriptional regulation, fundamental aspects of stem cell biology, gene expression in cancer, clinical applications of human stem cells.

Three lectures; first term

Prerequisite(s): BIOCHEM 2B03; or MOLBIOL 3H03 (or BIOLOGY 3H03) and BIOCHEM 3G03; or a grade of at least B+ in BIOCHEM 3G03; or HTHSCI 2D06 A/B or HTHSCI 2E03; or ISCI 2A18 A/B

BIOCHEM 4F09 A/B - SENIOR THESIS

A thesis based on a major research project supervised by a member of the Department of Biochemistry and Biomedical Sciences. The results will also be presented to the Department in a seminar. Refer to http://fhs.mcmaster.ca/biochem/undergraduate/forms_and_procedures.html for information about applying for a position.

Occasional tutorial (one hour); two terms

Prerequisite(s): BIOCHEM 2L06 A/B and registration in Level IV of B.H.Sc. (Honours) Biomedical Sciences Specialization or Level IV or above of an Honours Biochemistry program

Permission of the Department is required.

Antirequisite(s): BIOCHEM 4B06 A/B, 4C03, 4L03, 4P03, 4R12 A/B, 4T15 A/B, 4Z03, ISCI 4A12 A/B

May not be taken concurrently with BIOCHEM 3A03, 3R06 A/B.

BIOCHEM 4H03 - BIOTECHNOLOGY AND DRUG DISCOVERY

Selected topics on genomics, proteomics and bioinformatics illustrating the modern application of molecular biology and biochemistry to pharmaceutical and other research.

Three lectures; second term

Prerequisite(s): Credit or registration in BIOCHEM 3D03; or BIOCHEM 3G03 and registration in a Chemical Engineering program

Antirequisite(s): BIOMEDDC 3B06 A/B

BIOCHEM 4J03 - IMMUNOLOGICAL PRINCIPLES IN PRACTICE

This advanced course applies problem-based learning to immunological problems. Topics concern development of immunoassays, resistance to infection and immunity in health and disease.

One session (three hours), one tutorial; one term

Prerequisite(s): HTHSCI 3I03; or permission of the instructor

Antirequisite(s): MOLBIOL 4J03

Cross-list(s): HTHSCI 4J03

This course is administered by the Bachelor of Health Sciences (Honours) Program.

BIOCHEM 4M03 - CELLULAR AND INTEGRATED METABOLISM

Study of nutritional biochemistry and the regulation of metabolism; the role of specific nutrients in functional processes of the body in health and disease.

Three lectures; second term

Prerequisite(s): BIOCHEM 3D03; or BIOCHEM 2EE3 and 3G03 (or ISCI 2A18 A/B); or HTHSCI 2D06 A/B or 2E03

Antirequisite(s): BIOCHEM 3N03

BIOCHEM 4N03 - MOLECULAR MEMBRANE BIOLOGY

Properties and structures of membranes, molecular components of biological membranes and their interactions, strategies for signal transduction cascades, hormones, receptors.

Three lectures; second term

Prerequisite(s): Credit or registration in BIOCHEM 3D03; or BIOCHEM 2EE3 and BIOCHEM 3G03; or one of HTHSCI 2D06 A/B, HTHSCI 2E03, ISCI 2A18 A/B

Antirequisite(s): BIOCHEM 4K03

BIOCHEM 4Q03 - BIOCHEMICAL PHARMACOLOGY

Introduction to the basic concepts of pharmacology. Mechanisms of action of antibacterial, antiviral, antifungal and anticancer drugs, toxins and how cellular resistance to such agents develop. Applications of drug-resistant mutants for genetic, biochemical pharmacological and cell biological studies.

Three lectures; first term

Prerequisite(s): BIOCHEM 2BB3; or BIOCHEM 2EE3 and BIOCHEM 3G03; or credit or registration in BIOCHEM 3G03 and BIOMEDDC 3B06; or HTHSCI 2D06 A/B or HTHSCI 2E03; or ISCI 2A18 A/B

BIOCHEM 4S03 - INTRODUCTION TO MOLECULAR BIOPHYSICS

A presentation of recent contributions made to the fields of molecular and cell biology by the use of physical approaches. In particular, the following topics are discussed: physical properties of biomolecules, protein folding, molecular motors, cell motion and cell adhesion. Emphasis on the critical evaluation of current research literature.

Three lectures; one term

Prerequisite(s): One of CHEM 2R03, CHEMBIO 2P03, ISCI 2A18 A/B, MATLS 2B03, PHYSICS 2H04; or registration in Honours Mathematics and Physics (B.Sc.). BIOPHYS 3S03 is recommended.

Antirequisite(s): PHYSICS 4S03

Cross-list(s): BIOPHYS 4S03

This course is administered by the Department of Physics and Astronomy.

BIOCHEM 4T15 A/B - SENIOR THESIS

A thesis based on a major research project supervised by a member of the Department of Biochemistry & Biomedical Sciences. The results will also be presented to the Department in a seminar. Refer to http://fhs.mcmaster.ca/biochem/undergraduate/forms_and_procedures.html for information about applying for a position.

Occasional tutorial (one hour); two terms

Prerequisite(s): BIOCHEM 2L06 A/B and registration in Level IV or above of an Honours Biochemistry program. Permission of the Department is required.

Antirequisite(s): BIOCHEM 4B06 A/B, 4C03, 4F09 A/B, 4R12 A/B, 4Z03, ISCI 4A12 A/B

May not be taken concurrently with BIOCHEM 3A03, 3R06 A/B.

BIOCHEM 4Z03 - SENIOR PROJECT

A project supervised by a member of the Department of Biochemistry and Biomedical Sciences. Areas of study can include pedagogical research, literature reviews and data analysis as well as traditional lab-based projects. Assessment is based on lab/research performance and a final report. Refer to http://fhs.mcmaster.ca/biochem/undergraduate/forms_and_procedures.html for information about applying for a position.

Prerequisite(s): BIOCHEM 2L06 A/B and registration in Level IV or above of an Honours Biochemistry program.

Permission of the department is required.

Antirequisite(s): BIOCHEM 4C03, 4F09 A/B, 4T15 A/B, HTHSCI 4R12 A/B S, ISCI 4A12 A/B

May not be taken concurrently with BIOCHEM 3A03 or 3R06 A/B.

BIOLOGY

Courses in Biology are administered by the Department of Biology.

Life Sciences Building, Room 215, ext. 23049

<http://www.biology.mcmaster.ca>

Note

Students are strongly encouraged to take BIOLOGY 1A03 and BIOLOGY 1M03 in different terms.

Courses

If no prerequisite is listed, the course is open.

BIOLOGY 1A03 - CELLULAR AND MOLECULAR BIOLOGY

Structure, molecular composition and function in sub-cellular and cellular systems. Three hours (lectures, web modules), one lab (two hours); one term

Prerequisite(s): One of Grade 12 Biology U, BIOLOGY 1P03 or registration in an Engineering program

Co-requisite(s): WHMIS 1A00, and BIOSAFE 1BS0 (or HTHSCI 1BS0) if not already completed. Both requirements must be completed prior to the first lab.

Not open to students with credit or registration in HTHSCI 1I06 A/B or ISCI 1A24 A/B. Students are strongly encouraged to take BIOLOGY 1A03 and BIOLOGY 1M03 in the different terms.

BIOLOGY 1M03 - BIODIVERSITY, EVOLUTION AND HUMANITY

Fundamental evolutionary and ecological concepts with particular reference to the diversity of life.

Three lectures, seminar/lab (two hours every other week); one term

Prerequisite(s): Grade 12 Biology U or BIOLOGY 1P03

Not open to students with credit or registration in ISCI 1A24 A/B.

Students are strongly encouraged to take BIOLOGY 1A03 and 1M03 in the different terms.

BIOLOGY 1P03 - INTRODUCTORY BIOLOGY

Introduction to basic biological principles for students without Grade 12 Biology U. Three lectures; one term

Not open to students with credit in Grade 12 Biology U.

BIOLOGY 2A03 - INTEGRATIVE PHYSIOLOGY OF ANIMALS

Fundamental principles of animal physiology, including: cellular energetics, diffusion, osmosis, membrane transport, excitability and contractility, gas exchange, fluid dynamics, electrolyte balance.

Three lectures, one lab (three hours); one term

Prerequisite(s): BIOLOGY 1A03, 1M03; and one of PHYSICS 1A03 (or 1B03) or 1C03 or credit or registration in ARTSSCI 2D06 A/B; or ISCI 1A24 A/B

Antirequisite(s): MEDPHYS 4XX3

Not open to students with credit or registration in BIOLOGY 3P03, 3U03, 3UU3 or to students registered in the B.Sc.N., Bachelor of Health Sciences (Honours) (B.H.Sc.), Bachelor of Health Sciences (Honours) - Biomedical Sciences Specialization (B.H.Sc.), Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.), or Bachelor of Health Sciences (Honours) - Global Health Specialization (B.H.Sc.), or with credit or registration in HTHSCI 2F03 or 2FF3.

BIOLOGY 2B03 - CELL BIOLOGY

Basic treatment of cell structure and function, including transport and chemical signals; adaptation of structure and function in specialized cells.

Lectures (one hour), web modules (three hours), tutorial, seminars; one term

Prerequisite(s): BIOLOGY 1A03, CHEM 1A03, 1AA3; or ISCI 1A24 A/B; or BIOLOGY 1A03 and registration in Chemical Engineering and Biosciences, or Honours Medical and Biological Physics (B.Sc.)

Antirequisite(s): HTHSCI 2K03

Not open to students with credit or registration in ISCI 2A18 A/B.

BIOLOGY 2C03 - GENETICS

Structure, function and transmission of genes; chromosomal basis of inheritance; mono- and dihybrid crosses; sequential steps in gene function; linkage maps; sex chromosome inheritance.

Lectures (three hours), online modules (two hours), tutorial (one hour); one term

Prerequisite(s): BIOLOGY 1A03, 1M03 (or ISCI 1A24 A/B); and registration in an Honours program in the Faculty of Science, the Faculty of Health Sciences, or the Arts & Science Program

Antirequisite(s): MOLBIOL 2C03

Not open to students registered in Honours Molecular Biology and Genetics.

BIOLOGY 2D03 - PLANT BIODIVERSITY AND BIOTECHNOLOGY

Key concepts in plant biology and biodiversity will be explored, including the origin of plants, plant structure and development, plant genomes, plant responses to the environment and other organisms, agriculture and plant biotechnology.

Three lectures, one lab (three hours); one term

Prerequisite(s): BIOLOGY 1A03, 1M03; or ISCI 1A24 A/B. If not already completed, BIOSAFE 1BS0 (or HTHSCI 1BS0) must be done prior to the first lab.

BIOLOGY 2EE3 - INTRODUCTION TO MICROBIOLOGY AND BIOTECHNOLOGY

Microbial structure, genetics, metabolism, and evolution. Overview of agricultural, medical, environmental, and industrial microbiology. Covers key concepts, fundamental principles, and common research tools in microbiology.

Three lectures, one lab (three hours); one term

Prerequisite(s): ISCI 1A24 A/B; or BIOLOGY 1A03, 1M03, CHEM 1A03, 1AA3; or registration in Level III Chemical Engineering and Bioengineering. If not already completed, BIOSAFE 1BS0 (or HTHSCI 1BS0) must be done prior to the first lab.

BIOLOGY 2F03 - FUNDAMENTAL AND APPLIED ECOLOGY

An introduction to fundamental ecological principles and their application to current environmental problems at the level of organisms, populations and ecosystems.

Three lectures, one optional tutorial, one lab (three hours); one term

Prerequisite(s): BIOLOGY 1M03 or ISCI 1A24 A/B

Not open to students with credit or registration in ISCI 2A18 A/B.

BIOLOGY 2L03 - EXPERIMENTAL DESIGN IN BIOLOGY

An active learning approach to experiencing how research is conceived, executed, interpreted and communicated in Biology. Principles and case studies in lectures are matched with hands-on application in the lab.

Two lectures, one lab (four hours); one term

Prerequisite(s): Registration in Level II or III of any Honours Biology or Honours Molecular Biology and Genetics program or permission of the Instructor. If not already completed, BIOSAFE 1BS0 (or HTHSCI 1BS0) must be done prior to the first lab.

Antirequisite(s): BIOLOGY 2L06

BIOLOGY 3AA3 - FUNDAMENTAL CONCEPTS OF PHARMACOLOGY

Drug interactions with living organisms; absorption and elimination of drugs, variations in drug action, drug toxicity, receptor structure and function, and signal transduction pathways.

Three lectures, one tutorial (three hours); one term

Prerequisite(s): BIOLOGY 2A03; and one of BIOCHEM 2BB3, 2EE3, ISCI 2A18 A/B, or registration in BIOCHEM 3G03. BIOLOGY 3P03 is strongly recommended.

Not open to students with credit in BIOCHEM 4Q03 or registration in Honours Biology and Pharmacology.

BIOLOGY 3B03 - PLANT PHYSIOLOGY

Principles of physiology and plant cell metabolism. Topics include: photosynthesis, photorespiration, mineral nutrition, water relations and transpiration.

Two lectures, one lab (three hours); one term

Prerequisite(s): BIOLOGY 2B03 or ISCI 2A18 A/B; and BIOLOGY 2D03 or registration in a Biophysics program

BIOLOGY 3DD3 - COMMUNITIES AND ECOSYSTEMS

Communities and ecosystems: mechanism and principles governing their form and function in origin, development, and maintenance of terrestrial and aquatic communities and ecosystems and their interactions with anthropogenic change, with elements of macroecology, biogeography, landscape, and global ecology.

Three lectures, one tutorial; one term

Prerequisite(s): BIOLOGY 2F03 or ISCI 2A18 A/B. BIOLOGY 2D03 is recommended.

BIOLOGY 3E13 - ECOLOGICAL INDICATORS

Students learn how to assess the health of Great Lakes ecosystems, including wetlands, woodlots, and streams using established ecological indicators.

One lecture (2 hours), 1 lab (3 hours); one term

Prerequisite(s): BIOLOGY 2F03 or ISCI 2A18

BIOLOGY 3EP3 A/B S - APPLIED BIOLOGY PLACEMENT

This placement course provides students with the opportunity to explore career options and integrate academics with a community, volunteer or professional experience. The student will complete an academic component in addition to the placement.

Normally students will complete 60 hours of placement work through the duration of the experience; may be completed over one or two terms

Prerequisite(s): Credit or registration in SCIENCE 2C00; and registration in Level III or above of a program in the Faculty of Science; and permission of the academic supervisor and the course coordinator (or designate)

Antirequisite(s): EARTHSC 3IN3, 4IN3, GEOG 3MI3, 3MV3 A/B, LIFESCI 3EP3 A/B S, 3EX6, SCIENCE 3EP3 A/B S, 3EX6 A/B

Students are responsible to arrange a suitable placement and supervision, and are required to submit an application to the Department of Biology two months prior to registration. More information and the application form can be found at <http://www.biology.mcmaster.ca/undergraduate-programs/courses.html>.

BIOLOGY 3ET3 - ECOTOXICOLOGY

This course covers the environmental pathways of exposures of terrestrial and aquatic organisms to modern and legacy contaminants, and the adverse effects that these contaminants have on diverse species including humans.

Two lectures, one tutorial; one term

Prerequisite(s): One of CHEMBIO 20A3, CHEM 2E03, 20A3 and registration in Level III or above.

Completion of BIOLOGY 2A03, 2B03, 2F03, ENVIRSCI 3003 are recommended.

BIOLOGY 3FF3 - EVOLUTION

Successful participants synthesize and apply the main theoretical concepts and evaluate and analyse the major empirical observations related to evolution upon completing this course.

Three lectures, one tutorial; one term

Prerequisite(s): BIOLOGY 2C03 or MOLBIOL 2C03

BIOLOGY 3HD3 - HUMAN DISASTERS

This course will examine a range of human and biologically based disasters, such as antibiotic resistance, DDT, the Great Sparrow Massacre, the Kansas Dustbowl and Agent Orange, by contextualising the circumstances and examining the science involved.

Lectures (three hours); one term

Prerequisite(s): Registration in Level III or above of any program

BIOLOGY 3IR3 A/B S - INDEPENDENT RESEARCH PROJECT

Students will conduct an independent research study in a faculty member's laboratory. For further information, please refer to <http://www.biology.mcmaster.ca/undergraduate-programs/courses.html> and click on Biology 3IR3.

Students are responsible to arrange a suitable placement and supervision, and are required to submit an application to the Department of Biology thirty days prior to the date classes begin in each Term (see the Sessional Dates section of this Calendar).

8 - 10 hours per week (scheduling arranged by supervisor); one or two term(s)

Prerequisite(s): Registration in Level III or above of any Honours Biology program. BIOLOGY 2L06 A/B (or 2L03) is recommended preparation.

Permission of the Department is required.

Students are expected to have a GPA of at least 8.0.

Antirequisite(s): MOLBIOL 3I03 A/B S

Not open to students with credit or registration in any department- or program-based independent study or research seminar course within the University.

BIOLOGY 3JJ3 - FIELD METHODS IN ECOLOGY

An introduction to techniques in ecology, including restoration, population, community, functional, and behavioural ecology, based on field labs. Lectures provide background and data analysis.

Two lectures, one lab (four hours); one term

Prerequisite(s): BIOLOGY 2F03 or ISCI 2A18 A/B

BIOLOGY 3MM3 - INVERTEBRATE FORM AND FUNCTION

Analysis of sensory reception, nervous control systems, feeding, skeletal support, locomotion, excretion, respiration, and reproduction in selected invertebrates.

Two lectures, one lab (three hours); one term

Prerequisite(s): BIOLOGY 2A03 and registration in Level III or above of any Honours program; or BIOLOGY 1A03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

BIOLOGY 3P03 - CELL PHYSIOLOGY

Analysis of cell function with an emphasis on electrical properties, ion transport proteins, signalling via second messengers, mechanisms of cell homeostasis, and epithelial transport.

Two lectures, one tutorial; one term

Prerequisite(s): One of BIOLOGY 2A03, PNB 2XB3, or both BIOLOGY 1A03 (or ISCI 1A24 A/B) and registration in Level III or above of Honours Kinesiology; and credit or registration in one of BIOCHEM 2BB3, 3G03, BIOLOGY 2B03, or registration in Honours Neuroscience; or ISCI 2A18 A/B

BIOLOGY 3PG3 - POPULATION GENETICS

Conceptual foundations of evolutionary theory and principles of population genetics. Three lectures; or two lectures, one tutorial; one term

Prerequisite(s): BIOLOGY 3FF3 and registration in Level III or above of any Honours program

BIOLOGY 3R03 - FIELD BIOLOGY I

Academic component associated with field work chosen from an assortment of modules. Content and schedules vary annually. Module must differ from any completed for credit in BIOLOGY 4J03. For further information, please refer to <http://www.biology.mcmaster.ca> and click on Field Biology.

Prerequisite(s): Permission of the Course Administrator, Life Sciences Building, Room 215. Some modules have additional prerequisites.

Co-requisite(s): Credit or registration in BIOLOGY 3RF0

For further information, please refer to <http://www.biology.mcmaster.ca> and click on Field Biology.

BIOLOGY 3RF0 - FIELD WORK I

Field work, corresponding with BIOLOGY 3R03, chosen from an assortment of modules. Content and schedules vary annually. Module must differ from any completed for credit in BIOLOGY 4J03. Students enrolling in this course must pay the incidental fees, as prescribed by the Department. Further information may be found at <http://www.biology.mcmaster.ca> and click on Field Biology.

Prerequisite(s): Permission of the Course Administrator, Life Sciences Building, Room 215. Some modules have additional prerequisites.

Students must register in BIOLOGY 3R03 in the same or subsequent session as BIOLOGY 3RF0.

BIOLOGY 3S03 - AN INTRODUCTION TO BIOINFORMATICS

This course introduces the techniques and methods of basic computer analysis of sequence data, including alignment, databases, and phylogenetic reconstruction. Three lectures, one tutorial; one term

Prerequisite(s): Registration in Level III or above of any program; BIOLOGY 2C03 (or equivalent) is strongly recommended

BIOLOGY 3SA3 - APPLIED STATISTICS FOR BIOLOGY

Theory and practice for statistical analysis in Biology. Using R, students will explore and analyse large data sets.

Two lectures, one tutorial; one term

Prerequisite(s): One of ISCI 2A18, PNB 3XE3, STATS 2B03, 2MB3

Antirequisite(s): STATS 4P03

BIOLOGY 3SS3 - POPULATION ECOLOGY

Population structure and dynamics. Natural selection and regulation of organisms by environmental and biological factors. An evolutionary view of predation, competition, life history schedules.

Three lectures, one tutorial (one hour); one term

Prerequisite(s): BIOLOGY 2F03 (or ISCI 2A18 A/B)

BIOLOGY 3U03 - ANIMAL PHYSIOLOGY - HOMEOSTASIS

Respiration, circulation, acid-base balance and renal function.

Two lectures, one lab/tutorial (three hours); one term

Prerequisite(s): BIOLOGY 2A03 and registration in Level III or above of any Honours program; or both BIOLOGY 1A03 and registration in Level III or above of Honours Kinesiology. BIOCHEM 2EE3 and BIOCHEM 3G03 are recommended. *Not open to students registered in the B.Sc.N., Bachelor of Health Sciences (Honours) (B.H.Sc.), Bachelor of Health Sciences (Honours) - Biomedical Sciences Specialization (B.H.Sc.), Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.), or Bachelor of Health Sciences (Honours) - Global Health Specialization (B.H.Sc.), or with credit or registration in HTHSCI 2F03 or 2FF3.*

BIOLOGY 3UU3 - ANIMAL PHYSIOLOGY - REGULATORY SYSTEMS

Regulation associated with major features and functions of organisms (e.g. feeding, reproduction, thermoregulation, growth, stress, sleep, aging). Emphasis on endocrinology, evolution, vertebrates and ecology. Material will include selected readings.

Three lectures; or two lectures, one tutorial; one term

Prerequisite(s): BIOLOGY 2A03; or both BIOLOGY 1A03 and registration in Level III or above of Honours Kinesiology. BIOLOGY 2B03 (or ISCI 2A18 A/B) and BIOLOGY 2C03 or MOLBIOL 2C03 are recommended.

Not open to students registered in B.Sc.N., Bachelor of Health Sciences (Honours) (B.H.Sc.), Bachelor of Health Sciences (Honours) - Biomedical Sciences Specialization (B.H.Sc.), Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.), or Bachelor of Health Sciences (Honours) - Global Health Specialization (B.H.Sc.), or with credit or registration in HTHSCI 2F03 or HTHSCI 2FF3.

BIOLOGY 3VV3 - LABORATORY METHODS IN MOLECULAR BIOLOGY

A laboratory course providing hands-on experience in basic molecular biology techniques.

One lecture, two labs (three hours); one term

Prerequisite(s): BIOLOGY 2B03 (or ISCI 2A18 A/B) and 2C03. If not already completed, BIOSAFE 1BS0 (or HTHSCI 1BS0) and WHMIS 1A00 must be done prior to the first lab.

Antirequisite(s): MOLBIOL 3V03

BIOLOGY 3XL3 - COMPARATIVE VERTEBRATE ANATOMY & PHYSIOLOGY

Major organ systems (cardiovascular, respiratory, renal, skeletal, muscle, gastrointestinal) form and function compared across taxa (within vertebrates) and environments (heat, cold, salt, and oxygen stress).

Two lectures, one lab (three hours); one term

Prerequisite(s): BIOLOGY 2A03 and registration in Level III or above of any Honours program; or both BIOLOGY 1A03 and registration in Level III or above of Honours Kinesiology. BIOCHEM 2EE3 and 3G03 are recommended.

BIOLOGY 3ZZ3 - TOPICS IN PHYSIOLOGY

An advanced seminar focusing on current topics in physiology.

One seminar (two hours), one tutorial (two hours); one term

Prerequisite(s): Registration in Honours Biology - Physiology (B.Sc.); or BIOLOGY 2A03 and one of BIOLOGY 3MM3, 3P03, 3U03, 3UU3, 3XL3

BIOLOGY 4A03 - ADVANCED TOPICS IN ECOLOGY

Examination of current topics in ecology including ecosystem and landscape ecology, evolutionary ecology and behavioural ecology.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): One of BIOLOGY 3DD3, 3FF3, 3SS3; and registration in Level III or above of any Honours program

BIOLOGY 4AA3 - CONSERVATION BIOLOGY

Examination of how biological principles, mainly from population biology and genetics can be applied to conserving diversity in the natural world.

Two lectures, one tutorial, one lab (three hours); one term

Prerequisite(s): BIOLOGY 2C03 or MOLBIOL 2C03; and one of BIOLOGY 3DD3, 3FF3 or 3SS3; and registration in Level III or above of any Honours program

BIOLOGY 4AE3 - THE ECOLOGY AND EVOLUTION OF ORGANISMS

The evolution of organismal form and function from a perspective of the ecological niche. Convergent and coevolutionary aspects as shaped by environmental and biological factors.

Three lectures; one term

Prerequisite(s): BIOLOGY 2F03 (or ISCI 2A18 A/B) and registration in Level III or above of an Honours Biology program

BIOLOGY 4C12 A/B S - SENIOR THESIS

A thesis based upon a research project in an area of biology. Arrangements to take BIOLOGY 4C12, including agreement of the supervisory committee, should be made according to Departmental Guidelines before the end of March in Level III. For information on Departmental Guidelines, please refer to the Biology web site at <http://www.biology.mcmaster.ca/undergraduate-programs/courses.html> and click on BIOLOGY 4C12, or contact the Course Administrator.

Occasional lecture/tutorial; two terms

Prerequisite(s): Registration in Level IV of any Honours Biology program and permission of the Course Administrator, Life Sciences Building, Room 215. Students are expected to have a GPA of at least 8.5.

Antirequisite(s): BIOLOGY 4F06 A/B S, BIOLOGY 4C09 A/B S

Not open to students with credit or registration in any Level IV department- or program-based thesis or independent study/project course.

BIOLOGY 4ED3 - EVOLUTIONARY DEVELOPMENTAL BIOLOGY

A critical analysis of the conceptual and methodological approaches to Evolutionary Developmental biology. Emphasis is on integrating the developmental, genetic and evolutionary approaches towards understanding how phenotypic variation is generated.

Lectures (two hours), one tutorial (two hours); one term

Prerequisite(s): BIOLOGY 3FF3 or MOLBIOL 3M03; and registration in Level III or above of any Honours program

BIOLOGY 4EE3 - HUMAN DIVERSITY AND HUMAN NATURE

The nature of genetic diversity in humans; the nature versus nurture debate in relation to genetic determinism and biological basis of behaviour.

Three lectures, one tutorial; one term

Prerequisite(s): BIOLOGY 3FF3 and registration in Level III or above of any Honours program

BIOLOGY 4F06 A/B S - SENIOR PROJECT

Students undertake an experimental or library project in a specialized area of biology under the direction of a member of the Biology department.

Arrangements to take BIOLOGY 4F06, including the agreement of the supervisory committee, should be made according to Departmental Guidelines before the end of March in Level III. For information on Departmental Guidelines, please refer to the Biology web site at <http://www.biology.mcmaster.ca/undergraduate-programs/courses.html> and click on BIOLOGY 4F06, or contact the Course Administrator.

Occasional lecture/tutorial; two terms

Prerequisite(s): Registration in Level IV of any Honours Biology program and permission of the Course Administrator, Life Sciences Building, Room 215. Students are expected to have a GPA of at least 8.5.

Antirequisite(s): BIOLOGY 4C09 A/B S

Not open to students with credit or registration in any Level IV department- or program-based thesis or independent study/project course.

BIOLOGY 4IR3 - ADVANCED INDEPENDENT RESEARCH PROJECT

An independent research project, involving bench or field work or literature review, in an area of biology, to be supervised by an approved faculty member. Arrangements to take this course, including agreement of the supervisor, should be made according to Departmental Guidelines at least one month prior to beginning of the course. For information on Departmental Guidelines, please refer to the Biology web site at <http://www.biology.mcmaster.ca/undergraduate-programs/courses.html> and click on BIOLOGY 4IR3, or contact the Course Administrator.

Occasional lecture/tutorial; one term

Prerequisite(s): Registration in Level IV of any Honours Biology program and permission of the Course Administrator

Antirequisite(s): BIOLOGY 4C09, 4C12 A/B S, 4F06, LIFESCI 4A03

Not open to students with credit or registration in any Level IV department- or program-based thesis or independent study/project course.

BIOLOGY 4J03 - FIELD BIOLOGY I

A second academic component associated with field work chosen from an assortment of modules. Content and schedules vary annually. Module must differ from any completed for credit in BIOLOGY 3R03. For further information, please refer to <http://www.biology.mcmaster.ca> and click on Field Biology.

Prerequisite(s): BIOLOGY 3R03, 3RFO; and permission of the Course Administrator, Life Sciences Building, Room 215. Some modules have additional prerequisites.

Co-requisite(s): Credit or registration in 4JF0.

BIOLOGY 4JF0 - FIELD WORK II

Field work, corresponding with BIOLOGY 4J03, chosen from an assortment of modules. Content and schedules vary annually. Module must differ from any completed for credit in BIOLOGY 3R03. Students enrolling in this course must pay the incidental fees, as prescribed by the Department. Further information may be found at <http://www.biology.mcmaster.ca> and click on Field Biology.

Prerequisite(s): BIOLOGY 3R03, BIOLOGY 3RFO; and permission of the Course Administrator, Life Sciences Building, Room 215. Some modules have additional prerequisites.

Students MUST register in BIOLOGY 4J03 in the same or subsequent session as BIOLOGY 4JF0.

BIOLOGY 4PP3 - ENVIRONMENTAL MICROBIOLOGY AND BIOTECHNOLOGY

Study of interaction of microorganisms with their environment with emphasis on topics of ecological significance including plant-microbe interactions, nutrient cycling and waste treatment.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): BIOLOGY 2EE3; and registration in Level III or above of any Honours program

BIOLOGY 4T03 - NEUROBIOLOGY

Selected topics in neurobiology at the molecular and cellular level including growth factors and neuronal development, ion channels, neurotransmitter functions, learning and memory, and neurological disorders.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): BIOLOGY 2B03 (or ISCI 2A18 A/B), BIOLOGY 3P03 and registration in Level III or above of an Honours Biology program, Honours Neuroscience, or Honours Psychology, Neuroscience & Behaviour. MOLBIOL 3B03 is recommended.

Offered in alternate years.

BIOLOGY 4X03 - ENVIRONMENTAL PHYSIOLOGY

The influence of environmental factors on the physiology of animals and the adaptation of animals to diverse environments in the context of biodiversity.

Three lectures; or two lectures, one tutorial; one term

Prerequisite(s): One of BIOLOGY 3MM3, 3P03, 3U03, 3UU3; and registration in Level III or above of any Honours program

BIOMEDICAL DISCOVERY & COMMERCIALIZATION

Courses in Biomedical Discovery and Commercialization are administered by the Department of Biochemistry and Biomedical Sciences.

Health Sciences Centre, Room 4H30, ext. 27335, bdccprogram@mcmaster.ca

<http://bdccprogram-mcmaster.ca/>

<http://bdccstudent-mcmaster.ca/>

BIOMEDDC 2C03 - EXPLORING CAREERS IN BIOMEDICAL SCIENCES

An inquiry-based course that will explore careers related to biochemistry and biomedical sciences, coupled with an exploration of the science behind each career. The course will include examination of the primary literature as it relates to each topic, culminating in a final presentation.

One two-hour seminar; second term

Prerequisite(s): Registration in Level II or above of any Science or Health Sciences Program

BIOMEDDC 3A03 - ROAD TO BIOMEDICAL DISCOVERY

This course will introduce students to critical thinking essential to discovery research through examples of fundamental and applied research occurring in the laboratories of thought leaders at McMaster and their efforts to translate this knowledge to stakeholders across the spectrum of knowledge users. Communication of fundamental research is emphasized.

Three lectures; one term

Prerequisite(s): Registration in Level III of the Biomedical Discovery and Commercialization program

BIOMEDDC 3B06 A/B - DRUG DISCOVERY AND DEVELOPMENT

This two-term course will provide an overview of paradigms and processes in modern drug discovery and development. Selected content will include discovery and preclinical research as well as clinical development, market analysis and intellectual property. Learners will benefit from a mix of lecture-based and student-focused activities.

Three lectures; two terms

Prerequisite(s): Registration in Level III of the Biomedical Discovery and Commercialization program.

Antirequisite(s): BIOCHEM 4H03

BIOMEDDC 3C09 A/B - RESEARCH SKILLS LABORATORY AND INQUIRY

A two-term laboratory-based inquiry course where students will learn and apply current techniques used in drug discovery. Instruction to achieve an understanding of key laboratory skills in drug discovery will prepare students for participation in a team-based drug discovery project.

One lecture (two hours), two labs (three hours); two terms

Prerequisite(s): Registration in level III of the Biomedical Discovery and Commercialization program

BIOMEDDC 4A15 A/B - SENIOR RESEARCH THESIS

An intensive two-term research project carried out under the supervision of a member or associate member of the Department of Biochemistry and Biomedical Sciences. The results will be presented to the department in a seminar or poster session as part of a senior thesis symposium.

Monthly tutorial (one hour); two terms

Prerequisite(s): Registration in Level IV of the Biomedical Discovery and Commercialization program

BIOMEDDC 4B03 - ROAD TO BIOMEDICAL COMMERCIALIZATION

This course will be a practical and hands-on foray into the world of commercialization of biomedical research. Students will conduct an in-depth examination of biomedical research with the goal of establishing a favoured avenue for commercialization. To this end, students will work in small groups with both individual and group assignments. The effort will be self-directed and under the mentorship of a content expert. Students will also benefit from lectures and guidance from commercialization experts in the McMaster Industry Liaison Office (MILO.)

Seminar and discussions (three hours); one term

Prerequisite(s): Registration in Level IV of the Honours Bachelor of Health Sciences in Biomedical Discovery and Commercialization Program

BIOPHYSICS

Courses in Biophysics are administered by the Department of Physics and Astronomy, A.N. Bourns Science Building, Room 241, ext. 24559

<http://www.physics.mcmaster.ca/>

Department Notes

1. The Department reserves the right to withdraw a Level III or IV course which is not specifically required in a Physics program if the registration falls below ten.
2. Students in Level III or IV of Physics programs will find a number of relevant electives among the offerings of the Department of Biology, the Department of Engineering Physics and the School of Geography and Earth Sciences.
3. Courses in Physics and Astronomy are not open to students registered in the Bachelor of Technology program.

BIOPHYS 1S03 - BIOPHYSICS OF MOVEMENT AND THE SENSES: FROM MICROBES TO MOOSE

A conceptual course, based on and requiring Grade 12 Physics. Applications to biological systems exploring the interdisciplinary field of biophysics. Topics include: Sound, Hearing and Echolocation, Optics of Vision, Animal Locomotion, Thermal Motion of Molecules, Heat and Heat Flow in biological systems, Fluid Dynamics. Intended for students in Life Science Gateway, Chemical and Physical Sciences Gateway, and those interested in physical aspects of biology.

Three lectures; one term

Prerequisite(s): Grade 12 Physics U or credit or registration in one of PHYSICS 1A03, 1L03; and credit or registration in one of MATH 1A03, 1LS3, 1X03, 1ZA3; or ISCI 1A24 A/B

BIOPHYS 2A03 - BIOPHYSICS OF THE CELL AND LIVING ORGANISMS

Some of the most exciting breakthroughs in science are made at the interface between disciplines. Biology and physics are no different. Topics may include: elements of bioelectromagnetism, basic circuits, capacitance, impedance and potentials of cells and membranes. Waves for sound and vision, diffraction, refraction, scattering. Intracellular motion and transport: diffusion, permeability, Fick's Law and electrophoresis. Phases and equilibria: energy landscapes, protein folding, Boltzmann distribution.

Three hours (lectures); one term

Prerequisite(s): One of PHYSICS 1A03, 1C03, 1D03; and one of MATH 1A03, 1LS3, 1X03, 1ZA3 (or ISCI 1A24 A/B)

Antirequisite(s): MEDPHYS 2B03, PHYSICS 2A03, 2B06

Not open to students enrolled in any Physics program or with credit or registration in ISCI 2A18 A/B.

BIOPHYS 2S03 - EXPLORATIONS IN MEDICAL AND BIOLOGICAL PHYSICS

An inquiry based presentation of selected current topics in medical and biological physics including central concepts of organic chemistry. As part of this course students will work in small groups and carry out several short projects involving a literature review, experimental or computational research.

One lecture or tutorial (one hour), one workshop (two hours); one term

Prerequisite(s): One of ISCI 1A24, BIOPHYS 1S03, 2A03, PHYSICS 1AA3, 1CC3, 1E03 (or 1BA3 or 1BB3) or registration in Honours Medical and Biological Physics

BIOPHYS 3D03 - ORIGIN OF LIFE

The roles of replication, metabolism and compartmentalization in the Origins of Life. Prebiotic chemistry. The RNA World and ribozymes. The earliest traces of life in the fossil record. Astrobiology: could life exist on other planets?

Three lectures, one tutorial; one term

Prerequisite(s): Registration in Level III or above of an Honours program in the Faculty of Science

Antirequisite(s): ORIGINS 3D03, PHYSICS 3L03

Not open to students registered in an Origins Research Specialization. Offered in alternate years.

BIOPHYS 3G03 - MODELLING LIFE

Introduction to simulating computational models in the life sciences, including examples from molecular and cell biology, ecology and evolution. Designing models to link to experimental questions and to test scientific hypotheses.

Three hours (lectures); one term

Prerequisite(s): PHYSICS 1A03 or 1C03; and one of MATH 1A03, 1LS3, 1X03, 1ZA3; or ISCI 1A24 A/B

Cross-list(s): LIFESCI 3BP3

BIOPHYS 3S03 - SOFT CONDENSED MATTER PHYSICS

Soft materials include polymers, liquid crystals, surfactants and colloids. The course will cover structure, dynamics, phase transitions and self-assembly, and discuss applications and links to the life sciences.

Three lectures; one term

Prerequisite(s): One of CHEM 2R03, CHEMBIO 2P03, ISCI 2A18 A/B, PHYSICS 2H04; or registration in Honours Mathematics and Physics (B.Sc.) or Honours Medical and Biological Physics

Antirequisite(s): PHYSICS 3S03

BIOPHYS 4L03 A/B - LITERATURE REVIEW

A directed reading and review of the literature in any field of biophysics, associated with a faculty member's research area. Normally, a report and poster presentation will be required.

Occasional tutorial (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours Biophysics program; and permission of the Chair of the Department of Physics and Astronomy

Antirequisite(s): PHYSICS 4L03 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

BIOPHYS 4P06 A/B - SENIOR RESEARCH PROJECT

An experimental or theoretical project to be carried out under the supervision of a faculty member. Normally, a report, oral and poster presentation will be required. One occasional tutorial (two hours); two terms

Prerequisite(s): Registration in Level IV of an Honours Biophysics program; and a GPA of at least 9.0; and permission of the Chair of the Department of Physics and Astronomy

Antirequisite(s): MEDPHYS 4Y06 A/B, PHYSICS 4P06 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

BIOPHYS 4S03 - INTRODUCTION TO MOLECULAR BIOPHYSICS

A presentation of recent contributions made to the fields of molecular and cell biology by the use of physical approaches. In particular, the following topics are discussed: physical properties of biomolecules, protein folding, molecular motors, cell motion and cell adhesion. Emphasis on the critical evaluation of current research literature.

Three lectures; one term

Prerequisite(s): One of CHEM 2R03, CHEMBIO 2P03, ISCI 2A18 A/B, MATLS 2B03, PHYSICS 2H04; or registration in Honours Mathematics and Physics (B.Sc.) or an Honours Medical and Biological Physics (B.Sc.) program. BIOPHYS 3S03 is recommended.

Antirequisite(s): PHYSICS 4S03

Cross-list(s): BIOCHEM 4S03

BIOSAFETY

BIOSAFE courses are administered by the Faculty of Science.

BIOSAFE 1BS0 - BIOSAFETY TRAINING

Formerly HTHSCI 1BS0

BSL 1 biosafety training for the handling of non-pathogenic bacteria, cell lines, blood and body fluids or mammalian tissues based on federal laboratory biosafety guidelines.

This course is evaluated on a Complete/Fail basis.

Web module

BSL 1 must be completed prior to the start of the first lab for all courses for which it is required. Students who fail the quiz will be required to repeat it and will not be permitted in any course where BIOSAFE 1BS0 is a requirement until the quiz has been successfully completed.

BIOTECHNOLOGY

Courses in Biotechnology are administered by the Bachelor of Technology Program. Engineering Technology Building (ETB), Room 121, ext. 20195

<http://mybtechdegree.ca>

Note

For the Four-Year Program, registration is only permitted for courses of the same level in which the student is registered, unless otherwise specified.

BIOTECH 2B03 - BIOTECHNOLOGY CONCEPTS

Basic elements of biotechnology. Proteins, enzymes, nucleic acids, DNA manipulation, cloning and recombinant technology, with applications in genetics, medicine and industry.

Three lectures, one lab (three hours); second term

Prerequisite(s): BIOTECH 2CB3, 2M03, and registration in level II or above of the Biotechnology Co-op (B.Tech.) program

Antirequisite(s): BIOTECH 2BE3

BIOTECH 2BC3 - BIOCHEMISTRY

Biochemistry and biotechnology; amino acids, nucleotides, nucleic acids, proteins, peptides, enzymes, carbohydrates, lipids, membranes and their functions, metabolism, gene expression and DNA.

Three lectures; one lab (three hours every other week); second term

Prerequisite(s): BIOTECH 2OC3, and registration in level II or above of the Biotechnology Co-op (B.Tech.) program

BIOTECH 2CB3 - CELL BIOLOGY

An introduction to basic living cell structure, functions, genetics and the fundamentals of metabolism.

Three lectures, one lab (three hours every other week); first term

Prerequisite(s): ENGTECH 1BI3, 1CH3, and registration in level II or above of the Biotechnology Co-op (B.Tech.) program

BIOTECH 2EC3 - CHEMICAL ENGINEERING CONCEPTS

Material balances: single and multi-unit systems with possible reactions. Energy balance: energy conservation including enthalpy calculations, steam tables, specific heats, phase changes, and reactions. Survey of momentum, heat and mass transfer; basics of chemical process design.

Three lectures, one lab (two and one half hours every other week); first term

Prerequisite(s): ENGTECH 1CH3, 1MT3, and registration in level II or above of the Biotechnology program.

Antirequisite(s): BIOTECH 3EC3

BIOTECH 2GT3 - GENETICS

This course covers the fundamentals of genetic studies including genes and genetic code, DNA, RNA and protein synthesis, cellular reproduction and human genetics.

Three lectures; second term

Prerequisite(s): ENGTECH 1BI3 and registration in level II or above of the Biotechnology program.

BIOTECH 2M03 - MOLECULAR BIOLOGY

Principles of molecular biology that form the basis nucleic acid and protein based methodologies. DNA replication, repair and recombination; bacterial and eukaryotic transcription and RNA processing; translation; and regulation of gene expression.

Three lectures, one lab (three hours); first term

Prerequisite(s): ENGTECH 1BI3, 1CH3, and registration in level II or above of the Biotechnology program.

BIOTECH 2MB3 - MICROBIOLOGY

An introduction to microbiological analysis with emphasis on use of microscopic techniques, staining, cultivation and control of microbial growth, enumeration, identification, potable water analysis, with environmental and industrial applications.

Three lectures, one lab (three hours); second term

Prerequisite(s): BIOTECH 2CB3, 2M03, and registration in level II or above of the Biotechnology Co-op (B.Tech.) program

BIOTECH 2OC3 - ORGANIC CHEMISTRY

This course covers a working knowledge of the major classes of organic compounds, including their physical and chemical properties. The laboratory introduces the techniques of organic synthesis and identification.

Three lectures, one lab (three hours); first term

Prerequisite(s): ENGTECH 1CH3, and registration in level II or above of the Biotechnology Co-op (B.Tech.) program

BIOTECH 3B03 - INDUSTRIAL BIOTECHNOLOGY

A continuation of Biotechnology I including a more in depth application of the recombinant technology and gene expression systems. Applications include microbial, plant, and animal biotechnology, bioremediation, cloning and stem cell technology.

Three lectures, one lab (three hours); first term

Prerequisite(s): BIOTECH 2B03, 2GT3, 2MB3, and registration in level III or above of the Biotechnology program.

BIOTECH 3BC3 - BIOPROCESS CONTROL AND DYNAMICS

Basic control theory and interfacing concepts, design of simple digital controllers, as applied to biological systems with emphasis on biosensors, bioreactors, neural physiology, and homeostasis.

Three lectures, one lab (three hours every other week); first term

Prerequisite(s): ENGTECH 1EL3, 2MA3, BIOTECH 2B03, 2EC3, and registration in level III or above of the Biotechnology Co-op (B.Tech.) program

BIOTECH 3BP3 - BIOREACTOR PROCESSES AND DESIGN

Overview of fermentation technology and bioprocessing, kinetics and thermodynamics of microbial processes. Mass transfer in immobilized systems. Analysis of batch and continuous processes, bioreactor design and analysis, operation and control, instrumentation, oxygen transfer, and scale up.

Four lectures, one lab (three hours); first term

Prerequisite(s): BIOTECH 2EC3, 3BC3, 3B03, and registration in level IV of the Biotechnology Co-op (B.Tech.) program

BIOTECH 3CM3 - COMPUTATIONAL MODELING OF BIOLOGICAL SYSTEMS

This course covers fundamental concepts of computational modeling and applying it to biological systems. Lab component will include programming language to explore/study biological systems.

Two lectures, one lab (two hours); first term

Prerequisite(s): ENGTECH 1CP3, 2MA3, and registration in level IV of Biotechnology Co-op (B.Tech.) program

BIOTECH 3FM3 - FOOD MICROBIOLOGY

An introduction to the microbiology of raw materials used in the manufacturing of food products. The course will review microbial growth and examine the types of microorganisms found in foods, the fermentation process in foods and food borne illness.

Three lectures, one lab (three hours every other week); first term

Prerequisite(s): BIOTECH 2CB3, 2MB3, and registration in level IV of the Biotechnology Co-op (B.Tech.) program

BIOTECH 3IV3 - IMMUNOLOGY AND VIROLOGY

Structure and function of antibodies, antibody diversity and interactions, immune system and immunity, immunological responses to disease, antibodies production and applications, structure of viruses, methods to study viruses, virus transcriptions and interactions.

Three lectures, one lab (three hours); first term

Prerequisite(s): BIOTECH 2MB3 and registration in level III or above of the Biotechnology Co-op (B.Tech.) program

BIOTECH 3PM3 - PHARMACOLOGY

Pharmacology topics include the nature of drugs, drug receptors, drug action, pharmacokinetics and pharmacodynamics. Topics on drug discovery include pre-clinical testing, clinical trials, manufacturing and patents.

Three lectures, one lab (three hours every other week); first term

Prerequisite(s): ENGTECH 1CH3, BIOTECH 2BC3, and registration in level IV of the Biotechnology program.

BIOTECH 4BI3 - BIOINFORMATICS

The course will familiarize students with the tools and principles of bioinformatics. A toolbox will be used to study access to genomic and proteomic data and data formats and analysis techniques.

Three lectures, one lab (three hours); first term

Prerequisite(s): BIOTECH 3CM3, 4GP3, ENGTECH 1CP3, 3ES3, 4EEO, and registration in level IV of the Biotechnology program.

BIOTECH 4BL3 - BIOMATERIALS AND BIOCOMPATIBILITY

Natural and synthetic biopolymers, and other materials for industrial and biomedical engineering applications: biocompatibility; tissue response to implants; inflammation; bioplastics, composites and applications.

Three lectures; second term

Prerequisite(s): BIOTECH 2BC3, 3B03, and registration in level IV of the Biotechnology Co-op (B.Tech.) program

BIOTECH 4BM3 - BIOPHARMACEUTICALS

An introduction to biopharmaceutical drug development and manufacture. Emphasis will include basic genetic engineering principles used in the development and large-scale manufacture of biopharmaceutical products.

Three lectures, one lab (three hours); second term

Prerequisite(s): BIOTECH 3B03, 3PM3, and registration in level IV of the Biotechnology program

BIOTECH 4BS3 - BIOTECHNOLOGY REGULATIONS

This course will familiarize students with current methods of laboratory safety and good lab and manufacturing practices in biotechnology; bioethics issues, benefits and risks of biotechnology applications; provincial, federal and international guidelines/regulations.

Three lectures; first term

Prerequisite(s): BIOTECH 3PM3, ENGTECH 4EE0, and registration in level IV of the Biotechnology program

BIOTECH 4GP3 - GENOMICS AND PROTEOMICS

This course examines genomics, functional genomics and proteomics. Topics covered are the organization of model system genomes, gene expression profiling at the mRNA and protein levels, microarrays, analyses of interactions, genomic and proteomic databases.

Three lectures, one lab (three hours); second term

Prerequisite(s): BIOTECH 2M03, 3B03, and registration in level IV of the Biotechnology Co-op (B.Tech.) program

BIOTECH 4TB3 - ADVANCED BIOTECHNOLOGY

This advanced course examines select topics of interest that reflect current methods utilized to produce new products and processes in the field of biotechnology. The course invites subject experts from various sectors of the biotech industry as guest lecturers.

Three lectures; first term

Prerequisite(s): BIOTECH 3B03, 4GP3, ENGTECH 4EE0, and registration in level IV of the Biotechnology Co-op (B.Tech.) program

BIOTECH 4TR1 - CAPSTONE PROJECT I

This course requires students to research, design, develop, and implement an independent project. The project plan and a model developed will be documented as a technical report and presented in a seminar.

One tutorial, one lab (two hours); second term

Prerequisite(s): BIOTECH 3BP3, 3FM3, 3PM3, GENTECH 3MT3, and registration in level IV of the Biotechnology Co-op (B.Tech.) program

BIOTECH 4TR3 - CAPSTONE PROJECT II

This course is a continuation of BIOTECH 4TR1 and it requires the students to conduct further research, modify/refine the project design, develop, and implement the independent project proposal submitted as a part of the Capstone Design Project I. The project will be documented as a technical report and presented in a seminar.

One tutorial, one lab (three hours); first term

Prerequisite(s): BIOTECH 4BL3, 4BM3, 4GP3, 4TR1, ENGTECH 4EE0, and registration in level IV of the Biotechnology program.

CAYUGA

Courses in Cayuga are administered by the Indigenous Studies Program.

LR Wilson Hall, Room 1811, ext. 23788

<https://indigenous.mcmaster.ca>

Courses

If no prerequisite is listed, the course is open.

CAYUGA 1Z03 - INTRODUCTION TO CAYUGA LANGUAGE AND CULTURE

This course will study the Cayuga language, in its spoken and written forms, in the context of Iroquoian cultural traditions, values, beliefs and customs.

CAYUGA 2Z03 - INTERMEDIATE CAYUGA

This course expands on the vocabulary and the oral skills for the Cayuga language. In addition, the course reviews the written component of the language.

CHEMICAL BIOLOGY

Courses in Chemical Biology are administered by the Department of Chemistry and Chemical Biology.

A.N. Bourns Science Building, Room 156, ext. 23490

<http://www.chemistry.mcmaster.ca>

Department Notes

1. CHEM 1AA3 is a prerequisite for CHEM 2E03 and CHEM 2E03 is a prerequisite for BIOCHEM 2EE3.
2. Students seeking permission and/or a seat authorization for a Chemistry or Chemical Biology course must submit an application for academic permission to the Department of Chemistry and Chemical Biology (advisor@chemistry.mcmaster.ca) well in advance of the start of the term.

Courses**CHEMBIO 2A03 - INTRODUCTION TO BIO-ANALYTICAL CHEMISTRY**

An introductory course covering basic principles of quantitative analysis of biological samples based on classical volumetric techniques and modern instrumental methods including spectroscopy and chromatography.

Three lectures, one lab; one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3 or ISCI 1A24 A/B; and registration in an Honours Chemical Biology, Honours Biochemistry, Honours Biology, Chemical Engineering, Honours Life Sciences or Honours Molecular Biology and Genetics program

Antirequisite(s): CHEM 2A03, 2AA3, CHEMBIO 2AA3

CHEMBIO 2L03 - PHARMACEUTICAL CHEMISTRY LABORATORY I: BIOMOLECULAR INTERACTIONS

Students will be introduced to the standard tools and techniques employed in Chemical Biology research.

One lecture, one lab (four hours), one tutorial; one term

Prerequisite(s): Registration in Honours Chemical Biology

CHEMBIO 20D3 - ORGANIC CHEMISTRY II

Fundamental reactions used to construct organic molecules, nucleophilic substitutions at carbonyl centres, biomolecules, and applications of spectroscopic techniques in organic chemistry. Emphasis on reaction mechanisms.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 20G3 or CHEMBIO 20G3; and registration in Honours Chemical Biology (B.Sc.)

Antirequisite(s): CHEM 20B3, 20D3, CHEMBIO 20B3

CHEMBIO 20G3 - ORGANIC CHEMISTRY I

Examines how structure affects properties and chemistry of organic molecules important for life, health, and advanced technologies. Includes fundamentals of reactions of functional groups, organic reaction mechanisms and spectroscopic techniques for structure determination.

Three lectures, one lab (four hours), one tutorial; one term

Prerequisite(s): CHEM 1AA3 or ISCI 1A24 A/B; and registration in Honours Chemical Biology (B.Sc.)

Antirequisite(s): CHEM 2E03, 20A3, 20C3, 20G3, CHEMBIO 20A3

Students with credit in CHEM 2E03 will forfeit credit upon completion of this course.

CHEMBIO 2P03 - PHYSICAL CHEMISTRY TOOLS FOR CHEMICAL BIOLOGY

Chemical thermodynamics and kinetics and their application to biological, chemical and environmental systems.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3; and one of MATH 1A03, 1LS3, 1X03, 1ZA3; or ISCI 1A24 A/B

Antirequisite(s): CHEM 2PD3, EARTHSC 2L03, 2Q03, ENVIRSC 2L03, PHYSICS 2H04

Cross-list(s): CHEM 2P03

Not open to students with credit or registration in ISCI 2A18 A/B.

CHEMBIO 2Q03 - INQUIRY FOR CHEMICAL BIOLOGY

Systematically investigate issues in Chemical Biology while developing skills in formulating and refining questions, searching and analyzing the scientific literature, and written and oral presentation.

Three lectures; one term

Prerequisite(s): Registration in Honours Chemical Biology

Antirequisite(s): CHEM 2Q03

CHEMBIO 3AA3 - ANALYTICAL TOOLS FOR CHEMICAL BIOLOGY

Modern instrumental bioanalytical techniques will be examined, including atomic and molecular spectroscopy, mass spectrometry and chromatography with emphasis on analytical design, data interpretation, and applications to biomedical, environmental, and food safety areas.

Three lectures; one term

Prerequisite(s): One of CHEM 2A03, 2AA3, CHEMBIO 2A03, 2AA3

Antirequisite(s): CHEM 3AA3

CHEMBIO 3BM3 - IMPLANTED BIOMATERIALS

An introduction to the chemistry of implantable biomaterials (metals, ceramics, plastics, elastomers) and the methods used to characterize their physical properties. The wound healing response following insult by an implanted foreign body will be examined, in order to understand the need to control synthetic biomedical interfaces. The regulatory approval process will also be discussed.

Three lectures; one term

Prerequisite(s): CHEM 1AA3 (or ISCI 1A24 A/B); and BIOLOGY 2B03 (or ISCI 2A18 A/B) or registration in an Honours Chemical Biology program; and one of CHEM 2E03, 20B3, 20D3, CHEMBIO 20B3, 20D3; or permission of the instructor

Cross-list(s): LIFESCI 3BM3

May be offered in alternate years. Offered in 2019-2020.

CHEMBIO 3EP3 A/B S - ADVANCED CHEMICAL BIOLOGY PLACEMENT

This placement course provides students with the opportunity to explore career options and integrate academics with a community, volunteer or professional experience. The student will complete an academic component in addition to the placement.

Students are responsible to arrange a suitable placement, obtain appropriate permission from both a placement and academic supervisor, and are required to submit an application to the Department of Chemistry and Chemical Biology thirty days prior to the date classes begin in each Term (see the Sessional Dates section

of this Calendar). More information and the application form can be found at <https://chemistry.mcmaster.ca/undergraduate/course-outlines/level-3-outlines.html>.

May be completed over one or two terms

Prerequisite(s): Credit or registration in SCIENCE 2C00; and completion of Level II of Honours Chemical Biology; and permission of the academic supervisor and the course coordinator (or designate)

CHEMBIO 3L03 - CHEMICAL BIOLOGY LABORATORY II

A research project will be formulated and addressed using the tools of Chemical Biology.

One lecture, one lab (four hours); one term

Prerequisite(s): Credit or registration in BIOSAFE 1BS0 (or HTHSCI 1BS0); and CHEMBIO 2L03

If not already completed, BIOSAFE 1BS0 must be completed prior to the first lab.

CHEMBIO 30A3 - ORGANIC MECHANISTIC TOOLS FOR CHEMICAL BIOLOGY

Chemistry and biology of primary metabolism. Synthesis, biosynthesis and degradation of carbohydrates, nucleotides, and proteins are compared and contrasted by studying reaction mechanisms and catalysis.

Three lectures, one lab; one term

Prerequisite(s): One of CHEM 20B3, 20D3, CHEMBIO 20B3, 20D3

CHEMBIO 30B3 - STRUCTURAL ELUCIDATION OF NATURAL PRODUCTS AND SMALL MOLECULES

Applications of spectroscopy detailing the use of NMR, MS, IR, and UV in determining structures of small molecules and biomolecules with a particular focus on natural products.

Three lectures; one term

Prerequisite(s): One of CHEM 20B3, 20D3, CHEMBIO 20B3, 20D3

May be offered in alternate years. Offered in 2019-2020.

CHEMBIO 3P03 - BIOMOLECULAR INTERACTIONS AND KINETICS

Principles of macromolecule-macromolecule and small molecule-macromolecule interactions, including ligands and drugs. Techniques for characterizing and quantifying biomolecular interactions in vitro and in vivo. Emerging technologies such as biological therapeutics as applied to pharmaco-dynamics and -kinetics.

Three lectures; one term

Prerequisite(s): CHEMBIO 2P03 or ISCI 2A18 A/B

CHEMBIO 3RP3 - RESEARCH PRACTICUM IN CHEMICAL BIOLOGY

A one term research project undertaken in a chemical biology laboratory during the fall, winter or summer term which requires the submission of a formal report. May be taken in preparation for a Level IV thesis or project.

Students are responsible to arrange a suitable research experience, obtain appropriate permission from both a placement and academic supervisor, and are required to submit an application to Department of Chemistry and Chemical Biology thirty days prior to the date classes begin in each Term (see the Sessional Dates in the Undergraduate Calendar). More information and the application form can be found at <https://chemistry.mcmaster.ca/undergraduate/course-outlines/level-3-outlines.html>.

Prerequisite(s): Completion of Level II of Honours Chemical Biology; and permission of the academic supervisor and the course coordinator (or designate)

Not to be taken concurrently with a Co-op work term.

CHEMBIO 4A03 - BIO-ANALYTICAL CHEMISTRY AND ASSAY DEVELOPMENT

Advanced separation and detection principles for high-throughput bio-assays for drug targets, as well as recent global analytical strategies for genomic, proteomic and metabolomic analyses.

Three lectures; one term

Prerequisite(s): CHEM 3AA3 or CHEMBIO 3AA3

Offered in alternate years. Not offered in 2019-2020.

CHEMBIO 4G12 A/B - SENIOR THESIS IN CHEMICAL BIOLOGY

A thesis-based on a major research project supervised by a member of the Department of Chemistry and Chemical Biology or on the list of acceptable supervisors. More information and the application form can be found at <http://www.chemistry.mcmaster.ca/contact/resources.html>.

Prerequisite(s): Registration in Level IV of Honours Chemical Biology and permission of the Department. Students are responsible for securing a suitable project supervisor, and are required to submit an application by March 31st of the academic year prior to registration. Students are expected to have a Grade Point Average of at least 9.5.

Antirequisite(s): CHEMBIO 4G03, CHEMBIO 4GG9, CHEMBIO 4RP6

Not open to students with credit or registration in ISCI 4A12 A/B.

CHEMBIO 4IB3 - BIO-INORGANIC CHEMISTRY

Inorganic elements and their behaviour in biological systems. Topics for study include metalloenzymes, bio-redox agents, transport proteins, biomimetic inorganic complexes, metallodrugs, and radiopharmaceuticals.

Three lectures; one term

Prerequisite(s): CHEM 3I13

Cross-list(s): CHEM 4IB3

Offered in alternate years. Offered in 2019-2020.

CHEMBIO 40A3 - NATURAL PRODUCTS

A description of basic building blocks and reaction mechanisms involved in the biosynthesis of naturally occurring compounds.

Three lectures; one term

Prerequisite(s): CHEM 30A3 or CHEMBIO 30A3

Cross-list(s): CHEM 40A3

CHEMBIO 40B3 - MEDICINAL CHEMISTRY: DRUG DESIGN AND DEVELOPMENT

Topics will include lead compound discovery strategies; high-throughput screening and 'in silico' screening; exploration of structure-activity relationships; drug targets and molecular mechanisms of drug action; strategies for drug optimization.

Three lectures; one term

Prerequisite(s): CHEM 30A3 or CHEMBIO 30A3

Offered in alternate years. Offered in 2019-2020.

CHEMBIO 4Q03 - PEER TUTORING IN CHEMICAL BIOLOGY OR CHEMISTRY

Provides students with theoretical and practical experience with teaching methods in Chemical Biology or Chemistry and focuses on effective presentation and scientific writing skills.

One lecture (three hours), tutorial (one hour); one term

Prerequisite(s): CHEM 2Q03 or CHEMBIO 2Q03 and permission of the instructor

CHEMBIO 4RP6 A/B S - RESEARCH PROJECT IN CHEMICAL BIOLOGY

A project supervised by a member of the Department of Chemistry and Chemical Biology or on the list of acceptable Supervisors. More information and the application form can be found at <http://www.chemistry.mcmaster.ca/contact/resources.html>.

Prerequisite(s): Registration in Level IV Honours Chemical Biology (B.Sc.) and permission of the Department. Students are responsible for securing a suitable project supervisor, and are required to submit an application by March 31st of the academic year prior to registration. Students are expected to have a Grade Point Average of at least 5.0.

Antirequisite(s): CHEMBIO 4G03, CHEMBIO 4GG9 A/B, CHEMBIO 4G12 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

CHEMICAL ENGINEERING

Courses in Chemical Engineering are administered by the Department of Chemical Engineering.

John Hodgins Engineering Building, Room 374, ext. 24957

<http://chemeng.mcmaster.ca>

Department Note

All Chemical Engineering courses are open to students registered in a Chemical Engineering program, subject to prerequisite requirements. Prior permission of the Department is necessary for students from other Engineering departments and other faculties.

CHEMENG 2D04 - CHEMICAL ENGINEERING PRINCIPLES I

Steady-state mass balances in chemical processes and the first law of thermodynamics. The behaviour of gases and liquids, and their physical equilibria. Recycle in steady state operation.

Four lectures, one tutorial (two hours); first term

Prerequisite(s): Registration in Level II or above of any Chemical Engineering program or permission from the department

CHEMENG 2E04 - NUMERICAL METHODS AND COMPUTING FOR CHEMICAL ENGINEERS

Formulation of first-principles and empirical models for various chemical processing applications at steady and unsteady states. Techniques for numerical solution of linear and nonlinear model equations. Techniques for numerical differentiation and integration of model equations and data sets.

Three lectures; one tutorial (two hours every week); first term

Prerequisite(s): MATH 1ZA3, 1ZB3, 1ZC3, registration or credit in CHEMENG 2D04, or permission from the department

Antirequisite(s): CHEMENG 3E04

CHEMENG 2F04 - CHEMICAL ENGINEERING PRINCIPLES II

Combined mass and energy balances in the steady and unsteady state. The second law of thermodynamics, physical/chemical equilibria and sustainability.

Four lectures, one tutorial (two hours); second term

Prerequisite(s): Registration or credit in CHEMENG 2D04 or permission from the department

CHEMENG 2G03 - PROBLEM SOLVING AND TECHNICAL COMMUNICATION

Developing awareness, strategies, creativity, analysis and interpersonal skills in the context of solving homework problems and preparing technical communications. Interpretation, retrieval manipulation and communication of information.

Three lectures; second term

Prerequisite(s): Registration in Level II or above of any Chemical Engineering program or permission from the department

CHEMENG 2004 - FLUID MECHANICS

The laws of statics and dynamics in both compressible and incompressible fluids. Equations of conservation and modern turbulence and boundary layer theory applied to submerged and conduit flow. Similitude, unsteady flow, measuring devices and fluid machinery.

Three lectures, one tutorial (three hours); second term

Prerequisite(s): Registration in a Chemical Engineering, Materials Science, Materials Engineering or Engineering Physics (Nuclear Engineering and Energy Systems Stream) program, or permission of the Department.

Co-requisite(s): One of CHEMENG 2F04, MATLS 2D03

Antirequisite(s): CHEMENG 3004

CHEMENG 3A04 - HEAT TRANSFER

Steady and unsteady conduction and convection, condensation and boiling. Understanding fundamentals behind heat exchangers, and finned arrangements. Numerical simulations of complex heat transfer systems.

Three lectures, one tutorial (two hours); first term

Prerequisite(s): CHEMENG 2F04, 2O04 (or 3O04), or registration in Level III or above in a Materials Engineering program, or permission of the department

Antirequisite(s): CHEMENG 2A04

CHEMENG 3BK3 - BIO-REACTION ENGINEERING

Kinetics of cellular processes, microbial processes and enzyme reactions including those of immobilized cells and enzymes. Cell culturing. Bioreactor design. Bioprocess development including downstream processing.

Three lectures; first term

Prerequisite(s): Registration in Level IV or above of any Chemical Engineering program or the Integrated Biomedical Engineering & Health Sciences (IBEHS) Program; or permission of the Department

CHEMENG 3BM3 - BIOSEPARATIONS ENGINEERING

Introduction to bioseparations engineering, cell disintegration, precipitation based separation processes, extraction, adsorption, chromatography, centrifugal separations, filtration, membrane based separation processes, electrophoresis.

Three lectures; second term

Prerequisite(s): Registration in Level IV or above of any Chemical Engineering Program, or Integrated Biomedical Engineering & Health Sciences (IBEHS) Program; or permission of the Department

CHEMENG 3D03 - CHEMICAL ENGINEERING THERMODYNAMICS

Review of the total energy balance, mechanical energy balance and thermodynamics of one component system. Chemical reaction and phase equilibria of multicomponent systems, with emphasis on non-ideality.

Three lectures, one tutorial; first term

Prerequisite(s): CHEMENG 2F04 or permission of the department

CHEMENG 3G04 - CHEMICAL PROCESS SYNTHESIS AND SIMULATION

Chemical process simulations including models for heat exchangers, separators, reactors, heat integration, pressure handling, energy conversion, and other unit operations. Using process simulations to solve problems related to chemical processing, energy and sustainability.

Three lectures, one tutorial (two hours); second term

Prerequisite(s): CHEMENG 2E04 (or 3E04), 2F04, 3D03, or permission from the department

CHEMENG 3I03 - DATA ACQUISITION AND ANALYSIS

Operational characteristics of physical and chemical sensors, statistics of sampling and analysis, measurement error and data acquisition theory. Measurement of pressure, temperature, flow, strain and voltage. Technical writing and communication.

Two lectures, one lab (three hours); first term

Prerequisite(s): Registration in Level III or above of any Chemical Engineering program or permission of the department

Antirequisite(s): CHEMENG 2I03

CHEMENG 3K04 - INTRODUCTION TO REACTOR DESIGN

Stoichiometry of multiple reactions, kinetics of homogeneous reactions, interpretation of batch data, design of ideal and non-ideal CSTR and plug flow reactors.

Three lectures; one tutorial (two hours); second term

Prerequisite(s): MATH 2Z03 and 2ZZ3, and registration or credit in CHEMENG 2F04, 2E04 (or 3E04) and 3D03, or permission of the Department

CHEMENG 3L02 - INTERMEDIATE LABORATORY SKILLS

Experiments and projects in heat transfer, thermodynamics, mass transfer and fluid mechanics with appropriate data analysis and report writing.

One lecture, one lab (three hours); second term

Prerequisite(s): CHEMENG 2O04 (or CHEMENG 3O04), 3D03 and credit or registration in CHEMENG 3A04 (or 2A04), or permission of the department

CHEMENG 3M04 - MASS TRANSFER AND STAGewise OPERATIONS

Stagewise operations, diffusion, mass transfer coefficients, distillation, differential contacting and absorption.

Three lectures, one tutorial (two hours); first term

Prerequisite(s): CHEMENG 2F04 or permission of the department

CHEMENG 3P04 - PROCESS CONTROL

Transient behaviour of chemical processes. Theory and practice of automatic control. Introduction to computer process control.

Three lectures, one tutorial (two hours); second term

Prerequisite(s): MATH 2Z03 and 2ZZ3; and credit or registration in CHEMENG 2E04 (or 3E04), 2O04 (or 3O04), 3A04 (or 2A04), 3K04, or permission of the department

Antirequisite(s): IBEHS 4A03

CHEMENG 3Q03 - INTRODUCTION TO POLYMER SCIENCE

An overview of important synthetic and natural polymers with emphasis on polymer structure, the chemistry of polymer formation. An introduction to polymer characterization, recycling and sustainability.

Three lectures; second term

Prerequisite(s): CHEM 2E03 or 2O03 and 2O03, or permission of the department

CHEMENG 4A03 - ENERGY SYSTEMS ENGINEERING

Cradle-to-grave overview of major gas, coal, nuclear, biomass, petroleum, solar, and wind energy resources, networks, and systems. Gasification, fuel cells, polygeneration, synthetic fuels, alternative fuels.

Two lectures; one tutorial (two hours); first term

Prerequisite(s): CHEMENG 3G04, or permission of the department

CHEMENG 4B03 - POLYMER REACTION ENGINEERING

Kinetics of polymerization: step-growth and chain-growth (free radical, anionic, anionic coordination and cationic). Polymerization processes: solution/bulk, suspension, emulsion, gas-phase, slurry and reactive processing. Principles of polymer process and reactor design, optimization and control.

Three lectures; first term

Prerequisite(s): CHEMENG 3K04 or permission of the department

CHEMENG 4E03 - DIGITAL COMPUTER PROCESS CONTROL

This course addresses key aspects of implementing control via discrete calculations using digital computers. Topics include discrete-time dynamic models, system identification, analysis of discrete-time systems, design of digital control systems and model predictive control.

Three lectures; first term

Prerequisite(s): CHEMENG 3P04 or permission of the department

CHEMENG 4G03 - OPTIMIZATION IN CHEMICAL ENGINEERING

Formulation of optimization programs for important engineering problems focusing on equipment design, economics, controls, operations, and scheduling. Solution methods and analysis of linear, nonlinear, and mixed-integer programs. Introduction to mathematical concepts of convexity and optimality conditions. Introduction to meta-heuristic optimization methods.

Two lectures, one tutorial (two hours); second term

Prerequisite(s): CHEMENG 2E04 (or 3E04), 3G04, 3P04 or permission of the department

CHEMENG 4H03 - BIG DATA METHODS AND MODELING IN CHEMICAL AND MATERIALS ENGINEERING

Review of multivariate statistics. Acquiring, interpreting and processing large data sets. Introduction to dimensional reduction techniques such as principal component analysis (PCA) and projection of latent structures (PLS). Introduction to data clustering methods. Chemical and materials engineering applications.

Three lectures; one term

Prerequisite(s): One of COMMERCE 2QA3, STATS 3Y03, MATLS 3J03 or HTHSCI 2A03 or permission of the department

CHEMENG 4K03 - REACTOR DESIGN FOR HETEROGENEOUS SYSTEMS

Catalytic kinetics, mass transfer limitations, packed and fluidized bed reactors, two phase reactors.

Three lectures; first term

Prerequisite(s): CHEMENG 3K04 or permission of the department

CHEMENG 4L02 - ADVANCED LABORATORY SKILLS

Experiments and projects in transport phenomena, reaction kinetics, reactor design and process control with appropriate data analysis and report writing.

One lab (three hours), one lecture; first term

Prerequisite(s): CHEMENG 3L02, 3K04, 3M04; and registration in Level IV or above of any Chemical Engineering program or permission of the department

CHEMENG 4M03 - INDUSTRIAL SEPARATION PROCESSES

Overview of industrial separation methods with focus on applications in the water and energy industries. Topics to be covered may include liquid-liquid extraction, adsorption, ion-exchange, sedimentation, filtration, and membrane technologies (ultrafiltration, reverse osmosis), with a particular emphasis on the fundamental phenomena and design principles for each topic.

Two lectures, one tutorial (two hours); first term

Prerequisite(s): CHEMENG 2004 (or 3004), CHEMENG 3M04 or permission of the department

CHEMENG 4N04 - ENGINEERING ECONOMICS AND PROBLEM SOLVING

Economic decision making with capital and operating cost estimation, taxation, depreciation, profitability, payback, net present value, interest rates and sensitivity analysis. Applications to design and operation of engineering systems, emphasizing safety, equipment performance, uncertainty, flexibility and troubleshooting. Students will work individually and in groups on problem-based projects.

Three lectures, one tutorial (two hours); first term

Prerequisite(s): CHEMENG 2004 (or 3004), 3K04, 3M04, 3P04, 3G04; registration in the final level of any Chemical Engineering program, or permission of the department

Antirequisite(s): ENGINEER 2B03

CHEMENG 4T03 - APPLICATIONS OF CHEMICAL ENGINEERING IN MEDICINE

Applications of chemical engineering principles to biological systems and medical problems including examples from hemodynamics, blood oxygenation, artificial kidney systems, controlled drug release, biosensors and biomaterials.

Three lectures; second term

Prerequisite(s): Registration in Level III or above in any engineering program or registration in Level IV or above in the Integrated Biomedical Engineering & Health Sciences (IBEHS) Program; or permission of the Department

CHEMENG 4TA3 A/B - ENGINEERING PRACTICUM

Mastery of core technical engineering skills with applications through student mentorship and teaching practicums. Demonstration of deeper understanding

through lecture design and presentation, assessment design, and course material development.

Two lectures (during first term), one practicum placement (during second term); both terms

Prerequisite(s): Registration in final level of any engineering program and permission of the instructor

CHEMENG 4W04 - CHEMICAL PLANT DESIGN AND CAPSTONE PROJECT

Projects, often in cooperation with industry, usually involve steady-state computer simulation of an existing process or design of a new process. Plant equipment may be tested to develop simulation models. Sustainability analysis is integral part of plant design.

Two lectures and two tutorials (two hours); second term

Prerequisite(s): Registration in the final level of any Chemical Engineering program, registration or credit in CHEMENG 4N04, or permission of the department

CHEMENG 4X03 - POLYMER PROCESSING

An introduction to the basic principles of polymer processing, stressing the development of models. Rheology of polymers, extrusion, molding, films, fibers, and mixing. Reactive processing.

Three lectures; second term

Prerequisite(s): One of CHEMENG 3A04 (or 2A04), MATLS 3E04 or MECHENG 3R03; and CHEMENG 2004 (or 3004) or MECHENG 3004, or permission of the department

CHEMENG 4Y04 A/B - SENIOR INDEPENDENT PROJECT

A research and design project with students working independently under the direction of a Faculty member.

Two labs (three hours); both terms. The hours assigned can be freely scheduled to suit those involved in a particular project and may include computation classes, laboratory work, discussions, or individual study.

Prerequisite(s): Registration in the final level of any Chemical Engineering program and a GPA of at least 9.5, or permission of the department

CHEMENG 4Z03 - INTERFACIAL ENGINEERING

The physics and chemistry at the 'nano' scale including interactions forces, colloids, surface active systems, wetting, adhesion, and flocculation.

Three lectures; second term

Prerequisite(s): Registration in final level of any Engineering program or permission of the department

CHEMISTRY

Courses in Chemistry are administered by the Department of Chemistry and Chemical Biology.

A.N. Bourns Science Building, Room 156, ext. 23490

<http://www.chemistry.mcmaster.ca/>

Department Notes

1. CHEM 1AA3 is a prerequisite for CHEM 2E03 and CHEM 2E03 is a prerequisite for BIOCHEM 2EE3.
2. Students seeking permission and/or a seat authorization for a Chemistry or Chemical Biology course must submit an application for academic permission to the Department of Chemistry and Chemical Biology (email: advisor@chemistry.mcmaster.ca) well in advance of the start of the term.

Courses

If no prerequisite is listed, the course is open.

CHEM 1A03 - INTRODUCTORY CHEMISTRY I

A discussion of chemical fundamentals, including bonding, structure, reactivity, and energetics, with emphasis on applications to health, energy, and the environment. Laboratories highlight hands-on experimental techniques; tutorials support the development of problem-solving skills.

Lectures, web modules (three hours), one lab (two and one half hours) every other week; one term

Prerequisite(s): Grade 12 Chemistry U and either registration in a Level I program in the Faculty of Science or Engineering I/Engineering I Co-Op, Arts & Science I, Health Sciences I, any program above Level I; or a grade of at least 80% in Grade 12 Chemistry U; or CHEM 1R03

Co-requisite(s): WHMIS 1A00 if not already completed, must be completed prior to the first lab.

Antirequisite(s): CHEM 1E03

Not open to students with credit or registration in ISCI 1A24 A/B.

CHEM 1AA3 - INTRODUCTORY CHEMISTRY II

A discussion of organic chemistry, chemical kinetics, acid-base equilibrium, and the energetics of phase transformations, with emphasis on relevant experimental techniques and solving real problems ranging from drug discovery to environmental chemistry.

Three lectures, one lab (two and one half hours) every other week; one term

Prerequisite(s): CHEM 1A03 or CHEM 1E03

Not open to students with credit or registration in ISCI 1A24 A/B.

CHEM 1E03 - GENERAL CHEMISTRY FOR ENGINEERING I

An introduction to chemical principles for Engineering students, including reactivity, bonding, structure, energetics and electrochemistry.

Three lectures, one lab (two and one half hours) every other week; one term

Prerequisite(s): Registration in a program in Engineering

Antirequisite(s): CHEM 1A03

Not open to students with credit or registration in ISCI 1A24 A/B.

CHEM 1R03 - GENERAL CHEMISTRY

A general introduction to chemistry, suitable for students without Grade 12 Chemistry U.

Three lectures, one tutorial; Winter term

Prerequisite(s): Grade 11 Chemistry SCH3U

Not open to students with 80% or higher in Grade 12 Chemistry U or with credit or registration in CHEM 1A03.

CHEM 2A03 - QUANTITATIVE CHEMICAL ANALYSIS

The art and science of performing quantitative analysis on samples based on classical volumetric techniques and modern instrumental methods including electrochemistry, optical spectroscopy, and chromatography.

Three lectures, one lab (three hours); one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3; or ISCI 1A24 A/B

Antirequisite(s): CHEM 2AA3, CHEMBIO 2A03, 2AA3

CHEM 2AA3 - QUANTITATIVE CHEMICAL ANALYSIS

The art and science of performing quantitative analysis on samples based on classical volumetric techniques and modern instrumental methods including electrochemistry, optical spectroscopy, and chromatography.

Three lectures; one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3; or ISCI 1A24 A/B

Antirequisite(s): CHEM 2A03, CHEMBIO 2A03, 2AA3

CHEM 2E03 - INTRODUCTORY ORGANIC CHEMISTRY

An introduction to the chemistry of monofunctional aliphatic compounds with emphasis on reactions and their mechanisms. Special topics will include synthetic and natural polymers.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3; or ISCI 1A24 A/B

Antirequisite(s): CHEM 20A3, 20C3, 20G3, CHEMBIO 20A3, 20G3

Students will forfeit credit in CHEM 2E03 if any of CHEM 20A3, 20C3, 20G3 or CHEMBIO 20A3, 20G3 are subsequently completed. Similarly, students with a program that requires CHEM 2E03 or 20A3 and 20B3 will forfeit credit in CHEM 20A3 if they subsequently complete CHEM 2E03.

CHEM 2E03 is not a prerequisite for further courses in Organic Chemistry.

CHEM 2I13 - INTRODUCTORY INORGANIC CHEMISTRY: STRUCTURE AND BONDING

The basic theories and models of bonding and structure that explain the combination of elements across the periodic table with primary emphasis on the main-group elements.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3; or ISCI 1A24 A/B

CHEM 2LB3 - TOOLS FOR CHEMICAL DISCOVERY I

Advanced techniques for synthesis and characterization of organic and inorganic molecules and materials, and the use of modern instrumentation in chemistry.

One lecture, two labs; one term

Prerequisite(s): Registration in an Honours Chemistry program

CHEM 20A3 - ORGANIC CHEMISTRY I

An introduction to organic chemistry with emphasis on the reactions of functional groups and an introduction to spectroscopic techniques for structure determination. Three lectures, one lab (three hours) every other week; one tutorial (one hour) every other week; one term

Prerequisite(s): ISCI 1A24 A/B; or CHEM 1A03 (or 1E03) and 1AA3 and registration in an Honours program; or CHEM 1A03 (or 1E03) and 1AA3 with a grade of at least C-; or CHEM 1A03 (or 1E03), 1AA3 and permission of the Department (see *Department Note 2*.)

Registration priority will be given to students for whom this course is a program requirement.

Antirequisite(s): CHEM 2E03, 20C3, 20G3, CHEMBIO 20A3, 20G3

Students with credit in CHEM 2E03 will forfeit credit upon completion of this course. Students who complete CHEM 20A3 and subsequently complete CHEM 2E03 will forfeit credit in CHEM 20A3.

Not open to students registered in Honours Chemical Biology.

CHEM 20B3 - ORGANIC CHEMISTRY II

Nucleophilic substitutions at carbonyl centres, aromatic chemistry, carbohydrates, applications of spectroscopic techniques in organic chemistry.

Three lectures, one lab (three hours) every other week; one tutorial (one hour) every other week; one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3 or ISCI 1A24 A/B; and one of CHEM 20A3, 20C3, 20G3, CHEMBIO 20A3, 20G3

Registration priority will be given to students for whom this course is a program requirement.

Antirequisite(s): CHEM 20D3, CHEMBIO 20B3, 20D3

Not open to students registered in Honours Chemical Biology.

CHEM 20D3 - SYNTHESIS AND FUNCTION OF ORGANIC MOLECULES

Fundamental reactions used to construct organic molecules, nucleophilic substitutions at carbonyl centres, biomolecules, and applications of spectroscopic techniques in organic chemistry. Emphasis on reaction mechanisms.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3; or ISCI 1A24 A/B; and CHEM 20G3

Antirequisite(s): CHEM 20B3, CHEMBIO 20B3, 20D3

CHEM 20G3 - STRUCTURE AND REACTIVITY OF ORGANIC MOLECULES

Examines how structure affects properties and chemistry of organic molecules important for life, health, and advanced technologies. Includes fundamentals of reactions of functional groups, organic reaction mechanisms and spectroscopic techniques for structure determination.

Three lectures, one lab (four hours), one tutorial; one term

Prerequisite(s): ISCI 1A24 A/B; or CHEM 1A03 (or 1E03) and 1AA3; and registration in an Honours program; or CHEM 1A03 (or 1E03) and 1AA3 with a grade of at least C-; or CHEM 1A03 (or 1E03), 1AA3 and permission of the Department (see *Department Note 2* above.)

Antirequisite(s): CHEM 2E03, 20A3, 20C3, CHEMBIO 20A3, 20G3

CHEM 2P03 - APPLICATIONS OF PHYSICAL CHEMISTRY

Chemical thermodynamics and kinetics and their application to biological, chemical and environmental systems.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3; and one of MATH 1A03, 1LS3, 1X03, 1ZA3; or ISCI 1A24 A/B

Antirequisite(s): EARTHSC 2L03, EARTHSC 2Q03, ENVIRSC 2L03, PHYSICS 2H04

Cross-list(s): CHEMBIO 2P03

Not open to students with credit or registration in ISCI 2A18 A/B.

CHEM 2PC3 - MATHEMATICAL TOOLS FOR CHEMICAL PROBLEMS

An introduction to vector calculus, differential equations and linear algebra - including solving linear equations, eigenvalues and eigenvectors - motivated by problems of chemical equilibrium and kinetics.

Three lectures, one tutorial; one term

Prerequisite(s): One of CHEM 2PD3, 2P03, EARTHSC 2L03, ENGINEER 2H03, ENVIRSC 2L03, ISCI 2A18 A/B, MATLS 2B03, PHYSICS 2H04; and one of MATH 1A03, 1LS3, 1X03, 1ZA3, ISCI 1A24 A/B; or permission of the Instructor

CHEM 2Q03 - INQUIRY FOR CHEMISTRY

Systematically investigate issues in Chemistry while developing skills in formulating and refining questions, searching and analyzing the scientific literature, and written and oral presentation.

Three lectures; one term

Prerequisite(s): Registration in Honours Chemistry (B.Sc.) or Honours Integrated Sciences (Chemistry Concentration)

Antirequisite(s): CHEMBIO 2Q03

CHEM 3AA3 - INSTRUMENTAL ANALYSIS

Modern instrumental analytical techniques will be examined, including atomic and molecular spectroscopy, mass spectrometry and chromatography with emphasis on analytical design and data interpretation.

Three lectures; one term

Prerequisite(s): One of CHEM 2A03, 2AA3, CHEMBIO 2A03, 2AA3

Antirequisite(s): CHEMBIO 3AA3

CHEM 3BC3 - BAD CHEMISTRY

Students will learn to identify, evaluate and construct an evidence-based stance on contentious products, or claims, in the media, or in society, on the basis of the chemistry behind them and communicate these arguments to scientific and general audiences.

Two lectures, one tutorial, one lab (three hours) twice per term; one term

Prerequisite(s): CHEM 1A03 (or 1E03), 1AA3 or ISCI 1A24 A/B; and registration in Level III or above

May not be offered every year.

CHEM 3EP3 A/B S - ADVANCED CHEMISTRY PLACEMENT

This placement course provides students with the opportunity to explore career options and integrate academics with a community, volunteer or professional experience. The student will complete an academic component in addition to the placement.

Students are responsible to arrange a suitable placement, obtain appropriate permission from both a placement and academic supervisor, and are required to submit an application to the Department of Chemistry and Chemical Biology thirty days prior to the date classes begin in each Term (see the Sessional Dates section of the Undergraduate Calendar). More information and the application form can be found at <https://chemistry.mcmaster.ca/undergraduate/course-outlines/level-3-outlines.html>.

May be completed over one or two terms

Prerequisite(s): Credit or registration in SCIENCE 2C00; and completion of Level II of Honours Chemistry; and permission of the academic supervisor and the course coordinator (or designate)

CHEM 3I03 - INDUSTRIAL CHEMISTRY

A systematic study of modern processes in the chemical industry, as well as their environmental impact and the role of emerging green chemistry technologies.

Three lectures; one term

Prerequisite(s): One of CHEM 2E03, 20B3, 20D3, CHEMBIO 20B3, 20D3; or registration in Level III or IV of a Chemical Engineering program

CHEM 3I3 - INTRODUCTION TO TRANSITION METAL CHEMISTRY

An introduction to transition metal chemistry, with focus on the relationships between structure, bonding, orbitals, properties, spectroscopy and applications.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 1AA3 or ISCI 1A24 A/B

CHEM 3LA3 - STRATEGIES FOR CHEMICAL DISCOVERY

An advanced laboratory course emphasizing the principles of chemical research, including synthesis, analysis, characterization, and application of organic, inorganic, and organometallic compounds. Exposes students to an array of advanced characterization techniques used in the modern chemical research laboratory.

One lecture, two labs; one term

Prerequisite(s): CHEM 2LB3

CHEM 30A3 - ORGANIC SYNTHESIS

A survey of contemporary organic synthesis, including functional group manipulations, use of protecting groups, and strategic carbon-carbon bond forming reactions. Applications involving multistep syntheses of complex organic molecules will be presented.

Three lectures; one term

Prerequisite(s): One of CHEM 20B3, 20D3, CHEMBIO 20B3, 20D3

May be offered in alternate years. Offered in 2019-2020.

CHEM 3PA3 - QUANTUM MECHANICS AND SPECTROSCOPY

An introduction to quantum chemistry and its applications in spectroscopy and structure and unusual phenomena at the nanoscale.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 2PC3; or MATH 1B03 and CHEM 1AA3 and one of MATH 1AA3, 1LT3, 1XX3, 1ZB3; or MATH 1B03 and ISCI 1A24 A/B

CHEM 3RC3 - RADIOISOTOPES IN MEDICINE

A systematic study of the use of radioactive isotopes and radiotracers in the physical and life sciences, including: radioisotope production; elucidating biochemical pathways using radiotracers; diagnostic radiopharmaceuticals in cancer and mental health care; and therapeutic radioisotopes and radiopharmaceuticals.

Three lectures

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3; or ISCI 1A24

Cross-list(s): LIFESCI 3RC3

CHEM 3RP3 - RESEARCH PRACTICUM IN CHEMISTRY

A one term research project undertaken in a chemistry laboratory during the fall, winter or summer term which requires the submission of a formal report. May be taken in preparation for a Level IV thesis.

Students are responsible to arrange a suitable research experience, obtain appropriate permission from both a placement and academic supervisor, and are required to submit an application to Department of Chemistry and Chemical Biology thirty days prior to the date classes begin in each Term (see the Sessional Dates in the Undergraduate Calendar). More information and the application form can be found at <https://chemistry.mcmaster.ca/undergraduate/course-outlines/level-3-outlines.html>.

Prerequisite(s): Completion of Level II of Honours Chemistry; and permission of the academic supervisor and the course coordinator (or designate)

Not to be taken concurrently with a Co-op work term.

CHEM 4AA3 - RECENT ADVANCES IN ANALYTICAL CHEMISTRY

Recent advances in analytical chemistry will include an introduction to chemometrics and multivariate analysis, as well as new developments in separation science and mass spectrometry.

Three lectures; one term

Prerequisite(s): CHEM 3AA3 or CHEMBIO 3AA3

Offered in alternate years. Offered in 2019-2020.

CHEM 4D03 - ORGANIC STRUCTURE AND SYNTHESIS

Application of spectroscopic methods to structure determination. Synthetic methodology in organic chemistry.

Three lectures; one term

Prerequisite(s): CHEM 30A3 or CHEMBIO 30A3

May be offered in alternate years. Offered in 2019-2020.

CHEM 4G12 A/B - SENIOR THESIS

A thesis based on a research project under the direction of a faculty member of the Department of Chemistry and Chemical Biology. More information and the application form can be found at <http://www.chemistry.mcmaster.ca/contact/resources.html>.

Occasional seminar/discussion; two terms

Prerequisite(s): Registration in Level IV of any Honours Chemistry program and a GPA of at least 6.0; or permission of the Department

Antirequisite(s): CHEM 4G09 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

CHEM 4IA3 - PHYSICAL METHODS OF INORGANIC STRUCTURE DETERMINATION

Structural methods such as multi-NMR, NQR, EPR, Mossbauer and vibrational spectroscopy are covered. Inquiry directed problems and topics illustrate applications in contemporary inorganic chemistry.

Three lectures, one tutorial; one term

Prerequisite(s): CHEM 2I13, 3I13

Offered in alternate years. Not offered in 2019-2020.

CHEM 4IB3 - BIO-INORGANIC CHEMISTRY

Inorganic elements and their behaviour in biological systems. Topics for study include metalloenzymes, bio-redox agents, transport proteins, biomimetic inorganic complexes, metallodrugs, and radiopharmaceuticals.

Three lectures; one term

Prerequisite(s): CHEM 3I13

Cross-list(s): CHEMBIO 4IB3

Offered in alternate years. Offered in 2019-2020.

CHEM 4IC3 - SOLID STATE INORGANIC MATERIALS: STRUCTURES, PROPERTIES, CHARACTERIZATION AND APPLICATIONS

Structure-property relationships that form the basis for the technological applications of non molecular inorganic solids, including oxides, metals and intermetallic compounds.

Three lectures; one term

Prerequisite(s): CHEM 2I13, 3I13

Offered in alternate years. Offered in 2019-2020.

CHEM 4II3 - TRANSITION METAL ORGANOMETALLIC CHEMISTRY AND CATALYSIS

Organometallic complexes and their reactivity, with a view towards catalyst design. An inquiry project is included.

Three lectures; one term

Prerequisite(s): CHEM 2I13, 3I13

May be offered in alternate years. Offered in 2019-2020.

CHEM 40A3 - NATURAL PRODUCTS

A description of basic building blocks and reaction mechanisms involved in the biosynthesis of naturally occurring compounds.

Three lectures; one term

Prerequisite(s): CHEM 30A3 or CHEMBIO 30A3

Cross-list(s): CHEMBIO 40A3

CHEM 40B3 - POLYMERS AND ORGANIC MATERIALS

Fundamentals of polymer structure, and the structure-property relationships that enable polymer applications in a wide array of products. Both traditional and modern polymerization methods are covered, with an emphasis on methods enabling the formation of advanced polymer architectures.

Three lectures; one term

Prerequisite(s): One of CHEM 20B3, 20D3, CHEMBIO 20B3, 20D3

May be offered in alternate years.

CHEM 4PB3 - COMPUTATIONAL MODELS FOR ELECTRONIC STRUCTURE AND CHEMICAL BONDING

Modern computational methods for studying atoms, molecules, and materials.

Three lectures; one term

Prerequisite(s): CHEM 3PA3 or PHYSICS 3MM3

CHEM 4RP6 A/B S - RESEARCH PROJECT IN CHEMISTRY

A project supervised by a member of the Department of Chemistry and Chemical Biology or on the list of acceptable Supervisors. More information and the application form can be found at <http://www.chemistry.mcmaster.ca/contact/resources.html>.

Prerequisite(s): Registration in Level IV Honours Chemistry (B.Sc.) and permission of the Department. Students are responsible for securing a suitable project supervisor, and are required to submit an application by March 31st of the academic year prior to registration. Students are expected to have a Grade Point Average of at least 5.0.

Antirequisite(s): CHEM 4G09 A/B, CHEM 4G12 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

CHEM 4W03 - NATURAL AND SYNTHETIC MATERIALS

The microscopic origins of the macroscopic properties of materials including soft polymer and biological systems.

Three lectures; one term

Prerequisite(s): CHEM 2PB3, CHEMBIO 2P03 or CHEM 2P03

Antirequisite(s): CHEM 3PB3

May be offered in alternate years.

CHINESE

Chinese 1Z06 is administered by the Department of Linguistics and Languages.
Togo Salmon Hall, Room 629, ext. 24388

<http://linguistics.humanities.mcmaster.ca/>

Course

If no prerequisite is listed, the course is open.

CHINESE 1Z06 A/B - MANDARIN CHINESE FOR BEGINNERS

An intensive beginner's course in modern standard (Mandarin) Chinese designed for students with no prior knowledge of the language. The focus is on developing proficiency in the skills of listening, speaking, reading and writing. In addition to general knowledge about China and Chinese culture, students will be exposed to some basic Chinese script.

Four hours; two terms

Not open to native speakers of Chinese or to students with credit in Grade 12 U or M equivalent.

CIVIL ENG INFRASTRUCTURE TECH

Courses in Civil Engineering Infrastructure Technology are administered by the Bachelor of Technology Program.

Engineering Technology Building (ETB), Room 121, ext. 20195

<http://mybtechdegree.ca>

CIVTECH 3GE3 - GEOTECHNICAL MATERIALS AND ANALYSIS

Composition of soils, soil identification and classification; compaction; seepage theory; effective stress concept; stresses and displacements using elastic solutions; consolidation theory and settlement.

Two lectures, one lab; one term

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 3GT3 - GEOTECHNICAL DESIGN

Shear strength characteristics and failure criteria for soils; direct shear, triaxial, plane strain and field tests; earth pressure theory; bearing capacity theory; slope stability and embankment analysis; borehole testing and interpretation.

Two lectures, one lab; one term

Prerequisite(s): CIVTECH 3GE3, ENGTECH 3ML3, and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 3PM3 - HIGHWAY DESIGN, CONSTRUCTION, AND MAINTENANCE

Geometric design. Horizontal and vertical alignment, and intersections. Aggregates and soils, asphalt and Portland cement concrete; design of bituminous mixtures; pavement rehabilitation; distress mechanisms; construction techniques; preventative measures.

Three lectures; one term

Prerequisite(s): CIVTECH 3GE3, ENGTECH 3ML3, and registration in Civil Engineering Infrastructure Technology

CIVTECH 3SA3 - STRUCTURAL ANALYSIS

Structural analysis and modelling of linear elastic truss, beam and frame structures; analysis of determinate and indeterminate structures; matrix stiffness method of analysis.

Three lectures; one term

Prerequisite(s): ENGTECH 3ML3 and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 3TP3 - TRANSPORTATION PLANNING AND MODELLING

Fundamental theories and applications of transportation planning and modelling; short and long range transportation planning; traffic impacts of land development; trip generation and gravity models; software applications.

Two lectures, one lab; one term

Prerequisite(s): ENGTECH 3ST3 and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 4BC3 - BUILDING SCIENCE

Formerly CIVTECH 3BC3.

Topics include building science theory, heat, air and moisture transfer, building envelope, roofing and green roofs, sustainability considerations, assessment, durability, performance, LEED design, codes and regulations.

Three lectures; one term

Prerequisite(s): ENGTECH 3SP3, 4TF3, and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 4BD3 - BRIDGE DESIGN, MAINTENANCE AND REPAIR

Bridge elements, structural forms, design loads and required concrete and steel properties. Causes and mechanisms of damage in bridges and of methods of damage detection and assessment. Effective repair materials and techniques and maintenance strategies.

Three lectures; one term

Prerequisite(s): CIVTECH 4RC3 or 4SD3; and registration in the Civil Engineering Infrastructure Technology Co-op (B.Tech.) program
CIVTECH 4RC3 or 4SD3 may be taken concurrently with this course.

CIVTECH 4LU3 - ADVANCED LAND USE PLANNING

Formerly CIVTECH 3LU3.

Management of land use; land development and redevelopment processes; infrastructure requirements; land redevelopment; principles and practices of land use planning, legislation and regulations; public consultation; GIS applications.

Three lectures; one term

Prerequisite(s): GENTECH 4SE3 and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 4MH3 - HYDRAULIC ENGINEERING

Fluid mechanics applications in civil engineering. Topics include; flow in open channels, hydraulic jump, weirs and spillways, forces on immersed bodies, pumps in series/parallel and fluid measurements.

Three lectures; one term

Prerequisite(s): One of CIVTECH 3FM3, ENGTECH 4TF3, and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 4RC3 - REINFORCED CONCRETE AND MASONRY DESIGN

Formerly CIVTECH 3RC3.

Design by limit states methods to ensure adequate capacities for bending moment, shear and diagonal tension, axial force; and design to satisfy serviceability requirements.

Three lectures; one term

Prerequisite(s): CIVTECH 3SA3, and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 4SD3 - STRUCTURAL STEEL DESIGN

Limit states design methods to ensure capacities for bending moment, shear and diagonal tension, axial force; serviceability requirements; failure analysis for common structural materials.

Three lectures; one term

Prerequisite(s): CIVTECH 3SA3 and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 4UM3 - ASSET MANAGEMENT

Formerly CIVTECH 3UM3.

Introduction to utilities products and networks. Planning and management tools for infrastructure, including inventory management, needs assessment, demand management and investment decisions.

Three lectures; one term

Prerequisite(s): GENTECH 3EE3 and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.)

CIVTECH 4WT3 - MUNICIPAL AND ENVIRONMENTAL ENGINEERING

Formerly CIVTECH 3WT3.

Design, maintenance and rehabilitation of municipal water systems. This includes drinking water distribution systems, sewage and rainwater collection, management and pumping. Land development and population forecasting as it relates to water and wastewater demand.

Three lectures; one term

Prerequisite(s): ENGTECH 4TF3 and registration in Civil Engineering Infrastructure Technology

CIVIL ENGINEERING

Courses in Civil Engineering are administered by the Department of Civil Engineering, John Hodgins Engineering Building, Room 301, ext. 24287 or 24315

<http://www.eng.mcmaster.ca/civil>

Department Notes

- All Civil Engineering courses are open to students registered in a civil engineering program, subject to prerequisite requirements. Prior permission of the Department is necessary for students from other engineering departments and other faculties.
- Unless otherwise stated, the duration and the frequency of activities are as follows:
 - one lecture consists of one hour each week
 - one tutorial consists of two hours each week
 - one lab consists of three hours each week

CIVENG 2A03 - SURVEYING AND MEASUREMENT

Introduction to measurement and computational techniques of surveying, the theory of measurement and errors, adjustment of observations; laboratory measurement and instrumentation; formal Civil Engineering drawings, interpretation, and communication of information.

Two lectures, one tutorial or one lab; first term

CIVENG 2B04 - PRINCIPLES OF ENVIRONMENTAL ENGINEERING

Fundamentals of reaction kinetics; mass and energy balances; reactor theory; ecological systems; water quality; water and wastewater treatment; sustainability; and climate change.

Three lectures, one tutorial or one lab; first term

Prerequisite(s): Registration in Level II Engineering or permission of the department

CIVENG 2C04 - STRUCTURAL MECHANICS

Review of stress/strain state and strain-displacement relations; plastic deformations and residual stresses due to axial loading and bending; torsion of noncircular and thin-walled sections; unsymmetric bending and eccentric axial loading, shear stresses and unsymmetric loading of thin-walled members; transformation of stress and strain; stress/strain invariants; yield and fracture criteria energy methods; stability of columns.

Three lectures, one tutorial or one lab; second term

Prerequisite(s): Credit or registration in CIVENG 2P04

Antirequisite(s): MECHENG 3A03

CIVENG 2E03 - COMPUTER APPLICATIONS IN CIVIL ENGINEERING

Numerical techniques including error analysis, root finding, linear algebraic equations, curve fitting, integration and differentiation, ordinary differential equations; sensitivity analysis; use of several software packages for numerical analysis; civil engineering applications.

Two lectures, one lab or one tutorial; first term

Prerequisite(s): Credit or registration in CIVENG 2P04

CIVENG 2I03 - COMMUNICATIONS IN CIVIL ENGINEERING

Oral and written communication in context of civil engineering activity. A professional liaison program involving site visits.

Two lectures, one tutorial (three hours); first term

Not open to students registered in an Integrated Biomedical Engineering & Health Sciences (IBEHS), Engineering and Management or Engineering and Society program.

CIVENG 2J04 - PRINCIPLES OF GEOLOGICAL AND GEO-ENVIRONMENTAL ENGINEERING

Principles of geological engineering and hydrologic engineering; Composition of 'earth'; processes that operate on or beneath the surface; fundamentals of: groundwater flow, monitoring, and sampling, contaminant movement in aquifers, solid waste management, hazardous waste management and remediation.

Three lectures, one tutorial or one lab; second term

Prerequisite(s): Credit or registration in CIVENG 2B04

Antirequisite(s): EARTHSC 3U03, ENVIRSC 3U03, GEOG 3U03

CIVENG 2004 - FLUID MECHANICS

Fluid properties; hydrostatics; continuity, momentum and energy equations; potential flow; laminar and turbulent flow; flow in closed conduits, transients, open channel flow; hydraulic cross-sections.

Three lectures, one tutorial or one lab; second term

Prerequisite(s): Credit or registration in CIVENG 2P04; and credit or registration in MATH 2Z23 and MATH 2Z03

Antirequisite(s): MECHENG 3004

CIVENG 2P04 - STATICS AND MECHANICS OF MATERIALS

Principles of statics as applied to rigid bodies. Internal forces, shear and bending moment diagrams, Stress and strain, elastic behaviour of simple members under axial force, torsion, bending and traverse shear. Principal stresses.

Three lectures, one tutorial; first term

Prerequisite(s): PHYSICS 1D03 and registration in Level II or above of Civil Engineering program

Antirequisite(s): MECHENG 2P04, ENGINEER 2P04

CIVENG 2Q03 - ENGINEERING MECHANICS: DYNAMICS

Kinematics and dynamics of particles and rigid bodies. Motion with respect to a rotating frame of reference. Work, energy and momentum principles; introduction to mechanical vibrations, free and forced vibrations.

Two lectures, one tutorial; second term

Prerequisite(s): Credit or registration in CIVENG 2P04

Antirequisite(s): MECHENG 2Q04, 2Q04

CIVENG 3A03 - GEOTECHNICAL ENGINEERING I

Composition of soils, soil identification and classification; compaction; seepage theory; effective stress concept; stresses and displacements using elastic solutions; consolidation theory; numerical solutions.

Two lectures, one tutorial or one lab; first term

Prerequisite(s): CIVENG 2J04

CIVENG 3B03 - GEOTECHNICAL ENGINEERING II

Shear strength characteristics and failure criteria for soils; direct shear, triaxial, plane strain and field tests; earth pressure theory; bearing capacity theory; slope stability and embankment analysis.

Two lectures, one tutorial or one lab; second term

Prerequisite(s): Credit or registration in CIVENG 3A03

CIVENG 3C03 - ENGINEERING SYSTEMS

Mathematical models and systems; optimization; linear, nonlinear and dynamic programming; simulation modelling.

Two lectures, one tutorial; first term

Prerequisite(s): Registration in Level III or above of any Engineering program

CIVENG 3G04 - STRUCTURAL ANALYSIS

Structural analysis and modelling of linear elastic truss, beam and frame structures; stress resultants and deformations of statically determinate structures; methods for analysis of indeterminate structures; stiffness matrix method; plane frame computer analysis.

Three lectures, one tutorial; first term

Prerequisite(s): CIVENG 2C04 and CIVENG 2P04

CIVENG 3J04 - REINFORCED CONCRETE DESIGN

Design by limit states methods to ensure adequate capacities for bending moment, shear and diagonal tension, axial force, bond and anchorage; and design to satisfy serviceability requirements for deflection and cracking; practical design requirements; interpretation of building code for behaviour of structures.

Three lectures, one tutorial or one lab; second term

Prerequisite(s): Credit or registration in CIVENG 3G03 or 3G04, 3P03 or 3P04

CIVENG 3K03 - INTRODUCTION TO TRANSPORTATION ENGINEERING

A transportation impact study serves as the focus for group projects, and provides the context for application of material on traffic flow characteristics, capacity and control for signalized and unsignalized intersections, and travel demand forecasting. Safety; social impacts.

Two lectures, one tutorial; first term

Prerequisite(s): Registration in Level III or above of any Engineering program

CIVENG 3L03 - WATER QUALITY

Physical, chemical and biological characteristics of water; stoichiometry; thermodynamics; acid/base chemistry; carbonate system; nitrogen and phosphorus cycles; mathematical modeling of physical systems; water quality standards.

Two lectures, one tutorial or one lab; second term

Prerequisite(s): Credit or registration CHEMENG 2D04 or CIVENG 2B04

CIVENG 3M03 - MUNICIPAL HYDRAULICS

Analysis/design of water distribution networks; analysis and design of wastewater collection systems; pumps; surface and groundwater supplies.

Two lectures, one tutorial; second term

Prerequisite(s): CIVENG 2O04; and credit or registration in either STATS 3J04 or IBEHS 4C03

CIVENG 3P04 - CIVIL ENGINEERING MATERIALS AND DESIGN

Characteristics, behaviour and use of Civil Engineering materials: concrete, metals, wood, and composites; Physical, chemical and mechanical properties; Quality control and material tests; Concepts of Structural design, limit states design, estimation of structural loads.

Three lectures, one tutorial or one lab; first term

Prerequisite(s): CIVENG 2C04, MATLS 1M03

CIVENG 3RR3 - ENGINEERING ECONOMICS AND PROJECT MANAGEMENT

Introduction to fundamental concepts of project management and construction industry: Project and project management overview; construction industry and project; project participants; project chronology; construction contracts and delivery methods; project estimating; construction planning and scheduling; project control; introduction to Engineering Economics: engineering decision making; time value of money; value engineering; cash flow analysis; and comparison methods. Two lectures, one tutorial; second term

Prerequisite(s): Registration in Level III or above of a Civil Engineering program

Antirequisite(s): ENGINEER 2B03, 4B03

Not open to students registered in an Integrated Biomedical Engineering & Health Sciences (IBEHS) or Engineering and Management program.

CIVENG 4A04 - ENGINEERING HYDROLOGY

Hydrologic cycle; climate; hydraulic and hydrologic processes, precipitation; unit hydrographs; hydrologic statistics, hydrologic routing; introduction to groundwater flow.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3M03

CIVENG 4BP4 - BUILDING SCIENCE

Building science theory, heat, air and moisture transfer, building envelope, building systems, energy consumption, sustainability considerations, LEED design.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3P04 or registration in Level IV or above in the Integrated Biomedical Engineering & Health Sciences (IBEHS) program

CIVENG 4CM4 - CONSTRUCTION ENGINEERING AND MANAGEMENT

Fundamental concepts of construction engineering and management; advanced scheduling techniques; scheduling linear projects; improving schedules; time-cost trade-offs; and resource allocation and leveling. The course also covers heavy construction equipment and methods including safety, productivity estimation, earthmoving materials and operations, excavation and lifting, and loading and hauling. The materials of the course would be supplemented by visits to construction projects.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3RR3, or registration in level IV or above in the Integrated Biomedical Engineering & Health Sciences (IBEHS) or Engineering and Management programs

CIVENG 4DD4 - STRUCTURAL DYNAMICS AND SEISMIC DESIGN

Introduction to linear elastic structural dynamics including single and multi degree-of-freedom systems. Introduction to seismic design philosophy including capacity design, ductility, and collapse mechanisms. Design, detailing, and analysis of selected lateral force resisting systems will be covered using current design codes.

Three lectures, two tutorial; one term

Prerequisite(s): CIVENG 3G04 and CIVENG 3J04 and credit or registration in CIVENG 4N04

Antirequisite(s): CIVENG 4ED4, 4SD4

CIVENG 4G04 - PAVEMENT MATERIALS AND DESIGN

Components of highway pavements; ground water and drainage for highway facilities; soil compaction and stabilization; aggregates; bituminous materials; asphalt mix design; flexible and rigid pavement design; embankment design.

Three lectures, one tutorial or one lab; one term

Prerequisite(s): CIVENG 3B03

CIVENG 4K04 - MODERN METHODS OF STRUCTURAL ANALYSIS

Stiffness method; development and applications in structural analysis. Introduction to finite element method. Influence lines, elastic stability analysis of frames with and without sway effects. Application of computer programs.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3G03 or CIVENG 3G04

CIVENG 4L04 - DESIGN OF WATER RESOURCES SYSTEMS

Investigation, planning, analysis and design of water resources systems, climate change. Introduction to GIS tools. Frequency analysis, design storms, urban drainage and analysis, floodplain analysis and flood control.

Two lectures, one tutorial, one lab; one term

Prerequisite(s): CIVENG 3M03

CIVENG 4N04 - STEEL STRUCTURES

Introduction to design in steel, tension and compression members, plate buckling aspects, beam instability, beam design, beam-columns, bolted and welded connections. Applications employing steel structures building code.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3G03 or 3G04, 3P04

CIVENG 4S04 - FOUNDATION ENGINEERING

Principles of foundation design; stability analysis; bearing capacity, settlement and location, footings, deep foundations, piles, pile groups and drilled piers; retaining walls.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3B03

CIVENG 4T04 - TRANSIT MODELLING AND INTELLIGENT TRANSPORTATION SYSTEMS

Introduction to advanced traffic signal modelling, basic Transit Engineering concepts and Intelligent Transportation Systems.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3K03

CIVENG 4TA4 - TRAFFIC ANALYSIS: THEORY AND SIMULATION

Traffic operation and transportation network analysis, including traffic studies, traffic flow models, shockwave analysis, advanced analysis of signalized intersections, capacity and level of service analysis, and road network simulation.

Three lectures, one tutorial, one lab; one term

Prerequisite(s): CIVENG 3K03

CIVENG 4V04 - BIOLOGICAL ASPECTS OF WASTEWATER TREATMENT

Microbial kinetics and cell yield in biological wastewater treatment; conventional activated sludge systems; models of activated sludge systems; aeration systems; sedimentation; membrane bioreactors; biological nutrient removal; sequential batch reactors; biosolids treatment, including sludge thickening, anaerobic digestion and dewatering; attached growth reactors, including trickling filters, rotation disk contactors and fluidized bed reactors.

Three lectures, one tutorial or one lab; one term

Prerequisite(s): CIVENG 3L03 or CHEMENG 2D04 or registration in Level IV or above in the Integrated Biomedical Engineering & Health Sciences (IBEHS) program or permission of the department

Antirequisite(s): ENGINEER 4U03

CIVENG 4W04 - DESIGN OF LOW RISE BUILDINGS

Structural systems and load distribution, design of masonry, wood, and cold-formed steel. Introduction to building envelope design.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3J04, CIVENG 3G03 or 3G04 and credit or registration in CIVENG 4N04

CIVENG 4X06 A/B - DESIGN AND SYNTHESIS PROJECT IN CIVIL ENGINEERING

Capstone project supervised by faculty members in civil engineering, involving design and synthesis that reinforces concepts from structural and/or municipal engineering. Exposure to elements of teamwork, sustainability, social responsibility and project management.

Three lectures, two hours of design studio; both terms

Prerequisite(s): CIVENG 3G03 or CIVENG 3G04, CIVENG 3L03, CIVENG 3J04 and registration in a final level of a Civil Engineering program or permission from the Department

Co-requisite(s): CIVENG 4N04

CIVENG 4Y04 - BRIDGES AND OTHER STRUCTURAL SYSTEMS

Bridge loads and analysis for load effects. Design of (steel beam - concrete slab) composite floor system and steel plate girders. Stresses, ultimate strength, and design of pre-stressed concrete girders. Fatigue Design.

Three lectures, one tutorial; one term

Prerequisite(s): CIVENG 3G03 or 3G04, 3J04 or registration in CIVENG 4N04

CIVENG 4Z04 A/B S - INDEPENDENT STUDY

An experimental and/or analytical investigation related to any branch of civil engineering, under the direction of a faculty member. Students choose a project from a list of department approved projects. The student may be required to present a seminar and will submit a final written report before April 1.

Two labs (three hours); both terms; the hours assigned can be freely scheduled to suit those involved in a particular project and may include computation classes, laboratory work, discussion or individual study

Prerequisite(s): Registration in a final level of a Civil Engineering program, and a SA of at least 9.5 or permission by the Department

CLASSICS

Courses in Classics are administered by the Department of Classics.

Togo Salmon Hall, Room 706, ext. 24311

<http://classics.humanities.mcmaster.ca/>

No language other than English is required for courses listed under Classics.

Department Note

The following courses are available as electives to qualified students in any program:

a. Classical Archaeology and Art History

- CLASSICS 1A03 - Introduction to Classical Archaeology
- CLASSICS 2B03 - Greek Art
- CLASSICS 2C03 - Roman Art
- CLASSICS 3H03 - Archaic Greek Art
- CLASSICS 3Q03 - Greek Sanctuaries
- CLASSICS 3S03 - Pompeii, Herculaneum, and Ostia

b. Ancient History and Society

- CLASSICS 1M03 - History of Greece and Rome
- CLASSICS 2K03 - The Society of Greece and Rome
- CLASSICS 2LA3 - History of Greece to the Peloponnesian War
- CLASSICS 2LB3 - History of Greece from the Peloponnesian War
- CLASSICS 2LC3 - History of Rome to the Dictatorship of Caesar
- CLASSICS 2LD3 - History of Rome from the Dictatorship of Caesar

c. Classical Literature in Translation

- CLASSICS 1B03 - An Introduction to Ancient Myth and Literature
- CLASSICS 2D03 - Greek and Roman Mythology
- CLASSICS 2E03 - The Ancient World in Film

- CLASSICS 2YY3 - Greek Tragedy
- CLASSICS 3EE3 - The Greek Historians
- CLASSICS 3ER3 - Epics of Rome
- CLASSICS 3M03 - Greek Intellectual Revolution
- CLASSICS 3YY3 - Ovid

d. **Classical Languages**

- GREEK 1Z03 - Beginner's Intensive Ancient Greek I
- GREEK 1ZZ3 - Beginner's Intensive Ancient Greek II
- LATIN 1Z03 - Beginner's Intensive Latin I
- LATIN 1ZZ3 - Beginner's Intensive Latin II

Courses

If no prerequisite is listed, the course is open.

See also courses in *Greek* and *Latin*.

CLASSICS 1A03 - INTRODUCTION TO CLASSICAL ARCHAEOLOGY

A study of the history and methodology of Greek and Roman archaeology illustrated with materials from excavated sites.

Three lectures; one term

CLASSICS 1B03 - AN INTRODUCTION TO ANCIENT MYTH AND LITERATURE

A study of Greek and Roman mythology and literature. Texts such as Homer, Virgil and Greek tragedies will be read in translation.

Two lectures, one tutorial; one term

CLASSICS 1M03 - HISTORY OF GREECE AND ROME

The history of Greece and Rome from the bronze age to the fall of Rome based on literary, documentary and archaeological evidence.

Two lectures, one tutorial; one term

Cross-list(s): HISTORY 1M03

CLASSICS 2B03 - GREEK ART

The architecture, sculpture and painting of the Greek and Hellenistic world.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Cross-list(s): ARTHIST 2B03

CLASSICS 2C03 - ROMAN ART

The architecture, sculpture, and painting of the Roman world.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Cross-list(s): ARTHIST 2C03

CLASSICS 2D03 - GREEK AND ROMAN MYTHOLOGY

A study of the myths of Greek and Roman gods and heroes, their explanation according to theories on the nature of myths, and their use by Greek and Roman authors, particularly Homer and Virgil.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Offered on rotation.

CLASSICS 2E03 - THE ANCIENT WORLD IN FILM

The emphasis is on myth (Amazons, Hercules) and history (slave revolts, banquets, decadent emperors), studied via Greek and Latin accounts (in translation) and cinematic versions (e.g. Electra, Medea, Mighty Aphrodite, Apocalypse Now, Spartacus, I Claudius).

Two lectures, plus one weekly film screening; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CMST 2Y03, THTRFLM 2G03

Offered on rotation.

CLASSICS 2K03 - THE SOCIETY OF GREECE AND ROME

An examination of selected aspects of the social life of Greece and Rome. Attention will be given to subjects such as work and leisure, war and the warrior, slavery, marriage and family, and the role of women.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): HISTORY 2K03

Offered on rotation.

CLASSICS 2LA3 - HISTORY OF GREECE TO THE PELOPONNESIAN WAR

Greece from the rise of the city-state to the Peloponnesian War, with particular attention to political, social and cultural development in the light of literary and archaeological evidence.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): HISTORY 2LA3

Alternates with CLASSICS 2LC3.

CLASSICS 2LB3 - HISTORY OF GREECE FROM THE PELOPONNESIAN WAR

Greece from the Peloponnesian War to the coming of Rome, with particular attention to political, social and cultural development in the light of literary and archaeological evidence.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): HISTORY 2LB3

Alternates with CLASSICS 2LD3

CLASSICS 2LC3 - HISTORY OF ROME TO THE DICTATORSHIP OF CAESAR

Rome from its early development to the dictatorship of Caesar, with particular attention to the political, military and social developments in the light of literary and archaeological evidence.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): HISTORY 2LC3

Alternates with CLASSICS 2LA3.

CLASSICS 2LD3 - HISTORY OF ROME FROM THE DICTATORSHIP OF CAESAR

Rome from the dictatorship of Caesar to Late Antiquity, with particular attention to the political, military and social developments in the light of literary and archaeological evidence.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): HISTORY 2LD3

Alternates with CLASSICS 2LB3

CLASSICS 2LW3 - ANCIENT LAW

An overview of the law and legal systems of the ancient world, from Mesopotamia, ancient Israel, Greece, and Rome. Themes may include notions of justice, legal status, family law, property law, delict, injury and crime.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): HISTORY 2LW3

Offered in alternate years.

CLASSICS 2MT3 - ANCIENT ROOTS OF MEDICAL TERMINOLOGY

This course presents Greek and Latin roots out of which is built the vocabulary of contemporary medicine and reveals the predictable patterns by which these roots combine. Students will learn to define new compounds and phrases by analysis of their parts.

Three lectures; one term

CLASSICS 2YY3 - GREEK TRAGEDY

Selected plays of the Greek tragic playwrights will be read in translation and considered in their literary, historical or social contexts.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): THTRFLM 2Y03

Offered in alternate years.

CLASSICS 3EE3 - THE GREEK HISTORIANS

The study in translation of Herodotus, Thucydides, and other Greek historical writers, with consideration of the evolution of their genre and their contributions to the development of historiography.

Three lectures; one term

Prerequisite(s): One of CLASSICS 1M03, CLASSICS 2K03, CLASSICS 2LA3 or registration in Level III or above of any program

Antirequisite(s): HISTORY 3EE3

Offered in alternate years.

CLASSICS 3ER3 - EPICS OF ROME

This course will examine the great epic poems of Vergil, Ovid and Statius, studying them in the political and cultural context of contemporary Rome and against the background of the tradition of epic poetry.

Three hours; one term

Prerequisite(s): Three units from CLASSICS 1B03, 2D03, 2E03, 2Y03, 2YY3; and registration in Level II or above of any program

Offered in alternate years.

CLASSICS 3H03 - ARCHAIC GREEK ART

The formative period of Greek Art, from its rebirth after the Dark Ages to the Persian Wars (c. 1000-480 B.C.), and its relationship to the art of the Near East.

Three lectures; one term

Prerequisite(s): CLASSICS 2B03

Cross-list(s): ARTHIST 3H03

Offered in alternate years.

CLASSICS 3HH3 - ROMAN SLAVERY

An examination of Roman slavery using a variety of sources (historical and juridical texts, funerary inscriptions, archaeological evidence) in order to determine its place in Roman social structure and its importance to the ancient economy and culture.

Three lectures; one term

Prerequisite(s): One of CLASSICS 1M03, 2K03, 2LC3, 2LD3; and registration in Level II or above of any program

Antirequisite(s): HISTORY 3HH3

Offered in alternate years.

CLASSICS 3M03 - GREEK INTELLECTUAL REVOLUTION

A study of the birth of rationalistic and naturalistic thought in Greece, placing this intellectual revolution in its social, political and cultural context.

Three lectures; one term

Prerequisite(s): Three units from CLASSICS 2LA3, 2LB3, 2P03, PHILOS 2P03; and registration in Level III or above of any program

Antirequisite(s): HISTORY 3M03

Offered in alternate years.

CLASSICS 3MT3 - ADVANCED ANCIENT ROOTS OF MEDICAL TERMINOLOGY

This course continues and develops the methods and materials introduced in CLASSICS 2MT3, presenting advanced and specialized medical terms and an introduction to the major Latin corpus of anatomical phrases known as the *Terminologia Anatomica*.

Three hours; one term

Prerequisite(s): CLASSICS 2MT3

CLASSICS 3Q03 - GREEK SANCTUARIES

Ancient Greek sanctuaries and their social and political context. Topics will include architecture and art, as well as activities such as sacrifice, athletic games, healing, and oracular consultation.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Cross-list(s): ARTHIST 3Q03

Alternates with CLASSICS 3S03 (ARTHIST 3SS3)

CLASSICS 3S03 - POMPEII, HERCULANEUM, AND OSTIA

The archaeology of three cities in Italy (Pompeii, Herculaneum, Ostia) will be examined, with a focus on urbanism, public space, and domestic architecture and decoration.

Three lectures; one term

Prerequisite(s): One of CLASSICS 1A03, 2B03, 2C03, 2LC3, or 2LD3 and registration in Level II or above of any program

Cross-list(s): ARTHIST 3SS3

Alternates with CLASSICS 3Q03 (ARTHIST 3Q03).

CLASSICS 3X03 - ROMAN RELIGION

A study of the role of religion in Roman public and private life using literary, documentary and archaeological evidence.

Three lectures; one term

Prerequisite(s): One of CLASSICS 1B03, 1M03, 2K03, 2LC3, 2LD3, or CLASSICS 3Q03; and registration in Level II or above any program

Antirequisite(s): HISTORY 3X03

Offered in alternate years.

CLASSICS 3YY3 - OVID

Representative texts of the Latin poet Ovid will be read in translation, especially his erotic poetry and mythical stories. There will be literary analysis and later adaptations in literature and film will be considered.

Three hours; one term

Prerequisite(s): Three units from CLASSICS 1B03, 2D03, 2E03, 2Y03, 2YY3; and registration in Level II or above of any program

Offered in alternate years.

CLASSICS 4BB3 - SEMINAR IN ANCIENT ART

Consult the Department concerning the topic to be offered.

Seminar (two hours); one term

Prerequisite(s): Nine units of CLASSICS including six units from CLASSICS 2B03, 2C03, 3Q03, 3H03, 3S03 or registration in Level III or above of an Honours program in Classics

Cross-list(s): ARTHIST 4BB3

CLASSICS 4BB3 may be repeated, if on a different topic, to a total of six units.

CLASSICS 4E03 - SEMINAR IN ANCIENT CULTURE

Consult the Department for the topic to be offered.

Seminar (two hours); one term

Prerequisite(s): Six units from Level III Classics or above or registration in Level III or above of an Honours program in Classics

CLASSICS 4E03 may be repeated, if on a different topic, to a total of six units.

CLASSICS 4F03 - SEMINAR IN ANCIENT HISTORY

Consult the Department for the topic to be offered.

Seminar (two hours); one term

Prerequisite(s): Nine units from CLASSICS 2K03, 2LA3, 2LB3, 2LC3, 2LD3, 3HH3, 3M03, 3X03 or registration in Level III or above of an Honours program in Classics or History

Antirequisite(s): HISTORY 4FA3

CLASSICS 4F03 may be repeated, if on a different topic, to a total of six units.

Offered in alternate years.

CLASSICS 4FP3 - FIELD PRACTICUM IN CLASSICAL ARCHAEOLOGY

Students will learn the techniques of archaeology in the field (survey, excavation, finds processing) by participating in an excavation at a classical site in the Mediterranean area.

Offered during the spring/summer session only

Prerequisite(s): Six units of CLASSICS 2C03, 3B03, 3Q03, 3S03; and permission of the Department.

CLASSICS 4H03 - DEATH AND COMMEMORATION IN THE ROMAN WORLD

An examination of attitudes to death and commemoration at ancient Rome incorporating written sources and material culture.

Seminar (two hours); one term

Prerequisite(s): Nine units of Classics including at least three units at Level III or above or registration in Level III or above of an Honours program in Classics

CLASSICS 4L03 - ATHENIAN DEMOCRACY

A study of the institutional, social and cultural dynamics of popular self-government in Athens, exploring how Athenian democracy compares and contrasts with democracy today.

Seminar (two hours); one term

Prerequisite(s): Nine units from CLASSICS2LA3, 2LB3, 2LC3, 2LD3, 3HH3, 3M03, 3X03 or registration in Level III or above of an Honours program in Classics or History

Antirequisite(s): HISTORY 4LL3

CLASSICS 4MR3 - THE MYTH AND REALITY OF TROY

A consideration of the role that the Trojans played in the history, art, and literature of the Greeks and Romans.

Seminar (two hours); one term

Prerequisite(s): Nine units of CLASSICS including three units from CLASSICS 2YY3, 2D03, 3EE3, 3YY3, or 3Z03 or registration in Level III or above of an Honours program in Classics

Not open to students with credit in CLASSICS 4E03, SEMINAR IN ANCIENT CULTURE, if the topic was The Myth and Reality of Troy.

CLASSICS 4T03 A/B S - INDEPENDENT STUDY

Reading and research in Classics, supervised by a department member and culminating in a major paper to be evaluated by the supervisor, with confirmation by a second reader. See Department for more detailed guidelines.

Tutorials; two terms

Prerequisite(s): Registration in Level IV of any Honours program in Classics with a Grade Point Average of at least 9.5, and permission of the Department

CLASSICS 4U03 - THE SEVERE STYLE IN GREEK ART

This course examines the birth of the Classical Greek style and its earliest manifestation, the Severe style. Sculpture, vase painting and architectural examples will be considered and placed in their appropriate political and cultural contexts.

Seminar (two hours); one term

Prerequisite(s): Nine units of CLASSICS, including CLASSICS 2B03 or registration in Level III or above of an Honours program in Classics

Cross-list(s): ARTHIST 4U03

COLLABORATIVE

Nursing Consortium (A) Stream (Collab) courses are administered by the School of Nursing.

Health Sciences Centre, Room 2J16, ext. 22407

<http://www.fhs.mcmaster.ca/nursing/>

Note

The following courses are open only to those students at the Mohawk College or Conestoga College sites who are registered in the McMaster/Mohawk/Conestoga Collaborative B.Sc.N program (A or E Streams) with the exception of COLLAB 2F03 (Medical Informatics) and COLLAB 2K03 (Introduction to Health Informatics) which are also open to students registered in the B.Sc.N. (A) Stream (McMaster Site).

Courses

See also courses in *Nursing*.

COLLAB 1AS3 - AGING AND SOCIETY

This course includes a multidisciplinary examination of the ways in which human aging is viewed - how we perceive the process of growing older and how society responds to the issues and challenges of aging. Course content will largely be based on the Canadian context, but will also include international research and knowledge.

Lecture (two hours), tutorial/fieldtrip (one hour); one term

Prerequisite(s): Permission of the instructor; and registration in either the B.Sc.N. Basic (A) Stream (Conestoga College site), or the Post Diploma R.P.N. (E) Stream (Conestoga College site)

Antirequisite(s): HLTHAGE 1BB3

COLLAB 1E03 - ESSENTIALS OF CANADIAN HISTORY

A study of recurrent themes in public affairs within the historical context of Canada from Confederation to the present.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 1F03 - POLITICAL STRUCTURES AND ISSUES

Introduction to the study of politics within the Canadian context.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 1G03 - MULTICULTURALISM

An examination of the ethnic and cultural diversity of Canadian society, including an investigation of Canada's multicultural policy.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 2A03 - ABNORMAL PSYCHOLOGY

Applied principles and related theories of normal and abnormal personality development.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Mohawk College site)

COLLAB 2C03 - SOCIOLOGY I

The study of various aspects of Canadian society including social class, gender, religion, education, health care and family.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Mohawk College site)

COLLAB 2D03 - HUMAN SEXUALITY

An introduction to biological, behavioural and cultural aspects of human sexuality. Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Mohawk College site)

COLLAB 2F03 - MEDICAL INFORMATICS

A study of current topics in Medical Informatics and their practical application in the workplace.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in either Level III or above of the in B.Sc.N. Basic (A) Stream (McMaster or Mohawk College site) or Level III or above of the B.Sc.N. Post Diploma R.P.N. (E) Stream (McMaster or Mohawk College site)

COLLAB 2G03 - QUEST FOR MEANING

Using insights from the arts, humanities and sciences, students will explore ways in which meaning is sought.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 2I03 - THE USES OF LAUGHTER: COMEDY AND SATIRE

This course will explore the history of comedy and satire through works ranging from ancient Greek comedy to contemporary film and fiction.

Lecture (one hour), discussion/seminar (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 2J03 - DESIRE IN LITERATURE

The historical and cross-cultural coverage of this course will lead to in-depth consideration of the ways culture, society and art shape desire and are in turn informed by it.

Lecture (one hour), discussion/seminar (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 2K03 - INTRODUCTION TO HEALTH INFORMATICS

An introduction to the theory of data and information needs of health care professionals and the role of information management in patient care. Topics include decision support systems, electronic records, telemedicine, security, privacy and future trends.

Three hours; one term

Prerequisite(s): Registration in either Level II or above of the in B.Sc.N. Basic (A) Stream (Conestoga College site) or the B.Sc.N. Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 2M03 - MEDICAL ANTHROPOLOGY: ILLNESS AND HEALTHCARE IN CROSS-CULTURAL PERSPECTIVE AND SOCIAL ISSUES

Medical anthropology gains theoretical and practical knowledge by studying other societies' medical systems. It helps broaden the understanding of 'health' and address issues of inequality.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Mohawk College site)

COLLAB 2N03 - ORGANIZATIONAL BEHAVIOUR

This course allows participants to develop and practice the interpersonal skills necessary to work with and/or manage people effectively.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Mohawk College site)

COLLAB 2P03 - EPIDEMIOLOGY IN PUBLIC HEALTH

This course is designed to provide an introduction to the applications of epidemiology in public health. Fundamental methods will be introduced so that the work of public health professionals can fully be appreciated.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 2R03 - EPIDEMIOLOGICAL METHODS

This course is designed to provide an introduction to the epidemiological methods used to study health and disease in populations. Fundamental methods for the measurement of population health and disease study designs will be presented.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 2T03 - AGING IN PLACE

This course will explore and discuss the research, evidence, and trends related to predictors of 'Aging in place', which acknowledges that older adults wish to live in their own communities for as long as possible and that home and community services will support this aim while being cost effective. Throughout the course, knowledge related to theory and experience will be applied to examples of those who are part of this population or will become part in the near future.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in Level II or above in either the B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site).

COLLAB 3A03 - SOCIOLOGY: SOCIETY, TECHNOLOGY AND SOCIAL ISSUES

An examination of technologies that have influenced society.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Mohawk College site)

COLLAB 3B03 - SOCIOLOGY: DIVERSITY AND INEQUALITY

A study of the problems of daily life and social issues.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Mohawk College site)

COLLAB 3C03 - POSTMODERNISM: INSTITUTIONS, IDEOLOGY AND PERSONS

The purpose of this course is to explore postmodernism, developing what is meant by the postmodern sublime, postmodern textuality and postmodern politics. Readings will address the debates around deconstruction, postmodern hermeneutics and postmodernism in the arts and political theory.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in B.Sc.N. Basic (A) or Post Diploma R.P.N. (E) Streams (Conestoga College site)

COLLAB 3D03 - ILLNESS NARRATIVES IN FICTION AND NON-FICTION

This seminar-based course will use fictional literature (poetry, short stories and excerpts from novels) as well as first-person accounts (writings of actual patients and health-care workers) to explore the psychological, emotional and relational

aspects of patient experiences of such conditions as cancer, heart disease, disability, AIDS, mental illness and chronic pain conditions.

Lecture (one hour), tutorial (two hours); one term

Prerequisite(s): Registration in Level III or above in either the B.Sc.N. Basic (A) Stream or Post Diploma R.P.N. (E) Stream (Conestoga College site)

COLLAB 3HP3 - HEALTH PSYCHOLOGY

Interaction between psychological processes and health is explored through examination of theories and research on mind, body and health relationships.

Three hours: one term

Prerequisite(s): PSYCH 1N03 (or PSYCH 1X03) and PSYCH 1NN3 (or PSYCH 1XX3), or COLLAB 1C03 and 1D03, or permission of Instructor; and registration in B.Sc.N. Basic (A) or Post Diploma R.P.N. (E) Stream (Conestoga College site)

Antirequisite(s): PSYCH 3BA3

COLLAB 4H03 - INTRODUCTION TO CONCEPTS IN GLOBAL HEALTH

An introduction to the determinants of inequalities in the health of select populations in a Canadian and international context as viewed through the lenses of historical development, political economy and medical anthropology.

Lecture/seminar (three hours); one term

Prerequisite(s): HTHSCI 2RR3; and registration in either Level III or above of the B.Sc.N. Basic (A) Stream (Mohawk or Conestoga College Site) or Level III or above of the B.Sc.N. Post Diploma R.P.N. (E) Stream (Mohawk or Conestoga College site)

Antirequisite(s): HTHSCI 4H03, NURSING 4H03

COMMERCE

Courses in Commerce are administered by the DeGroote School of Business (Faculty of Business).

DeGroote School of Business, Room 104, ext. 24433

<http://www.degroote.mcmaster.ca/>

Faculty Notes

1. The Commerce courses for the Minor in Finance, the Minor in Accounting and Financial Management Services and the Minor in Information Systems are open to students admitted to the Minor. Please take note that all prerequisites for these courses must also be satisfied. Students taking the Minor in Accounting and Financial Management Services or the Minor in Finance will also be required to have obtained an average of at least 7.0 in ECON 1B03 and 1BB3 as a prerequisite.

Courses

COMMERCE 1AA3 - INTRODUCTORY FINANCIAL ACCOUNTING

This is an introduction to the basic principles and practices of financial accounting, which includes an examination of income measurement and asset and liability valuation, to provide an understanding of financial accounting information and the ethics of financial reporting.

Lectures (three hours)

Antirequisite(s): IBH 1AA3

COMMERCE 1B03 - BUSINESS ENVIRONMENT & ORGANIZATION

This course will examine the relationship between business organizations, their functional areas and the environments - social, political, legal, regulatory and technological - that affect them.

Lectures (three hours)

Prerequisite(s): Registration in Level I or above in any Humanities, Social Sciences, Health Sciences, or Science program.

Antirequisite(s): COMMERCE 1E03; Not open to students registered in an Engineering, Business, or Commerce program.

COMMERCE 1BA3 - ORGANIZATIONAL BEHAVIOUR

The central objective of this course is to develop an understanding of human behaviour in organizations with a view toward effective management of such behaviour.

Lectures (three hours)

Antirequisite(s): IBH 1BA3

COMMERCE 1DE0 - BUSINESS I ORIENTATION

This course provides students with information and activities to facilitate their successful transition to university and success in the Business Program. Students will gain knowledge of the academic regulations, strategies for success, and the services available to them within the university.

Lectures (three hours)

Prerequisite(s): Registration in Business I

COMMERCE 1E03 - BUSINESS ENVIRONMENT AND ORGANIZATION

This course will examine the relationship between business organizations, their functional areas and the environments - social, political, legal, regulatory and technological - that affect them.

Lectures (two hours), tutorial (one hour)

Prerequisite(s): Registration in Business I

Antirequisite(s): IBH 1AB3

COMMERCE 2AB3 - MANAGERIAL ACCOUNTING I

An introduction to concepts underlying the use of cost accounting information for managerial planning and control and for inventory valuation. The nature and analysis of costs and the usefulness and limitations of accounting data for decision-making, including ethical considerations, will be discussed.

Lectures (two hours), tutorial (one hour)

Prerequisite(s): COMMERCE 1AA3 or IBH 1AA3; and registration in any Honours Bachelor of Commerce, Engineering and Management, or four or five-level non-Commerce program or the Minor in Innovation

Antirequisite(s): IBH 2BA3

COMMERCE 2BC3 - HUMAN RESOURCE MANAGEMENT AND LABOUR RELATIONS

This course builds on COMMERCE 1BA3, focusing on human resource management and labour relations issues and practices from a general management education perspective.

Lectures (three hours)

Prerequisite(s): COMMERCE 1BA3 or IBH 1BA3; and registration in any Honours Bachelor of Commerce, Engineering and Management, Labour Studies, or four or five-level non-Commerce program

Antirequisite(s): IBH 2AC3

COMMERCE 2FA3 - INTRODUCTION TO FINANCE

This course introduces the main instruments and institutions in the Canadian financial system. The basic concepts and models of modern financial theory are introduced through lectures and 'hands-on' problem solving. Topics include: the time value of money, capital budgeting, the trade-off between risk and return and security valuation.

Lectures (two hours), tutorial (one hour)

Prerequisite(s): COMMERCE 1AA3 or IBH 1AA3; ECON 1B03; one of MATH 1A03, 1LS3, 1M03, 1N03, 1X03, 1ZA3 or 1Z04; registration in any Honours Bachelor of Commerce, Engineering and Management, or Honours Actuarial and Financial Mathematics, or four or five-level non-Commerce program.

Antirequisite(s): IBH 2BB3; Not open to students with credit or registration in ECON 2I03

COMMERCE 2I00 - CAREER DEVELOPMENT COURSE

A Career Development course designed to equip students with the tools necessary to successfully participate in summer, internship and full time job searches. Topics include: skills assessment, resume and cover letter development, interview skills, networking, job search strategies, business etiquette. Successful completion of this course is one of the requirements to participate in the Commerce Internship Program.

Lectures (two hours)

Prerequisite(s): Registration in Level II of an Honours Bachelor of Commerce Program or Permission of the Manager of the Career and Professional Development. A separate course fee of \$175 will be applied to your student account upon enrolment in the course. For more information on Commerce 2I00 see <http://ug.degroote.mcmaster.ca/course-outlines/>. Please refer to the Commerce Internship Program section of the Undergraduate Calendar for a complete listing of requirements for participation.

COMMERCE 2KA3 - INFORMATION SYSTEMS IN BUSINESS

This course emphasizes the strategic role of information systems in modern business. Topics include: the technical foundations of information systems, the impact of information systems on business operations and decision-making and the processes that are required for successful implementation of business information systems.

Lectures (three hours)

Prerequisite(s): Registration in any Honours Bachelor of Commerce or four or five-level non-Commerce program or non- Engineering and Management program.
Antirequisite(s): IBH 2AB3

COMMERCE 2MA3 - INTRODUCTION TO MARKETING

This course introduces the conceptual underpinnings and operational facets of marketing with a primarily consumer (as opposed to industrial) focus.

Lectures (three hours)

Prerequisite(s): ECON 1B03 and registration in any Honours Bachelor of Commerce or Engineering and Management program or one of ARTSSCI 2E03, ECON 1B03, 2G03, 2X03, and registration in any four or five-level non-Commerce program.
Antirequisite(s): IBH 2AA3

COMMERCE 2OC3 - OPERATIONS MANAGEMENT

The course will cover both manufacturing and service operations topics at the strategic, tactical and operational levels. Topics include capacity planning, layout of facilities, forecasting, aggregate planning, scheduling, inventory control, purchasing, supply chains and quality control. Emphasis will also be placed on process improvement and project management. The course will look at supply chain issues related to globalization and sustainability including environmental and social issues.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): One of ARTSSCI 2R03, COMMERCE 2QA3, ECON 2B03, ELECENG 3TQ4, ENGPYHS 3W04, HTHSCI 1F03, 2A03, NURSING 2R03, SOCSCI 2J03, STATS 1CC3, 2B03, 2MB3, 3J04, 3N03, 3Y03; and registration in any Honours Bachelor of Commerce program, or four or five level non-Commerce program
Antirequisite(s): COMMERCE 4QA3, IBH 3BC3, MECHENG 4C03

This course is not open to students in any Engineering and Management program.

COMMERCE 2QA3 - APPLIED STATISTICS FOR BUSINESS

An introduction to the application of statistical analysis in managerial decision-making. The concepts of statistical analysis are applied to a variety of topics, including decision-making, estimation by sampling, hypothesis testing, analysis of variance, simple linear and multiple regression and forecasting.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Finite Math (or Mathematics of Data Management U or equivalent) or STATS 1L03; and registration in any Honours Bachelor of Commerce, Engineering and Management or four or five-level non-Commerce program

Antirequisite(s): ARTSSCI 2R03, ECON 2B03, ELECENG 3TQ4, ENGPYHS 3W04 A/B, HTHSCI 1F03, 2A03, IBH 2AD3, NURSING 2R03, SOCSCI 2J03, STATS 1CC3, 2B03, 2MB3, 3J04, 3N03, 3Y03

COMMERCE 3AB3 - INTERMEDIATE FINANCIAL ACCOUNTING I

A first course in intermediate financial accounting dealing with the theory and practice of financial statement preparation and reporting. The emphasis will be on asset valuation and the related impact on income measurement.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): COMMERCE 1AA3 or IBH 1AA3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 3AC3 - INTERMEDIATE FINANCIAL ACCOUNTING II

A second course in intermediate financial accounting dealing with reporting issues that relate to liabilities and owners' equity. In particular, the concepts of recognition, measurement and disclosure of such items as bonds, taxes, leases and pensions as well as the phenomenon of off-balance sheet financing are examined.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): COMMERCE 3AB3 and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 3FA3 - MANAGERIAL FINANCE

This course examines various aspects of the financial management of the firm including the sources and methods of financing, capital structure, dividend policy, leasing, mergers and acquisitions, working capital management, effects of taxation on financial decisions and international aspects of finance.

Lectures (three hours)

Prerequisite(s): COMMERCE 2FA3, ECON 2I03, or IBH 2BB3; and registration in any Honours Bachelor of Commerce, Engineering and Management, Honours Actuarial and Financial Mathematics, or four or five-level non-Commerce program.
Antirequisite(s): IBH 3AC3

COMMERCE 3FB3 - SECURITIES ANALYSIS

This course is concerned with the analysis of marketable securities, especially common stocks. Topics include: the institutional characteristics and operation of financial markets, securities analysis and valuation, investment characteristics and strategies to increase return.

Lectures (three hours)

Prerequisite(s): COMMERCE 2FA3, ECON 2I03, or IBH 2BB3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 3FC3 - INTERNATIONAL FINANCE

This course provides a framework for examining financial management decisions in an international setting. Issues examined include: foreign exchange risk management, multinational working capital management, foreign investment analysis and financing foreign operations.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 3FD3 - FINANCIAL MODELLING

What is the difference between making a purpose-built spread sheet and financial modeling? Financial modeling is much more flexible and can be easily modified

to solve a wide array of problems. This course will examine the tools built into Excel and VBA and their use in financial modeling. A basic knowledge of Excel is assumed with no prior experience with VBA required.

Lectures (three hours)

Prerequisite(s): COMMERCE 2FA3 or IBH 2BB3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program; or Level IV of the Commerce program, or the Minor in Finance.

COMMERCE 3FH3 - ALTERNATIVE INVESTMENTS AND PORTFOLIO MANAGEMENT

This course introduces students to a wide range of alternative investments, including hedge funds, private equity, commodities, real estate, and infrastructure. Students are also provided a deeper, cutting-edge treatment of modern hedge fund investment strategies as well as a rigorous analysis of the practical portfolio management process. This course is highly recommended for any student considering a career in investments, portfolio management, corporate finance, or the broader financial services.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

Antirequisite(s): COMMERCE 4FX3 if taken in Winter 2014

COMMERCE 3FI3 - MARKET TRADING WITH OPTIONS

This experiential course attempts to develop practical skills in trading financial securities -money market instruments, bonds, equities, indices, ETFs, currencies, commodities and their corresponding options focusing on trading strategies that minimize market exposure through risk measurement. Market microstructure insight provides guidance in implementing the appropriate trading strategies. The course relies on the facilities and resources available in the Gould Trading Floor (GTF).

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program. Enrolment is limited.

COMMERCE 3KA3 - SYSTEM ANALYSIS AND DESIGN

This course examines the role of the system analyst in today's business environment. Traditional and modern approaches to systems analysis and design will be covered. Students participate in a hands-on team project for a real-world business application.

Lectures (three hours)

Prerequisite(s): COMMERCE 2KA3 or IBH 2AB3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 3KD3 - DATABASE DESIGN MANAGEMENT AND APPLICATIONS

This course is designed to introduce the basic concepts of database design, implementation and management. Students will gain hands on experience through assignments and a team project.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): COMMERCE 2KA3, ENGINEER 1D04, or IBH 2AB3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

Antirequisite(s): COMMERCE 4QD3

COMMERCE 3KE3 - MANAGEMENT OF ENTERPRISE DATA ANALYTICS

This course provides students with an overview of enterprise data analytics and an introduction to the concepts which underlie its effective deployment and management. The course encompasses managerial, technical and statistical perspectives, demonstrating how each area is dependent on the other to make

enterprise analytics work. This course incorporates a variety of teaching and learning methods including lectures, assignments, case studies, group work, presentations, and readings.

Lectures (three hours)

Prerequisite(s): COMMERCE 2KA3 or IBH 2AB3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 3MA3 - MARKETING RESEARCH

This course covers the effective obtaining, communicating and using of competitive and market intelligence. Students work in groups with a company or public organization and receive training and experience in making business presentations.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): COMMERCE 2MA3 or IBH 2AA3; COMMERCE 2QA3 or IBH 2AD3; and registration in any Honours Bachelor of Commerce or Engineering and Management program; or COMMERCE 2MA3 (or IBH 2AA3) and one of STATS 2MB3, STATS 3J04, 3N03 or STATS 3Y03 and registration in any Engineering and Management program or the Minor in Innovation

COMMERCE 3MB3 - CONSUMER BEHAVIOUR

This course examines why people buy, ways of satisfying consumer needs more effectively and the creation of communications that will influence consumers.

Lectures (3 hours)

Prerequisite(s): COMMERCE 2MA3 or IBH 2AA3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 3MC3 - APPLIED MARKETING MANAGEMENT

Builds upon material in COMMERCE 2MA3 but is more applied in nature and covers the 4 P's in greater depth. It also has a heavier industrial and service sector component, and relies more on practical, real world cases. A major field project (student teams working with companies) is a critical part of the course.

Lectures (three hours)

Prerequisite(s): COMMERCE 2MA3 or IBH 2AA3; and registration in any Honours Bachelor of Commerce, Engineering and Management or four or five-level non-Commerce program, or the Minor in Innovation

Antirequisite(s): IBH 3AB3

COMMERCE 3MD3 - INTRODUCTION TO CONTEMPORARY APPLIED MARKETING

This course will introduce students to key marketing principles and concepts and explore their practical applications in business situations. Case studies are used to give practice in analyzing opportunities, solving marketing issues, and preparing implementation plans. This course is taught through a combination of lectures, case discussions, readings, assignments and a field project.

Lectures (three hours)

Prerequisite(s): Registration in Level III or above or the Minor in Innovation

Antirequisite(s): COMMERCE 2MA3, 3MC3, IBH 2AA3. Not open to students registered in any Commerce, or Engineering & Management program.

COMMERCE 3QA3 - MANAGEMENT SCIENCE FOR BUSINESS

This course is a study of analytical approaches that assist managerial decision-making; it provides coverage of decision theory and an introduction to optimization methods, computer simulation and the general approach of management science.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): COMMERCE 2QA3 or IBH 2AD3; and registration in any Honours Bachelor of Commerce program; or one of ELECENG 3TQ3, 3TQ4, STATS 2MB3, 3J04, 3N03, 3Y03, ENGPYS 3W04 A/B (or 3W04) and registration in any Engineering and Management program

COMMERCE 3S03 - MANAGEMENT SKILLS DEVELOPMENT

The purpose of this course is to provide the necessary cognitive and behavioural skills that students need to develop themselves as competent managers through the acquisition and practice of personal, interpersonal, and group skills.

Lectures (three hours)

Prerequisite(s): COMMERCE 2BC3 or IBH 2AC3; and registration in any Honours Bachelor of Commerce program or the Minor in Innovation

Antirequisite(s): IBH 3AA3

COMMERCE 4AA3 - MANAGERIAL ACCOUNTING II

A consideration of advanced topics in management planning and control including cost behaviour determination, production planning, innovation in costing, cost allocations, variance analysis and performance evaluation for responsibility centres.

Lectures (three hours)

Prerequisite(s): COMMERCE 2AB3 or IBH 2BA3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 4AC3 - ADVANCED FINANCIAL ACCOUNTING

An advanced accounting course considering specific problems of accounting for the corporate entity, such as, business combinations, intercorporate investments, consolidated financial statements, accounting for foreign operations and foreign currency transactions, segment reporting.

Lectures (three hours)

Prerequisite(s): COMMERCE 3AC3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program

COMMERCE 4AD3 - INTRODUCTION TO AUDITING

An examination of the attest function in accounting including ethical, legal, and statutory influences in the development of auditing standards. Control structure and audit evidence will be examined.

Lectures (three hours)

Prerequisite(s): COMMERCE 3AC3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 4AF3 - ACCOUNTING THEORY

A review of accounting theory as a background for applying underlying concepts to current accounting problems. The course emphasizes current literature.

Lectures (three hours)

Prerequisite(s): COMMERCE 3AC3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 4AK3 - ACCOUNTING INFORMATION FOR DECISION MAKING

This course covers the basic principles in financial and managerial accounting as well as the use of accounting information in decision making. In the financial accounting part of the course, the course covers the conceptual framework of accounting, Generally Accepted Accounting Principles, financial statements, and financial statement analysis. In the managerial accounting part of the course, the course covers cost behaviour, cost-volume profit relationships, budgeting, and the use of cost information in decision making.

Lectures (three hours)

Prerequisite(s): Registration in Level III or above of a non-Commerce program or the Minor in Innovation

Antirequisite(s): COMMERCE 1AA3, 2AB3, IBH 1AA3

Not open to students registered in any Commerce, or Engineering and Management program.

COMMERCE 4BB3 - RECRUITMENT AND SELECTION

This course exposes students to staffing issues in the Canadian context. Topics include job analysis, methods of recruitment and selection, human rights legislation and decision making strategies.

Lectures (three hours)

Prerequisite(s): COMMERCE 2BC3 or IBH 2AC3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program or the Minor in Innovation

COMMERCE 4BC3 - COLLECTIVE BARGAINING

A survey of the nature, determinants, and impact of collective bargaining in Canada. Both the procedural and substantive aspects of collective bargaining will be studied.

Lectures (three hours)

Prerequisite(s): One of COMMERCE 2BC3, IBH 2AC3, LABRST 2A03; and registration in level III or above in any Honours Bachelor of Commerce, Labour Studies or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 4BD3 - SETTLEMENT OF INDUSTRIAL DISPUTES

The nature and the role of industrial conflict as well as the techniques which have been developed to control the incidence of conflict in union-management situations.

Lectures (three hours)

Prerequisite(s): One of COMMERCE 2BC3, IBH 2AC3, LABRST 2A03; and registration in level III or above in any Honours Bachelor of Commerce, Labour Studies or Engineering and Management program or Level IV of the Commerce program. COMMERCE 4BC3 is recommended.

COMMERCE 4BE3 - STRATEGIC COMPENSATION/REWARD SYSTEMS

Key issues in designing effective pay systems are discussed. Topics include: job evaluation, market pay surveys, pay structures, performance incentives, knowledge pay and employee benefits.

Lectures (three hours)

Prerequisite(s): COMMERCE 2BC3 or IBH 2AC3; and registration in any Honours Bachelor of Commerce or Engineering and Management program.

COMMERCE 4BF3 - LABOUR LAW AND POLICY

An analysis of the concepts and fundamentals of Canadian labour law and analysis of Canadian labour policy.

Lectures (three hours)

Prerequisite(s): COMMERCE 2BC3 or IBH 2AC3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

Cross-list(s): LABRST 3C03

This course is administered by Labour Studies.

COMMERCE 4BG3 - PUBLIC SECTOR COLLECTIVE BARGAINING

This course examines unionization and collective bargaining for employees in the public sector. Topics include: bargaining issues, bargaining outcomes and impasse resolution.

Prerequisite(s): COMMERCE 2BC3 or IBH 2AC3; and Registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program. COMMERCE 4BC3 is also recommended.

Cross-list(s): LABRST 4C03

COMMERCE 4BI3 - TRAINING AND DEVELOPMENT

This course provides a framework for establishing, revising and examining training programs in organizations. Topics include: needs assessment, development of training objectives, planning and delivery of instruction, learning principles and evaluation of training.

Lectures (three hours)

Prerequisite(s): COMMERCE 2BC3 or IBH 2AC3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 4BK3 - THE MANAGEMENT OF TECHNOLOGY

An introduction to the innovative management of technology including the integration of the firm and technology strategy, external sourcing of technology and the internationalization of technology management.

Lectures (three hours)

Prerequisite(s): COMMERCE 1BA3 or IBH 1BA3; and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program or Level IV of the Commerce program, or the Minor in Innovation

COMMERCE 4BL3 - OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT

This course enhances students' knowledge on managing occupational health and safety, teaches research skills, and assists students in developing strategies for creating healthy workplaces.

Lectures (three hours)

Prerequisite(s): COMMERCE 2BC3 or IBH 2AC3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 4BM3 - STRATEGIC HUMAN RESOURCE PLANNING

This course provides an understanding of the essential elements of Human Resource Planning processes in organizations. Students will acquire knowledge in analyzing, assessing and programming for human resource requirements of the organizational business plans and strategies.

Lectures (three hours)

Prerequisite(s): COMMERCE 2BC3 or IBH 2AC3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 4BN3 - LEADERSHIP DEVELOPMENT

This highly participative learning portfolio-based course on Leadership focuses on the potential for personal and professional growth of the student. The course provides an initial understanding of the fundamentals and theories of leadership, and then moves to an appreciation of students own leadership styles, behaviors, and experiences as well as an understanding of other individuals leadership styles, behaviors, and experiences. A major objective of the course is to encourage the student to become more reflective and self-aware.

Lectures (three hours)

Prerequisite(s): COMMERCE 1BA3 or IBH 1BA3; COMMERCE 2BC3 or IBH 2AC3; COMMERCE 3S03 or IBH 3AA3; registration in Level IV or above of an Honours Bachelor of Commerce or Engineering & Management program, or the Minor in Innovation

COMMERCE 4BP3 - PRINCIPLES OF LEADERSHIP

This course reviews the key concepts, approaches, models and theories of leadership. It develops students understanding of major elements of leadership research and will equip students to critically evaluate the popular writing on leadership and consider their own leadership potential and how to develop it. Fundamental leadership skills will be introduced with opportunities for student self-diagnosis. Lectures (three hours)

Prerequisite(s): COMMERCE 1BA3 or IBH 1BA3; COMMERCE 2BC3 or IBH 2AC3; COMMERCE 3S03 or IBH 3AA3

COMMERCE 4BX3 - SPECIAL TOPICS IN HUMAN RESOURCE MANAGEMENT

Various topics in Human Resource Management are considered. They will vary depending upon recent developments in the field and upon the research interests of the instructor. The topics to be included are announced at the time of course

offering. For information on course offerings, please refer to the School of Business website at <http://ug.degroote.mcmaster.ca/course-outlines/> or contact the Student Experience Academic Office, DSB 112.

Lectures (three hours)

Prerequisite(s): COMMERCE 1BA3 or IBH 1BA3; and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or Level IV of the Commerce program.

COMMERCE 4CA3 - MANAGING AND PROMOTING HEALTH AND HEALTHCARE SERVICES

This course provides coverage through a health lens of Social Marketing, Strategy, Segmentation and Targeting, Consumer Behaviour, Marketing Research and Ethical Issues, the "4Ps" and Controlling/Monitoring.

Prerequisite(s): COMMERCE 3MC3 and registration in Level III or above in any four or five-level program

COMMERCE 4EL3 - EXPERIENTIAL LEARNING IN BUSINESS

This course is defined as a structured experiential learning based project that a student undertakes under the supervision of a faculty member, with the authorization of the Associate Dean (Academic), from the DeGroote School of Business. It may be completed as a team activity or as an independent project / leadership activity. The focus is on developing managerial decision making, project management, resource management and leadership skills in preparation for a career in business.

Prerequisite(s): Registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program. Project forms are available from DSB-112.

Antirequisite(s): COMMERCE 4EL3 (regardless of topic)

COMMERCE 4FA3 - APPLIED CORPORATE FINANCE

This course examines the application of financial theory to a variety of problems in corporate finance. The appropriate use of valuation principles and techniques, and the design of corporate strategies intended to create shareholder wealth, are considered.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program.

COMMERCE 4FB3 - VALUATION FOR FINANCE PROFESSIONALS

The goal of the course is to build students' skills and confidence in answering the question: 'What is a company worth?' Through the use of case analysis (supplemented with lecture-based background material), we will examine the drivers of corporate value, traditional and alternative valuation models and approaches, and various valuation situations (IPO valuation, private equity and LBO valuation, valuation of high-growth and mature firms, among others).

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or Level IV of the Commerce program; or Minor in Finance

COMMERCE 4FC3 - ETHICS AND PROFESSIONAL PRACTICE IN FINANCE

This course introduces students to the practices and codes of conduct involved in the finance function. The course covers ethical issues and the roles of the corporate financial manager, other stakeholders and other participants in the investment industry. The emphasis of the course will be on readings, rules, and regulations from the CFA Institute. Cases and speakers will be employed to bring a real world perspective to the classroom.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or Level IV of the Commerce program; or Minor in Finance

COMMERCE 4FD3 - FINANCIAL INSTITUTIONS

This course examines, from a managerial perspective, the major types of financial institutions in Canada: chartered banks, trust companies, insurance companies, investment banks and other institutional investors.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in Level III or above of an Honours Bachelor of Commerce, Engineering & Management, or Actuarial Financial Mathematics program; or registration in Level IV of the Commerce program.

COMMERCE 4FE3 - OPTIONS AND FUTURES

This course provides an integrated approach to understanding the relations between options, futures, and their underlying assets. The theory of pricing of options and futures and the application of the theory to instruments currently traded in financial markets are considered.

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program or HBI Program, or Level IV of the Commerce program.

COMMERCE 4FF3 - PORTFOLIO THEORY AND MANAGEMENT

This course offers an advanced treatment of investment decision-making and the role of financial markets in pricing securities. Topics include: portfolio selection models, the institutional environment of investment decisions, and investment and asset pricing theory.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3; registration in Level III or above of an Honours Bachelor of Commerce, Engineering & Management, or Actuarial Financial Mathematics program; or registration in Level IV of the Commerce program.

COMMERCE 4FG3 - FINANCIAL THEORY

This course explores the theoretical foundations of finance and their applications to corporate finance policy. Topics covered include rational investment decisions, asset pricing, efficient markets, financial decisions and the role of information in financial decision-making.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 or ECON 2I03 and ECON 3G03; and registration in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program; or registration in Level IV of the Commerce program

COMMERCE 4FH3 - MERGERS, ACQUISITIONS AND CORPORATE CONTROL

This course examines the process by which mergers and other types of corporate control transactions take place, and the role of restructuring shifts in resource allocation by corporations.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in Level III or above of an Honours Commerce or Engineering & Management program; or registration in Level IV of the Commerce program.

COMMERCE 4FI3 - MARKET TRADING WITH FUTURES AND FORWARDS

This course attempts to develop practical skills in trading financial securities -fixed income, equities, futures and options- focusing on trading strategies based on market analysis and risk measurement.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 ; and registration in Level III or above of an Honours Commerce or Engineering & Management program; or registration in Level IV of the Commerce program. Enrolment is limited.

COMMERCE 4FJ3 - FIXED INCOME ANALYSIS

This course provides an advanced treatment of investments in the field of fixed income analysis and focuses on fixed income securities, fixed income portfolio management and fixed income derivatives.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program; or registration in Level IV of the Commerce program.

COMMERCE 4FK3 - FINANCIAL STATEMENT ANALYSIS

This course provides a comprehensive and up-to-date treatment of the analysis of financial statements as an aid to decision making. The relationship between financial markets and financial statements is studied using computerized data sets on personal computers.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program; or registration in Level IV of the Commerce program.

COMMERCE 4FL3 - PERSONAL FINANCIAL MANAGEMENT

The course covers various topics that are relevant to the financial decision making of individuals. These decisions include investment, retirement planning, debt and credit management, renting vs. buying a home, insurance and risk management and personal income tax planning and strategies.

Lectures (three hours)

Prerequisite(s): COMMERCE 2FA3, ECON 2I03, or IBH 2BB3; and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or Level IV of the Commerce program.

COMMERCE 4FM3 - PERSONAL FINANCIAL PLANNING AND ADVISING

Students will examine financial planning concepts by undertaking a major integrative project. This course is strongly recommended for students working towards the CFP designation.

Lectures (three hours)

Prerequisite(s): COMMERCE 4FL3 or COMMERCE 4FP3; and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or Level IV of the Commerce program.

COMMERCE 4FN3 - FINANCIAL RISK MANAGEMENT

This course provides a systematic and advanced treatment of financial risk management. It focuses on interest rate risk, market risk, liquidity risk, credit risk and operational risk. It is designed for students pursuing careers in operations management as well as finance and accounting.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in Level III or above of an Honours Bachelor of Commerce, Engineering & Management, or Actuarial Financial Mathematics program; or registration in Level IV of the Commerce program.

COMMERCE 4FO3 - SMALL BUSINESS AND ENTREPRENEURIAL FINANCE

This course is intended for students who wish to enhance their skills and knowledge in those areas of business that lead to successful entrepreneurship and/or small business management. The focus will be on those financial issues and decisions of particular concern to sole proprietors, partnerships, family-owned businesses and small non-public corporations.

Lectures (three hours)

Prerequisite(s): COMMERCE 2FA3, ECON 2I03, or IBH 2BB3; and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or Level IV of the Commerce program, or the Minor in Innovation

COMMERCE 4FP3 - PERSONAL FINANCE

A major objective of the course is to provide students with the tools and skills needed to make sound financial decisions throughout their lives. Financial planning is the process of managing one's money to achieve personal economic satisfaction. This process involves setting realistic goals and organizing financial activities toward the achievement of the goals. It also depends on the control of financial affairs by avoiding excessive debt, building up wealth, and managing financial risk. Lectures (three hours)

Antirequisite(s): COMMERCE 4FL3. Not open to students registered in any Commerce, or Engineering & Management program; or the Minor in Finance.

COMMERCE 4FQ3 - WORKING CAPITAL MANAGEMENT

The course will apply the principles and concepts of financial theory to problems and decisions associated with short-term (working) capital and how it affects firm liquidity, default risk and shareholder wealth.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program; or Level IV of the Commerce program.

COMMERCE 4FR3 - INSURANCE AND RISK MANAGEMENT

The course covers different types of insurance, including life, health and disability, home, property and automobile insurance. Risk management is a lifelong process that involves five steps: identification, evaluation, control, financing and monitoring. Lectures (three hours)

Prerequisite(s): COMMERCE 2FA3, ECON 2I03, or IBH 2BB3; and registration in Level III or above of an Honours Bachelor of Commerce, Engineering & Management, or Actuarial Financial Mathematics program; or registration in Level IV of the Commerce program.

COMMERCE 4FS3 - PENSION, RETIREMENT AND ESTATE PLANNING

The course examines financial needs at retirement including inflation and taxation. It also examines methods of accessing savings at retirement. Estate planning ensures that assets are distributed with the wishes of the testator and the needs of the beneficiaries.

Lectures (three hours)

Prerequisite(s): COMMERCE 2FA3, ECON 2I03, or IBH 2BB3; and registration in Level III or above of an Honours Bachelor of Commerce, Engineering & Management, or Actuarial Financial Mathematics program; or registration in Level IV of the Commerce program.

COMMERCE 4FT3 - REAL ESTATE FINANCE AND INVESTMENT

Concepts and techniques introduced in the course include investing, financing, appraising, consulting, managing real estate portfolios, leasing, managing property, analyzing site locations and managing corporate real estate assets.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program; or registration in Level IV of the Commerce program.

COMMERCE 4FU3 - BEHAVIOURAL FINANCE: THE PSYCHOLOGY OF MARKETS

An introduction to the emerging field of behavioural finance. Psychology and finance are integrated in studying how investors' emotions affect stock prices and markets. Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program; or registration in Level IV of the Commerce program.

COMMERCE 4FV3 - VENTURE CAPITAL

This course focuses on financing and value creation strategies for early- and growth-stage companies. It is designed for students considering careers in financial services or as entrepreneurs.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program; or registration in Level IV of the Commerce program or the Minor in Innovation

COMMERCE 4FW3 - FINANCE FOR ENTREPRENEURS

This course is intended for students who wish to enhance their skills and knowledge in those areas of business that lead to successful entrepreneurship and/or small business management. The focus will be on those financial issues and decisions of particular concern to sole proprietors, partnerships, family-owned businesses and small non-public corporations. This will include the financial aspects of the relationship between the firm and its owners.

Lectures (three hours)

Prerequisite(s): Students in a third or fourth year non-Commerce program or the Minor in Innovation

Antirequisite(s): COMMERCE 4F03. Not open to students registered in any Commerce, or Engineering & Management program; or the Minor in Finance or Innovation

COMMERCE 4FX3 - SPECIAL TOPICS IN FINANCE

Various topics in Finance are considered. They will vary depending upon recent developments in the field and upon the research interests of the instructor. The topics to be included are announced at the time of the course offering.

For information on course offerings, please refer to the School of Business web site at <http://ug.degroote.mcmaster.ca/course-outlines/> or contact the Student Experience Academic Office, DSB 112.

Lectures (three hours)

Prerequisite(s): Announced at time of offering COMMERCE 4FX3 may be repeated, if on a different topic, to a total of six units.

COMMERCE 4FY3 - INTRODUCTION TO FINTECH

The course provides a broad overview of the financial technology (FinTech) industry. Specifically, it will cover; how financial services have evolved key players and their roles; existing products, how FinTech has evolved key players and their innovations; technologies underpinning FinTech innovations, major FinTech innovations and their impact on financial services, regulations governing the financial services industry and how to identify and analyze future trends/opportunities of FinTech.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3

COMMERCE 4FZ3 - ISLAMIC FINANCE

With rapid globalization, the world economy is becoming increasingly integrated across countries and societies with divergent economic practices. Predominantly Islamic countries are becoming important suppliers and users of financial capital. In this course, students will gain an appreciation of common Islamic financial concepts (Murabaha, Musharaka, Istisna) instruments (Sukuk), relevant legal (Western and Islamic) jurisprudence, and regulatory and disclosure standards.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3 and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or Level IV of the Commerce program, or the Minor in Finance.

COMMERCE 4IA0 - INTERNSHIP PROGRAM: 12 MONTHS

Full-time paid employment in an approved internship providing students with work experience related to their academic curriculum. After securing an internship position, students must successfully complete a minimum twelve months of experience, obtain satisfactory employer evaluation(s) and submit a detailed

work term report prior to their return to campus. All internship students will be enrolled in COMMERCE 4IA0 for the first three semesters of their internship position. Upon successful completion of the internship requirements, a notation including the name of the employer and dates of employment will be added to the student transcript.

Prerequisite(s): COMMERCE 2IN0 (or 3IN0) and permission of the Manager of Student Experience - Career and Professional Development

This course will be evaluated on a pass/fail basis.

COMMERCE 4IB0 - INTERNSHIP PROGRAM: 16 MONTHS

Full-time paid employment in an approved internship providing students with work experience related to their academic curriculum. After securing an internship position, students must successfully complete a minimum twelve months of experience, obtain satisfactory employer evaluation(s) and submit a detailed work term report prior to their return to campus. All internship students will be enrolled in Commerce 4IA0 for the first three semesters of their internship. Students completing a sixteen month internship will be enrolled in COMMERCE 4IB0 for their final semester. Upon successful completion of the internship requirements, a notation including the name of the employer and dates of employment will be added to the student transcript.

Prerequisite(s): COMMERCE 2IN0 (or 3IN0) and permission of the Manager of Student Experience - Career and Professional Development

This course will be evaluated on a pass/fail basis.

COMMERCE 4KF3 - PROJECT MANAGEMENT

Topics include: project selection, project organization structures, life cycles, planning, estimation, budgeting, resource allocation, contracting, project management software, reporting and controlling issues and conflict management.

Lectures and online (three hours)

Prerequisite(s): Registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or Level IV of the Commerce program, or the Minor in Innovation

Antirequisite(s): COMMERCE 4QF3

COMMERCE 4KG3 - DATA MINING FOR BUSINESS ANALYTICS

Business Analytics (BA) is a technology-driven process for analysing data and presenting actionable information to help corporate executives, business managers and other end users make more informed business decisions. The course is designed for students in multiple business areas. Students will learn the concepts, techniques, and applications of data mining and business analytics through lectures, class discussions, hands-on assignments, and seminar presentations.

Lectures (three hours)

Prerequisite(s): COMMERCE 2QA3 (or equivalent) and enrollment in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program; or enrollment in Level IV of the Commerce program; or instructor permission.

COMMERCE 4KH3 - STRATEGIES FOR ELECTRONIC AND MOBILE BUSINESS

This course covers the strategic issues that the modern business manager must deal with in making strategic decisions concerning the choice, implementation and execution of electronic and mobile business solutions for start-ups and established enterprises.

Lectures (three hours)

Prerequisite(s): COMMERCE 2KA3 or IBH 2AB3; and registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program, or the Minor in Innovation; or Level IV of the Commerce program

COMMERCE 4KI3 - BUSINESS PROCESS MANAGEMENT

This course enables students to learn about the methodologies used in business process management and related information technologies in support of process innovation. These techniques are learned through hands-on practice with SAP

Business One (B1) software and simulation targeted to small and medium sized enterprises.

Lectures (three hours)

Prerequisite(s): COMMERCE 2KA3 or IBH 2AB3; or instructors approval, and registration and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program, or the Minor in Innovation; or Level IV of the Commerce program

COMMERCE 4KX3 - SPECIAL TOPICS IN INFORMATION SYSTEMS

Various topics in information systems are considered. They will vary depending upon recent developments in the field and upon the research interests of the instructor. The topics to be included are announced at the time of course offering. For information on course offerings, please refer to the School of Business web site at <http://ug.degroote.mcmaster.ca/course-outlines/> or contact the Academic Programs Office, DSB 112.

Prerequisite(s): COMMERCE 2KA3 or IBH 2AB3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program; or Level IV of the Commerce program.

Commerce program COMMERCE 4KX3 may be repeated, if on a different topic, to a total of six units.

COMMERCE 4MA3 - ADVERTISING AND INTEGRATED MARKETING COMMUNICATION

The course introduces learners to the strategic role of advertising and its various forms print, radio, television, social, experiential, events, viral and consumer generated content in effective marketing. Students understand how to develop communications objectives, formulate a creative strategy, compare and select various forms of media to deliver on brand goals. It offers opportunity to practice the process of analyzing an opportunity, formulating strategy, developing creative and implementing an IMC plan.

Lectures (three hours)

Prerequisite(s): COMMERCE 2MA3 or IBH 2AA3; Enrollment in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program; or enrollment in Level IV of the Commerce program.

COMMERCE 4MC3 - NEW PRODUCT MARKETING

This course covers the management of new products from the idea stage through to product launch with a strong practical orientation. A field project is a major component of the course.

Lectures (three hours)

Prerequisite(s): COMMERCE 3MC3 or IBH 3AB3; registration in any Honours Bachelor of Commerce or Engineering and Management program, or the Minor in Innovation; or Level IV of the Commerce program.

COMMERCE 4MD3 - BUSINESS MARKETING

An overview of business marketing including: derived demand, vendor analysis, the multiple buying unit, value analysis, competitive bidding, industrial design, key accounts, and trade shows.

Lectures (three hours)

Prerequisite(s): COMMERCE 3MC3 or IBH 3AB3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program; or Level IV of the Commerce program.

COMMERCE 4ME3 - SALES MANAGEMENT

Cases, presentations, field work, library research, role playing and group exercises help to understand customers, the selling process, sales presentations, negotiation, legal and ethical responsibilities, self and team management.

Lectures (three hours)

Prerequisite(s): COMMERCE 2MA3 or IBH 2AA3; enrollment in Level III or above of an Honours Bachelor of Commerce or Engineering & Management program, or the Minor in Innovation; or enrollment in Level IV of the Commerce program.

Antirequisite(s): Not open to students with credit or registration in COMMERCE 4MX3, if the topic was Sales Management.

COMMERCE 4MF3 - RETAILING MANAGEMENT

This course will familiarize students with key managerial and policy issues involved in the design, implementation and assessment of the retail mix. It will cover several areas relating to the institution of retailing, elements of the retail environment; and retail strategies.

Lectures (three hours)

Prerequisite(s): COMMERCE 3MC3 or IBH 3AB3; registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program; or Level IV of the Commerce program

COMMERCE 4MG3 - STRATEGIC PHILANTHROPY AND LEADERSHIP

In this course you will learn about the philanthropic sector in Canada through the hands-on process of granting over \$10,000 to a local charity(s). Seeded by a \$10,000 gift from the Learning by Giving Foundation, this course is designed to explore core aspects of the philanthropic and charitable sector. No previous experience with not-for-profit organizations is required. The purpose of this course is to introduce you to leadership practices in this sector and enhance your future capacity and expertise to make good investments for social, economic and environmental change through the charitable sector, either personally or as a member of a corporate social responsibility team.

Lectures (three hours)

Prerequisite(s): Registration in Level III or above in any four or five year program; or Instructor permission.

COMMERCE 4MH3 - ELECTRONIC MARKETING

The purpose of this course is to explore cutting edge marketing strategies in a dynamic e-commerce environment. Students will cover a wide range of issues including online consumer behaviours, website analytics, search engine marketing, online CRM, online channel and pricing strategies, social media marketing, and mobile marketing. This course is taught primarily through the case method and lectures but also includes readings, videos, workshops, guest speakers and assignments.

Lectures (three hours)

Prerequisite(s): COMMERCE 2MA3 or IBH 2AA3; registration in level III or above in any Honours Bachelor of Commerce, Engineering and Management program or HBI Program; or Level IV of the Commerce program.

COMMERCE 4MI3 - MARKETING ANALYTICS

Marketing departments are increasingly utilizing data routinely collected by their organizations to improve marketing decision making and more effectively allocate resources. This course will familiarize students with tools necessary for converting raw data into valuable consumer insights. The course offers a hands-on, practical approach, giving students the opportunity to become familiar with data analysis software. The course will emphasize both inference and prediction and highlight the trade-offs associated with different marketing analytics methods.

Prerequisite(s): Registration in any Honours Bachelor of Commerce, Engineering and Management program; COMMERCE 2MA3 (or IBH 2AA3) and COMMERCE 3MA3 for students registered in any Commerce program; COMMERCE 2MA3 (or IBH 2AA3) for students registered in any Engineering and Management

COMMERCE 4OB3 - ANALYSIS OF PRODUCTION/OPERATIONS PROBLEMS

An examination of analytical approaches to problems in the field of production/operations. The course will provide in-depth coverage of a limited number of topics. Enterprise resource planning system SAP is used to highlight some of the

concepts covered in this course. This course is used towards SAP Certification in Business Integration.

Lectures (three hours)

Prerequisite(s): One of COMMERCE 2OC3, 4QA3, MECHENG 4C03, or IBH 3BE3 (or 2BC3); and registration in level III or above in any Honours Bachelor of Commerce, or Engineering and Management program; or Level IV of the Commerce program

COMMERCE 4OD3 - PURCHASING AND SUPPLY MANAGEMENT

Students will gain skills that are necessary to manage purchasing operations in the private and public sectors. Topics include: purchasing policies, procedures, supplier selection, order management (including quality, quantity, delivery and price decisions), spend analytics, negotiation and contract management, outsourcing, international procurement and sustainability issues. Relevant procurement components of SAP's enterprise resource planning system will be demonstrated. This course can be used towards SAP Certification in Business Integration.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): One of COMMERCE 2OC3, 4QA3, or IBH 3BE3 (or 2BC3); and registration in level III or above in any Honours Bachelor of Commerce, or Engineering and Management program; or Level IV of the Commerce program.

COMMERCE 4OI3 - SUPPLY CHAIN MANAGEMENT

Supply chain, the network of materials, information and money, has become a key dimension in business competition. In this course, we will present the basic concepts and techniques in supply chain management using an integrated approach. We will also discuss the key drivers in supply chain management, and learn the success and failure stories of supply chain management. Enterprise resource planning system SAP is used to highlight some of the concepts covered in the course. This course is used towards SAP Certification in Business Integration.

Lectures (three hours)

Prerequisite(s): One of COMMERCE 2OC3, 4QA3, or IBH 3BE3 (or 2BC3); and registration in level III or above in any Honours Bachelor of Commerce, or Engineering and Management program; or Level IV of the Commerce program.

Antirequisite(s): COMMERCE 4QI3 or 4QX3 (if taken in Winter terms 2011, 2012, or 2013)

COMMERCE 4OT3 - TRANSPORTATION AND WAREHOUSING MANAGEMENT

Transportation and warehousing play a critical role in the supply chain and the economy. They are a key enablers for customer-oriented strategies such as same-day or overnight deliveries. This course will help students understand the strategic role of transportation and logistics. The course covers concepts such as transportation costing and pricing; warehouse equipment and operations; warehouse layout; order processing; and transportation network design and optimization. The course will also use SAP.

Lectures (three hours)

Prerequisite(s): COMMERCE 3QA3 and registration in Level III or above in any Honours Bachelor of Commerce or Engineering and Management program; or Level IV of the Commerce program

COMMERCE 4PA3 - BUSINESS POLICY: STRATEGIC MANAGEMENT

As the capstone to the program, this case course is designed to unify the student's learning experience by exploring the formulation and implementation of corporate strategy.

Lectures (three hours)

Prerequisite(s): COMMERCE 3MC3 or IBH 3AB3; and registration in Level IV of an Honours Bachelor of program or Level V of an Engineering and Management program, or the Minor in Innovation

COMMERCE 4QA3 - OPERATIONS MODELLING AND ANALYSIS

A course that looks at productions and operations management as practiced in engineering and manufacturing industries and the services sector.

Lectures (three hours)

Prerequisite(s): One of STATS 2MA3, 3J04, 3N03, 3Y03, MATLS 3J03, ENGPHY 3W04 A/B, COMMERCE 2QA3, IBH 2AD3 or equivalent, and registration in any Engineering and Management, or Mechanical Engineering program; or registration in Level IV or V of any Engineering Physics program

Antirequisite(s): COMMERCE 20C3, IBH 2BC3, 3BE3

COMMERCE 4QC3 - MODELLING AND ANALYTICS USING EXCEL

This course will enable students to gain familiarity with analytics, and then develop a comprehensive understanding of prescriptive analytics. They will develop the ability to logically model managerial problems drawn from various functional areas in MS Excel (and in some instances mathematically). Students will use Excel add-in functions (and other software as needed) to solve the posed problems, and analyze them to develop useful managerial insights.

Lectures (three hours)

Prerequisite(s): COMMERCE 3QA3 and registration in any Honours Bachelor of Commerce or Engineering and Management program; or Commerce 4QA3 and registration in any Engineering and Management program.

Engineering and Management students may take COMMERCE 4QC3 concurrently with COMMERCE 4QA3 with permission of the instructor.

COMMERCE 4QX3 - SPECIAL TOPICS IN OPERATIONS MANAGEMENT

Various topics in operations management are considered. They will vary depending upon recent developments in the field and upon the research interests of the instructor. The topics to be included are announced at the time of course offering. For information on course offerings, please refer to the School of Business website at <http://ug.degroote.mcmaster.ca/course-outlines/> or contact the Academic Programs Office, DSB 112.

Lectures (three hours)

Prerequisite(s): COMMERCE 20C3 or IBH 3BE3 (or 2BC3); registration in any Honours Bachelor of Commerce Program or Level IV of the Commerce program or Commerce 4QA3 and registration in any Engineering & Management program.

COMMERCE 4SA3 - INTERNATIONAL BUSINESS

The key features of, and trends in, the global business environment. The implications of cultural and political differences. Comparative operational practices and multinational management.

Lectures (three hours)

Prerequisite(s): COMMERCE 3MC3 or IBH 3AB3; and registration in Level IV of an Honours Bachelor of Commerce program or the Minor in Innovation or Level V of any Engineering and Management program or with instructor permission

COMMERCE 4SB3 - INTRODUCTION TO CANADIAN TAXATION

The principles of Canadian federal income taxation are examined in detail, emphasizing the application of both statute and common law to individuals' and businesses' situations.

Lectures (three hours)

Prerequisite(s): Credit or registration in COMMERCE 3AB3 and registration in any Honours Bachelor of Commerce or Engineering and Management program

COMMERCE 4SC3 - ADVANCED CANADIAN TAXATION

This course continues the study of Canadian federal income taxation with an in-depth coverage of selected provisions of the Income Tax Act pertaining to business activities, particularly the activities of corporations.

Lectures (three hours)

Prerequisite(s): COMMERCE 4SB3; and registration in any Honours Bachelor of Commerce or Engineering and Management program.

COMMERCE 4SD3 - COMMERCIAL LAW

This course emphasizes those areas of law which are most relevant to business activity. Particular attention is given to the law relating to contracts and business organizations. Other areas of study include: sources of law, the judicial process, real and personal property, torts, agency, credit and negotiable instruments.

Lectures (three hours)

Prerequisite(s): Registration in any Honours Bachelor of Commerce or Engineering and Management program or the Minor in Innovation

COMMERCE 4SE3 - ENTREPRENEURSHIP

The problems and experiences encountered in starting and developing new enterprises will be studied. A cornerstone of the course is the development of a detailed business plan for a local entrepreneur.

Lectures (three hours)

Prerequisite(s): COMMERCE 3FA3; and COMMERCE 3MA3, COMMERCE 3MC3, or IBH 3AB3; and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program, or the Minor in Innovation

COMMERCE 4SG3 - SUSTAINABILITY: CORPORATIONS AND SOCIETY

The goal of this course is to familiarize students with a variety of sustainability related concepts including the triple bottom line, resilience, stakeholder engagement, the tragedy of the commons, sustainability and technology, and sustainable business models. Using cases, simulations, guest speakers, a group project and reflection, students will sharpen their ability to critically analyze and debate complex and systemic issues from an informed position. Students will emerge from this course understanding both the challenges and opportunities inherent in sustainability.

Lectures (three hours)

Prerequisite(s): Registration in Level III or IV of a four or five year program or instructor permission

COMMERCE 4SH3 - CASE ANALYSIS AND PRESENTATION SKILLS

Cases allow students to directly apply and integrate theories from various business disciplines to real-world situations/problems. Students will be working in teams and will have the opportunity to present their analysis and recommendations to a panel of judges. Hence, they will also develop their presentation skills, team and time management and communication skills. The first half of the course will provide students with the tools they need to approach case analysis. These tools include problem solving methodologies, communication approaches and team building skills. The final half of the course will allow students to practice applying these tools in case analysis situations in a three hour format. The cases will cover various industries and companies as well as different disciplines. Students will also be able to critique the analysis and presentation skills of their peers.

Lectures (three hours)

Prerequisite(s): COMMERCE 3MC3 or IBH 3AB3; or instructor permission

COMMERCE 4SM3 - SPORTS MANAGEMENT

This course emphasizes management principles as they relate to the business of sports. Students are introduced to the following sports management issues: marketing and advertising of sports events and brands, understanding of legal and ethical issues in sport, media and promotion, sponsorship and event management, sports equipment and product management, recreational sports management and other related areas. There is an emphasis on developing and improving communication skills as much of the course content will be case-based. An overview is provided with regard to career opportunities in the sports management field.

Lectures (three hours)

Prerequisite(s): Registration in Level IV or above or permission of the Instructor

COMMERCE 4SX3 - SPECIAL TOPICS IN STRATEGIC MANAGEMENT

Various topics in business are considered. They will vary depending upon recent developments in the field and upon the interests of the instructor. The topics to be included are announced at the time of the course offering.

Lectures (three hours)

Prerequisite(s): Registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program or permission of the instructor

COMMERCE 4SY3 - INDEPENDENT STUDY IN BUSINESS

Faculty supervised research project. A supervising faculty member from the De-Groote School of Business must be arranged, and authorization of the Associate Dean (Academic) secured, in the term preceding the term of study.

Lectures (three hours)

Prerequisite(s): To be determined by the supervising faculty member and registration in level III or above in any Honours Bachelor of Commerce or Engineering and Management program or Level IV of the Commerce program. Project forms are available from DSB-112.

Antirequisite(s): COMMERCE 4SY3 (regardless of topic)

COMMUNICATION STUDIES

Note Regarding Level IV Seminars

Level IV Communication Studies seminars are open only to students registered in Level IV of an Honours program in Communication Studies. The Department is only able to offer a selection of the courses listed below each year. As course size is limited, seminar places in each course will be allotted in March of every year for the succeeding session. It is essential that students apply early to the Department for the seminars they wish to take.

Courses in Communication Studies are administered by the Department of Communication Studies and Multimedia.

Togo Salmon Hall, Room 331, ext. 23488

<http://csmm.humanities.mcmaster.ca/>

Courses

If no prerequisite is listed, the course is open. See also courses in Multimedia.

CMST 1A03 - INTRODUCTION TO COMMUNICATION

This course examines communication and media industries, content, and audiences in historical, social, political, economic, technological, and cultural contexts. Students will be introduced to basic theoretical perspectives, policy concerns, professional practices, and social issues foundational to communication studies. Lectures and tutorials (three hours); one term

CMST 2BB3 - CULTURE AND COMMUNICATION

An introduction to theoretical and methodological approaches to cultural studies focusing on communicative practice. Students will analyse relationships between cultural identity, producers, consumers, institutions, technologies and practices of mediated communication.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in Communication Studies or Multimedia

CMST 2DD3 - MEDIA ORGANIZATIONS

An examination of the occupational, professional and organizational structures and processes of media production in the press, radio, television and digital media. Topics include news gathering, radio and TV production practices and media management.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in Communication Studies or Multimedia

CMST 2G03 - PERFORMANCE AND PERFORMATIVITY

An introduction to the study of performative modes of communication such as storytelling, gesture, movement, dress. Students will learn to analyze the relationship between cultural performances, such as games, garage bands, group facilitation, or live theatre and social structures.

Three hours (lectures and discussion); one term

Prerequisite(s): Three units of Communication Studies, Multimedia or Theatre & Film, and registration in Level II or above

Antirequisite(s): SOTA 2G03, THTRFLM 2P03

CMST 2H03 - GENDER AND PERFORMANCE

An examination of gender as identities performed or constructed in complex social, historical and cultural processes and conditions, including how gender gives meaning to different performance texts, as well as to a range of performance practices in daily life.

Three hours (lectures and discussion); one term

Prerequisite(s): Three units of Communication Studies, Multimedia or Women's Studies, and registration in Level II or above

Antirequisite(s): WOMENST 2J03

CMST 2HM3 - HUMAN COMMUNICATION

This course examines how humans engage in interpersonal communications using self, group, nonverbal, intercultural and workplace communicative methods. Students will learn and demonstrate the importance of listening, critical thinking, and persuasive writing.

Three hours; one term

Prerequisite(s): Registration in Level II or above

CMST 2K03 - POLITICAL ECONOMY OF THE MEDIA

A comparative examination of changing patterns of ownership and control of the mass media in light of globalization, technological change, government policy, market restructuring and corporate consolidation.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of a program in Communication Studies or Multimedia or Justice, Political Philosophy and Law

CMST 2LW3 - COMMUNICATION POLICY AND LAW

An examination of communication law and policy. Topics include freedom of expression and the press, telecommunications and broadcasting regulation, Internet law, privacy, and intellectual property.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in Communication Studies, Multimedia, or Justice, Political Philosophy and Law

Antirequisite(s): CMST 3I03

CMST 2PR3 - PUBLIC RELATIONS: PRINCIPLES AND PRACTICES

An introduction to fundamental skills, knowledge, theory and problem-solving techniques currently used in the practice of public relations, using the case study method.

Three lectures; one term

Prerequisite(s): CMST 1A03 and registration in Level II or above of a program in Communication Studies or Multimedia

CMST 2RA3 - APPLICATION IN COMMUNICATION THEORY AND METHODS

Building from the theoretical and methodological foundations introduced in 2TM6, students develop, refine, and apply research skills in a comprehensive research project. Multiple modes of writing and presentation of research will be emphasized.

Lectures and tutorial (three hours); one term

Prerequisite(s): CMST 2TM6 and registration in Level II or above of a program in Communication Studies

Antirequisite(s): CMST 2A03, 2B03 or 2C03

CMST 2TM6 - FOUNDATIONS IN COMMUNICATION THEORY AND METHODS

A comprehensive introduction to communication research in an integrated format, where students learn about the research process, theoretical frameworks, epistemological questions, research questions, ethics, links between theory and method, and a survey of quantitative and qualitative methods and modes of analysis.

Lectures and tutorial (six hours); one term

Prerequisite(s): Registration in Level II or above of a program in Communication Studies

Antirequisite(s): CMST 2A03, 2B03 or 2C03

CMST 3B03 A/B S - PRACTICAL ASPECTS OF MEDIA PRODUCTION

In consultation with a faculty member, students will complete an independent project or an applied placement on an approved topic involving the application of communication skills, theories and methodologies. It is the student's responsibility to obtain the agreement of the Instructor and to complete a proposal form (available in the Communication Studies Office). Independent Study proposals must be approved by the Committee of Instruction during the term before the project is to be done.

Prerequisite(s): Registration in Level III or IV of a program in Communication Studies or Multimedia with a Grade Point Average of at least 8.5 and permission of the Committee of Instruction

CMST 3CY3 - CHILDREN, YOUTH, AND MEDIA

This course explores the relationship between children, youth, and media, including central debates, theories, and research. Core concerns involve media literacy; cultural, educational, and social policy; media analysis; identity, reception; social media and new technologies; and youth media production.

Three hours; one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies or Multimedia

Antirequisite(s): CMST 2EE3

CMST 3D03 - POLITICAL COMMUNICATION

The relationship between politics and the media is analyzed in terms of issues such as political news coverage, electioneering, political marketing, policy formation and publicity, and agenda-setting and public opinion.

Three lectures (three hours); one term

Prerequisite(s): Registration in Level III or above in a Communication Studies or Political Science program

Cross-list(s): POLSCI 3BB3

This course is administered by the Department of Political Science.

CMST 3H03 - CREATING CEREMONIES

An examination of the performative aspects of ceremonies and rituals such as weddings, funerals, political inaugurations, parades, mass, festivities around such religious celebrations as Christmas and Hanukkah, and the rituals associated with theatre and concert going.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies or Multimedia

CMST 3HC3 - HISTORY OF COMMUNICATION

A survey of communication history with attention to the Canadian context. This course will include discussions of orality and literacy; manuscript, print and electronic media; and the role of gender, race, and class in media history. Students will

engage with methodologies including archival research, primary source analysis, and digital humanities approaches.

Lectures and tutorials (three hours); one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies

Antirequisite(s): CMST 2CC3

CMST 3II3 - COMMUNICATION AND THE POLITICS OF INTELLECTUAL PROPERTY

An examination of intellectual property from a practical/legal perspective, and in broader context. Exploring the politics of intellectual property online and offline: philosophies and practices, politics and institutions, and alternatives.

Three hours; one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies or Multimedia

CMST 3JJ3 - THE RISE OF THE MUSIC INDUSTRY

This course examines the role of early media, technology, performance and business practices in the development of popular music styles, audiences and cultural meanings. Topics include Tin Pan Alley, race records and big bands on radio.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies

CMST 3K03 - MEDIA AUDIENCES AND EFFECTS

An examination of the media/audience relationship in light of different theories of media effects including social learning, agenda-setting, uses and gratifications, active audiences and cultivation analysis.

Three lectures; one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies or Multimedia

CMST 3RR3 - RACE, RELIGION AND MEDIA

This course examines historical constructions of different races and religions in the media, primarily film, television and the press, and asks how these constructions may manifest themselves in contemporary forms of media and in current events. Students will learn to deconstruct visual and written depictions across a variety of media.

Three hours; one term

Prerequisite(s): Registration in Level III or above in a program of Communication Studies

CMST 3S03 - TELEVISION AND SOCIETY

This course will examine television as a socio-cultural and political phenomenon. This course will involve theoretical and empirical analysis of the television industry, production, texts and genres, and audiences. Major debates in television studies will be addressed.

Three hours; one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies or Multimedia

CMST 3SM3 - BUILDING PUBLICS USING SOCIAL MEDIA

Survey of social media tools available to communications practitioners. Concept of 'building a public' is examined from an interdisciplinary perspective. Emphasis is placed on the techniques of rhetoric and persuasion.

Three hours; one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies or Multimedia

CMST 3WR3 - PROFESSIONAL WRITING

This course offers instruction on a variety of professional communication formats and styles in a variety of media and communication contexts. The course will include lecture, workshop, and hands-on practice at writing and revision. Students will gain an advanced skill set and produce portfolio-level professional writing product. Lectures and workshops (three hours); one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies

Antirequisite(s): CMST 2F03

CMST 3Z03 - MOBILE PRACTICES, TECHNOLOGIES AND ART

Mobility is explored as a concept informing communication technology development, the notion of the ideal consumer/citizen, and as an artistic device. Assignments explore mobility as a trope enabling expression, innovation or resistance via textual and aesthetic interventions.

Lectures and tutorial (three hours); one term

Prerequisite(s): Registration in Level III or above of a program in Communication Studies or Multimedia

CMST 4A03 - INDEPENDENT RESEARCH PROJECT

Under the supervision of a Faculty Advisor students will complete an independent, original research project.

Prerequisite(s): Registration in Level IV of a program in Communication Studies with a Grade Point Average of at least 9.0; Departmental permission required

CMST 4D03 - INTERNATIONAL COMMUNICATION

The relationship between globalization and the media is examined in light of the debates over cultural imperialism, information and technology flow, cultural hybridization and the media's impact on socio-economic development.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level IV of a program in Communication Studies; Departmental permission required

CMST 4E03 - MEDIA AND PROMOTIONALISM

An examination of the media's role in the promotion of different interests, values and patterns of behaviour. Topics include advertising, public relations, social activism and public information campaigns.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level IV of a program in Communication Studies; Departmental permission required

CMST 4M03 - COMMUNICATION, CULTURE AND TECHNOLOGY

This course surveys social patterns of reception and adaptation of communication technologies and their interaction with cultural constructions of (gendered) bodies, everyday life, organization of space and time, and other cultural distinctions.

Lectures and discussion (Three hours); one term

Prerequisite(s): Registration in Level IV of a program in Communication Studies; Departmental permission required

CMST 4N03 - NEWS ANALYSIS: THEORY AND PRACTICE

This course examines analysis of news media content and structure. Students will critically analyze and complete a major content analysis research project.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level IV of a program in Communication Studies; Departmental permission required

CMST 4P03 - SOCIAL ACTIVISM AND THE MEDIA

This course examines the role of print, electronic and digital media in the relationship between social movements, the state and corporate interests.

Lecture and/or seminar (three hours); one term

Prerequisite(s): Registration in Level IV of a program in Communication Studies or Multimedia; Departmental permission required

CMST 4Q03 - BROADCASTING TRANSFORMATION IN A MULTIMEDIA ERA

Students examine how public broadcasters in Canada and internationally deal with challenges of political, economic, cultural and technological change, e.g. audience evolution, shifting regional and demographic composition, and new funding models. The course explores how the very model of mass media changes in an interactive, multimedia environment.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level IV of a program in Communication Studies; Departmental permission required

CMST 4X03 - COMMUNICATIONS FOR CAMPAIGNS AND ELECTIONS

Examination of tools, tactics and strategies employed by communications practitioners, strategists and managers during campaigns and elections. Effective use and construction of influence is analyzed using case studies and theory.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level IV of a program in Communication Studies; Departmental permission required

COMMUNITY ENGAGEMENT

Courses in Community Engagement are administered by the Faculty of Social Sciences.

Kenneth Taylor Hall, Room 129, ext. 23772

socscfac@mcmaster.ca

CMTYENGA 2A03 - FOUNDATIONS OF COMMUNITY ENGAGEMENT

Regardless of your degree, you will be a member of many communities - your workplace, your professional group, your neighbourhood, your city, your country, the world. You will be called upon to participate in community activities and community change. This course provides you with an understanding of how communities function, the politics and processes involved in community participation and leadership. It will focus on developing the beginning skills for effective and ethical community engagement.

Three hours; one term

Prerequisite(s): Registration in Level II or above; priority will be given to students in Level II

CMTYENGA 2MC3 - DESIGN AND CREATION OF ENGAGED LEARNING FOR COMMUNITY YOUTH

McMaster Children and Youth University (MCYU) creates and delivers inquiry-based learning activities for youth aged 7 to 14 and their families in all areas of STEAM. In this introductory course, you will learn the best practices for pedagogical design, the principles of community-engagement, and the art of knowledge translation and communication. In small groups, you will create an interactive workshop or a short electronic book chapter that may become part of the MCYU collection. Completion of the CMTYENGA 2MD3 after CMTYENGA 2MC3 is recommended. Applications are available on the MCYU website <https://mcyu.ca>. Applications must be submitted by 1 April of the preceding academic year.

Successful students will be notified by 15 May.

Three hours; one term

Prerequisite(s): Registration in Level II or above; submission of an application and permission of the instructor

CMTYENGA 2MD3 - COMMUNITY-BASED LEARNING WITH MCYU

In partnership with the McMaster Children and Youth University (MCYU), students will take inquiry-based learning activities into the Hamilton community, including

community centres and libraries. In this course, students will learn how to communicate research effectively to a younger audience and practice leadership and knowledge translation skills. Completion of CMTYENGA 2MC3 prior to CMTYENGA 2MD3 is recommended.

Applications are available on the MCYU website <https://mcyu.ca>. Applications must be submitted by 1 April of the preceding academic year.

Successful students will be notified by 15 May.

Three hours; one term

Prerequisite(s): Registration in Level II or above; submission of an application and permission of the instructor

CMTYENGA 4A06 - SEMESTER AT CITYLAB: DESIGN AND DIALOGUE INQUIRY

Semester at CityLAB (composed of both CMTYENGA 4A06 - Design and Dialogue Inquiry and CMTYENGA 4A09 - Applied Project Experience) is a project based experiential class where students work in interdisciplinary teams mentored by City of Hamilton staff and course instructors to address real challenges faced by the City. Using an inquiry model and drawing on an associated city-identified challenge, this course develops disciplinary capabilities in design thinking, dialogue, project management, and public communication, and prepares students to co-create, test, and evaluate a project. This course requires permission from the Office of Community Engagement.

Six hours; One term

Co-requisite(s): CMTYENGA 4A09

Prerequisite(s): Registration in Level III or IV.

CMTYENGA 4A09 - SEMESTER AT CITYLAB: APPLIED PROJECT EXPERIENCE

Semester at CityLAB (composed of both CMTYENGA 4A06 Design and Dialogue Inquiry and CMTYENGA 4A09 Applied Project Experience) is a project based experiential class where students work in interdisciplinary teams mentored by City of Hamilton staff and course instructors to address real challenges faced by the City. In addition to intensive workshops, field trips, and dialogue sessions with staff and community members, students will work in interdisciplinary teams to directly apply their theoretical knowledge and skills to develop and hone a real-life project that addresses a specific challenge faced by Hamilton today. Students will be exposed to, and participate actively in, the civic life of Hamilton. This course requires permission from the Office of Community Engagement.

One term

Co-requisite(s): CMTYENGA 4A06

Prerequisite(s): Registration in Level III or IV

COMPUTER ENGINEERING

Courses in Computer Engineering are administered by the Department of Electrical and Computer Engineering.

Information Technology Building, Room A111, ext. 24347

<http://www.ece.mcmaster.ca/>

COMPENG 2D14 - LOGIC DESIGN

Binary numbers and codes; Boolean algebra; combinational circuit design; electrical properties of logic circuits; sequential circuit design; computer arithmetic; programmable logic; CPU organization and design.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): Registration in a program in Computer Engineering, Electrical Engineering, Engineering Physics (Photonics Engineering Stream), Physics, or Integrated Biomedical Engineering and Health Sciences (IBEHS)

Antirequisite(s): COMPSCI 2MF3, SFWRENG 2DA4

COMPENG 2DP4 - MICROPROCESSOR SYSTEMS

Introduction to computer organizations; algorithmic state machine design; micro processor based system design including memory and peripheral interfaces; interrupt systems; software development tools; machine-level coding and programming.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): COMPENG 2D14

Antirequisite(s): COMPENG 2DX4

COMPENG 2DX4 - MICROPROCESSOR SYSTEMS PROJECT

Microprocessor systems, introduction to the design process, project development by small teams of students, oral presentations and engineering report writing.

Lectures (two hours), labs (three hours), tutorial/design studio one hour every week; second term

Prerequisite(s): ELECENG 2C15, COMPENG 2SH4

Antirequisite(s): COMPENG 2DP4

COMPENG 2SH4 - PRINCIPLES OF PROGRAMMING

Fundamental concepts of programming languages: data types, assignment, control constructs, basic data structures, iteration, recursion, exceptions; imperative and object-orientated paradigms; composing and testing small programs.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): ENGINEER 1D04 and registration in a program in Electrical and Computer Engineering or the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Antirequisite(s): COMPSCI 2S03, SFWRENG 2S03

COMPENG 2SI4 - DATA STRUCTURES, ALGORITHMS AND DISCRETE MATHEMATICS

Data abstraction; algorithm analysis; recursion; lists; stacks; queues; trees; searching; hashing; sorting; sets; relations; functions; modular arithmetic; graph theory and algorithms.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ENGINEER 1D04, COMPENG 2SH4

Antirequisite(s): COMPSCI 2C03, 2DM3, SFWRENG 2C03, 2DM3

COMPENG 3DQ5 - DIGITAL SYSTEMS DESIGN

Advanced design methods of digital systems including modelling, simulation, synthesis and verification using hardware description languages, timing analysis and hardware debugging; implementation of computer peripherals in programmable devices.

Three lectures, one tutorial, one lab (three hours) every week; first term

Prerequisite(s): COMPENG 2D14 and 2DP4 or 2DX4

Students taking this course as an elective must receive the permission of the instructor.

COMPENG 3DR4 - COMPUTER ORGANIZATION

Instruction set design, computer arithmetic, assembly language, controller and datapath design, cache and memory systems, input-output systems, networks interrupts and exceptions, pipelining, performance and cost analysis, computer architecture history and a survey of advanced architectures.

Three lectures, one tutorial one lab (three hours) every other week; second term

Prerequisite(s): COMPENG 3DQ5

Antirequisite(s): COMPSCI 2GA3, SFWRENG 2GA3, 3GA3

COMPENG 3DY4 - COMPUTER SYSTEMS INTEGRATION PROJECT

A computer engineering design and implementation project of reasonable complexity to be completed by small groups of students; oral presentations and written reports. Second term

Prerequisite(s): COMPENG 2DX4, ELECENG 3TP3, ELECENG 3EJ4, COMPENG 3DQ5

Antirequisite(s): COMPENG 3DR4, ELECENG 3EY4

Co-requisite(s): ELECENG 3TR4, ELECENG 3CL4

First offered in 2020-2021.

COMPENG 3SK3 - COMPUTER-AIDED ENGINEERING

Numerical analysis; linear and nonlinear systems; least squares and matrix decomposition; polynomials, elements of linear algebra, optimization; numerical integration and differentiation; interpolation; engineering applications.

Three lectures, one tutorial; second term

Prerequisite(s): ELECENG 2CJ4; and MATH 2Z03

Antirequisite(s): SFWRENG 3X03, 4X03, COMPSCI 4X03

COMPENG 4DK4 - COMPUTER COMMUNICATION NETWORKS

Introduction to switching and communication networks; packet switching; shared media access and LANs; error control; network layer operation and the Internet; ISDN; wireless networks; performance and simulation.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): ELECENG 3TQ4 or 3TQ3 or ENGPYS 3W04

Antirequisite(s): COMPSCI 4C03

COMPENG 4DM4 - COMPUTER ARCHITECTURE

Overview of CISC/RISC microprocessors; performance metrics; instruction set design; processor and memory acceleration techniques; pipelining; scheduling; instruction level parallelism; memory hierarchies; multiprocessor structures; storage systems; interconnection networks.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): COMPENG 3DR4

Antirequisite(s): COMPSCI 2GA3, SFWRENG 2GA3, 3GA3

COMPENG 4DN4 - ADVANCED INTERNET COMMUNICATIONS

Advanced internet protocols; routing, security, encryption; quality of service; ATM, RSVP, video and voice over IP; terminals, gateways and gatekeepers; wireless networks; WDM systems; optical crossconnects.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): COMPENG 4DK4

COMPENG 4DS4 - EMBEDDED SYSTEMS

Embedded processor architectures and SOC organization; EDA tools for hardware/software co-design; co-verification and testability; interfacing; co-processors, soft processors and ASIP design; real-time systems; applications.

Two lectures, one tutorial, one lab every week; second term

Prerequisite(s): COMPENG 3DQ5, or permission of the Department

COMPENG 4EK4 - MICROELECTRONICS

CMOS and MOSFET integrated circuit design; fabrication and layout; simulation; digital and analog circuit blocks; computer-aided design and analysis; testing and verification.

Two lectures, one tutorial (two hours), one lab every other week; first term

Prerequisite(s): ELECENG 3EJ4, or ENGPYS 3BA3

COMPENG 4OH4 - ADVANCED RESEARCH PROJECT

A research-oriented project under the direct supervision of a faculty member to further foster initiative and independent creativity while working on an advanced topic. This research is based on the experience and results achieved in other research-based project courses.

Second term

Prerequisite(s): COMPENG 4OJ4 or ELECENG 4OJ4; prior arrangement with an Electrical and Computer Engineering faculty member, inclusion on the Dean's Honour List, registration in Level IV or V of any program in the Department of Electrical and Computer Engineering; or permission of the Department

COMPENG 4OJ4 - RESEARCH PROJECT

A research-oriented project under the direct supervision of a faculty member to foster initiative and independent creativity while working on an advanced topic.

First term

Prerequisite(s): Prior arrangement with an Electrical and Computer Engineering faculty member, inclusion on the Dean's Honour List, registration in Level IV or V of any program in the Department of Electrical and Computer Engineering; or permission of the Department

Antirequisite(s): COMPENG 4OK4, ELECENG 4OK4

COMPENG 4OK4 - RESEARCH PROJECT

A research-oriented project under the direct supervision of a faculty member to foster initiative and independent creativity while working on an advanced topic.

Second term

Prerequisite(s): Prior arrangement with an Electrical and Computer Engineering faculty member, inclusion on the Dean's Honour List, registration in Level IV or V of any program in the Department of Electrical and Computer Engineering; or permission of the Department

Antirequisite(s): COMPENG 4OJ4, ELECENG 4OJ4

COMPENG 4TL4 - DIGITAL SIGNAL PROCESSING

Classical filter theory; DFT and FFT; FIR and IIR digital filters; effects of finite precision; implementation of DSP systems; adaptive filtering; spectral analysis, signal compression.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): ELECENG 3TP4 or 3TP3

COMPENG 4TN4 - IMAGE PROCESSING

Digital image formation and representation; filtering, enhancement and restoration; edge detection; discrete image transforms; encoding and compression; segmentation; recognition and interpretation; 3D imagery; applications.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ELECENG 3TP4 or 3TP3; one of ELECENG 3TQ4, ELECENG 3TQ3 or STATS 3Y03 or permission of the instructor

COMPUTER SCIENCE

Courses in Computer Science are administered by the Department of Computing and Software.

Department Notes

1. Students wishing to pursue a Minor in Computer Science should see the Honours Computer Science program in the Faculty of Engineering section of this Calendar.
2. Please note that not all elective courses will be offered in each academic year.

Courses

If no prerequisite is listed, the course is open.

COMPSCI 1JC3 - INTRODUCTION TO COMPUTATIONAL THINKING

Inquiry into ideas and methods of computer science (CS), the science underlying our computational universe. Topics include what computers can and cannot do, the Internet and search engines, artificial intelligence, computer-controlled devices, and sustainability in computing.

Three lectures, one tutorial (two hours), first term

Prerequisite(s): One of MATH 1K03, Grade 12 Advanced Functions and Introductory Calculus U, Grade 12 Calculus and Vectors, or registration in Computer Science 1

COMPSCI 1MD3 - INTRODUCTION TO PROGRAMMING

Introduction to fundamental programming concepts: values and types, expressions and evaluation, control flow constructs and exceptions, recursion, input/output and file processing.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): One of MATH 1K03, 1LS3, Grade 12 Advanced Functions and Introductory Calculus U, Grade 12 Calculus and Vectors

Antirequisite(s): ENGINEER 1D04

COMPSCI 1TA3 - ELEMENTARY COMPUTING AND COMPUTER USE

Organization of microcomputers (hardware and operating systems) and overview of computer communications; introduction to information exchange using word processing/ presentation software, the Internet and Web pages; problem solving using electronic spreadsheets and database applications.

Three lectures, one tutorial; one term

Antirequisite(s): COMPSCI 1BA3, COMPSCI 1MD3, 1SA3, ENGINEER 1D04, MMEDIA 1A03

Not open to students with credit or registration in COMPSCI 1MA3, 1MC3, HUMAN 2E03.

COMPSCI 1XA3 - COMPUTER SCIENCE PRACTICE AND EXPERIENCE: BASIC CONCEPTS

Practical experience with implementing basic CS concepts such as data representation, recursion, computer architecture, concurrency. Hands-on application of CS concepts to formulating, analyzing, and solving problems.

One lecture, two labs (two hours each); second term

Prerequisite(s): Registration in Computer Science or permission of the Instructor

Co-requisite(s): One of COMPSCI 1MD3 or ENGINEER 1D04

COMPSCI 2C03 - DATA STRUCTURES AND ALGORITHMS

Basic data structures: stacks, queues, hash tables, and binary trees; searching and sorting; graph representations and algorithms, including minimum spanning trees, traversals, shortest paths; introduction to algorithmic design strategies; correctness and performance analysis.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): COMPSCI 2DM3

Antirequisite(s): SFWRENG 2C03

COMPSCI 2DM3 - DISCRETE MATHEMATICS WITH APPLICATIONS I

Functions, relations and sets; the language of predicate logic, propositional logic; proof techniques, counting principles; induction and recursion, discrete probabilities, graphs, and their application to computing.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): MATH 1ZC3 or MATH 1B03 or registration in the Honours Computer Science as a Second Degree (B.A.Sc.)

Antirequisite(s): COMPSCI 1FC3, SFWRENG 2DM3, 2E03, 2F03

COMPSCI 2FA3 - DISCRETE MATHEMATICS WITH APPLICATIONS II

Predicate logic and formal proofs, grammars and automata, modular arithmetic, and their applications to computing.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): COMPSCI 1FC3 or 2DM3

Antirequisite(s): SFWRENG 2E03, 2F03, 2FA3

COMPSCI 2GA3 - COMPUTER ARCHITECTURE

Introduction to logic gates, number representation, computer arithmetic, instruction-set architecture, datapath and control, pipelining, memory hierarchies, I/O systems, multiprocessor systems, measures of performance.

Three lectures, one tutorial, (one hour); first term

Prerequisite(s): COMPSCI 1MD3 or ENGINEER 1D04 or IBEHS 1P10

Antirequisite(s): COMPENG 3DR4, 4DM4, SFWRENG 2GA3, 3GA3

COMPSCI 2ME3 - INTRODUCTION TO SOFTWARE DEVELOPMENT

Software life cycle, quality attributes, requirements documentation, specifying behavior; classes and objects, interface specification; creational, structural, and behavioral software design patterns; implementation in code, reviews, testing and verification.

Three lectures one tutorial (two hours); second term

Prerequisite(s): COMPSCI 2DM3, 2S03

Antirequisite(s): SFWRENG 2AA4

COMPSCI 2S03 - PRINCIPLES OF PROGRAMMING

Fundamental concepts of programming: expressions, statements, procedures, control structures, iteration, recursion, exceptions; precise memory model of traditional imperative programming languages; basic data structures: records, arrays, dynamic structures; use of libraries.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): COMPSCI 1MD3 or ENGINEER 1D04 or MATH 1MP3 or IBEHS 1P10

Antirequisite(s): COMPENG 2SH4, 2SC3, SFWRENG 2MP3, 2S03

COMPSCI 2XA3 - COMPUTER SCIENCE PRACTICE AND EXPERIENCE: SOFTWARE DEVELOPMENT SKILLS

Unix and shell programming, makefiles, version control; assembly basics, translating high-level language into assembly, parameter passing, arrays, recursion; compiling, debugging, profiling, and software optimizations.

Two lectures, one lab (three hours per week), first term

Prerequisite(s): COMPSCI 1MD3 or ENGINEER 1D04 or IBEHS 1P10

Co-requisite(s): COMPSCI 2S03

Antirequisite(s): SFWRENG 2XA3

COMPSCI 2XB3 - COMPUTER SCIENCE PRACTICE AND EXPERIENCE: BINDING THEORY TO PRACTICE

Open-ended design of computational solutions to practical problems that involve both theoretical (algorithmic) analysis and implementation; solving computational problems through an experiential approach.

One lecture, two labs (two hours each), second term

Prerequisite(s): COMPSCI 2S03, 2XA3

Co-requisite(s): COMPSCI 2C03, 2ME3

Antirequisite(s): SFWRENG 2XB3

COMPSCI 3AC3 - ALGORITHMS AND COMPLEXITY

Basic computability models; the Church-Turing thesis, complexity classes; P versus NP; NP-completeness, reduction techniques; algorithmic design strategies; flows, distributed algorithms, advanced techniques such as randomization.

Three lectures, one tutorial (one hour), second term

Prerequisite(s): COMPSCI 2C03, COMPSCI 2FA3

COMPSCI 3DB3 - DATA BASES

Data modelling, integrity constraints, principles and design of relational databases, relational algebra, SQL, query processing, transactions, concurrency control, recovery, security and data storage.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): COMPSCI 1FC3 or COMPSCI 2DM3

Antirequisite(s): COMPSCI 4EB3, SFWRENG 3DB3, 3H03, 4M03, 4DB3

COMPSCI 3EA3 - SOFTWARE SPECIFICATIONS AND CORRECTNESS

Formal specifications in software development; logical formalisms; functional and relational specifications; completeness and consistency of specifications; verification; validation; presentation of information; tool supported verification.

Three lectures; one tutorial (one hour); second term

Prerequisite(s): COMPSCI 2DM3, 2FA3, 2ME3, 3SD3

COMPSCI 3FP3 - FUNCTIONAL PROGRAMMING

Functional programming; lists and algebraic data types, pattern matching, parametric polymorphism, higher-order functions, reasoning about programs; lazy and strict evaluation; programming with monads; domain-specific languages.

Three lectures, one tutorial; first term

Prerequisite(s): COMPSCI 2DM3, 2FA3

Antirequisite(s): SFWRENG 3FP3

Cross-list(s): SFWRENG 3FP3

COMPSCI 3GC3 - COMPUTER GRAPHICS

Mathematical foundations, the graphics pipeline, geometrical transformations, 3D visualization, clipping, illumination and shading models and the impact of graphics on society.

Three lectures, one tutorial (two hours every other week); first term

Prerequisite(s): Registration in Honours Computer Science or Honours Business Informatics, Honours Business Informatics Co-op (B.A.Sc.)

Antirequisite(s): SFWRENG 3GC3

Cross-list(s): SFWRENG 3GC3

COMPSCI 3I03 - COMMUNICATION SKILLS

Oral and written presentation skills; types and structure of technical documents; software documentation for the user; formulating and presenting proposals.

Three hours (lectures, discussion, group project, seminars); first term

Prerequisite(s): Registration in Level II or above of Honours Computer Science or Honours Business Informatics

Antirequisite(s): COMPSCI 2CS3, 2I03, SFWRENG 3I03

Cross-list(s): SFWRENG 3I03

Not open to students with credit or registration in ISCI 1A24 A/B.

COMPSCI 3IS3 - INFORMATION SECURITY

Basic principles of information security; threats and defences; cryptography; introduction to network security and security management.

Three lectures; first term

Prerequisite(s): Credit or registration in COMPSCI 2FA3 or SFWRENG 2FA3

Offered on an irregular basis.

COMPSCI 3MI3 - PRINCIPLES OF PROGRAMMING LANGUAGES

Design space of programming languages; abstraction and modularization concepts and mechanisms; programming in non-procedural (functional and logic) paradigms; introduction to programming language semantics.

Three lectures; one tutorial (one hour); first term

Prerequisite(s): COMPSCI 2C03 and 2FA3

COMPSCI 3RA3 - SOFTWARE REQUIREMENTS AND SECURITY CONSIDERATIONS

Software requirements gathering. Critical systems requirements gathering. Security requirements. Traceability of requirements. Verification, validation, and documentation techniques. Software requirements quality attributes. Security policies. Measures for data confidentiality. Design principles that enhance security. Access control mechanisms.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): COMPSCI 2FA3, 2ME3

Antirequisite(s): COMPSCI 3SR3, 4EF3, SFWRENG 3R03, 3RA3, 4EF3

Cross-list(s): SFWRENG 3RA3

COMPSCI 3SD3 - CONCURRENT SYSTEMS

Models of concurrency: process algebras, Petri nets, temporal logics and model checking; concurrency as software structuring principle: processes, threads, synchronization mechanisms, resource management and sharing; deadlock, safety and liveness; design, verification and testing of concurrent systems.

Three lectures, one tutorial (two hours); first term

Prerequisite(s): COMPSCI 2C03, 2FA3, 2ME3

Antirequisite(s): SFWR ENG 3BB4

COMPSCI 3SH3 - COMPUTER SCIENCE PRACTICE AND EXPERIENCE: OPERATING SYSTEMS

Processes and threads, synchronization and communication; scheduling, memory management; file systems; resource protection; structure of operating systems.

Two lectures, one tutorial, two labs (one hour each); second term

Prerequisite(s): COMPSCI 3SD3, COMPSCI 2C03, and COMPSCI 2GA3

Antirequisite(s): COMPSCI 3MH3, 4SH3, SFWRENG 3SH3

COMPSCI 4AD3 - ADVANCED DATABASES

Advanced topics in database systems technology and design. Topics include: query processing; query optimization; data storage; indexing; crash recovery; physical database design; introductory data mining techniques.

Three lectures, one tutorial; second term

Prerequisite(s): COMPSCI 3DB3

Antirequisite(s): SFWRENG 4AD3

Cross-list(s): SFWRENG 4AD3

Offered on an irregular basis.

COMPSCI 4AR3 - SOFTWARE ARCHITECTURE

Software architecture concepts; architectural styles; design patterns, components, libraries, configurations; modelling languages; software re-engineering.

Three lectures; first term

Prerequisite(s): Credit or registration in COMPSCI 3RA3 or 3SR3

Offered on an irregular basis.

COMPSCI 4C03 - COMPUTER NETWORKS AND SECURITY

Physical networks, TCP/IP protocols, switching methods, network layering and components, network services. Information security, computer and network security threats, defence mechanisms, encryption.

Three lectures, one lab (three hours every other week); second term

Prerequisite(s): Credit or registration in COMPSCI 3MH3 or COMPSCI 3SH3

Antirequisite(s): COMPSCI 3CN3, 3C03, SFWRENG 4C03, COMPENG 4DN4

Cross-list(s): SFWRENG 4C03

COMPSCI 4DC3 - DISTRIBUTED COMPUTING

Models of distributed computation, formal reasoning about distributed systems, time and message complexity, distributed agreement under adversarial attacks, distributed coordination and symmetry breaking, peer-to-peer computing, simulation as a tool for building more advanced functionality, actor-model programming.

Three lectures, one tutorial; second term

Prerequisite(s): One of COMPSCI 2C03 or SFWRENG 2C03 or SFWRENG 2MD3, and one of COMPSCI 3SD3 or SFWRENG 3BB4 or SFWRENG 3SH3

Offered on an irregular basis.

COMPSCI 4E03 - PERFORMANCE ANALYSIS OF COMPUTER SYSTEMS

Use of queuing models and simulation to predict computer system performance and find bottlenecks in a system. Types of models, distributions. Markov models. Modelling storage and network behaviour, locks, critical sections, concurrency. Introduction to analytical system reliability.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): One of STATS 2D03, 2MA3, 3N03 or 3Y03

Antirequisite(s): SFWRENG 4E03

Cross-list(s): SFWRENG 4E03

COMPSCI 4EN3 A/B - SOFTWARE ENTREPRENEURSHIP

Issues in starting up a new software enterprise, with the focus on independent startups. This course will cover the technical, financial, legal and operational issues encountered by software startups. Small groups of students will take an idea and turn it into a prototype, a business plan, and a sales pitch. Lectures will cover issues from team formation to appropriate software development processes to patent protection to venture capital.

Three lectures; two terms

Prerequisite(s): Registration in Level III or IV of any Computer Science program

COMPSCI 4F03 - PARALLEL COMPUTING

Parallel architectures, design and analysis of parallel algorithms; distributed-memory, shared-memory and GPU computing; communication cost, scalability; MPI, OpenMP and OpenACC; tuning parallel programs for performance.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): Credit or registration in COMPSCI 3SD3. Completion of COMPSCI 4C03 is recommended.

Antirequisite(s): SFWRENG 4F03

Cross-list(s): SFWRENG 4F03

COMPSCI 4HC3 - HUMAN COMPUTER INTERACTION

Design of user interfaces. Principles of good interface design. Human input. Displaying complex data using graphics and virtual reality. Modes and mode awareness problem. Health issues, information overload. Special purpose graphics hardware. Interface design tools; on-line help systems.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): COMPSCI 3MH3 or 3SH3

Antirequisite(s): SFWRENG 4D03, 4HC3

Cross-list(s): SFWRENG 4HC3

COMPSCI 4ML3 - INTRODUCTION TO MACHINE LEARNING

Regression, Classification and Decision Theory, Bias-Variance Trade-off, Linear Models, Kernel Methods, Probabilistic Models, Neural Networks, Model Aggregation, Unsupervised Learning.

Three lectures, one tutorial; one term

Prerequisite(s): One of COMPSCI 2C03 or SFWRENG 2C03 or SFWRENG 2MD3.

One of STATS 1L03, STATS 2D03,

STATS 3Y03 is recommended. One of COMPSCI 4003 or 4X03 or SFWRENG 3003 or 4X03 is recommended.

Offered on an irregular basis.

COMPSCI 4003 - LINEAR OPTIMIZATION

Modelling and solutions for engineering and science problems using linear optimization, including networks, transportation, assignment, and scheduling problems. Solution methods include combinatorial algorithms such as simplex methods, primal-dual formulations, branch and bound formulations for mixed integer programming, and heuristics.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): COMPSCI 2C03

Antirequisite(s): SFWRENG 3003, 4003

Cross-list(s): SFWRENG 3003

COMPSCI 4TB3 - SYNTAX-BASED TOOLS AND COMPILERS

Lexical analysis, syntax analysis, type checking; syntax-directed translation, attribute grammars; compiler structure; implications of computer architecture; mapping of programming language concepts; code generation and optimization.

Two lectures, one tutorial, two labs (one hour each); second term

Prerequisite(s): COMPSCI 2C03 or SFWRENG 2C03, and COMPSCI 2GA3 or SFWRENG 2GA3 or 3GA3

COMPSCI 4TE3 - CONTINUOUS OPTIMIZATION

Fundamental algorithms and duality concepts of continuous optimization. Motivation, applicability, information requirements and computational cost of the algorithms is discussed. Practical problems will illustrate the power of continuous optimization techniques.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): One of MATH 2A03, 2M06 (or 2M03 and 2MM3), 2Q04, or 2ZZ3

Antirequisite(s): SFWRENG 4TE3

Cross-list(s): SFWRENG 4TE3

COMPSCI 4TH3 - THEORY OF COMPUTATION

Formal languages, models of computation, decidability, reduction techniques, time and space complexity classes.

Three lectures, one tutorial (one hour); one term

Prerequisite(s): COMPSCI 2FA3, 2C03

Antirequisite(s): SFWRENG 4TH3

Cross-list(s): SFWRENG 4TH3

Offered on an irregular basis.

COMPSCI 4TI3 - FUNDAMENTALS OF IMAGE PROCESSING

Discrete-time signals and systems, digital filter design, photons to pixels, linear filtering, edge-detection, non-linear filtering, multi-scale transforms, motion estimation.

Three lectures; first term

Prerequisite(s): Registration in Level III or above of a program offered by the Department of Computing and Software

Offered on an irregular basis.

COMPSCI 4WW3 - WEB SYSTEMS AND WEB COMPUTING

Network protocols underlying the world wide web; client-side programming: markup, styles, scripts, design, mobile/desktop; server-side programming: databases, dynamic languages; web services; cloud technologies; security.

Three lectures; one term

Prerequisite(s): COMPSCI 2ME3 or SFWRENG 2AA4; completion of COMPSCI 3DB3, 3IS3, or 4C03 is recommended.

Offered on an irregular basis.

COMPSCI 4X03 - SCIENTIFIC COMPUTATION

Computer arithmetic, stability, sensitivity. Numerical methods for polynomial manipulation, interpolation, data fitting, integration, differentiation, solving linear and non-linear systems, ordinary differential equations and eigenvalue problems.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): MATH 1ZZ5; or both MATH 1AA3 and MATH 1B03; or both MATH 1H03 and 1NN3; or both MATH 1ZB3 and MATH 1ZC3

Antirequisite(s): COMPENG 3SK3, 3SK4, COMPSCI 3X03, 4MN3, SFWRENG 3X03, 4X03

Cross-list(s): SFWRENG 4X03

COMPSCI 4Z03 - DIRECTED READINGS

Directed readings in an area of computer science of interest to the student and the instructor.

Prerequisite(s): Permission of the Chair of the Department and registration in Level IV of an Honours program in Computer Science

COMPSCI 4ZP6 A/B - CAPSTONE PROJECT

Students, in teams of two to four students, undertake a substantial project in an area of computer science by performing each step of the software life cycle. The lecture component presents an introduction to software management and project management.

Lecture component in term one, weekly tutorials; two terms

Prerequisite(s): Registration in Level IV of an Honours Computer Science program, Honours Business Informatics or Honours Computer Science as a Second Degree (B.A.Sc.)

EARTH SCIENCES

Courses in Earth Sciences are offered by the School of Geography and Earth Sciences. General Science Building, Room 206, ext. 24535

<http://www.science.mcmaster.ca/~geo/>

School Notes

1. Students aiming to fulfill the academic requirements for professional registration of Geoscientists in Ontario should seek academic advice from the School of Geography and Earth Sciences during March counselling in Level II to ensure that their program and course choices are appropriate.
2. Students are advised that not all courses will be offered in every year.

Courses

If no prerequisite is listed, the course is open.

See also courses in *Geography and Environmental Science*.

EARTHSC 1G03 - EARTH AND THE ENVIRONMENT

An introduction to Earth's composition and processes including topics such as rocks, fossils, plate tectonics, earthquakes, volcanoes, and glaciers. We will consider the interactions between people and Earth's environments and the implications for sustainable development. Two field trips will be held during regular lab periods. Three lectures, one lab (two hours); one term

Antirequisite(s): ENVIRSC 1G03

Not open to students with credit or registration in ISCI 1A24 A/B.

EARTHSC 2E03 - EARTH HISTORY

Geological evolution of the Earth and paleontological evidence for the evolution of marine life, with emphasis on the geological history of North America. Students enrolling in this course must purchase a field kit available through the School of Geography and Earth Sciences.

Two lectures, one lab (three hours); one term

Prerequisite(s): EARTHSC 1G03, ENVIRSC 1G03 or ISCI 1A24 A/B

Antirequisite(s): ENVIRSC 2E03

Not open to students with credit or registration in ISCI 2A18 A/B

EARTHSC 2FE3 - INTRODUCTION TO FIELD METHODS IN EARTH SCIENCES

A field camp to introduce students to field equipment and methodologies used by earth and environmental scientists focusing on recognition and description of rock types, construction of geological maps and cross-sections. Most of this course occurs outside the regular academic term, usually the first two weeks of May; details and applications are available in January.

Students enrolling in this course must pay both the incidental fees as prescribed by the School of Geography and Earth Sciences and the regular tuition fees. Students intending to enrol in this course must submit an application by February 15 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences main office after January 15. Students will be informed of acceptance of their application by March 1 subject to fulfillment of the requirements.

Prerequisite(s): One of EARTHSC 1G03, ENVIRSC 1G03, ISCI 1A24 A/B; and permission of the instructor

EARTHSC 2GG3 - NATURAL DISASTERS

A study of natural processes including plate tectonics, earthquakes, volcanoes, landslides, river erosion and climate change and their impacts on human populations. Lectures, web modules (three hours); one term

Prerequisite(s): Registration in Level II or above

EARTHSC 2K03 - OPTICAL CRYSTALLOGRAPHY AND MINERALOGY

Introduction to crystallography, optical theory, and the polarizing microscope. Identification of minerals in igneous and sedimentary rocks and discussion of their structure and chemistry.

Two lectures, one lab (three hours); one term

Prerequisite(s): ENVIRSC 1G03 or ISCI 1A24 A/B

EARTHSC 2T03 - GEOLOGY OF CANADA

Description and understanding of the tectonic processes involved in the development and evolution of the Precambrian rocks of Canada.

Students enrolling in this course must purchase a field kit available through the School of Geography and Earth Sciences.

Two lectures, one lab (three hours); one term

Prerequisite(s): One of EARTHSC 1G03, ENVIRSC 1G03, ISCI 1A24 A/B

EARTHSC 3CC3 - EARTH'S CHANGING CLIMATE

The earth's climatic history including natural causes of past climate change and human influences on climate will be explored.

Lectures (three hours); one term

Prerequisite(s): One of EARTHSC 2C03, 2E03, 2Q03, ENVIRSC 2C03, 2E03, 2Q03, ISCI 2A18 A/B, LIFESCI 2H03; and registration in Level III or above

Antirequisite(s): ENVIRSC 3CC3

EARTHSC 3E03 - CLASTIC SEDIMENTARY ENVIRONMENTS

Sedimentary processes, stratigraphy and depositional environments of clastic systems. A mandatory local field trip will be included.

Two lectures, one lab (two hours); one term

Prerequisite(s): One of EARTHSC 2E03, ENVIRSC 2E03, ISCI 2A18 A/B

Antirequisite(s): ENVIRSC 3E03

EARTHSC 3FE3 - FIELD CAMP

A field camp to introduce students to field equipment and methodologies used by earth and environmental scientists. Most of this course occurs outside the regular academic term, usually the two weeks preceding the start of term in September; details and applications are available in March.

Students enrolling in this course must pay both the incidental fees as prescribed by the School of Geography and Earth Sciences and the regular tuition fees. Students intending to enrol in this course must submit an application by April 1 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences main office after March 1. Students will be informed of acceptance of their application by April 15 subject to fulfillment of the requirements.

Prerequisite(s): One of EARTHSC 2E03, ENVIRSC 2E03, ISCI 2A18 A/B; and EARTHSC 2T03; and registration in Level III or above of Honours Earth and Environmental Sciences; and permission of the instructor

EARTHSC 3K03 - PETROLOGY

Introduction to igneous and metamorphic petrology, including thin section examination of rock suites, use of phase diagrams in petrology, and discussion of petrogenesis.

Two lectures, one lab (three hours); one term

Prerequisite(s): EARTHSC 2K03

EARTHSC 3RD3 - RESEARCH DESIGN AND DISSEMINATION IN EARTH AND ENVIRONMENTAL SCIENCES

Review of approaches to the formulation of research questions, and to the gathering and interpretation of evidence, using a variety of environmental and earth sciences-based topics. The course includes the formulation of a research proposal, and develops skills in the communication of research results.

Two lectures, one lab (two hours); one term

Prerequisite(s): Registration in Level III or above of an Honours B.Sc. program in the School of Geography and Earth Sciences (Faculty of Science)

EARTHSC 3W03 - PHYSICAL HYDROGEOLOGY

Mechanisms and processes of water movement in the subsurface including the saturated zone (groundwater) and the unsaturated zone (soil water).

Two lectures, one lab (three hours); one term

Prerequisite(s): One of CIVENG 2J04, EARTHSC 2B03, 2W03, ENVIRSC 2B03, 2W03; and one of ISCI 1A24 A/B, MATH 1A03, 1B03, 1K03, 1LS3, 1M03, 1N03, 1ZA3

Antirequisite(s): ENVIRSC 3W03

EARTHSC 3Z03 - STRUCTURAL GEOLOGY

Introduction to mapping and geometric description of geologic structures and analysis of stress and strain in the subsurface.

Two lectures, one lab (three hours); one term

Prerequisite(s): One of EARTHSC 2E03, 2T03, ENVIRSC 2E03, ISCI 2A18 A/B. Completion of PHYSICS 1A03 (or 1C03) is strongly recommended.

EARTHSC 4CC3 - STABLE ISOTOPES IN EARTH AND ENVIRONMENTAL SYSTEMS

Stable isotopes are widely used in modern earth and environmental sciences because of their unique chemical properties that enable us to trace past and current environmental processes. This course will discuss the basic principles of stable isotope geochemistry and their applications to paleo and modern climate and environmental reconstruction.

Two lectures, one lab (three hours); one term

Prerequisite(s): One of EARTHSC 2Q03, EARTHSC 3CC3, ENVIRSC 2Q03, 3CC3. One of EARTHSC 2E03, ENVIRSC 2E03, ISCI 2A18 A/B is strongly recommended.

Co-requisite(s): WHMIS 1A00 if not already completed. Must be completed prior to the first lab.

Antirequisite(s): ENVIRSC 4CC3

EARTHSC 4FF3 - TOPICS OF FIELD RESEARCH

Selected topics in field research in the environmental and earth sciences. Topics may vary from year to year, and the timing of the course will depend on the offerings. Details will be posted in the School.

Students enrolling in this course must pay the incidental fees, as prescribed by the School of Geography and Earth Sciences, and the regular tuition fees. Students intending to enrol in this course must submit an application by April 1 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences main office after March 1. Students will be informed of acceptance of their application by April 15 subject to fulfillment of the requirements.

Prerequisite(s): Registration in Level III or above of an Honours B.Sc. program and permission of the instructor

Antirequisite(s): ENVIRSC 4FF3

EARTH SC 4FF3 may be repeated, if on a different topic, with the permission of the School of Geography and Earth Sciences.

EARTHSC 4G03 - GLACIAL SEDIMENTS AND ENVIRONMENTS

The development and movement of glaciers, glacial depositional processes and sedimentary successions in terrestrial, lacustrine and marine environments. A mandatory one day, local field trip will be included.

Students enrolling in this course must pay both the incidental fees as prescribed by the School of Geography and Earth Sciences and the regular tuition fees.

Two lectures, one lab (two hours); one term

Prerequisite(s): One of EARTHSC 3E03, ENVIRSC 3E03

Antirequisite(s): ENVIRSC 4G03

EARTHSC 4J03 - BASIN ANALYSIS

Focus on the evolution of sedimentary basins in a global context, based upon their structural and stratigraphic styles. Factors that affect basin evolution such as sea-level change, sediment supply and climate will be discussed. A review of the principles of sequence stratigraphy and its application to geologists, mining and petroleum exploration will be explored.

Two lectures, one lab (three hours); one term

Prerequisite(s): One of EARTHSC 3E03, ENVIRSC 3E03; and EARTHSC 3Z03

EARTHSC 4MT6 A/B - SENIOR THESIS

Students will select research topics and prepare a thesis either individually or in teams.

Students intending to enrol in this course must submit an application to the course coordinator by April 1 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences main office after March 1. Students will be informed of acceptance of their application on April 15 subject to fulfillment of the GPA requirement.

Two terms

Prerequisite(s): One of EARTHSC 3RD3, GEOG 3MA3; and registration in Level IV of an Honours program in the School of Geography and Earth Sciences; and a GPA of at least 7.5; and permission of the course coordinator

Cross-list(s): ENVIRSC 4MT6 A/B, GEOG 4MT6 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

EARTHSC 4P03 - CORAL REEF ENVIRONMENTS

Modern and ancient reef environments and their geological evolution. Students are encouraged to take concurrently Topics in Field Research (EARTHSC 4FF3) which studies coral reef systems in the Bahamas during the Winter mid-session break.

Two lectures, one lab (three hours); one term

Prerequisite(s): One of EARTHSC 2E03, ENVIRSC 2E03, ISCI 2A18 A/B

Antirequisite(s): EARTHSC 3P03, ENVIRSC 3P03

EARTHSC 4T03 - PLATE TECTONICS AND ORE DEPOSITS

Synthesis of plate tectonics, with application to crustal evolution and genesis of ore deposits.

Two lectures, one lab (two hours); one term

Prerequisite(s): One of EARTHSC 2E03, ENVIRSC 2E03, ISCI 2A18 A/B. EARTHSC 2K03 and EARTHSC 2T03 are strongly recommended.

EARTHSC 4VV3 - ENVIRONMENTAL GEOPHYSICS

Introduction to principles and applications of geophysics in groundwater and environmental investigations. Practical demonstrations in magnetics, gravity, shallow seismic, radar, borehole logging, surface EM and electrical methods.

Two lectures, one lab (three hours); one term

Prerequisite(s): EARTHSC 2E03 or ENVIRSC 2E03; and one of PHYSICS 1A03, 1C03; or ISCI 2A18 A/B

Antirequisite(s): EARTHSC 3V03, ENVIRSC 3V03

EARTHSC 4WB3 - CONTAMINANT HYDROGEOLOGY

Physical and chemical aspects of the fate and transport of contaminants in soils and groundwater, including fundamental processes, multiphase flow and groundwater remediation.

One lecture (two hours), one lab (two hours); one term

Prerequisite(s): Credit or registration in EARTHSC 3W03 or ENVIRSC 3W03

Antirequisite(s): ENVIRSC 4WB3

ECONOMICS

Courses in Economics are administered by the Department of Economics.
Kenneth Taylor Hall, Room 426, ext. 22765

<http://www.economics.mcmaster.ca>

Department Notes

- Not all the Economics courses listed in this Calendar are taught every year. Students are advised to consult the timetable published by the Office of the Registrar, or the Department website for information on current offerings.
- Students with credit in who transfer into Economics from other programs may substitute for .
- Students who complete ECON 2I03 are well placed to enrol in the Canadian Securities Course (a correspondence course operated by the Canadian Securities Institute which represents the licensing requirement for individuals training to become investment advisors).
- Students interested in an M.A. in Economics should consider the Honours Economics (Specialist Option). Also note that some, but not all, graduate programs in Economics require ECON 3G03, 4T03 and 4TT3. For this reason, students interested in an M.A. in Economics are advised to consult a departmental advisor for more detailed information.
- MATH 1M03 is required for any student planning to transfer into Commerce and strongly recommended for any student with a minor in Business or Finance. MATH 1M03 is required for ECON 3G03 and is strongly recommended for students planning any graduate study in economics.

Courses

If no prerequisite is listed, the course is open.

ECON 1B03 - INTRODUCTORY MICROECONOMICS

An introduction to the method and theory of microeconomics, and their application to the analysis of contemporary economic problems.

In-class and online; one term

Antirequisite(s): ARTSSCI 2E03

ECON 1B03 and ECON 1BB3 can be taken in either order or concurrently.

ECON 1BB3 - INTRODUCTORY MACROECONOMICS

An introduction to the method and theory of macroeconomics, and their application to the analysis of contemporary economic problems.

In-class and online; one tutorial; one term

Antirequisite(s): ARTSSCI 2E03

ECON 1B03 and 1BB3 can be taken in either order or concurrently.

ECON 2A03 - ECONOMICS OF LABOUR-MARKET ISSUES

This course applies economic analysis to issues of importance in the labour market. Topics vary and may include: women in the Canadian labour market; discrimination in hiring and promotion; unemployment; job loss and workplace closing; work sharing.

Three lectures; one term

Prerequisite(s): ECON 1B03 and 1BB3; or ARTSSCI 2E03

Cross-list(s): LABRST 3A03

Not open to students with credit or registration in ECON 3D03.

ECON 2B03 - ANALYSIS OF ECONOMIC DATA

Application of statistical concepts to the analysis of economic data, with attention to Canadian sources. Regression analysis and the use of spreadsheets are included. Topics may also include index numbers.

Three lectures; one term

Prerequisite(s): ECON 1B03, 1BB3 (or ARTSSCI 2E03); and one of MATH 1F03, 1K03, Grade 12 Calculus and Vectors U (or Grade 12 Advanced Functions and Introductory Calculus U); and STATS 1L03 or Grade 12 Mathematics of Data Management U

Antirequisite(s): COMMERCE 2QA3, GEOG 3MB3

Not open to students with credit or registration in ARTSSCI 2R03, CHEMENG 4C03, ELECENG 3TQ4, HTHSCI 2A03, MATLS 3J03, POLSCI 3N06 A/B, 3NN3, PNB 2XE3, 3XE3, SOCIOI 3H06 A/B, STATS 2B03, 2D03, 2MB3, 3Y03

ECON 2CC3 - HEALTH ECONOMICS AND ITS APPLICATION TO HEALTH POLICY

Economic analysis of health and health care, with a special emphasis on policy issues in the Canadian health care system.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): HEALTHST 2C03

Cross-list(s): HLTHAGE 2C03

Not open to students registered in an Economics program or with credit or registration in ECON 2G03, 2X03 or 3Z03. Students excluded from ECON 2CC3 or those wishing to do further work in Health Economics are referred to ECON 3Z03. May not be used to satisfy Economics unit requirements by students in Economics programs or a minor in Economics.

ECON 2D03 - ECONOMIC ISSUES

Applications of economics to important public issues, from a general interest perspective. Since topics vary from year to year, interested students should consult the Economics Department for further details.

Three lectures; one term

Prerequisite(s): ECON 1B03 and ECON 1BB3 (or ARTSSCI 2E03)

ECON 2GG3 - INTERMEDIATE MICROECONOMICS II

Theory of consumer choice and applications to intertemporal choice and labour supply decisions; theory of exchange, welfare economics and general equilibrium analysis.

Three lectures; one term

Prerequisite(s): ECON 2G03 or ECON 2X03; and one of MATH 1F03, MATH 1M03, Grade 12 Calculus and Vectors U (or Grade 12 Advanced Functions and Introductory Calculus U) or equivalent

Not open to students with credit or registration in ECON 2Z03 or 2ZZ3.

ECON 2H03 - INTERMEDIATE MACROECONOMICS I

Determinants of national income, employment, the rate of interest and the price level; introduction to the open economy.

Three lectures; one term

Prerequisite(s): ECON 1BB3 (or ARTSSCI 2E03); and one of MATH 1K03 or Grade 12 Advanced Functions U. Students without credit in one of MATH 1F03, 1M03, Grade 12 Calculus and Vectors U (or Grade 12 Advanced Functions and Introductory Calculus U) or equivalent are strongly advised to register in MATH 1F03 or MATH 1M03, concurrently with ECON 2H03.

ECON 2HH3 - INTERMEDIATE MACROECONOMICS II

This course uses macroeconomic theory based on microeconomic underpinnings to study common topics including business cycles, growth and financial crises.

Three lectures; one term

Prerequisite(s): ECON 2H03; and one of MATH 1F03, 1M03, Grade 12 Calculus and Vectors U (or Grade 12 Advanced Functions and Introductory Calculus U) or equivalent

ECON 2103 - FINANCIAL ECONOMICS

Detailed investigation of the financial sector. Topics include the role of capital markets in facilitating investment and growth, bond markets, stock markets, financial statements and taxation.

Three lectures; one term

Prerequisite(s): ECON 1B03 and 1BB3 (or ARTSSCI 2E03)

Not open to students with credit or registration in COMMERCE 2FA3.

ECON 2J03 - ENVIRONMENTAL ECONOMICS

Allocation of environmental services: efficiency and market failure; measuring environmental benefits; environmental regulation in Canada and elsewhere: taxes, tradable permits and other instruments; further topics.

Three lectures; one term

Prerequisite(s): ECON 1B03 (or ARTSSCI 2E03)

ECON 2K03 - ECONOMIC HISTORY OF CANADA

A survey of the changing structure of the Canadian economy from the colonial period to the present; early significance of primary production for export markets; emerging domestic markets and industrialization; government's role in promoting the development of the national economy.

Three lectures; one term

Prerequisite(s): ECON 1B03 and 1BB3 (or ARTSSCI 2E03)

ECON 2N03 - PUBLIC POLICY TOWARD BUSINESS

The economic effects of federal competition policy and the regulation of business by all levels of government.

Three lectures; one term

Prerequisite(s): ECON 1B03 (or ARTSSCI 2E03)

Antirequisite(s): ECON 3N03

ECON 2P03 - ECONOMICS OF PROFESSIONAL SPORTS

The application of economic principles to team and individual professional sports. Theory of sports leagues, demand for sports, the market for athletes, broadcasting rights, competition policy issues, the public finance aspects of stadium financing.

Three lectures; one term

Prerequisite(s): ECON 1B03 (or ARTSSCI 2E03)

ECON 2Q03 - ECONOMICS OF BAD BEHAVIOUR

This course will apply economic principles to analyze human behaviour. Topics include criminal behaviours, legal but risky behaviour, and the behaviour of corporate and public sector organizations.

Fully on-line; one term

Prerequisite(s): ECON 1B03 and 1BB3; or ARTSSCI 2E03

ECON 2T03 - ECONOMICS OF TRADE UNIONISM AND LABOUR

Topics include the economics of the labour market, of trade unionism, of work, the impact of trade unions on the labour market, economic theories of strikes and trade unions and the state.

Three lectures; one term

Prerequisite(s): ECON 1B03 and 1BB3 (or ARTSSCI 2E03)

Cross-list(s): LABRST 3B03

ECON 2Z03 - INTERMEDIATE MICROECONOMICS I

Theory of consumer choice; elements of production and cost; price and output determination in perfectly competitive markets.

Three lectures; one tutorial; one term

Prerequisite(s): ECON 1B03 (or ARTSSCI 2E03); and credit or registration in one of MATH 1A03, 1LS3, or 1M03.

ECON 2Z23 - INTERMEDIATE MICROECONOMICS II

Firm and consumer behaviour in imperfectly competitive markets and the markets for factors of production; the role of taxes and subsidies; theory of exchange, welfare economics and general equilibrium analysis. May include other special topics.

Three lectures; one term

Prerequisite(s): ECON 2Z03; and one of MATH 1A03, 1LS3, or 1M03.

ECON 3B03 - PUBLIC SECTOR ECONOMICS: EXPENDITURES

Theory and practice of public finance. Topics are selected from growth of the public sector, market failure, theory of public goods, incentive mechanisms, logic of group decisions and the political process, theory of benefit-cost analysis, intergovernmental fiscal relations, government budgeting.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03

ECON 3BE3 - BEHAVIOURAL ECONOMICS

Economic theory rests upon the assumptions that all economic actors (consumers, firms, governments) are fully rational and narrowly self-interested. Behavioural economics examines the consequences and realism of these assumptions by designing laboratory and field experiments and conducting empirical analyses that test economic theory and its core assumptions and by incorporating psychologically plausible assumptions and motivations into economic theory. This course provides a survey of some of the central and current topics in behavioural economics.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or 2X03

ECON 3C03 - PUBLIC SECTOR ECONOMICS: TAXATION

Theory and practice of public finance: analysis and comparison of the efficiency, equity and distribution effects of the taxation of income, wealth and expenditure, analysis of social insurance, intergovernmental fiscal relations.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03

ECON 3D03 - LABOUR ECONOMICS

Introduction to the economics of the labour market; demand for labour by the firm and industry; supply of labour by the individual; investment in human capital.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03

Not open to students with credit or registration in ECON 2A03.

ECON 3E03 - APPLIED ECONOMETRICS

Formerly ECON 3WW3

Students acquire hands-on experience, using statistical software, in the application of econometric methods to empirically analyze economic issues. This course emphasizes understanding economic data, economic model estimation, hypothesis testing, and interpretation of results.

Three hours; one tutorial; one term

Prerequisite(s): ECON 2G03, 2Z03 or 2X03; and 2H03; and 2B03 and enrolment in an Honours Economics program

Antirequisite(s): ECON 3U03, ECON 3WW3, ECON 3EE3

ECON 2B03 may be substituted with one of CHEMENG 4C03, COMMERCE 2QA3, POLSCI 3N06 A/B, 3NN3, PNB 2XE3, 3XE3, SOCIOL 3H06 A/B, STATS 2D03 or another course that is approved by a departmental counselor as equivalent to ECON 2B03.

Not open to students with credit in STATS 2MB3, 3D03 or credit or registration in ECON 4G03.

ECON 3EE3 - ECONOMETRICS I

Formerly ECON 3U03

Elaboration of regression techniques developed in ECON 2B03 and their applications. Problems of inference and interpretation in the analysis of economic data. Introduction to forecasting in economics.

Three lectures; one tutorial; one term

Prerequisite(s): ECON 2G03, 2Z03 or 2X03; and 2H03; and 2B03 with a grade of at least B-; and registration in an Honours Economics program with a GPA of at least 6. The ECON 2B03 prerequisite can be met by getting a grade of at least B+ in one of the following alternative statistics courses: CHEMENG 4C03, COMMERCE 2QA3, POLSCI 3N06 A/B, POLSCI 3NN3, PNB 2XE3, 3XE3, SOCIOL 3H06 A/B, STATS 2D03 or another course that is approved by a departmental counselor as equivalent to ECON 2B03.

Antirequisite(s): ECON 3WW3, ECON 3U03, ECON 3E03

ECON 3G03 - INTRODUCTION TO ADVANCED ECONOMIC THEORY

An introduction to the application of mathematics in economic theory.

Three lectures; one term

Prerequisite(s): One of MATH 1B03 or STATS 1L03; and MATH 1M03 or equivalent; and a grade of at least B- in each of ECON 2GG3 (or 2ZZ3) and ECON 2HH3 and registration in an Economics program. Subject to approval by the Department of Economics, MATH 1B03 or STATS 1L03 can be replaced by another course covering the topic of matrix algebra

ECON 3H03 - INTERNATIONAL MONETARY ECONOMICS

Macroeconomic problems of an open economy with special reference to Canada; the international financial system and proposals for its reform.

Lectures and seminars (three hours); one term

Prerequisite(s): ECON 2H03

ECON 3HH3 - INTERNATIONAL TRADE

Real theory of international trade; interregional and international specialization; effect of commercial and industrial policies.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03

ECON 3K03 - MONETARY ECONOMICS

Introduction to a modern treatment of monetary theory. Topics include why does money exist; links between monetary policy, inflation and business cycles; how might inflation and economic growth be connected?

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03; and ECON 2H03

ECON 3M03 - INTRODUCTION TO GAME THEORY

An introduction to the theory of games, including strategic, extensive and coalitional games. Applications in economics, political science and evolutionary biology are discussed.

Three lectures; one term

Prerequisite(s): ECON 1B03 (or ARTSSCI 2E03); and MATH 1K03 (or equivalent) *Not open to students with credit in ECON 3Y03 if the topic was Introduction to Game Theory.*

ECON 3Q03 - THE ECONOMICS OF AGING

Topics include the macroeconomics of population aging and its impact on national pension and health plans and the microeconomics of retirement and income security.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03; and ECON 2H03

ECON 3S03 - INDUSTRIAL ORGANIZATION

A study of the structure, conduct and performance of industrial markets.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03

Antirequisite(s): ECON 3N06

ECON 3T03 - ECONOMIC DEVELOPMENT

Topics may include the measurement of structural change, dual economies, agriculture and production, technical and institutional change, and health and nutrition.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03

Antirequisite(s): ECON 3J06

ECON 3W03 - NATURAL RESOURCES

Competitive and socially optimal management of nonrenewable resources; market failure as illustrated by mineral cartels, fisheries and forestry, including analysis of bioeconomic models.

Three hours (lectures and seminars); one term

Prerequisite(s): One of ECON 2G03, 2Z03, ECON 2J03, or ECON 2X03

ECON 3Y03 - SELECTED TOPICS

Topics will vary from year to year depending on student interests and faculty availability. Students should consult the Department on topics to be offered.

Three hours; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03; and ECON 2H03

ECON 3Z03 - HEALTH ECONOMICS

Analysis of allocation of resources in health care. Topics include markets for health care, insurance, biomedical research, technology assessment, organization and public policy.

Three lectures; one term

Prerequisite(s): ECON 2G03, 2Z03 or ECON 2X03. ECON 2B03 or another course in statistics is recommended.

ECON 4A03 - HONOURS ECONOMIC ANALYSIS

Students discuss papers on a theme that is specific to each section and write short paper reviews and policy briefs on current economics issues.

Three hours (seminars); one term

Prerequisite(s): ECON 4F03 (or 3F03) or ECON 4FF3 (or 3FF3); and ECON 3E03 (or 3WW3) or ECON 3EE3 (or 3U03); and ECON 2GG3 (or 2ZZ3), and ECON 2HH3; and enrolment in level IV of an Honours Economics Program

Antirequisite(s): ECON 4AA3

ECON 4AA3 - ECONOMIC SPECIALIST SEMINAR

Under the supervision of a faculty member students present and discuss papers and write a paper presenting original research.

3 hours; one term

Prerequisite(s): ECON 4FF3 (or 3FF3) with a grade of at least B-, and ECON 3EE3 (or 3U03) with a grade of at least B-; or ECON 3E03 (or 3WW3) with a grade of at least A-, and an average of at least 6 in ECON 2G03 (or 2Z03), 2GG3 (or 2ZZ3), 2H03, and 2HH3, and enrolment in Level III or Level IV Honours Economics (Specialist Option) with a GPA of at least 6.

Antirequisite(s): ECON 4A03

ECON 4B03 - SELECTED TOPICS

Topics will vary from year to year depending on student interests and faculty availability. Students should consult the Department on topics to be offered.

Three hours; one term

Prerequisite(s): Permission of the Department

ECON 4F03 - METHODS OF INQUIRY IN ECONOMICS

Formerly ECON 3F03

This course develops skills for investigating a research question in economics, through workshops (eg. writing, library, internet, data), and the subsequent application of the skills to an economic issue.

Three hours; one term

Prerequisite(s): ECON 2G03, 2Z03 or 2X03; and 2H03; Credit or registration in ECON 3E03 (or 3WW3) or ECON 3EE3 (or 3U03), registration in Level III or Level IV of an Honours Economics program

Antirequisite(s): ECON 3FF3, ECON 3F03, ECON 4FF3

This course is only offered in the Fall term.

ECON 4FF3 - RESEARCH METHODS IN ECONOMICS

Formerly ECON 3FF3

Students discuss and present papers, learn research methods and write a critical review of the literature on an economic topic of their choice.

3 hours; one term

Prerequisite(s): ECON 2G03 (or 2Z03) with a grade of at least C+; and ECON 2H03 with a grade of at least C+; and Credit or enrolment in ECON 3EE3 (or 3U03); or a grade of at

least A- in ECON 3E03 (or 3WW3); and registration in Level III or Level IV of an Honours Economics program with a GPA of at least 6.

Antirequisite(s): ECON 3F03, ECON 3FF3, ECON 4F03

This course is only offered in the Fall term.

ECON 4G03 - ECONOMETRICS II

Development of regression models appropriate to economics. Illustrations from applied micro- and macroeconomics.

Three lectures; one tutorial; one term

Prerequisite(s): ECON 2G03, 2Z03 or 2X03; and ECON 2H03; and at least B- in ECON 3EE3 (or 3U03) or at least A- in ECON 3E03 (or 3WW3) or another course that is approved by a departmental counselor

ECON 4M06 A/B S - DIRECTED RESEARCH I

A reading and/or research program supervised by a Department member. A major paper is required. Interested students should consult the Department concerning admission.

Prerequisite(s): Permission of the Department

ECON 4N03 - DIRECTED RESEARCH II

As per ECON 4M06 A/B.

Prerequisite(s): Permission of the Department

ECON 4T03 - ADVANCED ECONOMIC THEORY I

Mathematically oriented approaches to the analysis of the behaviour of individual consumers, workers and firms.

Three lectures; one term

Prerequisite(s): A grade of at least C in one of ECON 3G03, MATH 2Q04, MATH 2X03 (or MATH 2A03); and a grade of at least B- in ECON 2GG3 (or 2ZZ3) and ECON 2HH3 and registration in an Economics program.

Antirequisite(s): ECON 3A03

ECON 4TT3 - ADVANCED ECONOMIC THEORY II

Analysis of dynamic macroeconomic models including models of endogenous growth and other selected topics.

Three lectures; one term

Prerequisite(s): A grade of at least C in one of ECON 3G03, MATH 2Q04, MATH 2X03 (or MATH 2A03); and a grade of at least B- in ECON 2GG3 (or 2ZZ3) and ECON 2HH3 and registration in an Economics program.

Antirequisite(s): ECON 3AA3

ELECTRICAL ENGINEERING

Courses in Electrical Engineering are administered by the Department of Electrical and Computer Engineering.

Information Technology Building, Room A111, ext. 24347

<http://www.ece.mcmaster.ca/>

Department Notes

1. All students in the Electrical Engineering program initially follow a common curriculum consisting of a combination of Electrical Engineering and Computer Engineering courses. In their senior year, students are given the opportunity to customize their program by selecting from a wide range of technical electives.
2. All Electrical and Computer Engineering courses are open to students registered in any Electrical or Computer Engineering program or the Electrical and Biomedical Engineering program, subject to prerequisite requirements. Prior permission of the Department is necessary for students from other Engineering departments or faculties.

ELECENG 2CI5 - INTRODUCTION TO ELECTRICAL ENGINEERING

Current, potential difference; Kirchhoff's laws; Ohm's Law; circuit elements; mesh/nodal analysis of electrical circuits; first and second order circuits; complex arithmetic; phasors, impedance and admittance; AC power.

Three lectures, one tutorial, one lab every week; first term

Prerequisite(s): Registration in a Computer Engineering or Electrical Engineering program

ELECENG 2CJ4 - CIRCUITS AND SYSTEMS

Advanced circuit analysis including dependent sources; second order circuits; Laplace transforms with applications; frequency response; 2-port networks; coupled circuits; power relationships.

Three lectures, one tutorial, and one lab every other week; second term

Prerequisite(s): ELECENG 2CI5

ELECENG 2EI5 - ELECTRONIC DEVICES AND CIRCUITS I

Semiconductor devices and electronic circuits; electrical characteristics, principles of operation, circuit models of diodes, field-effect and bipolar transistors, and operational amplifiers; analysis and design of basic application circuits.

Three lectures, one tutorial, one lab every week; second term

Prerequisite(s): ELECENG 2CI5

ELECENG 2FH4 - ELECTROMAGNETICS I

Mathematical foundations of electromagnetics (selected topics of vector calculus); electrostatics, magnetostatics and conduction; introduction to time-varying fields through Faraday's law.

Three lectures, two tutorials; second term

Prerequisite(s): ELECENG 2CI5 and PHYSICS 1E03, registration in Electrical Engineering or the Integrated Biomedical Engineering and Health Sciences (IBEHS) Program

ELECENG 2FL3 - APPLIED ELECTROMAGNETICS

Fundamental electrostatic and magnetostatic forces, fundamentals of wave motion; sinusoids and complex numbers; transmission lines and impedance match; electrostatics; conduction; magnetostatics; superconductors; Faraday's law; plane waves and polarization; radiation and antennas.

Three lectures, one tutorial; second term

Prerequisite(s): ELECENG 2CI5 and PHYSICS 1E03; registration in Computer Engineering or Electrical and Biomedical Engineering.

Antirequisite(s): ELECENG 2FH3 or ELECENG 2FH4

This course is not open to students enrolled in the Integrated Biomedical Engineering and Health Sciences (IBEHS) Program.

ELECENG 3CL4 - INTRODUCTION TO CONTROL SYSTEMS

Modelling of control systems in the continuous-time domain; state space representations; model linearization; performance of control systems in time and frequency; stability; control design.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ELECENG 3TP4 or 3TP3

Antirequisite(s): IBEHS 4A03, MECHENG 4R03, MECHTRON 3DX4, SFWRENG 3DX4

ELECENG 3EJ4 - ELECTRONIC DEVICES AND CIRCUITS II

Analog and digital electronics; operational amplifier circuits; multistage amplifiers; oscillators; analog and digital integrated circuits; data converters; amplifier frequency response; feedback and stability; computer aids to analysis and design.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): ELECENG 2CJ4 and ELECENG 2E15; and ELECENG 2C15

ELECENG 3EY4 - ELECTRICAL SYSTEMS INTEGRATION PROJECT

An electrical engineering design and implementation project of reasonable complexity to be completed by small groups of students; oral presentations and written reports.

Two lectures, one lab, one tutorial; second term

Prerequisite(s): COMPENG 2DX4, ELECENG 3TP3 or ELECENG 3TP4 or IBHS 3A03, ELECENG 2C15, COMPENG 2D14, COMPENG 2SH4, ELECENG 2CJ4

Antirequisite(s): COMPENG 2DP4, COMPENG 3DY4

First offered in 2020-2021.

ELECENG 3FK4 - ELECTROMAGNETICS II

Time-varying fields, uniform plane waves, reflection and transmission, dispersion, transmission lines and impedance matching, waveguides, elements of theory of radiation and antennas.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): ELECENG 2FH3 or 2FH4 or ENGPYS 2A04

ELECENG 3PI4 - ENERGY CONVERSION

Analyze, model, and predict the performance of energy conversion devices and systems including single-phase and balanced three-phase systems, transformers, DC and AC generators and motors.

Three lectures, one tutorial, one lab every other week, second term

Prerequisite(s): ELECENG 2CJ4, 2FH3 or 2FH4 and 2C15

ELECENG 3TP3 - SIGNAL & SYSTEMS

Complex variables and integration in the complex plain; Fourier transforms, properties; Laplace transforms and inversion; input-output relations of linear systems; discrete time systems.

Three lectures, one tutorial; first term

Prerequisite(s): ELECENG 2CJ4 and 2C15

Antirequisite(s): ELECENG 3TP4, MECHENG 4R03, SFWRENG 3MX3

ELECENG 3TQ3 - ADVANCED PROBABILITY AND RANDOM PROCESSES

Probability theory; random variables; expectations; random processes; autocorrelation; power spectral densities.

Three lectures, one tutorial; first term

Prerequisite(s): MATH 2Z03

Antirequisite(s): COMMERCE 2QA3, ELECENG 3TQ4

ELECENG 3TR4 - COMMUNICATION SYSTEMS

Review of continuous-time signals and systems; amplitude modulation, phase and frequency modulation schemes; digital modulation; stochastic processes; noise performance.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ELECENG 3TP3; One of ELECENG 3TQ4, 3TQ3 or STATS 3Y03; or ENGPYS 3W04

ELECENG 4BB3 - CELLULAR BIOELECTRICITY

Generation and transmission of bioelectricity in excitable cells; ionic transport in cellular membranes; propagation of electricity within and between cells; cardiac and neural physiology; measurement of extracellular fields; electrical stimulation of excitable cells.

Three lectures, one tutorial; second term

Prerequisite(s): Registration in Level III Electrical and Biomedical Engineering or level IV or V of the Integrated Biomedical Engineering and Health Sciences (IBEHS) Program or level IV of Electrical Engineering

ELECENG 4BC3 - MODELLING OF BIOLOGICAL SYSTEMS

Introduction to mathematical and engineering methods for describing and predicting the behaviour of biological systems; including sensory receptors, neuromuscular and biomechanical systems; statistical models of biological function; kinetic models of biological thermodynamics.

Three lectures, one tutorial; first term

Prerequisite(s): Registration in Level IV Electrical and Biomedical Engineering

Antirequisite(s): IBEHS 5A03

ELECENG 4BD4 - BIOMEDICAL INSTRUMENTATION

Generation and nature of bioelectric potentials; electrodes and other transducers; principles of instrumentation; electrical safety; neuromuscular and cardiovascular instrumentation; ultrasonics and other medical imaging.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): One of ELECENG 3EJ4, ENGINEER 3N03 or PHYSICS 3B06; and registration in Biomedical and Electrical Engineering Level IV, or permission of the department.

Antirequisite(s): IBEHS 4F04

ELECENG 4BE4 - MEDICAL ROBOTICS

Fundamentals of robotics and telerobotics; feedback from the environment using sensors and machine vision; application of robotics to medicine and surgery.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ELECENG 3CL4, 3TP4 or 3TP3; or permission of the department

ELECENG 4BF4 - ADVANCED MEDICAL IMAGING

Physical principles of medical image acquisition and formation; post-processing for magnetic resonance imaging and spectroscopy; comparisons to other medical imaging modalities.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ELECENG 2FH3 or 2FH4, ELECENG 3TP4 or 3TP3; and registration in Level IV Electrical and Biomedical Engineering or Level IV and above in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program or permission of the department.

Antirequisite(s): ELECENG 4BF3

ELECENG 4BI6 A/B - BIOMEDICAL DESIGN PROJECT

The design process; safety; a term project composed of small teams of students including an oral presentation and written report.

Three lectures, two tutorials, one capstone project; both terms

Prerequisite(s): Registration in Level IV Electrical and Biomedical Engineering

Antirequisite(s): ELECENG 40I6 A/B, ENGINEER 4M06 A/B, IBEHS 5B06 A/B

ELECENG 4CL4 - CONTROL SYSTEM DESIGN

Design of linear control systems using classical and state-space techniques; performance limitation; sampled-data control; nonlinear systems; multi-input multi-output control systems.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): ELECENG 3CL4, ELECENG 3TP4 or 3TP3

Antirequisite(s): IBEHS 4A03

ELECENG 4EM4 - PHOTONIC DEVICES AND SYSTEMS

Fundamentals of light. Optical fibers and their propagation characteristics. Lasers and photo-diodes. Optical amplifiers and modulators. Photonic networks.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ELECENG 3EJ4; or ENGPYHS 3BA3 and 3BB3

Antirequisite(s): ENGPYHS 4K03

ELECENG 4FJ4 - DEVICES AND ANTENNAS FOR WIRELESS SYSTEMS

This course provides the fundamentals of the technology of wireless communications. transmission lines and waveguides, scattering parameters, impedance matching, power dividers, directional couplers, microwave resonators and filters, microwave sources and active devices, antenna fundamentals, microwave and antenna measurements.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): ELECENG 2FL3 or 3FK4

ELECENG 4OH4 - ADVANCED RESEARCH PROJECT

A research-oriented project under the direct supervision of a faculty member to further foster initiative and independent creativity while working on an advanced topic. This research is based on the experience and results achieved in other research-based project courses.

Second term

Prerequisite(s): COMPENG 40J4 or ELECENG 40J4; Prior arrangement with an Electrical and Computer Engineering faculty member, inclusion on the Dean's Honour List, registration in Level IV or V of any program in the Department of Electrical and Computer Engineering; or permission of the department

ELECENG 4O16 A/B - ENGINEERING DESIGN

The design process; safety; a term project composed of small teams of students including an oral presentation and written report.

Lectures, tutorials, one capstone project; both terms

Prerequisite(s): Registration in Level IV or V of any Electrical or Computer Engineering program

Antirequisite(s): ELECENG 4B16 A/B, ENGINEER 4M06 A/B, IBEHS 5B06 A/B

ELECENG 4OJ4 - RESEARCH PROJECT

A research-oriented project under the direct supervision of a faculty member to foster initiative and independent creativity while working on an advanced topic. First term

Prerequisite(s): Prior arrangement with an Electrical and Computer Engineering faculty member, inclusion on the Dean's Honour List, registration in Level IV or V of any program in the Department of Electrical and Computer Engineering; or permission of the department

Antirequisite(s): COMPENG 40K4, ELECENG 40K4

ELECENG 4OK4 - RESEARCH PROJECT

A research-oriented project under the direct supervision of a faculty member to foster initiative and independent creativity while working on an advanced topic. Second term

Prerequisite(s): Prior arrangement with an Electrical and Computer Engineering faculty member, inclusion on the Dean's Honour List, registration in Level IV or

V of any program in the Department of Electrical and Computer Engineering; or permission of the department

Antirequisite(s): COMPENG 40J4, ELECENG 40J4

ELECENG 4PK4 - POWER ELECTRONICS

To analyze, model, and predict the performance of basic power converter configurations. To explain topologies of power electronics, AC/DC, DC/DC, DC/AC and AC/AC. To design proper switching circuits.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ELECENG 2CJ4, 3EJ4

ELECENG 4PL4 - ENERGY SYSTEMS AND MANAGEMENT

Elements of generation, transmission, and distribution systems; system-wide energy flow and control; modelling and simulation; economics and management; fault prediction and management.

Three lectures, one tutorial, one lab every other week; second term

Prerequisite(s): ELECENG 3PI4

ELECENG 4PM4 - ELECTRICAL POWER SYSTEMS

Analysis of unsymmetrical electrical systems, load flow studies, dynamic stability of electrical power systems, power system protection, emerging systems and issues relating to electrical power quality and the impact thereof on plant and customer loads, new generation and connection concepts for large electrical power systems with-regard-to sustainable energy resources, their management, technical challenges and solutions, high voltage DC (HVDC) networks, Smart grids.

Three lectures, one tutorial, one lab every other week; first term

Prerequisite(s): ELECENG 3PI4

ELECENG 4TK4 - DIGITAL COMMUNICATIONS SYSTEMS

Digital modulation systems, intersymbol interference, equalization, synchronization; ASK, FSK, PSK, MSK, optimal receiver, noncoherent detection; introduction to information theory; entropy, source coding, mutual information, channel capacity.

Three lectures, one tutorial (two-hours); first term

Prerequisite(s): ELECENG 3TR4, 3TQ4 or 3TQ3

Antirequisite(s): SFWRENG 4J03

ELECENG 4TM4 - DIGITAL COMMUNICATIONS II

This course continues the study of modern communications systems following ELECENG 4TK4. Topics include wireless communications systems, multiple antenna systems, channel models and error control coding.

Three lectures, one tutorial (two-hours); second term

Prerequisite(s): ELECENG 4TK4

ENERGY ENGINEERING TECH

Courses in Energy Engineering Technologies are administered by the Bachelor of Technology Program.

Engineering Technology Building (ETB), Room 121, ext. 20195

<http://mybtechdegree.ca>

Notes

1. Renewable Energy Technologies students must complete (a project in Renewable Energy Technology), 4RE3 and 4RT3.

ENRTECH 3EP3 - POWER SYSTEMS AND ELECTRICAL MACHINES

Basic electric circuits, basic electrical theorems, network analysis, phasors, three phase systems, transformers, motors, electric power generation, power plants components (transformers, motors, exciters, synchronous machines).

Three lectures; one lab (two hours every other week); one term

Prerequisite(s): Registration in Power and Energy Engineering Technology

ENRTECH 3IE3 - INDUSTRIAL ELECTRONICS

Introduction to power electronic devices: diodes, transistors, triacs, SCRs, IGBTs. Electrical machines characteristics: motors, transformers. Power control circuits, solid state converter drives. Harmonics and filtering.

Three lectures; one term

Prerequisite(s): ENRTECH 3EP3, 3MA3 and registration in Power and Energy Engineering Technology

ENRTECH 3IN3 - INDUSTRIAL NETWORKS AND COMMUNICATION SYSTEMS

Corporate and industrial network standards; proprietary buses and protocols and interfaces; distributed I/O; drivers and devices and their implementation in PC and PLC based systems.

Three lectures; one lab (two hours every other week); one term

Prerequisite(s): Registration in Power and Energy Engineering Technology

ENRTECH 3MI3 - MEASUREMENTS AND INSTRUMENTATION

Transducers, logic circuits, basic electronic devices and their applications. Calculate/measure the input(s) and output(s) of various systems. Recognize, install and apply instruments within power plants.

Three lectures; one lab (two hours every other week); one term

Prerequisite(s): Registration in Power and Energy Engineering Technology

ENRTECH 3PD3 - POWER DISTRIBUTION I

Principle concepts and theories of power distribution. Skills required to work at an industrial environment and/or power utilities (generation, transmission, distribution). Based on the Ontario Hydro system, a power flow computer program will be introduced.

Three lectures; one term

Prerequisite(s): ENRTECH 3EP3 and registration in Power and Energy Engineering Technology

ENRTECH 4CT3 - CONTROL THEORIES

Formerly ENRTECH 3CT3

Basic control theories and their applications to power systems. Closed loop control systems for current, voltage, speed and position in the motor. Describe and evaluate variable speed drives. Calculation of system settings, component ratings, testing and troubleshooting procedures.

Three lectures; one term

Prerequisite(s): ENRTECH 3EP3, ENGTECH 4MA3 and registration in Power and Energy Engineering Technology

ENRTECH 4EM3 - TRANSMISSION LINES AND ELECTROMAGNETICS

Field concepts. Maxwells equations, integral and differential forms. Free space and guided wave propagation, transmission lines. Radiation from current elements.

Three lectures; one term

Prerequisite(s): ENRTECH 3EP3, ENGTECH 3MA3 and registration in Power and Energy Engineering Technology

Antirequisite(s): ENRTECH 4EP3

ENRTECH 4PD3 - POWER SYSTEM ANALYSIS AND CONTROL

This course introduces the different types of operating constraints as encountered by power system operators and engineers during real time operation of interconnected power grids. For each type of operating constraint, the most common operating strategies and control measures will be discussed and analyzed.

Three lectures; one term

Prerequisite(s): ENRTECH 3PD3 and registration in Power and Energy Engineering Technology

ENRTECH 4PM3 - POWER PROTECTION AND MAINTENANCE I

Various power devices such as relays, circuit breaker, power monitor, control devices and other components used in a power system protection. Other devices such as CTs, and Pts and substation hardware will also be covered.

Three lectures; one term

Prerequisite(s): ENRTECH 3MI3, 3PD3, and registration in Power and Energy Engineering Technology

ENRTECH 4PP3 - POWER PROTECTION AND MAINTENANCE II

New generation of digital fault detection systems. Balanced faults, computer-based fault studies, symmetrical components and sequence networks, unbalanced short-circuit and open-circuit faults.

Three lectures; one lab (two hours every other week); one term

Prerequisite(s): ENRTECH 4PM3 and registration in Power and Energy Engineering Technology

ENRTECH 4PQ3 - POWER QUALITY

Analyze and monitor power quality. Case studies for EMI/RFI related problems that are commonly encountered in commercial and industrial loads.

Three lectures; one term

Prerequisite(s): ENRTECH 3EP3, 3PD3, and registration in Power and Energy Engineering Technology

ENRTECH 4RE3 - FUEL CELL, GEOTHERMAL AND BIOMASS POWER GENERATION

Outline the design, installation and commissioning of Bio-Mass, Fuel-Cells and Geothermal powered systems. The environmental and economical impacts of such technologies. Federal and provincial rules, regulations, and legislation.

Three lectures; one term

Prerequisite(s): ENRTECH 3EP3, 3TD3, ENGTECH 4TF3 and registration in Power and Energy Engineering Technology

ENRTECH 4RT3 - RENEWABLE POWER GENERATION FROM WIND, SOLAR AND HYDRO

Design, installation and commissioning of Solar, Wind and Hydro power plants. The environmental and economical impacts of such technologies, rules, regulations, federal and provincial legislation.

Three lectures; one term

Prerequisite(s): ENRTECH 3EP3, 3TD3, ENGTECH 4TF3 and registration in Power and Energy Engineering Technology

ENGINEERING

John Hodgins Engineering Building, Room A214, ext. 24646

<http://www.eng.mcmaster.ca/>

Note

Enrolment in these courses is limited to students registered in an Engineering program.

ENGINEER 1C03 - ENGINEERING DESIGN AND GRAPHICS

Graphical visualization and communication; technical sketching, 2D and 3D computer-aided design; use of solid modelling software.

One lecture, one tutorial (two hours), one lab (three hours); first or second term

Prerequisite(s): Registration in any Engineering program

Antirequisite(s): ENGINEER 1C04, IBEHS 1P10 A/B

ENGINEER 1D04 - ENGINEERING COMPUTATION

Development and analysis of simple algorithms. Implementation of algorithms in computer programming language. Design and testing of computer programs.

One lecture, one tutorial (two hours), one lab (three hours); first or second term

Prerequisite(s): Registration in any Engineering program

Antirequisite(s): COMPSCI 1MA3, 1MC3, 1SA3, 1TA3, IBEHS 1P10 A/B

ENGINEER 1EE0 - INTRODUCTION TO THE ENGINEERING CO-OP PROGRAM

Orientation to Engineering Co-op programs, self-assessment exercises, job and employer research, cover letter and resume writing, interviewing skills and work place professionalism.

Prerequisite(s): Registration in a Co-op program in the Faculty of Engineering

Not open to students in their final level.

ENGINEER 1P03 - ENGINEERING PROFESSION AND PRACTICE

Introduction to professional engineering including ethics, health and safety, roles and responsibilities to society, sustainability, engineering communication; design skills; team design projects.

Two lectures, one tutorial (two hours); first term

Prerequisite(s): Registration in any Engineering program

Antirequisite(s): ENGINEER 4HJ1, IBEHS 1P10 A/B

ENGINEER 2B03 - ENGINEERING ECONOMICS

Engineering criteria for decision-making. Money flow. Financial ventures. Personal financing. Total project investment. Production and operations costs. Economic analysis. Financial attractiveness.

Lectures, applications, discussions (three hours); second term

Prerequisite(s): Registration in any Engineering Program

Antirequisite(s): CHEMENG 4N04, CIVENG 3RR3, ENGINEER 4B03

Not open to students registered in an Engineering and Management program.

ENGINEER 2ECO - ENGINEERING WORK TERM

Minimum of 12 weeks of full-time employment in a professional environment.

First or second term

Prerequisite(s): Registration in a Co-op program in the Faculty of Engineering and

ENGINEER 1EE0 and permission from the Engineering Co-Op and Career Services

Not open to students in their final level.

ENGINEER 2GB3 - DIGITAL MEDIA (AUDIO AND VIDEO) FOR SOFTWARE ENGINEERING

A study of digital media where students will create and critique digital audio and video. Readings will explore the evolution of digital media and the technical and social aspects of digital audio and video.

One lecture (two hours), one lab (two hours); first term

Prerequisite(s): Registration in Software Engineering - Game Design, Software

Engineering - Game Design Co-op (B.Eng.) or permission of the department

Antirequisite(s): MMEDIA 2B03, 2BE3

ENGINEER 2H03 - THERMODYNAMICS

An introduction to thermodynamics and its statistical basis at the microscopic level, with applications to problems originating in a modern laboratory or engineering environment.

Three lectures; second term

Prerequisite(s): Registration in Level II or above of any Engineering program except Engineering Physics

Antirequisite(s): ENGINEER 2V04, ENGPYHS 2H04, MECHENG 2W04, PHYSICS 2H04

ENGINEER 2MM3 - ELECTRICAL CIRCUITS AND POWER

Fundamentals of electromechanical energy conversion. Motors and generators, transformers, single and polyphase power circuits, synchronous and induction machines, power measurements.

Two lectures and one lab or tutorial; first or second term

Prerequisite(s): PHYSICS 1E03; MATH 2Z03; registration in Software Engineering - Embedded Systems Co-op

Antirequisite(s): ENGINEER 3M03

ENGINEER 2P04 - ENGINEERING MECHANICS

Principles of statics as applied to deformable solid bodies. Stress and strain, elastic behaviour of simple members under axial force, torsion, bending and traverse shear. Principal stresses; statical indeterminacy.

Three lectures, one tutorial; first term

Prerequisite(s): PHYSICS 1D03 and registration in Level II or above of any Engineering program

Antirequisite(s): MECHENG 2P04, CIVENG 2P04, ENGPYHS 2P04

ENGINEER 3CX3 A/B - EXPERIENTIAL LEARNING IN COMPLEMENTARY STUDIES

This course will provide students an opportunity for formal recognition of experiential learning achieved through a substantial contribution to a non-technical co-curricular activity. This course will allow Engineering students to obtain credit in complementary studies.

One lecture (three hours); term one and two

Prerequisite(s): Registration in Level III or above in the Faculty of Engineering

ENGINEER 3GA3 - INTRODUCTION TO ANIMATION FOR SOFTWARE ENGINEERING

An introduction to the history and basic principles of animation. Students will create a significant work of computer animation displaying a variety of techniques. Readings and discussions will cover theatre, film studies and narrative.

One lecture (two hours), one lab (two hours); first term

Prerequisite(s): ENGINEER 2GB3 or MMEDIA 2BE3

Antirequisite(s): MMEDIA 2H03, 2HE3

ENGINEER 3ICO - FULL-TIME INTERNSHIP FOR INTERNATIONAL STUDENTS

Full-time, paid internships of 8, 12 or 16 months enable international Engineering students to explore career opportunities and work environments, gain employability skills, and an understanding of employer expectations and employment practices in a Canadian professional work environment.

Prerequisite(s): ENGINEER 1EE0 and permission of the Engineering Career and Co-Op Services.

ENGINEER 3M03 - ELECTRONICS AND INSTRUMENTATION

Semiconductor devices; diodes, transistors and silicon-controlled rectifiers. Transistor characteristic and load lines. Amplifier circuits with and without feedback. Rectifier and passive filter circuits. Operational amplifiers and active filters. Digital circuits, Microcomputers, Interfacing.

Two lectures, one tutorial, one lab (three hours) every other week; second term

Prerequisite(s): One of ENGINEER 2M04, 2MM3 or 3M03

ENGINEER 4A03 - SUSTAINABILITY AND ETHICS IN ENGINEERING

The impact of triple bottom line thinking on the engineering profession, including economic, environmental, and social responsibility. The ethical and legal responsibilities of engineers. The role of the engineering profession in the social control of technological change.

Three lectures; both terms

Prerequisite(s): Registration in Level III or above of any Engineering program except Engineering and Society

Antirequisite(s): ENGPYHS 2S03, 4C03

ENGINEER 4EX3 A/B - EXPERIENTIAL ENGINEERING DESIGN

This course will provide students an opportunity for formal recognition of the design-based experiential learning conducted within the atmosphere of technically-oriented

McMaster Engineering teams. Arrangements for participation in this course must be made with the faculty supervisor in the Spring semester prior to enrolment.

One lecture (three hours); term one and two

Prerequisite(s): Registration in Level 3 or above in the Faculty of Engineering

ENGINEER 4F00 A/B - MECH ENG WORK TERM REPORT

Requirements for the accelerated option of the M.Eng. (Manufacturing) Program, including: industrial work-term placement report and completion of two approved 600 level courses.

Report to be submitted by end of September.

Prerequisite(s): Permission of Program Director

ENGINEER 4GA3 - INTERACTIVE DIGITAL CULTURE FOR SOFTWARE ENGINEERING

Covers works, forms, theories of digitally interactive culture. Works may include hypertext fiction, computer games, interactive digital art, video, music; theories may cover hypertext, interactivity, immersion, simulation, reception, participatory culture.

Three lectures; first term

Prerequisite(s): ENGINEER 3GA3 or MMEDIA 2HE3

Antirequisite(s): MMEDIA 3E03, 3EE3

ENGINEER 4ID3 - ADDRESSING SOCIAL PROBLEMS THROUGH BUSINESS, ENGINEERING AND THE SOCIAL SCIENCES

A final-year course where students work in interdisciplinary teams on an experiential project that incorporates business, engineering and social sciences elements.

One-hour lecture; first term

Prerequisite(s): Registration in Level IV of a Commerce, or Social Sciences Program, or Level V of an Engineering and Society or Engineering and Management Program

Cross-list(s): COMMERCE 4ID3, SOCSOCI 4ID3

ENGINEER 4IW3 - INCLUSION IN THE ENGINEERING WORKPLACE

Engineering workplaces are diverse but can pose challenges to underrepresented groups. Students will develop the vocabulary and tools to master perceptual, institutional, and psychological mechanisms of inclusion as allies and targets.

Lectures (three hours); second term

Prerequisite(s): Registration in Level III or above of any Engineering Program

ENGINEER 4J03 - MATERIALS FABRICATION

Offered jointly by the Departments of Mechanical Engineering and Materials Science and Engineering. Processing methods for a wide range of materials, including metals, ceramics and plastics. The analytical basis for understanding and optimizing materials processes. Exercises in mathematical modelling and the use of software packages to optimize processes.

Three lectures; second term

Prerequisite(s): MATLS 3M03 or MECHENG 3A03 or registration in Level IV or above in Civil Engineering.

ENGINEER 4K01 A/B S - ENGINEERING REPORT FOR EXCHANGE STUDENTS

Exchange students prepare a written report and make an oral presentation on an engineering problem encountered during summer work experience. Written and oral communications and substantive context are assessed.

One seminar/lecture; one term

Prerequisite(s): Permission of the instructor

ENGINEER 4L00 A/B - INTRODUCTION TO THE OVERSEAS WORKPLACE

Short seminars intended to prepare outgoing exchange students for placements overseas. Topics include work place professionalism and report writing.

One seminar/lecture; one term

Prerequisite(s): Permission of the instructor

ENGINEER 4T04 - MATERIALS SELECTION IN DESIGN AND MANUFACTURING

Materials indices, materials selection charts, materials selection and design with mechanical and thermo-mechanical constraints, design of hybrid materials, sustainable materials selection and design.

Two lectures (two hours), one tutorial (one hour); first term

Prerequisite(s): One of ENGINEER 2P04, MECHENG 2P04, and one of CHEMENG 3A04, MECHENG 3R03; or registration in Level IV or above in Civil Engineering

ENGINEER 4V04 - PHYSICO-CHEMICAL PROCESSES IN WATER AND WASTEWATER

Water/waste water quality/characteristics; physical and chemical unit processes including coagulation, flocculation, sedimentation and filtration for particle removal in water treatment; inactivation of microorganisms in disinfection; advanced treatment, including ion exchange, adsorption, advanced oxidation using radical reactions and membrane filtration.

Three lectures, one lab or one tutorial; one term

Prerequisite(s): CIVENG 3L03 or CHEMENG 2D04 or registration in Level IV or above in the Integrated Biomedical Engineering & Health Sciences (IBEHS) program or permission of the department

ENGINEERING & SOCIETY PROGRAM

John Hodgins Engineering Building, Room A214-C, ext. 27679

<https://www.eng.mcmaster.ca/engineering-and-society-program>

The Engineering and Society Programs are described in the Faculty of Engineering section in this Calendar. These programs lead to the B.Eng.Society degree.

Courses

If no prerequisite is listed, the course is open.

ENGSOCTY 2X03 - INQUIRY IN AN ENGINEERING CONTEXT I

Inquiry is a non-disciplinary approach to the study of issues of public concern. In terms of the design process, inquiry focuses on the problem definition stage, in which formulating questions, researching underlying issues, and analyzing opposing arguments are essential. The first course involves teaching how to use the university and community resources in research, how to write a research paper, and how to express ideas orally. The theme is sustainable society.

Three hours (lectures, discussion, group work); first term

Prerequisite(s): Registration in an Engineering and Society Program or permission of the instructor

ENGSOCTY 2Y03 - CASE STUDIES IN HISTORY AND TECHNOLOGY

History and philosophy of technology, from antiquity to modern times, with a special emphasis on the cultural aspects of technology, are addressed on a case study basis.

Three hours (lectures, discussion, group work); second term

Prerequisite(s): Registration in an Engineering and Society Program

ENGSOCTY 3X03 - INQUIRY IN AN ENGINEERING CONTEXT II

This inquiry course builds on the skills developed in previous courses, focusing on a specific issue related to the role of engineering and technology in society. The course is devoted to the study of one topic such as: automation and employment, technology and the quality of life, the deteriorating environment, or the information society.

Three hours (lectures, discussion, group presentations); second term

Prerequisite(s): ENGSOCTY 2X03 and registration in Level IV of an Engineering and Society Program

ENGSOCTY 3Y03 - TECHNOLOGY AND SOCIETY

A study of the nature and structure of technology, the nature of culture, and the role and place of different groups, including engineers, in a culture dominated by technology; and mechanisms for the social control of technology.

Lectures, discussion, group work, seminars (three hours); first term

Prerequisite(s): ENGSOCTY 2Y03 and registration in level III or above of an Engineering and Society Program

ENGSOCTY 3Z03 - PREVENTIVE ENGINEERING: ENVIRONMENTAL PERSPECTIVES

The basic concepts of preventive engineering are studied and applied to specific case studies. The focus is on sustainability and the natural environment.

Three hours (lectures, discussion, group projects); first term

Prerequisite(s): Registration in Level III or IV of an Engineering and Society Program

ENGSOCTY 4X03 A/B - INQUIRY IN AN ENGINEERING CONTEXT III

Under the supervision of a faculty member, students write an inquiry paper and present their findings orally. Topics for inquiry must bear on the relation of technology to society and have implications for the practising engineer.

Prerequisite(s): ENGSOCTY 3X03 and registration in level V of an Engineering & Society Program

ENGSOCTY 4Y03 - SOCIETY CAPSTONE DESIGN

In multi-disciplinary teams, students will complete a capstone design project that incorporates holistic design, social sustainability, community resilience and aesthetic elements.

Two lectures; two hour design studio; first term

Prerequisite(s): Registration in Level V of an Engineering and Society Program

Antirequisite(s): COMMERCE 4ID3, ENGINEER 4ID3, SOCSCI 4ID3

ENGINEERING & MANAGEMENT PROGRAM

John Hodgins Engineering Building, Room A214-C, ext. 27679

<https://www.eng.mcmaster.ca/engineering-management-program>

The Engineering & Management Programs are described in the Faculty of Engineering section in this Calendar. These programs are administered jointly by the DeGroote School of Business and the Faculty of Engineering and lead to the B.Eng.Mgt. degree.

Courses

If no prerequisite is listed, the course is open.

ENGNMGT 2AA2 - COMMUNICATION SKILLS

Writing skills including formal reports; speaking, listening and presentation skills, speeches, technical presentations and electronic communication technology.

One lecture (two hours); one term

Prerequisite(s): Registration in any Engineering and Management program

Antirequisite(s): CHEMENG 2G03

ENGNMGT 4A03 - INNOVATION DRIVEN PROJECT DEVELOPMENT AND MANAGEMENT

What is innovation and how is it managed? Team-based creativity skills will be developed with a focus on delivering innovation. Participants develop teamwork skills while using project management tools to develop a project.

Three hours; first term

Prerequisite(s): One of CHEMENG 2G03 or ENGNMGT 2AA2; and registration in any Engineering and Management program

Antirequisite(s): ENGNMGT 3AA1, 4A01

ENGNMGT 5B03 - ENGINEERING AND MANAGEMENT PROJECTS

Capstone course: Students work in multidisciplinary teams to solve an integrated engineering and business problem in an organization. Team, project and client management skills are developed.

No lectures, individual meetings with course instructor (two hours); one term

Prerequisite(s): ENGNMGT 4A01, 4A03 and registration in any Engineering and Management program

Antirequisite(s): COMMERCE 4ID3, ENGINEER 4ID3, ENGNMGT 5EP3, SOCSCI 4ID3

ENGNMGT 5E03 - ENTREPRENEURIAL PROCESSES AND SKILLS

Students will develop an awareness of, and skills in, innovation and entrepreneurial behaviour. Emphasis will be placed on becoming a more effective team player, becoming more aware of one's own learning style and entrepreneurial orientation, and understanding the processes of business idea generation, development and evaluation.

One lecture (three hours); term one

Prerequisite(s): ENGNMGT 4A03 and registration in Level V of the Engineering & Management Program (Entrepreneurship Stream), minimum GPA of B-, permission of the MEEI Program in consultation with the Director of the Engineering and Management program

ENGNMGT 5EL3 - LEADING INNOVATION

This course will explore leadership in an innovation context and provide a conceptual understanding of role model leadership. A personal leadership capacity development approach will be explored.

One lecture (three hours) term two

Prerequisite(s): ENGNMGT 4A03 and enrolment in Level V of the Engineering & Management Program (Entrepreneurship Stream), and permission of the instructor, and the Director of the Engineering and Management program

Cross-list(s): SEP 4EL3

ENGNMGT 5EP3 - NEW ENTERPRISE CAPSTONE PROJECT

Students work in multidisciplinary teams to carry out a feasibility study for the creation of a new, knowledge-based business.

No lectures, individual meetings with course instructor; term one

Prerequisite(s): Registration in Level V of the Engineering & Management Program (Entrepreneurship Stream)

Co-requisite(s): ENGNMGT 5E03

Antirequisite(s): ENGNMGT 5B03

ENGINEERING PHYSICS

Courses in Engineering Physics are administered by the Department of Engineering Physics.

John Hodgins Engineering Building, Room A315, ext. 27925

<https://www.eng.mcmaster.ca/engphys/>

Department Note

All Engineering Physics courses are open to students registered in any Engineering or Science Program who meet the prerequisites unless otherwise stated. Prior permission of the instructor is necessary for students from other Faculties or from Engineering or Science who do not meet the courses prerequisites.

ENGPYHS 2A04 - ELECTRICITY AND MAGNETISM

Development of electromagnetic theory - fields, Gauss' law, electric potential, Laplace equation, dielectrics, Ampere's law, magnetism, Faraday's law, inductance, development of Maxwell's equations via vector calculus.

Three lectures, one tutorial, one lab (three hours each) every other week, first term

Prerequisite(s): Registration in any Engineering Physics or Mechatronics Engineering Program; PHYSICS 1E03; and credit or registration in MATH 2Z03

Antirequisite(s): ENGPYHS 2A03

ENGPYHS 2CM4 - COMPUTATIONAL MULTIPHYSICS

Mathematical modelling and computational multiphysics for engineering design synthesizing E&M, thermodynamics, statics, dynamics, and quantum mechanics.

Three one-hour lectures and one two-hour laboratory per week; second term

Prerequisite(s): Registration in Level II of an Engineering Physics program

ENGPYHS 2E04 - ANALOG AND DIGITAL CIRCUITS

Design and analysis of analog and digital electrical circuits - component analysis, circuit analysis and theorems, binary numbers, Boolean analysis and digital circuit design.

Three lectures, one lab (three hours each); second term

Prerequisite(s): PHYSICS 1E03 and registration in an Engineering program

ENGPYHS 2H04 - STATISTICAL THERMODYNAMICS

An introduction to thermodynamics and its statistical basis at the microscopic level, with applications to problems originating in a modern laboratory or engineering environment.

Three lectures, one tutorial, one lab (three hours each) every other week; second term

Prerequisite(s): Registration in Level II Engineering Physics

Antirequisite(s): ENGINEER 2H03, 2V04, MATLS 2B03

Cross-list(s): PHYSICS 2H04

ENGPYHS 2NE3 - THERMAL SYSTEMS DESIGN

Thermal Systems Design covers the physics, thermodynamics and design of energy conversion systems utilized in many engineering systems. The topics include the first and second law of thermodynamics, irreversibility, the Rankine and Brayton cycles, and common refrigeration cycles.

Three lectures, one tutorial; first term

Prerequisite(s): Registration in Level II or above of an Engineering program

Antirequisite(s): MECHENG 2W04

ENGPYHS 2P04 - APPLIED MECHANICS

Classical mechanics topics including rocketry, coupled oscillators, elasticity, shear force and bending moment diagrams, tensors, Voigt notation, flexure, and beam resonance. Topics are explored using finite element methods software.

Three lectures, one laboratory (two hours each); first term

Prerequisite(s): PHYSICS 1D03; and credit or registration in MATH 2Z03

Antirequisite(s): ENGINEER 2P04

ENGPYHS 2QM3 - INTRODUCTION TO QUANTUM MECHANICS

Basic foundations of quantum mechanics; wave-particle duality, uncertainty principle, Hydrogen atom, Schrodinger Equation, barriers and tunnelling, probability, spin, quantum statistics, selected applications.

Three lectures, one tutorial; second term

Prerequisite(s): Registration in Level II or above of an Engineering program

Antirequisite(s): PHYSICS 2C03

ENGPYHS 3BA3 - ELECTRONICS I: CIRCUITS WITH NON-LINEAR AND ACTIVE COMPONENTS

P-N junctions, diodes, bipolar junction transistors, field effect transistors, DC and AC modeling, differential amplifiers and operational amplifiers, feedback and oscillators, digital circuits and multivibrators, signal processing.

Two lectures, one lab (three hours); first term

Prerequisite(s): One of ENGPYHS 2A03, 2A04, 2E04, PHYSICS 2B06, 2BB3

Antirequisite(s): PHYSICS 3B06, PHYSICS 3BA3

ENGPYHS 3BB3 - ELECTRONICS II: EMBEDDING AND PROGRAMMING A MICRO-CONTROLLER

Design and synthesis project in electronics, focused on integrating analog electronics with a microcontroller to create a PID-controlled device. Programming and

interfacing the microcontroller are taught in weeks 1-6; the device is designed and built in weeks 7-12. Prior knowledge of basic electronics, including op-amps and transistors is required.

One lecture, one lab (three hours each); second term

Prerequisite(s): ENGPYHS 3BA3 or PHYSICS 3BA3

Antirequisite(s): PHYSICS 3B06, 3BB3

ENGPYHS 3D03 - PRINCIPLES OF NUCLEAR ENGINEERING

Introduction to fission and fusion energy systems. Energetics of nuclear reactions, interactions of radiation with matter, radioactivity, design and operating principles of fission and fusion reactors.

Three lectures, one lab (three hours each) three times per term; second term

Prerequisite(s): Registration in Level II or above of an Engineering program

ENGPYHS 3E03 - FUNDAMENTALS OF PHYSICAL OPTICS

Geometrical optics, electromagnetic waves, interference of light, Fraunhofer and Fresnel diffraction, polarized light, Fresnel equations, optical properties of materials, introduction to optical systems and precision optics experiments, selected topics in modern optics.

Three lectures; first term

Prerequisite(s): Registration in Level II or above of any Engineering Program; one of ISCI 2A18 A/B, MATH 2A03, 2Q04, 2XX3, 2ZZ3; and one of MATH 2C03, 2P04, 2Z03; and one of PHYSICS 2B03 or ENGPYHS 2A04

Cross-list(s): PHYSICS 3N03

ENGPYHS 3EC3 - PROFESSIONAL COMMUNICATION AND PROJECT MANAGEMENT

Introduction to communication styles, team dynamics, oral and written presentation skills, effective two-way communication strategies, project management, problem analysis, and job skills.

Three lectures; first term

Prerequisite(s): Registration in an Engineering program

Antirequisite(s): ENGPYHS 4ES3

Not offered in 2019-2020.

ENGPYHS 3ES3 - INTRODUCTION TO ENERGY SYSTEMS

A survey course on energy systems with emphasis on the analytic tools needed to evaluate them in terms of performance, resources and environmental sustainability, costs, and other relevant factors over their life cycles.

Three lectures; first term

Prerequisite(s): Registration in Level II or above of an Engineering program

Antirequisites: MECHENG 4004 and CHEMENG 4A03

ENGPYHS 3F03 - ADVANCED APPLICATIONS OF QUANTUM MECHANICS

Application of quantum mechanics to the electronic, optical and mechanical behaviour of materials.

Three lectures; first term

Prerequisite(s): ENGPYHS 2QM3 or PHYSICS 2C03 and registration in an Engineering program

ENGPYHS 3G04 A/B - PHOTONICS INSTRUMENTATION

The course covers the design and operation of medical, life science, commercial, and consumer applications of photonics.

One lecture (one hour), one lab (two hours); two terms

Prerequisite(s): Registration in Level III or above in a Faculty of Engineering, or Science, or Health Science Program, or registration in the Integrated Biomedical Engineering & Health Sciences (IBEHS) Program.

Antirequisite(s): ENGPYHS 4G03

ENGPYS 3H04 A/B S - RESEARCH PROJECT IN ENGINEERING PHYSICS

A special program of studies to be arranged by mutual consent of a professor and the student, to carry out experiments and/or theoretical investigations. A written report and oral defence are required.

Both terms

Prerequisite(s): Registration in the penultimate year of an Engineering Physics program and a GPA of at least 8. Subject to Department approval, students are permitted to be supervised by faculty members in other Engineering departments. Subject to Department approval, students from other Departments are permitted to take this course if their supervisor is a faculty member of the Department of Engineering Physics.

ENGPYS 3L04 - ENGINEERING METROLOGY: FUNDAMENTALS AND APPLICATIONS

Statistics for engineering measurements, error analysis of experimental data, sensors for pervasive engineering measurements, radiation detectors (thermal, optical, nuclear), noise and interference, instrument response and uncertainty, signal conditioning, data communications, reliability and safety, introduction to feedback and control, and selected topics in state-of-the-art technologies.

Three lectures, one lab (three hours each) every other week, one tutorial; first term
Prerequisite(s): Registration in Level III or above of any Engineering Physics program

ENGPYS 3NM4 - NUMERICAL METHODS FOR ENGINEERING

Algebraic solutions; Numerical integration and differentiation; Finite difference and finite element methods; Euler method; Runge- Kutta techniques; Partial differential equations; Monte Carlo simulation.

Three lectures, one laboratory (three hours); first term

Prerequisite(s): Registration in Level II or above of an Engineering program

Antirequisite(s): ENGPYS 2CE4

Not offered in 2019-2020.

ENGPYS 3004 - INTRODUCTION TO FLUID MECHANICS AND HEAT TRANSFER

Fluid properties and statics are introduced. Basic equations of continuity, energy and momentum for internal and external flows are discussed. Similitude, dimensional analysis, measuring devices, fluid machinery and hydraulic networks. Conduction and convection heat transfer.

Three lectures, one lab (three hours each) every other week; one tutorial, first term

Prerequisite(s): MATH 2Z03 and credit or registration in MATH 2ZZ3

ENGPYS 3PN4 - SEMICONDUCTOR JUNCTION DEVICES

Electronic properties of semiconductors: non-equilibrium carrier conditions; steady state and non-steady state; p-n junctions; Schottky diodes; bipolar junction transistors. Detailed coverage of a range of diodes including photodiodes, solar cells, light emitting diodes, zener diodes, and avalanche diodes.

Three lectures, one lab (three hours each); second term

Prerequisite(s): MATLS 3Q03, or credit or registration in ENGPYS 3F03

ENGPYS 3SM3 - STATISTICAL MECHANICS

An introduction to statistical distributions and their properties, and the statistical basis of thermodynamics at the microscopic level, with applications to problems originating in a modern laboratory or engineering environment.

Lectures (three hours), tutorial (one hour); second term

Prerequisite(s): Enrolment in Level III or above of an Engineering program

Antirequisite(s): ENGPYS 2H04, PHYSICS 2H04, PHYSICS 3K03

Not offered in 2019-2020.

ENGPYS 3W04 - SIGNALS AND SYSTEMS FOR ENGINEERING

A systems approach to measurement in which synthesis of topics such as Fourier transforms, signal processing and enhancement, data reduction, modelling and simulation is undertaken.

Two lectures, one lab (three hours each), one tutorial; second term

Prerequisite(s): Registration in Level III or above of any Engineering or Science program

Antirequisite(s): IBEHS 3A03

ENGPYS 4A06 A/B - DESIGN AND SYNTHESIS PROJECT

Design and synthesis projects supervised by a faculty member in the Department of Engineering Physics.

Lectures, tutorials, labs, one capstone project; both terms

Prerequisite(s): Registration in the final level of an Engineering Physics program

ENGPYS 4D03 - NUCLEAR REACTOR PHYSICS

Introduction to nuclear fission and the physics of nuclear reactors; reactor statics for homogeneous reactors; reactor kinetics for simple time-dependent situations; effects of saturating fission products (Xe-135); reactivity coefficients

Three lectures; first term

Prerequisite(s): ENGPYS 3D03

ENGPYS 4ES3 - SPECIAL TOPICS IN ENGINEERING PHYSICS

Various topics in Engineering Physics will be examined. This course is a self-study course.

Three lectures; first term

Prerequisite(s): Registration in Level IV or V of an Engineering Physics program

ENGPYS 4H04 A/B - RESEARCH PROJECT IN ENGINEERING PHYSICS

A special program of studies to be arranged by mutual consent of a professor and the student, to carry out experiments and/or theoretical investigations. A written report and oral defence are required.

Both terms

Prerequisite(s): Registration in final level of an Engineering Physics program and a GPA of at least 8.

Subject to Department approval, students are permitted to be supervised by faculty members in other Engineering departments. Subject to Department approval, students from other Departments are permitted to take this course if their supervisor is a faculty member of the Department of Engineering Physics.

ENGPYS 4I03 - INTRODUCTION TO BIOPHOTONICS

This course covers the basic principles of light interaction with biological systems and specific biomedical applications of photonics such as optical light microscopy, endoscopic imaging, spectroscopy in clinical diagnosis, flow cytometry, micro-optical sensors, etc.

Three lectures; second term

Prerequisite(s): Registration in Level III or above in a Faculty of Engineering, or Science, or Health Science Program, or the Integrated Biomedical Engineering & Health Sciences (IBEHS) Program.

ENGPYS 4MD3 - NANOSCALE SEMICONDUCTOR DEVICES

Nanoscale semiconductor devices and associated materials including organic electronics (OLEDs, organic solar cells), quantum well devices (LEDs, high electron mobility transistors), quantum dots, quantum wires, graphene, emerging nanoscale materials and devices.

Three lectures; second term

Prerequisite(s): ENGPYS 3F03; and credit or registration in ENGPYS 3PN4 or credit or registration in both MATLS 3Q03 and 4Q03

ENGPYHS 4NE3 - ADVANCED NUCLEAR ENGINEERING

Energy generation and conversion, heat transfer and transport in a nuclear reactor. Characteristics and performance of nuclear fuels. Thermal margins and safety limits. Aging of core structural materials. Structural integrity of components.

Three lectures; second term

Prerequisite(s): ENGPYHS 3D03

ENGPYHS 4P03 - NUCLEAR POWER PLANT SYSTEMS AND OPERATION

Systems and overall unit operations relevant to nuclear power plants; includes all major reactor and process systems; self-study using interactive nuclear power plant. Three lectures; second term

Prerequisite(s): Registration in Level IV or above of any Engineering program (familiarity with ENGPYHS 4D03 or other nuclear course desirable)

ENGPYHS 4PP3 - PLASMA PHYSICS APPLICATIONS

An introductory course on plasma physics with emphasis on occurrence of plasmas in nature, and applications of plasmas in thermonuclear fusion and other engineering disciplines and on occurrence of plasmas in nature.

Three lectures; one-time demonstration lab (three hours); first term

Prerequisite(s): ENGPYHS 2A04, or PHYSICS 2B03 and 2BB3, or ELECENG 2FH3

ENGPYHS 4QC3 - INTRODUCTION TO QUANTUM COMPUTING

An introduction to quantum computing including qubits, entanglement, quantum key cryptography, teleportation, quantum circuits and algorithms, spin qubits.

Three lectures; second term

Prerequisite(s): ENGPYHS 2QM3 or PHYSICS 2C03

ENGPYHS 4S03 - LASERS AND ELECTRO-OPTICS

Basic properties of electromagnetic radiation. Optical modulation and detection. Nonlinear optics. Multiple-beam interference and coherence. Optical resonators. Laser systems.

Three lectures; first term

Prerequisite(s): ENGPYHS 3E03, PHYSICS 3N03, ELECENG 4EM4, or ELECENG 3FK4

ENGPYHS 4U02 - MODERN AND APPLIED PHYSICS LABORATORY

Selected advanced experiments in two areas of applied physics, chosen from among: photonics; semiconductor fabrication (solar cells); biomedical engineering; nuclear engineering.

One Lab (three hours each); both terms

Prerequisite(s): Registration in the final level of an Engineering Physics program

Antirequisite(s): ENGPYHS 4U04

ENGPYHS 4X03 - INTRODUCTION TO PHOTOVOLTAICS

A review of photovoltaic devices including solar cell operation, characterization, manufacturing, economics and current and next generation technologies.

Three lectures; first term

Prerequisite(s): One of ELECENG 2E15, MATLS 3Q03 or ENGPYHS 3BA3

ENGPYHS 4Z03 - SEMICONDUCTOR MANUFACTURING TECHNOLOGY

Detailed description of fabrication technologies used in the semiconductor industry; computer modelling of device fabrication; analysis of device performance.

Two classroom-based lectures, one computer cluster-based lecture; first term

Prerequisite(s): ENGPYHS 3F03 or MATLS 3Q03; and registration in the Faculty of Engineering or the Integrated Biomedical Engineering & Health Sciences (IBEHS) program.

ENGINEERING TECHNOLOGY

Courses in Engineering Technology are administered by the Bachelor of Technology Program.

Engineering Technology Building (ETB), Room 121, ext. 20195

<http://mybtechdegree.ca>

ENGTECH 1AC3 - ANALYTICAL CHEMISTRY

Introduction to laboratory procedures used in chemical analysis for classical wet and instrumental methods; statistical data treatment, gravimetric analysis, volumetric analysis, pH measurements and optical methods.

Three lectures, one lab (three hours); second term

Prerequisite(s): ENGTECH 1CH3 and registration Automation Engineering Technology or Biotechnology

ENGTECH 1BI3 - BIOLOGY

This course provides basic introduction to the following topics: chemistry of life, cells, genetics, evolution and diversity and plant and animal form and function.

Two lectures, one lab (three hours every other week); second term

Prerequisite(s): Registration in Biotechnology

ENGTECH 1CH3 - CHEMISTRY

Basic chemical concepts, calculations and laboratory procedures. Chemical formulae and equations, chemical stoichiometry, nomenclature, acids and bases, gases, chemical equilibrium, thermochemistry and thermodynamics, redox reactions and electrochemistry.

Three lectures, one tutorial, one lab (three hours every other week); first term

Prerequisite(s): Registration in Automation Engineering Technology, or Automotive and Vehicle Engineering Technology, or Biotechnology

ENGTECH 1CP3 - C++ PROGRAMMING

Programming concepts and introduction to C++ programming. C++ syntax, functions, decision-making, looping, operators, arrays and data structures.

Two lectures, one lab (two hours); first term

Prerequisite(s): Registration in Automation Engineering Technology, or Automotive and Vehicle Engineering Technology, or Biotechnology

Antirequisite(s): COMPTECH 3PD3

ENGTECH 1EL3 - ELECTRICITY AND ELECTRONICS I

Introduction to electronic circuits; DC and AC sources, resistors, inductors, and capacitors; phasors and impedance; transient and steady-state analysis; network analysis; energy and power.

Four lectures, one lab (three hours); second term

Prerequisite(s): Registration in Automation Engineering Technology, or Automotive and Vehicle Engineering Technology, or Biotechnology

ENGTECH 1ET0 - INTRODUCTION TO THE TECHNOLOGY CO-OP PROGRAM

Orientation to Technology Co-op programs and the workplace; self-assessment and goal setting; application procedures and materials; occupational health and safety.

Prerequisite(s): Registration in a Degree Completion Technology program

ENGTECH 1MC3 - MATHEMATICS I

Pre-calculus concepts: algebra, trigonometry, complex numbers, exponential and logarithmic functions, systems of equations, matrices, determinants and vectors. Limits, continuity, differential calculus, partial derivatives, applications, sequences and series.

Four lectures; first term

Prerequisite(s): Registration in Automation Engineering Technology, or Automotive and Vehicle Engineering Technology, or Biotechnology

ENGTECH 1ME3 - STATICS AND MECHANICS OF MATERIALS

Statics and kinematics of particles and rigid bodies: force vectors; equilibrium; trusses, frames and machines; internal forces; centroids; friction; axial load, torsion, bending and shear; stress and strain. Newton's Second Law; moments of inertia; plane motion.

Four lectures; second term

Prerequisite(s): Registration in Automotive and Vehicle Engineering Technology

ENGTECH 1MT3 - MATHEMATICS II

Integral calculus involving all the techniques of integration, applications, improper integrals, multiple integrals and integral theorems, infinite sequences and series.

Four lectures; second term

Prerequisite(s): ENGTECH 1MC3 and registration Automation Engineering Technology, or Automotive and Vehicle Engineering Technology, or Biotechnology

ENGTECH 1PH3 - PHYSICS

Sound, light, kinematics, forces, work, energy, fluid and thermal physics.

Four lectures, one lab (two hours every other week); first term

Prerequisite(s): Registration in Automation Engineering Technology, or Automotive and Vehicle Engineering Technology, or Biotechnology

ENGTECH 1PR3 - OBJECT-ORIENTED PROGRAMMING

Project-based course covering computer programming. Object-oriented, event-driven programs involving decisions, looping, arithmetic calculations, string handling and data file handling.

Two lectures, one lab (two hours); second term

Prerequisite(s): ENGTECH 1CP3 and registration in Automation Engineering Technology or Automotive and Vehicle Engineering Technology

ENGTECH 2EEO - FOUR MONTH CO-OP EXPERIENCE I

Minimum of 15 weeks of full-time employment in a professional environment.

Prerequisite(s): GENTECH 2PW3 and registration in a Four-Year Technology program and permission of the Engineering Co-op and Career Services Office

ENGTECH 2ES3 - ENGINEERING STATISTICS

An introductory statistics course covering the following topics with engineering applications: organization and description of data, probability and distributions, confidence intervals and hypothesis testing and bivariate data analysis using regression.

Two lectures, one tutorial; first term

Prerequisite(s): ENGTECH 1MT3; and registration in Automotive and Vehicle Engineering Technology

Antirequisite(s): ENGTECH 3ES3, 3ST3

ENGTECH 2ETO - FOUR MONTH CO-OP EXPERIENCE I

Minimum of 15 weeks of full-time employment in a professional environment.

Prerequisite(s): ENGTECH 1ETO, registration in a Degree Completion Technology Co-op program, and permission of the Engineering Co-op and Career Services Office

ENGTECH 2MA3 - MATHEMATICS III

Techniques for solving first and second order ordinary differential equations with applications; initial value and boundary value problems, systems of differential equations, partial differential equations.

Three lectures, one tutorial; first term

Prerequisite(s): ENGTECH 1MT3; and registration in Automation Engineering Technology, Automotive and Vehicle Engineering Technology, or Biotechnology

ENGTECH 2MS3 - MODELLING AND NUMERICAL SOLUTIONS

Number systems and errors; solutions to nonlinear equations; interpolation by polynomials; matrices and systems of linear equations; differentiation and integration; differential equations; applications to mechanical systems.

Three lectures; second term

Prerequisite(s): ENGTECH 1CP3, ENGTECH 1MT3; and registration in Automotive and Vehicle Engineering Technology

Antirequisite(s): CIVTECH 3MN3, ENGTECH 3MN3

ENGTECH 2MT3 - MATHEMATICS IV

Continuous time signals and systems; convolution; Laplace transform, Fourier series and transform; Discrete time signals and systems.

Four lectures; second term

Prerequisite(s): ENGTECH 2MA3; and registration in Automation Engineering Technology or Automotive and Vehicle Engineering Technology

ENGTECH 3CT3 - SYSTEM ANALYSIS AND CONTROLS

Mathematical foundation: differential equations, Laplace transforms, transform by partial fraction expansion; transfer functions; modelling of physical systems; stability, Routh criteria; time and frequency domain; Root-locus technique; design of control systems.

Two lectures, one lab; one term

Prerequisite(s): ENGTECH 3MA3 and registration in Manufacturing Engineering Technology

ENGTECH 3DM3 - DISCRETE MATHEMATICS

Fundamental discrete mathematics concepts relevant to IT: sets, relations, functions, graphs, propositional logic. State machines. Input/output specifications. Invariants. Three lectures; one term

Prerequisite(s): Registration in Software Engineering Technology

ENGTECH 3EEO - FOUR MONTH CO-OP EXPERIENCE II

Minimum of 15 weeks of full-time employment in a professional environment.

First term

Prerequisite(s): ENGTECH 2EEO; registration in a Four-Year Technology program; and permission of the Engineering Co-op and Career Services Office

ENGTECH 3ES3 - ENGINEERING STATISTICS

An introductory statistics course covering the following topics with engineering applications: organization and description of data, probability and distributions, confidence intervals and hypothesis testing and bivariate data analysis using regression.

Two lectures, one tutorial; first term

Prerequisite(s): ENGTECH 1MT3; and registration in Level III of Automation Engineering Technology or Biotechnology

Antirequisite(s): ENGTECH 2ES3, 3ST3

ENGTECH 3ETO - FOUR MONTH CO-OP EXPERIENCE II

Minimum of 15 weeks of full-time employment in a professional environment.

Prerequisite(s): ENGTECH 2ETO, registration in a Degree Completion Technology Co-op program, and permission of the Engineering Co-op and Career Services Office

ENGTECH 3FE3 - FINITE ELEMENT ANALYSIS

Matrix techniques; eigenvalue problems: equations of elasticity: plane stress, plane strain, 3D problems; variational methods; element types, element stiffness, mass matrices and load vector; assemblage of elements, boundary conditions.

Two lectures; first term

Prerequisite(s): AUTOTECH 2AC3, AUTOTECH 2TS3, and registration in Level III of Automotive and Vehicle Engineering Technology

Antirequisite(s): ENGTECH 4FA3

ENGTECH 3MA3 - MATHEMATICS V

Ordinary and partial differential equations; Laplace transforms; Fourier series; vector calculus; integral theorems, with engineering applications.

Three lectures; one term

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology, or Software Engineering Technology

ENGTECH 3ML3 - STRENGTH OF MATERIALS

Stresses under combined loads, generalized Hooke's Law; two and three dimensional stresses, stress transformation, principal stresses, Mohr's circle; deflections by integration; energy methods, Castagliano's theorem; columns; yield criteria. Three lectures; one term

Prerequisite(s): ENGTECH 3MA3, 3SD3, and registration in Civil Engineering Infrastructure Technology or Manufacturing Engineering Technology

ENGTECH 3MN3 - MODELLING AND NUMERICAL SOLUTIONS

Number systems and errors; solutions to nonlinear equations; interpolation by polynomials; matrices and systems of linear equations; differentiation and integration; differential equations; applications to mechanical systems.

Two lectures, one tutorial; first term

Prerequisite(s): ENGTECH 1CP3, ENGTECH 2MA3; and registration in Level IV or above of Automation Engineering Technology

Antirequisite(s): CIVTECH 3MN3, ENGTECH 2MS3

ENGTECH 3SD3 - STATICS AND DYNAMICS

Two and three dimensional force vectors, equilibrium of a particle; moments and couples; equilibrium rigid bodies; centroids, second moment of area, moment of inertia; truss, and static analysis. Planar kinematics and planar kinetics of particles and rigid bodies; work and energy, impulse, and momentum.

Two lectures, one lab; one term

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.) or Manufacturing Engineering Technology Co-op (B.Tech.)

Antirequisite(s): MANTECH 3MD3

ENGTECH 3SP3 - STRUCTURE AND PROPERTIES OF MATERIALS

Structure of crystalline solids; imperfections in solids; mechanical properties of metals, dislocations and strengthening mechanisms, failure, phase diagrams, phase transformation in metals, processing of metal alloys, composites, structures and properties of ceramics, processing of ceramics.

Three lectures; one term

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology or Manufacturing Engineering Technology

Antirequisite(s): ENGTECH 3MN3

ENGTECH 3ST3 - PROBABILITY AND STATISTICS

Probability and statistics for engineering and technology. Descriptive statistics, discrete and continuous random variables and probability distributions, confidence intervals, hypothesis testing, analysis of variance, correlation and regression.

Three lectures; one term

Prerequisite(s): ENGTECH 3MA3 and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.) or Software Engineering Technology

Antirequisite(s): ENGTECH 3ES3

ENGTECH 3TD3 - THERMODYNAMICS

Introduction to thermodynamics, properties of pure substances, first and second laws of thermodynamics, entropy, vapor power cycles, refrigeration cycles, and combined power cycles.

Three lectures; one term

Prerequisite(s): ENGTECH 3MA3 and registration in Manufacturing Engineering Technology or Power and Energy Engineering Technology

Antirequisite(s): ENRTECH 3TD3, MANTECH 3TF3

ENGTECH 4ED3 - SENIOR ENGINEERING DESIGN PROJECT

A project involving design and synthesis that reinforces concepts gained from previous semesters. Such a project involves research, design, and assessment. Two lectures, one lab; one term

Prerequisite(s): CIVTECH 4SD3 or 4RC3; and registration in Level IV of Civil Engineering Infrastructure Technology
CIVTECH 4SD3 or 4RC3 may be taken concurrently with this course.

ENGTECH 4EE0 - FOUR MONTH CO-OP EXPERIENCE III

Minimum of 15 weeks of full-time employment in a professional environment.

Prerequisite(s): ENGTECH 3EE0; registration in a Four-Year Technology program; and permission of the Engineering Co-op and Career Services Office

ENGTECH 4EP3 - SENIOR ENGINEERING PROJECT

A project that is based on the knowledge gained from previous semesters. Such a project involves research, design, development and implementation of a process. Three lectures; one term

Prerequisite(s): ENRTECH 4CT3, 4PD3, 4PM3; or one of ENRTECH 4RE3, 4RT3 and registration in Power and Energy Engineering Technology

Antirequisite(s): ENRTECH 4EP3

ENGTECH 4FA3 - FINITE ELEMENT ANALYSIS

Formerly ENGTECH 3FA3.

Matrix techniques, eigenvalue problems, equation of elasticity, 3D problems, variational methods, element types, element stiffness, mass matrix and load vector, assemblage of elements, boundary conditions.

Two lectures, one lab; one term

Prerequisite(s): ENGTECH 3ML3 and ENGTECH 4MA3 or CIVTECH 3MN3, and registration in Civil Engineering Infrastructure Technology or Manufacturing Engineering Technology

Antirequisite(s): ENGTECH 3FE3

ENGTECH 4FD3 - SENIOR ENGINEERING PROJECT

Project-based course using the agglomeration of previously acquired knowledge. Research, design, implement and document a software solution to a problem in a real-world application domain.

Three lectures, one term

Prerequisite(s): Registration in Level IV Software Engineering Technology

Antirequisite(s): SFWRTECH 4FD3

ENGTECH 4MA3 - ADVANCED MATHEMATICS

Sequence and series, Fourier series, Matrix algebra, Formulating engineering process models, Numerical solutions techniques, Root findings, Curve fittings, Numerical integration, Numerical differentiation, Ordinary differential equations. Three lectures; one term

Prerequisite(s): ENGTECH 3MA3 and registration in Civil Engineering Infrastructure Technology Co-op (B.Tech.), Manufacturing Engineering Technology Co-op (B.Tech.) or Power and Energy Engineering Technology

Antirequisite(s): CIVTECH 3MN3

ENGTECH 4TF3 - MECHANICS OF FLUIDS

Fluid statics, flow in closed conduits, dimensional analysis and similarity, energy and Bernoulli's equation, flow kinematics, hydraulic cross-sections, energy loss in piping system, fluid Machinery.

Three lectures, one lab; one term

Prerequisite(s): ENGTECH 3MA3 and registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology or Power and Energy Engineering Technology

Antirequisite(s): AUTOTECH 3TS3

ENGLISH

Courses in English are administered by the Department of English and Cultural Studies.

Chester New Hall, Room 321, ext 24491

<http://english.humanities.mcmaster.ca/>

Department Notes

- All Level II and III ENGLISH courses are open as electives to students registered in Level II or above of any undergraduate program with the exception of the following:
 - ENGLISH 2D03 - Creative Writing Inquiry
 - ENGLISH 2RW6 A/B - Reading and Writing Criticism
 - ENGLISH 3A03 - Critical Race Studies
 - ENGLISH 3AA3 - Theories of Gender and Sexuality
 - ENGLISH 3CW3 - Creating Writing in/for/with Communities
 - ENGLISH 3RW3 - Experiential Practicum: Reading and Writing in the Community
- Courses restricted to students registered in programs in English may be available to qualified students in other programs if space permits. Students interested in such courses should request permission from the departmental counsellor.
- Level IV seminars are open only to Honours students registered in Level IV of an English program. Enrolment will be limited to 18 students per seminar when possible. A list of seminars to be offered will be available prior to registration and balloting for seminars for the next academic year will take place in March.

Courses

If no prerequisite is listed, the course is open.

ENGLISH 1CS3 - STUDYING CULTURE: A CRITICAL INTRODUCTION

The course will introduce fundamental concepts and questions in the field of cultural studies, and will prepare students to use those tools in analyzing culture as a site of meaning, identities, power, and pleasure. The course aims to develop your ability to think critically about your own engagements with a broad range of manifestations of culture (e.g. popular culture, social institutions, everyday practices, digital culture, consumer culture). Considerable emphasis will be placed on the development of critical skills in reading and writing.

Two lectures, one tutorial; one term

Antirequisite(s): CSCT 1CS3

ENGLISH 1F03 - THE WRITTEN WORLD

What does the world look like when it takes a literary form? We will read and write about one or more literary genres or forms from various times and places, and reflect on the shape of literature, its place in the world, and the place of the world in it. The course functions as an introduction to the study of literature, equipping students with conceptual, analytical and writing tools that will help them become informed readers of the many modes and manners of imaginative expression. Considerable emphasis will be placed on the development of critical skills in reading and writing.

Two lectures, one tutorial; one term

ENGLISH 1G03 - MAKING AND UNMAKING LITERARY TRADITIONS

This introductory course explores literatures written in English from the perspective of literary historical periods, genres, and critical approaches. We will trace how

particular literary traditions emerge in relation to developments in the cultural narratives of, for example, gender and sexuality, selfhood, nation and empire, capitalism, and the environment. We will consider how a literary text is an expression of a particular cultural moment, with all its social and material preoccupations, and yet makes meaning through a complex dialogue with past traditions. The course functions as an introduction to the study of literature, equipping students with conceptual, analytical, and writing tools that will help them become an informed reader of the many modes and manners of imaginative expression. Considerable emphasis will be placed on the development of critical skills in reading and writing.

Two lectures, one tutorial; one term

Antirequisite(s): ENGLISH 1C06 A/B

ENGLISH 1H03 - WORDS IN PLACE

Many public ceremonies in Canada now include acknowledgements of whose land we are meeting on. What does it mean to acknowledge the people and the place where we live and work? How do places come into focus when we write and speak about them? This introductory course examines oral narratives, art, poetry, film, documentary, fiction, and/or literary non-fiction that emphasize the dynamics of particular places in relation to Indigenous and colonial histories; diasporic histories of movement, displacement, emigration and immigration; natural, economic, and political geographies; as well as the particular languages -- i.e. different Englishes, Indigenous languages -- that places give rise to. Considerable emphasis will be placed on the development of critical skills in reading and writing.

Two lectures, one tutorial; one term

ENGLISH 2AA3 - AMERICAN LITERATURE BEFORE 1900

This course surveys American literary and cultural production up to 1900. Issues may include: settler and colonial culture, the foundations of African-American literature, Indigenous literatures, ante- and post-bellum literatures, dark romanticism, American Renaissance, spiritual narrative.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 2H06 A/B

ENGLISH 2BB3 - TOPICS IN 20TH AND 21ST-CENTURY AMERICAN LITERATURE AND CULTURE

A specialized approach to studies in 20th and 21st-century American literary and cultural production, focussing on selected movements, issues, genres or traditions. Eg. Native American Renaissance, Asian-American literature and cinema, the Beat Generation, the Harlem Renaissance, American underground commix.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 2H06 A/B

First offered in 2019-2020

ENGLISH 2BL3 - TWENTIETH- AND TWENTY-FIRST CENTURY BRITISH LITERATURE AND FILM

An introduction to the twentieth- and twenty-first-century literary texts and films from the British Isles, with attention to their historical, cultural, and socio-political contexts.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 2I06 A/B

ENGLISH 2C03 - CONTEMPORARY CANADIAN FICTION

A study of the themes and structure of the contemporary Canadian novel, usually with emphasis on the relationship between Canada's cultural patterns and its literature.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program
Not open to students with credit or registration in ENGLISH 2G06 A/B.

ENGLISH 2CR3 - SHAKESPEARE: COMEDIES, PROBLEM PLAYS, AND ROMANCES

A close study of selected plays in these genres, together with relevant literary, cultural, theatrical, and historical contexts. May include plays by other dramatists. Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 2L03, 3K06 A/B, THTRFLM 2CR3, 3KL6 A/B

ENGLISH 2D03 - CREATIVE WRITING INQUIRY

A creative writing seminar and workshop based on the Inquiry model of self-directed research and collaboration. Students will exercise their creative talents in a variety of genres and work independently and in groups to develop critical skills and problem solving techniques.

Three hours; one term

Prerequisite(s): Registration in a program in English and Cultural Studies

ENGLISH 2G06 A/B - CANADIAN LITERATURE

Major aspects of the development of Canadian literature from the late 18th century to the mid-20th century. French-Canadian work in translation will be used for comparative purposes.

Three hours; two terms

Prerequisite(s): Registration in Level II or above of any program

ENGLISH 2HT3 - SHAKESPEARE: HISTORIES AND TRAGEDIES

A close study of selected plays in these genres, together with relevant literary, cultural, theatrical, and historical contexts. May include plays by other dramatists. Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 2L03, 3K06 A/B, THTRFLM 2HT3, 3KL6 A/B

ENGLISH 2KA3 - INDIGENOUS FUTURISMS AND WONDERWORKS

Through a focus on Indigenous articulated realities and futures, this course refuses colonial narratives of the 'disappearing Indian' and insists upon Indigenous presence in past, present, and future as essential for envisioning a human future. Genres of study will include fiction, graphic novels, film, non-fiction, performance, and wonderworks.

Prerequisite(s): INDIGST 1A03, 1AA3, RECONCIL 1A03, or 3 units of Level I English; or permission of the Instructor

Cross-list(s): INDIGST 2K03

This course is administered by the Indigenous Studies program.

ENGLISH 2KK3 - STUDIES IN WOMEN WRITERS

A closely focused course on women's writing in English. The topic for the course varies, sometimes concentrating on specific issues, sometimes on an historical period or national literature. Relevant feminist theory will be a component of the course.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 2K06 A/B, CSCT 2KK3, ENGLISH 2K06 A/B, WOMENST 2K06 A/B, 2KK3

ENGLISH 2M06 A/B - CONCEPTS OF CULTURE

An analysis of the concept of culture from the Enlightenment to the present, with particular attention to the development of Cultural Studies as a discipline in the twentieth- and twenty-first centuries.

Two lectures, one tutorial; two terms

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ARTHIST 2M03, CMST 2M03, ENGLISH 2M03, CSCT 2M06 A/B

ENGLISH 2NH3 - NARRATIVES OF HEALTH

This course inquires into representations of health with reference to a range of media. Critical frameworks may include critical disability studies, environmental humanities, feminist research, critical race studies, science and technology studies, narrative medicine, and Indigenous studies.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

ENGLISH 2P03 - MODERNITY, POSTMODERNITY, VISUALITY

This course will examine modernity and postmodernity through an exploration of a variety of theoretical discourses and representational practices, with specific reference to visual culture.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 2P03

ENGLISH 2PC3 - POPULAR CULTURE

This course examines the study of everyday culture, its underlying assumptions, its locations, and the capacity of audiences to engage actively and critically with it. Possible areas of study may include: advertising, fandom, film, TV, social media, youth culture, celebrity, memes, comics, online apps, popular music, video.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

ENGLISH 2RW6 A/B - READING AND WRITING CRITICISM

This course will offer a grounding in reading literary and cultural texts from a range of contemporary critical approaches. Special attention will be paid to writing skills and developing sustained analytical arguments about literature and culture. Three hours; two terms

Prerequisite(s): Registration in a program in English and Cultural Studies

Antirequisite(s): ENGLISH 2A03

ENGLISH 2S03 - SPECTACULAR BODIES

This course examines the representations and constructions of the racialized, gendered, ethnic, or othered human body in and through contemporary cultural texts. Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 2S03

ENGLISH 2Z03 - NATURE, LITERATURE, CULTURE: INTRODUCTION TO THE ENVIRONMENTAL HUMANITIES

A study of representations of nature in a variety of written and visual texts. Topics may include food, environmental crisis, development, humans and other animals. Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 2Z03

ENGLISH 3A03 - CRITICAL RACE STUDIES

This course examines contemporary debates in critical race theory in an attempt to critically decode the operations of race in literary and cultural texts.

Three hours; one term

Prerequisite(s): Registration in Level III or above in a program in English and Cultural Studies, Justice, Political Philosophy and Law, or Peace Studies.

Antirequisite(s): CSCT 3A03, PEACEST 3A03, WOMENST 3H03

ENGLISH 3AA3 - THEORIES OF GENDER AND SEXUALITY

This course explores a range of theories of gender and sexuality by working through readings from the intersecting fields of feminist, queer and masculinity studies. Three hours; one term

Prerequisite(s): Registration in Level III or above in a program in English and Cultural Studies, or Justice, Political Philosophy and Law.

Antirequisite(s): CSCT 3AA3, WOMENST 3HH3

ENGLISH 3CC3 - READING FILM

A critical examination of selected films and film genres as cultural texts, using methods drawn from film theory and cultural studies.

Three hours, plus one weekly film screening; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3CC3, CMST 3CC3, THTRFLM 3R03

ENGLISH 3CL3 - TOPICS IN TWENTIETH- AND TWENTY-FIRST-CENTURY BRITISH LITERATURE AND CULTURAL STUDIES

A foundational study of literary and cultural production from the UK, Scotland, and/or Ireland since 1900 through an important theme, cultural movement, era, or genre. Topics might include: migration, terrorism, postwar subcultures, the interwar period, the 1980s, dystopias, or espionage.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): English 2I06 A/B

ENGLISH 3CW3 - CREATING WRITING IN/FOR/WITH COMMUNITIES

This creative writing inquiry class engages students in the staged development of a creative writing project in consultation with and on behalf of a community of their choice.

Three hours; one term

Prerequisite(s): Registration in a program in English and Cultural Studies

ENGLISH 3D03 - SCIENCE FICTION

An examination of a number of standard science fiction tropes such as time travel, lost worlds, utopia/dystopia, totalitarian societies, alien races and post holocaust societies.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3D03

Not open to students with credit in English 3I13 TOPICS IN PROSE, if the topic was Science Fiction.

ENGLISH 3EC3 - EIGHTEENTH-CENTURY LITERATURE AND CULTURE: ENLIGHTENMENT AND ITS SHADOWS

A study of British Literature and Culture of the long eighteenth-century (1660-1800), including plays, poetry, fiction, and essays. Themes include sexual politics, consumerism, globalization, the public sphere, and subjectivity.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 3G06 A/B

ENGLISH 3EE3 - AFRICAN AMERICAN LITERATURE

A study of selected texts by African American writers published since 1900, considered in the context of African American history and literary tradition.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3EE3

ENGLISH 3F03 - THE FAIRY TALE

An examination of fairy tales from a variety of cultures and historical periods. Students will also explore theories of the folktale and their implications for our understanding of other literary genres.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

ENGLISH 3GF3 - STUDIES IN POPULAR GENRES

This course will provide an in-depth exploration of the conventions and consumption of one or more popular genres, such as graphic narrative, science fiction, romance, horror, crime writing, fantasy, chicklit or memoir.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3GF3

ENGLISH 3GF3 may be repeated, if on a different topic, to a total of six units.

ENGLISH 3GG3 - THEORIES OF DECOLONIZATION AND RESISTANCE

A study of theoretical and cultural works that examine the effects of empire and chart projects for decolonization. Introduces debates in Indigenous and postcolonial studies, including as they engage with theories of racial capitalism, gender and sexuality, globalization, war, environmental change.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3R06 A/B, ENGLISH 3R06 A/B, PEACEST 3E06 A/B

Cross-list(s): PEACEST 3GG3

ENGLISH 3H03 - JANE AUSTEN

A critical evaluation of a selection of Jane Austen's work with a focus on exploring late 18th- and early 19th-century British culture.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

ENGLISH 3L03 - OLD ENGLISH LITERATURE IN TRANSLATION

Old English language and literature will be studied in the context of Anglo-Saxon culture.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 3L06 A/B

ENGLISH 3NN3 - MEDIEVAL LITERATURE AND CULTURE: AN OVERVIEW

An introduction to the literature and culture of medieval England, with attention to their historical, cultural, and socio-political contexts.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 3C06 A/B

ENGLISH 3PT3 - PERSPECTIVE AND TIME IN FICTION

This course explores the art of perspective in fiction, and of how to use point of view to write fiction that is bold, challenging, and authentic.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

ENGLISH 3Q03 - THE HISTORY OF CRITICAL THEORY

A survey of the main developments in critical theory from Plato to the end of the 19th century. Areas of investigation may include: art, aesthetics, civil society, representation, ethics and knowledge.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3Q03

ENGLISH 3QQ3 - CONTEMPORARY CRITICAL THEORY

This course examines selected issues in contemporary critical theory. Areas of investigation may include: representation, power/knowledge, discourse, subjectivity and the body.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3QQ3

ENGLISH 3RR3 - AFRICAN LITERATURE AND FILM

This course introduces students to a selection of literary texts and films from countries across the African continent.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3RR3

ENGLISH 3RW3 - EXPERIENTIAL PRACTICUM: READING AND WRITING IN THE COMMUNITY

This course studies the theory and practice of community engagement in connection with literary and cultural studies. Students will integrate an experiential learning opportunity (normally requiring a four-hour a week volunteer placement with a departmental community partner) with academic research, discussion, and writing on relevant topics.

Seminar (two hours), and placement hours; one term

Prerequisite(s): Registration in Level III or IV of a program in English and Cultural Studies

Departmental permission required.

ENGLISH 3SS3 - TOPICS IN MEDIEVAL LITERATURE AND CULTURE

A foundational study of literary and cultural production in medieval England, through an important theme, cultural movement, era, or genre. Topics might include self and community, religion and race, the natural and supernatural, body and soul, honour and revenge, or dream poems and visionary texts.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 3C06 A/B

ENGLISH 3TT3 - THE AGE OF ELIZABETH I

Galvanized by religious revolution, unprecedented geographic exploration, rapid urbanization, and rule by a female monarch, English literature and culture during the reign of Elizabeth I proved astonishingly vibrant. Focusing on selected topics and texts from the Elizabethan period, this course will explore how poets, playwrights, and other writers from this age debated new ideas about the self, the sacred, and the nation, as well as the role of gender, race, and class in relation to individual and group identity.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 3106 A/B, ENGLISH 3RL6 A/B, ENGLISH 3V06 A/B

ENGLISH 3UU3 - RENAISSANCE AND REVOLUTION: STUDIES IN 17TH-CENTURY LITERATURE

British literature and culture in this period of "Renaissance" and "Revolution" offers a rich and varied record of human imagination when confronted with enormous change in social and economic structures, literacy, science, and religion, not to mention the cataclysmic civil wars of the mid-century. In this course we'll study selected texts from the period to explore topics such as order and uncertainty; witchcraft, magic, and science; desire, devotion, and dissent; and the politics of race, gender, and early colonialism.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 3106 A/B, ENGLISH 3RL6 A/B, ENGLISH 3V06 A/B

ENGLISH 3V03 - GLOBAL ANGLOPHONE LITERATURE AND FILM

A study of literature, film and other forms of popular culture by artists from South Asia, Africa, and the Caribbean, and their overseas diasporas. Introduces students to theories of race, gender, sexuality, indigeneity, citizenship, and the nation as these take up histories of colonialism, imperialism, and globalization.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3R06 A/B, ENGLISH 3R06 A/B, PEACEST 3E06 A/B

ENGLISH 3VC3 - 'WE OTHER VICTORIANS': VICTORIAN LITERATURE AND CULTURE AND ITS AFTERLIVES

Drawing on a broad range of literary and cultural texts, this course explores the continuing legacy of Victorian Britain (1832-1901) in setting the agendas for Western modernity. Topics include the contested discourses on sexuality, poverty, evolution, technology, and imperialism.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 3M06 A/B

ENGLISH 3W03 - CONTEMPORARY NATIVE LITERATURE IN CANADA

A study of significant works by Native writers who give voice to their experience in Canada. Issues examined include appropriation of voice, native identity, women in indigenous societies and stereotyping.

Three hours (lectures and seminars); one term

Prerequisite(s): Six units of Level II Indigenous Studies or six units of Level II English and Cultural Studies or permission of the instructor

Antirequisite(s): CSCT 3W03

Cross-list(s): INDIGST 3D03, PEACEST 3W03

This course is administered by Indigenous Studies.

ENGLISH 3WE3 - BRITISH ROMANTIC LITERATURE AND CULTURE: REVOLUTION, WAR, EMPIRE

The course explores British Literature and culture between the advent of the French Revolution (1789) and the turbulent decade following the world-shaking violence of the Revolutionary and Napoleonic Wars (1792-1815).

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): ENGLISH 3M06 A/B

ENGLISH 3WP3 - THE WRITER'S PROCESS: SHORT STORIES FROM BEGINNING TO END

This class explores the elements of craft that shape a story, including character, story structure, and voice, and students will write pieces that will be workshopped in groups.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

ENGLISH 3X03 - CONTEMPORARY NATIVE LITERATURE IN THE UNITED STATES

A study of contemporary works by Native writers in the United States within the context of American society and Post-Modern and Post-Colonial Literary Theory.

Three hours (lectures and seminars); one term

Prerequisite(s): Six units of Level II Indigenous Studies or six units of Level II English and Cultural Studies or permission of the instructor

Antirequisite(s): CSCT 3X03

Cross-list(s): INDIGST 3E03, PEACEST 3X03

This course is administered by Indigenous Studies.

ENGLISH 3Y03 - CHILDREN'S LITERATURE

A critical evaluation of literary works from approximately 1700 to the present written primarily for children.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3Y03

ENGLISH 4AN3 - NINETEENTH-CENTURY ADAPTATIONS

This course inquires into the ideological, political, and aesthetic motivations that inform recent adaptations in fiction and film of the British nineteenth century.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4AN3

Departmental permission required.

ENGLISH 4AR3 - RHETORIC, CULTURE, CATASTROPHE: AIDS AND ITS REPRESENTATIONS

An examination of selected novels, films, autobiographical writings and theoretical texts about AIDS, with an emphasis on the cultural discourses surrounding the AIDS crisis.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4AR3

Departmental permission required.

ENGLISH 4AW3 - ASIAN AMERICAN WRITING

A study of selected texts by Americans and/or Canadians of Asian origin with a focus on race, ethnicity, gender, sexuality, class, immigration, multiculturalism, transnationalism and diaspora.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4AW3

Departmental permission required.

ENGLISH 4CB3 - READING THE BESTSELLER: CONTEMPORARY BRITISH FICTION

An exploration of possible critical vocabularies for the analysis of recent British fiction in light of how bestseller lists, prizes, publicity and media adaptability now shape the writing, marketing and reading of fiction.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4CB3

Departmental permission required.

ENGLISH 4CF3 - CONTEMPORARY FICTION

A study of recent English and American fiction, with emphasis on metafiction as well as the relationship between contemporary literary theory and fiction.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4CF3

Departmental permission required.

ENGLISH 4CS3 - CANADIAN SHORT STORIES

Canadian short stories from the early 20th century to the present, including French-Canadian (in translation) and aboriginal. Gender, race, class and power issues will be discussed.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4DD3 - CANADIAN DOCUMENTARY

This course will examine a broad range of documentary texts - literary, cinematic, photographic, theatrical - to see how the documentary mode is variously performed in Canada.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4DD3

Departmental permission required.

ENGLISH 4DL3 - DIGITAL LIVES

A critical investigation of the burgeoning domain of online life writing, concentrating on 2-4 selected "automedial" modes, such as digital photography, iPhoneographies, public social media accounts, online diaries, vlogs, blogs, podcasts, multi-platform projects, and/or hashtag campaigns. A main concern will be the possibilities and the limitations of online life writing modalities for "self-authoring" and social justice activism.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4E03 - LITERATURE, CULTURE AND THE ANTHROPOCENE

Drawing on environmental humanities, anti-colonial, feminist, and critical race theories, this seminar will consider the capacity of different creative genres (eg. fiction, poetry, film) to imagine forms of belonging in relation to the scales of place and space.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

First offered in 2019-2020.

ENGLISH 4FW3 - FORMS OF CREATIVE WRITING

This seminar will combine a hands-on study of form with an opportunity for students to exercise and focus their own creative energies. In any given year, the course will concentrate on either verse or fictional form.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4GN3 - GRAPHIC NARRATIVE IN CANADA

This seminar examines graphic narrative in Canada, focusing on: its divergent engagements with national narratives; Indigenous storytelling; national regimes of belonging/dispossession; and transnational relations.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4GN3

Departmental permission required.

ENGLISH 4HL3 - CANADIAN HOLOCAUST NOVELS

An examination of selected Canadian novels that respond to the Holocaust. Aesthetic and ethical issues involved in such responses will also be discussed.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4IP3 - LONGING AND BELONGING: NARRATIVES OF ISRAEL/PALESTINE

From pre-1948 narratives to contemporary Jewish and Arab fiction, poetry, memoir and film, this course critically examines representations of identity, longing, and belonging to the land of Israel and Palestine.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4KK3 - KAFKA AFTER KAFKA

This course examines the influence of Franz Kafka's fiction on writers, critics and film makers of the 20th century.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4KK3

Departmental permission required.

ENGLISH 4QA3 - QUEERNESS IN THE ARCHIVES: LESBIAN AND GAY WRITING, ART AND ACTIVISM IN CANADA, 1969-1989

This course examines lesbian and gay writing, art and activism in Canada during the period of 1969 to 1989. The course will include a trip to the Canadian Lesbian and Gay Archives in Toronto, and students will be trained in archival research methods.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4RD3 - RENAISSANCE DRAMA, EXCLUDING SHAKESPEARE

An intensive study of transgression (economic, erotic, social and literary) in popular and elite drama by Shakespeare's contemporaries, including women writers.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4RI3 - COLONIALISM AND RESISTANCE IN REPRESENTATIONS OF INDIGENOUS WOMANHOOD

This course looks to representations of Indigenous womanhood in a range of contemporary and historical cultural productions for insights into how colonialism shapes all of our lives, in radically different ways.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4RI3

Cross-list(s): INDIGST 4RI3

Departmental permission required.

ENGLISH 4RL3 - PLAYING, WINNING, LOSING: STRATEGIES OF POWER IN RENAISSANCE LITERATURE

In this seminar we will examine the many textual faces of power, its creative and destructive force, in a wide variety of early modern works, ranging from Machiavelli's famous discourse on political power, *The Prince*, to the challenge to male authority in Rachel Speght's *A Mouzell for Melastomus*, the deployment of colonial power in Walter Raleigh's *The Discovery of Guiana*, and the class satire of Francis Beaumont's *The Knight of the Burning Pestle*.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4RS3 - READING, SPIRITUALITY AND CULTURAL POLITICS

Through a course of readings from a variety of historical and contemporary sources this class will investigate the relations between spirituality, reading and living in the public, social world.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4RS3

Departmental permission required.

ENGLISH 4SD3 - SENTENCED TO DEATH

This is a course about the grammar, syntax, rhetoric, and expressive potential of language's most familiar unit of meaning, the sentence.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4SF3 - SCIENCE FICTION TOMORROW OR THE DAY AFTER

This seminar will examine science fiction based in the present or near future in the context of artificial intelligence theory, economic possibilities and biology.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4SF3

Departmental permission required.

ENGLISH 4ST3 - EVEN STRANGER THINGS: THE EARLY GOTHIC

One of the more paradoxical legacies of the British Enlightenment is the Gothic, with its attraction to the ghastly and the supernatural. This seminar will chart the emergence of Gothic writing in the eighteenth century, with particular attention to how this literature responds to the social ills and anxieties that attend the emergence of modern life.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4UT3 - UTOPIAN LITERATURE

A study of the genre through English literature, from its roots in Plato's Republic, through the Middle Ages and the Renaissance to contemporary literature.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4UT3

Departmental permission required.

ENGLISH 4VL3 - IMAGINING THE PAST: VIOLENCE, LITERATURE, AND THE ARCHIVE

This seminar explores theories of memory, history, and the archive through discussion of contemporary literary and cinematic works that treat personal and collective histories of violent.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of a Combined Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4VL3

Departmental permission required.

ENGLISH 4W13 - BOLLYWOOD AND BEYOND

An examination of Indian popular cinema or Bollywood focusing on specific topics, such as partition, nationalism, gender, religion, and diaspora.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4W13

Departmental permission required.

ENGLISH 4WL3 - GLOBALIZATION AND POSTCOLONIAL FICTION

This course examines fictional representations of the ideology and processes of globalization, while also considering how globalization shapes the production and consumption of postcolonial culture.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): CSCT 4WL3

Departmental permission required.

ENGLISH 4X03 - HONOURS ESSAY

Under the supervision of a member of the Department of English and Cultural Studies, students will write an essay in second term of Level IV. Interested students should contact the faculty member chairing the ENGLISH 4X03 committee early in the first term.

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Departmental permission required.

ENGLISH 4Y03 - EXPERIENTIAL PRACTICUM I

This practicum provides students with experience in experiential education under the mentorship of a faculty

member. Faculty members will advertise their available projects in the spring, or students may develop a proposal in consultation with a member of the department. Final proposals are due to the Department in May of the previous academic year.

Prerequisite(s): Registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): ENGLISH 4Y06 A/B

Departmental permission required.

ENGLISH 4Y06 A/B - RESEARCH PRACTICUM

This course provides students with direct experience of advanced research under the mentorship of a faculty member. Project descriptions will be posted and widely advertised in March of the previous academic year, and all level 3 Honours English and CSCT students are encouraged to apply to the Department.

Prerequisite(s): Registration in Level IV of a program in English and Cultural Studies

Antirequisite(s): CSCT 4Y06 A/B, ENGLISH 4Y03, 4YY3

Departmental permission required.

ENGLISH 4YY3 - EXPERIENTIAL PRACTICUM II

This practicum provides students with additional experience in experiential education under the mentorship of a faculty member. Faculty members will advertise their available projects in the spring, or students may develop a proposal in consultation with a member of the department. Final proposals are due to the Department in May of the previous academic year.

Prerequisite(s): ENGLISH 4Y03 and registration in Level IV of an Honours program in English and Cultural Studies

Antirequisite(s): ENGLISH 4Y06 A/B

Departmental permission required.

ENVIRONMENTAL SCIENCE

Courses in Environmental Sciences are administered by the School of Geography and Earth Sciences.

General Science Building, Room 206, ext. 24535

<http://www.science.mcmaster.ca/~geo/>

School Notes

1. Students aiming to fulfill the academic requirements for professional registration of Geoscientists in Ontario should seek academic advice from the School of Geography and Earth Sciences during March counselling in Level II to ensure that their program and course choices are appropriate.
2. Students are advised that not all courses will be offered in every year.

Courses

If no prerequisite is listed, the course is open.

See also courses in *Geography and Earth Sciences*.

ENVIRSC 1C03 - CLIMATE, WATER AND ENVIRONMENT

An introduction to the science of environmental issues and sustainability through the study of the soil, climate and water processes.

Lectures, web modules (three hours), one lab (two hours); one term

Co-requisite(s): WHMIS 1A00, if not already completed, must be completed prior to the first lab.

Antirequisite(s): ENVIRSC 1A03, 1B03

ENVIRSC 2B03 - SOILS AND THE ENVIRONMENT

An introduction to the physical, chemical and biological properties of soil. Application to environmental and land-use impacts.

Two lectures, one lab (three hours); one term

Prerequisite(s): One of EARTHSC 1G03, ENVIRSC 1A03, 1B03, 1C03, 1G03, ISCI 1A24 A/B

Antirequisite(s): EARTHSC 2B03

ENVIRSC 2C03 - SURFACE CLIMATE PROCESSES AND ENVIRONMENTAL INTERACTIONS

The surface heat and water balance of natural and human-modified landscapes. Emphasis on interactions of people and the biosphere with climate.

Two lectures, one lab (two hours); one term

Prerequisite(s): One of EARTHSC 1G03, ENVIRSC 1A03, 1B03, 1C03, 1G03, ISCI 1A24 A/B

Antirequisite(s): EARTHSC 2C03

ENVIRSC 2Q03 - INTRODUCTION TO ENVIRONMENTAL GEOCHEMISTRY

Introductory study of the interactions of geochemistry (water-rock interaction) and biology in determining pH, oxygen status and ionic strength in water, and their implications will be explored through lecture and laboratory work.

Two lectures, one lab (three hours); one term

Prerequisite(s): ISCI 1A24; or CHEM 1A03 and one of EARTHSC 1G03, ENVIRSC 1C03, ENVIRSC 1G03 (or ENVIRSC 1A03 or 1B03); or registration in Level II or above of a program in the Faculty of Engineering. ENVIRSC 1C03 is recommended.

Antirequisite(s): EARTHSC 2L03, 2Q03, ENVIRSC 2L03

ENVIRSC 2W03 - PHYSICAL HYDROLOGY

Hydrological processes including precipitation, snowmelt, hillslope runoff, stream-flow and hydrological data analysis.

Two lectures, one lab (two hours); one term

Prerequisite(s): One of EARTHSC 1G03, ENVIRSC 1A03, 1B03, 1C03, 1G03 or ISCI 1A24 A/B. ENVIRSC 1A03, 1C03 or ISCI 1A24 A/B is strongly recommended.

Antirequisite(s): EARTHSC 2W03

ENVIRSC 2WW3 - WATER AND THE ENVIRONMENT

Selected environmental issues related to water, including floods and droughts, irrigation, effects of water management projects and pollution. Examples from Canada and the world.

Lectures, web modules (three hours); one term

Prerequisite(s): Registration in Level II or above. One of BIOLOGY 1M03, EARTHSC 1G03, ENVIRSC 1A03, 1B03, 1C03, 1G03, ISCI 1A24 A/B is strongly recommended.

Antirequisite(s): EARTHSC 2WW3

ENVIRSC 3B03 - ECOSYSTEMS AND GLOBAL CHANGE

An examination of how soil, water, vegetation, ecosystem and climate processes occur and interact at landscape, regional and global scales, and of the consequences of climate change on terrestrial ecosystem form and function. Feedbacks between ecological systems and climate change will be examined with an emphasis on carbon cycling.

One lecture (two hours), one lab (two hours); one term

Prerequisite(s): One of EARTHSC 2B03, 2C03, ENVIRSC 2B03, 2C03

Antirequisite(s): EARTHSC 3B03

ENVIRSC 3IN3 - INTERNSHIP IN EARTH AND ENVIRONMENTAL SCIENCES

The integration of academic learning with an employment or a volunteer experience, providing students the opportunity to explore careers and develop linkages between classroom knowledge and professional practice. Students are responsible to arrange a suitable internship and agreement of the supervisor.

Normally, students complete 130 hours of academic work through the duration of the employment or volunteer experience.

One meeting (one hour); one term

Prerequisite(s): SCIENCE 2C00; and registration in Level III or above of an Honours B.Sc. program in the School of Geography and Earth Sciences (Faculty of Science); and permission of the internship coordinator

Antirequisite(s): EARTHSC 3IN3

Note: Students participating in this course must be authorized to work in Canada (International students must provide proof of work authorization permit). Students intending to enrol in this course should submit an application to the internship coordinator two months prior to registration. Application forms are available on the School of Geography and Earth Sciences (Faculty of Science) website.

ENVIRSC 3ME3 - ENVIRONMENTAL FIELD CAMP

Within the context of a field project, this course introduces students to field techniques in environmental science and to the potential effects of environmental issues on human health and well-being.

The field camp component occurs outside of the regular academic term, usually two weeks preceding the start of term in September. Details and applications are available in March through the School of Geography and Earth Sciences. Students enrolling in this course must pay both the incidental fees as prescribed by the School of Geography and Earth Sciences and the regular tuition fees. Students intending to enrol in this course must submit an application by April 1 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences main office after March 1. Students will be informed of acceptance of their application by April 15 subject to fulfillment of the requirements.

One term

Prerequisite(s): One of EARTHSC 2B03, EARTHSC 2E03, EARTHSC 2E13, 2G03, 2I03, EARTHSC 2Q03, ENVIRSC 2B03, ENVIRSC 2E03, 2G03, 2I03, ENVIRSC 2Q03, GEOG 2E13, ISCI 2A18 A/B; and registration in Level III or above of Honours Biology and Environmental Sciences, Honours Geography and Environmental Sciences, Honours Environmental Sciences, Honours Geography and Environmental Studies; and permission of the instructor. One of EARTHSC 2Q03, ENVIRSC 2Q03 is recommended.

Antirequisite(s): GEOG 3ME3

Co-requisite(s): WHMIS 1A00 if not already completed. Must be completed prior to the first lab.

ENVIRSC 3003 - CONTAMINANT FATE AND TRANSPORT

Focuses on the primary mechanisms controlling the distribution, transport and fate of contaminants, particularly organic contaminants, throughout the environment with an emphasis aquatic pollution and atmosphere-aquatic interactions. Topics include partitioning processes (dissolution, volatilization, sorption), degradation and contaminant remediation processes (abiotic, biotic) and analytical techniques used to measure concentrations in environmental samples.

Two lectures, one lab (three hours); one term

Prerequisite(s): One of CHEM 20A3, 2PD3, CHEMBIO 20A3, 2P03, EARTHSC 2L03, 2Q03, ENVIRSC 2L03, 2Q03, ISCI 2A18 A/B, or registration in an Honours Biology or Honours Chemistry program, or a program in the Faculty of Engineering

Antirequisite(s): EARTHSC 3003

ENVIRSC 3U03 - ENVIRONMENTAL SYSTEMS MODELLING

Use of simple numerical models applied to solving environmental problems related to anthropogenic perturbations. Introduction to STELLA numerical simulator, statement of the problem and 'what if' scenarios.

One lecture (three hours); one term

Prerequisite(s): One of ISCI 1A24 A/B, MATH 1A03, 1LS3; and registration in Level II or above of an Environmental and Earth Sciences program, Level III or above of an Honours program in the Faculty of Science or Level III or above of an Engineering program

Antirequisite(s): CIVENG 2J04, EARTHSC 3U03

ENVIRSC 4BB3 - FIELD TECHNIQUES IN HYDROLOGY

A primarily field-based course that examines the field methods, techniques and equipment used to study watershed hydrology and ecohydrological function in natural, human-impacted and restored ecosystems.

One lecture (two hours), one lab (four hours); one term

Prerequisite(s): One of EARTHSC 3B03, 3W03, ENVIRSC 3B03, 3W03 with a minimum grade of C+. Completion of ENVIRSC 3ME3 is strongly recommended.

Antirequisite(s): EARTHSC 4BB3

ENVIRSC 4C03 - ADVANCED PHYSICAL CLIMATOLOGY

This course develops energy and mass exchange processes in the near surface layer, the lower atmosphere and at the earth-atmosphere interface. Sensitivities of these processes to environmental change and feedback mechanisms are examined. Seminars and individual presentations are emphasized.

One lecture (two hours), one lab (two hours); one term

Prerequisite(s): One of EARTHSC 2B03, 2C03, 2W03, ENVIRSC 2B03, 2C03, 2W03

Antirequisite(s): EARTHSC 4C03

ENVIRSC 4EA3 - ENVIRONMENTAL ASSESSMENT

Technical and policy issues involved in the production and the appraisal of environmental impact assessments.

Two lectures, one lab (two hours); one term

Prerequisite(s): One of EARTHSC 2E13, ENVIRSC 2E13, GEOG 2E13; or registration in Honours Biology, a Civil Engineering program, an Engineering and Society program, an Honours Integrated Science program or an Honours program in the School of Geography and Earth Sciences

Antirequisite(s): EARTHSC 4EA3

Cross-list(s): GEOG 4EA3

ENVIRSC 4IN3 - THESIS INTERNSHIP

The integration of academic learning allowing the student to explore careers and the development of linkages between classroom knowledge and profes-

sional practice. Students are responsible to arrange a suitable internship and agreement of the supervisor.

This course is evaluated on a Pass/Fail basis.

Normally, students complete 130 hours of academic work through the duration of the employment or volunteer experience.

One meeting (one hour); one term

Prerequisite(s): SCIENCE 2C00; and registration in Level III or above of an Honours B.Sc. program in the School of Geography and Earth Sciences (Faculty of Science); and permission of the internship coordinator

Antirequisite(s): EARTHSC 4IN3

Students participating in this course must be authorized to work in Canada (International students must provide proof of work authorization permit). Students intending to enrol in this course should submit an application to the internship coordinator by March 1 of the academic year prior to registration. Application forms are available on the School of Geography and Earth Sciences website.

ENVIRSC 4MI3 - INDEPENDENT STUDY IN EARTH AND ENVIRONMENTAL SCIENCES

An independent study under the supervision of a faculty member. Students will typically complete a major review paper or research paper on a topic of their choice, in the field of Earth and Environmental Sciences.

One meeting (one hour); one term

Prerequisite(s): Registration in Level IV of an Honours program in the School of Geography and Earth Sciences (Faculty of Science); and permission of the supervising faculty member

Antirequisite(s): EARTHSC 4MI3

Not open to students with credit or registration in ISCI 4A12 A/B

ENVIRSC 4MT6 A/B - SENIOR THESIS

Students will select research topics and prepare a thesis either individually or in teams.

Students intending to enrol in this course must submit an application to the course coordinator by April 1 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences (Faculty of Science) main office after March 1. Students will be informed of acceptance of their application on April 15 subject to fulfillment of the GPA requirement.

Two terms

Prerequisite(s): One of EARTHSC 3RD3, GEOG 3MA3; and registration in Level IV of an Honours program in the School of Geography and Earth Sciences (Faculty of Science); and a GPA of at least 7.5; and permission of the course coordinator

Cross-list(s): EARTHSC 4MT6 A/B, GEOG 4MT6 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

ENVIRSC 4N03 - GLOBAL BIOGEOCHEMICAL CYCLES

This course focusses on global cycles of elements and energy, the role of biological processes in these cycles, and the concurrent influence of these cycles on biology and its environment. Topics will include the use of isotopic analysis to understand modern and past cycles, the interaction between global and local processes, and natural and anthropogenic effects on biogeochemical cycles.

Two lectures, one lab (three hours); one term

Prerequisite(s): One of BIOLOGY 2F03, CHEM 2PD3, CHEMBIO 2P03, EARTHSC 2L03, 2Q03, ENVIRSC 2L03, 2Q03, ISCI 2A18 A/B. One of EARTHSC 3CC3, 3L03, 3O03, ENVIRSC 3CC3, 3L03, 3O03 is strongly recommended.

Antirequisite(s): EARTHSC 4N03, 4O03, ENVIRSC 4O03

ENVIRSC 4W03 - HYDROLOGIC MODELLING

Principles of numerical modelling and examination of selected hydrologic models including deterministic, conceptual and statistical models.

One lecture (two hours), one lab (two hours); one term

Prerequisite(s): One of EARTHSC 2W03, EARTHSC 3W03, ENVIRSC 2W03, 3W03; and one of EARTHSC 3MB3, GEOG 3MB3, ENVIRSC 3MB3, STATS 2B03, 3J04

Antirequisite(s): EARTHSC 4W03

EXPLORE (INTERDISCIPLINARY EXPERIENCES)

EXPLORE (Interdisciplinary Experiences) courses are administered by the School of Interdisciplinary Science (SIS).

General Sciences Building, Room 105, ext. 21181

<https://science.mcmaster.ca/sis/>

EXPLORE 3IE1 - INTERDISCIPLINARY EXPERIENCES

Interdisciplinary experiential learning opportunities selected from an assortment of modules. Content and schedules vary annually. Details may be found on the School of Interdisciplinary Science website (<https://www.science.mcmaster.ca/sis/>) or by contacting the School of Interdisciplinary Science (SIS).

One term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Humanities, Science, Social Science, or an Arts & Science program; and permission of the instructor

Antirequisite(s): ISCI 3IE1, ARTSSCI 3IE1

This course is evaluated on a Pass/Fail basis.

EXPLORE 3IE1 may be repeated, if on a different topic.

Some modules may require a fee to cover costs of travel and accommodation.

This course is administered by the School of Interdisciplinary Science.

EXPLORE 3IE2 - INTERDISCIPLINARY EXPERIENCES

Interdisciplinary experiential learning opportunities selected from an assortment of modules. Content and schedules vary annually. Details may be found on the School of Interdisciplinary Science website (<https://www.science.mcmaster.ca/sis/>) or by contacting the School of Interdisciplinary Science.

One term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Humanities, Science, Social Science, or an Arts & Science program; and permission of the instructor

Antirequisite(s): ISCI 3IE2, ARTSSCI 3IE2

This course is evaluated on a Pass/Fail basis.

EXPLORE 3IE2 may be repeated, if on a different topic.

Some modules may require a fee to cover costs of travel and accommodation.

This course is administered by the School of Interdisciplinary Science.

EXPLORE 3IE3 - INTERDISCIPLINARY EXPERIENCES

Interdisciplinary experiential learning opportunities selected from an assortment of modules. Content and schedules vary annually. Details may be found on the School of Interdisciplinary Science (SIS) website (<https://www.science.mcmaster.ca/sis/>) or by contacting the School of Interdisciplinary Science.

One term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Science, Humanities, Social Science, or an Arts & Science program; and permission of the instructor

Antirequisite(s): ISCI 3IE3, ARTSSCI 3IE3

EXPLORE 3IE3 may be repeated, if on a different topic.

This course is evaluated on a Pass/Fail basis.

Some modules may require a fee to cover costs of travel and accommodation.

This course is administered by the School of Interdisciplinary Science.

EXPLORE 3IS0 - INTERDISCIPLINARY SCIENCE FIELD WORK

Administrative requirement for field work corresponding with EXPLORE 3IS3.

Prerequisite(s): Registration in Level II or above of an Honours Program in the Faculty of Science or Arts & Science program; and permission of the instructor
Antirequisite(s): ISCI 3IS0, SCIENCE 3IS0

This course is evaluated on a Complete/Not Complete basis.

Students must register in EXPLORE 3IS3 in the same or subsequent session as EXPLORE 3IS0.

EXPLORE 3IS0 may be repeated, if on a different topic.

This course is administered by the School of Interdisciplinary Science.

EXPLORE 3IS3 - INTERDISCIPLINARY SCIENCE FIELD CAMP

An interdisciplinary field camp experience to introduce students to field investigations, equipment and methodologies used by a range of professionals including ecologists, earth and environmental scientists. Most of this course occurs outside the regular academic term, usually within the two weeks following the end of term in April or within the two weeks preceding the start of term in September; details and applications are available on the School of Interdisciplinary Science website. Students enrolling in this course must pay both the incidental fees as prescribed by the School of Interdisciplinary Science and the regular tuition fees. Students intending to enrol in this course must submit an application by November 15 of the academic year prior to registration. Application forms are available on the School of Interdisciplinary Sciences website.

Prerequisite(s): Registration in Level II or above of an Honours Program in the Faculty of Science or Arts & Science program; and permission of the instructor

Co-requisite(s): Credit or registration in EXPLORE 3IS0

Antirequisite(s): ISCI 3IS3, SCIENCE 3IS3

EXPLORE 3IS3 may be repeated, if on a different topic.

Enrolment is limited.

This course is administered by the School of Interdisciplinary Science.

FRENCH

Courses in French are administered by the Department of French.

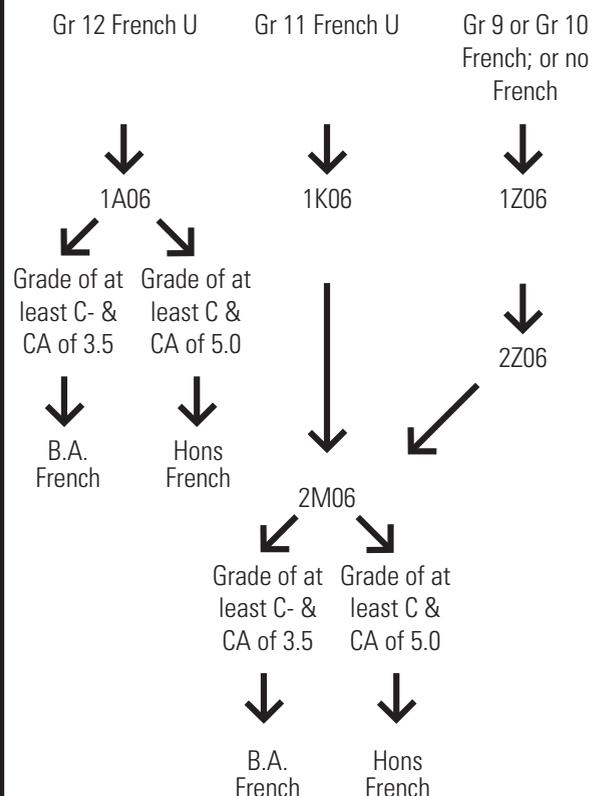

Togo Salmon Hall, Room 532, ext. 24470

<http://french.humanities.mcmaster.ca/>

Department Notes

- Students who have taken Grade 12 French U or the equivalent within the last three years must register in FRENCH 1A06 A/B. Those who took Grade 12 French U or the equivalent more than 3 years ago should speak to a departmental counsellor if they feel their French skills may be below the level required for entry into FRENCH 1A06 A/B.
- FRENCH 2Z06 A/B is intended for students who have completed Grade 11 French U. By taking this course, students may enter FRENCH 2M06 A/B which is the prerequisite for upper-level French courses. A placement test online may assist students who feel their level of proficiency in French is at a higher level than assigned.

ENTRY INTO LEVEL I COURSES AND FRENCH PROGRAMS

Courses

If no prerequisite is listed, the course is open.

FRENCH 1A06 A/B - INTRODUCTION TO FRENCH STUDIES: ADVANCED LEVEL

Equivalent to FRENCH 2M06. Review of grammar, oral and written practice, and introduction to literary analysis.

Four hours (including one oral French tutorial); two terms

Prerequisite(s): Grade 12 French U (core, immersion or français). (See *Note 1* above.) The Department reserves the right to place students in the course most appropriate to their abilities. Immersion students should register in this course.

Antirequisite(s): FRENCH 1K06 A/B, 1Z06 A/B, 2M06 A/B

FRENCH 1Z06 A/B - BEGINNER'S INTENSIVE FRENCH I

An intensive course for developing basic skills in both written and spoken French. The normal sequel to this course is FRENCH 2Z06 A/B.

Three hours; two terms

Prerequisite(s): This course is designed for students with no background in French or with Grade 9 or 10 French.

Antirequisite(s): Grade 11 or 12 French U, FRENCH 1A06 A/B, FRENCH 1K06 A/B. *Not open to Immersion students or Francophones.*

FRENCH 2AC3 - INTRODUCTION TO FRANCOPHONE LITERATURES AND CULTURES

An overview of the francophone literatures and cultures outside of Europe and Canada (Africa, Caribbean and Asia) in both their specificity and their interconnectedness.

Three hours; one term

Prerequisite(s): One of FRENCH 1A06 A/B or FRENCH 2M06 A/B

FRENCH 2B03 - FRENCH LANGUAGE PRACTICE I

A course designed to improve competence in oral and written expression. Written proficiency includes the study of vocabulary, grammar and composition. The oral component will stress listening, comprehension and conversational proficiency. Four hours (including one hour of French conversation); one term

Prerequisite(s): One of FRENCH 1A06 A/B or 2M06 A/B

Antirequisite(s): FRENCH 4R06

FRENCH 2BB3 - FRENCH LANGUAGE PRACTICE II

Continuation of FRENCH 2B03.

Four hours (including one hour of French conversation); one term.

Prerequisite(s): FRENCH 2B03

Antirequisite(s): FRENCH 4R06

FRENCH 2CC3 - WOMEN'S WRITING

Examination of key themes of French and francophone women's writing.

Three hours; one term

Prerequisite(s): One of FRENCH 1A06 A/B or 2M06 A/B

FRENCH 2E03 - SURVEY OF QUEBEC LITERATURE AND CULTURE

Selected novels, plays and poems representative of the main currents of Quebec literature and culture.

Three hours; one term

Prerequisite(s): One of FRENCH 1A06 A/B or 2M06 A/B

FRENCH 2F03 - SURVEY OF FRENCH AND FRANCOPHONE LITERATURE

Examination of a representative sampling of texts from various periods and genres.

Three hours; one term

Prerequisite(s): One of FRENCH 1A06 A/B or 2M06 A/B

FRENCH 2G03 - FRENCH LANGUAGE PRACTICE: ELEMENTARY TRANSLATION

An introduction to translation and comparative stylistics. The translation of texts from French to English will also serve as an exercise in applied grammar.

Three hours; one term

Prerequisite(s): FRENCH 2B03

FRENCH 2I03 - PROFESSIONAL FRENCH I

An introduction to Professional French through study of terminology from several fields, placed in context. Will focus on case studies and current media. May include medical, legal or journalistic French, among other areas.

Three hours; one term

Prerequisite(s): One of FRENCH 1A06 A/B or FRENCH 2M06 A/B or permission of the Department

FRENCH 2JJ3 - NINETEENTH-CENTURY FRENCH LITERATURE II

Aspects of the development of 19th-century French literature.

Three hours; one term

Prerequisite(s): One of FRENCH 1A06 A/B or FRENCH 2M06 A/B

FRENCH 2L03 - INTRODUCTION TO LITERARY ANALYSIS

Introduction to various techniques and approaches in literary analysis, with practical application to Francophone texts from different eras and literary genres.

Three hours; one term

Prerequisite(s): FRENCH 1A06 A/B or 2M06 A/B

FRENCH 2M06 A/B - INTRODUCTION TO FRENCH STUDIES: ADVANCED LEVEL

Equivalent to FRENCH 1A06 A/B. Review of grammar, oral and written practice and introduction to literary analysis.

Four hours (including one oral French tutorial); two terms

Prerequisite(s): One of FRENCH 1K06 A/B or 2Z06 A/B

Antirequisite(s): FRENCH 1A06 A/B

Not open to students with credit or registration in FRENCH 2B03.

FRENCH 2Z06 A/B - BEGINNER'S INTENSIVE FRENCH II

A sequel to FRENCH 1Z06 A/B. Review of grammatical structures. Expansion of vocabulary. Conversation practice. Study of texts with class discussions. The normal sequel to this course is FRENCH 2M06 A/B. This course cannot be applied toward a Minor in French.

Five hours (two hours lectures, three hours independent personal computer lab assignments); two terms

Prerequisite(s): FRENCH 1Z06 A/B or Grade 11 French

Antirequisite(s): FRENCH 1K06 A/B

Not open to students with credit or registration in FRENCH 1A06 A/B, 1B06, 2B03, 2M06 A/B.

FRENCH 3AA3 - THE MODERN FRENCH-CANADIAN NOVEL

A study of representative novels by contemporary authors with emphasis on the relationship between representation and meaning. A discussion of how the novel breaks away from the past, to focus on a present and future of self-affirmation open to individual freedom, diversity and difference.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 3AC3 - FRANCOPHONE WRITERS

A choice of important figures of the Francophone world outside of Europe and Canada. The course examines questions raised by Francophone writers. It will emphasize the application of conceptual methodologies drawn from textual and discourse analysis, cultural and postcolonial studies.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 3C03 - FRENCH LANGUAGE PRACTICE: WRITTEN

Advanced grammar and composition; introduction to stylistics.

Four hours (including one hour of French conversation); one term

Prerequisite(s): FRENCH 2BB3

Antirequisite(s): FRENCH 4R06

FRENCH 3CC3 - FRENCH LANGUAGE PRACTICE: INTERMEDIATE TRANSLATION FROM ENGLISH INTO FRENCH

A follow-up to elementary translation and comparative stylistics. The emphasis will be on the translation into French of complex sentence structures, as well as texts of general interest.

Three hours; one term

Prerequisite(s): FRENCH 2G03

FRENCH 3EE3 - RECENT FRENCH LITERATURE

Major trends and texts of French literature from the 1970s to the present.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 3FF3 - FRANCOPHONE CINEMAS

In this course students will view and analyze Francophone films from around the world. Connections will also be drawn with corresponding literary works.

Two hours (plus one film screening every other week); one term

Prerequisite(s): FRENCH 2BB3

FRENCH 3GG3 - FRENCH LANGUAGE PRACTICE: TRANSLATION FROM FRENCH TO ENGLISH

The emphasis will be on inferring strategies and stylistic comparisons between the two languages. Translation materials will be drawn from both literary and journalistic sources.

Three hours; one term

Prerequisite(s): FRENCH 2G03

FRENCH 3HH3 - FRANCOPHONE VOICES IN CANADA

A survey of Francophone Canadian literature produced outside of Quebec (most notably in Ontario and the Maritimes) as well as North American Indigenous literature written in French.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 3II3 - PROFESSIONAL FRENCH II

Follow-up to FRENCH 2I03. Will include study of terminology from different fields, placed in context.

Three hours; one term

Prerequisite(s): FRENCH 2I03

FRENCH 3KK3 - REVOLUTIONARY LITERATURE BEFORE THE REVOLUTION: VOLTAIRE, ROUSSEAU AND BEAUMARCHAIS

Texts representing the main aspects of Enlightenment thought and literature from *Candide* to the Revolution.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 3LT3 - INTRODUCTION TO MODERN LITERARY THEORY

Builds on literary analysis skills acquired in FRENCH 2L03.

Three hours; one term.

Prerequisite(s): FRENCH 2L03 or permission of the instructor

FRENCH 3P03 - HISTORY AND PHILOSOPHY OF EDUCATION

An overview of education from ancient Greece to the present: philosophical grounds, institutions, knowledge dissemination methods, and role of language teaching.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and FRENCH 2Z06 A/B

FRENCH 3Q03 - SEVENTEENTH-CENTURY FRENCH LITERATURE

A consideration of selected themes as they appear in the works of major French writers of the 17th century.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

Antirequisite(s): FRENCH 3Q03

FRENCH 3SS3 - MEDIEVAL CIVILIZATION AND THE IMAGINAIRE

An exploration of Medieval texts representative of the civilization of the period (chivalry, courtly love, feasts and rituals), and of its *imaginaire* (fairies, monsters, witches and the devil).

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 3V03 - IMAGE AND KNOWLEDGE DISSEMINATION

A study of communicating knowledge through images in French culture, from the Middle Ages to the present.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B or 2Z06 A/B

FRENCH 3W03 - TWENTIETH-CENTURY FRENCH LITERATURE

Key movements and texts of 20th century literature, to the 1960s.

Three hours; one term

Prerequisite(s): Six units of French above Level I, excluding FRENCH 2M06 A/B and FRENCH 2Z06 A/B

FRENCH 4A03 - FRENCH LANGUAGE PRACTICE

Advanced stylistics and composition.

Four hours (including one hour of French conversation); one term

Prerequisite(s): FRENCH 3C03 and registration in an Honours program in French

FRENCH 4CC3 - THEORETICAL REFLECTIONS ON INTERDISCIPLINARITY

This course explores the formation of academic disciplines and the emergence of interdisciplinary thought in Western science and humanities. Aspects of theoretical reflection on interdisciplinarity by post-structuralist thinkers will also be discussed.

Two hours; one term

Prerequisite(s): 12 units of French beyond Level I, excluding FRENCH 2M06 A/B and FRENCH 2Z06 A/B

FRENCH 4DD3 - ANIMALS IN FRENCH AND FRANCOPHONE LITERATURES

Thematic study of the various roles animals play in French and francophone texts. Seminar (two hours); one term

Prerequisite(s): 12 units of French above Level I, excluding FRENCH 2M06 A/B or 2Z06 A/B

FRENCH 4F03 - SEXUAL GAMES: THE ART OF SEDUCTION DURING THE ANCIEN REGIME

A study of seduction as both theme and rhetorical device in major works of the *Ancien Regime* (e.g. Diderot, Marivaux, Abbé Prévost, Isabelle de Charrière, Rousseau.)

Seminar (two hours); one term

Prerequisite(s): 12 units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 4I03 - FRENCH POETRY FROM THE RENAISSANCE TO THE PRESENT

An introduction to major thematic, historical and linguistic concerns of French poetry from the Renaissance to the present (e.g. Poets and Humour, Love Poetry, Women Poets, Poètes maudits.)

Seminar (two hours); one term

Prerequisite(s): 12 units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 4LL3 - TOPICS IN FRANCOPHONE LITERATURES

Topics may include: important issues in Francophone literatures outside of Europe and Canada, such as women and literature, margins in literature, representation of the self and the other; questions of genres in Francophone literatures; Francophone cinema; literature and history, culture, etc.

Seminar (two hours); one term

Prerequisite(s): 12 units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 4LL3 may be repeated, if on a different topic, to a total of six units.

FRENCH 4MM3 - SEX, VIOLENCE AND ELEGANCE: THE 18TH-CENTURY NOVEL

A study of the genesis and themes of representative 18th-century novels.

Seminar (two hours); one term

Prerequisite(s): 12 units of French above Level I, excluding FRENCH 2M06 A/B and FRENCH 2Z06 A/B

FRENCH 4P06 A/B - FRENCH AS A SECOND LANGUAGE: FROM THEORY TO PRACTICE

An experiential learning course for students who are interested in pursuing a teaching career. It will combine observation, reflection, theory and practical experimentation on teaching French as a second language, with placements organized through the Hamilton-Wentworth School Boards.

Approximately 60 hours on site at a school and 50 hours of presentation-based seminars; two terms

Prerequisite(s): Registration in Level III or above of a French program

Students intending to enroll in this limited enrolment course must submit an application to the Department of French by April of the preceding year. Application forms are available from the departmental office.

FRENCH 4R06 - FRENCH READING COURSE (TAUGHT IN ENGLISH)

Students intending to enter graduate programs will be provided with reading skills and techniques which will enable them to comprehend academic texts. Reading materials are selected to practice textual analysis, study grammatical usage and aid in vocabulary development. Credit obtained in this course may be accepted in fulfillment of the second language reading requirement for graduate programs.

Five hours, three days per week; one term. Offered during the first session of the Spring/Summer term only.

Prerequisite(s): FRENCH 1Z06 A/B and registration in any Level IV Honours Program or permission of the French Department

Antirequisite(s): FRENCH 2B03, FRENCH 2BB3, FRENCH 3C03, FRENCH 4A03
Not open to students registered in a program in French.

FRENCH 4T03 - INDEPENDENT STUDY

The student will prepare under the supervision of a faculty member a research paper involving independent research in an area of study in which the student has already demonstrated a high level of basic knowledge. It is the student's responsibility to complete a proposal and secure the agreement of an instructor prior to registration.

Prerequisite(s): Registration in Level IV of an Honours program in French and permission of the Department

FRENCH 4U03 - TOPICS IN LITERATURE AND CULTURE OF QUEBEC AND FRANCOPHONE CANADA

Topics may include: Paraliteratures: from nineteenth century tales and legends to contemporary science-fiction; Quebec women authors; Quebec cinema; the representation of France and America; the representation of otherness; Montreal in Quebec literature and culture.

Seminar (two hours); one term

Prerequisite(s): 12 units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 4U03 may be repeated, if on a different topic, to a total of six units.

FRENCH 4Y03 - TOPICS IN 20TH-CENTURY FRENCH LITERATURE

Previous topics include: Women's Writing, The Essay, Gay and Lesbian Novel in France. Consult the Department concerning topic to be offered.

Seminar (two hours); one term

Prerequisite(s): 12 units of French above Level I, excluding FRENCH 2M06 A/B and 2Z06 A/B

FRENCH 4Y03 may be repeated, if on a different topic, to a total of six units.

GENERAL TECHNOLOGY

Courses in General Technology are administered by the Bachelor of Technology Program.

Engineering Technology Building (ETB), Room 121, ext. 20195

<http://mybtechdegree.ca>

GENTECH 1CS3 - TECHNICAL COMMUNICATION: CONCEPTS AND PRACTICES

This course introduces students to the best practices for essential written, spoken, and graphic communications used in technology workplaces. Additional emphasis is focused on developing and applying interpersonal and group work skills.

Three lectures; first term

Prerequisite(s): Registration in Automation Engineering Technology, or Automotive and Vehicle Engineering Technology, or Biotechnology

GENTECH 1CZ3 - TECHNICAL COMMUNICATION: RESEARCH AND INFORMATION DESIGN

This course teaches students how to conduct research, analyze information, and design communication materials that are succinct and customized to the readers' needs. Students will acquire a practical set of communication tools that they can use throughout their education and professional careers.

Three lectures: second term

GENTECH 1CS3 and Automation Engineering Technology, or Automotive and Vehicle Engineering Technology, or Biotechnology

Antirequisite(s): GENTECH 1T13

GENTECH 2EE3 - ENGINEERING ECONOMICS

Costing methods of engineering designs and processes; minimum attractive rate of return, return sensitivities, time value of money, internal rates of return, pay-back period, amortization of equipment and capital cost allowance structures.

Three lectures; second term

Prerequisite(s): Registration in Level II of Automation Engineering Technology, Automotive and Vehicle Engineering Technology, or Biotechnology

Antirequisite(s): GENTECH 3EE3

GENTECH 2MP3 - MANAGEMENT PRINCIPLES

The course examines fundamental management principles of planning, organizing, leading, and controlling in technology organizations. Emphasis is placed on understanding and application of human resource management practices to engage people in attaining organizational goals.

Three lectures: second term

Prerequisite(s): GENTECH 2PW3 and registration in Level II Automation Engineering Technology, Automotive and Vehicle Engineering Technology Co-op (B.Tech.), or Biotechnology Co-op (B.Tech.)

Antirequisite(s): GENTECH 1HR3 , 10B3, 3MP3, 30B3 , 4T03

GENTECH 2PW3 - PROFESSIONAL WORKPLACE PRACTICES

The course focuses on key employability skills needed to participate and progress in today's dynamic technology organizations. Emphasis is placed on understanding the role and responsibilities of technology professionals such as; career management, professionalism and workplace intercultural competence.

Three lectures; first term

Prerequisite(s): GENTECH 1CS3 and registration in Level II of Automation Engineering Technology, Automotive and Vehicle Engineering Technology Co-op (B.Tech.), or Biotechnology Co-op (B.Tech.)

GENTECH 3DM3 - CREATIVITY, INNOVATION AND TECHNOLOGY

This course is a blend of hands-on and theoretical treatment on the subject of creating new technological product and service value in our society.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 1DM3

GENTECH 3EE3 - ENGINEERING ECONOMICS

Costing methods for engineering designs and processes; minimum attractive rate of return, return sensitivities, time value of money, internal rates of return, payback period, amortization of equipment and capital cost allowance structures. Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 1EE3, 2EE3

GENTECH 3EN3 - ENTREPRENEURIAL THINKING AND INNOVATION

This course introduces students to the interrelationship of entrepreneurial thinking and innovation at both the industry and firm level.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 2EN3, 2ET3, 3ET3, 4ET3

GENTECH 3ET3 - ENTREPRENEURIAL THINKING AND INNOVATION

This course introduces students to the interrelationship of entrepreneurial thinking and innovation at both the industry and firm level.

Three lectures; first term

Prerequisite(s): GENTECH 2MP3, 3FF3 and registration in Level II or above of Automation Engineering Technology, Automotive and Vehicle Engineering Technology, or Biotechnology

Antirequisite(s): GENTECH 2EN3, 2ET3, 3EN3, 4ET3

GENTECH 3FF3 - FINANCIAL SYSTEMS

The course focuses on departmental budget methodologies, understanding and interpretation of various financial statement components in terms of their relevance to managerial decision making.

Three lectures; first term

Prerequisite(s): Registration in Level II or above of Automation Engineering Technology, Automotive and Vehicle Engineering Technology, or Biotechnology

Antirequisite(s): GENTECH 1FS3, 1FT3, 3FS3

GENTECH 3FS3 - FINANCIAL SYSTEMS

The course focuses on departmental budget methodologies, understanding and interpretation of various financial statement components in terms of their relevance to managerial decision making.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 1FS3, 1FT3, 3FF3

GENTECH 3LS3 - QUALITY CONTROL AND ASSURANCE METHODS

Statistical tools, tests, design and analysis of planned experiments, Taguchi methods, control charts for variables and attributes, capability analysis, acceptance sampling, elements of reliability, quality assurance, and ISO 9000 certification.

Three lectures; first term.

Prerequisite(s): ENGTECH 2ES3 or 3ES3; and registration in Level II or above Automation Engineering Technology, Automotive and Vehicle Engineering Technology Co-op (B.Tech.), or Biotechnology Co-op (B.Tech.)

Antirequisite(s): GENTECH 3T03, 4SS3

GENTECH 3MP3 - MANAGEMENT PRINCIPLES

The course examines fundamental management principles of planning, organizing, leading and controlling in technology organizations. Emphasis is placed on understanding and application of human resource management practices to engage people in attaining organizational goals.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 2MP3, 3OB3

GENTECH 3MT3 - PROJECT MANAGEMENT

Introduction to best practice in the management of technical projects including the use of planning, software and the management of people.

Three lectures; first term

Prerequisite(s): GENTECH 2MP3 and registration in Level II or above of Automation Engineering Technology, Automotive and Vehicle Engineering Technology Co-op (B.Tech.), or Biotechnology Co-op (B.Tech.)

Antirequisite(s): GENTECH 3PM3, 4PM3

GENTECH 3TC3 - TECHNICAL COMMUNICATIONS

This course introduces students to the best practices for essential written, spoken, and graphic communications used in technology workplaces. Emphasis is placed on how to conduct research, analyze information, and design communication materials that are succinct and customized to the readers needs.

Three lectures; one term, may be offered online or in-person

Prerequisite(s): Registration in one of Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology.

GENTECH 4EM3 - LEGAL AND REGULATORY ISSUES

This course is an introduction to the legal, ethical, and regulatory frameworks that professional engineers and related professions must observe in the Province of Ontario.

Three lectures; one term, may be offered online or in-person

Prerequisite(s): Registration in one of Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

GENTECH 4FT3 - STRATEGIC MANAGEMENT

Formerly GENTECH 3FT3

This capstone course examines the 'total' view of the organization and how it relates and interacts with various factors in its environment to gain long-term sustainable advantage.

Three lectures; first term

Prerequisite(s): GENTECH 1FT3 or 3FF3, 3ET3 or 4ET3, ENGTECH 4EE0 and registration in Level III or above of Automation Engineering Technology, Automotive and Vehicle Engineering Technology Co-op (B.Tech.), or Biotechnology Co-op (B.Tech.)

Antirequisite(s): GENTECH 3FT3, 3SF3, 4SF3

GENTECH 4LM3 - LEAN THINKING AND PRACTICES

The course focuses on lean thinking and approaches to enable the deployment and adaption of tools aimed at minimizing waste, removing non-value added activities, and pursuing incremental improvements across organizations.

Three lectures; one term, may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 4LT3

GENTECH 4MB3 - FUNDAMENTALS OF MARKETING

This course introduces the 4Ps of marketing: product, price, promotion, and place with a Business-to-Business focus. Global and high technology markets and their unique challenges will be presented. Students will learn to make marketing decisions within a strategic framework.

Three lectures; one term

Prerequisite(s): Registration in Level IV or above of Automation Engineering Technology, Automotive and Vehicle Engineering Technology, or Biotechnology

Antirequisite(s): GENTECH 4MK3

GENTECH 4MK3 - FUNDAMENTALS OF MARKETING

This course introduces the 4Ps of marketing: product, price, promotion, and place with a Business-to-Business focus. Global and high technology markets and their unique challenges will be presented. Students will learn to make marketing decisions within a strategic framework.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 4MB3

GENTECH 4OM3 - OPERATIONS MANAGEMENT

Formerly GENTECH 4SC3

This course addresses the management of operations at the strategic, tactical and operations levels. Emphasizing decisions required to successfully design, create and deliver goods and services in a globalized marketplace.

Three lectures; second term

Prerequisite(s): GENTECH 3LS3 and registration in Level III or above of Automation Engineering Technology, Automotive and Vehicle Engineering Technology Co-op (B.Tech.), or Biotechnology Co-op (B.Tech.)

GENTECH 4PM3 - PROJECT MANAGEMENT

Introduction to best practice in the management of technical projects including the use of planning, software and the management of people.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 3MT3, 3PM3

GENTECH 4SE3 - TECHNOLOGY ETHICS AND SUSTAINABILITY

The course explores the social implications and environmental impacts of technologies and the ethical challenges they impose on technology professionals. Critical thinking skills and professional responsibility are examined using real-ethical dilemmas to help students develop a professional ethical identity that can be carried forward into their career.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): CIVTECH 4E13

GENTECH 4SF3 - STRATEGIC MANAGEMENT

This course examines the 'total' view of the organization and how it relates and interacts with various factors in its environment to game long-term sustainable advantage.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): GENTECH 3FS3 and registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

Antirequisite(s): GENTECH 3FT3, 3SF3, 4FT3

GENTECH 4ST3 - CONTEMPORARY ISSUES IN MANAGEMENT

Students are offered a selection of three to four emerging issues of the day as those issues relate to current and emerging technology and management technology practices. These topics could include supply chain management, ERP, knowledge management, 6 sigma methods, etc.

Three lectures; one term; may be offered online or in-person

Prerequisite(s): Registration in Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology or Software Engineering Technology

GENTECH 4TE3 - TECHNOLOGY ETHICS AND SUSTAINABILITY

The course explores the social implications and environmental impacts of technologies and the ethical challenges they impose on technology professionals. Critical thinking skills and professional responsibility are examined using real-ethical dilemmas to help students develop a professional ethical identity that can be carried forward into their career.

Three lectures; first term

Prerequisite(s): GENTECH 3TS3 or 4TS3, ENGTECH 4EE0, and registration in Level III or above of Automation Engineering Technology, Automotive and Vehicle Engineering Technology Co-op (B.Tech.), or Biotechnology Co-op (B.Tech.)

GENTECH 4TS3 - TECHNOLOGY AND SOCIETY

Formerly GENTECH 3TS3

A study of the diverse and often contradictory impact of technology on society. The consequences of current technological changes and those of the recent past are explored to illustrate the complexities of technological-societal interrelationships.

Three lectures; second term

Prerequisite(s): Registration in Level III or above of Automation Engineering Technology, Automotive and Vehicle Engineering Technology Co-op (B.Tech.), or Biotechnology Co-op (B.Tech.)

Antirequisite(s): GENTECH 2TC3, 3L03, 4TP3

GEOGRAPHY

Courses in Geography are administered by the Department of Geography and Earth Sciences.

General Science Building, Room 206, ext. 24535

<http://www.science.mcmaster.ca/~geo/>

School Notes

1. Students aiming to fulfill the academic requirements for professional registration of Geoscientists in Ontario should seek academic advice from the School of Geography and Earth Sciences during March counselling in Level II to ensure that their program and course choices are appropriate.
2. Students are advised that not all courses will be offered in every year.

Courses

If no prerequisite is listed, the course is open.

See also courses in *Earth Sciences* and *Environmental Science*.

GEOG 1HA3 - SOCIETY, CULTURE AND ENVIRONMENT

An introduction to human geography, and in particular social, cultural, and political geography, and environmental studies. Topics include: the spatial significance of culture and cultural difference; cities as forms of cultural settlements; the rise of urban societies; the meanings of cultural landscapes; geographical perspectives on global politics; humans' changing relationship with the environment; and contemporary environmental issues.

Two lectures, one tutorial (one hour); one term

GEOG 1HB3 - POPULATION, CITIES AND DEVELOPMENT

An introduction to human geography, and in particular urban and economic geography and population and development studies. Topics include: the meaning, and changing significance, of globalization; the causes and consequences of uneven economic and social development; the nature of changes in world population via demographic change and migration; the nature and consequences of global urbanization; and urban planning.

Two lectures, one tutorial (one hour); one term

GEOG 2E13 - ENVIRONMENTAL ISSUES

An introduction to issues, perspectives and models in environmental studies at local, regional, national and international scales.

Lectures, web modules (three hours), one tutorial (one hour); one term

Prerequisite(s): One of BIOLOGY 1M03, EARTHSC 1G03, ENVIRSC 1A03, 1B03, 1C03, 1G03, GEOG 1HA3, 1HB3, ISCI 1A24 A/B

Antirequisite(s): EARTHSC 2E13, ENVIRSC 2E13

GEOG 2EK3 - TRADITIONAL INDIGENOUS ECOLOGICAL KNOWLEDGE

This course is a study of the ecological teachings of Indigenous peoples and of their relationships with the natural environment in historical and contemporary times.

Three hours (lectures and seminars); one term

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03; or permission of the instructor

Cross-list(s): ANTHROP 2DA3, INDIGST 2D03

This course is administered by the Indigenous Studies Program.

GEOG 2GI3 - GEOGRAPHIC INFORMATION SYSTEMS

Introduction to the principles and techniques underlying the use of geographic information systems (GIS) for capturing and visualizing geographically referenced information. Databases, models and cartographic principles are also introduced emphasizing the production of effective thematic maps using GIS software.

Two lectures, one lab (two hours); one term

Prerequisite(s): One of BIOLOGY 1M03, EARTHSC 1G03, ENVIRSC 1A03, 1B03, 1C03, 1G03, GEOG 1HA3, 1HB3, ISCI 1A24 A/B

Antirequisite(s): ENVIRSC 2GI3, EARTHSC 2GI3

GEOG 2HI3 - GEOGRAPHIES OF HEALTH

Introduction to population geography and medical geography. Historical and contemporary trends and patterns of mortality and morbidity are examined using ideas from demography, medicine, ecology and cultural studies, with examples from different parts of the world.

Two lectures, one tutorial (one hour); one term

Prerequisite(s): One of GEOG 1HA3, 1HB3

Antirequisite(s): HEALTHST 2HI3

Cross-list(s): HLTHAGE 2HI3

GEOG 2LE3 - ECONOMIC GEOGRAPHY

An introduction to economic geography. Emphasis is placed on the changing locations and spatial patterns of economic activity, including: manufacturing and service production; trade, transportation, communications, and corporate organization; and regional economic development using national and international examples.

Two lectures; one term

Prerequisite(s): One of GEOG 1HA3, 1HB3

GEOG 2OC3 - REGIONAL GEOGRAPHY OF CANADA

An introduction to the human and physical geography of Canada from a regional perspective. Emphasis is placed on the similarities and differences among Canada's regions. Topics include historical and contemporary perspectives on economic, social, and cultural geographies as well as environmental issues.

On-line web modules, discussions and testing; one term

Prerequisite(s): Registration in Level II or above. Completion of GEOG 1HA3 or 1HB3 is recommended.

Antirequisite(s): GEOG 2RC3

GEOG 2RC3 - REGIONAL GEOGRAPHY OF CANADA

An introduction to the human and physical geography of Canada from a regional perspective. Emphasis is placed on the similarities and differences between Canada's regions. Topics include historical and contemporary perspectives on economic, social, and cultural geographies as well as environmental issues.

Three lectures; one term

Prerequisite(s): Registration in Level II or above. Completion of GEOG 1HA3 or 1HB3 is recommended.

Antirequisite(s): GEOG 2OC3

GEOG 2RU3 - REGIONAL GEOGRAPHY OF THE UNITED STATES

An introduction to the human and physical geography of the United States of America from a regional perspective. Emphasis is placed on the human and physical elements that make each region unique. Topics include economic, social, political and cultural geographies, as well as environmental issues and problems.

Three lectures; one term

Prerequisite(s): Registration in Level II or above. Completion of GEOG 1HA3 or 1HB3 is recommended.

GEOG 2RW3 - WORLD REGIONAL GEOGRAPHY

An introduction to regional geography and global issues. The study of the human and physical geographic patterns of the world. Emphasis is placed equally on what makes places and regions different or unique, and the key global issues that relate to one or more regions. Topics include urbanization, economic change, cultural difference, geopolitics, and environmental issues.

Three lectures; one term

Prerequisite(s): Registration in Level II or above. Completion of GEOG 1HA3 or 1HB3 is recommended.

GEOG 2TS3 - SOCIETY AND SPACE

An introduction to the key concepts and perspectives in social geography. Emphasis is placed on the importance of key binaries that structure the spatial organization of social life (e.g., urban/rural, public/private, and space/place.)

Three lectures; one term

Prerequisite(s): One of GEOG 1HA3, 1HB3; and registration in Level II or above

GEOG 2UI3 - CITIES IN A CHANGING WORLD

An introduction to key concepts and perspectives in the study of urbanization, urban systems and city life. Emphasis is placed on North American and European urban geographies.

Two lectures, one tutorial (one hour); one term

Prerequisite(s): One of GEOG 1HA3, 1HB3

GEOG 3EC3 - ENVIRONMENTAL CATASTROPHES

The geography of large-scale releases of environmental contaminants and their effects on human populations. Examples of such catastrophes include the BP oil

spill in the Gulf of Mexico and the Chernobyl nuclear catastrophe. Human and systemic errors will be explored historically, politically and economically.

Two lectures, one tutorial (one hour); one term

Prerequisite(s): One of EARTHSC 2E13 , ENVIRSC 2E13 , GEOG 2E13, LIFESCI 2H03

GEOG 3EE3 - ENERGY AND SOCIETY

An introduction to conventional and alternative sources of energy as they are used in Canadian and global contexts. The social, political and economic costs and benefits of different sources of energy will be highlighted.

Two lectures, one tutorial (one hour); one term

Prerequisite(s): One of EARTHSC 2E13 , ENVIRSC 2E13 , GEOG 2E13, ISCI 2A18 A/B

Antirequisite(s): ENVIRSC 3EE3

GEOG 3EG3 - GLOBAL CLIMATE CHANGE

This course provides students with an introduction to the domestic and international politics of climate change.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above

Cross-list(s): POLSCI 3GC3

Not open to students with credit in POLSCI 3B03 if the topic was Global Climate Change.

This course is administered by the Department of Political Science.

GEOG 3ER3 - SUSTAINABILITY AND THE ECONOMY

An introduction to the concept of the triple bottom line: economic, ecological and social costs and benefits. Examples are drawn from sectors such as climate change, fisheries, forestry and water.

Two lectures, one tutorial (one hour); one term

Prerequisite(s): One of EARTHSC 2E13, ENVIRSC 2E13, GEOG 2E13

GEOG 3GI3 - ADVANCED RASTER GIS

Advanced treatment of geographic information systems (GIS) focusing on raster data models and techniques. Real-world problem solving emphasizes site selection and environmental applications. Topics include multi-criteria evaluation, terrain mapping and analysis, 3D visualization, spatial interpolation and watershed analysis.

Two lectures, one lab (two hours); one term

Prerequisite(s): A minimum grade of C- in one of EARTHSC 2GI3, ENVIRSC 2GI3, GEOG 2GI3

Antirequisite(s): EARTHSC 3GI3, ENVIRSC 3GI3

GEOG 3GV3 - ADVANCED VECTOR GIS

Advanced treatment of GIS focusing on vector data models and techniques. Real-world problem solving emphasizes health, business, public sector and transportation applications. Topics include geodatabase design, geocoding, networks and network applications, location-allocation modeling and GIS tool development using ModelBuilder.

Two lectures, one lab (two hours); one term

Prerequisite(s): A minimum grade of C- in one of EARTHSC 2GI3, ENVIRSC 2GI3, GEOG 2GI3

Antirequisite(s): EARTHSC 3GV3, ENVIRSC 3GV3

GEOG 3HP3 - POPULATION GROWTH AND AGING

Differential growth of human populations and their changing age and sex structures with an emphasis on birth and death processes. The connections between population structures and processes and various aspects of environments and societies including aging, are emphasized.

Three lectures; one term

Prerequisite(s): One of GEOG 2HI3, HLTHAGE 2HI3, HEALTHST 2HI3

Cross-list(s): HLTHAGE 3HP3

GEOG 3LT3 - TRANSPORTATION GEOGRAPHY

Principles and techniques applied to understanding, predicting and optimizing movement for transportation systems at various geographical scales. Problems arising from movement are also discussed.

Two lectures, one tutorial (two hours); one term

Prerequisite(s): One of ECON 1B03, 1BB3, GEOG 1HA3, 1HB3; and registration in Level III or above

GEOG 3MA3 - RESEARCH METHODS IN HUMAN GEOGRAPHY

An introduction to research methods in human geography. Emphasis is placed on the application of various methods to understanding human spatial behaviour.

Two lectures, one tutorial (two hours); one term

Prerequisite(s): One of GEOG 1HA3, 1HB3; and registration in Level II or above of a program in the School of Geography and Earth Sciences (Faculty of Science)

Antirequisite(s): CMST 2B03, GEOG 2MA3, GERONTOL 2C03, HEALTHST 2B03, HLTHAGE 2A06, 3Z06, SOCIOL 2Z03

GEOG 3MB3 - DATA ANALYSIS

An introduction to the nature of geographic data and organization, descriptive spatial statistics and inferential statistics.

Two lectures, one lab (two hours); one term

Prerequisite(s): One of EARTHSC 1G03, ENVIRSC 1A03, 1B03, 1G03, GEOG 1HA3, 1HB3, ISCI 1A24 A/B

Antirequisite(s): EARTHSC 3MB3, ENVIRSC 3MB3

GEOG 3MF3 - HUMAN GEOGRAPHY FIELD CAMP

An introduction to field research in human geography.

Most of this course occurs outside the regular academic term, usually in one of the two weeks prior to the start of term in September. Details and applications are available in March.

Students enrolling in this course must pay both the incidental fees as prescribed by the School of Geography and Earth Sciences as well as the regular tuition fees. Students intending to enrol in this course must submit an application by April 1 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences main office after March 1. Students will be informed of acceptance of their application by April 15 subject to fulfillment of the requirements.

One term

Prerequisite(s): Registration in Level III or above of an Honours program in the School of Geography and Earth Sciences; and permission of the instructor

GEOG 3MI3 - GEOGRAPHY INTERNSHIP

The integration of academic learning with an employment experience, providing students the opportunity to explore careers and develop linkages between classroom knowledge and professional practice. Students are responsible to arrange a suitable internship and agreement of the supervisor.

This course is evaluated on a Pass/Fail basis.

Normally, students complete 130 hours of academic work through the duration of the employment or volunteer experience.

Prerequisite(s): SOCSCI 2E10; and registration in Level III or above of an Honours B.A. program in the School of Geography and Earth Sciences; and permission of the internship coordinator

Note: Students participating in this course must be authorized to work in Canada (International students must provide proof of work authorization permit). Students intending to enrol in this course should submit an application to the internship coordinator two months prior to registration. Application forms are available from the School of Geography and Earth Sciences main office.

GEOG 3RW3 - REGIONAL GEOGRAPHY OF A SELECTED WORLD REGION

The study of the human and physical geography of a selected region of the world. Topics typically include economic, social, cultural, demographic, and political geographies, as well as physical geographic and environmental issues.

Three lectures; one term

Prerequisite(s): One of GEOG 1HA3, 1HB3

GEOG 3RW3 may be repeated, if on a different topic, with permission of the School of Geography and Earth Sciences.

GEOG 3SR3 - REMOTE SENSING

Fundamentals of passive and active satellite systems, image processing and interpretation procedures. Applications include resource exploration, environmental management, health and population geography and urban and regional development.

Two lectures, one lab (two hours); one term

Prerequisite(s): A minimum grade of C- in one of EARTHSC 2GI3, ENVIRSC 2GI3, GEOG 2GI3

Antirequisite(s): EARTHSC 3SR3, ENVIRSC 3SR3

GEOG 3TG3 - GEOGRAPHIES OF GLOBALIZATION

An introduction to a geographical understanding of globalization. This understanding is illustrated through an examination of the social, cultural, political, and economic aspects of globalization. Case studies such as, food and agriculture, manufacturing and trade, cultural diversity and language, are used to illustrate the meaning and significance of globalization.

Three lectures; one term

Prerequisite(s): One of GEOG 1HA3, 1HB3; and registration in Level II or above

GEOG 3UP3 - PLANNING OUR CITIES

The theories and practice of urban planning, from a geographical perspective, emphasizing planning's role as a determinant of urban form and our experience of the city. The principles and history of planning are presented prior to examining the key participants in the planning process, using case studies.

One lecture (three hours); one term

Prerequisite(s): GEOG 2UI3

GEOG 3UR3 - URBAN SOCIAL GEOGRAPHY

The social geography of North American cities. Where different types of people live in cities, why, and why location matters. Topics include residential segregation, neighbourhood change, gentrification, and suburban development.

One lecture (two hours), one tutorial (one hour); one term

Prerequisite(s): GEOG 2UI3

GEOG 3UW3 - CITIES OF THE DEVELOPING WORLD

The nature and consequences of urbanization in the developing world, and the character of cities therein. Emphasis is placed on identifying similarities and differences between cities of the developing and the more developed worlds.

One lecture (two hours), one tutorial (one hour); one term

Prerequisite(s): GEOG 2UI3

GEOG 4EA3 - ENVIRONMENTAL ASSESSMENT

Technical and policy issues involved in the production and the appraisal of environmental impact assessments.

One lecture (two hours), one tutorial (two hours); one term

Prerequisite(s): One of EARTHSC 2EI3, ENVIRSC 2EI3, GEOG 2EI3; or registration in Honours Biology, a Civil Engineering program, an Engineering and Society program, an Honours Integrated Science program or an Honours program in the School of Geography and Earth Sciences (Faculty of Science)

Antirequisite(s): EARTHSC 4EA3

Cross-list(s): ENVIRSC 4EA3

GEOG 4ET3 - ENVIRONMENTAL POLICY, ETHICS AND RISK

An exploration of current issues in environmental ethics, economics and law, with a focus on conflicts between science and policy making.

One seminar (three hours); one term

Prerequisite(s): One of EARTHSC 2EI3, ENVIRSC 2EI3, GEOG 2EI3; and registration in Level III or above of Honours Geography and Environmental Studies, or Honours Geography and Environmental Sciences

GEOG 4GA3 - APPLIED SPATIAL STATISTICS

Advanced treatment of geographic data and organization, descriptive and inferential spatial statistics, drawing on geographic, geologic and environmental examples.

Labs involve the extensive use of statistical and GIS software.

One lecture (two hours), one lab (two hours); one term

Prerequisite(s): One of EARTHSC 3MB3, ENVIRSC 3MB3, GEOG 3MB3, STATS 2B03; and one of EARTHSC 2GI3, ENVIRSC 2GI3, GEOG 2GI3

Antirequisite(s): EARTHSC 4GA3, ENVIRSC 4GA3

GEOG 4GS3 - GIS PROGRAMMING

Advanced treatment of GIS focusing on the creation of scripts to enhance productivity by automating time-consuming and repetitive tasks. Through in-class discussions, demonstrations, and regular hands-on exercises, students are introduced to Python scripting in ArcGIS.

One lab (three hours); one term

Prerequisite(s): A minimum grade of B in one of EARTHSC 3GI3, 3GV3, ENVIRSC 3GI3, 3GV3, GEOG 3GI3, 3GV3

GEOG 4GT3 - SPECIAL TOPICS IN GIS

Advanced treatment of selected topics in GIS and Spatial Analysis; specific topics will vary from year to year, with potential topics including, but not limited to 3D GIS, Internet GIS and geomatics of health and urban social problems.

One lab (three hours); one term

Prerequisite(s): A minimum grade of B in one of EARTHSC 3GI3, 3GV3, ENVIRSC 3GI3, 3GV3, GEOG 3GI3, 3GV3

GEOG 4GT3 may be repeated, if on a different topic, with permission of the School of Geography and Earth Sciences (Faculty of Science).

GEOG 4HD3 - GEOGRAPHIES OF DISABILITY

Competing theories on the social and spatial marginalization of persons with disabilities in western countries; contemporary and historical case studies are used to illustrate the social, political and cultural determinants of disability.

One seminar (three hours); one term

Prerequisite(s): GEOG 2HI3, 2UI3

GEOG 4HH3 - ENVIRONMENT AND HEALTH

An exploration of environmental health issues research. Emphasis is placed on the distribution and effects of environmental toxins and disease-causing microorganisms. Topics include cancer clusters, food safety, and water-borne diseases.

Two lectures, one tutorial (one hour); one term

Prerequisite(s): One of EARTHSC 2EI3, ENVIRSC 2EI3, GEOG 2EI3, 2HI3; and registration in Level IV or above

Antirequisite(s): ENVIRSC 4HH3

Cross-list(s): HLTHAGE 4M03

GEOG 4LE3 - GEOGRAPHIES OF THE NORTH AMERICAN POLITICAL ECONOMY

A critical analysis of North America's economic geography with an emphasis on uneven development, growth regions, and the social and cultural embeddedness of economic activity.

One seminar (three hours); one term

Prerequisite(s): GEOG 2LE3 or LABRST 2G03; and registration in Level III or above

GEOG 4LP3 - TRANSPORT POLICY

Transport issues in local, regional, national, and global contexts. Case studies evaluated in small groups and seminar format.

One seminar (three hours); one term

Prerequisite(s): GEOG 3LT3; or permission of the instructor

GEOG 4LW3 - WORK AND THE ENVIRONMENT

An analysis of how human interactions with nature create patterns of work and inequality. Topics may include resource industries, labour-environment coalitions, and varieties of environmentalism.

One seminar (three hours); one term

Prerequisite(s): One of GEOG 2EI3, 2LE3; or registration in Level III or IV of a Labour Studies program; or permission of the Director of the School of Labour Studies

Cross-list(s): LABRST 4F03

Not open to students with credit in LABRST 3F03 if the topic was Labour and the Environment (per the 2009-2010 session).

This course is administered by the School of Labour Studies.

GEOG 4MF3 - SENIOR HUMAN GEOGRAPHY FIELD CAMP

Field study of a North American city focusing on social and/or environmental issues. Topics may vary from year to year, and the timing of the course will depend on the offerings.

Students enrolling in this course must pay the incidental fees, as prescribed by the School of Geography and Earth Sciences, and the regular tuition fees. Students intending to enrol in this course must submit an application by April 1 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences main office after March 1. Students will be informed of acceptance of their application by April 15 subject to fulfillment of the requirements.

Prerequisite(s): GEOG 2UI3; and one of ENVIRSC 3ME3, GEOG 3ME3, 3MF3; and registration in Level III or above of an Honours program in the School of Geography and Earth Sciences; and permission of the instructor

GEOG 4MS3 - INDEPENDENT STUDY

An independent study under the supervision of a faculty member. Students will typically complete a major review paper or research paper on a topic of their choice.

One meeting (one hour); one term

Prerequisite(s): Registration in Level IV of an Honours program in the School of Geography and Earth Sciences; and permission of the supervising faculty member

Not open to students with credit or registration in ISCI 4A12 A/B.

GEOG 4MT6 A/B - SENIOR THESIS

Students will select research topics and prepare a thesis either individually or in teams.

Students intending to enrol in this course must submit an application to the course coordinator by April 1 of the academic year prior to registration. Application forms are available from the School of Geography and Earth Sciences main office after March 1. Students will be informed of acceptance of their application on April 15 subject to fulfillment of the GPA requirement.

Two terms

Prerequisite(s): One of EARTHSC 3RD3, GEOG 3MA3; and registration in Level IV of an Honours program in the School of Geography and Earth Sciences; and a GPA of at least 7.5; and permission of the course coordinator

Cross-list(s): EARTHSC 4MT6 A/B, ENVIRSC 4MT6 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

GEOG 4UD3 - SPECIAL TOPICS IN URBAN PLANNING

An advanced examination of key challenges in contemporary urban planning. The course emphasizes how planners work to resolve complex and difficult urban issues, while balancing competing social, environmental, political and economic interests.

One seminar (three hours); one term

Prerequisite(s): GEOG 3UP3

GEOG 4UF3 - GEOGRAPHY OF GENDER

This course provides an advanced treatment of key themes and issues in the geography of gender. Emphasis is placed on the ways in which society and space are 'gendered' and on critical assessment of the geography of gender literature and reflection on pressing issues facing women and men today. Topics include gender and global change, the global sex trade, gender and the city, gender and sexuality, domestic violence and violence in conflict zones.

One seminar (three hours); one term

Prerequisite(s): GEOG 2UI3 and registration in Level III or above of an Honours program in the School of Geography and Earth Sciences (Faculty of Science)

GEOG 4UH3 - URBAN HOUSING

Urban housing and why it matters. Topics include, the nature and landscapes of housing; home ownership, tenancy and homelessness; home building, land development, finance and planning; housing policy.

One lecture/seminar (three hours); one term

Prerequisite(s): One of GEOG 3UG3, 3UR3

GEOG 4US3 - SUSTAINABLE CITIES

This course explores social, environmental, and economic dimensions of urban sustainability agendas in the Global North. Emphasis is placed on key debates and controversies surrounding sustainable urbanism, and the role that planners, politicians, municipal actors and citizens play in enacting or resisting visions of sustainable cities.

Lectures and discussion (three hours); one term

Prerequisite(s): One of GEOG 2EI3, 2UI3

GERMAN

Courses in German are administered by the Department of Linguistics and Languages.

Togo Salmon Hall, Room 629, ext. 24388

<http://linguistics.humanities.mcmaster.ca/>

Notes

1. Students should note that the Department has classified its German language courses under the following categories:

Introductory Level Language Course: GERMAN 1Z06 A/B S

Intermediate Level Language Courses: GERMAN 1B03, 1BB3, 2Z03, 2ZZ3

Advanced Level Language Courses: GERMAN 3Z03, 3ZZ3, 4CC3

2. Not all courses are offered on an annual basis. Students should consult the timetable for available courses.
3. Students may be required to take a placement test in the Department of Linguistics and Languages to assess their proficiency in the language.
4. The following are courses open as electives to students registered in Level II or above of any undergraduate program.

GERMAN 2CC3 - Germany Through the Ages: Culture and Society (Taught in English)

GERMAN 2N03 - The Holocaust in Film and Fiction (Taught in English)

GERMAN 3H03 - The New Europe: A New Germany (Taught in English)

Courses

If no prerequisite is listed, the course is open.

GERMAN 1B03 - INTERMEDIATE GERMAN I

A course designed to expand German linguistic skills through practice in reading, writing, listening and speaking, promoting intercultural learning and international awareness.

Three hours; one term

Prerequisite(s): Grade 12 U or M equivalent

Antirequisite(s): GERMAN 2Z03, 2Z23

Not open to students with credit or registration in GERMAN 1BB3. The Department reserves the right to place students in the course most appropriate to their abilities.

GERMAN 1BB3 - INTERMEDIATE GERMAN II

Through integrated and interactive practice in reading, writing, listening and speaking, this course is intended to serve as a foundation for the advanced study of German language and culture. The sequels to this course are GERMAN 3Z03 and 3Z23.

Three hours; one term

Prerequisite(s): GERMAN 1B03

Antirequisite(s): GERMAN 2Z23

GERMAN 1Z06 A/B S - BEGINNER'S INTENSIVE GERMAN

This course enables students to communicate effectively and accurately in German. Using multimedia resources, students acquire the basics of German grammar and develop language skills in order to master everyday situations. The sequel to this course is GERMAN 2Z03.

Three hours; two terms

Antirequisite(s): Grade 12 U or M equivalent, GERMAN 1Z23

The Department reserves the right to place students in the course most appropriate to their abilities.

GERMAN 2CC3 - GERMANY THROUGH THE AGES: CULTURE AND SOCIETY (TAUGHT IN ENGLISH)

An interdisciplinary look at the historical events, cultural phenomena, and personalities which have shaped German culture and society until World War II. Topics include: Medieval and Romantic Heritage, the Golden Twenties, Nationalism and National Socialism, the Holocaust.

Three hours; one term

Prerequisite(s): Registration in Level II or above

GERMAN 2N03 - THE HOLOCAUST IN FILM AND FICTION (TAUGHT IN ENGLISH)

Focusing on the moral, philosophical, and cultural legacy of the Holocaust through the artistic imagination, we will explore the roots of European antisemitism, the Final Solution, politicization, universalization, trivialization, aestheticization, commercialization, Holokitsch.

Two hour lecture, two hour tutorial; one term

Prerequisite(s): Registration in Level II or above

Offered on rotation.

GERMAN 2P03 - MODERN GERMANY THROUGH FILM: SYMPHONIES OF MAGIC & HORROR (TAUGHT IN ENGLISH)

Beginning with *film noir* in the early twentieth century, we will move from expressionist horror films (*Caligari*, *Mabuse*, *Nosferatu*) to the Golden Twenties in Berlin, and through the WWII period into contemporary popular culture.

Two hour lecture, two hour tutorial; one term

Prerequisite(s): Registration in Level II or above

Offered on rotation.

GERMAN 2Z03 - INTERMEDIATE GERMAN I

The course is designed to further expand German linguistic skills through integrated and interactive practice in reading, writing, listening and speaking. The sequel to this course is GERMAN 2Z23.

Three hours; one term

Prerequisite(s): GERMAN 1Z06 A/B S

Antirequisite(s): GERMAN 1B03

Not open to students with credit or registration in GERMAN 2Z23. The Department reserves the right to place students in the course most appropriate to their abilities.

GERMAN 2Z23 - INTERMEDIATE GERMAN II

Through integrated and interactive practice in reading, writing, listening and speaking, this course is intended to serve as a foundation for the advanced study of German language, literature and culture. The course is enhanced by the use of WebCT and multimedia technology. The sequels to this course are GERMAN 3Z03 and GERMAN 3Z23.

Three hours; one term

Prerequisite(s): GERMAN 2Z03

Antirequisite(s): GERMAN 1BB3

The Department reserves the right to place students in the course most appropriate to their abilities.

GERMAN 3H03 - THE NEW EUROPE: A NEW GERMANY (TAUGHT IN ENGLISH)

In the heart of the 'New Europe' lies a 'New Germany,' united after almost a half-century of division. German literature and film provide an insight into this fascinating multicultural world.

Three hours; one term

Prerequisite(s): Registration in Level II or above

GERMAN 3Z03 - ADVANCED GERMAN I

The course is suitable for intermediate-advanced learners of German and helps develop receptive and productive skills. Students will acquire and use more complex vocabulary and grammatical structures, and will become more familiar with cultural, historical, and linguistic aspects of the German-speaking countries. The sequel to this course is GERMAN 3Z23.

Three hours; one term

Prerequisite(s): GERMAN 1BB3 or 2Z23

Antirequisite(s): GERMAN 3E03

The Department reserves the right to place students in the course most appropriate to their abilities.

GERMAN 3Z23 - ADVANCED GERMAN II

This course offers a communicative approach to language, culture and literature through integrated and interactive practice in reading, writing, listening and speaking.

Three hours; one term

Prerequisite(s): GERMAN 3Z03

Antirequisite(s): GERMAN 3G03

The Department reserves the right to place students in the course most appropriate to their abilities.

GERMAN 4CC3 - TRANSLATION: TECHNIQUES AND PRACTICE

This course offers practice in the translation of literary and non-literary texts. (English to German and German to English.) The practical component will be complemented by an overview of electronic and on-line translation aids, as well as different theories and techniques of translation in Western Culture.

Three hours; one term

Prerequisite(s): One of GERMAN 3E03, 3Z03, 4B03 or 4Z03

GERMAN 4I13 A/B S - INDEPENDENT STUDY

The student will prepare, under the supervision of a faculty member, a research paper involving independent study in an area where the student has already demonstrated competence.

Prerequisite(s): 12 units of German above Level I and permission of the Department

GERMAN 4RC6 - ADVANCED GERMAN READING COURSE (TAUGHT IN ENGLISH)

This course is designed for graduate students or students intending to enter graduate programs. The course pays specific attention to developing students' reading comprehension skills and techniques. Reading materials will be selected to reflect students' specialized interests and will be used to practice textual analysis, study relevant grammar points and aid in vocabulary development. Successful completion of the course may be accepted in fulfillment of the second language reading requirement for graduate programs.

Prerequisite(s): Permission of the Department of Linguistics and Languages
Offered in alternate years during the Spring session only.

GLOBALIZATION STUDIES

GLOBALZN 1A03 - GLOBAL CITIZENSHIP

An interdisciplinary introduction to globalization through a critical engagement with the idea of "global citizenship" in the contemporary context. The political, economic, and cultural dimensions of globalization will be examined.

Three hours (lectures and tutorials); one term

GLOBALZN 3A03 - GLOBALIZATION, SOCIAL JUSTICE, AND HUMAN RIGHTS

This course examines competing theories, issues, and debates relating to the promotion of social justice and human rights in a globalizing world. Students use course-integrated social networking to interact and collaborate with peers from partner universities across the globe where versions of this course are simultaneously taught.

Three hours (lectures); one term

Prerequisite(s): GLOBALZN 1A03

Crosslist(s): ANTHROP 3HH3

GREEK

Courses in Greek are administered by the Department of Classics.

Togo Salmon Hall, Room 706, ext. 24311

<http://classics.humanities.mcmaster.ca/>

No language other than English is required for Greek courses.

Notes

1. Students should note that the Department has classified its Greek language courses under the following categories:

Introductory Level Language Courses: GREEK 1Z03, 1ZZ3

Intermediate Level Language Courses: GREEK 2A03, 2AA3

2. The following courses are available as electives to qualified students in any program: Greek Language and Literature: GREEK 1Z03, 1ZZ3, 2A03, 2AA3, 3AA3, 3B03, 3BB3, 3C03
3. Students with Grade 12 Greek U should normally register in GREEK 2A03, but with special permission, may register in either GREEK 1Z03 or 1ZZ3.

Courses

If no prerequisite is listed, the course is open.

GREEK 1Z03 - BEGINNER'S INTENSIVE ANCIENT GREEK I

A rapid introduction to the basic grammar of Ancient Greek.

Four hours (lectures and tutorials); one term

Not open to graduates of Grade 12 Greek U, who must have special permission to register in the course

GREEK 1ZZ3 - BEGINNER'S INTENSIVE ANCIENT GREEK II

This course continues the study of the grammar of Ancient Greek begun in GREEK 1Z03.

Four hours (lectures and tutorials); one term

Prerequisite(s): GREEK 1Z03. Students with Grade 12 Greek U must obtain special permission to register in the course.

This course, with a grade of at least C is accepted as a prerequisite for admission to any Honours program in Classics, or, with a grade of at least C-, for admission to the B.A. program in Classics.

GREEK 2A03 - INTERMEDIATE GREEK I

This course continues the study of Greek grammar begun in GREEK 1Z03 and 1ZZ3 and introduces students to the reading of simple passages from Greek authors. Three lectures; one term

Prerequisite(s): One of Grade 12 Greek U; or GREEK 1ZZ3 with a grade of at least C-. Students using this course as a Humanities I requirement will register for GREEK 2A03 and 2AA3

GREEK 2AA3 - INTERMEDIATE GREEK II

A study of selected passages from Greek authors designed to develop further the student's proficiency in reading Greek. The course may also include grammatical exercises.

Three lectures; one term

Prerequisite(s): GREEK 2A03

GREEK 3AA3 - GREEK PROSE

Selected readings in one or more Greek prose authors.

Three lectures; one term

Prerequisite(s): GREEK 2A03, 2AA3

GREEK 3AA3 may be repeated, if on a different author/work, to a total of six units.

GREEK 3BB3 - TOPICS IN GREEK LITERATURE

Consult the Department for the topic to be offered.

Three lectures; one term

Prerequisite(s): GREEK 2A03, 2AA3

GREEK 3BB3 may be repeated, if on a different topic, to a total of six units.

GREEK 3E03 - TOPICS IN GREEK POETRY

Consult the department for the topic to be offered.

Three lectures; one term

Prerequisite(s): Six units of Level II Greek

GREEK 3E03 may be repeated, if on a different topic, to a total of six units.

GREEK 4T03 - INDEPENDENT STUDY IN GREEK

Selected readings from Greek authors supervised by a member of the Department. Tutorials; one term

Prerequisite(s): Six units of Level III Greek and registration in Level III or IV of any Honours program in Classics, and permission of the Department
GREEK 4T03 may be repeated, if on a different topic, to a total of six units.

HEALTH, AGING AND SOCIETY

Courses in Health, Aging and Society are administered by the Department of Health, Aging and Society.

Kenneth Taylor Hall, Room 226, ext. 27227

<http://www.healthagingandsociety.mcmaster.ca>

Notes

- Not all Health, Aging and Society courses may be offered every year. Students are advised to consult the Master Timetable published by the Office of the Registrar or contact the Department of Health, Aging and Society after May 1 to determine which courses will be offered in the following academic year.
- Former Gerontology (GERONTOL) and Health Studies (HEALTHST) courses are now listed as Health, Aging and Society (HLTHAGE) courses. Students having credit in these courses may not take the corresponding Health, Aging and Society (HLTHAGE) course.

HLTHAGE 1AA3 - INTRODUCTION TO HEALTH AND SOCIETY

An introduction to the key themes and questions concerning health and health care from within social sciences perspectives.

Three hours (lectures and tutorials); one term

Antirequisite(s): HEALTHST 1A03, HTHSCI 2RR3

Not open to students in a Nursing or Midwifery program.

HLTHAGE 1BB3 - INTRODUCTION TO AGING AND SOCIETY

Examines issues in aging from a multidisciplinary perspective including such topics as: myths and stereotypes of aging, social ties in later life and the aging of the Canadian population. Provides a deeper understanding of aging and the changing body, mind and self, as well as the meaning and experiences, challenges and opportunities of aging and later life.

Three hours (lectures, tutorials and experiential components); one term

Antirequisite(s): GERONTOL 1A03

HLTHAGE 1CC3 - INTRODUCTION TO MENTAL HEALTH AND ILLNESS

An introduction to well-being and the basic types of mental disorders from social, psychological, behavioral, and medical perspectives.

Lectures (three hours); one term

HLTHAGE 2A03 - RESEARCH METHODS IN HEALTH AND IN AGING I

This course introduces students to the qualitative and quantitative research methods used in the social sciences. Students will develop skills to read, understand and evaluate the quality of research papers employing both methods.

Lectures and discussion/tutorials (three hours); one term

Prerequisite(s): Registration in any Health, Aging and Society program

Antirequisite(s): CMST 2A03; GEOG 3MA3; GERONTOL 2C03; HLTHAGE 2A06, 3Z06; HEALTHST 2B03, SOCSCI 2K03, SOCIOL 2Z03, SOCPHY 2K03, SOCSCI 2T03

HLTHAGE 2AN3 - THE ANTHROPOLOGY OF FOOD AND NUTRITION

Formerly HEALTHST 2AN3

An anthropological perspective on nutrition at the population level. Prehistoric, historic, and contemporary human nutrition, emphasizing links with the environment. Lecture (two hours), tutorial (one hour); one term

Prerequisite(s): Three units of Level I Anthropology or HLTHAGE 1AA3 (HEALTHST 1A03); and registration in Level II or above in any program

Antirequisite(s): HEALTHST 2AN3

Cross-list(s): ANTHROP 2AN3

This course is administered by the Department of Anthropology.

HLTHAGE 2B03 - SOCIAL IDENTITY, HEALTH AND ILLNESS

Formerly HEALTHST 2AA3

A critical exploration of the role of class, race, gender, ability and age in patterns of health and illness.

Lectures and discussion/tutorials (three hours); one term

Prerequisite(s): Registration in any Health, Aging and Society program

Antirequisite(s): HEALTHST 2A03, 2AA3

HLTHAGE 2BB3 - PERSPECTIVES IN HEALTH, AGING AND SOCIETY

Explores social aspects of health and aging at both the individual and societal levels using a variety of approaches such as life course perspective, political economy, social constructionism, self identity, and a feminist perspective of aging. Three hours (lectures and discussions/tutorials); one term

Prerequisite(s): HLTHAGE 1AA3 and 1BB3 and registration in any Health, Aging and Society program

Antirequisite(s): GERONTOL 2A03, 2AA3, 2D03

HLTHAGE 2C03 - HEALTH ECONOMICS AND ITS APPLICATION TO HEALTH POLICY

Formerly HEALTHST 2C03

Economic analyses of health and health care, with a special emphasis on policy issues in the Canadian health care system.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): HEALTHST 2C03

Cross-list(s): ECON 2CC3

Not open to students registered in an Economics program or with credit or registration in ECON 2G03, 2X03 or 3Z03. This course is administered by the Department of Economics.

HLTHAGE 2D03 - CONTINUUM OF CARE

The course will critically examine the continuum of care options for older adults needing support and services in later life. Some of the topics addressed include quality of life and quality of care issues, challenges involved in care integration across the continuum, environmental design, human diversity and long term care needs, formal and informal support, as well as policy and funding issues.

Lectures, discussion/tutorials (three hours); one term

Prerequisite(s): Registration in any Health, Aging and Society program

Antirequisite(s): GERONTOL 3L03, HLTHAGE 4E03

HLTHAGE 2F03 - AGING AND HEALTH CARE SYSTEMS

Formerly GERONTOL 2F03

This course examines the available international evidence on the impact of aging on health and long-term care expenditures and organization, as well as the choices various societies are making around issues of aging, health, and long-term care, and the equity issues such choices raise.

On-line with synchronized sessions (three hours); one term

Prerequisite(s): Registration in any Health, Aging and Society Program

Antirequisite(s): GERONTOL 2F03

Not open to students with credit in GERONTOL 3I03, if the topic was Aging and Health Care Systems.

HLTHAGE 2GG3 - MENTAL HEALTH AND SOCIETY

An examination of mental health and illness from different social, cultural and historical perspectives, including consideration of changing notions of diagnosis, treatment and prevention.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in level II or above

HLTHAGE 2HI3 - GEOGRAPHIES OF DEATH & DISEASE

Formerly HEALTHST 2HI3

Introduction to population geography and medical geography. Historical and contemporary trends and patterns of mortality and morbidity will be examined using ideas from demography, medicine, ecology and cultural studies, with examples from different parts of the world.

Two lectures, one tutorial (one hour); one term

Prerequisite(s): One of GEOG 1HA3, 1HB3

Antirequisite(s): HEALTHST 2HI3

Cross-list(s): GEOG 2HI3

This course is administered by the School of Geography and Earth Sciences (Faculty of Science).

HLTHAGE 2J03 - SELECTED TOPICS IN AGING AND SOCIETY

This course will provide an exploration of selected topics in aging. Topics may vary from year to year.

Three hours (lectures, discussion); one term

Prerequisite(s): Registration in Level II or above

HLTHAGE 2K03 - SELECTED TOPICS IN HEALTH AND SOCIETY

This course will provide an exploration of selected topics in Health Studies. Topics may vary from year to year.

3 hours; one term

Prerequisite(s): Registration in Level II or above.

HLTHAGE 2L03 - DRUGS, SEX AND ALCOHOL: SOCIETY AND ITS ADDICTIONS

This course analyzes the place of addictions in modern society. Taking an interdisciplinary perspective, it examines both the social factors that help shape addictive behaviours, as well as those that construct our notions of addiction and dependency.

Lectures and discussion/tutorials (three hours); one term

Prerequisite(s): Registration in Level II or above

HLTHAGE 2M03 - AGING IN MODERN (AND POST-MODERN) FAMILIES

This course examines how aging and gender combine to affect a range of relationships across different types of family. The relationships considered include relations with one's partner, marital transitions, the relationship between adult children and their parents, sibling ties, grandparent/grandchild relationships, and fictive kin.

Three hours (lecture, discussion); one term

Prerequisite(s): Registration in Level II or above

HLTHAGE 3AA3 - STATE, CIVIL SOCIETY AND HEALTH

Formerly HEALTHST 3AA3

This course explores how states, citizens, and civil society act and interact in the definition and pursuit of health.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above of a Health, Aging and Society program

Antirequisite(s): HEALTHST 3A03, 3AA3

HLTHAGE 3B03 - ADVANCED RESEARCH INQUIRY

This course provides hands-on learning where students develop skills in planning and conducting research: research question identification, tool development and pilot testing, data analysis, and reporting for both quantitative and qualitative approaches.

Three hours (lectures and discussion); one term

Prerequisite(s): One of GERONTOL 2C03, HEALTHST 2B03 or HLTHAGE 2A03, and registration in Level III or above of a Health, Aging and Society program

Antirequisite(s): HLTHAGE 2A06, 3A03, 3G03, 3Z06, SOCIOL 3003

HLTHAGE 3BB3 - FIELD EXPERIENCE

Directed observation of 40 hours in an approved field setting and a weekly seminar focusing on integration of theoretical knowledge and field experience.

Approximately four hours field observation per week, and two hours weekly seminar; one term

Prerequisite(s): Registration in Level III or above of any Health, Aging and Society program

Antirequisite(s): GERONTOL 3B03, HLTHAGE 3EE3

HLTHAGE 3CC3 - HEALTH AND ENVIRONMENT: ANTHROPOLOGICAL APPROACHES

Formerly HEALTHST 3CC3

Examination of the ways in which humans alter and cope with their environment. Topics include: health inequalities, nutrition, population, urbanization, resource utilization, and industrial pollution.

Lectures and discussion (three hours); one term

Prerequisite(s): Three units of Level I Anthropology or HLTHAGE 1AA3 (HEALTHST 1A03), and registration in Level III or IV of any program. ANTHROP 2E03 is strongly recommended.

Antirequisite(s): HEALTHST 3CC3

Cross-list(s): ANTHROP 3C03

This course is administered by the Department of Anthropology.

HLTHAGE 3D03 - PERSPECTIVES ON DISABILITY, CHRONIC ILLNESS AND AGING

Formerly HEALTHST 3D03

Designed to provide a critical examination of the interdisciplinary aspects of disability, chronic illness and aging and to gain deeper insights into the complex nature of living with a disability and/or chronic illness. Issues and challenges related to definitions, concepts, models, research, policy, program and practice implications will be discussed.

Lectures and discussion (three hours); one term

Prerequisite(s): One of HLTHAGE 1AA3 (HEALTHST 1A03) or HLTHAGE 1BB3 (GERONTOL 1A03) and Registration in Level III or above

Antirequisite(s): GERONTOL 4J03, HEALTHST 3D03

HLTHAGE 3DD3 - WORK: DANGEROUS TO YOUR HEALTH?

An analysis of issues and problems associated with occupational health and safety in Canada and other industrialized countries. Topics will be examined from social, political, economic, legal and medical perspectives.

Lectures and discussion; one term

Prerequisite(s): Registration in Level III or above of a Health, Aging and Society or Labour Studies program.

Antirequisite(s): HEALTHST 3C03

Cross-list(s): LABRST 3D03

This course is administered by School of Labour Studies. Generally offered in alternate years.

HLTHAGE 3E03 - ETHICAL ISSUES IN HEALTH AND AGING

Formerly HEALTHST 3E03

Ethical issues of current relevance to debates in aging, health and health care. Topics will vary from year to year.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above of any program

Antirequisite(s): HTHSCI 3L03, HEALTHST 3E03

HLTHAGE 3EE3 - THE PRACTICE OF EVERYDAY LIFE: OBSERVATIONS AND INQUIRY

This course explores how health and wellbeing are practiced by people 'out there' in their everyday lives across public spaces. Based on a range of theoretical and

methodological approaches, students will undertake naturalistic field observations and reflections in the community which form the basis of the course assignments. Approximately four hours field observation per week and two hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above of a program in Health, Aging and Society

Antirequisite(s): HLTHAGE 3BB3

HLTHAGE 3G03 - COMMUNITY BASED RESEARCH

This course will introduce students to the theories and practice of community based research. Community based research is committed to social change and strives to enhance the synergy between researchers and the community. Students will have the opportunity to apply their theoretical learning by actual engagement with community based organizations in research.

Three hours (lectures and discussion); one term

Prerequisite(s): HLTHAGE 2A03 and registration in Level III or above of a program in Health, Aging and Society

Antirequisite(s): HLTHAGE 2A06, 3A03, 3B03, 3Z06, SOCIOL 3003

HLTHAGE 3HP3 - POPULATION GROWTH AND AGING

Differential growth of human populations and their changing age and sex structures with an emphasis on birth and death processes. The connections between population structures and processes and various aspects of environments and societies including aging, are emphasized.

Three lectures; one term

Prerequisite(s): One of GEOG 2HI3, HEALTHST 2HI3, HLTHAGE 2HI3

Antirequisite(s): GEO 2HG3, GERONTOL 2HG3, HEALTHST 2HG3

Cross-list(s): GEOG 3HP3

This course is administered by the School of Geography and Earth Sciences.

HLTHAGE 3I03 - INDEPENDENT STUDY IN HEALTH, AGING AND SOCIETY

The student will select a topic relevant to Health, Aging and Society for an in-depth investigation under the supervision of a faculty member and write an independent research paper.

One term

Prerequisite(s): HLTHAGE 2A03, registration in Level III or above of any Health, Aging and Society program and permission of the Department Chair

Antirequisite(s): GERONTOL 3E03, HEALTHST 3I03

HLTHAGE 3K03 - SOCIAL DETERMINANTS OF POPULATION HEALTH IN CANADA

Formerly HEALTHST 3K03

This course introduces students to the social determinants of population health framework. It is used to analyse a number of social and economic determinants of health, including housing, neighbourhoods and early child development within the Canadian context.

Lectures and discussion (three hours); one term

Prerequisite(s): HLTHAGE 1AA3 (HEALTHST 1A03) and registration in Level III or above of any program

Antirequisite(s): HEALTHST 3K03

This course may be taken as elective credit by undergraduate students registered in a non-Health, Aging and Society program, however, enrolment for such students is limited.

HLTHAGE 3L03 - EMBODIED AGING

Formerly GERONTOL 3N03

This course explores the centrality of the body in social gerontological knowledge, policies and practices related to aging, and the experiences of late life. Examples of the topics addressed include the classification of the old body, bodily change

and impairment, technological advancements for the body/prosthetic devices, and the relationship between the body/identity/self over the life course.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above of a program in Health, Aging and Society

HLTHAGE 3M03 - APPROACHES TO MENTAL HEALTH AND RESILIENCE

Resiliency is a key concept in the field of social sciences and mental health. This course explores approaches to resilience among a range of populations and social contexts. Students will examine topics such as academic resilience, community resilience, and resilience in cultural context as they related to the broad determinants of mental health.

Three hours (lectures and discussion); one term

Prerequisite(s): One of HLTHAGE 1CC3 or HLTHAGE 2GG3 or HLTHAGE 2L03; and registration in Level III or above

HLTHAGE 3N03 - AGING AND MENTAL HEALTH

This course will examine the mental health of older adults from a variety of perspectives. Key topics include changes in cognitive functioning, dementia, assessment protocols, treatment methods, and older adults' sources of resilience.

Three hours (lectures and discussion); one term

Prerequisite(s): One of HLTHAGE 1AA3 (HEALTHST 1A03); HLTHAGE 1BB3 (GERONTOL 1A03); and registration in Level III or above of any program

HLTHAGE 3Q03 - SELECTED TOPICS IN HEALTH AND AGING

Topics may vary from year to year.

Lectures and discussion (three hours); one term

Prerequisite(s): One of HLTHAGE 1AA3 (HEALTHST 1A03), HLTHAGE 1BB3 (GERONTOL 1A03) and registration in Level III or above

HLTHAGE 3Q03 may be repeated, if on a different topic, to a total of six units.

Priority will be given to students registered in a Health and Aging program.

HLTHAGE 3R03 - HEALTH INEQUALITIES

This course will introduce students to the key concepts, theories and measures of health inequalities. Using common examples of health inequalities within Canada and internationally such as gender, race, social class, we will critically analyse mechanisms through which health inequalities arise, are sustained and can be addressed within societies.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above

Antirequisite(s): HLTHAGE 4F03 if topic was Health Inequalities

Priority will be given to students registered in a Health and Aging program.

HLTHAGE 3S03 - GLOBAL HEALTH AND ENVIRONMENT POLICY

This course explores the challenges in tackling the health impacts from environmental pollution (chemicals, waste, climate change), and will address the issues on how scientific knowledge about adverse health effects from exposure to environmental factors are converted into policies.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above of any program

HLTHAGE 3YY3 - INDIGENOUS COMMUNITY HEALTH AND WELL-BEING

A critical examination of the determinants of health in Aboriginal communities, processes of community revitalization, and recent government policy initiatives.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration on Level II or above

Antirequisite(s): HEALTHST 3YY3

Cross-list(s): ANTHROP 3Y03

This course is administered by the Department of Anthropology.

HLTHAGE 4B03 - DEATH AND DYING IN LATER LIFE

This course addresses quality of life at the end of life. Examines issues related to death, dying and bereavement from interdisciplinary perspectives by highlighting cultural, ethical, and spiritual aspects, as well as end of life care.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of any Honours Health, Aging and Society or Honours Social Psychology program

HLTHAGE 4C03 - REPRESENTATIONS OF HEALTH AND ILLNESS ACROSS THE LIFECOURSE

An exploration of representations of health and illness across the life course and aging in the humanities. The focus may vary from year to year, but will examine how health and illness and aging have been represented in literature, poetry, visual arts, drama or music. Consideration is also given to how art can inform social science research.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of any Honours Health, Aging and Society program

Antirequisite(s): HEALTHST 4C03

HLTHAGE 4D03 - HEALTH, CULTURE AND DIVERSITY

Examination of contemporary issues in health and illness from cross cultural and international perspectives.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Health and Society program

Antirequisite(s): HEALTHST 4D03

HLTHAGE 4F03 - SELECTED ISSUES IN HEALTH AND SOCIETY

An advanced exploration of the social aspects of health. Topics may vary from year to year.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Health and Society program

HLTHAGE 4G03 - GLOBAL HEALTH

This course introduces students to priority problems in health in a global context. Examines health problems faced by people globally but especially in low income countries and the determinants and strategies to address these problems.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Health and Society program

Antirequisite(s): HLTHAGE 3C03, 3F03 if topic was Global Health

HLTHAGE 4H03 - HISTORY AND CULTURE OF AGING

This course explores the diverse trends in aging, leading to a greater understanding of aging in past and present societies. We will explore how aging has been regarded, dealt with and represented throughout history and between cultures, including the recent developments in the 'cultures of aging' that surround the lifestyle choices and consumption habits of older people.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Aging and Society or Honours Social Psychology program

HLTHAGE 4I03 - AGING AND HEALTH

Addresses the biological, psychological and socio-political factors influencing the health of elderly persons from a broad national and international perspective.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of any Honours Health, Aging and Society or Honours Social Psychology program

Antirequisite(s): GERONTOL 4I03

Not open to students with credit in GERONTOL 4D03, if the topic was Aging and Health.

HLTHAGE 4J03 - NARRATIVES OF ILLNESS

This seminar explores the role that narratives of illness play in describing, shaping and interrogating the experiences of those who are 'unwell'.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Health and Society program

Antirequisite(s): HEALTHST 4J03

HLTHAGE 4L03 - SOCIAL POLICY AND AGING

An advanced exploration of social aspects of aging including gender and health, family relationships and retirement.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Aging and Society or Honours Social Psychology program

HLTHAGE 4M03 - ENVIRONMENT AND HEALTH

An exploration of environmental health issues research. Emphasis is placed on the distribution and effects of environmental toxins and disease-causing micro-organisms. Topics include cancer clusters, food safety, and water-borne diseases.

Two lectures, one seminar (one hour); one term

Prerequisite(s): One of EARTHSC 2E13, ENVIRSC 2E13, GEOG 2E13, 2H13; and registration in Level IV or above. GEOG 3HH3 is strongly recommended.

Cross-list(s): ENVIRSC 4HH3, GEOG 4HH3

This course is administered by the School of Geography and Earth Sciences.

HLTHAGE 4N03 - AGING AND WELL-BEING

This course explores the diverse meanings of health and wellness to older adults and analyzes the different mechanisms through which health and well-being can be maximized such as providing for physical, emotional, economic and political needs of older people.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of any Honours Health, Aging and Society program

HLTHAGE 4O03 - SOUNDSCAPES OF WELLBEING IN POPULAR MUSIC

This course examines the dynamics between music, health and wellbeing, considering the use of music by health sectors, and the places of music in cultural life.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of any Honours Health, Aging and Society or Honours Social Psychology program

HLTHAGE 4P03 - LEISURE AND RECREATION IN LATER LIFE

This course focuses upon characteristics of the aging population and the theoretical aspects of aging as related to recreation, leisure and lifestyle explores the diverse meanings of health and wellness to older adults and analyzes the different mechanisms through which health and well-being can be maximized such as providing for physical, emotional, economic and political needs of older people.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Aging and Society or Honours Social Psychology program

HLTHAGE 4Q03 - REPRESENTATIONS OF MENTAL ILLNESS

An examination of first-hand accounts and self-representations of mental illness through literature, film, music and art.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of any Honours Health, Aging and Society or Honours Social Psychology program

HLTHAGE 4R03 - BEYOND THE SOCIAL: DETERMINANTS OF INDIGENOUS PEOPLES HEALTH

This course examines the different ways in which health determinants coincide to impact the health status of Indigenous Peoples.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Health and Society or Honours Social Psychology program

HLTHAGE 4S03 - HEALTH AND THE UNFAIRLY STRUCTURED CITY

Examines patterns, process and policies related to how the structure of cities produce health inequalities and what has been done to address them, with a focus on the northern hemisphere.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Health and Society program

HLTHAGE 4T03 - GENDER, SEX AND HEALTH

This course will focus on how gender contributes to the differential structuring of the experiences of men, women and gender minorities.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Health and Society or Honours Social Psychology program

HLTHAGE 4U03 - PROFESSIONS AND OCCUPATIONS IN HEALTH AND AGING

This course introduces students to critical theories and empirical studies on health and aging professions and occupations. Such groups include physicians, nurses, social workers and other occupational alliances whose career focus is on health and/or aging.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of any Honours Health, Aging and Society program

HLTHAGE 4V03 - AGING AND HUMOUR: THE GOOD, THE BAD AND THE FUNNY

This course examines the role of humour in the lives of older people and how humour affects the aging experience. Topics include gender and ageist humour, laughter as medicine, humour as a coping strategy, and the role and value of humour and laughter for happiness and wellbeing in later life.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Aging and Society program

HLTHAGE 4W03 - SELECTED ISSUES IN AGING AND SOCIETY

An advanced exploration of the social aspects of Aging. Topics may vary from year to year.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV of an Honours Aging and Society program

HLTHAGE 4Z06 A/B - HEALTH, AGING AND SOCIETY THESIS

This course provides an opportunity for students to integrate knowledge, practice, and research in a project related to their area of interest. Students may work with individual faculty members or community-based supervisors.

Two terms

Prerequisite(s): Registration in Level IV of any Honours Health, Aging and Society program; and six units of research methods (GERONTOL 2C03 and either GERONTOL 3R03 or HLTHAGE 3A03; or HEALTHST 2B03 and either HEALTHST 3G03 or HLTHAGE 3A03) or HLTHAGE 2A03 and HLTHAGE 3B03 or 3G03; (or 2A06, 3Z06); and SOCSCI 2J03 or another approved statistics course and permission of the Department. Enrolment in this course is limited (please consult departmental notes).

Antirequisite(s): GERONTOL 4A06

HEALTH SCIENCES

Faculty Note

This course listing is divided into two parts:

1. Bachelor of Health Sciences (Honours) program, Biomedical Sciences Specialization, Child Health Specialization and Global Health Specialization.
2. Health Sciences courses normally available only to students registered in Engineering (Chemical Engineering and Bioengineering or Electrical and Biomedical Engineering), Midwifery, or Nursing (A), (B), (E) or (F) Streams, as applicable.

Bachelor of Health Sciences (Honours)

Courses in Health Sciences are administered by the Bachelor of Health Sciences (Honours) Program.

Michael G. DeGroot Centre for Learning and Discovery, Room 3308, ext. 22815
bhsc.mcmaster.ca

HTHSCI 1A00 - COMPETENCIES IN ANIMAL CARE AND RESEARCH: ORIENTATION

This course outlines the Regulations and Guidelines for the use of animals in biomedical research, the McMaster University process for conducting animal research, as well as personnel, basic animal care, (including containment techniques), services offered, and training. There is an on-line lecture and quiz, as well as a site-specific tour and in-class lecture. A pass/fail will be assigned based on completion of an on-line quiz, with a minimum grade of 70%, and completion of the site specific tour and in-class lecture.

On-line lecture, quiz and in-class tour/lecture (three and a half hours); one tour/lecture

Antirequisite(s): HEALTHSCI 700

HTHSCI 1B00 - COMPETENCIES IN ANIMAL CARE AND RESEARCH: METHODOLOGIES

This course provides housing options and the importance of using proper research techniques for biocontainment/bioexclusion. It offers basic animal handling skills, as well as injection techniques. It allows students the opportunity to gain confidence handling animals. There is an on-line lecture and quiz, as well as an in-class wet-lab. A pass/fail is assigned based on completion of the quiz, with a minimum grade of 70%, and demonstration of competency in the in-class wet-lab by accurate completion of assigned tasks.

On-line lecture, quiz and in-class wet-lab (three and a half hours); one wetlab

Antirequisite(s): HEALTHSCI 701

May be repeated to a maximum of two times if on a different topic. Topic: Mouse or Rat

HTHSCI 1C00 - COMPETENCIES IN ANIMAL CARE AND RESEARCH: COMPLETION OF ETHICAL RESEARCH

This course outlines the McMaster University process for conducting animal research, and the process for understanding both the humane and experimental endpoints of a research study. Emphasis is placed on the 3 R's: replace, reduce and refine. There is an on-line lecture and quiz, as well as a physical lecture. A pass/fail is assigned based on completion of the quiz, with a minimum grade of 70%, and attendance to the formal in-class lecture.

On-line and in-class lecture (three hours); on lecture

Prerequisite(s): HTHSCI 1A00, 1B00; or HEALTHSCI 700, 701

Antirequisite(s): HEALTHSCI 702

HTHSCI 1DT3 - DISCOVER IMMUNOLOGY TODAY

This course is intended to inspire curiosity in questions generated by concepts in immunology that drive current research directions. Students will explore a spectrum of topics in immunology with research faculty.

Two hours; one term

Prerequisite(s): Registration in Level 1 B.H.Sc. (Honours) or Level 1 Science or Level 1 Arts & Science

HTHSCI 1E06 A/B - INQUIRY I: INTRODUCTION

This course will initiate the development of a skill set required for life-long learning, in the context of the study of one or two health care issues. A problem based course applying principles of scientific inquiry to selected health issues.

Three hours; two terms

Prerequisite(s): Registration in the B.H.Sc. (Honours) program

Antirequisite(s): HTHSCI 1E03, 1EE3, HTHSCI 2D06 A/B, INQUIRY 1SC3

Note: Students entering the B.H.Sc. (Honours) program after completion of Level I in another program may be required to complete HTHSCI 2D06 A/B at the discretion of the Assistant Dean of the program.

HTHSCI 1G02 - INTERDISCIPLINARY PROBLEM-SOLVING IN HEALTH

Recognizing that health is not simply a biological phenomenon, this course examines health issues from multiple perspectives, emphasizes the links between them, and builds a conceptual tool-box for problem solving across the domains of population and public health, biomedical and clinical issues, social and cultural aspects of health, and health systems and policy.

One lecture, one tutorial; one term

Prerequisite(s): Registration in Level I of the B.H.Sc. (Honours) Program or Level II as a B.H.Sc. (Honours) Program transfer student.

HTHSCI 1I06 A/B - CELLULAR AND MOLECULAR BIOLOGY

Students will explore the molecular basis of cellular communication (gene expression, cellular signaling) underlying disease processes. A hybrid approach blending didactic and inquiry-based approaches will be used.

Two sessions per week (three hours each); two terms

Prerequisite(s): Grade 12 U Biology and registration in Health Sciences I, or Grade 12 U Biology and registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program.

Co-requisite(s): WHMIS 1A00. Students registering in HTHSCI 1I06 A/B must also register in WHMIS 1A00 when completing their registration.

Antirequisite(s): BIOLOGY 1A03

HTHSCI 1K03 - HEALTH SCIENCES IN THE MEDIA

An inquiry-based model will be used to allow students of all backgrounds to explore the relationship between popular media representations of discoveries in the health sciences and the original research behind them. Students will acquire transferrable information literacy skills to find, critically evaluate, and summarize evidence and will gain an understanding of the context for communication of modern scientific discoveries.

Three hours; one term

Prerequisite(s): Registration in any Level 1 Program

HTHSCI 1PA3 - CURRENT RESEARCH IN BIOCHEMISTRY AND BIOMEDICAL SCIENCES

This course will introduce students to concepts and areas of research excitement in biomedical sciences.

This course is evaluated on a pass/fail basis.

Two lectures; one term

Prerequisite(s): Registration in any Level I program. Grade 12 U Biology is recommended, but not required.

HTHSCI 1X01 A/B - PRAXIS PATHWAYS 1

This is part 1 of the longitudinal Praxis Pathways Curriculum, in which students begin to actively develop capacities for: collaboration in community; group process; leadership; lifelong learning; perspective-taking; reflection and reflexivity; and self-care and wellness. The development of information literacy and critical analysis skills supports and informs these goals.

Two hours; two terms

Prerequisite(s): Registration in Level I of the B.H.Sc. (Honours) Program or Level II as a B.H.Sc. (Honours) Program transfer student.

HTHSCI 2AE3 - ARTISTIC EXPLORATIONS OF COMMUNITY ISSUES

Students will research and explore topics relevant to the B.H.Sc. and Arts & Science communities through engaging with and investigating arts-based research methodologies.

Three hours; one term

Prerequisite(s): Registration in Level II or above in the B.H.Sc. (Honours) or Arts & Science Program, or permission of instructor

HTHSCI 2CH3 A/B - CHS LEARNING MODULES

Modules will provide a foundation of knowledge in multiple areas of child health and development. Topics will include the physical, cognitive, social, emotional and behavioural perspectives of child development.

On-line modules; two terms

Prerequisite(s): Registration in Level II of the Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.)

HTHSCI 2CH6 A/B - CHS INQUIRY FUNDAMENTALS

The inquiry-based model will be used to facilitate student's learning within the dynamic context of child health and development. The integration of knowledge, research and experiential opportunities will be discussed during weekly classes. The learning environment will also include dialogues with experts, tutorials and field placements. Four hours; two terms

Prerequisite(s): Registration in Level II of the B.H.Sc. (Honours) Child Health Specialization

HTHSCI 2D06 A/B - INQUIRY II: INTRODUCTION AND BIOCHEMISTRY

This course will use an inquiry-based approach. First semester will initiate the development of a skill set required for life-long learning by studying healthcare issues. Second semester will introduce key concepts in Biochemistry and Molecular Biology to understand genetic, infectious and metabolic diseases.

Three hours; two terms

Prerequisite(s): Permission of the Assistant Dean, B.H.Sc. (Honours) program

Antirequisite(s): HTHSCI 1E06 A/B, HTHSCI 2E03

Note: This course is restricted to Level II B.H.Sc. (Honours) transfer students only.

HTHSCI 2DS3 - GLOBAL HEALTH AND THE COMPLEXITIES OF DISEASE

This course will introduce students to the disease states that define the burden of morbidity and mortality in a global setting. Students will examine the relationships that define the static and dynamic patterns of health and illness by drawing on diverse fields of academic thought and research, including the biological, geographical, anthropological and political sciences.

Three hour lecture, one tutorial; one term

Prerequisite(s): Registration in Level II or above of the B.H.Sc. (Honours) Program or registration in Level II or above in any Honours program

HTHSCI 2E03 - INQUIRY II: BIOCHEMISTRY

This course will use an inquiry based format to introduce key concepts in biochemistry, molecular biology and biomedical sciences to understand illnesses such as infectious diseases, metabolic disorders, genetic diseases and cancer.

One term

Prerequisite(s): HTHSCI 1I06 A/B

HTHSCI 2F03 - HUMAN PHYSIOLOGY AND ANATOMY I

An introduction to the principal organ systems including the endocrine, skin, CNS and locomotion.

Two lectures, one lab; one term

Prerequisite(s): Registration in Level II of the B.H.Sc. (Honours) program or registration in Level II of the Integrated Biomedical Engineering and Health Sciences (IBEHS) program.

Antirequisite(s): HTHSCI 1D06 A/B, 1H03, HTHSCI 1H06 A/B, HTHSCI 2L03, KINESIOL 1A03, 1A06, KINESIOL 1AA3, 1X06, KINESIOL 1Y03, KINESIOL 1YY3, MEDPHYS 4XX3, SCIENCE 4XX3

HTHSCI 2FF3 - HUMAN PHYSIOLOGY AND ANATOMY II

A continuation of HTHSCI 2F03 with an examination of the Immune, Cardiovascular, Respiratory, Gastrointestinal and Uro-Genital Systems.

Two lectures, one lab; one term

Prerequisite(s): HTHSCI 2F03

Antirequisite(s): HTHSCI 1D06 A/B, HTHSCI 1H06 A/B, 1HH3, HTHSCI 2LL3, KINESIOL 1A03, 1A06, KINESIOL 1AA3, 1X06, KINESIOL 1Y03, KINESIOL 1YY3, MEDPHYS 4XX3, SCIENCE 4XX3

HTHSCI 2G03 - STATISTICS & EPIDEMIOLOGY 1

An introduction to measure of health, the design and analysis of epidemiological studies, the statistical approaches used to analyze data and interpret measures of association, and understanding confounding and bias.

Three lectures, one tutorial; one term

Prerequisite(s): Registration in Level II of the B.H.Sc. (Honours) program, or registration in Level II of the B.H.Sc. (Honours) Specialization; or registration in Level III of the Integrated Biomedical Engineering and Health Sciences program

Antirequisite(s): LIFESCI 3G03

HTHSCI 2GG3 - STATISTICS & EPIDEMIOLOGY 2

Building on HTHSCI 2G03, this course will introduce more advanced concepts and methods in biostatistics, while examining crucial issues in the design and analysis of epidemiologic studies, and exploring specialized topics.

Three lectures, one tutorial; one term

Prerequisite(s): HTHSCI 2G03

Antirequisite(s): COMMERCE 2QA3, HTHSCI 2A03, NURSING 2R03, STATS 1CC3, 2B03

HTHSCI 2J03 - HEALTH, ATTITUDE AND BEHAVIOUR

This course will explore the knowledge and application of specific principles in daily living, applied drama and physical activity as a way of achieving wellness and dealing with stress.

This course is evaluated on a Pass/Fail basis.

One lecture, two tutorials; one term

Last offered 2019-2020

Prerequisite(s): HTHSCI 1E06 A/B or HTHSCI 2D06 A/B

Antirequisite(s): KINESIOL 2G03

HTHSCI 2K03 - CELL BIOLOGY

An inquiry based examination of the relationship between cell structure and function. Students will be required to apply key concepts of cell biology to facilitate their understanding of timely problems in biomedicine.

Tutorials (three hours); one term

Prerequisite(s): HTHSCI 1I06 A/B or HTHSCI 2D06 A/B; or registration in Level II or above of the Chemical Engineering and Bioengineering Program or Electrical and Biomedical Engineering; or registration in Level III of the Integrated Biomedical Engineering and Health Sciences program (HESE stream)

Antirequisite(s): BIOLOGY 2B03, ISCI 2A18 A/B

HTHSCI 2T03 - SEX, GENDER, & HEALTH

This course will explore the concepts of sex and gender, and take a critical perspective on how sex, gender, and social norms of masculinity and femininity affect health, healthcare, and health research.

Three hours; one term

Prerequisite(s): Registration in any Level II or above program.

HTHSCI 2X03 A/B - PRAXIS PATHWAYS 2

This is part two of the longitudinal Praxis Pathways Curriculum, in which students further develop and refine capacities for: collaboration in community; group process; leadership; lifelong learning; perspective-taking; reflection and reflexivity; and self-care and wellness. The development of information literacy and critical analysis skills supports and informs these goals.

Six hours per month; two terms

Prerequisite(s): Registration in Level II of the B.H.Sc. (Honours) Program

First offered in 2020-21

HTHSCI 3AH3 - INDIGENOUS HEALTH

The goal of this course is to provide students with knowledge and skills related to health care practice and policy from within Indigenous contexts. Enabling students to acquire and put into practice concepts and information required to understand and manage health for Indigenous peoples; to engage in culturally competent and safe practice through knowledge development; and the ability to identify areas of need specific to Indigenous health.

Two lectures; one term

Prerequisite(s): Registration in Level III or above in the B.H.Sc. (Honours) Program or B.H.Sc. (Honours) specializations, or permission of instructor.

HTHSCI 3BA3 - SYMPTOMATOLOGY

This unique course will examine the science of the symptoms of various diseases. Both the physiological and molecular mechanism(s) of various symptoms will be explored pertaining to a disease state. Signals to various organs will be explored in the context of symptoms. The molecular basis of symptoms such as pain induced by cancer or cardiovascular disease will be elucidated. The course is an inquiry-based examination of symptoms. The course will be organized into small groups.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) Program, or B.H.Sc. (Honours) specializations, or registration in Level III or above of the Bachelor of Health Sciences (Honours) - Biomedical Discovery and Commercialization (B.H.Sc.)

HTHSCI 3BM3 - INQUIRY PROJECT IN BIOMEDICAL SCIENCES

An opportunity to explore a specialized area of biomedical sciences in preparation for Level IV Thesis in Biomedical Sciences.

One term

Prerequisite(s): Registration in Level III of the BHSc (Honours) Biomedical Sciences Specialization.

HTHSCI 3BM6 A/B S - RESEARCH PROJECT IN BIOMEDICAL SCIENCES

A research project exploring a specialized area of biomedical sciences under the supervision of a faculty member.

Two terms

Prerequisite(s): Registration in Level III of the B.H.Sc. (Honours) Biomedical Sciences Specialization or permission of BHSc (Honours) Program.

Antirequisite(s): BIOCHEM 3R06 A/B

HTHSCI 3CC3 - THEATRE FOR DEVELOPMENT

This course, rooted in Applied Drama, will enable students to actively participate and explore their creativity, enhancing transferable skills like communication and active listening through drama games and exercises.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) program or registration in Level III of the B.H.Sc. (Honours) Specializations

HTHSCI 3CH3 - CHS INQUIRY INTERMEDIATE

Building upon Level II, students will continue to learn in an Inquiry based environment and be expected to deepen their knowledge, integrate new material and experiences in order to understand and explore the complexities of child health and development within the community.

Four hours; one term

Prerequisite(s): Permission of Department. This course is available only to Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.) students studying in the MacAbroad Exchange Program.

HTHSCI 3CH6 A/B S - CHS RESEARCH PRACTICUM

Students will continue to develop and apply their statistical knowledge, information literacy and research skills by developing and implementing an independent project in collaboration with a community partner and Child Health Specialization facilitators. Emphasis will be placed on communication and collaboration, skill development and the complexities, potential, and limitations of applied research. Sessions arranged individually or in small groups; two terms

Prerequisite(s): Registration in Level III of the Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.)

HTHSCI 3CH9 A/B - CHS INQUIRY INTERMEDIATE

Building upon Level II, students will continue to learn in an Inquiry based environment and be expected to deepen their knowledge, integrate new material and experiences in order to understand and explore the complexities of child health and development within the community.

Four hours; two terms.

Prerequisite(s): Registration in Level III of the B.H.Sc. (Honours) Child Health Specialization

HTHSCI 3DD6 A/B - ENGAGING THE CITY: AN INTRODUCTION TO COMMUNITY-BASED RESEARCH IN HAMILTON

An introduction to the city of Hamilton and community-based research. This course will place experiential emphasis on citizenship, community health, economics, geography, environment, and education.

Three hours; two terms

Prerequisite(s): Registration in Level III or above and permission of instructor
This course is evaluated on a Pass/Fail basis.

HTHSCI 3E03 - INQUIRY III: ADVANCED INQUIRY IN HEALTH SCIENCES

This course will cover health issues that are prevalent at certain times in the developmental cycle. Topics will include reproduction, global health, health of children and adolescents, adulthood, and health care issues in the elderly.

One term

Prerequisite(s): HTHSCI 2D06 A/B or HTHSCI 2E03 and registration in Level III of the B.H.Sc. (Honours) program; or registration in Level III of the B.H.Sc. (Honours) Specializations

HTHSCI 3EE3 - BIOMEDICAL GRAPHICS

An art course for science students, participants will learn the basics of visual literacy, design and the software used to create effective illustrations or figures in support of scientific communication.

One lecture; one lab; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours), or Honours Studio Art programs
Students must be artistically inclined.

HTHSCI 3FC3 - SCIENCE OF FICTIONAL CHARACTERS

In this interdisciplinary inquiry course, students will use fictional characters as a model to apply and understand key concepts in various scientific disciplines (e.g. biology, psychology). Additional emphasis will be placed on science communication and the development of scientific inquiry skills.

Three hours; one term

Prerequisite(s): Registration in Level III or above in B.H.Sc. (Honours); or Level III or above in any Honours program

HTHSCI 3G03 - CRITICAL APPRAISAL OF THE MEDICAL LITERATURE

Students will learn quantitative research design and how to evaluate the internal validity of published research to determine the effectiveness of an intervention, diagnostic test, screening program, prognostic or risk factor and systemic review.

Two lectures, one tutorial; one term

Prerequisite(s): HTHSCI 2G03

HTHSCI 3GG3 - HEALTH SYSTEMS AND HEALTH POLICY

This course reviews how health care is different from other goods and services, how governments have responded to these differences, and how governments make decisions about health care.

Two lectures, one tutorial; one term

Prerequisite(s): HTHSCI 3G03 or registration in Level III of the B.H.Sc. (Honours) Specializations

HTHSCI 3H03 A/B - INQUIRY PROJECT

An opportunity to explore one or more specialized areas of Health Sciences in preparation for Level IV Senior Project/Thesis.

One term

Prerequisite(s): Registration in Level III B.H.Sc. (Honours) program or registration in Level III of the B.H. Sc. (Honours) Specializations.

Antirequisite(s): HTHSCI 3H06 A/B

HTHSCI 3H06 A/B S - INQUIRY PROJECT

An opportunity to explore one or more specialized areas of Health Sciences in preparation for Level IV Senior Project/Thesis.

One term or two terms

Prerequisite(s): Registration in Level III B.H.Sc. (Honours) program or registration in Level III of the B.H. Sc. (Honours) Specializations and permission of B.H.Sc. (Honours) program.

Antirequisite(s): HTHSCI 3H03 A/B

HTHSCI 3HH3 - DECEPTIONS IN DECISION MAKING

Students will explore and examine how hidden strategies/factors are deployed to create popular mindsets, beliefs, propagandas and perceptions. By using examples from education, health care, psychology & behavior economics, students will have an exciting platform to deconstruct some of the popular mindsets/stereotypes/beliefs and then use that knowledge to become an effective advocate.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) program

HTHSCI 3I03 - INTRODUCTORY IMMUNOLOGY

An introduction to humoral and cellular immunity. The molecular and cellular basis of immunity, and an introduction to immunological techniques.

Two lectures, one tutorial; one term

Prerequisite(s): One of BIOLOGY 1A03, HTHSCI 1I06, or ISCI 1A24 A/B, and registration in Level II or above

HTHSCI 3K03 - INTRODUCTORY VIROLOGY

An introduction to the basics of virology. Topics include the structure and composition of viruses, virus replication strategies, virus-host interactions and uses of viruses for medical research.

Two lectures, one tutorial; one term

Prerequisite(s): One of BIOLOGY 2B03, HTHSCI 2K03, or ISCI 2A18 A/B; and registration in Level III or above

HTHSCI 3L03 - INTRODUCTION TO BIOETHICS

This course will cover ethical issues that are relevant to biological sciences. Topics will include genetic engineering and cloning, genetic screening, reproductive technology and the use of behavioural strategies to alter societal behaviours.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level III or above

Antirequisite(s): HEALTHST 3E03, PHILOS 2D03

HTHSCI 3MH3 - CRITICAL EXAMINATION OF MENTAL HEALTH

An examination of mental health and illness from different social, cultural and historical perspectives. In this course, students will consider a range of mental health issues and compare how these issues are commonly understood in a critical examination of mental health research and theory.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the BHSc (Honours) Program, or registration in Level III or above of the BHSc (Honours) Specializations, or permission of instructor.

HTHSCI 3MU3 - MUSIC, HEALTH, & THE COMMUNITY

This experiential interdisciplinary course will develop community experience and leadership in the Hamilton Intergenerational Music Program. In-class discussions will focus on the function and role of music in health and healthcare, intergenerational issues, leadership skills, and music education.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the BHSc (Honours) Program, or registration in Level III or above of the BHSc (Honours) Specializations, or registration in Level III or above of a Music program, or registration in Level III or above of a Health, Aging & Society program, or permission of instructor.

HTHSCI 3N03 - WRITTEN COMMUNICATION IN HEALTH SCIENCES I

This course will explore various genres of written communication. Students will develop their editing and writing skills in a small group.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) program or registration in Level III or above of the B.H.Sc. (Honours) Specializations

HTHSCI 3QA3 - QUALITATIVE RESEARCH METHODS IN HEALTH

An inquiry-based course examining a wide range of qualitative methods used in health research, including ethnography, narrative, phenomenology, and arts-and-science-based approaches. We explore qualitative methods in the clinical, public, and biomedical health sciences.

Three hours; one term

Prerequisite(s): Registration in Level 3 or above of an Honours program

HTHSCI 3S03 - COMMUNICATION SKILLS

This course offers students a variety of learning experiences that will enable them to better understand the relationship between effective communication and desired health care outcomes. Students will be exposed to evidence based research, role playing, standardized simulations and audio-visual reviews.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) program; or registration in Level III or above of the B.H.Sc. (Honours) Specializations; or registration in

Level III or above in any Honours program

HTHSCI 3SB3 - SUPERBUGS: BACTERIAL ANTIBIOTIC RESISTANCE

This course will examine the biochemistry of antibiotic resistance in bacteria. Prominent 'superbugs' plaguing patients will be covered, as well as potential novel interventions to move antimicrobial chemotherapy forward.

Three hours; one term

Prerequisite(s): HTHSCI 2K03

HTHSCI 3T03 - INQUIRY INTO WORK, SELF AND PURPOSE

This course will explore ideas of work, career/life design and personal purpose. Students will undertake self-assessment activities, group projects and personal reflection with a view to integrating a critical appreciation of course content into their personal decision making.

Three hours; one term

Prerequisite(s): Registration in Level III or above

HTHSCI 3U03 - MEDICAL GENETICS

This course will cover a broad spectrum of genetic disorders; with particular emphasis on inheritance patterns, molecular mechanisms, treatment and prevention.

Two lectures, one tutorial; one term

Prerequisite(s): HTHSCI 2K03 or BIOLOGY 2B03 and registration in Level III or above

HTHSCI 3V03 - RESEARCH AND EXPERIMENTAL DESIGN

Analytical review of fundamental experiments with a focus on experimental design, employing data sets to solve experimental problems with an emphasis on how to approach the problem. This course will serve as an accompaniment to HTHSCI 3R06 A/B or as a precursor to the BIOCHEM 4F09 A/B or HTHSCI 4R12 A/B senior thesis courses.

Two lectures, one tutorial (two hours); one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) Program; or registration in Level III or above of the Honours Integrated Science Program, Arts & Science Program, or any Honours program in the Faculty of Science

HTHSCI 3X00 A/B - PRAXIS PATHWAYS 3

This is part 3 of the longitudinal Praxis Pathways Curriculum, in which students develop greater facility in their capacities for: collaboration in community; group process; leadership; lifelong learning; perspective-taking; reflection and reflexivity; and self-care and wellness. The development of information literacy and critical analysis skills supports and informs these goals.

One hour per month; two terms

Prerequisite(s): Registration in Level III of the B.H.Sc. (Honours) Program

This course is evaluated on a Pass/Fail basis.

First offered in 2021-22.

HTHSCI 3X03 - PAIN: PERCEPTIONS, MECHANISMS AND MANAGEMENT

An introduction to perceptions, mechanisms and management of pain with a holistic interdisciplinary approach.

One lecture, one tutorial; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) Program, or registration in Level III or above of the B.H.Sc. (Honours) Specializations, or permission of the instructor

HTHSCI 4A09 A/B S - THESIS

A thesis-based research project conducted under the direction and supervision of a member of the Faculty. Arrangements to register in HTHSCI 4A09 A/B, including agreement of the supervisor, must be made before the end of March in Level III.

Two terms

Prerequisite(s): Registration in B.H.Sc. (Honours) program and permission of B.H.Sc. (Honours) Program

Antirequisite(s): BIOLOGY 4F06 A/B, 4C12 A/B, HTHSCI 4B06 A/B, 4A12 A/B, 4A15 A/B, MOLBIOL 4G12 A/B, PHARMAC 4F09, PSYCH 4E09

Not open to students with credit or registration in BIOCHEM 4P03.

HTHSCI 4A12 A/B S - THESIS

A thesis-based research project conducted under the direction and supervision of a member of the Faculty. Arrangements to register in HTHSCI 4A12, including agreement of the supervisor, must be made before the end of March in Level III.

Two terms

Prerequisite(s): Registration in B.H.Sc. (Honours) program and permission of B.H.Sc. (Honour) Program

Antirequisite(s): BIOLOGY 4F06 A/B, 4C12 A/B, HTHSCI 4B06 A/B S, 4A09 A/B, 4A15 A/B, MOLBIOL 4G12 A/B, PHARMAC 4F09, PSYCH 4E09

Not open to students with credit or registration in BIOCHEM 4P03.

HTHSCI 4A15 A/B S - THESIS

A thesis-based research project conducted under the direction and supervision of a member of the Faculty. Arrangements to register in HTHSCI 4A15, including agreement of supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Registration in B.H.Sc. (Honours) Program and permission of B.H.Sc. (Honours) Program

Antirequisite(s): BIOLOGY 4F06 A/B, 4C12 A/B, HTHSCI 4B06 A/B, 4A09 A/B, 4A12 A/B, MOLBIOL 4G12 A/B, PHARMAC 4F09, PSYCH 4D06, 4D09, 4E09

Not open to students with a credit or registration in BIOCHEM 4P03.

HTHSCI 4AC3 - ADVANCED COMMUNICATION SKILLS

This course will build on Communication Skills acquired in HTHSCI 3S03 and expose students to more in-depth learning experiences via the Centre for Simulation Based Learning and classroom debriefs/presentations. This course will employ video and multimedia analysis to enhance learning, and develop advanced-level communication skills for difficult conversations.

Three hours; one term

Prerequisite(s): HTHSCI 3S03 Communication Skills and registration in Level IV

HTHSCI 4AL3 - MODEL SYSTEMS

Examining the use of human, animal and cell model systems in research through investigation of primary research.

One lecture or workshop (three hours); one term

Prerequisite(s): Registration in Level III or above in the B.H.Sc. (Honours) Program; or registration in Level III or above of the Honours Integrated Science Program, Arts & Science Program, or any Honours program in the Faculty of Science

HTHSCI 4B06 A/B S - SENIOR PROJECTS

A selection of information-based research projects conducted under the supervision of one or more members of the Faculty. Arrangements to register in HTHSCI 4B06 A/B including agreement of supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Registration in B.H.Sc. (Honours) program and permission of B.H.Sc. (Honours) Program

Antirequisite(s): BIOLOGY 4F06 A/B, 4C12 A/B, HTHSCI 4A09 A/B, HTHSCI 4A12 A/B, HTHSCI 4A15 A/B, MOLBIOL 4G12 A/B, PHARMAC 4F09, PSYCH 4D06, 4D09, 4E09

Not open to students with credit or registration in BIOCHEM 4P03.

HTHSCI 4BB3 - NEUROIMMUNOLOGY

This course will examine immune-brain communication, immune molecules and their signalling pathways, and the role of the immune system in normal brain function and CNS disease. It is recommended that students have an understanding of Immunology.

Two lectures, one tutorial; one term

Prerequisite(s): One of BIOLOGY 2B03, HTHSCI 2K03, ISCI 2A18 A/B, BIOTECH 3IV3, or HTHSCI 3I03

HTHSCI 4BL3 - PEER TUTORING IN DESIGN THINKING

This course provides students an opportunity to develop their skills and knowledge of design thinking by acting as peer tutors to other students enrolled in HTHSCI 4ID3: Innovation by Design, an introduction to design thinking. Students will have an opportunity to support up to two interdisciplinary teams of students through a series of design project milestones.

Developing skills and tools for facilitating a design mindset in others will serve as the focus of an individual and a team project.

Prerequisite(s): Registration in Level III or above in any program; HTHSCI 3QA3, 4ID3, or 4LA3; and permission of the instructor

HTHSCI 4BP3 - BODIES AND BODIES POLITIC: FROM PUBLIC HEALTH TO GLOBAL HEALTH

This course explores the politics of health through the body, from public health to colonialism to transnational global health. The rights to health care originated at the national level, in political systems. We consider global health in historical perspective and what happens when pharmaceuticals and RCTs travel, with examples from North Africa, the Philippines, India, Doctors Without Borders, and the Middle East.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the BHSc (Hons) Program or Specializations or the Arts & Science Program; or registration in Level III or above of any Honours program and permission of the instructor

Cross-list(s): ARTSSCI 4BP3

HTHSCI 4C06 A/B - SENIOR PROJECT IN CHILD HEALTH

A selection of information-based research projects focused on Child Health conducted under the supervision of one or more members of the Faculty. Arrangements to register in HTHSCI 4C06 including agreement of supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Registration in Level IV of the B.H.Sc. (Honours) Child Health Specialization and permission of B.H.Sc. (Honours) Program

Antirequisite(s): HTHSCI 4C09 A/B, HTHSCI 4C12 A/B, HTHSCI 4C15 A/B

HTHSCI 4C09 A/B - THESIS IN CHILD HEALTH

A thesis-based research project focused on Child Health conducted under the direction and supervision of a member of the Faculty. Arrangements to register in HTHSCI 4C09, including agreement of the supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Registration in Level IV of the Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.) and permission of B.H.Sc. (Honours) Program

Antirequisite(s): HTHSCI 4C06 A/B, 4C12 A/B, 4C15 A/B

HTHSCI 4C12 A/B - THESIS IN CHILD HEALTH

A thesis-based research project focused on Child Health conducted under the direction and supervision of a member of the Faculty. Arrangements to register in HTHSCI 4C12, including agreement of the supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Registration in Level IV of the Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.) and permission of B.H.Sc. (Honours) Program
Antirequisite(s): HTHSCI 4C06, 4C09 A/B, 4C15 A/B

HTHSCI 4C15 A/B - THESIS IN CHILD HEALTH

A thesis-based research project focused on Child Health conducted under the direction and supervision of a member of the Faculty. Arrangements to register in HTHSCI 4C15, including agreement of the supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Registration in Level IV of the Bachelor of Health Sciences (Honours) - Child Health Specialization (B.H.Sc.) and permission of B.H.Sc. (Honours) Program
Antirequisite(s): HTHSCI 4C06 A/B, 4C09 A/B, 4C12 A/B

HTHSCI 4CH3 A/B - CHS EDUCATION PRACTICUM

Students in the Child Health Specialization will have the opportunity to experience and facilitate the skill/knowledge acquisition of their peers in CHS Level II within a group context.

Sessions arranged individually or in small groups; two terms

Prerequisite(s): Registration in Level IV of the B.H.Sc. (Honours) Child Health Specialization and permission of the instructor

HTHSCI 4CH6 A/B - CHS INQUIRY ADVANCED

The course will be a continuation of principles and core elements of knowledge, research and application experienced in Level III. Students will be expected to integrate and apply their knowledge and critical thinking about child health at a more advanced level.

Four hours; two terms

Prerequisite(s): Registration in Level IV of the B.H.Sc. (Honours) Child Health Specialization

HTHSCI 4D03 - SPECIAL TOPICS IN HEALTH SCIENCES

This course provides an opportunity for individual or small groups to integrate concepts from their undergraduate courses.

Prerequisite(s): Permission of the Assistant Dean, B.H.Sc. (Honours) program
 HTHSCI 4D03 may be repeated, if on a different topic, to a total of six units.

HTHSCI 4D06 A/B - SENIOR PROJECT IN ENGAGING THE CITY

A project focused on community-based participatory research conducted under the direction and supervision of a member of the Faculty. The project can be an extension of a student's 3DD6 A/B Engaging the City project. Arrangements to register in HTHSCI 4D06 A/B including agreement of supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Permission of B.H.Sc. (Honours) Program
Antirequisite(s): HTHSCI 4B06 A/B, 4A09 A/B, 4A12 A/B, 4A15 A/B

HTHSCI 4D09 A/B - THESIS IN ENGAGING THE CITY

A thesis focused on community-based participatory research conducted under the direction and supervision of a member of the Faculty. The thesis can be an extension of a student's 3DD6 A/B Engaging the City project. Arrangements to register in HTHSCI 4D09 A/B, including agreement of the supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Permission of B.H.Sc. (Honours) Program
Antirequisite(s): HTHSCI 4B06 A/B S, 4A09 A/B, 4A12 A/B, 4A15 A/B S

HTHSCI 4D12 A/B - THESIS IN ENGAGING THE CITY

A thesis focused on community-based participatory research conducted under the direction and supervision of a member of the Faculty. The thesis can be an

extension of a student's 3DD6 A/B Engaging the City project. Arrangements to register in HTHSCI 4D12 A/B, including agreement of the supervisor must be made before the end of March in Level III.

Two terms

Prerequisite(s): Permission of B.H.Sc. (Honours) Program
Antirequisite(s): HTHSCI 4B06 A/B S, 4A09 A/B, 4A12 A/B, 4A15 A/B S
 Arrangements to register in this course, including agreement of the supervisor, must be made before the end of March in Level III.

HTHSCI 4DE3 - SENIOR PROJECT IN ENGAGING THE CITY

A project focused on community-based participatory research conducted under the direction and supervision of a member of the Faculty. The project can be an extension of a student's HTHSCI 3DD6 A/B - Engaging the City project. Arrangements to register in HTHSCI 4DE3 including agreement of supervisor must be made before the end of March in Level III.

One term

Prerequisite(s): Permission of B.H.Sc. (Honours) Program

HTHSCI 4DM3 - DEMYSTIFYING MEDICINE

Students will work in small cross-disciplinary groups on selected topics presented at the McMaster Demystifying Medicine Seminar Series. Students will acquire a broad overview of various clinical topics, patient needs and associated biomedical research. Students will translate the acquired knowledge to patients and public, and develop educational material.

Three hours; one term

Prerequisite(s): Registration in Level IV in the B.H.Sc. (Honours) Program, or Level IV in the B.H.Sc. (Honours) Specialization; or registration in Level IV of the Honours Integrated Science Program, Arts & Science; or registration in Level IV in any Honours program.

HTHSCI 4EE3 A/B - EDUCATION PRACTICUM IN HEALTH SCIENCES

An opportunity to explore pedagogy as it relates to best practice in education.

Sessions arranged individually or in small groups; two terms

Prerequisite(s): Permission of the Assistant Dean, B.H.Sc. (Honours) program

HTHSCI 4F03 - INTERDISCIPLINARY HEALTH & WELLNESS

This course will include one or more placements in an interdisciplinary health and wellness environment. In conjunction with these placements, students will be required to engage with the literature, community, and peers to understand and apply principles of interdisciplinary collaboration to current challenges in health and wellness. Students must arrange their clinical placement.

Sessions arranged individually or in small groups.

One term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) program, or Level III or above of the B.H.Sc. (Honours) Specializations, and permission of the instructor

HTHSCI 4G03 - PATHOANATOMY

Students will research the anatomy, surgical approach and etiology of a pathology assigned from an anatomical system of their choosing, depending on availability of cadavers. The goal is to give students an opportunity to prepare an educational surgical specimen from human materials.

Two lectures, one lab; one term

Prerequisite(s): HTHSCI 2FF3 and registration in the B.H.Sc. (Honours) program

HTHSCI 4G06 A/B S - SENIOR PROJECT IN GLOBAL HEALTH

A senior project focused on a Global Health topic, with possible experiential components, conducted under the direction and supervision of a suitable expert. Arrangements to register in HTHSCI 4G06 A/B S, including agreement of the supervisor, must be made before the end of March in Level III.

Two terms

Prerequisite(s): HTHSCI 2DS3, HTHSCI 3H03, and permission of BHSc (Honours) Program

Antirequisite(s): HTHSCI 4G09 A/B, 4G12 A/B, 4G15 A/B

HTHSCI 4G09 A/B S - THESIS IN GLOBAL HEALTH

A thesis-based research project focused on Global Health with experiential components, conducted under the direction and supervision of a suitable expert. Arrangements to register in HTHSCI 4G09 A/B S, including agreement of the supervisor, must be made before the end of March in Level III.

Two terms

Prerequisite(s): HTHSCI 2DS3, 3H03, and permission of BHSc (Honours) Program.

Antirequisite(s): HTHSCI 4G06 A/B, 4G12 A/B, 4G15 A/B

HTHSCI 4G12 A/B - THESIS IN GLOBAL HEALTH

A thesis-based research project focused on Global Health with experiential components, conducted under the direction and supervision of a suitable expert. Arrangements to register in HTHSCI 4G12 A/B, including agreement of the supervisor, must be made before the end of March in Level III.

Two terms

Prerequisite(s): HTHSCI 2DS3, HTHSCI 3H03, and permission of B.H.Sc. (Honours) Program

Antirequisite(s): HTHSCI 4G06 A/B, 4G09 A/B, 4G15 A/B

HTHSCI 4G15 A/B S - THESIS IN GLOBAL HEALTH

A thesis-based research project focused on Global Health with experiential components, conducted under the direction and supervision of a suitable expert. Arrangements to register in HTHSCI 4G15 A/B, including agreement of the supervisor, must be made before the end of March in Level III.

Two terms

Prerequisite(s): HTHSCI 2DS3, 3H03, and permission of B.H.Sc. (Honours) Program

Antirequisite(s): HTHSCI 4G06 A/B, 4G09 A/B, 4G12 A/B

HTHSCI 4IC3 - INTEGRATION OF CHILDREN'S PHYSICAL AND MENTAL HEALTH

This course will examine issues related to the intersection of physical and mental health within the context of child health.

Three hours; one term.

Prerequisite(s): Registration in Level IV or above in B.H.Sc. (Honours) or B.H.Sc. (Honours) Specializations or permission of instructor

HTHSCI 4ID3 - INNOVATION BY DESIGN

This course will enable interdisciplinary student groups to engage in design thinking as a methodology to assess health area problems/challenges, collect meaningful data, iterate alternative design options, and build a prototype solution for validation with user groups. Students will learn conceptual approaches to 'design thinking' and develop capabilities with spotting, supporting and scaling up new innovative ideas explored using a user-centered empathy focus.

Prerequisite(s): Registration in Level IV or above

HTHSCI 4II3 - ADVANCED CONCEPTS IN IMMUNOLOGY

This course will build on knowledge of the immune system and focus on the immune system in disease: allergy, inflammation, autoimmunity, immune deficiency, malignancy and cancer immunotherapy.

Two lectures, one tutorial; one term

Prerequisite(s): HTHSCI 3I03

HTHSCI 4J03 - IMMUNOLOGICAL PRINCIPLES IN PRACTICE

This advanced course applies problem-based learning to immunological problems. Topics concern development of immunoassays, resistance to infection and immunity in health and disease.

One session (three hours), one tutorial; one term

Prerequisite(s): HTHSCI 3I03; or permission of the instructor

Cross-list(s): BIOCHEM 4J03

HTHSCI 4JJ3 - BUILDING UNDERGRADUATE RESEARCH CAPACITY

This is a practical course for learning about how clinical professionals and researchers conduct their day-to-day research. Special topics may include research ethics, grant and proposal writing, managing multiple projects, the writing process.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) Program; or registration in Level III or above of the B.H.Sc. (Honours) Specializations; or permission of instructor

HTHSCI 4K03 - HUMAN PATHOPHYSIOLOGY

The course is designed to allow participants to think and solve problems in the area of physiology, pathophysiology and anatomy.

One lecture, one tutorial, one lab; one term

Prerequisite(s): HTHSCI 2FF3 or permission of the instructor

HTHSCI 4KK3 - PATHOPHYSIOLOGY OF INFECTIOUS DISEASES

This course is designed to provide an in depth look at the clinical, medical and pathophysiological aspects of infectious diseases. These fundamentals include taxonomy, diagnostic methodology, epidemiology and virulence factors of pathogens and pathophysiological events and responses in different body systems in human host as a result of infections.

One lecture, one tutorial, one lab; one term

Prerequisite(s): HTHSCI 2FF3

Offered in alternate years.

HTHSCI 4LA3 - INNOVATION BY DESIGN II

Student teams will apply design thinking methods and tools from Innovation by Design I to a

local issue. Organizations will provide a real health-related challenge they are currently facing,

and with the support of faculty, student teams will work directly with key stakeholders through

the design process. Emphasis will be placed on practicing design thinking as a component of

leadership skill development.

Prerequisite(s): HTHSCI 4ID3

HTHSCI 4LD3 - GLOBAL HEALTH GOVERNANCE, LAW AND POLITICS

This course surveys contemporary issues and debates in global health governance, law, and politics from an interdisciplinary perspective. Theory will converge with practice as students examine the historical development of global health, relevant actors and institutions, regulatory framework, principal coordinating mechanisms and emerging challenges to its effective governance.

Three hours, one tutorial; one term

Prerequisite(s): Registration in Level III or above in the B.H.Sc. (Honours) Program or Arts & Science Program or Bachelor of Health Sciences (Honours) - Global Health Specialization (B.H.Sc.); or permission of instructor

HTHSCI 4LL3 - INTEGRATED HEALTH SYSTEMS

Consideration of the issues inherent to the integration of current conventional medical approaches with other healing systems.

Three hours; one term

Prerequisite(s): Registration in Level III or above of the B.H.Sc. (Honours) Program; or registration in Level III or above of the B.H.Sc. (Honours) Specializations

HTHSCI 4M03 - ADVANCED CONCEPTS IN HEALTH PSYCHOLOGY

This course will explore the role of psychological factors in health and disease. Topics include stress, coping, health promoting/compromising behaviours, patient-physician communication, adherence, pain, heart disease and cancer.

Three hours; one term

Prerequisite(s): HTHSCI 1G03 or PSYCH 1F03, 1N03, or 1X03 and registration in Level III or above

Offered on alternate years.

HTHSCI 4MS3 - TOXIC TALES: THE SOCIAL LIVES OF MOLECULES

The molecular world in which we live influences our health, for better or worse. In addition to known poisons, even common drugs and nutrients can be toxic. Students will explore the complex social lives of such molecules to creatively blend the worlds of science and literature.

Three hours; one term

Prerequisite(s): Registration in Level III or above in any program and permission of the instructor

HTHSCI 4NN3 - WRITTEN COMMUNICATION IN HEALTH SCIENCES II

This course will be an advanced course in written communication, building on knowledge gained in Written Communication I. Students will explore and hone their writing skills in various forms.

Three hours; one term

Prerequisite(s): HTHSCI 3N03

HTHSCI 4NU3 - NUTRITION

Students will have an opportunity to learn about nutrition and diet from a functional medicine approach. Multiple learning methods will be used including lecture, class activities and a term long group project.

Three hours; one term.

Prerequisite(s): Registration in Level 3 or above in B.H.Sc. (Honours) or Level 3 or above in B.H.Sc. (Honours) Specializations

HTHSCI 4O03 - PRINCIPLES OF VIRUS PATHOGENESIS

Current theories and knowledge on mechanisms that relate to virus pathogenesis and evasion of host cell responses.

Two lectures, one tutorial; one term

Prerequisite(s): HTHSCI 3I03, 3K03 and registration in Level III or above

HTHSCI 4PA3 - GLOBAL HEALTH INNOVATION

Students will examine considerations, questions and challenges that govern the genesis, development and adoption of health innovation in low and middle income countries. There is an opportunity for students to build on their biomedical knowledge by applying interdisciplinary perspectives to a complex healthcare topic.

Three hours; one term

Prerequisite(s): Registration in Level III or above in B.H.Sc. (Honours) Program or Arts & Science Program or Bachelor of Health Sciences (Honours) - Global Health Specialization (B.H.Sc.), or permission of instructor

HTHSCI 4QQ3 A/B S - COMMUNICATION SKILLS PRACTICUM

An opportunity to explore pedagogy as it relates to best practice in education. Sessions arranged individually or in small groups; two terms

Prerequisite(s): Permission of the Assistant Dean, B.H.Sc. (Honours) program

HTHSCI 4R09 A/B - THESIS IN BIOMEDICAL SCIENCES

A thesis based on a major research project in biomedical sciences supervised by a member of the Faculty. Arrangements to register in HTHSCI 4R09 A/B, including agreement of the supervisor, must be made before the end of March in level III. Two terms

Prerequisite(s): Registration in Bachelor of Health Sciences (Honours) - Biomedical Sciences Specialization (B.H.Sc.) and permission of B.H.Sc. (Honours) Program

Antirequisite(s): HTHSCI 4R12 A/B S

HTHSCI 4R12 A/B S - THESIS IN BIOMEDICAL SCIENCES

A thesis based on a major research project in biomedical sciences supervised by a member of the Faculty. Arrangements to register in HTHSCI 4R12 A/B, including agreement of the supervisor, must be made before the end of March in level III. Two terms

Prerequisite(s): Registration in Bachelor of Health Sciences (Honours) - Biomedical Sciences Specialization (B.H.Sc.) and permission of the B.H.Sc. (Honours) program

Antirequisite(s): HTHSCI 4R09 A/B

HTHSCI 4SA3 - COMPETITIVE ADVANTAGE THROUGH PEOPLE

This course offers students an opportunity to develop skills that will enable them to manage emotional and risky situations through open dialogue and personal exploration. Students will learn how to get the best out of themselves and others.

Three hours; one term

Prerequisite(s): Registration in Level IV B.H.Sc. (Honours) or registration in Level IV of the B.H.Sc. (Honours) Specializations

HTHSCI 4SC3 - SOCIAL DETERMINANTS OF CHILD HEALTH

This course will examine issues related to social determinants within the context of child health.

Three hours; one term

Prerequisite(s): Registration of Level IV B.H.Sc. (Honours) or B.H.Sc. (Honours) Specializations or permission of instructor

HTHSCI 4SS6 A/B - GROUP PROCESS PRACTICUM

An opportunity to explore theory and apply concepts of group dynamics and processes as it relates to best practice education.

Sessions arranged individually or in small groups; two terms

Prerequisite(s): Permission of the Assistant Dean, B.H.Sc. (Honours) program

Antirequisite(s): HTHSCI 4AA3

HTHSCI 4TE3 - THE TEACHING HOSPITAL

This inquiry course will permit students to explore the evolution of the modern teaching hospital from its early days as bimaristans in medieval Persia to the modern global technological institutions that link patient care with the training of practitioners.

Three hours; one term

Prerequisite(s): Registration in Level III or above in any program and permission of the instructor

HTHSCI 4TT3 A/B S - RESEARCH PRACTICUM

An opportunity through peer tutoring and small group inquiry based learning to explore theory and apply concepts related to research and research ethics.

Three hours; two terms

Prerequisite(s): Registration in Level IV of the B.H.Sc. (Honours) Program or registration in Level IV of the B.H.Sc. (Honours) Specializations and permission of instructor.

HTHSCI 4W03 - SPECIAL TOPICS IN HEALTH SCIENCES II

This course provides an opportunity for individual or small groups to integrate concepts from their undergraduate courses.

Sessions arranged individually or in small groups; one term

Prerequisite(s): Permission of the Assistant Dean, B.H.Sc. (Honours) program
 HTHSCI 4W03 may be repeated, if on a different topic, to a total of six units.

HTHSCI 4WW3 A/B - EDUCATION PRACTICUM

This course will provide students with an opportunity to experience and gain theoretical knowledge of best practices in education as they relate to mentoring, building relationships, and critical pedagogy in community settings.

Three hours; two terms

Prerequisite(s): HTHSCI 3DD6 A/B, registration in Level IV and permission of instructor.

HTHSCI 4X03 A/B S - COLLABORATION AND PEER TUTORING

An important part of our responsibility in the program is to develop a learning community that incorporates the concepts of collaboration, peer tutoring and lifelong learning. This course will consist of three units to be taken over four years and will encourage these activities, both formally and informally.

Prerequisite(s): Registration in Level IV of the B.H.Sc. (Honours) program or registration in Level IV of the B.H.Sc. (Honours) Specializations

Antirequisite(s): INQUIRY 3S03, SCIENCE 2L03, 3S03, SOCSCI 2L03

HTHSCI 4XP3 A/B - PRAXIS PATHWAYS 4

This is the culmination of the longitudinal Praxis Pathways Curriculum, in which students enhance and deepen their capacities for: collaboration in community; group process; leadership; lifelong learning; perspective-taking; reflection and reflexivity; and self-care and wellness. The development of information literacy and critical analysis skills supports and informs these goals.

Eight hours per month; two terms

Prerequisite(s): Registration in Level IV of the B.H.Sc. (Honours) Program.

First offered in 2022-23

HTHSCI 4XX3 - PROFESSIONAL TRANSITIONS

This course will provide students with an opportunity to explore issues related to professionalism, the uncertainty of new directions, success/failure, choices, expectations and career challenges.

Three hours; one term

Prerequisite(s): Registration in Level IV in any Honours program

HTHSCI 4Y03 - SCIENCE, CULTURE AND IDENTITY

Through selected readings and discussion, this course will explore some critiques of science and will appraise the challenge they present to scientific authority. The course will culminate in the presentation of a research project on a question developed by students individually or in groups.

Three hours; one term

Prerequisite(s): Registration in Level III or above in the B.H.Sc. (Honours) Program, or Level III or above in the B.H.Sc. (Honours) Specialization; or registration in Level III or above of the Honours Integrated Science Program, Arts & Science; or registration in Level III or above in any Honours program and permission of the instructor.

HTHSCI 4YY3 - HEALTH FORUM PRACTICUM

Students will come to understand the types of decisions that can have an impact on health, the roles of different organizations involved in making these decisions and the types of influences on these decisions. To accomplish this, students will organize, prepare for, and participate in a variety of simulations, including: hospital, Local Health Integration Network and WHO board meetings, as well as provincial and federal cabinet meetings.

Three hours; one term

Prerequisite(s): Registration in Level III or above in the B.H.Sc. (Honours) Program, or Level III or above in the B.H.Sc. (Honours) Specialization; or registration in Level III or above of the Honours Integrated Science Program, Arts & Science;

or registration in Level III or above and HTHSCI 2DS3 or GLOBALZN 1A03; or permission of the instructor.

HTHSCI 4ZZ3 - GLOBAL HEALTH ADVOCACY

This course aims to foster appreciation for the complexity of today's most pressing global health challenges and the ways that various actors work to overcome them. Students will examine how individuals, organizations, and corporations advocate to national and international government organizations to tackle challenges that affect policy changes, and garner resources to address communicable and non-communicable diseases.

Three hours, one tutorial; one term

Prerequisite(s): Registration in Level III or above in the B.H.Sc. (Honours) Program, or Level III or above in the B.H.Sc. (Honours) Specialization; or registration in Level III or above of the Honours Integrated Science Program, Arts & Science; or registration in Level III or above in any Honours program and permission of the instructor

HEALTH SCIENCES (ENGINEERING, MIDWIFERY, NURSING)

Note

The following Health Sciences courses are normally available only to students registered in Engineering (Chemical Engineering and Bioengineering or Electrical and Biomedical Engineering), Midwifery, or B.Sc.N. (A), (B), (E) or (F) Streams, as applicable.

Courses

HTHSCI 1C06 A/B - WORKING ACROSS DIFFERENCE IN MIDWIFERY

This course draws on perspectives from sociology, anthropology, cultural studies and women's studies to explore the challenges and opportunities of working across differences of race, class, sexuality, ability (and other markers of difference) in midwifery care. The course will focus on developing and strengthening the skills required to work competently and compassionately across social and identity differences among and between midwives, midwifery clients and other health care providers.

Lectures/tutorials (three hours); both terms

Prerequisite(s): Registration in the Midwifery Program (B.H.Sc.)

HTHSCI 1CC6 - INTEGRATED BIOLOGICAL BASES OF NURSING PRACTICE I

Students will apply principles of cellular biology, biochemistry and human anatomy and physiology essential to the assessment and understanding of health care challenges.

Lecture (two hours), tutorial (two hours), online tutorial; one term

Prerequisite(s): Registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream

Antirequisite(s): HTHSCI 3BB3, KINESIOL 1Y03, KINESIOL 1YY3

HTHSCI 1D06 A/B - ANATOMY AND PHYSIOLOGY

This course covers basic concepts of human structure and function, genetics and embryology through lectures, demonstrations and appropriate laboratory assignments.

Lectures/tutorial (four hours), labs (two hours); both terms

Prerequisite(s): Registration in the Midwifery Program (B.H.Sc.)

Co-requisite(s): HTHSCI 1BS0 if not already completed

Antirequisite(s): BIOLOGY 1J03, 3U03, 3UU3, HTHSCI 2F03, 2FF3, KINESIOL 1A03, 1A06, 1AA3, 1X06, 1Y03, 1YY3, MEDPHYS 4XX3, SCIENCE 4XX3

HTHSCI 1H06 A/B - HUMAN ANATOMY AND PHYSIOLOGY I

An examination of structure-function relationships in the human body systems including the integument, nervous, musculoskeletal, endocrine, cardiovascular,

immune, respiratory, gastrointestinal, urinary and reproductive systems with an emphasis on the role of each system in maintaining homeostasis.

Lecture (one hour), lab (two hours); two terms

Prerequisite(s): Registration in the B.Sc.N. Basic (A) Stream

Antirequisite(s): BIOLOGY 2A03, HTHSCI 2L03, HTHSCI 2LL3, KINESIOL 1A03, KINESIOL 1AA3, KINESIOL 1Y03, KINESIOL 1YY3, MEDPHYS 4XX3

Co-requisite(s): WHMIS 1A00

HTHSCI 1J03 - LIFE SCIENCES FOR CLINICAL PRACTICE

This course provides an overview of basic concepts relating to chemistry, biochemistry and microbiology. Content areas will include practical applications of clinical chemistry, specimen collection, related disease entities and pathologies, and the significance of laboratory values.

One lecture (three hours) one lab (two hours); first term

Prerequisite(s): Registration in the Midwifery Program (B.H.Sc.)

Co-requisite(s): HTHSCI 1D06 A/B

Antirequisite(s): MIDWIF 1C03

HTHSCI 1LL3 - HUMAN BIOCHEMISTRY I

Introduction to proteins, DNA, RNA, chromosomes and their building blocks; gene expression; proteins, carbohydrates and fats as fuels in the production of energy for living, including nutritional aspects.

Lecture (two hours), tutorial (one hour); one term

Prerequisite(s): Registration in the B.Sc.N. Basic (A) Stream or permission of the instructor

Antirequisite(s): HTHSCI 1CC6

HTHSCI 2C06 - INTEGRATED BIOLOGICAL BASES OF NURSING PRACTICE II

Students will integrate concepts of pathophysiology and will include principles of microbiology and pharmacology essential to the assessment and understanding of health care challenges.

Lecture (three hours), tutorial (one hour), online tutorials (two hours); one term

Prerequisite(s): Minimum grade of C- in HTHSCI 1CC6 and registration in the B.Sc.N Post Diploma R.P.N. (E) Stream

Antirequisite(s): HTHSCI 2H03, HTHSCI 2HH3, KINESIOL 1Y03, KINESIOL 1YY3

HTHSCI 2H03 - INTRODUCTORY PHARMACOLOGY

An examination of the administration, distribution, action, metabolism and elimination of drugs generally and as related to specific systems.

Lecture/lab (two hours), tutorial (one hour); one term

Prerequisite(s): Minimum grade of C- in NURSING 1G03, 1J02, HTHSCI 1H06 A/B, 1LL3 and a Pass in NURSING 1K02 A/B and registration in the B.Sc.N. Basic (A) Stream; or registration in the B.Sc.N. Accelerated (F) Stream; or permission of the instructor

Antirequisite(s): HTHSCI 2C06

HTHSCI 2HH3 - INTRODUCTORY MICROBIOLOGY

An examination of the interactions of microbes in the human body including action, responses, treatment and prevention.

Lecture/lab (two hours), tutorial (one hour); one term

Prerequisite(s): Minimum grade of C- in NURSING 1G03, 1J02, HTHSCI 1H06 A/B, 1LL3 and a Pass in NURSING 1K02 A/B and registration in the B.Sc.N. Basic (A) Stream; or registration in the B.Sc.N. Accelerated (F) Stream; or permission of the instructor

Antirequisite(s): HTHSCI 2C06

HTHSCI 2L03 - ANATOMY AND PHYSIOLOGY I: COMMUNICATION

An examination of structure-function relationships in the human body systems that communicate with each other or the environment. The systems covered include:

endocrine, central nervous system, hearing, taste, smell, vision, autonomic nervous system, skin, peripheral nervous system, and locomotion (musculo-skeletal.)

Two lectures (one hour), clinical problem presentation (one hour), one lab (two hours); one term

Prerequisite(s): Registration in Chemical Engineering and Bioengineering or Electrical and Biomedical Engineering

Antirequisite(s): BIOLOGY 1J03, HTHSCI 1D06 A/B, 1H03, 1H06 A/B, 2F03, KINESIOL 1A03, 1A06, 1AA3, 1X06, 1Y03, 1YY3, MEDPHYS 4XX3

HTHSCI 2LA2 A/B - INTRODUCTION TO INTEGRATED PATHOPHYSIOLOGY FOR NURSING FOR BASIC STREAM

The course combines online multimedia learning modules with integrated tutorials in which students learn and apply basic pathophysiological concepts.

Tutorials (twelve one hour sessions), nine online multimedia modules; two terms

Prerequisite(s): Minimum grade of C- in NURSING 1G03, 1J02, HTHSCI 1H06 A/B, 1LL3 and a Pass in NURSING 1K02 A/B and registration in the B.Sc.N. Basic (A) Stream

Antirequisite(s): NURSING 2LA2 A/B

Co-requisite(s): NURSING 2NN3

HTHSCI 2LL3 - ANATOMY AND PHYSIOLOGY II: HOMEOSTASIS

An examination of structure-function relationships in the human body systems that are responsible for maintaining normal internal physiological conditions despite a changing environment. The systems covered include: cardiovascular, respiratory, immunology, gastrointestinal, nutrition, uro-genital, and renal.

Two lectures (one hour), clinical problem presentation (one hour), one lab (two hours); one term

Prerequisite(s): Registration in Chemical Engineering and Bioengineering or Electrical and Biomedical Engineering

Antirequisite(s): BIOLOGY 1J03, HTHSCI 1D06 A/B, 1H06 A/B, 1HH3, 2FF3, KINESIOL 1A03, 1A06, 1AA3, 1X06, 1Y03, 1YY3, MEDPHYS 4XX3

HTHSCI 2M03 - REPRODUCTIVE PHYSIOLOGY

This course emphasizes intrinsic and extrinsic methods of regulation of reproduction and also provides the basis for understanding alterations from normal mechanisms including the influence of medical conditions.

One tutorial (three hours); first term

Prerequisite(s): HTHSCI 1D06 A/B and registration in the Midwifery Program (B.H.Sc.)

Antirequisite(s): MIDWIF 2D03

HTHSCI 2PF3 A/B - INTRODUCTION TO INTEGRATED PATHOPHYSIOLOGY FOR ACCELERATED STREAM

The course combines online multimedia learning modules with integrated tutorials in which students learn and apply pathophysiological concepts.

Tutorial (eighteen one hour sessions), twelve online multimedia modules; two terms

Prerequisite(s): Registration in the B.Sc.N. Accelerated (F) Stream

Antirequisite(s): NURSING 2PF3 A/B

Co-requisite(s): NURSING 2I04

HTHSCI 2RR3 - INTRODUCTION TO THE SOCIAL DETERMINANTS OF HEALTH

This course provides an introduction to a number of macrohealth issues including determinants of health and political, economic and social factors that influence the organization of health care systems. This course introduces the biological, behavioural, social, economic and environmental factors that determine the health of populations. Major components to the course include: assessing health and socioeconomic status, understanding the structure and organization of the Canadian health care system, public policy, and several factors that affect health; such as, gender, income, work, & social exclusion.

Lecture (one hour), online education (one hour), guided self-study (one hour); one term

Prerequisite(s): Minimum grade of C- in NURSING 1G03, 1J02, HTHSCI 1H06 A/B, 1LL3 and a Pass in NURSING 1K02 A/B and registration in the B.Sc.N. Basic (A) Stream; or registration in the B.Sc.N. Accelerated (F) Stream; or registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream; or registration in Level II of the Midwifery Program (B.H.Sc.); or permission of the instructor

HTHSCI 2S03 - INTRODUCTION TO STATISTICS FOR NURSING

An introduction to basic parametric and non-parametric statistical methods, including their application to the analysis of data relevant to nursing and health-related research questions. Computer analysis of data using appropriate software (e.g., SPSS, Excel) and interpretation of the statistical results will also be an integral component of the course.

Lecture (two hours), tutorial (one hour); one term

Prerequisite(s): Minimum grade of C- in NURSING 1G03, 1J02, HTHSCI 1H06 A/B, 1LL3 and a Pass in NURSING 1K02 A/B and registration in the B.Sc.N. Basic (A) Stream; or registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream; or permission of the instructor

Antirequisite(s): COLLAB 2L03, COMMERCE 2QA3, HTHSCI 2A03, SOCSCI 2J03

HTHSCI 3BB3 - HUMAN BIOCHEMISTRY II: NUTRITION AND METABOLISM

This course will examine diet and exercise for health as well as biochemical processes in disease states. Nutritional requirements in different life stages and in prevalent disease states will also be discussed.

Lecture (two hours), tutorial (two hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2NN3, HTHSCI 2H03, 2HH3, 2RR3 and a minimum grade of C- in NURSING 2LA2 A/B or HTHSCI 2LA2 A/B and a Pass in NURSING 2K02 A/B, 2P03 and registration in the B.Sc.N. Basic (A) Stream; or permission of the instructor

Antirequisite(s): KINESIOL 1F03, LIFESCI 2N03

HTHSCI 3C04 - RESEARCH APPRAISAL AND UTILIZATION IN EVIDENCE INFORMED DECISION MAKING

Introduction to quantitative and qualitative designs with a focus on critical appraisal of evidence and application to nursing practice and healthcare.

Lecture/tutorial (three hours); one term

Prerequisite(s): Registration in the B.Sc.N. Accelerated (F) Stream; or registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream; or permission of the instructor

HTHSCI 3HN3 - PARTNERING WITH HAMILTON NEIGHBOURHOODS FOR HEALTH

This course brings together students from a variety of disciplines such as: nursing, geography, business, social work, health studies, engineering and health sciences to acquire and integrate knowledge of the principles of primary health care with a focus on intersectoral action and community participation, assets-based community development processes, ecosystems approaches to health, integrated knowledge exchange approaches with citizens, and population health interventions for healthier neighbourhoods and communities. While partnering with specific Hamilton neighbourhoods, students guided by faculty will work with neighbourhood planning groups to address specific issues for the development of healthy neighbourhoods and resilient communities.

Lecture/seminar/service learning (three hours); one term

Prerequisite(s): Registration in Level II or above; and permission of instructor
This course contains off-campus components.

HTHSCI 3PA2 A/B - INTEGRATED PATHOPHYSIOLOGY FOR NURSING

Building on the concepts encountered in NURSING/HTHSCI 2LA2 A/B, this course combines online multimedia learning modules with integrated tutorials in which students learn and apply pathophysiological concepts.

Tutorial (eighteen one hour sessions), twelve online multimedia modules; two terms

Prerequisite(s): Minimum grade of C- in NURSING 2NN3, HTHSCI 2H03, 2HH3, 2RR3, and a minimum grade of C- in NURSING 2LA2 A/B or HTHSCI 2LA2 A/B, and a Pass in NURSING 2K02 A/B, 2P03 and registration in the B.Sc.N. Basic (A); or a minimum grade of C- in NURSING 2AA3, 2T04, HTHSCI 2C06, 2RR3 and registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream

Antirequisite(s): NURSING 3PA2 A/B

Co-requisite(s): NURSING 3SS3 and 3TT3 or NURSING 3RS3 and 3RT3

HTHSCI 3PF1 - INTEGRATED PATHOPHYSIOLOGY FOR ACCELERATED STREAM

Building on the concepts encountered in NURSING/HTHSCI 2PF3 A/B, this course combines online multimedia learning modules with integrated tutorials in which students learn and apply pathophysiological concepts.

Tutorial (six one hour sessions); four online multimedia modules; one term

Prerequisite(s): Minimum grade of C- in NURSING 2V04, HTHSCI 2H03, 2HH3, 2RR3, 3C04 and a minimum grade of C- in NURSING 2PF3 A/B or HTHSCI 2PF3 A/B, and a Pass in NURSING 2J04 and registration in the B.Sc.N. Accelerated (F) Stream

Antirequisite(s): NURSING 3PF1

Co-requisite(s): NURSING 3V03

HTHSCI 4AR3 - NURSING RESEARCH PROJECT

This independent study course enhances the student's understanding of the research process through active engagement in clinical research, quality improvement, or patient safety research projects. Working alongside the researcher/faculty member and his/her research team, students have the opportunity to fully engage in scholarly research, which may include contributing to the writing of a proposal, collecting and/or analyzing data, and/or disseminating results. The student's plan of study is negotiated with the individual researcher/faculty member.

Thirty-six hours of research practicum plus independent study; one term

Prerequisite(s): Registration in Level II or above of any Stream of the B.Sc.N. Program; and permission of the instructor; and permission of the B.Sc.N. Programs Office.

This course may contain an off-campus component.

Students will not normally be permitted to apply more than two independent study or research project courses in the Health Sciences toward their elective requirements for the B.Sc.N. Program.

HTHSCI 4BR3 - INDEPENDENT STUDY

A non-clinical course in which special topics will be considered in depth under the supervision of a faculty member. The plan of study must be negotiated with the faculty member.

Thirty-six hours of independent study project/practicum; one term

Prerequisite(s): Registration in Level II or above of any Stream of the B.Sc.N. Program; and permission of the instructor; and permission of the B.Sc.N. Programs Office

This course may contain an off-campus components.

Students will not normally be permitted to apply more than two independent study or research project course in the Health Sciences toward their elective requirements for the B.Sc.N. Program.

HTHSCI 4DD6 A/B S - ADVANCED LEADERSHIP AND MANAGEMENT

This advanced course builds upon HTHSCI 4E06 content. It integrates theories and research in leadership and management to enhance health care provider's knowledge of key issues in today's workplace.

Tutorial or equivalent (four hours), independent study in an organization (six hours); one term

Prerequisite(s): HTHSCI 4E06 A/B S

Antirequisite(s): NURSING 4DD6 A/B S

HTHSCI 4E06 A/B S - LEADERSHIP AND MANAGEMENT

Theories and principles of leadership and management are applied to the health care disciplines.

Problem based tutorial or equivalent (four hours); independent study at a clinical site (six hours); one term

Prerequisite(s): A minimum of one year clinical work experience in a health care profession or permission of the instructor

Antirequisite(s): NURSING 4B06 A/B S

HTHSCI 4FF3 A/B S - INTEGRATIVE LEADERSHIP PROJECT

Students integrate learning and demonstrate a leadership role in addressing a real health care issue. Students work with both a tutor and a health care leader to address a mutually agreed upon leadership issue in the workplace.

Seminar and clinical lab (three hours); one term

Prerequisite(s): HTHSCI 4B06 A/B S, 4DD6 A/B S, 4I03 A/B S, 4HH3 A/B S, 4Z03 A/B S

Antirequisite(s): NURSING 4FF3 A/B S

HTHSCI 4HH3 A/B S - QUALITY MANAGEMENT

This course focuses on the role of leadership in quality management in health care organizations. Theories, concepts and best practices are utilized to examine issues in the health care work environments. Concepts include patient safety, safety culture, benchmarks and scorecards, program evaluation and risk/utilization management.

Lecture/seminar (three hours); one term

Prerequisite(s): Registered Nurse and permission of the instructor

Antirequisite(s): NURSING 4HH3 A/B S

HTHSCI 4I03 A/B S - LEADING INTERPROFESSIONAL TEAMS

This course introduces health care providers to the concepts and dynamics of teams within health care organizations. Theories and concepts related to leadership, communication and health systems are applied in the current work environment. Problem-based tutorial or equivalent (three hours); one term

Prerequisite(s): Health care professional and permission of the instructor

Antirequisite(s): NURSING 4I03 A/B S

HTHSCI 4NR3 - NURSING RESEARCH

This course is designed to enhance the student's understanding of the research process. Emphasis is placed on the students potential role as a research collaborator in projects related to professional practice.

Lecture (three hours), 24-30 hours research practicum; one term

Prerequisite(s): Minimum grade of C- in NURSING 3SS3, HTHSCI 2H03, 2HH3, 2RR3 and a minimum grade of C- in NURSING 2LA2 A/B or HTHSCI 2LA2 A/B, and a Pass in NURSING 2K02 A/B, 2P03, and registration in the B.Sc.N. Basic (A) Stream; or a minimum grade of C- in NURSING 3TT3, HTHSCI 2S03, and a minimum grade of C- in NURSING 3PA2 A/B or HTHSCI 3PA2 A/B, and Pass in NURSING 3Y04, 3Q03 and registration in the B.Sc.N. Post Diploma R.P.N. Stream; or minimum grade of C- in 3V03, and a minimum grade of C- in NURSING 3PF1 or HTHSCI 3PF1, and a Pass in NURSING 3ZB3, 3Q03, and registration in the B.Sc.N. Accelerated (F) Stream; or permission of the instructor

Antirequisite(s): HTHSCI 4L02

HTHSCI 4Z03 A/B S - CONFLICT MANAGEMENT

An introduction to the types and processes of conflict in health care organizations. Exploration and application of theories and principles of conflict and negotiations to situations in the health care environment.

Tutorial (three hours); one term

Prerequisite(s): A minimum of one year clinical work experience in a health care profession or permission of the instructor

Antirequisite(s): NURSING 4Z03 A/B S

HEBREW

Courses in Hebrew are administered by the Department of Religious Studies. University Hall, Room 123, ext. 23109

<http://religiousstudies.mcmaster.ca>

Department Notes

1. Students are advised to consult both the Department (University Hall, Room 123) and the Undergraduate Timetable for a list of the courses offered in the current year.
2. Students wishing to specialize in Biblical Studies should consider work in Greek or Hebrew or both (See Hebrew course offerings below, or course offerings under *Greek* in the *Course Listings* section of this Calendar). Students wishing to specialize in Judaism should consider coursework in Hebrew or German (see Hebrew course offerings below, or course offerings under the *German* headings in the *Course Listings* section of this Calendar).
3. Students pursuing the Interdisciplinary Minor in Jewish Studies are urged to take at least six units of Hebrew language as part of their List A requirements.

Courses

If no prerequisite is listed, the course is open.

HEBREW 2A03 - INTRODUCTION TO BIBLICAL HEBREW I

An introduction to the basics of grammar, syntax and vocabulary of the language of the Hebrew Bible. The student will begin to read in the Hebrew Bible.

Lectures and discussion (four hours); one term

Antirequisite(s): HEBREW 2A06

Cross-list(s): RELIGST 2HC3

HEBREW 2B03 - INTRODUCTION TO BIBLICAL HEBREW II

An introduction to more grammar, syntax and vocabulary of the language of the Hebrew Bible. The knowledge acquired should enable the student to read the simple prose and poetry of the Hebrew Bible.

Lectures and discussion (four hours); one term

Prerequisite(s): HEBREW 2A03 or permission of the instructor

Antirequisite(s): HEBREW 2A06

Cross-list(s): RELIGST 2HD3

HEBREW 3A03 - INTERMEDIATE HEBREW I

A reading course in classical (biblical) Hebrew. Sample texts will be read from some or all of the following: the Hebrew Bible, Mishnah, ancient Hebrew inscriptions and the Dead Sea Scrolls.

Four hours (two lectures); one term

Prerequisite(s): HEBREW 2B03 or permission of the instructor

Antirequisite(s): HEBREW 3A06

Cross-list(s): RELIGST 3HC3

HEBREW 3B03 - INTERMEDIATE HEBREW II

Further sample texts will be read from some or all of the following: the Hebrew Bible, the Mishnah, ancient inscriptions and the Dead Sea Scrolls.

Four hours (two lectures); one term

Prerequisite(s): HEBREW 2B03 or permission of the instructor

Antirequisite(s): HEBREW 3A06

Cross-list(s): RELIGST 3HD3

HISTORY

Courses in History are administered by the Department of History.

Chester New Hall, Room 619, ext. 24270

<http://history.humanities.mcmaster.ca/>

Note Regarding Level IV Seminars Level IV seminars are open only to students registered in Levels III or IV of an Honours History program. Enrollment will be limited to approximately 15 students per seminar. The Department is able to offer only a selection of the seminars listed below every year. Information on courses may be obtained from the Department. Seminar places will be allotted each March for the succeeding session; early application to the Department is essential.

Note Regarding Online Courses

Some courses will be available online, including the following:

- HISTORY 1DD3 - The Making of the Modern World, 1750-1945
- HISTORY 1M03 - History of Greece and Rome
- HISTORY 2A03 - Modern Middle Eastern Societies
- HISTORY 2CS3 - Caribbean Slavery in the Atlantic World
- HISTORY 2EE3 - Science and Technology in World History
- HISTORY 2SH3 - Canadian Sport History
- HISTORY 3H03 - Italian Renaissance, 1300-1600
- HISTORY 3HQ3 - History of Quebec
- HISTORY 3WW3 - Women in Canada and the U.S. from 1920
- HISTORY 3XX3 - Human Rights in History

Students should note, however, that not all of these courses will be available online every year.

Department Notes

1. The Department of History offers five Level I courses, each of which is designed to introduce the student to the study of History at the university level.
2. Not every History course listed in this Calendar is offered every year. Students should consult the Department of History web site (<http://history.humanities.mcmaster.ca/>) in March for a list of courses that will be offered in the following academic year.
3. Enrolment in any Level IV History seminar will be limited to approximately 15 students. Students must be registered in a Level III or IV Honours History program to enrol.
4. Students interested in Ancient History are advised to examine the courses offered by the Department of Classics.
5. Historical experiences are vast and varied across time periods, nations and identity groups. The Department of History recommends that students take courses that reflect the diverse experiences of different peoples in various time periods and geographical locations. As part of the Truth and Reconciliation process in Canada, the department also strongly recommends that students take courses that focus in whole or in part on the experiences of Indigenous peoples.

Courses

If no prerequisite is listed, the course is open.

HISTORY 1CC3 - THE RISE OF EMPIRES, 500-1950

A thematic survey of the interactions among peoples, cultures, and the environment as structured by evolving political and economic systems in the pre-modern era.

Lectures and tutorials (three hours); one term

Antirequisite(s): HISTORY 1B03

HISTORY 1DD3 - THE MAKING OF THE MODERN WORLD, 1750-1945

An introduction to themes of global oppression and resistance, trade and consumption, the movement of peoples and ideas, and environmental change across the 19th and 20th centuries.

Three hours (lectures and tutorials); one term

May be offered in person or online

HISTORY 1EE3 - THE HISTORICAL ROOTS OF CONTEMPORARY ISSUES

An investigation of the complex historical roots of contemporary social, political, and economic issues.

Lectures and tutorials (three hours); one term

HISTORY 1FF3 - EXPLORING HISTORY IN A SMALL GROUP SETTING

This small seminar is intended for Level I students with a strong interest in history. The discussion-based format will mirror the experience of studying history at a more senior level. Topics will vary, representative of the interests of the department's teaching staff.

Seminar (three hours); one term

Prerequisite(s): Registration in Humanities 1 or Social Sciences 1; and Grade 12 History, 3 units of Level I History, or permission of the department.

Antirequisite(s): HISTORY 2HI3

HISTORY 1M03 - HISTORY OF GREECE AND ROME

The history of Greece and Rome from the bronze age to the fall of Rome based on literary, documentary and archaeological evidence.

Two lectures, one tutorial; one term

Cross-list(s): CLASSICS 1M03 .

This course is administered by the Department of Classics. May be offered in person or online.

HISTORY 2A03 - MODERN MIDDLE EASTERN SOCIETIES

A survey of the political and cultural history of the Middle East from 1800 to the present, with emphasis on contemporary social problems emerging from post-WWI colonialism, nationalism, Islamism and Arab-Israeli relations.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): PEACEST 2F03

May be offered in person or online.

HISTORY 2CC3 - THE MEDIEVAL WORLD 400-1050

The Early Middle Ages: The barbarian kingdoms to the feudal monarchies.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2CS3 - CARIBBEAN SLAVERY IN THE ATLANTIC WORLD

This course explores the system of slavery in the Caribbean from the sixteenth to the nineteenth centuries within the context of the Atlantic World. It addresses such topics as slave resistance, the social, economic, and cultural consequences of slavery, and its abolition in the nineteenth century.

Three hours (two lectures, one tutorial); one term

Prerequisite(s): Registration in Level II or above

May be offered in person or online.

HISTORY 2DD3 - THE MEDIEVAL WORLD 1050-1400

The High and Late Middle Ages: Themes in European history, society and culture.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2DF3 - ART AND REVOLUTIONS IN FRANCE, 1789-1914

This course examines the intersections of visual culture and the political revolutions of 1789, 1830, 1848 and 1870, as well as stylistic innovations in art including Romanticism, Realism, Impressionism, Pointillism, Fauvism, and Cubism.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): ARTHIST 2DF3

HISTORY 2EE3 - SCIENCE AND TECHNOLOGY IN WORLD HISTORY

An introduction to the manner in which science and technology influence society and how society influences science and technology, paying particular attention to the transfer of knowledge and machines over time and between cultures.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above

May be offered in person or online.

HISTORY 2EN3 - CARIBBEAN HISTORY

This course considers the transition to freedom in the Caribbean from the late nineteenth century and the social, political, and cultural transformation of the region following the end of slavery.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): HISTORY 3RC3

HISTORY 2G03 - MODERN LATIN AMERICA SINCE 1820

Liberalism, nationalism, militarism and the various revolutions will be covered, as well as the U.S. role in Latin America and the Caribbean.

Three hours; one term

Prerequisite(s): Registration in Level II or above

HISTORY 2GR3 - A HISTORY OF MONSTERS

From Beowulf to the day after tomorrow, this course examines the cultural evolution of monsters, from the unknown to the forsaken to the darker corners of the self.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2H03 - TUDOR AND STUART BRITAIN, 1485-1714

This survey course examines a period of profound political, religious, economic and social change in Britain during the reigns of the Tudor and Stuart Dynasties.

Three hours; lectures and tutorial

Prerequisite(s): Registration in Level II or above

HISTORY 2HH3 - MEDITERRANEAN ENCOUNTERS 1500-1800

This course examines the Mediterranean region as a zone of intense cultural interaction. Particular emphasis will be given to the interaction between Christian, Jewish and Islamic societies.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): RELIGST 2FF3

HISTORY 2HI3 - HISTORICAL INQUIRY

An introduction to the systematic investigation of historical issues and problems in a small class setting. Topics will vary, representative of the interests of the department's teaching staff.

Seminar (three hours); one term

Prerequisite(s): Registration in Level II of an Honours program in History or permission of the department

Antirequisite(s): HISTORY 1FF3

HISTORY 2IC3 - ISLAMIC CIVILIZATION: THE FORMATIVE PERIOD, 500-1258

This course explores the relationship between religion and society in Islamic civilization and the special role of history in Islamic thought. It is designed to introduce students to early Islamic/Middle Eastern history and the texts of Islamic religion and law.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2II3 - MODERN GERMANY

This course examines the complexities of German social and political history since 1890, including World War One, Third Reich, cold war division, questions of national identity and the peaceful revolution of 1989.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): PEACEST 2II3

HISTORY 2J03 - AFRICA UP TO 1800

Survey of the political, social and economic history of Africa including the evolution of early human cultures, the rise and fall of civilizations and the contact between Africans and Europeans.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): PEACEST 2J03

HISTORY 2JJ3 - AFRICA SINCE 1800

Survey of the political, social and economic history of Africa including the partitioning of the continent, the practices of European imperialism, independence and the process of national building.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): PEACEST 2JJ3

HISTORY 2KK3 - HISTORY OF CAPITALISM

A History of Capitalism from 1500 to the present. This team-taught course introduces students to characteristics of capitalism, core institutions, and explanations for periodic crises. There are opportunities to read selections from leading proponents, agents, critics, and reformers. Essay topics will be negotiated with students, so that there will be an alignment with their programme/faculty.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II and above

Cross-list(s): IBH 2BF3

HISTORY 2MC3 - MODERN CHINA

A survey of China from 1840 to the present, with emphasis on political developments, revolutionary movements, social change, and China's relations with East Asia and the West.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2MM3 - BRITAIN IN THE MODERN ERA, 1800-2000

The political, social, economic and cultural history of Britain over the last two centuries, with particular attention to the domestic impact of the British imperial experience.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2Q03 - IMPERIAL RUSSIA

A survey of Russian history from Peter the Great to the Revolutions of 1917.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2QQ3 - THE SOVIET UNION

A history of the Soviet Union from 1917 to the present with an emphasis on social history, culture and identity.

Lectures and discussion (Three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2R03 - U.S. HISTORY TO THE CIVIL WAR

A survey of the political, cultural, social and economic development of the United States to 1877, from the colonial and revolutionary eras to the Civil War and Reconstruction.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2RR3 - U.S. HISTORY SINCE THE CIVIL WAR

A survey of the political, cultural, social and economic development of the United States from Reconstruction to the present.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2S03 - WAR IN THE WEST, 1850-1945

A survey of the development of warfare in the Western World from 1850 to 1945. Particular attention is paid to the two World Wars in the 20th century.

Three hours; one term

Prerequisite(s): Registration in Level II or above

HISTORY 2SH3 - CANADIAN SPORT HISTORY

An exploration of selected topics and themes in the history of sport in Canada.

Three hours (two lectures, one tutorial); one term

Prerequisite(s): Registration in Level II or above

May be offered in person or online.

HISTORY 2T03 - SURVEY OF CANADIAN HISTORY, BEGINNINGS TO 1885

A survey of the political, cultural, social and economic development of Canada to 1885, from first nations and colonial origins to Confederation and the North West Rebellion.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2TT3 - SURVEY OF CANADIAN HISTORY, 1885 TO THE PRESENT

A survey of the political, cultural, social and economic development of modern Canada, from the North West Rebellion and nation-building era to the present.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 2UV3 - AMERICAN FOREIGN RELATIONS SINCE 1898

Survey of major events and turning points of U.S. diplomatic history since the late 19th century. Emphasis on cultural dimensions of the American empire and selected historiographical controversies.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): PEACEST 2UV3

HISTORY 2V03 - RE-MAKING HISTORY

This course invites students to participate in the remaking of a moment in history in the emotions, debates and conflicts that made that event important for our twenty-first-century world. See the department website for this year's topic. The course will consist of lectures and experiential learning, individual and group assignments, and a weekend conference.

Prerequisite(s): Registration in Level II or above

HISTORY 2Y03 - THE SECOND WORLD WAR: A GLOBAL HISTORY

This course covers the origins, progress, and aftermath of the Second World War (1937-1949). It offers an introduction to the totality of these years, in which restrained violence obliterated the boundary between soldier and civilian.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

HISTORY 3CG3 - CANADIANS IN A GLOBAL AGE, 1914 TO THE PRESENT

This course considers ways in which global developments influenced and were influenced by Canadian peoples, with a thematic emphasis on selected developments such as wars and revolutions, the development of international alliances and organizations, and the spread of mass communication and consumer culture.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 3CH3 - CATASTROPHIC HISTORY: NATURAL & TECHNOLOGICAL DISASTERS

An examination of how natural and technological disasters have shaped past societies and how catastrophe features as an important method of understanding the human condition.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 3CP3 - THE CITIZEN-PATIENT: A MODERN HISTORY OF PUBLIC HEALTH, 1700-PRESENT

This course treats the origins of "public health", the notion of care for a population rather than the individual. It considers the histories of the citizen-patient in public hygiene, reproduction and population policies, health institutions, the health professions, European socialist schemes, and the legal regulation of medicine and pharmacy, through examples drawn from Europe, North America, and the Middle East.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 3CW3 - CANADA IN A WORLD OF EMPIRES, 1492-1919

A thematic exploration of the interactions of European and North American cultures and societies in the northern half of the continent, with special attention to the fate of European imperial projects, ideologies and institutions in the new world.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 3DD3 - JEWS AND JESUS

A study of Judaism in the Greco-Roman World. The course will explore selected questions in political history, the development of sects and parties, the role of the temple, apocalypticism and the Dead Sea Scrolls.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): RELIGST 3DD3

This course is administered by the Department of Religious Studies.

HISTORY 3DF3 - ART AND POLITICS IN SECOND EMPIRE FRANCE

This course examines the intersections of politics and visual culture in France 1852-1870 and critical issues related to photography, painting, sculpture, printmaking, architecture and the Universal Expositions of 1855 and 1867.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): ARTHIST 3J03

Cross-list(s): ARTHIST 3DF3

HISTORY 3EC3 - CHINESE INTELLECTUAL TRADITIONS

A survey of philosophical traditions and political thought in pre-modern Chinese history.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

HISTORY 3FF3 - NAZI GERMANY

This course examines the origins and growth of National Socialism, its twelve years in power and the war that led to its demise. Themes under consideration will also include daily life in Germany in the 1930s and the Holocaust.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 3GH3 - INTERDISCIPLINARY GLOBAL HEALTH FIELD COURSE: MATERNAL AND INFANT HEALTH IN MOROCCO

This global health field course provides an integrated linguistic, cultural, historical, and public health experience in Morocco. It introduces students to the determinants of health in the third world and considers social, religious, epidemiological, economic, technological, legal, historical, and family issues that impact birth, pregnancy, women's health, and health of newborns and children.

Spring; one term

Prerequisite(s): Permission of the instructor

Co-requisite(s): ARABIC 3GH3

Cross-list(s): ANTHROP 3GH3, RELIGST 3GH3

Available as a study-abroad experience in the Spring only. This course is intended for students who are entering Level III or above in the following Fall/Winter Session. Students interested in this course must contact Dr. E. Amster by February 15 for application instructions. There is an additional cost associated with this course.

HISTORY 3H03 - ITALIAN RENAISSANCE, 1300-1600

An examination of the nature and influence of one of the most important cultural episodes in European history. Topics will include the Italian merchant and urban life, political culture, humanism, art and architecture.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

May be offered in person or online.

HISTORY 3H13 - ADVANCED HISTORICAL INQUIRY

In-depth investigation of historical issues and problems in a small class setting. Topics will vary, representative of the interests of the department's teaching staff. Seminar (three hours); one term

Prerequisite(s): One of HISTORY 1FF3, 2H13; and registration in Level III of an Honours program in History; or permission of the department

HISTORY 3HQ3 - HISTORY OF QUEBEC

This course is a lecture-seminar survey of Quebec history from the British Conquest of 1760 to the present. Topics to be covered include Quebec's place in a new empire, colonial society and economy, the rise of political protest, rebellion, and nationalism, the role of key institutions such as the Catholic Church, the industrialization of Quebec, and the postwar modernization of state and society. Students will engage in seminar discussions and be expected to complete a number of written assignments stressing critical and analytical skills.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above

May be offered in person or online.

HISTORY 3I03 - THE INTERNATIONAL RELATIONS OF THE EUROPEAN POWERS, 1870-1945

An examination of the origins and course of the First World War; the failure of post-war stabilization; and the origins and course of the Second World War.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

HISTORY 3J03 - THE UNITED STATES IN THE 1960S

An examination of the political, social and cultural changes that occurred in the United States during the 1960s. Topics include the civil rights struggle, Black Power movement, New Left, opposition to the Vietnam War, counterculture, feminism and the conservative backlash.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 3JJ3 - CRIME, CRIMINAL JUSTICE AND PUNISHMENT IN MODERN HISTORY

A study of the changing face of the institutions of criminal justice and of criminal behaviour, as revealed in statistical and conventional historical works. The focus will be on North America, Great Britain and France.

Three lectures; one term

Prerequisite(s): Registration in Level II or above, with a minimum of six units of History

HISTORY 3KK3 - THE VIETNAM WAR

The history of the First and Second Indochina Wars (1945-1973) is examined from multiple perspectives. Explores how and why the war was fought, as well as its global legacy.

Prerequisite(s): Registration in Level II or above

Antirequisite(s): PEACEST 3KK3

HISTORY 3N03 - POVERTY, PRIVILEGE AND PROTEST IN CANADIAN HISTORY

An examination of the political, economic, and social factors shaping the persistence of poverty in Canada in the 1800s and 1900s, together with an analysis of reactions to such inequality. This includes investigation of ideological divisions, ethnic relations, and gender dynamics within the working class and within the labour movement.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): IBH 3BC3

HISTORY 3RU3 - EARLY MODERN RUSSIA

This course explores the changing character of Russia in the pre-modern period. It provides an important foundation for later courses on Imperial and Soviet history. Lecture and discussion (three hours)

Prerequisite(s): Registration at Level II or above

HISTORY 3S03 - HISTORY OF EXERCISE AND SPORTS MEDICINE

Selected topics in the social and cultural history of exercise and sports medicine in the Western World, with an emphasis on the 19th- and 20th-century developments in North America.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above

Antirequisite(s): KINESIOL 3A03

Not open to students registered in a Kinesiology program.

HISTORY 3UA3 - THE HISTORY OF THE FUTURE

This course examines how technology has historically shaped social ideas about the future and how these social ideas about the future shaped subsequent technology. Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

HISTORY 3W03 - WOMEN IN CANADA AND THE U.S. TO 1920

This course examines key areas of women's history, such as indigenous cultures, slavery, immigration, religion, witchcraft, the family, sexuality, paid and unpaid labour and the first wave of the women's movement.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): WOMENST 3G03

HISTORY 3WW3 - WOMEN IN CANADA AND THE U.S. FROM 1920

This course examines key areas of women's history, such as the impact of the Great Depression and the Second World War, the civil rights movement, the sexual revolution and the second wave of the women's movement.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): WOMENST 3GG3

May be offered in person or online.

HISTORY 3XX3 - HUMAN RIGHTS IN HISTORY

A thematic examination of the global historical evolution of the notion of human rights from antiquity up to the Universal Declaration of Human Rights in the 20th century.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): PEACEST 3XX3

May be offered in person or online.

HISTORY 3YY3 - BRITAIN AND THE FIRST WORLD WAR

This course is designed to be an in-depth thematic exploration of the British experience of the First World War. Military, political, social, economic, technological and cultural issues and concerns will be considered.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): PEACEST 3YY3

HISTORY 3Z33 - JUDAISM IN THE MODERN WORLD

Jews and Judaism in a century of catastrophe and renewal. The progress of Emancipation; Jews in Canada and the U.S.; the Jewish catastrophe in Europe; the Jewish identities in literature and the arts.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): RELIGST 2XX3

Cross-list(s): RELIGST 3Z33

This course is administered by the Department of Religious Studies.

HISTORY 4AW3 - NORTH ATLANTIC CROSSINGS, 1750-1940

This course focuses on the cultural and intellectual interplay between Britain, Canada, and the United States, focusing on the contexts of Enlightenment; the effect of transatlantic revolution; the rise of evangelicalism; the Darwinian revolution; and the differing origins and outcomes of the 'progressive' impulse.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4CE3 - EARLY CANADIAN HISTORY

Selected them in early Canadian history. Information on the precise focus of the seminar may be obtained in the Department each February.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4CM3 - MODERN CANADIAN HISTORY

A selected theme in the history of modern Canada. Information on the precise focus of the seminar may be obtained in the Department each February.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4CZ3 - ADVANCED RESEARCH IN EARLY CANADIAN HISTORY

The focus of this course is on the formulation and execution of an original research paper on a topic related to early Canadian history.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4E03 - MEDIEVAL PEOPLE

An examination of some representative medieval lives. Figures discussed may include the abbess Hildegard of Bingen, the scholars and lovers Heloise and Abelard, the knight William Marshall, and the 'Good Wife' of the Magier de Paris.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4FF3 - HISTORY OF HEALTH AND MEDICINE

Themes will vary, and may include health and medicine from a comparative perspective, the relationship between imperialism and medicine, public health and urban environment, exercise and health.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4G03 - NATION AND GENOCIDE IN THE MODERN WORLD

A thematic study of genocide and mass murder in the twentieth century from a human rights and humanitarian law perspective. The first part of the course covers the theoretical and legal aspects of genocide studies. The second part explores specific case studies of colonial massacres, the Holocaust, and the Cambodian and Rwanda genocides.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History or Peace Studies

Cross-list(s): PEACEST 4GG3

Departmental permission required.

HISTORY 4H03 - THE MAKING OF MODERN CHINA

An exploration of changes and continuities in 19th - and 20th -century China.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4HH3 - CHINA'S GREAT CULTURAL REVOLUTION

A critical assessment of the origins, development, and consequences of the darkest political campaign in 1960s-70s China.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4HP3 - THE HISTORY PRACTICUM

The history practicum offers a capstone experience for upper-level students. It is an opportunity for experiential learning in the field of history. Selected students will work closely with a supervisor on an ongoing historical project at one of Hamilton's many heritage sites.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV or above of any Honours program in History

Antirequisite(s): HISTORY 3HP3

Departmental permission required.

HISTORY 4I03 - WOMEN AND SOCIAL MOVEMENTS IN THE 19TH- AND 20TH- CENTURY UNITED STATES

Women's involvement in social movements such as anti-lynching, unionization, feminism and civil rights is used to discuss power, social change, race, femininity, masculinity and class in U.S. history.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4JJ3 - U.S. FOREIGN RELATIONS

Topics in the history of the United States Foreign relations in the modern era.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4K03 - ENVIRONMENT AND ENVIRONMENTALISM IN MODERN NORTH AMERICA

Explores how different social groups in the United States and Canada confronted the sometimes adverse impact of urban and industrial growth on the physical environment of their communities.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4KK3 - RESEARCH ON THE BRITISH ATLANTIC, 1750-1850

This seminar course will generate research projects on topics ranging from the political, cultural, and social impacts of the American Revolution on Atlantic societies, the nature of Atlantic slavery in an age of emancipation, the nature of counter-revolutionary impulses, and the creation of new settler societies after the American Revolution.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4L03 - THE CULTURAL HISTORY OF MODERN LONDON

Topics to be examined include: London as centre of empire; sexuality and urban spectatorship; housing and transportation; architectural controversy and governance issues; leisure activities and neighbourhood life.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4LJ3 - LAW, ORDER AND JUSTICE IN CANADA, 1800-2000

This research seminar examines criminal justice in Canada from colonial to recent times. Topics include criminal codes, court structure, rules of evidence, jury reforms, summary justice, police, punishments, and prominent trials.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4LP3 - THE CULTURAL HISTORY OF PARIS, 1789-1914

Topics to be examined include: developments in architecture and city planning; the conservation of historic buildings and monuments; cultural institutions such

as museums and art exhibitions; and the impact of gender, race and economics on experiences and concepts of identity in France's capital.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History

Cross-list(s): ARTHIST 4LP3

Departmental permission required.

HISTORY 4MM3 - WHITE SUPREMACISTS AND HUMAN RIGHTS ACTIVISTS IN MODERN CANADIAN HISTORY

This course examines the prejudice and discrimination targeting racialized groups such as Indigenous Peoples,

African Canadians, Asian immigrants, Jews, and immigrants from Southern and Eastern Europe. The course also examines human rights activism.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History

Antirequisite(s): HISTORY 4A06 A/B

Departmental permission required.

HISTORY 4NN3 - UTOPIA AND ITS HISTORIES

We remain fascinated with competing ideas of what constitutes an ideal society.

This seminar explores

changes and continuities in western ideas of utopia and dystopia over the past 500 years.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4P03 - CONTEMPORARY EUROPE

Topics in the history of Europe during the 20th Century.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4PP3 - DIVIDED GERMANY

This seminar will examine the social, political, and cultural development of East and West Germany from Allied occupation to the fall of the Berlin Wall.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4QQ3 - THE SOVIET EXPERIENCE

Focuses on themes and issues of historical and historiographical importance in Russia from 1917.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4QR3 - QUANTITATIVE RESEARCH ON MAJOR TOPICS IN HISTORY

A study of selected major topics where statistics have been prominent (for example, the emergence of modern economies, the slave trade, class and wealth, local and regional studies, crime); assessment of statistical evidence; collecting and analyzing data for a research paper.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History.
Departmental permission required.

HISTORY 4RP3 - INDEPENDENT RESEARCH PROJECT

A reading and/or research program under the supervision of one member of the Department. A major paper is required, as well as a formal oral examination.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History with a Grade Point Average of at least 9.0

Antirequisite(s): HISTORY 4RP6 A/B

Departmental permission required.

HISTORY 4RP6 A/B - ADVANCED INDEPENDENT RESEARCH

A reading and research program under the supervision of one member of the Department. A major paper is required, as well as a formal oral examination.

Seminar (two hours); two terms

Prerequisite(s): Registration in Level III or IV of any Honours program in History with a Grade Point Average of at least 10.0

Antirequisite(s): HISTORY 4RP3

Departmental permission required.

HISTORY 4S03 - THE GERMAN REFORMATION

This course examines the Reformation as a critical religious, political and cultural event. Topics include Lutheran and Calvinist theology, gender, confessionalization and the role of printing.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4SC3 - SPORT AND CULTURE

Themes and topics critically examining issues in sport historiography. Topics include: masculinities, social class, race, and gender construction; nationalisms; place, space, and aesthetics; clubs, class and citizenship; hegemonic sport; and sport, meaning, and representation, among other things.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4SS3 - EARLY MODERN FRANCE, 1450-1789

France was without question one of the most powerful polities in early modern Europe and serves as a useful focal point for understanding the emergence of absolutism, colonization, imperialism, urbanization and changing gender and social roles.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Departmental permission required.

HISTORY 4YY6 A/B - THE WORLD WARS

An examination of the two world wars of the twentieth century. Topics may include the military, political, social, economic and intellectual history of the conflicts.

Seminar (two hours); two terms

Prerequisite(s): Registration in Level III or IV of any Honours program in History
Antirequisite(s): HISTORY 4Y06

Departmental permission required.

HUMAN BEHAVIOUR

Courses in HUMBEHV are administered by the Department of Psychology, Neuroscience & Behaviour.

Psychology Building, Room 102, ext. 23000

<http://www.science.mcmaster.ca/pnb/>

Courses

If no prerequisite is listed, the course is open.

See also courses in *PSYCH*.

HUMBEHV 2A06 A/B - INTRODUCTION TO AUTISM SPECTRUM DISORDER (ASD)

Apply neurodevelopmental and behavioural characteristics to Autism Spectrum Disorder (ASD) and its core features and diagnostic criteria. This course provides an introduction to understanding individuals with ASD.

Three hour lectures; two terms

Prerequisite(s): Registration in Level II or above of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 2B06 A/B - INTRODUCTION TO APPLIED BEHAVIOUR ANALYSIS (ABA) I

Apply principles of behaviour analysis. Access and interpret journal publications in the field of autism and applied behaviour analysis.

Three lectures; two terms

Prerequisite(s): Registration in Level II or above of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 2C03 - SPECIALIZED INSTRUCTIONAL STRATEGIES (SIS) I

Analyze evidence-based behavioural approaches to teaching individuals with autism new skills.

Three hour lectures; one term

Prerequisite(s): Registration in Level II or above of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 2FP6 - FIELD PLACEMENT I

Experience 126 hours in the field working within individuals with Autism Spectrum Disorder or other behavioural challenges.

This course is evaluated on a Pass/Fail basis.

Placement (126 hours); Spring/Summer Term

Prerequisite(s): HUMBEHV 2A06 A/B, 2B06 A/B, 2C03 and completion or registration in HUMBEHV 3F03

Co-requisite(s): HUMBEHV 2FS3

HUMBEHV 2FS3 - FIELD PLACEMENT I SEMINAR

Seminar to be taken concurrently with Field Placement I, HUMBEHV 2FP6.

Online seminar/discussion (two hours); Spring/Summer term

Co-requisite(s): HUMBEHV 2FP6

HUMBEHV 2HB0 - HUMAN BEHAVIOUR PROFESSIONAL DEVELOPMENT

A professional development course supplementing the Bachelor of Applied Science in Human Behaviour program which must be completed prior to Level III. *This course is evaluated on a Pass/Fail basis.*

One lecture; one term

Prerequisite(s): Registration in Level II of a B.A.Sc. in Human Behaviour program

HUMBEHV 2L03 - ECE CURRICULUM I

Examine and evaluate the impact of personal beliefs and values in regard to professional practice with children, families and communities. Utilize theories of curriculum to examine the interests and intelligence of children.

Lectures, may include blended content (three hours); one term

Prerequisite(s): Registration in Level II or above of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMBEHV 2M03 - LEARNING ENVIRONMENT I

Plan, organize, implement and evaluate program ideas and activities. Develop a repertoire of resources by setting up an engaging learning environment.

Lectures, may include blended content (three hours); one term

Prerequisite(s): Registration in Level II or above of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMBEHV 2TL3 - RESPONSIVE CARE FOR INFANTS AND TODDLERS

In this course, students will explore positive and responsive communications with infants and toddlers. Students will design appropriate environments based on developmentally appropriate practices.

Lectures, may include blended content (three hours); one term

Prerequisite(s): Registration in Level II or above of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMBEHV 2XP6 - PROFESSIONAL PRACTICE I

Apply knowledge, skills and ethics in a professional practice environment while working with individuals with autism or behavioural needs or their caregivers.

This course is evaluated on a Pass/Fail basis.

Professional practice (144 hours); Session I, Spring/Summer Term

Prerequisite(s): HUMBEHV 2L03, 2M03, 2TL3

Co-requisite(s): HUMBEHV 3XS3

HUMBEHV 3CB3 - TREATING CHALLENGING BEHAVIOUR I

Students will learn theory behind assessing/analyzing why people engage in problem behaviours. Emphasis will be placed on ethical considerations based on the BACB ethical code.

Three lectures, tutorial (two hours); one term

Prerequisite(s): HUMBEHV 2B06 A/B, 3F03

Antirequisite(s): HUMBEHV 4K06 A/B

HUMBEHV 3D03 - APPLIED BEHAVIOURAL ANALYSIS (ABA) II

Apply principles of behaviour analysis. Access and interpret journal publications in the field of autism and applied behaviour analysis.

Three hour lecture; one term

Prerequisite(s): HUMBEHV 2B06 A/B and registration in Level III or above of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 3E06 A/B - BEHAVIOURAL SKILL BUILDING

This course focuses on curriculum development with an emphasis on speech and language, social and play skills, personal care skills and inclusion into less restrictive environments.

Three hour lecture; two terms

Prerequisite(s): Registration in Level III or above of the B.A. Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 3F03 - ETHICS AND PROFESSIONALISM

This course will introduce the foundations of ethical thinking and will review the different perspectives and rationale for ethical decision making within a behavioural framework.

On-line lecture/discussions (three hours); one term

Prerequisite(s): Registration in Level III or above of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 3FP9 - FIELD PLACEMENT II

The placement will consist of 210 hours of participation in an ABA / IBI program for children with ASD. The student will further develop their technical skills through application of their knowledge gained in the prerequisite courses. In addition to implementing a further range of treatment plans, students will be required to critically evaluate ongoing interventions within the placement.

This course is evaluated on a Pass/Fail basis.

Placement (210 hours); Spring/Summer Term

Prerequisite(s): HUMBEHV 3E06 A/B, 3G03

Co-requisite(s): HUMBEHV 3FS3

HUMBEHV 3FS3 - FIELD PLACEMENT II SEMINAR

Seminar to be taken concurrently with Field Placement II, HUMBEHV 3FP9.

Online seminar/discussion (two hours); Spring/Summer term

Co-requisite(s): HUMBEHV 3FP9

HUMBEHV 3G03 - SPECIALIZED INSTRUCTIONAL STRATEGIES (SIS) II

This course introduces the student to evidence-based behavioural approaches applied in teaching individuals with autism. Topics will be approached by providing the student with an understanding of the terms used, a description of the teaching techniques characterized in each of the models (where applicable) and a basic understanding of the conceptual elements motivating the approaches.

Three hour lecture; one term

Prerequisite(s): HUMBEHV 2C03 and registration in Level III or above of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 3H03 - WORKING WITH FAMILIES AND TEAMS

This course presents the student with theories, terminology and applications underlying current approaches to teamwork and working with the families of children with Autism Spectrum Disorders. The focus will be on effective collaboration with a multi-disciplinary team, which is essential to successful intensive behavioural intervention. Students will develop the interpersonal, job-oriented skills necessary to problem-solve as team members in a flexible, empathetic, resourceful, and productive manner.

Three hour lecture; one term

Prerequisite(s): Registration in Level III or above of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 3IP3 A/B S - INQUIRY PROJECT

Students will explore a topic of their choosing under the supervision of an approved faculty member. Over the course of their project, students will develop the skills necessary to systematically investigate and assess an existing body of empirical literature.

Prerequisite(s): Registration in Level III or above of an Honours Human Behaviour (B.A.Sc.) program and permission of faculty supervisor and program director

Not open to students with credit in PNB 3Q03.

HUMBEHV 3MD3 - RESEARCH METHODS FOR HUMAN BEHAVIOUR

This course will give students an overview of how to think empirically, and of the methods psychologists use to study behavior.

Three lectures, one tutorial; one term

Prerequisite(s): Registration in Level III or above of an Honours Human Behaviour (B.A.Sc.) program

Antirequisite(s): PNB 3RM3

First offered in 2020-2021.

HUMBEHV 3003 - ECE CURRICULUM II

Integrate and evaluate various curricula and theories of early learning. Reflect on the impact of diverse beliefs and values systems and the role in curriculum development.

Lectures, may include blended content (three hours); one term

Prerequisite(s): HUMBEHV 2L03 and registration in Level III or above of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMBEHV 3P03 - LEARNING ENVIRONMENT II

Recognizing that children's interests and abilities are key components of effective learning environments, develop advanced skills in planning curriculum for children. Plan developmentally appropriate activities.

Lectures, may include blended content (three hours); one term

Prerequisite(s): HUMBEHV 2M03 and registration in Level III or above of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMBEHV 3Q03 - HEALTH, SAFETY & NUTRITION

Apply the basic principles of health, safety & nutrition in young children. Transfer the principles of health policies and practices to situations in child care settings.

Lectures, may include blended content (two hours); one term

Prerequisite(s): Registration in Level III or above of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMBEHV 3RS3 - ABA RESEARCH DESIGNS

This course will prepare students on how to conduct research using an ABA framework. A focus will be on how to conduct and draw conclusions based on single subject designs.

Three lectures; one term

Prerequisite(s): HUMBEHV 2B06 A/B

First offered 2020-2021.

HUMBEHV 3ST3 - STATISTICS FOR HUMAN BEHAVIOUR

This course will give students an overview of descriptive and inferential statistics as applied in psychology.

Three lectures; one term

Prerequisite(s): Registration in Level III or above of an Honours Human Behaviour (B.A.Sc.) program

Antirequisite(s): HUMBEHV 3HB3, SOCSCI 2J03

Not open to students with credit or registration in STATS 2B03, PNB 2XE3, 3XE3, ARTSSCI 2R03, COMMERCE 2QA3, or HTHSCI 2A03.

HUMBEHV 3XP6 - ECE FIELD PLACEMENT II

Building on previous experience, students will participate in early learning environments through field placement. Outcomes of this course are to expand the students teaching techniques and to provide opportunities for practical application of program related content.

This course is evaluated on a Pass/Fail basis.

Professional practice (144 hours); Session II, Spring/Summer Term

Prerequisite(s): HUMBEHV 2XP6

Co-requisite(s): HUMBEHV 3XS3

HUMBEHV 3XS3 - THEORY TO PRACTICE I AND II

Students will be supported throughout their field placement experience. Pedagogy for the Early Years with focus on the four foundations: belonging, well-being, engagement, and expression.

Online lecture/discussions (two hours); Spring/Summer Term

Co-requisite(s): HUMBEHV 2XP6, 3XP6

HUMBEHV 4CB3 - TREATING CHALLENGING BEHAVIOUR II

Students will learn how to develop intervention plans for individuals engaging in problem behaviours. Emphasis will be placed on utilizing the least intrusive, least restrictive and most effective treatment.

Lecture (three hours), tutorial (two hours); one term

Prerequisite(s): HUMBEHV 3CB3

Antirequisite(s): HUMBEHV 4K06 A/B

HUMBEHV 4HB3 - SEMINAR I FOR HONOURS HUMAN BEHAVIOUR (B.A.Sc.)

This course provides students with an opportunity to develop skills for investigations in selected areas of human behaviour.

Seminar and discussion (three hours); one term

Prerequisite(s): Registration in Level IV of an Honours Human Behaviour (B.A.Sc.) program

HUMBEHV 4HC3 - SEMINAR II FOR HONOURS HUMAN BEHAVIOUR (B.A.Sc.)

This course provides students with an opportunity to develop skills for investigations in selected areas of human behaviour.

Seminar and discussion (three hours); one term

Prerequisite(s): Registration in Level IV of an Honours Human Behaviour (B.A.Sc.) program

HUMBEHV 4I03 - PARENT AND STAFF TRAINING

Students will learn and practice techniques for individual and group presentation formats for the training of families or professionals. Students will also learn how to maintain procedural integrity, use performance feedback, evaluate the effects of training, and understand the challenges that may impact before, during and after mediator training. Emphasis will be placed on in-class presentations and role-play practice.

Lectures, may include blended content (three hours); one term

Prerequisite(s): Registration in Level IV of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 4IP3 A/B S - SENIOR INQUIRY PROJECT

Students will explore a topic of their choosing under the supervision of an approved faculty member. Over the course of their project, students will develop the skills necessary to systematically investigate and assess an existing body of empirical literature.

Prerequisite(s): Registration in Level IV of an Honours Human Behaviour (B.A.Sc.) program and permission of faculty supervisor and program director. Students are expected to have a minimum GPA of 8.0. Cannot be taken concurrently with HUMBEHV 3IP3 A/B, S.

Not open to students with credit or registration in HUMBEHV 4RP6 A/B, PNB 3Q03, 4Q03.

HUMBEHV 4J03 - TRANSITION PLANNING AND IMPLEMENTATION

This course will prepare the student for assisting in planning and mediating transitions for children with ASD within and across home, school and community settings.

Three lectures (may include blended content); one term

Prerequisite(s): Registration in Level IV of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

HUMBEHV 4K06 A/B - TREATING CHALLENGING BEHAVIOUR

Analyze and apply functional behavioural assessment strategies to individuals with behaviour problems. Emphasis will be placed on ethical considerations such as the utilization of the least intrusive, least restrictive model and effective treatment.

Three lectures, one tutorial (two hours); two terms

Prerequisite(s): Registration in Level IV of the B.A.Sc. in Human Behaviour (Autism & Behavioural Science Specialization) program

Not open to students with credit or registration in HUMBEHV 3CB3 or 4CB3.

HUMBEHV 4N03 - PRINCIPLES OF ETHICAL PRACTICE

Apply principles of fairness, equity and diversity to support the development and learning of children, within the context of their family, culture and society. Examine professional ethics and partnership practices as it relates to working with children and families.

Lectures, may include blended content (three hours); one term

Prerequisite(s): Registration in IV of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMBEHV 4RP6 A/B - INDEPENDENT RESEARCH PROJECT

Students will explore a topic of their choosing under the supervision of a faculty member by systematically investigating an existing body of empirical literature or data set to produce a major scholarly work.

For information and guidelines regarding this course, refer to the department web site at: <http://www.science.mcmaster.ca/pnb/undergraduate/courses.html> and click on HUMBEHV 4RP6 A/B, or contact the program director.

Prerequisite(s): Registration in Level IV of an Honours Human Behaviour (B.A.Sc.) program and permission of the faculty supervisor and program director. Students are expected to have a minimum GPA of 10.0.

Cannot be taken concurrently with HUMBEHV 3IP3 A/B S.

Not open to students with credit or registration in HUMBEHV 4IP3 A/B S.

HUMBEHV 4SC6 A/B - SCIENCE COMMUNICATION IN THE BEHAVIOURAL SCIENCES

Students will learn critical writing skills to translate basic research for popular media outlets. Examples of bad journalism and inaccurate reporting will be highlighted. Lecture (two hours), tutorial (two hours); two terms

Prerequisite(s): Registration in Level IV of an Honours Human Behaviour program

Antirequisite(s): PNB 4SC6 A/B

Cannot be taken concurrently with BIOLOGY 4C09 A/B, 4C12 A/B, 4F06 A/B, HUMBEHV 4RP6 A/B, ISCI 4A12 A/B, NEUROSCI 4L09 A/B, 4L12 A/B, ORIGINS 4A09 A/B, PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B.

Not open to students with credit or registration in HUMBEHV 4IP3 A/B S.

HUMBEHV 4U03 - INCLUSION IN THE ECE CLASSROOM

Examine attitudes toward children with exceptionalities and the concept of inclusion and integration. Integrated programs will be explored as well as class-wide adaptive programming. Develop an awareness of diversity around the area of exceptionality.

Lectures, may include blended content (three hours); one term

Prerequisite(s): Registration in Level IV of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMBEHV 4V12 - ECE FIELD PLACEMENT III

Building on the skills from previous two placements, students will have opportunities to pursue their special interest and passion in an alternative placement experience. In these settings, students will engage with children, families, staff, and other professionals.

This course is evaluated on a Pass/Fail basis.

288 hours; Spring/Summer Term

Prerequisite(s): HUMBEHV 3O03, 3P03, 3Q03, 3XP6

Co-requisite(s): HUMBEHV 4VS3

HUMBEHV 4VS3 - THEORY TO PRACTICE III

Seminar to be taken concurrently with Professional Practice III, HUMBEHV 4V12.

Online lecture/discussion (two hours); Spring/Summer Term

Co-requisite(s): HUMBEHV 4V12

HUMBEHV 4W03 - SUPERVISING FOR LEADERSHIP AND QUALITY

Apply relevant legislation and necessary administrative procedures for operating a child care centre. Reflect on the importance of the supervisor/administrators role in establishing an effective team and mentoring relationship, personnel management, and the role of professional and community resources.

Two and a half hours (lectures, may include blended content); one term

Prerequisite(s): Registration in Level IV of the B.A.Sc. in Human Behaviour (Early Childhood Education Specialization) program

HUMANITIES

Courses If no prerequisite is listed, the course is open.

HUMAN 1QU3 - INSIGHT AND INQUIRY: QUESTIONS TO CHANGE THE WORLD

In a world of smartphones and google, it seems we can find answers in an instant—the greatest challenge is to ask the right questions, recognizing that how we ask

a question determines the nature of the answers available to us. Effective leaders are constantly formulating creative questions, about themselves and about the world around them. Working, in part, in the technology-enriched environment of an active learning classroom, students will focus on how to ask good questions about specific issues and how to use those questions to interrogate the evidence in different ways. The skills students acquire will apply to other university courses and the world beyond.

3 hours, discussion; one term

Prerequisite(s): Registration in Humanities I, Studio Art I or Music I

HUMAN 1VV3 - VOICE AND VISION: WORDS TO CHANGE THE WORLD

Is the pen mightier than the sword? It depends on the writer. Effective leaders understand that clear writing is persuasive writing. They understand their audience and context. Working, in part, in the technology-enriched environment of an active learning classroom, students will explore the elements of effective writing for a range of audiences and situations, from a tweet to academic writing to a job application letter. These critical skills will serve as the foundation for student success.

3 hours, discussion; one term

Prerequisite(s): Registration in Humanities I, Studio Art I or Music I

HUMAN 2DH3 - INTRODUCTION TO DIGITAL HUMANITIES

This course will introduce students to digital humanities research methods and tools. Students will learn about three primary impulses that drive digital scholarship: analysis, preservation, and resource creation. They will work with existing digital resources, learning to use and assess them effectively; and will also digitize material to create new resources while learning about copyright, intellectual property, and accessibility.

Three hours; one term

Prerequisite(s): Registration in Level II or above

HUMAN 3CL3 - COMMUNITY LEADERSHIP AT McMASTER

Students complete at least 48 hours of volunteer work as mentors to other McMaster students in a variety of positions; for example, as language assistants and conversation partners in Level 1 language classes; as writing tutors, peer helpers, or note-takers for specific courses. Students work with the faculty supervisor to set learning objectives, and reflect on these experiences.

The course is graded on a Pass/Fail basis.

Prerequisite(s): Registration in Level II or above of any program; and permission of the instructor responsible for the position. Students must complete an application; details on the application process are available in the Humanities Academic Advising Office (CNH 107).

HUMAN 3CM3 - LEADERSHIP: CROSS-CULTURAL MENTORING LAB

Through on-campus experiential placements (embedded mentorship), students will participate in the peer mentoring of international students in the McMaster English Language Development (MELD) program. Students receive upfront training and ongoing support in mentorship, using aspects of the learning-centred mentoring paradigm (reciprocity, collaboration and the elaboration of mutually-defined goals). Students document their learning through a structured portfolio. Prior to beginning mentorship placements, students will participate in intensive training workshops (start of term) on: second language learning, reflective practice, goal-setting, and cross-cultural communication.

Discussion and placements (three hours), training sessions; one term

Prerequisite(s): Registration in Level II or above of any program; completion of online application; and permission of the Associate Dean (Humanities) or delegate

HUMAN 3D12 - FULL-TIME DISCOVERY CHANNEL INTERNSHIP

This course integrates academic knowledge with an internship experience involving the research, writing and production of content for Discovery Channel Canada. Students will also gain valuable experience in production coordinating

and management. Students accepted to this placement will document their learning experiences through a portfolio. The employer establishes the number of positions available.

This course is evaluated on a Pass/Fail basis.

Normally 35 hours per week.

Prerequisite(s): Registration in Level 3 or above of any Honours Humanities program; and permission of the Associate Dean or delegate.

Enrolment and credit in this course is contingent upon the students successfully having secured a position with the employer, and on satisfactory employer evaluation(s).

HUMAN 3IFO - FULL-TIME INTERNSHIP

Full-time, non-credit internship or experiential education opportunity. The goal of the internship or placement experience is for students to focus on professional development and expanding their employment-related skills, while exploring career options and beginning to build networks in different professional fields.

This course is evaluated on a Pass/Fail basis.

Normally 26-40 hours per week.

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Humanities; and permission of the Associate Dean or delegate

HUMAN 3IFO may be repeated.

HUMAN 3IPO - PART-TIME INTERNSHIP

Part-time, non-credit internship or experiential education opportunity. The goal of the internship or placement experience is for students to focus on professional development and expanding their employment-related skills, while exploring career options and beginning to build networks in different professional fields.

This course is evaluated on a Pass/Fail basis.

Normally 5-15 hours per week.

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Humanities; and permission of the Associate Dean or delegate

HUMAN 3IPO may be repeated.

HUMAN 3LM3 - FOUNDATIONS OF LEADERSHIP

Effective leaders possess strong ethical values, emotional and social intelligence, excellent communication skills, and creativity; they have empathy, and are able to influence and inspire through informed, reasoned arguments. Students will explore how these elements fit together in various leadership models and how they apply cross-culturally. They will also take several assessments that measure their developing skills, as well as engage in reflective practice to increase self-awareness. Students apply these leadership skills through the peer-to-peer mentoring of first year international students in the McMaster English Language Development (MELD) program. Student learning is documented through a structured portfolio. Lecture and discussion (two hours), placement (one hour); one term

Prerequisite(s): Registration in Level II and HUMAN 3CM3, or registration in Level III or above of any program; completion of online application; and permission of the Associate Dean (Humanities) or delegate.

HUMAN 3W03 - APPLIED HUMANITIES I

Students gain applied experience in a field related to a Humanities discipline by applying skills and knowledge acquired in undergraduate studies in practical areas such as research projects, pedagogy and work placements. Students participate in defining learning goals and experiences.

Prerequisite(s): Registration in Level III or IV of any Honours program offered by the Faculty of Humanities. Students must contact the Academic Advising Office, CNH-107, for details on the application process.

Permission of the Associate Dean of the Faculty of Humanities is required.

HUMAN 4CM3 - CROSS-CULTURAL MENTORING AND COACHING PRACTICUM

This course consists of an on-campus placement in embedded mentoring and coaching. Students will participate in the peer mentoring of international students in the McMaster English Language Development (MELD) program, as well as develop coaching skills through their contributions to the training of first-time peer mentors. Since this course consists of a work placement, students will also further develop essential skills in workplace accountability, collaboration and communication, through interactions and regular team meetings with MELD staff. Students are expected to document their experience and to submit an interim report, and final report or portfolio.

This course is graded on a Pass/Fail basis.

Placement (four-five hours weekly), training and collaboration (one hour weekly); one term

Prerequisite(s): HUMAN 3CM3 and permission of the Associate Dean (Humanities) or delegate

HUMAN 4LC3 - LEADERSHIP CAPSTONE: THEORY AND PRACTICE

Working with a faculty supervisor, students will combine theory and practice by conducting in-depth research on a chosen aspect of leadership followed by proposing and, in most cases, implementing a practical application of that knowledge. Three hours; one term

Prerequisite(s): One of PHILOS 2D03, 2N03, 2TT3 or 2YY3; and HUMAN 3CM3, 3LM3 and 4RM3 (or 4LM3); completion of online application; and permission of the Associate Dean (Humanities) or delegate

First offered in 2019/20

HUMAN 4RM3 - LEADERSHIP: RELATIONSHIP MANAGEMENT

Team work, conflict management, negotiation, giving and receiving feedback, communicating vision and expectations these are all key elements of leadership. Ultimately, succeeding in these areas is about managing relationships. Building upon the foundational elements of leadership already acquired, students will gain a deeper awareness of their own and others' motivations, strengths, filters, and responses to conflict, of and how to apply this knowledge to communicate effectively.

Three hours; one term

Prerequisite(s): HUMAN 3CM3 or 3LM3; and permission of the Associate Dean (Humanities) or delegate

Anti-requisite(s): HUMAN 4LM3

HUMAN 4W03 A/B S - APPLIED HUMANITIES II

Students gain applied experience in a field related to a Humanities discipline by applying skills and knowledge acquired in undergraduate studies in practical areas such as research projects, pedagogy and work placements. Students participate in defining learning goals and experiences.

Prerequisite(s): Registration in Level III or IV of any Honours program offered by the Faculty of Humanities. Students must contact the Academic Advising Office, CNH-107, for details on the application process.

Permission of the Associate Dean of the Faculty of Humanities is required.

HUMAN 4WL3 A/B - WILSON LEADERSHIP SCHOLAR CAPSTONE

This course may be taken by Wilson Leadership Scholar Award winners. Working under the supervision of the Wilson Leadership Scholar Award Director and Associate Director, students will combine leadership theory and practice through the creation and completion of applied community outreach projects.

Two to four hours; two terms

Prerequisite(s): Open to Wilson Leadership Scholar Award winners; permission of the Wilson Leadership Scholarship Award Associate Director is required.

This course is graded on a Pass/Fail basis.

INDIGENOUS STUDIES

Courses in Indigenous Studies are administered by the Indigenous Studies Program.
L.R Wilson Hall, Room 1811, ext. 23788

<https://indigenous.mcmaster.ca>

Department Notes

1. Those students who completed INDIGST 2M06 A/B prior to September 2017 can use these 6-units towards the fulfillment of INDIGST 2M03 and INDIGST 2MM3. Those students who completed INDIGST 2AA3 prior to September 2016 may request approval of an additional 3-unit research methodology course, to use in fulfillment of this 6-unit research methodology requirement. Students are encouraged to consult the Director of the Indigenous Studies Program for approval of an alternate applicable course.
2. Students who have completed only 3 units of level I Indigenous Studies will be required to complete 3 more units of Level I Indigenous Studies by the end of the following academic year.
3. RECONCIL 1A03 is considered as a Level I Indigenous Studies course.

Courses

If no prerequisite is listed, the course is open.

See also courses in Reconciliation

INDIGST 1A03 - INTRODUCTION TO INDIGENOUS STUDIES

An introduction to Indigenous peoples' world views from pre-contact to the Indian Act of 1876. Indigenous history and philosophy will be examined along with the issues of representation and colonialism.

Lectures and seminars (three hours); one term

INDIGST 1AA3 - INTRODUCTION TO CONTEMPORARY INDIGENOUS STUDIES

This course will explore the relationship between Indigenous peoples and mainstream society in the 20th century with regard to governmental policy, land claims, economic development, and self-determination.

Lectures and seminars (three hours); one term

Cross-list(s): ARTSSCI 1CC3

INDIGST 2A03 - INDIGENOUS PEOPLES' SPIRITUALITY

This course will examine the spirituality based knowledge of Aboriginal peoples across North America. The philosophies, world view, sacred ways of knowing and relationship to the natural world will be explored.

Three hours (lectures and seminars); one term

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03, or permission of the Instructor.

INDIGST 2B03 - HISTORY OF INDIGENOUS PEOPLES' SOVEREIGNTY

An examination of North America Indigenous People's political and economic history in the pre-contact, early contact, and colonial eras within a post-colonial context. Topics will include: self-determination, resource management, land claims, and economic development.

Three hours (lectures and seminars); one term

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03, or permission of the Instructor, or ANTHROP 1AA3 or 1AB3.

INDIGST 2BB3 - CONTEMPORARY INDIGENOUS KNOWLEDGE AND SOCIETIES

A comparative study of selected cultures of this continent, dealing with traditional and modern situations.

Three hours (lectures and discussion); one term

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03, or permission of the Instructor

Cross-list(s): ANTHROP 2B03

INDIGST 2C03 - CURRENT ISSUES IN INDIGENOUS STUDIES: SELECTED TOPICS

A review of the geographic, cultural and demographic composition of Inuit, First Nations and Metis, and of the major current developments on land, cultural integrity, treaties, economic development, community social development and self-government.

Three hours (lectures and seminars); one term

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03, or permission of the Instructor

INDIGST 2C03 may be repeated, if on a different topic, to a total of six units.

INDIGST 2D03 - TRADITIONAL INDIGENOUS ECOLOGICAL KNOWLEDGE

This course is a study of the ecological teachings of Indigenous peoples and of their relationships with the natural environment in historical and contemporary times.

Three hours (lectures and seminars); one term

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03, or permission of the Instructor

Cross-list(s): ANTHROP 2DA3, GEOG 2EK3

INDIGST 2F03 - RESIDENTIAL SCHOOLS IN CANADA: HISTORY AND IMPACT

This course will examine the assimilationist policies that underscored the Indian Residential School system in Canada. The subsequent effects of intergenerational trauma and approaches to healing and reconciliation will also be explored.

Three hours (lectures and seminars); one term

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03, or permission of the Instructor

INDIGST 2G03 - INDIGENOUS PERSPECTIVES ON PEACE AND CONFLICT

An examination of Indigenous philosophies of peace and approaches to conflict resolution from pre-contact to the present, with particular emphasis on Haudenosaunee tradition and the Great Law of Peace.

Three hours (lectures and seminars); one term

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03, or permission of the Instructor

INDIGST 2H03 - INDIGENOUS CELEBRITY

An examination of (in)famous Indigenous people who have become cast as icons in the national consciousness of North America. We will discuss selected individuals and the circumstances around their fame, both historically and in the present.

3 hours; lecture and seminar: one term

Prerequisites(s): INDIGST 1A03; 1AA3 or RECONCIL 1A03 or permission of the Instructor

INDIGST 2J03 - INDIGENOUS EXPERIENTIAL EDUCATION

This course will incorporate a variety of interfaces (both within and outside the classroom) in the exploration of Indigenous-based approaches to knowledge. Students will gain insight into how voice, sound, materiality and the land inform how knowledge is transmitted and understood.

3 hours; lecture and seminar; one term

Prerequisites(s): INDIGST 1A03 or 1AA3 or RECONCIL 1A03 or permission of the Instructor

INDIGST 2K03 - INDIGENOUS FUTURISMS AND WONDERWORKS

Through a focus on Indigenous articulated realities and futures, this course refuses colonial narratives of the 'disappearing Indian' and insists upon Indigenous presence in past, present, and future as essential for envisioning a human future. Genres of study will include fiction, graphic novels, film, non-fiction, performance, and wonderworks.

Three hours; lecture and seminar: one term

Prerequisites(s): INDIGST 1A03; 1AA3 OR RECONCIL 1A03 or permission of the Instructor or three units of Level I English and Cultural Studies

Cross-list(s): ENGLISH 2KA3

INDIGST 2M03 - INDIGENOUS RESEARCH METHODS AND ETHICS

This course will address methodological and ethical issues related to conducting research with Indigenous peoples. Indigenous and Western approaches to the constructions of knowledge are explored with an emphasis on Indigenous knowledges and how they are practiced in methodological approaches to research. 3 hours; lecture and seminar

Prerequisite(s): INDIGST 1A03, 1AA3 or RECONCIL 1A03, or permission of the Instructor

Antirequisite(s): INDIGST 2AA3 and INDIGST 2M06A/B

INDIGST 2MM3 - INDIGENOUS WAYS OF KNOWING: THEORY

This course will explore Indigenous ways of knowing as they relate to Indigenous cosmologies and worldviews. A range of written text and oral tradition will be introduced as foundational aspects of Indigenous knowledges. Interdisciplinary approaches based on the work of Indigenous scholars redefining the field of Indigenous Studies will also be examined.

3 hours; lecture and seminar

Prerequisite(s): INDIGST 1A03 , 1AA3 or RECONCIL 1A03 , or ARTSSCI 1C03 , or permission of the Instructor

Antirequisite(s): INDIGST 2AA3 and INDIGST 2M06 A/B

INDIGST 2U03 - INDIGENOUS TEXTILES AND DESIGN

An examination of Indigenous cultural traditions and textile art-based practices. Students will gain cultural and technical knowledge from an Indigenous artist in the design and creation of their own pieces.

3 hours; lecture and seminar: one term.

Prerequisite(s): INDIGST 1A03, INDIGST 1AA3 OR RECONCIL 1A03

INDIGST 3C03 - STUDY OF IROQUOIS FIRST NATIONS IN CONTEMPORARY TIMES

An intensive examination of the Iroquois Confederacy and its attempts to maintain its culture, socio-political systems and economic independence.

Lectures and seminars (three hours); one term

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the instructor

INDIGST 3CC3 - CONTEMPORARY INDIGENOUS SOCIETIES: SELECTED TOPICS

An intensive examination of selected political, economic, or social problems faced by selected Indigenous peoples.

Lectures and seminars (three hours); one term

Prerequisite(s): Three units Level II Indigenous Studies or permission of the instructor

INDIGST 3CC3 may be repeated, if on a different topic, to a total of six units.

INDIGST 3D03 - CONTEMPORARY NATIVE LITERATURE IN CANADA

A study of significant works by Native writers who give voice to their experience in Canada. Issues to be examined include appropriation of voice, Native identity, women in Indigenous societies, and stereotyping.

Three hours (lectures and seminars); one term

Prerequisite(s): Three units of Level II Indigenous Studies or six units of Level II English or permission of the instructor

Cross-list(s): ENGLISH 3W03, PEACEST 3W03

INDIGST 3E03 - CONTEMPORARY NATIVE LITERATURE IN THE UNITED STATES

A study of contemporary works by Native writers in the United States. Native representations of voice, identity, gender, and popular culture will be examined. Three hours (lectures and seminars); one term

Prerequisite(s): Three units of Level II Indigenous Studies or six units of Level II English or permission of the instructor

Cross-list(s): ENGLISH 3X03, PEACEST 3X03

INDIGST 3EE3 - INDIGENOUS REPRESENTATIONS IN FILM

A study of how Indigenous peoples and narratives have been represented in film. We explore how the historical and sociopolitical are informed through depictions of Indigenous peoples, cultures and places in cinema.

3 hours; lecture and seminar: one term.

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the Instructor.

INDIGST 3F03 - INDIGENOUS ART AND VISUAL CULTURE IN CANADA, 1960 TO THE PRESENT

A survey of visual art production from Indigenous Canadian communities since c.1960 including: painting, sculpture, installation, film/video, performance and hip hop. The course focuses on First Nations' and Métis' artistic practices and examines how those are framed in the context of museums in the 21st century. Three hours; one term.

Prerequisite(s): Registration in Level II or above of a program in Art History, Art, or Indigenous Studies, or permission of the instructor.

Cross-list(s): ARTHIST 3BB3

INDIGST 3G03 - INDIGENOUS CREATIVE ARTS AND DRAMA: SELECTED TOPICS

The creative processes of Indigenous cultures are studied through the examination of selected forms of artistic expression, which may include art, music, dance and/or drama.

Lectures and seminars (three hours); one term

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the instructor

INDIGST 3G03 may be repeated, if on a different topic, to a total of nine units.

INDIGST 3H03 - INDIGENOUS MEDICINE I - PHILOSOPHY

This course will examine the Aboriginal concepts of health and wellness. The holistic traditional approach will be used in the classroom as well as in visits by elders, medicine people and class trips to places of health, wellness and healing. Lectures and seminars (three hours); one term

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the instructor

Not open to students with credit in INDIGST 3CC3, if the topics were Traditional Approaches to Healing and Wellness or Indigenous Peoples Health.

INDIGST 3HH3 - INDIGENOUS MEDICINE II - PRACTICAL

This course will examine the concept of traditional medicines, their histories and their connection to Aboriginal philosophies of wellness (studied in Part I); procedures for procurement and use of the medicines will be addressed and emphasis will be placed on the reasons for efficacy.

Lectures and seminars (three hours); one term

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the instructor

Not open to students with credit in INDIGST 3CC3, if the topics were Traditional Approaches to Healing and Wellness or Indigenous Peoples Health.

INDIGST 3J03 - GOVERNMENT AND POLITICS OF INDIGENOUS PEOPLE

An historical examination of the leadership and politics in Canada's indigenous communities, with a particular focus on pre-contact political structures, the Indian Act and its consequences and contemporary social questions.

Three hours; (lectures and seminars); one term

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the instructor or registration in Honours Political Science Specialization in Public Law and Judicial Studies.

Cross-list(s): POLSCI 3C03

INDIGST 3K03 - INDIGENOUS HUMAN RIGHTS

A study of government policies and their impact on Indigenous Peoples, specifically Indian Affairs in Canada and the United States. Topics will include individual and collective rights of Indigenous Peoples and the conceptual problems which arise in a Westernized justice system.

Three hours (lectures and seminars); one term

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the instructor or registration in Honours Political Science Specialization in Public Law and Judicial Studies.

Cross-list(s): POLSCI 3KA3

INDIGST 3L03 - INDIGENOUS INDEPENDENT STUDY

In consultation with the Director of Indigenous Studies, students will research an approved topic, on the basis of materials outside normally available course offerings. A major paper will be required.

Prerequisite(s): Registration in an Indigenous Studies program and permission of the Director

INDIGST 3N03 - INDIGENOUS WOMEN: LAND, RIGHTS, AND POLITICS

This course will focus on issues Indigenous women identify as relevant to their current quality of life and social wellbeing. Indigenous knowledge, women's ways of knowing, the impacts of colonialism, gender and methodologies will be examined. Lectures and seminars (three hours); one term

Prerequisite(s): Three units of Level II Indigenous Studies; or permission of the instructor

INDIGST 3P03 - HAUDENOSAUNEE HEALTH, DIET AND TRADITIONAL BOTANY

Working with traditional knowledge holders, this course will explore the relationship between ethnobotany and agricultural practice to Haudenosaunee cultural beliefs and concepts of health and wellness.

Three hours (two hour lecture, one hour tutorial); one term

Prerequisite(s): Six units of Level I or II Indigenous Studies, Mohawk or Cayuga language, or permission of the Instructor

Cross-list(s): ANTHROP 3PA3

INDIGST 3Q03 - HISTORIES OF INDIGENOUS SPORT AND RECREATION

Sport and recreation improve quality of life with physical health, personal wellness and fostering belonging. Indigenous Peoples sport history will be studied from various nations level of organization, covering techniques, demonstration and non-competitive gains.

3 hours; lecture and seminar: one term.

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the Instructor

INDIGST 3R03 - OGWEHO:WEH EXPERIENTIAL LAND-BASED LEARNING

This experiential course immerses students in material and social expressions of the Ogweho:weh culture. Students will learn about ancient wisdoms, knowledges and beliefs as expressed through storytelling, history, art and song. Students

will engage, experience and produce knowledge through Indigenous ways of knowing and being.

3 hours; lecture and seminar: one term.

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the Instructor

INDIGST 3S03 - OTHER-THAN-HUMAN WORLDS AND RELATIONS

This course will draw on Indigenous cosmological foundations of human and other-than-human relations in the formation of Indigenous realities. We will explore the multiplicity of other-than-human worlds and their role in Indigenous knowledge generation.

3 hours; lecture and seminar: one term.

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the Instructor

INDIGST 4A03 - STORYTELLING AND ENVIRONMENTAL CONSERVATION

This course will focus on practical storytelling activities that will contribute to the archives of an Indigenous community for the purposes of historical preservation. Emphasis will be placed on knowledge transmission and gift exchange in the form of a digital story produced by the student.

3 hours; lecture and seminar: one term

Prerequisite(s): Registration in Level IV of an Indigenous Studies Program or permission of the Director.

INDIGST 4B03 - INDIGENOUS LITERARY GOVERNANCE AND RESISTANCE

Through an examination of non-fiction Indigenous writings, this course will focus on Trans-Indigenous practices of governance, diplomacy, advocacy, and resistance to settler colonialism through literary means. Students will engage both historic and contemporary examples of politicized writings by Indigenous peoples who insist upon and fight for the sovereignty of their nations.

3 hours; lecture and seminar: one term

Prerequisite(s): Registration in Level IV of an Indigenous Studies Program or permission of the Director.

INDIGST 4D03 - INDIGENOUS CRITICAL THEORY AND INQUIRY

An intensive examination of current scholarship by Indigenous theorists from an array of disciplines, including feminism, environmentalism, literature, and governance. Seminar (three hours); one term

Prerequisite(s): Registration in Level IV of an Indigenous Studies Program or permission of Director

INDIGST 4HH3 - INDIGENOUS HEALTH AND INTERDISCIPLINARY APPROACHES

This course will explore the multiple components of health and wellness as viewed by Indigenous cultures in the past and in a contemporary context. Social determinants of health, including the effects of colonialism, will be evaluated and discussed.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV of an Indigenous Studies Program or permission of Director

INDIGST 4L03 - INDIGENOUS COMMUNITY RESEARCH EXPERIENCE

Students will work with a supervisor to conceive and develop a community based research project that directly benefits an Indigenous community, whether urban or rural. Topics may include health and wellness, land claims, education, language, and/or environmental issues.

Prerequisite(s): Registration in Level IV of an Indigenous Studies Program or permission of Director

INDIGST 4RI3 - COLONIALISM AND RESISTANCE IN REPRESENTATIONS OF INDIGENOUS WOMANHOOD

This course looks to representations of Indigenous womanhood in a range of contemporary and historical cultural productions for insights into how colonialism shapes all of our lives, in radically different ways.

Prerequisite(s): Registration in Level IV of an Honours program in English, Cultural Studies and Critical Theory, Indigenous Studies, or permission of the Department.

Cross-list(s): ENGLISH 4RI3

INDIGST 4T06 A/B - HONOURS THESIS

In consultation with a member of the Programs Committee of Instructors, students will prepare an essay on an approved topic. Students who are interested in taking 4T06 A/B should contact a potential supervisor early in the first term.

Prerequisite(s): Level IV of Indigenous Studies Program or permission of Director.

INNOVATION

INNOVATE 1X03 - THE WORLD OF ENTREPRENEURSHIP

Fundamentals of entrepreneurship via a series of guest lectures by prominent entrepreneurs. Case studies will be used to analyse strategies and methods for growing a scalable business.

One lecture (three hours), one term

INNOVATE 1Z03 - ARTIFICIAL INTELLIGENCE - INNOVATIVE TECHNOLOGIES

Students will cover the history, goals, social impact and philosophical implications of artificial intelligence via a series of guest lectures by prominent researchers, entrepreneurs and theorists in this area. Speakers will highlight the numerous applications and huge possibilities in the field of AI.

One lecture (three hours), second term

INNOVATE 2X03 - LEAN STARTUP

Introduction to lean methodologies of building a successful start-up business, including market validation, analysing market potential for start-up ideas, establishing a business model and failing fast. Students will learn how to test business ideas and hypotheses with customers and stakeholders.

Three lectures, one term

INNOVATE 2Z03 - SPRINT METHODOLOGIES

Course description: Rapid prototyping, testing and iteration of ideas with customers using design sprint methodologies. Students will also learn about agile development and pathways from idea to market.

Three lectures, one term

Prerequisite(s): Registration in Level II or above of any program

INNOVATE 3EX3 - EXPERIENTIAL LEARNING IN INNOVATION

This course will provide students an opportunity to gain direct experience working at an existing start-up company. Course credit will be evaluated based on the maintenance of a comprehensive learning portfolio.

Lectures, one term

Prerequisite(s): INNOVATE 1X03, 2X03, INNOVATE 2Z03, and permission of the instructor

First offered 2020-21.

INNOVATE 3X03 - PERSUASION, PITCHING SKILLS AND MARKETING

In both individual and group settings, students will explore the theoretical and practical aspects of how to persuasively market and sell their ideas, their vision and their products to target audiences.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program

INNOVATE 3Z03 - FROM FOUNDER TO CEO

Students will learn how a start-up Founder transitions into becoming a CEO to properly manage and grow the company, effectively manage Human Resources and work with a Board of Directors.

One lecture (three hours); one term

Prerequisite(s): Registration in Level II or above of any program

INNOVATE 3Z23 - IMAGINING AND NAVIGATING THE FUTURE

This ambitious interdisciplinary course provides a platform for students to develop the strategic foresight, planning and leadership skills needed to imagine and shape the future. Students will analyze the systems, trends and uncertainties driving the future of such business and social domains as workplaces, healthcare systems, climate change, and financial markets. Students will also develop the skills needed to mobilize people and resources towards desired outcomes. In addition to team experiential learning projects, students will explore future directions on issues of personal interest.

Prerequisite(s): Registration in Level III or above in a four or five year program

INNOVATE 4EX6 A/B - FOUNDERS STARTUP

Working with The Forge, McMasters startup accelerator, students will form teams to develop a new startup venture. Through the application of lean startup and design sprint methodologies, students will rapidly test and iterate product-market fit with customers and refine their business models. Admission to the course will be based on a written application (one application per team) and a successful panel interview. At the end of the course, students will pitch their validated business models and evidence for product-market fit to a panel of Forge entrepreneurs, advisers, and mentors for possible entry into The Forges Stage II program.

Lectures; both terms

Prerequisite(s): INNOVATE 1X03, 2X03, 2Z03, and permission of the instructor.

First offered 2020-21.

INTEGRATED SCIENCE

Courses in Integrated Science are administered by the School of Interdisciplinary Science.

General Sciences Building, Room 105, ext. 21181

Email: sis@mcmaster.ca

<https://www.science.mcmaster.ca/sis/undergraduate/isc.html>

Notes

1. Within Integrated Science courses, there is a strong emphasis on inquiry-based learning and students will be involved in individual and team research projects in field and laboratory settings. Students will also develop scientific literacy skills through study of scientific writing and through writing practice.
2. ISCI 1A24 A/B covers some of the content from the following Level I areas of study: Calculus, Introductory Biology and Life Sciences, Introductory Chemistry, Earth and the Environment, Introductory Physics, and Introduction to Psychology. Students are advised to refer to individual course listings to determine when ISCI 1A24 A/B serves as an appropriate requisite.
3. ISCI 2A18 A/B covers some of the content from the following Level II areas of study: Introductory Neuroscience, Ecology, Calculus, Nucleic Acids and Proteins, History of the Earth, and Thermodynamics. Students are advised to refer to individual course listings to determine when ISCI 2A18 A/B serves as an appropriate requisite.
4. Some Level III and/or IV research methodology/project courses, and Level IV independent study, inquiry, literature review, and thesis courses may not be open to students in an Honours Integrated Science program. Students are advised to refer to individual course listings for appropriate exclusions.

- All students completing a concentration are strongly encouraged to meet with the academic advisor in the department in which they are completing the concentration to discuss program requirements and course selections.
- Students are strongly encouraged to check prerequisites for upper-level courses. The prerequisites should be considered when selecting courses.

Courses

If no prerequisite is listed, the course is open.

ISCI 1A24 A/B - INTEGRATED SCIENCE I

Integrates learning of essential knowledge and skills from the fundamental scientific disciplines (biology, chemistry, mathematics, physics, earth science and psychology) in the context of pertinent topics and projects. Interdisciplinary teams of instructors will teach and linkages between discipline areas will be emphasized partly through study of 'thematic modules.'

One mandatory one-day field trip will be held.

Integrated lectures, labs, tutorials, field trips, discussions; two terms

Prerequisite(s): Registration in Honours Integrated Science I

Co-requisite(s): BIOSAFE 1BS0 (or HTHSCI 1BS0), WHMIS 1A00 if not already completed. Both requirements must be completed prior to the first lab.

ISCI 2A18 A/B - INTEGRATED SCIENCE II

Integrates learning of biochemistry, biology, chemistry, earth science, mathematics, neuroscience and physics. Students will participate in individual and team research projects in field and laboratory settings and will further develop skills in research methodology, ethics, and science literacy.

Integrated lectures, labs, tutorials, field trips, discussions; two terms

Prerequisite(s): Registration in Level II of an Honours Integrated Science program

ISCI 3A12 A/B - INTEGRATED SCIENCE III

Interdisciplinary research projects and development of scientific and literacy skills (including data analysis, inquiry/scientific communication and leadership). Students will participate in individual and team research projects in field and laboratory settings. Up to three mandatory one day field trips will be held.

Integrated lectures, labs, tutorials, field trips, discussions; two terms

Prerequisite(s): Registration in Level III of an Honours Integrated Science program

ISCI 3Z09 - INTEGRATED SCIENCE III FOR EXCHANGE STUDENTS

Integrated research projects and independent study project completed in one term exchange program with the University of Leicester's Natural Sciences Programme. Development of scientific and literacy skills including data analysis, inquiry, and scientific communication. Students will participate in individual and team research projects in field and laboratory settings.

Integrated lectures, laboratories, tutorials, field trips and discussions; one term

Prerequisite(s): Registration in Level III or above of the University of Leicester's Natural Sciences Programme and on exchange with the Integrated Science program. Permission of the Director of the School of Interdisciplinary Science (SIS) is required.

This course is open only to those students from the University of Leicester in the Natural Sciences Programme who are on exchange for one term with the Honours Integrated Science program. Not open to students with credit or registration in any Honours Integrated Science program.

ISCI 4A12 A/B - INTEGRATED SCIENCE IV

Individual/group thesis project as well as directed study of at least one research problem through published materials and/or field inquiry and/or data analysis.

Seminars/discussion; two terms

Prerequisite(s): Registration in Level IV of an Honours Integrated Science program

ISCI 4ZF0 - INTEGRATED SCIENCE FIELD WORK

Administrative requirement for field work corresponding with ISCI 4A12 A/B.

This course is evaluated on a Complete/Not Complete basis.

Prerequisite(s): Registration in Level III or above of an Honours Integrated Science program; and permission of the instructor

Students must register in ISCI 4A12 A/B in the same or subsequent session as ISCI 4ZF0.

IBH (INTEGRATED BUSINESS AND HUMANITIES)

IBH courses are administered by the DeGroote School of Business and the Faculty of Humanities.

IBH 1AA3 - FINANCIAL ACCOUNTING

This course will help students understand the purpose of accounting, its implementation, its usefulness for decision-making, its effect on behaviour and contracts, and its surrounding controversies over accounting methods.

Lectures (three hours)

Prerequisite(s): Registration in Level I of the Integrated Business and Humanities Program

Antirequisite(s): Not open to students with credit or enrolment in COMMERCE 1AA3

IBH 1AB3 - PERSPECTIVES ON CANADIAN BUSINESS

This course will examine how the business environment can affect Canadian organizations and their stakeholders. Functional areas of business will be introduced in order to understand the basics of management. The course will introduce students to business principles, techniques, and terms within both the Canadian and global context. This will include a discussion on the business environment, management theory, and the introduction of functional areas of business. The overall objective is that upon completion, students will have a foundation for future business courses.

Prerequisite(s): Registration in Level 1 of the Integrated Business and Humanities Program

Lectures (three hours)

Antirequisite(s): Not open to students with credit or enrolment in LINGUIST 1ZZ3 or 2S03

IBH 1AC3 - INTRODUCTION TO LANGUAGE AND SOCIETY

This course equips students with basic linguistic terminology and the necessary tools to examine the relationship between language and society. Topics covered include linguistic variation (regional, social, situational), language and gender, language and disadvantage/power, multilingualism, language change, pidgin and creole languages.

Lectures (three hours)

Prerequisite(s): Registration in Level 1 of the Integrated Business and Humanities Program

Antirequisite(s): Not open to students with credit or enrolment in LINGUIST 1ZZ3 or 2S03

IBH 1AD3 - IBH IN THE COMMUNITY

As community engagement is a key component of the IBH program, this course will introduce students to the politics, processes and functioning of communities and provides foundational knowledge and skills for effective and principled community engagement. As an IBH student, you will be a member of many communities - your workplace, your professional group, your neighborhood, your city, your country, the world. In the future, whether as a business professional, humanist or health/social services provider, you will be called upon to participate in community activities and community change.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Registration in Level 1 of the Integrated Business and Humanities Program

Antirequisite(s): Not open to students with credit or enrolment in CMTYENGA 2A03

IBH 1BA3 - LEADERSHIP COACHING 1

Description: This course provides the foundations for building the critical competencies in Managing (Doing things Right) to Leading (Doing the Right Things). Through in-class group coaching, students will develop and practice the successful thinking and associated behaviours required to grow Emotional Intelligence in the four primary components of Self-Awareness, Self- Management, Social Awareness, Social Management. The coaching model of What? (Understanding the critical theoretical foundations), So What? (Specific meaning/impacts for individual students), Now What? (action steps for application to self and other), provides the format for teaching and learning.

Lectures (three hours)

Prerequisite(s): Registration in Level 1 of the Integrated Business and Humanities Program

Antirequisite(s): Not open to students with credit or enrolment in COMMERCE 1BA3 or 4BN3

IBH 1BB3 - INSIGHT AND INQUIRY: QUESTIONS TO CHANGE THE WORLD

Effective leaders are able to formulate creative questions, recognizing that how we ask a question determines the nature of the answers available to us. Working in the technology-enriched environment of an active learning classroom, students will focus on how to ask good questions about specific issues and how to use those questions to interrogate evidence in different ways.

Lectures (three hours)

Prerequisite(s): Registration in Level 1 of the Integrated Business and Humanities Program

Antirequisite(s): Not open to students with credit or enrolment in HUMAN 1QU3

IBH 1BC3 - FUNDAMENTALS OF ETHICS

An introduction to ethical theory and to its application to contemporary moral problems. Topics covered may include the nature of morality and its relationship to culture, religion, and self-interest; the strengths and weaknesses of normative ethical theories, including utilitarianism, Kantianism, virtue ethics and social contract theory; and ethical issues raised by war, torture, world hunger, assisted dying, affirmative action, corporations, and the environment.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Registration in Level 1 of the Integrated Business and Humanities Program

Antirequisite(s): Not open to students with credit or enrolment in PHILOS 2YY3

IBH 1BD3 - INTRODUCTION TO PEACE STUDIES FOR IBH

An introduction to the applications of peace research to business and the Triple Bottom Line (economics, ecology, ethics), focusing on the concepts of peace, war, security, conflict, violence and nonviolence, and examining opportunities for active peace-making and conflict transformation in daily life and in business.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Registration in Level 1 of the Integrated Business and Humanities Program

Antirequisite(s): Not open to students with credit or enrolment in PEACEST 1A03

IBH 2AA3 - INTRODUCTION TO MARKETING

This course introduces the conceptual underpinnings and operational facets of marketing with a primarily consumer (as opposed to an industrial) focus. During this course, students will learn about the 4Ps of marketing: product, price, promotion, and place.

Lectures (three hours)

Prerequisite(s): Registration in Level II of the Integrated Business and Humanities Program

IBH 2AB3 - INFORMATION SYSTEMS IN MANAGEMENT

This course prepares Integrated Business and Humanities students to leverage information systems effectively. The course focuses on the opportunities and pitfalls provided by information systems, how they are likely to affect the world, and what managers need to know to make effective use of information systems in business and society.

Prerequisite(s): IBH 1AA3 and registration in Level 2 of the Integrated Business and Humanities Program

IBH 2AC3 - TALENT MANAGEMENT

This course provides knowledge of the key aspects of identifying, selecting, developing, and managing people in organizations, emphasizing the link between talent management and practices and organizational strategy. Topics include job design and job analysis, staffing, the legal environment, training and development, performance appraisal, compensation, health and safety, and labour relations.

Lectures (three hours)

Prerequisite(s): IBH 1BA3 and registration in Level II of the Integrated Business and Humanities Program.

IBH 2AD3 - STATISTICAL DATA ANALYSIS

Overwhelmed with big data, businesses are looking at ways of analysing this data to better understand their customers and develop innovative business models. Using several programming tools, this course will provide students with skills to build data models and perform common statistical analysis techniques.

Topics will include sampling techniques, common distributions, inference and hypothesis testing, regression, analysis of variance, categorical data analysis and nonparametric inference. The course will also address issues related to data security, confidentiality and ethics.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Registration in Level 2 of the Integrated Business and Humanities Program.

IBH 2AE3 - CRITICAL THINKING

Critical thinking essentially distinguishes between the capacity and quality of human thought. That is, it essentially denies that thought is merely the ability to process information and to make judgments with respect to it. Rather, critical thinking attests that there are certain modes of thinking that we can cultivate to clearly and carefully understand, evaluate, and communicate information. This course introduces students to such modes of thought. In order to facilitate such an introduction the course will be guided by four intellectual virtues that critical thinking fundamentally involves:

- 1) humility (the ability to admit limitations, ignorance, or confusion, etc.),
- 2) carefulness (the ability to identify and avoid mistakes and errors in reasoning),
- 3) thoroughness (the ability to think clearly and distinctly, providing sufficient justification for claims), and
- 4) open-mindedness (the ability judge fairly, empathetically, and with sensitivity to alternative beliefs).

Within these guidelines course topics will include the nature, limitations and justifications of knowledge, cognitive errors, formal and informal fallacies of reasoning, the structure of arguments, deductive and inductive reasoning, basic propositional and categorical logic, and sociocultural criticism.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Registration in Level II of the Integrated Business and Humanities Program.

IBH 2AF3 - GLOBAL BUSINESS EXPERIENCE

This course has two main objectives: 1) is to understand the role that business plays in the global economy, especially its role in global poverty as well as global peace by immersing students in an international learning experience. 2) For students to understand the historical, sociological, and economic impact in order to assess economic development projects in a developing country. In this course students will learn how globalization connects the developed and developing worlds; how business and the economy maintain structural inequalities and global wealth disparities; the global economic, social, and environmental impact of Western business decisions; the historical, political, geographical, gendered, and cultural context in which business operates, and the impact of economic development policies.

Lectures (3 hours)

Prerequisite(s): Registration in Level III of the Integrated Business and Humanities Program

IBH 2BA3 - MANAGERIAL ACCOUNTING

An introduction to concepts underlying the use of cost accounting information for managerial planning and control and for inventory valuation. The nature and analysis of costs and the usefulness and limitations of accounting data for decision-making, including ethical considerations, will be discussed.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): IBH 1AA3 and registration in Level II of the Integrated Business and Humanities Program.

IBH 2BB3 - INTRODUCTION TO FINANCE

This course provides an overview of financial management and the financial system. The goal is to equip students with the basic understanding of how financial decisions are made. Students will learn fundamental finance concepts and tools, and how they are applied in practice. The course will lay a foundation for more advanced finance courses that students will subsequently take. Topics include time value of money, capital budgeting, risk and return tradeoff, and security valuation.

Lectures (three hours)

Prerequisite(s): IBH 1AA3, ECON 1B03 and registration in Level II of the Integrated Business and Humanities Program.

IBH 2BC3 - OPERATIONS MANAGEMENT

Operations management (OM) is the science and art of creating and delivering goods and services to customers. Basic topics in operations management include goods and service design, facility design, locating facilities, quality management, project planning, supply chain management, lean operating systems, forecasting customer demand, process strategy, and inventory management. These days this field of study is subjected to changes and challenges. Maintaining a sustainable environment while efficiently converting resources into safe and quality outputs, coordinating between operations and other business functions, increasing profitability while providing a safe workplace and honouring stakeholder commitments are a few to mention. These topics will be discussed in this introductory operations management course.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Registration in Level II of the Integrated Business and Humanities Program.

IBH 2BD3 - MORAL ISSUES

An introduction to moral philosophy through a consideration of issues in professional ethics (e.g., health care and energy). Topics such as abortion, human experimentation, euthanasia, genetic screening, sustainability and pollution will be investigated.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Registration in Level 2 of the Integrated Business and Humanities Program.

IBH 2BE3 - CANADIAN BUSINESS HISTORY: THE CANADIAN EXPERIENCE IN INTERNATIONAL PERSPECTIVE

Canadian business history has fallen out of favour among recent historians. While the field was extensively studied in previous decades, it became displaced by the growing popularity of social and cultural history. However, Canadian business history is deeply intertwined with broader questions about the economic, social and political climate of the country. Through examining key themes in business history in the last two centuries, this course will provide a broader perspective on the role and perception of Canadian business and industry in the country's past. It will also question what these lessons can tell us about its present economic state and its potential futures. This course includes discussion sessions which, along with the assignments, are intended to help students develop their critical reading and communication skills. Students do not need a background in economic or business history to succeed in this course.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): Registration in Level II of the Integrated Business and Humanities Program.

IBH 2BF3 - HISTORY OF CAPITALISM

A History of Capitalism from 1500 to the present. This team-taught course introduces students to characteristics of capitalism, core institutions, and explanations for periodic crises. There are opportunities to read selections from leading proponents, agents, critics, and reformers. Essay topics will be negotiated with students, so that there will be an alignment with their programme/faculty.

Lectures (3 hours), tutorial (1 hour)

Prerequisite(s): Registration in Level II or above in the Integrated Business and Humanities Program

IBH 3AA3 - RELATIONSHIP MANAGEMENT

Team work, conflict management, negotiation, giving and receiving feedback, communicating vision and expectations these are all key elements of leadership. Ultimately, succeeding in these areas is about managing relationships. Building upon the foundational elements of leadership already acquired, students will gain a deeper awareness of their own and others motivations, strengths, filters, and responses to conflict, of and how to apply this knowledge to communicate effectively.

Lectures (3 hours), tutorial (1 hour)

Prerequisite(s): Registration in Level III of the Integrated Business and Humanities Program

IBH 3AB3 - APPLIED MARKETING MANAGEMENT

This course builds upon material covered in Introduction to Marketing. It relies on practical, real world case studies to develop students marketing decision-making skills, and their ability to analyze the business environment in which organizations operate. A major field project, which has student teams working with businesses to audit current practices, study the environment and develop a marketing plan, is a critical part of this course.

Lectures (3 hours)

Prerequisite(s): Registration in Level III of the Integrated Business and Humanities Program

IBH 3AC3 - CORPORATE FINANCE

This course examines various aspects of the financial management of the firm including the sources and methods of financing, capital structure, dividend policy, leasing, mergers and acquisitions, working capital management, effects of taxation on financial decisions and international aspects of finance.

Lectures (3 hours), tutorial (1 hour)

Prerequisite(s): IBH 2BB3 and Registration in Level III or above in the Integrated Business and Humanities Program

IBH 3AD3 - CROSS-CULTURAL COMMUNICATION

Students will explore the links between language and culture and learn skills necessary to be intermediaries between cultures. Topics include: communication between genders, the cognitive role of metaphor, language and perception, emotions across cultures, culture and advertising, body language and cultural stereotyping. Lectures (3 hours), tutorial (1 hour)

Prerequisite(s): Registration in Level III or above in the Integrated Business and Humanities Program

IBH 3BA3 - UNDERSTANDING ENTREPRENEURSHIP AND SOCIAL ENTREPRENEURSHIP FROM A HISTORICAL AND THEORETICAL LENS

Students in this course will learn what constitutes entrepreneurship, how it has been practiced throughout history, as well as the necessary social, political, ethical and economic foundations that support a contemporary entrepreneurial economy. They will study empirical research examining entrepreneurial trends in Canada and world-wide, including social entrepreneurship.

Lectures (3 hours)

Prerequisite(s): Registration in Level 3 of the Integrated Business and Humanities Program

IBH 3BB3 - ORGANIZATIONAL STRATEGY

In this course, students will explore frameworks that help them conduct strategic analysis, and formulate and implement new strategies to improve organizational performance. The course is structured to provide strategic management tools and frameworks to assist organizations of all types, from public and private for-profit firms through social businesses and social enterprises to traditional non-profit and charitable organizations. Through case-based discussion, guest speakers, and experiential exercises, professors will push students to answer key questions such as: How do organizations across the for-profit and non-profit continuum define their purpose, and conceptualize, create, and capture value? How do these organizations analyze strategic opportunities and structure effective investments? What is the nature of competitive advantage in for-profit and non-profit contexts and how is it gained and sustained?

Lectures (3 hours)

Prerequisite(s): Registration in Level III or above in the Integrated Business and Humanities Program

IBH 3BC3 - POVERTY, PRIVILEGE AND PROTEST IN CANADIAN HISTORY

An examination of the political, economic, and social factors shaping the persistence of poverty in Canada in the 1800s and 1900s, together with an analysis of reactions to such inequality. This includes investigation of ideological divisions, ethnic relations, and gender dynamics within the working class and within the labour movement.

Lectures (3 hours), tutorial (1 hour)

Prerequisite(s): Registration in Level III or above in the Integrated Business and Humanities Program

IBH 3BD3 - INTERPERSONAL COMMUNICATION

This course offers an introduction to contemporary interpersonal communication theories and research. Topics include: small group communication, persuasive communication, argumentation strategies, conflict resolution and computer mediated, intercultural, international and political communication.

Lectures (3 hours), tutorial (1 hour)

Prerequisite(s): Registration in Level III or above in the Integrated Business and Humanities Program

IBH 3BE3 - OPERATIONS MANAGEMENT

Operations management (OM) is the science and art of creating and delivering goods and services to customers. Basic topics in operations management include goods and service design, facility design, locating facilities, quality management,

project planning, supply chain management, lean operating systems, forecasting customer demand, process strategy, and inventory management. These days this field of study is subjected to changes and challenges. Maintaining a sustainable environment while efficiently converting resources into safe and quality outputs, coordinating between operations and other business functions, increasing profitability while providing a safe workplace and honouring stakeholder commitments are a few to mention. These topics will be discussed in this introductory operations management course.

Lectures (three hours), tutorial (one hour)

Prerequisite(s): IBH 2AD3 and Registration in Level III of the Integrated Business and Humanities Program.

INTEGRATED BIOMEDICAL ENGINEERING AND HEALTH SCIENCES (IBEHS)

IBEHS 1EEO - INTRODUCTION TO THE ENGINEERING CO-OP PROGRAM

Orientation to Engineering Co-op programs, self-assessment exercises, job and employer research, cover letter and resume writing, interviewing skills and work place professionalism.

Five sessions; first or second term

Prerequisite(s): Registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) Co-op program

Cross-list(s): ENGINEER 1EEO

Not open to students in their final level.

IBEHS 1P10 A/B - HEALTH SOLUTIONS DESIGN PROJECTS I

Project-based integrated learning course using healthcare problems to teach design and engineering content. Topics in ethics and professionalism, health and safety, communication, visualization, computation, and materials introduced.

Three lectures, one lab (three hours), one tutorial (two hours); both terms

Prerequisite(s): Registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Antirequisite(s): ENGINEER 1C03, 1D04, 1P03, MATLS 1M03

IBEHS 2E06 A/B - HEALTH, ENGINEERING SCIENCE AND ENTREPRENEURSHIP I

The course will explore the concepts of human-centred design, foresight, and systems design as central to discovering and defining health problems. Students will develop capabilities in creative confidence and collaboration through group projects using a design thinking process.

Lecture (three hours); both terms

Prerequisite(s): IBEHS 1P10 A/B and registration in the Health, Engineering Science and Entrepreneurship Specialization of the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 2ECO - ENGINEERING WORK TERM

Minimum of 12 weeks of full-time employment in a professional environment.

First or second term

Prerequisite(s): Registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) Co-op program IBEHS 1EEO and permission from the Engineering Co-Op and Career Services.

Cross-list(s): ENGINEER 2ECO

Not open to students in their final level.

IBEHS 2P03 - HEALTH SOLUTIONS DESIGN PROJECTS II

Second course of the design and innovation sequence. Problem solving approaches discussed. Topics reinforced in the context of a biomedical engineering project conducted in multidisciplinary groups.

Two lectures, one lab (three hours); second term

Prerequisite(s): IBEHS 1P10 A/B and registration in Level II of the Integrated Biomedical Engineering and Health Sciences (IBEHS) program or registration in the Chemical Engineering & Bioengineering program.

Antirequisite(s): CHEMENG 4LL3

IBEHS 2R00 A/B - CURRENT RESEARCH INITIATIVES I

Each year students will complete 1.5 units of this course but final evaluation will occur in Level V. Students will attend and document 6-12 additional learning opportunities each year. This may include health science rounds and seminars in any faculty at any university. It may also include attending national or international meetings in the health science, business or engineering domains. The content of this process may inform activities in the Health Entrepreneurship courses and learning portfolios will be used for evaluation. To be completed during the second year of study.

One session; both terms

Prerequisite(s): Registration in the Health, Engineering Science and Entrepreneurship Specialization of the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 3A03 - BIOMEDICAL SIGNALS AND SYSTEMS

Linear systems, signals, input-output relations of linear systems; discrete and continuous time systems; transfer functions, Fourier transforms, Laplace transforms; sampling theory; stability.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): MATH 2Z03 and registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Antirequisite(s): SFWRENG 3MX3, ELECENG 3TP3

IBEHS 3E06 A/B - HEALTH, ENGINEERING SCIENCE AND ENTREPRENEURSHIP II

The course will continue to explore the concepts of entrepreneurship beginning with core curriculum integrated from organizational behaviour, leadership, finance and marketing, discovery, validation and design thinking. Students will work in groups on the creation of value from problems in the health and engineering disciplines. Lecture (three hours); both terms

Prerequisite(s): IBEHS 2E06 A/B and registration in the Health, Engineering Science and Entrepreneurship Specialization of the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 3P04 - HEALTH SOLUTIONS DESIGN PROJECTS III: ANALYSIS AND DECISION MAKING

Working in groups, students approach an open-ended design problem, applying design thinking, problem solving skills, systems analysis, simulation and optimization; topics in economic decision-making are introduced; oral and written communication is emphasized in the context of biomedical engineering activities.

Two lectures, one tutorial (two hours); second term

Prerequisite(s): IBEHS 2P03 and registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 3R00 A/B - CURRENT RESEARCH INITIATIVES II

Each year students will complete 1.5 units of this course but final evaluation will occur in Level V. Students will attend and document 6-12 additional learning opportunities each year. This may include health science rounds and seminars in any faculty at any university. It may also include attending national or international meetings in the health science, business or engineering domains. The content

of this process may inform activities in the Health Entrepreneurship courses and learning portfolios will be used for evaluation. To be completed during the third year of study.

One session; both terms

Prerequisite(s): IBEHS 2R00 A/B

IBEHS 4A03 - BIOMEDICAL CONTROL SYSTEMS

Modelling of control systems in the continuous-time domain; state space representations; model linearization; performance of control systems in time and frequency; stability; control design. Particular emphasis will be given to biomedical applications.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): IBEHS 3A03 and registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Antirequisite(s): ELECENG 3CL4, MECHENG 4R03

IBEHS 4B03 - BIOMECHANICS I

An introduction of engineering principles applied to biomechanics problems including cellular biomechanics, hemodynamics, circulatory system, respiratory system, muscles and movement and skeletal biomechanics.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): Registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Antirequisite(s): MECHENG 4BB3

IBEHS 4C03 - ENGINEERING BIostatISTICS

Probability theory, random variables, random processes, statistical inference, regression, correlation and error analysis.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): Registration in Level III or above of the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Antirequisite(s): STATS 3J04, STATS 3Y03, MATLS 3J03

IBEHS 4D03 - MEDICAL IMAGING I

Through this introductory course, students will learn methods of how medical images are formed, and will gain knowledge of the Fourier transform and its applications in medical imaging. Basic understanding of the sources of noise and artifacts in the different modalities will also be attained, along with an understanding of the limits to the achievable resolution. Imaging modalities that will be covered include ultrasound, x-rays, computed tomography and magnetic resonance imaging.

Two lectures, one lab (three hours); second term

Prerequisite(s): IBEHS 3A03 or registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 4E06 A/B - HEALTH, ENGINEERING SCIENCE AND ENTREPRENEURSHIP III

The course will explore the concepts of entrepreneurship beginning with core curriculum integrated from organizational behaviour, leadership, finance and marketing, discovery, validation and design thinking. Students will work in groups on the creation of value from problems in the health and engineering disciplines as these developed from IBEHS 3E06 A/B.

Two lecture hours; one three-hour tutorial; both terms

Prerequisite(s): IBEHS 3E06 A/B and registration in the Health, Engineering Science and Entrepreneurship Specialization of the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 4F04 - BIOMEDICAL INSTRUMENTATION AND MEASUREMENT

An introduction of engineering principles applied to the design of biomedical instrumentation including: electrodes, mechanical, chemical and other transducers;

signal processing and data acquisition; safety; neuromuscular; cardiovascular, biochemical, biomechanical and other clinical instrumentation.

Three lectures; one tutorial: one lab every other week; second term

Prerequisite(s): IBEHS 3A03, or registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS)

Antirequisite(s): ELECENG 4BD4

IBEHS 4P04 - HEALTH SOLUTIONS DESIGN PROJECTS IV: ECONOMICS AND PROJECT MANAGEMENT

Working in groups, students identify a healthcare need, connect with a client, propose and work towards solution, and present a proposal for development to a group of stakeholders; topics related to project management are introduced; applications in engineering economics, including time value of money, value engineering, cash flow analysis, and comparison methods.

Two lectures, one tutorial (two hours); first term

Prerequisite(s): IBEHS 3P04 and registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 4R00 A/B - CURRENT RESEARCH INITIATIVES III

Each year students will complete 1.5 units of this course but final evaluation will occur in Level V. Students will attend and document 6-12 additional learning opportunities each year. This may include health science rounds and seminars in any faculty at any university. It may also include attending national or international meetings in the health science, business or engineering domains. The content of this process may inform activities in the Health Entrepreneurship courses and learning portfolios will be used for evaluation. To be completed during the fourth year of study.

One session; both terms

Prerequisite(s): IBEHS 3R00 A/B

IBEHS 5A03 - MODELLING OF BIOLOGICAL SYSTEMS

Introduction to mathematical and engineering methods for describing and predicting the behaviour of biological systems; including sensory receptors, neuromuscular and biomechanical systems; statistical models of biological function; kinetic models of biological thermodynamics.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): Registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Antirequisite(s): ELECENG 4BC3

IBEHS 5B06 A/B - BIOMEDICAL CAPSTONE DESIGN PROJECT

The design process; safety; a term project composed of small teams of students including an oral presentation and written report.

Two lectures; both terms

Prerequisite(s): IBEHS 4P04 and registration in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 5E15 A/B - HEALTH, ENGINEERING SCIENCE AND ENTREPRENEURSHIP (CAPSTONE)

This course provides an opportunity for students to integrate and apply learning from the previous four years of the program. Projects and proposals from Health and Entrepreneurship courses will achieve maturity and will be examined by faculty members and members of the business, engineering and health communities outside the university. The final focus will be on quality entrepreneurship with the potential for high impact.

One lecture; both terms

Prerequisite(s): IBEHS 4E06 A/B and registration in the Health, Engineering Science and Entrepreneurship Specialization of the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

IBEHS 5R06 A/B - CURRENT RESEARCH INITIATIVES IV

Each year students will complete 1.5 units of this course, but final evaluation will occur in Level V. Students will attend and document 6-12 additional learning opportunities each year. This may include health science rounds and seminars in any faculty at any university. It may also include attending national or international meetings in the health science, business or engineering domains. The content of this process may inform activities in the Health Entrepreneurship courses and learning portfolios will be used for evaluation. To be completed during the 5th year of study.

One lecture; both terms

Prerequisite(s): IBEHS 4R00 A/B

INTERNATIONAL ENGAGEMENT

INTENG 2A03 A/B S - INTERNATIONAL ENGAGEMENT AT HOME

This course recognizes a local volunteer experience (a minimum of 100 hours) which promotes a deeper understanding of cross-cultural issues and linguistic diversity in the Canadian context. Students participate in defining learning goals and experiences.

Graded on a Pass/Fail basis.

Prerequisite(s): Registration in Level II or above

Students must contact the Humanities Academic Advising Office, CNH-107, for details on the application process.

Permission of the Associate Dean of the Faculty of Humanities is required.

INTENG 3A03 - INTERNATIONAL ENGAGEMENT CAPSTONE

Students will integrate and reflect upon aspects of their experiences within the Certificate in International Engagement, culminating in a final project (digital portfolio) and presentation (digital/poster). This course is to be completed under the supervision of an appropriate faculty member.

Graded on a Pass/Fail basis.

One term

Prerequisite(s): 3 units of INTL 2A03 A/B S or XCH credit

Students must contact the Humanities Academic Advising Office, CNH-107, for details on the application process.

Permission of the Associate Dean of the Faculty of Humanities is required.

INUKTITUT

Courses in Inuktitut are administered by the Indigenous Studies Program.

L.R. Wilson Hall, Room 1811, ext. 23788

<https://indigenous.mcmaster.ca>

INUKTUT 1Z03 - INTRODUCTION TO INUIT LANGUAGE AND CULTURE

The course will study Inuktitut, the Inuit language in spoken and written forms with attention to dialect differences across the Arctic.

3 hours (lecture and seminar); one term

INUKTUT 2Z03 - INTERMEDIATE INUKTITUT

This course expands on the vocabulary and the oral skills for Inuktitut. In addition, the course reviews the written component of the language.

3 hours; lecture and seminar: one term.

ITALIAN

Courses in Italian are administered by the Department of Linguistics and Languages.
Togo Salmon Hall, Room 629, ext. 24388

<http://linguistics.humanities.mcmaster.ca/>

Notes

1. Students should note that the Department has classified its Italian language courses under the following categories:

Introductory Level Language Course: ITALIAN 1Z06 A/B S

Intermediate Level Language Courses: ITALIAN 1A03, 1AA3, 2Z03, 2ZZ3

Advanced Level Language Courses: ITALIAN 3Z03

2. Not all courses are offered on an annual basis. Students should consult the timetable for available courses.
3. Students may be required to take a placement test in the Department of Linguistics and Languages to assess their proficiency in the language.
4. The following course is open as an elective to students registered in Level II or above of any undergraduate program.

ITALIAN 3X03 Italy Today Through Film (Taught in English)

Courses

If no prerequisite is listed, the course is open.

ITALIAN 1A03 - INTERMEDIATE ITALIAN I

Intended for students who already have knowledge of Italian. Reviews and extends grammar and vocabulary for composition and group oral practice through short presentations. Uses Italian film and popular music to explore northern and southern identities.

Three hours; one term

Prerequisite(s): Grade 12 U or M equivalent or other equivalent or permission of the Department

Antirequisite(s): ITALIAN 2Z03

The Department reserves the right to place students in the course most appropriate to their abilities.

ITALIAN 1AA3 - INTERMEDIATE ITALIAN II

Continues grammar and vocabulary expansion from ITALIAN 1A03. Uses Italian film and popular music to explore controversial cultural themes such as modern mafias. The sequel to this course is ITALIAN 3Z03.

Three hours; one term

Prerequisite(s): ITALIAN 1A03

Antirequisite(s): ITALIAN 2ZZ3

The Department reserves the right to place students in the course most appropriate to their abilities.

ITALIAN 1Z06 A/B S - BEGINNER'S INTENSIVE ITALIAN

Introduction to basic written and spoken Italian through Italian popular music and film. Students learn about polemic aspects of culture: language variation and identity, immigration, mafia and corruption, north/south tension. Delivered in a blended format.

Lecture and web module (three hours); two terms

Antirequisite(s): Grade 12 U or M equivalent

The Department reserves the right to place students in the course most appropriate to their abilities.

ITALIAN 2Z03 - INTERMEDIATE ITALIAN I

Intended for students who already have knowledge of Italian. Reviews and extends grammar and vocabulary for composition and group oral practice through short presentations. Uses Italian film and popular music to explore northern and southern identities.

Three hours; one term

Prerequisite(s): ITALIAN 1Z06 A/B

Antirequisite(s): ITALIAN 1A03

The Department reserves the right to place students in the course most appropriate to their abilities.

ITALIAN 2ZZ3 - INTERMEDIATE ITALIAN II

Continues grammar and vocabulary expansion from ITALIAN 2Z03. Uses Italian film and popular music to explore controversial cultural themes such as modern mafias. The sequel to this course is ITALIAN 3Z03.

Three hours; one term

Prerequisite(s): ITALIAN 2Z03

Antirequisite(s): ITALIAN 1AA3

The Department reserves the right to place students in the course most appropriate to their abilities.

ITALIAN 3X03 - ITALY TODAY THROUGH FILM (TAUGHT IN ENGLISH)

A survey of modern Italian culture (post-WWII) through film. Topics may include: the development of post-war consumption, Italy's economy, gender roles and the family, immigration, the North/South relationship, the mafia, political corruption and the media.

Three hours; one term

Prerequisite(s): Registration in Level II or above

ITALIAN 3Z03 - ADVANCED ITALIAN I

This course is designed to improve the student's written and oral proficiency through analysis of short stories and film.

Three hours; one term

Prerequisite(s): ITALIAN 1AA3 or 2ZZ3

ITALIAN 4I13 A/B S - INDEPENDENT STUDY

The student will prepare, under the supervision of a faculty member, a research paper involving independent study in an area where the student has already demonstrated competence.

Prerequisite(s): 12 units of Italian above Level I and permission of the Department

JAPANESE

Courses in Japanese language are administered by the Department of Linguistics and Languages.

Togo Salmon Hall, Room 629, ext. 24388

<http://linguistics.humanities.mcmaster.ca/>

For the requirements for the *Minor in Japanese Studies*, please see the *Department of Religious Studies* section of this calendar.

Note

Not all courses are offered on an annual basis. Students should consult the timetable for available courses.

Courses

If no prerequisite is listed, the course is open.

JAPANESE 1Z06 A/B S - BEGINNER'S INTENSIVE JAPANESE

An introduction to basic spoken and written discourse skills in Japanese. Acquisition of elementary grammar, kana/kanji scripts and oral communication skills will be emphasized. Open to students with no prior background in Japanese. The sequel to this course is JAPANESE 2Z03.

Three hours; two terms

The Department reserves the right to place students in the course most appropriate to their abilities.

JAPANESE 2Z03 - INTERMEDIATE INTENSIVE JAPANESE I

This course aims to further develop students' spoken and written discourse skills in Japanese. Acquisition of lower intermediate grammar, additional kanji scripts and oral communication skills will be emphasized. The sequel to this course is JAPANESE 2Z23.

Three hours; one term

Prerequisite(s): A grade of at least B- in JAPANESE 1Z06 A/B

Not open to students with credit in JAPANESE 2Z23. The Department reserves the right to place students in the course most appropriate to their abilities.

JAPANESE 2Z23 - INTERMEDIATE INTENSIVE JAPANESE II

This course aims to consolidate students' intermediate spoken and written discourse skills. Acquisition of higher intermediate grammar, additional kanji scripts and oral communication skills will be emphasized. The sequel to this course is JAPANESE 3Z03.

Three hours; one term

Prerequisite(s): JAPANESE 2Z03

The Department reserves the right to place students in the course most appropriate to their abilities.

KINESIOLOGY

Courses in Kinesiology are administered by the Department of Kinesiology, Ivor Wynne Centre, Room 219C, ext. 24462

<http://www.science.mcmaster.ca/kinesiology>

Department Notes

1. Kinesiology students may not register in Level III or IV Kinesiology courses until all appropriate required Level I and II Kinesiology courses have been successfully completed.
2. Not all Level III and IV Kinesiology courses are offered each year.
3. KINESIOL 1Y03 and 1YY3 (as of September 2013) are only available to Medical Radiation Sciences students.
4. KINESIOL 3A03 and 3V03 are available for elective credit for students enrolled in Level III or above of a non-Kinesiology program. Space for such students is limited and places are assigned on a first come basis.
5. KINESIOL 3E03 (or LIFESCI 3K03) may be used to satisfy Psychology course requirements for Kinesiology students pursuing a Minor in Psychology.
6. KINESIOL 2G03 may be used to satisfy Health Studies course requirements for Kinesiology students pursuing a Minor in Health Studies.
7. KINESIOL 4SS3 may be used to satisfy Gerontology course requirements for Kinesiology students pursuing a Minor in Gerontology.
8. Honours Biology (Physiology Specialization) students lacking KINESIOL 2Y03 and 2YY3 are strongly encouraged to contact the instructor of KINESIOL 2C03 to discuss possible prerequisite deficiencies.
9. Honours Biology (Physiology Specialization) students lacking KINESIOL 2Y03 and 2YY3 are strongly encouraged to contact the instructor of KINESIOL 2CC3 to discuss possible prerequisite deficiencies.
10. *Routine Practices*, an on-line module available through Mosaic (Health and Safety Training), must be completed prior to attendance in the first lab associated with each of: KINESIOL 1A03, 1AA3, 1Y03, 1YY3, 2Y03, 2YY3.

Courses

All courses are open only to Kinesiology students unless otherwise specified.

(See *Notes 3 and 4* above.)

KINESIOL 1A03 - HUMAN ANATOMY AND PHYSIOLOGY I

An introduction to the basic embryology and tissue development and examination of the anatomy and physiology of the nervous, articular, skeletal and muscular systems.

Two hours (lectures), one hour (web module), two hours (labs, alternating weeks); weekly tests; one term

Prerequisite(s): Registration in Level I Honours Kinesiology

Co-requisite(s): WHMIS 1A00 if not already completed. This requirement must be completed prior to the first lab. Routine Practice, a mandatory on-line health and safety module, available through Mosaic, must be completed prior to the first lab.

Antirequisite(s): HTHSCI 1D06 A/B, 1H06 A/B, 2F03, 2FF3, 2L03, 2LL3, KINESIOL 1Y03, 2Y03

KINESIOL 1AA3 - HUMAN ANATOMY AND PHYSIOLOGY II

An examination of the anatomy and physiology of the cardiovascular, respiratory, digestive, renal, endocrine and reproductive systems.

Two hours (lectures), one hour (web module), two hours (labs, alternating weeks); weekly tests; one term

Prerequisite(s): KINESIOL 1A03; and registration in Level I Honours Kinesiology

Co-requisite(s): WHMIS 1A00 if not already completed. This requirement must be completed prior to the first lab. Routine Practice, a mandatory on-line health and safety module, available through Mosaic, must be completed prior to the first lab.

Antirequisite(s): HTHSCI 1D06 A/B, 1H06 A/B, 2F03, 2FF3, 2L03, 2LL3, KINESIOL 1YY3, 2YY3

KINESIOL 1E03 - MOTOR CONTROL AND LEARNING

Examination of the behavioral and psychological principles of motor control and motor learning. Topics include measurement of motor performance, sensory processes, perception, memory, attention, practice and feedback, and neuroscience fundamentals in motor control.

Three hours (lectures, labs); one term

Prerequisite(s): Registration in Level I Honours Kinesiology

KINESIOL 1F03 - HUMAN NUTRITION AND HEALTH

An introduction to the study of human nutrition, with an examination of the role of nutrition, and, where applicable, physical activity in the prevention and treatment of chronic diseases.

Three hours (lectures); one term

Prerequisite(s): Registration in Level I Honours Kinesiology

KINESIOL 1K03 - FOUNDATIONS IN KINESIOLOGY

Introduces students to the field of kinesiology, describing how the various sub-disciplines integrate together into a unified understanding of the study of human movement. Students will also learn how knowledge is generated, interpreted and disseminated within the field of kinesiology, and be introduced to a variety of academic/career options that are available upon graduation.

Three hours (lectures, tutorial); one term

Prerequisite(s): Registration in Level I Honours Kinesiology

KINESIOL 1Y03 - HUMAN ANATOMY AND PHYSIOLOGY I

An introduction to the basic embryology and tissue development and examination of the anatomy and physiology of the nervous, articular, skeletal and muscular systems.

Two hours (lectures), one hour (web module), two hours (labs, alternating weeks); weekly tests; one term

Prerequisite(s): Registration in Level I Medical Radiation Sciences

Co-requisite(s): WHMIS 1A00 if not already completed. This requirement must be completed prior to the first lab. Routine Practice, a mandatory on-line health and safety module, available through Mosaic, must be completed prior to the first lab.

Antirequisite(s): HTHSCI 1D06 A/B, 1H06 A/B, 2F03, 2FF3, 2L03, 2LL3, KINESIOL 1A03, 2Y03

KINESIOL 1YY3 - HUMAN ANATOMY AND PHYSIOLOGY II

An examination of the anatomy and physiology of the cardiovascular, respiratory, digestive, renal, endocrine and reproductive systems.

Two hours (lectures), one hour (web module), two hours (labs, alternating weeks); weekly tests; one term

Prerequisite(s): KINESIOL 1Y03 and registration in Level I Medical Radiation Sciences

Co-requisite(s): WHMIS 1A00 if not already completed. This requirement must be completed prior to the first lab. Routine Practice, a mandatory on-line health and safety module, available through Mosaic, must be completed prior to the first lab.

Antirequisite(s): HTHSCI 1D06 A/B, 1H06 A/B, 2F03, 2FF3, 2L03, 2LL3, KINESIOL 1AA3, 2YY3

KINESIOL 2A03 - BIOMECHANICS

An introduction to the analysis of human motion using fundamental mechanical principles, with a focus on inquiry and laboratory skills.

Lectures (three hours), labs (two hours); one term

Prerequisite(s): Registration in Level II of a Kinesiology program

Antirequisite(s): LIFESCI 3J03

KINESIOL 2C03 - NEUROMUSCULAR EXERCISE PHYSIOLOGY

Examination of neuromuscular function during exercise, with an emphasis on factors limiting strength, speed and power performance. Adaptations to training will also be considered, as well as mechanisms of training-induced muscle damage.

Lectures (three hours), labs (two hours); one term

Prerequisite(s): KINESIOL 1A03 and 1AA3 and registration in Level II of a Kinesiology program; or both KINESIOL 2Y03 and 2YY3 (or KINESIOL 1Y03 and 1YY3), or BIOLOGY 2A03, and registration in Honours Biology (Physiology) (see *Department Note 8* above.)

KINESIOL 2CC3 - CARDIORESPIRATORY AND METABOLIC EXERCISE PHYSIOLOGY

Examination of cardiorespiratory function and metabolic regulation during exercise, with emphasis on factors limiting human performance. Adaptations to training will also be considered.

Lectures (three hours), labs (two hours); one term

Prerequisite(s): KINESIOL 1A03, 1AA3, 1F03 and registration in Level II of a Kinesiology program; or both KINESIOL 2Y03 and 2YY3 (or KINESIOL 1Y03 and 1YY3), or BIOLOGY 2A03, and registration in Honours Biology (Physiology) (see *Department Note 9* above.)

KINESIOL 2E03 - MUSCULOSKELETAL ANATOMY

Examination of anatomy with a focus on bones, joints, muscles and connective tissues of the spine and extremities. Experiential approach to functional movement analysis.

Lectures (two hours), labs (two hours); one term

Prerequisite(s): KINESIOL 1A03, 1AA3 and registration in Level II of a Kinesiology program

KINESIOL 2F03 - GROWTH, MATURATION AND PHYSICAL ACTIVITY IN CHILDREN AND YOUTH

Examines the growth and maturation from various perspectives (i.e., biological, behavioural/psychological and social/environmental), and the influence these processes have on physical activity in the first two decades of life.

Lectures (three hours); one term

Prerequisite(s): KINESIOL 1A03, 1AA3, 1E03 and registration in Level II of a Kinesiology program

KINESIOL 2G03 - HEALTH PSYCHOLOGY

An introduction to health psychology that examines the interplay between psychology and biology, emphasizing the complexity of maintaining health and preventing disease. Topics include sleep, stress, addictions, pain, and mental health.

Lectures (three hours); one term

Prerequisite(s): Registration in Level II of a Kinesiology program

Antirequisite(s): HTHSCI 2J03

KINESIOL 2Y03 - HUMAN ANATOMY AND PHYSIOLOGY I

An introduction to the basic embryology and tissue development and examination of the anatomy and physiology of the nervous, articular, skeletal and muscular systems.

Two hours (lectures), one hour (web module), two hours (labs, alternating weeks); weekly tests; one term

Prerequisite(s): Grade 12 Biology U or BIOLOGY 1P03; and registration in Level II or above

Co-requisite(s): WHMIS 1A00, if not already completed. This requirement must be completed prior to the first lab. Routine Practice, a mandatory on-line health and safety module, available through Mosaic, must be completed prior to the first lab.

Antirequisite(s): HTHSCI 1D06 A/B, 1H06 A/B, 2F03, 2FF3, 2L03, 2LL3, KINESIOL 1A03, 1Y03

Registration priority is given to students in a Life Sciences program.

KINESIOL 2YY3 - HUMAN ANATOMY AND PHYSIOLOGY II

An examination of the anatomy and physiology of the cardiovascular, lymphatic respiratory, digestive, renal endocrine and reproductive systems.

Two hours (lectures), one hour (web module), two hours (labs, alternating weeks); weekly tests; one term

Prerequisite(s): KINESIOL 1Y03 or 2Y03; and registration in Level II or above

Co-requisite(s): WHMIS 1A00, if not already completed. This requirement must be completed prior to the first lab. Routine Practice, a mandatory on-line health and safety module, available through Mosaic, must be completed prior to the first lab.

Antirequisite(s): HTHSCI 1D06 A/B, 1H06 A/B, 2F03, 2FF3, 2L03, 2LL3, KINESIOL 1AA3, 1YY3

Registration priority is given to students in a Life Sciences program.

KINESIOL 3A03 - HISTORY OF EXERCISE AND SPORTS MEDICINE

Selected topics in the social and cultural history of exercise and sports medicine in the Western World, with an emphasis on 19th- and 20th-century developments in North America.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above

Antirequisite(s): HISTORY 3S03

This course is administered by the Department of History.

KINESIOL 3AA3 - BIOMECHANICS II

Study of kinematics and kinetics of human movement, including electromyography, fluid and tissue mechanics with applications.

Lectures, lab (three hours); one term

Prerequisite(s): KINESIOL 2A03 and registration in Level III or above of an Honours Kinesiology program

KINESIOL 3B03 - ADAPTED PHYSICAL ACTIVITY

An introduction to developmental, emotional, behavioural, learning and orthopedic disabilities with an emphasis on adapting physical activity to meet individual needs.

Lectures and student-led interactive group presentations (three hours); one term

Prerequisite(s): Six units from HTHSCI 1D06 A/B, 1H06 A/B, 2F03, 2FF3, 2L03, 2LL3, KINESIOL 1A03, 1AA3, 1Y03, 1YY3, 2Y03, 2YY3; and registration in Level III or above

This course may be taken as elective credit by undergraduates in Level III or above of a non-Kinesiology program. However, enrolment for such students is limited.

KINESIOL 3BB3 - EXPLORING MOVEMENT AND POSTURE

An exploration of fundamental topics such as gait, posture, and the evaluation of musculoskeletal function. Course is designed to help students further develop knowledge and professional skills relevant to health care and human performance. Lectures, lab (four hours); one term

Prerequisite(s): KINESIOL 2A03, 2E03, and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 3E03 - NEURAL CONTROL OF HUMAN MOVEMENT

Neuromuscular control underlying human movement. Topics include basic neuro-physiology, mechanisms of sensation, reflexes, voluntary movement and theories of motor control with special reference to brain function.

Lectures (three hours); one term

Prerequisite(s): Registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)
Antirequisite(s): LIFESCI 3K03

KINESIOL 3F03 - ATHLETIC TRAINING & CONDITIONING

This course focuses on fundamental principles of strength and conditioning for high performance athletes. Theory explored in the classroom and will be applied in a lab setting.

Lectures/labs (four hours); one term

Prerequisite(s): Registration in Level III or above of Honours Kinesiology

KINESIOL 3H03 - EXERCISE PSYCHOLOGY

Examination of psychological antecedents and consequences of exercise. Emphasis is placed on using theory and research to understand and improve exercise participation.

Lectures/tutorials(three hours); one term

Prerequisite(s): KINESIOL 2G03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 3HN3 - HUMAN NEUROPHYSIOLOGY

Provides an in-depth exploration of the sensorimotor cortex and spinal pathways that control movement of the upper and lower limbs. Topics will include mono and poly-synaptic reflex pathways and their modulation, electrophysiology measures as indices of nerve conduction, non-invasive brain stimulation, and electroencephalography. Emphasis placed on gaining theoretical and technical skills to perform human neurophysiology.

Lectures/lab (three hours); one term

Prerequisite(s): Registration in Level III or above of Honours Kinesiology

KINESIOL 3K03 - SPORTS INJURIES

This course will focus on an understanding of mechanism of injury, and injury prevention as applied to common injuries associated with sport and physical activity. Emphasis is placed on developing fundamental injury assessment and treatment skills.

Lectures (two hours), lab (two hours); one term

Prerequisite(s): KINESIOL 2E03; and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

Approximately \$20.00 will be charged for supplies used in labs.

KINESIOL 3L03 - EXERCISE TESTING AND PRESCRIPTION

Emphasis on exercise testing and prescription for the healthy adult population. Field and laboratory techniques for exercise testing, interpretation, and exercise prescription are major topics. Students can apply this information to advanced fitness appraisal and prescription certifications.

Three hours (lectures), two hours (labs); one term

Prerequisite(s): KINESIOL 2C03, 2CC3 and registration in Level III or above of Honours Kinesiology

KINESIOL 3N03 - ERGONOMICS I: WORKPLACE INJURY RISK ASSESSMENT

Analysis and quantification of musculoskeletal injury risks in the workplace, with an emphasis on reducing work related low back and upper extremity disorders. Lecture (three hours), lab (one hour); one term

Prerequisite(s): Registration in Level III or above of Honours Kinesiology

KINESIOL 3Q03 - MOTOR DEVELOPMENT ACROSS THE LIFESPAN

Introduction to motor development theories, principles and concepts covering the human life span. Topics include, early motor development during childhood, the maturation of perceptual-motor process during adolescence, the stabilization period during adulthood and changes that accompany aging.

Lectures (three hours); one term

Prerequisite(s): KINESIOL 1E03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 3RP3 - KINESIOLOGY RESEARCH PRACTICUM

This placement course provides students in Honours Kinesiology the opportunity to explore different research laboratory experiences within the Department of Kinesiology. Students will complete a final paper related to the research laboratory experience.

Students are responsible for arranging a suitable laboratory experience and supervision (from a Kinesiology faculty member), and are required to submit an application to the Kinesiology Academic Program Advisor thirty days prior to the start of Term (application/information can be found at <http://www.science.mcmaster.ca/kinesiology/undergraduate-studies/courses.html>).

Normally students will spend 60 hours in the laboratory during the placement, occasional lecture; one term

Prerequisite(s): Registration in Level III or above of Honours Kinesiology

KINESIOL 3U03 - HUMAN GROWTH AND MATURATION

In depth analysis of genetic and endocrine influences on the morphological and functional development of fat, skeletal muscle and bone tissue during childhood, in the context of exercise, physical performance capacity and health.

Lecture/seminar (three hours); one term

Prerequisite(s): KINESIOL 2F03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 3V03 - SPORT PSYCHOLOGY

This course examines how psychological factors influence and are influenced by participation and performance in sport. Topics include: personality, motivation, arousal, attitude, perception, aggression, competition, concentration confidence and goal setting.

Three lectures; one term

Prerequisite(s): Registration in Level III or above

This course may be taken as elective credit by undergraduates in Level III or above of a non-Kinesiology program. However, enrolment for such students is limited.

KINESIOL 3Y03 - HUMAN NUTRITION AND METABOLISM

An in-depth analysis of human nutrition and metabolism, with an emphasis on the impact of diet on human physical performance in both healthy and chronic disease states.

Lectures (three hours); one term

Prerequisite(s): KINESIOL 1F03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 3Z03 - NEUROMUSCULAR PLASTICITY IN HEALTH AND DISEASE

This course is designed to provide students with an advanced understanding of peripheral neuromuscular biology (i.e., motor neuron, neuromuscular synapse, skeletal muscle) as it applies to exercise and select neuromuscular disorders. Emphasis will be on the cellular mechanisms that regulate neuromuscular plasticity in response to acute and chronic physical activity in healthy individuals, as well as in pre-clinical models of disease and in patients with neuromuscular disorders. Three lectures; one term

Prerequisite(s): KINESIOL 2C03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4A03 - ADVANCED BIOMECHANICS

In-depth study of the mechanics of human movement including the topics of multi-linked segment analysis, individual muscle force estimation, 3-D forces and moments, fluid resistance, optimization, efficiency and power flow. The laboratory component covers the scientific method, data acquisition, instrumentation and numerical methods.

Lectures, labs (three hours); one term

Prerequisite(s): KINESIOL 2A03, 3AA3 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4AA3 - APPLIED BIOMECHANICS

A combination of lectures and problem based learning on aspects of human movement facing the modern biomechanist. Topics and problems are taken from occupational, clinical and sport biomechanics.

Lectures, tutorials (three hours); one term

Prerequisite(s): KINESIOL 2A03, 3AA3 and registration in Level III or above of Honours Kinesiology

Antirequisite(s): LIFESCI 4Y03

KINESIOL 4B03 - CARDIOVASCULAR DISEASE: PATHOPHYSIOLOGY AND REHABILITATION

An examination of the pathophysiology of cardiovascular disease and evidence-based guidelines for its diagnosis, management, and rehabilitation.

Three lectures; one term

Prerequisite(s): KINESIOL 2C03, 2CC3 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4BB3 - ERGONOMICS II: MECHANISM OF INJURY AND PREVENTION

An investigation of injury mechanisms, injury epidemiology, and job design consideration, using advanced techniques. Insights are gained from current literature, common practices and policies. Students work in small groups to resolve ergonomic problems in the workplace.

Lectures, labs (four hours); one term

Prerequisite(s): KINESIOL 3N03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4C03 - INTEGRATIVE PHYSIOLOGY OF HUMAN PERFORMANCE

A detailed analysis of the physiological factors that regulate human physical performance. Emphasis is placed on the body's integrative response to exercise and the influence of physical training, and altered environmental or metabolic conditions.

Three hours (lectures), two hours (lab); one term

Prerequisite(s): KINESIOL 2CC3 and registration in Level III or above of Honours Kinesiology; or BIOLOGY 2A03, KINESIOL 2CC3 and registration in Honours Biology (Physiology)

KINESIOL 4CN3 - CLINICAL NEUROPHYSIOLOGY

This course will explore fundamental topics in neurophysiology that are pertinent to understanding populations with movement disorders of neurological basis.

Two hours (lectures), two hours (labs) every third week; one term

Prerequisite(s): KINESIOL 3E03 and registration in Level III or above of Honours Kinesiology

Prerequisite(s) (EFFECTIVE 2020-2021): KINESIOL 3E03, 3HN3 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4EE3 - PROFESSIONAL PLACEMENT IN KINESIOLOGY

Students take part in a supervised practical experience that links classroom knowledge to professional practice. Students may secure their own placement, subject to approval, or accept departmentally approved placements. Placements are offered in all kinesiology sub-disciplines. Students will do an oral presentation at end of term.

Placement experience must be at least 60 hours (equivalent to one day per week); one hour (lecture/presentation); one term

Prerequisite(s): Registration in Level IV of Honours Kinesiology

KINESIOL 4GG3 - CLINICAL BIOMECHANICS

Examination of current research in clinical biomechanics relating to injury mechanisms, rehabilitation and surgery, as well as analysis of normal and pathological gait. Lectures, labs/tutorials (four hours); one term

Prerequisite(s): Registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4H03 - PHYSICAL ACTIVITY BEHAVIOUR CHANGE

An examination of design, delivery and evaluation of interventions to promote adoption and maintenance of physical activity in individuals, groups and communities. Lectures/seminars (three hours); one term

Prerequisite(s): KINESIOL 2G03 and 3H03; and registration in Level III or above of Honours Kinesiology

KINESIOL 4J03 - FUNCTIONAL ANATOMY

A hands-on applied study of anatomy for independent learners. The focus is on palpating the structures of the osseous, articular, muscular, and supportive systems, testing these structures, and how each structure functions to support the body as a whole.

Labs (four hours); one term

Prerequisite(s): KINESIOL 3K03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4KK3 - FUNDAMENTALS OF REHABILITATION

Outlines the basic foundations of orthopaedic rehabilitation including pathophysiology, clinical biomechanics, and exercise prescription. Therapeutic modalities will be introduced. Laboratory activities complement lecture material and provide opportunity to develop professional skills.

Lectures, lab (four hours); one term

Prerequisite(s): KINESIOL 3K03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

Approximately \$25.00 will be charged for supplies used in labs.

KINESIOL 4Q03 - PAEDIATRIC EXERCISE PHYSIOLOGY

Physiologic aspects of physical activity and exercise in children and adolescents in health and disease.

Lectures/seminars/labs (three hours); one term

Prerequisite(s): KINESIOL 3U03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4RR6 A/B - THESIS

Independent project involving a research topic under the supervision of a faculty member in the Department of Kinesiology at McMaster University. The project involves developing a research proposal, a literature review, design of methodology, data collection and analysis, a research report appropriate to the sub-discipline, and an oral presentation.

Lecture (one hour); two terms

Prerequisite(s): Registration in Level IV of Honours Kinesiology with a minimum C.A. of 8.5 and permission of the instructor

KINESIOL 4S03 - PHYSICAL ACTIVITY IN CHRONIC HEALTH IMPAIRMENTS

Focus on specific health impairments prevalent in our society and the various benefits/risks of physical activity in these populations.

Two lectures, one seminar (three hours); one term

Prerequisite(s): KINESIOL 3B03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4SS3 - HUMAN AGING: BIOLOGICAL AND LIFESTYLE INFLUENCES

The interrelationship between biological processes of aging and associated lifestyle factors (e.g. exercise/inactivity) will be explored in various human systems.

Lectures (three hours); one term

Prerequisite(s): KINESIOL 1A03, 1AA3, 2C03, 2CC3, 2G03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4V03 - HUMAN FACTORS AND COGNITIVE ERGONOMICS

The abilities and limitations of human performance are examined with respect to how individuals interact with their environment.

Lectures (three hours); one term

Prerequisite(s): KINESIOL 1E03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

KINESIOL 4Y03 - COGNITIVE NEUROSCIENCE OF EXERCISE

Provides a detailed understanding of the impact that physical activity has on the structure and function of the brain, with an emphasis on cognitive outcomes.

One lecture (two hours), one lab (one hour); one term

Prerequisite(s): KINESIOL 3H03 and registration in Level III or above of Honours Kinesiology (B.Sc.Kin.)

LABOUR STUDIES

Courses in Labour Studies are administered by the School of Labour Studies.

Kenneth Taylor Hall, Room 717, ext. 24692

<http://www.labourstudies.mcmaster.ca>

Note

Some Labour Studies courses may be taken for elective credit by qualified students registered in any program, however, space for such students is limited and permission of the Director is required. Please refer to the individual courses and prerequisites.

The Honours B.A. Program and the B.A. Program in Labour Studies are supervised and coordinated by an interdisciplinary Labour Studies Committee.

Labour Studies Committee

Chair

Stephanie Ross (*Labour Studies*)

Members

David Goutor (*Labour Studies*)

Judy Fudge (*Labour Studies*)

Wayne Lewchuk (*Economics; Labour Studies*)

Suzanne Mills (*Labour Studies; Geography and Earth Sciences*)

Geraldina Polanco (*Labour Studies; Sociology*)

Stephanie Premji (*Labour Studies; Health, Aging and Society*)

Courses

If no prerequisite is listed, the course is open.

LABRST 1A03 - AN INTRODUCTION TO LABOUR IN CANADA

An examination of how workers experiences have been shaped by economic and technological change, and by gender, ethnicity and race. It will explore how workers have organized in the workplace and beyond to create positive social change.

Lectures and discussions; one term

LABRST 1C03 - THE FUTURE OF WORK

This course will explore how workers fight for workplace rights, better jobs and healthier safer workplaces. It will also explore why inequalities along the lines of class, race and gender are highly pronounced in today's economy and society, which is supposed to be globalized and cosmopolitan.

Lectures and discussion; one term

Antirequisite(s): LABRST 2D03

LABRST 2A03 - UNIONS IN ACTION

How do unions work? How do they go about representing their members and mobilizing workers in the workplace and beyond? How do they grapple with the main issues facing workers, and renew their movement going forward? This course will explore the internal structure of unions, and assess what unions do well and where they are less effective. Students will also learn how unions make decisions and try to influence policy-making through participatory exercises and a simulated labour convention.

Lecture and group work/simulation; one term

Prerequisite(s): Registration in a Labour Studies program or permission of the Director

LABRST 2C03 - THEORETICAL FOUNDATIONS OF LABOUR STUDIES

This course examines the political, economic and sociological approaches to understanding work and labour in capitalist societies. Key concepts explored include private property, competition, the labour market, the labour process, the state and its role, the production of social inequality (including social class, gender, race, and ability), and the nature of various forms of oppositional consciousness and social movements.

Lectures and discussion; one term

Prerequisite(s): Registration in a Labour Studies program or permission of the Director

Antirequisite(s): LABRST 1B03

LABRST 2G03 - LABOUR AND GLOBALIZATION

Neoliberal globalization is often associated with the rise of transnational corporations, free trade agreements, and the imposition of neoliberal policies on governments through the core international economic institutions. These processes sometimes feel far away from our everyday lives and struggles in the workplace. How have these processes impacted the lives of workers in both the Global North and Global South? How have they shaped prospects for resistance? How have workers and workers' organizations responded to these challenges? In this course we will examine how globalization has shaped the lives of workers, working conditions, working class politics and democracy. We will also explore how workers have been developing strategies to challenge these processes, including forms of international labour solidarity, transnational union coordination as well as union coordination with unorganized, informal and unemployed workers and social movements.

Lectures and discussion; one term

Prerequisite(s): LABRST 1C03; priority is given to students registered in a Labour Studies program

LABRST 2H03 - SPORTS, WORK AND LABOUR

For a number of reasons - including fame and fortune - athletes are not perceived to be workers. But, most professional athletes are in highly precarious employment relationships, are member of unions, engage in collective bargaining, go on strike and get injured on the ice, on courts and playing fields. This course will explore the lives of sports workers to see if the work they do is worth the rewards they receive and the risks they take.

Lectures and discussion; one term

Prerequisite(s): Registration in any program Level II or above. Priority is given to students registered in a Labour Studies program.

LABRST 2J03 - WORK AND RACISM

This course explores individual and systemic racism in the Canadian labour market through the experiences of Aboriginal peoples, immigrants, and racialized, linguistic and cultural minorities. Beginning with colonialism, the course provides historical and contemporary perspectives on racism in job allocation, work relationships, labour struggles, and social welfare systems. It also analyses public policy, employer, union and grassroots solutions to employment-related racial discrimination.

Lectures and discussion; one term

Prerequisite(s): Registration in any program Level II or above. Priority is given to students registered in a Labour Studies program.

LABRST 2K03 - WILL ROBOTS TAKE ALL OUR JOBS

This course explores technology and the future of work. Fears that technological advances would leave no work remaining for people have existed since the beginning of industrialization; are the fears justified in the 21st century with the advent of robots, artificial intelligence and other technology? What jobs are most vulnerable to being automated? How should labour and the public organize so that machines can enhance our lives instead of threatening our livelihood?

Three hours (lecture and discussion); one term

Prerequisite(s): Registration in any program Level II or above. Priority is given to students enrolled in a Labour Studies program

LABRST 2M03 - POP CULTURE, MEDIA AND WORK

The "medium is the message." If this famous quote is true, what messages are television, movies and music giving us about the types of work most of us do? This course will explore how workers are portrayed in the dominant media and how these portrayals both reflect and shape our identities and popular culture.

Lectures and discussion; one term

Prerequisite(s): Registration in any program Level II or above. Priority is given to students registered in a Labour Studies program

LABRST 2W03 - HUMAN RIGHTS AND SOCIAL JUSTICE

An introduction to the growing national and international discussion of human rights, exploring the value and limitations of universal rights, equality under the law and social justice.

Lectures (three hours); one term

Prerequisite(s): WOMENST 1A03 or 1AA3; or PEACEST 1A03, 1B03; or registration in any Labour Studies program

Cross-list(s): WOMENST 2A03 , PEACEST 2B03

This course is administered by Peace Studies Program.

LABRST 3A03 - ECONOMICS OF LABOUR MARKET ISSUES

This course applies economic analysis to issues of importance in the labour market. Topics vary and may include: women in the Canadian labour market, discrimination in hiring and promotion, unemployment, job loss and workplace closing, work sharing.

Three lectures; one term

Prerequisite(s): ECON 1A06, or both ECON 1B03 and 1BB3, and registration in a Labour Studies program; or permission of the Director

Cross-list(s): ECON 2A03

Not open to students with credit or registration in ECON 3D03. This course is administered by the Department of Economics.

LABRST 3B03 - ECONOMICS OF TRADE UNIONISM AND LABOUR

Topics will include the economics of the labour market, the impact of trade unions on the labour market, economic theories of strikes, trade unions and the state.

Lectures and discussion; one term

Prerequisite(s): ECON 1B03, ECON 1BB3 and registration in a Labour Studies program; or permission of the Director

Cross-list(s): ECON 2T03

This course is administered by the Department of Economics.

LABRST 3C03 - LABOUR AND EMPLOYMENT LAW

The law plays a major role in shaping almost every aspect of work, from the workers basic duties on the job, through their right to organize, to how and when unions are allowed to bargain and go on strike. But how does the law frame these workplace issues? What interests - the workers, the employers, the public - does the law try to balance, and which side does it favour?

Lectures; one term

Prerequisite(s): LABRST 2A03 and registration in a Labour Studies program; or permission of the Director

Cross-list(s): COMMERCE 4BF3

LABRST 3D03 - WORK: DANGEROUS TO YOUR HEALTH?

Working in steel factories and automobile assembly plants can be dangerous and unhealthy. But what about jobs in offices or retail or fast food or nursing or teaching? Are these jobs healthier? Are they safer? Workers in these jobs talk about high levels of stress, violence and musculoskeletal pain. This course will examine the causes and consequences of these health and safety issues. It will also examine current health and safety and workers' compensation laws to find out what workers need to better protect their bodies at work.

Lectures and discussion; one term

Prerequisite(s): Registration in Level III or above of a Health, Aging and Society or Labour Studies program or permission of the Director

Antirequisite(s): HEALTHST 3C03

Cross-list(s): HLTHAGE 3DD3

Generally offered in alternate years.

LABRST 3E03 - GENDER, SEXUALITY AND WORK

An examination of the historical and contemporary relations between women and work, and women and unionism. Topics will include the evolution and structure of the gender division of labour, women and the labour market, and the relationship of women to the labour movement.

Lectures and discussion; one term

Prerequisite(s): LABRST 2A03 and registration in a Labour Studies program; or permission of the Director

Generally offered in alternate years.

LABRST 3H03 - RESEARCH METHODS

How do we learn about our social world? How do we know if our ideas about the world are true? How do we find answers to new and important questions about our social world? Research is a central component to understanding important issues related to the study of work and labour. In this course students will learn the basic tools and strategies necessary to become a researcher. They will learn what methods are necessary to answer different questions and how to design their own research projects, including how to collect and analyze data. In this course students will also learn essential critical skills to assess the research of others.

This course is a useful and practical course that helps students prepare for Level IV thesis or field work.

Lectures and discussion; one term

Prerequisite(s): Registration in Level III or IV of an Honours Labour Studies program

Antirequisite(s): LABRST 4A06 A/B

LABRST 3J03 - INDEPENDENT STUDY

Independent study of a research problem to be arranged between student and instructor. It is incumbent on the student to secure arrangements with the supervising instructor and present a written proposal to the Director for approval prior to registration.

One term

Prerequisite(s): Registration in Level III or IV of an Honours Labour Studies program and permission of the Director

LABRST 3K03 - ON THE MOVE: WORKERS IN A GLOBAL WORLD

In this course, we will examine the organization of work through a critical lens of mobility. We will address questions like: what sectors and people are most likely to move? What facilitates / hinders mobility? How does (im)mobility condition inequality? By considering how movement facilitates different work arrangements (across time and space), and how power shapes these processes, this course provides a foundation for developing a deeper understanding into the role of mobility in the organization of work.

Three hours (lecture and discussion); one term

Prerequisite(s): Registration in any level 3 program or above. Preference given to Students enrolled in the Labour Studies Program

LABRST 3L03 - LABOUR POLICY AND ADVOCACY

This course explores the way that governments shape and regulate the labour market, the workplace and the lives of workers, and the ways that workers organize collectively to advocate for policy change. Issues explored include un/employment insurance, social assistance, education and training, job creation and industrial policy, employment standards, immigration, pay and employment equity, child care, and retirement.

Three hours (lecture and discussion); one term

Prerequisite(s): LABRST 2A03, and registration in a Labour Studies program or permission of the Director

LABRST 3T03 - POVERTY AND HOMELESSNESS

This course will critically examine social work practices and policies in response to poverty and homelessness including causes, lived experiences, service provision, policy options and activist responses.

Discussion, exercises; one term

Prerequisite(s): Registration in a Social Work program, or SOCWORK 1A06 A/B and registration in Level III or above of any program. Not open to students with credit in SOCWORK 4G03 if the topic was Poverty and Homelessness. Administered by the School of Social Work.

Cross-list(s): SOCWORK 3T03

LABRST 4A06 A/B - RESEARCH AND FIELD EXPERIENCE

This course gives students experience outside of the classroom by placing them with an organization that deals with labour issues - a union, a community group, or a government agency. Students will gain valuable field experience, and do guided research at their placement which they will use to write a final report. There is also a thesis option, which allows students to choose their own topic in Labour Studies, research it in depth, and write a major analytical paper. Enrolment in the field experience option is limited; students must apply to the Labour Studies Office by March 1.

Two terms

Prerequisite(s): LABRST 3H03 and registration in Level IV of an Honours Labour Studies program

LABRST 4C03 - PUBLIC SECTOR COLLECTIVE BARGAINING

This course examines unionization and collective bargaining for employees in the public, and para-public sectors. The topics covered include the origin and growth of public sector unions, models of public sector bargaining, legal aspects of bargaining rights and impasse resolution, bargaining issues and bargaining outcomes, and empirical studies of the effectiveness of dispute resolution procedures.

Lectures and discussion; one term

Prerequisite(s): COMMERCE 4BC3 recommended. Registration in Level III or IV of a Labour Studies program

Cross-list(s): COMMERCE 4BG3

This course is administered by the School of Business.

LABRST 4F03 - WORK AND THE ENVIRONMENT

Who bears the cost of environmental degradation? How does our current economic system shape possibilities for environmental justice? Is there such a thing as working class environmentalism? And how do issues of environmental justice get taken up by trade unions? Struggles for environmental justice include everything from fighting against climate change and fighting for access to clean drinking water, to battles over health and safety in the workplace. In this course we will examine how social relations under capitalism shape our interactions with nature and create patterns of work and inequality. We will also explore the varied ways workers and workers organizations have responded to issues of environmental injustice.

Lectures and seminar discussion; one term

Prerequisite(s): Registration in Level IV of a Labour Studies program; or permission of the Director

Cross-list(s): GEOG 4LW3

Not open to students with credit in LABRST 3F03 if the topic was Labour and the Environment (per the 2009-2010 session).

LABRST 4G03 - ADVANCED TOPICS IN LABOUR STUDIES

Topics of current interest to students in Labour Studies, with emphasis on current theory and research. Students should consult the Labour Studies Office concerning the topics to be examined.

Lectures and seminar discussion; one term

Prerequisite(s): Registration in Level III or IV of an Honours Labour Studies program or permission of the Director

Labour Studies 4G03 may be repeated if on a different topic, to a total of six units.

LABRST 4H03 - WORKING PRECARIOUSLY: LABOUR STRATEGIES, LABOUR RENEWAL

Precarious work is rising. In the Global North, these insecure, often low-waged jobs are now becoming commonplace. How did precarious work arise and how does it affect our lives? How does race, gender, location and citizenship impact who is more likely to be precarious? What processes and policies enable precarious work? What strategies have workers used to challenge precarious work? How effective are they? In this course we will explore the nature of precarious work, its effects, and the range of strategies available to workers and workers' organizations to fight precarity including new forms of unionism, innovative workplace tactics, growing linkages between labour and social movements, and new types of political initiatives.

Lectures and seminar discussion; one term.

Prerequisite(s): Registration in Level IV of an Honours Labour Studies program or permission of the Director

LATIN

Courses in Latin are administered by the Department of Classics.

Togo Salmon Hall, Room 706 , ext. 24311

<http://classics.humanities.mcmaster.ca/>

No language other than English is required for courses in Latin.

Notes

1. Students should note that the Department has classified its Latin language courses under the following categories:

Introductory Level Language Courses: LATIN 1Z03, 1ZZ3

Intermediate Level Language Courses: LATIN 2A03, 2AA3

2. The following courses are available as electives to qualified students in any program:

Latin Language and Literature LATIN 1Z03, 1ZZ3, 2A03, 2AA3, 3AA3, 3B03, 3BB3

3. Students with Grade 12 Latin U should normally register in LATIN 2A03, but with special permission, may register in either LATIN 1Z03, 1ZZ3.

Courses

If no prerequisite is listed, the course is open.

LATIN 1Z03 - BEGINNER'S INTENSIVE LATIN I

A rapid introduction to the basic grammar of Classical Latin.

Lectures and tutorials (four hours); one term

Not open to graduates of Grade 12 Latin U, who must obtain special permission to register in the course.

LATIN 1ZZ3 - BEGINNER'S INTENSIVE LATIN II

This course continues the study of Latin grammar begun in LATIN 1Z03.

Four hours (lectures and tutorials); one term

Prerequisite(s): LATIN 1Z03. Students with Grade 12 Latin U must obtain special permission to register in the course.

This course, with a grade of at least C, is accepted as a prerequisite for admission to any Honours program in Classics, or, with a grade of at least C-, for admission to the B.A. program in Classics.

LATIN 2A03 - INTERMEDIATE LATIN I

This course continues the study of Latin grammar begun in LATIN 1Z03 and 1ZZ3 and introduces students to the reading of simple passages from Latin authors.

Three lectures; one term

Prerequisite(s): Grade 12 Latin U; or LATIN 1ZZ3 with a grade of at least C-. Students using this course as a Humanities I requirement will register for LATIN 2A03 and 2AA3.

LATIN 2AA3 - INTERMEDIATE LATIN II

A study of selected passages from Latin authors designed to further the student's proficiency in reading Latin. Attention will be given to grammar and techniques of literary criticism.

Three lectures; one term

Prerequisite(s): LATIN 2A03

LATIN 3AA3 - LATIN PROSE

Selected readings in one or more Latin prose authors.

Three lectures; one term

Prerequisite(s): LATIN 2A03, 2AA3

LATIN 3AA3 may be repeated, if on a different author/work, to a total of six units.

LATIN 3BB3 - TOPICS IN LATIN LITERATURE

Consult the Department for the topic to be offered.

Three lectures; one term

Prerequisite(s): LATIN 2A03, 2AA3

LATIN 3BB3 may be repeated, if on a different topic, to a total of six units.

LATIN 3H03 - TOPICS IN LATIN POETRY

Consult the Department for the topic to be offered.

Three lectures; one term

Prerequisite(s): Six units of Level II Latin

LATIN 3H03 may be repeated, if on a different topic, to a total of six units.

LATIN 4T03 - INDEPENDENT STUDY IN LATIN

Selected readings from Latin authors supervised by a member of the Department.

Tutorials; one term

Prerequisite(s): Six units of Level III Latin; and registration in Level III or IV of any Honours program in Classics; and permission of the Department

LATIN 4T03 may be repeated, if on a different topic, to a total of six units.

LIFE SCIENCES

Courses in Life Sciences are administered by the School of Interdisciplinary Science.

General Sciences Building, Room 105, ext. 21181

Email: sis@mcmaster.ca

<https://www.science.mcmaster.ca/sis/undergraduate/life-sciences.html>

Notes

1. Level IV Research Seminar topics may change from year to year. Research Seminar topics and descriptions are available on the School of Interdisciplinary Sciences (SIS) website <https://www.science.mcmaster.ca/sis/undergraduate/life-sciences.html>. Honours Life Sciences students must complete at least 3 units of *Knowledge Transfer/Seminar Experience (Course List E)*.
2. Students entering Level IV Honours Life Sciences (not including the Origins of Disease Specialization or the Sensory Motor Systems Specialization) must complete and submit a ballot, rank ordering their preference for enrolment in Level IV seminar offerings. Ballots will be sent directly to students in Honours Life Sciences during the Winter Term. Students wishing to take these courses must complete and submit a ballot by **the end of March**. Students will be informed of their ballot result by the end of May. Failure to submit a ballot by the stated deadline may compromise enrolment in preferred seminar. The Life Sciences program pre-registration ballot will include all Level IV Life Sciences research seminar courses (LIFESCI 4E03, 4F03, 4H03, 4J03, 4K03, 4L03, 4M03, 4N03, 4P03, 4Q03, 4U03, 4V03, 4W03, 4X03, 4Y03).
3. LIFESCI 4CM3 is required for the Honours Life Sciences - Origins of Disease Specialization and is not included in the pre-registration ballot. Students in the Specialization are guaranteed enrolment.
4. LIFESCI 4XX3 is required for the Honours Life Sciences - Sensory Motor Systems Specialization and is not included in the pre-registration ballot. Students in the Specialization are guaranteed enrolment.
5. Course planning is extremely important. Students must review and consider the requisites on Level II, III and IV courses when enrolling in the previous Levels.

Courses

If no prerequisite is listed, the course is open.

LIFESCI 1D03 - MEDICAL IMAGING PHYSICS

An introduction to the physics underlying some of the medical imaging techniques used in the diagnosis and treatment of disease. Topics include: X-ray (transmission) radiography, computed tomography, an introduction to magnetic resonance imaging (MRI), basic principles of ultrasonography, radioactivity and nuclear medicine, and a brief investigation into the biological effects of radiation.

Three lectures, one tutorial; one term

Prerequisite(s): Registration in Medical Radiation Sciences I; or credit or registration in one MATH 1A03, 1LS3, 1X03 and either Grade 12 Physics U or credit or registration in one of PHYSICS 1A03, 1C03, ISCI 1A24 A/B

Antirequisite(s): LIFESCI 1E03, MEDRADSC 1C03

LIFESCI 2A03 - RESEARCH METHODS IN LIFE SCIENCES

An examination and application of the scientific method. Selected research problems will be explored to experience different approaches to hypothesis formulation, testing, interpretation and communication in the Life Sciences.

Lectures (two hours), tutorial (two hours); one term

Prerequisite(s): Registration in Level II or above of a Life Sciences program. Priority will be given to students registered in an Honours Life Sciences program.

LIFESCI 2AA3 - INTRODUCTION TO TOPICS IN LIFE SCIENCES

This course is a forum for the introduction of diverse interdisciplinary research topics within Life Sciences. Students will explore different methodologies and applications of current research in these fields to human health.

Lectures (two hours), tutorial (two hours); one term

Prerequisite(s): Registration in Level II or above of a Life Sciences program

LIFESCI 2BP3 - BIOPHYSICS OF THE CELL AND LIVING ORGANISMS

Some of the most exciting breakthroughs in science are made at the interface between disciplines. Biology and physics are no different. Topics may include: elements of bioelectromagnetism, basic circuits, capacitance, impedance and potentials of cells and membranes. Waves for sound and vision, diffraction, refraction, scattering. Intracellular motion and transport: diffusion, permeability, Fick's Law and electrophoresis. Phases and equilibria: energy landscapes, protein folding, Boltzmann distribution.

Lectures (three hours); one term

Prerequisite(s): One of PHYSICS 1A03, 1C03, 1D03; and one of MATH 1A03, 1LS3, 1X03, 1ZA3; or ISCI 1A24

Crosslist: BIOPHYS 2A03

This course is administered by the Department of Physics and Astronomy.

LIFESCI 2CC3 - FUNDAMENTALS OF NEUROSCIENCE

This course will cover foundational topics in neuroscience, including mechanisms of nerve cell signaling, synaptic transmission, neurotransmitter systems, synaptic plasticity, and nervous system development and repair. Topics will be explored through the lens of human and animal case studies.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): BIOLOGY 1A03 and PSYCH 1FF3 or 1XX3

Antirequisite(s): ISCI 2A18 A/B, LIFESCI 2C03

LIFESCI 2D03 - BEHAVIOURAL PROCESSES

An examination of the concepts that underpin animal behaviour and an illustration of how selection pressures have operated to produce the diversity of behaviour that humans and other animals share.

Lectures (three hours); one term

Prerequisite(s): BIOLOGY 1A03, 1M03 and one of PSYCH 1F03, 1FF3, 1X03, 1XX3; or ISCI 1A24 A/B

Antirequisite(s): PNB 2XC3, PSYCH 2TT3

LIFESCI 2G03 - GENES, GENOMES AND SOCIETY

An introduction to genetics that explores the application of genetics and genomics research in our world, from single organisms to ecological systems and from evolution to genetic engineering.

Lectures, web modules (two hours); one term

Prerequisite(s): One of BIOLOGY 1A03, 1M03, ISCI 1A24 A/B

Not open to students with credit or registration in BIOLOGY 2C03, MOLBIOL 2C03. LIFESCI 2G03 is not a prerequisite for further genetics courses in the Department of Biology.

LIFESCI 2L03 - LIVING SYSTEMS LABORATORY

Students will take diverse experimental approaches to studying real-world research questions in Life Sciences. Basic research using model organisms will be used to confront current issues in human health and disease.

Lectures (one hour), lab (two hours), tutorial (two hours); one term

Prerequisite(s): Registration in Level II or above of a Life Sciences or Medical Radiation Sciences program

LIFESCI 2N03 - HUMAN NUTRITION FOR LIFE SCIENCES

Basic principles of human nutrition, including the interaction between nutrients and physiological processes that impact health and disease risk.

Three hours (lectures); one term

Prerequisite(s): Registration in Level II or above of a Life Sciences program

Antirequisite(s): HTHSCI 3BB3, KINESIOL 1F03

Priority will be given to students in an Honours Life Sciences program.

Not open to students registered in a Kinesiology program.

LIFESCI 2X03 - ENVIRONMENTAL CHANGE AND HUMAN HEALTH

An examination through case-studies of the direct and indirect links between environmental change and human health. Topics may include the impacts of climate change, stratospheric ozone depletion, and globalization.

Lectures (two hours), tutorial (one hour); one term

Prerequisite(s): One of BIOLOGY 1M03, ENVIRSC 1A03, 1B03, 1C03, 1G03 or ISCI 1A24 A/B

Antirequisite(s): LIFESCI 2H03

LIFESCI 3AA3 - HUMAN PATHOPHYSIOLOGY

This course examines the normal physiology of a healthy individual through to the pathophysiological consequences of disease at the cell and tissue level, and how this can lead to greater implications between the various systems of the body. The mechanisms of drug activity and pharmaceutical design will also be explored.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): One of BIOLOGY 2B03, BIOCHEM 2EE3, ISCI 2A18 A/B; and one of BIOLOGY 2A03, KINESIOL 1A03, 1Y03, 2Y03; and registration in Level III or above of any Honours program in the Faculty of Science or LIFESCI 2A03 and registration in the B.Sc. Life Sciences program

Priority will be given to students in an Honours Life Sciences program.

LIFESCI 3BB3 - NEUROBIOLOGY OF DISEASE

Examination of the cellular, circuit and system level abnormalities that underlie nervous system diseases. Topics may include: addiction, epilepsy, spinal cord injury, neuromuscular diseases and neurodegenerative diseases.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): BIOLOGY 2B03 and one of LIFESCI 2CC3 or PNB 2XB3

Antirequisite(s): LIFESCI 3B03

Priority will be given to students in an Honours Life Sciences program.

LIFESCI 3BM3 - IMPLANTED BIOMATERIALS

An introduction to the chemistry of implantable biomaterials (metals, ceramics, plastics, elastomers) and the methods used to characterize their physical properties. The wound healing response following insult by an implanted foreign body will be examined, in order to understand the need to control synthetic biomedical interfaces. The regulatory approval process will also be discussed.

Lectures (three hours); one term

Prerequisite(s): CHEM 1AA3 (or ISCI 1A24); and BIOLOGY 2B03 (or ISCI 2A18) or registration in an Honours Chemical Biology program; and one of CHEM 2E03, CHEM 20B3, CHEMBIO 20B3; or permission of the instructor

Crosslist(s): CHEMBIO 3BM3

This course is administered by the Department of Chemistry & Chemical Biology.

LIFESCI 3BP3 - MODELLING LIFE

Introduction to simulating computational models in the life sciences, including examples from molecular and cell biology, ecology and evolution. Designing models to link to experimental questions and to test scientific hypotheses.

Lectures (three hours); one term

Prerequisite(s): PHYSICS 1A03 or 1C03; and one of MATH 1A03, 1LS3, 1X03, 1ZA3; or ISCI 1A24 A/B

Crosslist: BIOPHYS 3G03

This course is administered by the Department of Physics and Astronomy.

LIFESCI 3E03 - REPRODUCTIVE ENDOCRINOLOGY

An interdisciplinary approach to the examination of human reproductive behaviour through the lens of endocrinology and evolutionary biology. Science communication and how research findings are reported in the mass media are also explored.

Lectures (three hours); one term

Prerequisite(s): BIOLOGY 1A03 and 1M03, or ISCI 1A24; and one of LIFESCI 2D03, PNB 2XC3, PSYCH 2GG3

Priority will be given to students in an Honours Life Sciences program.

LIFESCI 3EP3 - LIFE SCIENCES APPLIED PLACEMENT

This placement course provides students with the opportunity to explore career options and integrate academics with a community, volunteer or professional experience. The student will complete an academic component in addition to the placement.

Students are responsible for arranging a suitable placement and supervision, and are required to submit an online application thirty days prior to the date classes begin in each term (see the Sessional Dates section of the Undergraduate Calendar). More information and the online application can be found on the School of Interdisciplinary Science (SIS) website.

Normally students will complete 60 hours of placement work through the duration of the experience.

Lectures (two hours); one term

Prerequisite(s): Registration in Level III or above of a Life Sciences program; and permission of the School of Interdisciplinary Science (SIS) Experiential Education Coordinator

LIFESCI 3EP3 cannot be taken concurrently with any other Life Sciences placement, research or thesis course.

LIFESCI 3G03 - INTRODUCTION TO EPIDEMIOLOGY

Basic principles of epidemiology, including clinical study design, measures of disease risk and mortality, diagnostic test characteristics and applications to public health.

Lectures (three hours); one term

Prerequisite(s): Registration in Level III or above of an Honours Life Sciences program

Antirequisite(s): HTHSCI 2G03

Not open to students with credit in LIFESCI 3Z03, if the topic was Introduction to Epidemiology.

LIFESCI 3J03 - HUMAN BIOMECHANICS

An introduction to mechanical principles and concepts as applied to the human musculoskeletal system.

Lectures (three hours); one term

Prerequisite(s): One of PHYSICS 1A03, 1C03 (or 1B03 or 1L03); and registration in Level III or above of a program in the Faculty of Science. Credit or registration in KINESIOL 2YY3 (or 1YY3) is strongly recommended.

Antirequisite(s): KINESIOL 2A03

Not open to students registered in a Kinesiology program.

LIFESCI 3K03 - NEURAL CONTROL OF HUMAN MOVEMENT

The control of human movement studied in detail from neurophysiological, cognitive and dynamical perspectives. Topics include basic neurophysiology, mechanisms of sensation, reflexes, voluntary movement and theories of motor control.

Lectures (three hours); one term

Prerequisite(s): BIOLOGY 1A03 or ISCI 1A24 A/B; and one of ISCI 2A18 A/B, LIFESCI 2C03, 2CC3, PNB 2XB3, PSYCH 2F03, 2N03 (or 2D03), 2NF3; and registration in Level III or above of an Honours program in the Faculty of Science

Antirequisite(s): KINESIOL 3E03

Not open to students registered in a Kinesiology program.

This course is administered by the Department of Kinesiology.

LIFESCI 3L03 - LABORATORY METHODS IN LIFE SCIENCES

Students develop advanced skills in experimental design, research methodologies, data analysis, and the communication of research information in the Life Sciences.

Lecture (one hour), two labs (two hours); one term

Prerequisite(s): LIFESCI 2L03 and registration in Level III or above of a Life Sciences program

LIFESCI 3LL3 - LIVING SYSTEMS LABORATORY PRACTICUM

Provides an opportunity to explore various areas of study within the Life Sciences in a small-group learning environment in the laboratory.

Details may be found on the School of Interdisciplinary Science (SIS) website.

Lab (three hours); one term

Prerequisite(s): LIFESCI 2L03 and registration in Level III or above of an Honours Life Sciences program

LIFESCI 3LL3 may be repeated, if on a different topic.

Some offerings may have a field/experiential component and/or be offered in a condensed term.

LIFESCI 3M03 - CELLULAR DYNAMICS

This course involves both an examination and discussion of experimental evidence and cell biology techniques used to formulate models of cellular function that relate to an understanding of a current health or environmental issue.

Lectures (three hours); one term

Prerequisite(s): BIOLOGY 2B03 or ISCI 2A18 A/B; and BIOLOGY 2C03, MOLBIOL 2C03, or LIFESCI 2G03; and registration in Level III or above of a program in the Faculty of Science

Antirequisite(s): MOLBIOL 3B03

Priority will be given to students in an Honours Life Sciences program.

LIFESCI 3N03 - HUMAN NUTRITIONAL TOXICOLOGY

This course mainly focuses on examining metal toxicity on human systems at the genetic, cellular, biochemical, and physiological levels, as well as discusses the socio-economic and political parameters that impact metal concentrations in local and global environments. In addition, students investigate the potential toxicity of supplements and food products.

Lectures (two hours), tutorials (two hours); one term

Prerequisite(s): BIOLOGY 2B03

LIFESCI 3P03 - SCIENCE COMMUNICATION IN LIFE SCIENCES

Science communication is the bridge between scientists and non-scientists; it allows discoveries in the lab or field to shape our world. In this course, students will examine the importance of effective science communication in education,

journalism and activism. We will practice communicating science in a way that is accessible and engaging to diverse audiences. We will also experiment with different storytelling formats and mediums.

Lectures (two hours), online tutorials; one term

Prerequisite(s): Registration in Level III or above of an Honours Life Sciences program

Antirequisite(s): SCICOMM 3P03

Non-Life Sciences students interested in this offering should refer to SCICOMM 3P03.

LIFESCI 3Q03 - GLOBAL HUMAN HEALTH AND DISEASE

Global health challenges require interdisciplinary solutions: the toll of a disease in a particular community depends as much on social, political and economic factors as it does on biological ones. This course explores some of the most pressing issues in global health, from infectious disease to addiction. Students will investigate disease mechanisms as well as societal factors that threaten health and wellbeing. We will also think critically about the important role of communication between scientists, policymakers and communities.

Lectures (three hours); one term

Prerequisite(s): Registration in Level III or above of an Honours Science program
Priority will be given to students in an Honours Life Sciences program.

LIFESCI 3RC3 - RADIOISOTOPES IN MEDICINE

A systematic study of the use of radioactive isotopes and radiotracers in the physical and life sciences, including: radioisotope production; elucidating biochemical pathways using radiotracers; diagnostic radiopharmaceuticals in cancer and mental health care; and therapeutic radioisotopes and radiopharmaceuticals.

Lectures (three hours); one term

Prerequisite(s): CHEM 1A03 (or 1E03) and 1AA3

Crosslist(s): CHEM 3RC3

This course is administered by the Department of Chemistry and Chemical Biology.

LIFESCI 3RP3 - LIFE SCIENCES RESEARCH PRACTICUM

This placement course provides students an opportunity to explore potential research projects while volunteering in the laboratory or clinic of a faculty member at McMaster University. The student will complete a research proposal in addition to the placement.

Students are responsible for arranging a suitable placement and supervision, and are required to submit an online application thirty days prior to the date classes begin in each term (see the Sessional Dates section of this Calendar). More information and the online application can be found on the School of Interdisciplinary Science (SIS) website.

Normally students will complete 60 hours in the laboratory or clinic during the placement.

Lectures (two hours); one term

Prerequisite(s): Registration in Level III or above of a Life Sciences program; and permission of an academic supervisor and the School of Interdisciplinary Science (SIS) Experiential Education Coordinator

LIFESCI 3RP3 cannot be taken concurrently with any other Life Sciences placement, research or thesis course.

LIFESCI 3XX3 - PEER MENTORING IN SCIENCE COMMUNICATION

This class develops the abilities of students to communicate science effectively in a variety of real-world contexts. Projects focus on speaking and writing, engaging in scientific discourse, developing evidence-based arguments, editing the work of others, and providing constructive feedback. Students in this course will be mentors for students in Level II.

Applications will be available the beginning of March on the School of Interdisciplinary Science (SIS) website. Applications must be submitted by April 1 of the preceding academic year. Successful students will be notified by May 30.

Lectures (three hours), tutorial (two hours); one term

Prerequisite(s): Registration in Level III or above of an Honours Life Sciences program; and a GPA of at least 7.0; and permission of the instructor

Prerequisite(s) (EFFECTIVE 2020-2021): LIFESCI 2AA3 and registration in Level III or above of an Honours Life Sciences program; and a GPA of at least 7.0; and permission of the instructor

Not open to students with credit or registration in LIFESCI 3YY3 or PSYCH 3TT3.

LIFESCI 3YY3 - PEER MENTORING IN LABORATORY SKILL DEVELOPMENT

Students that enrol in this course become mentors for Level II students enrolled in LIFESCI 2L03. This class provides students with the opportunity to develop their mentoring and self-reflection skills as well as their abilities to evaluate and present scientific ideas, data and methodologies.

Applications will be available the beginning of March on the School of Interdisciplinary Science (SIS) website. Applications must be submitted by April 1 of the preceding academic year. Successful students will be notified by May 30.

Lectures (three hours), tutorial (two hours), lab (one hour); one term

Prerequisite(s): Registration in Level III or above of an Honours Life Sciences program; and a GPA of at least 7.0; and permission of the instructor

Prerequisite(s) (EFFECTIVE 2020-2021): LIFESCI 2L03 and registration in Level III or above of an Honours Life Sciences program; and a GPA of at least 7.0; and permission of the instructor

Not open to students with credit or registration in LIFESCI 3XX3 or PSYCH 3TT3.

LIFESCI 3Z03 - LIFE SCIENCES INQUIRY

Provides an opportunity to explore various areas of study within the Life Sciences in a small-group learning environment.

Three hours (seminar); one term

Prerequisite(s): Registration in Level III of an Honours Life Sciences program. Some topics may have additional course requisites. Details may be found on the School of Interdisciplinary Science (SIS) website.

LIFESCI 3Z03 may be repeated, if on a different topic.

Some offerings may have a field/experiential component and/or be offered in a condensed term.

LIFESCI 3Z03 may not be offered each academic year.

LIFESCI 4A03 - INDEPENDENT STUDY

An independent study under the supervision of a McMaster University faculty member. More information and the online application can be found on the School of Interdisciplinary Science (SIS) website.

Students are responsible for arranging a suitable independent study and supervision, and are required to submit an online application thirty days prior to the date classes begin in each term (see the Sessional Dates section of this Calendar).

Normally students will complete 60 hours of independent study work through the duration of the course.

Lecture (two hours); one term

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program and permission of the supervising faculty member and the School of Interdisciplinary Science (SIS) Experiential Education Coordinator. LIFESCI 3RP3 is highly recommended.

Antirequisite(s): LIFESCI 4B06 A/B, 4B09, 4C09 A/B, 4C12 A/B, 4D15 A/B, 4EP6
LIFESCI 4A03 cannot be taken concurrently with any other Life Sciences placement, research or thesis course.

LIFESCI 4B09 A/B S - INDEPENDENT PROJECT

This course provide students an opportunity to conduct an independent research study under the supervision of a McMaster University faculty member. More information and the online application can be found on the School of Interdisciplinary Science (SIS) website.

Students are responsible for arranging a suitable independent project and supervision, and are required to submit an online application thirty days prior to the date classes begin in each term (see the Sessional Dates section of this Calendar). Normally students will complete 120 hours of independent project work through the duration of the course.

Lectures (three hours); two terms

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program with a minimum GPA of 7.0 and permission of the supervising faculty member and the School of Interdisciplinary Science (SIS) Experiential Education Coordinator. LIFESCI 3RP3 is highly recommended.

Antirequisite(s): LIFESCI 4A03, 4B06 A/B, 4C09 A/B, 4C12 A/B, 4D15 A/B, 4EP6 A/B LIFESCI 4B09A/B cannot be taken concurrently with any other Life Sciences placement, research or thesis course.

LIFESCI 4C12 A/B S - INDEPENDENT THESIS

An independent study under the supervision of a McMaster University faculty member. More information and the online application can be found on the School of Interdisciplinary Science (SIS) website.

Students are responsible for arranging a suitable thesis and supervision, and are required to submit an online application thirty days prior to the date classes begin (see the Sessional Dates section of this Calendar).

Normally students will complete 150 hours of independent thesis work through the duration of the course.

Lectures (three hours); two terms

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program with a minimum GPA of 8.0 and permission of the supervising faculty member and the School of Interdisciplinary Science (SIS) Experiential Education Coordinator. LIFESCI 3RP3 is highly recommended.

Antirequisite(s): LIFESCI 4A03, 4B06 A/B, 4B09, 4C09 A/B, 4D15 A/B, 4EP6 A/B LIFESCI 4C12 A/B cannot be taken concurrently with any other Life Sciences placement, research or thesis course.

LIFESCI 4CM3 - FOUNDATIONS OF DISEASE STATES INQUIRY LAB

This is an inquiry-based lab in which students learn and apply current techniques to study the physical and chemical basis of human disease states.

Lecture (one hour), one lab or workshop (four hours); one term

Prerequisite(s): Registration in Level IV or above of Honours Life Sciences - Origins of Disease Specialization or permission of the instructor

LIFESCI 4D15 A/B S - INDEPENDENT THESIS

An independent study under the supervision of a McMaster University faculty member. More information and the online application can be found on the School of Interdisciplinary Science (SIS) website. Students are responsible for arranging a suitable thesis and supervision, and are required to submit an online application thirty days prior to the date classes begin (see the Sessional Dates section of this Calendar). Normally students will complete 180 hours of independent thesis work through the duration of the course.

Lectures (three hours); two terms

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program with a minimum GPA of 10.5 and permission of the supervising faculty member and the School of Interdisciplinary Science (SIS) Experiential Education Coordinator. LIFESCI 3RP3 is highly recommended.

Antirequisite(s): LIFESCI 4A03, 4B06 A/B, 4B09, 4C09 A/B, 4EP6 A/B LIFESCI 4D15 A/B cannot be taken concurrently with any other Life Sciences placement, research or thesis course.

LIFESCI 4E03 - SCIENCE & STORYTELLING

Communicating science through stories can increase the visibility and impact of developments in the field. This course will explore the role of storytelling in communicating science across various cultures and to a wide range of audiences.

Students will engage with and produce different types of stories and consider how they can be leveraged to make scientific knowledge more accessible.

Seminar and discussions in small groups (three hours); one term

Prerequisite(s): LIFESCI 3P03 and registration in Level IV of an Honours Life Sciences program

Not open to students with credit in LIFESCI 4L03, if the Topic was Science & Storytelling.

Preferential enrolment is done by pre-registration ballot (See Department Note 2 above).

LIFESCI 4EP6 A/B S - LIFE SCIENCES ADVANCED PLACEMENT

This placement course provides students in the Life Sciences program with the opportunity to explore career options and integrate academics with a community, volunteer or professional experience. The student will complete an academic component in addition to the placement. More information and the online application can be found on the School of Interdisciplinary Science (SIS) website. Students are responsible for arranging a suitable placement and supervision, and are required to submit an online application thirty days prior to the date classes begin in each Term (see the Sessional Dates section of this Calendar).

Normally students will complete 120 hours of placement work through the duration of the experience.

Lectures (two hours); two terms

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program and permission of the School of Interdisciplinary Science (SIS) Experiential Education Coordinator

LIFESCI 4EP6 A/B cannot be taken concurrently with any other Life Sciences placement, research or thesis course.

LIFESCI 4F03 - EMERGING PARADIGMS IN ENVIRONMENTAL CHANGE AND HEALTH

Advanced seminar on selected aspects of the relation between environmental change and human health.

Seminar and discussions in small groups (three hours); one term

Prerequisite(s): LIFESCI 2H03 and 2X03 and registration in Level IV or above of an Honours Life Science program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4H03 - REGENERATION: WHAT CAN WE LEARN FROM ANIMAL MODELS?

Regeneration is the process by which lost body parts are replaced or restored. There is widespread variability in the ability of organisms to regenerate. In this course we will explore, through the examination of the current scientific literature, what is known about the molecular mechanisms underlying this process and the current tools employed to explore this highly sought after ability.

Seminar and discussions in small groups (three hours); one term

Prerequisite(s): Registration in Level IV of an Honours Life Science program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4I03 - RESEARCH SEMINAR

Advanced seminar focusing on selected topics in an area of Life Sciences.

Seminar and discussion in small groups (three hours); one term

Prerequisite(s): Registration in Level IV of an Honours Life Science program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4J03 - SCIENCE COMMUNICATION IN THE MEDIA

Media coverage of scientific discoveries can shape the public opinion of science and influence policy decisions. In this course, students will take a critical look at

how journalists portray science and examine the consequences of poor science communication. We will practice translating complex concepts for diverse audiences and create different forms of science journalism, such as articles, op-eds and podcasts.

Seminar and discussions in small groups (three hours); one term

Prerequisite(s): LIFESCI 3P03 and registration in Level IV of an Honours Life Sciences program

Not open to students with credit in LIFESCI 4P03, if the Topic was Science Communication in the Media.

Preferential enrolment is done by pre-registration ballot (See Department Note 2 above).

LIFESCI 4L03 - RESEARCH SEMINAR

Advanced seminar focusing on selected topics in an area of Life Sciences.

Seminars and discussions in small groups; one term

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4M03 - RESEARCH SEMINAR

Advanced seminar focusing on selected topics in an area of Life Sciences.

Seminars and discussions in small groups; one term

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4N03 - RESEARCH SEMINAR

Advanced seminar focusing on selected topics in an area of Life Sciences.

Seminars and discussions in small groups; one term

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4O03 - RESEARCH SEMINAR

Advanced seminar focusing on selected topics in an area of Life Sciences.

Seminar and discussion in small groups (three hours); one term

Prerequisite(s): Registration in Level IV of an Honours Life Science program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4P03 - RESEARCH SEMINAR

Advanced seminar focusing on selected topics in an area of Life Sciences.

Seminars and discussions in small groups; one term

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4Q03 - RESEARCH SEMINAR

Advanced seminar focusing on selected topics in an area of Life Sciences.

Seminars and discussions in small groups; one term

Prerequisite(s): Registration in Level IV or above of an Honours Life Sciences program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4U03 - MECHANISMS OF DISEASE

Students will analyze molecular and cellular research on disease pathogenesis, explore how cellular miscommunication results in disease, and investigate the design process behind targeted therapeutics.

Seminar and discussion in small groups (two hours), tutorial (one hour); one term

Prerequisite(s): LIFESCI 3M03 or MOLBIOL 3B03; and registration in Level IV or above of an Honours program in the Faculty of Science

Prerequisite(s) (EFFECTIVE 2020-2021): LIFESCI 3M03 or MOLBIOL 3B03; and registration in Level IV or above of an Honours Life Sciences program

Not open to students with credit or registration in LIFESCI 4P03, if the topic was Mechanisms of Disease.

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4V03 - EXTRACELLULAR VESICLES IN HEALTH AND DISEASE

An examination of the emerging physio-pathological roles of extracellular vesicles and their potential clinical applications.

Seminar and discussion in small groups (two hours), tutorial (one hour); one term

Prerequisite(s): BIOLOGY 2B03 and BIOLOGY 2C03 (or LIFESCI 2G03) and registration in Level IV or above of an Honours Life Science program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4W03 - ADVANCED TOPICS IN NUTRITION

This course will extend the study of nutrition beyond the examination of macro-, and micro-nutrients to investigating topics such as dietary analysis/planning, supplementation usage, and human health/disease management.

Seminar and discussion in small groups (two hours), tutorial (one hour); one term

Prerequisite(s): LIFESCI 2N03; and registration in Level IV or above of an Honours Life Sciences program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4X03 - THE BIOPSYCHOLOGY OF SEX

This course will explore topics in the scientific study of human sexuality from an anatomical, behavioural, and neuroendocrine perspective. Sample topics may include reproductive strategies, fertility, pregnancy and childbirth, sexual development, gender differences, and sexually transmitted diseases.

Seminar and discussion in small groups (two hours), tutorial (one hour); one term

Prerequisite(s): LIFESCI 3E03 (or 3C03); and registration in Level IV or above of an Honours Life Sciences program

Not open to students with credit or registration in LIFESCI 4T03, if the topic was Biopsychology of Sex.

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LIFESCI 4XX3 - THE SYNAPSE

Exploration of classical and current research on the mechanisms of synaptic transmission, with a focus on the neuromuscular junction, sensory receptors, memory formation, and the roles of synapses in disease.

Seminar and discussion in small groups (two hours), tutorial (one hour); one term

Prerequisite(s): LIFESCI 3BB3 and registration in Level IV or above of Honours Life Sciences Sensory-Motor Systems Specialization or permission of the instructor

LIFESCI 4Y03 - APPLIED BIOMECHANICS

A combination of lectures and problem based learning on aspects of human movement facing the modern biomechanist. Topics and problems are taken from occupational, clinical and sport biomechanics.

Three hours (lectures, tutorials); one term

Prerequisite(s): KINESIOL 2Y03, 2YY3, LIFESCI 3J03, and registration in Level IV or above of an Honours Life Sciences program

Preferential enrolment is done by preregistration ballot (See Department Note 2 above).

LINGUISTICS

Courses in Linguistics are administered by the Department of Linguistics and Languages.

Togo Salmon Hall, Room 629, ext. 24388

<http://linguistics.humanities.mcmaster.ca/>

Department Notes

1. Not all courses are offered on an annual basis. Students should consult the timetable for available courses.
2. The following are courses open as electives to students registered in Level II or above of any undergraduate program.

LINGUIST 2E03 - The Nature of Texts: From Slang to Formal Discourse

LINGUIST 2FL3 - Introduction to Forensic Linguistics

LINGUIST 2S03 - Language and Society

Courses

If no prerequisite is listed, the course is open.

LINGUIST 1A03 - INTRODUCTION TO LINGUISTICS: SOUNDS, SPEECH AND HEARING

An introduction to the scientific study of language. The course focuses on the sounds of human languages, including how we produce and perceive them, and how words are formed in the world's languages.

Three hours (lecture, web module); one term

LINGUIST 1A03 and 1AA3 prepare students for further study in Linguistics and Cognitive Science of Language.

LINGUIST 1AA3 - INTRODUCTION TO LINGUISTICS: WORDS, SENTENCES AND MEANING

A further introduction to the scientific study of language. The course focuses on how the mind organizes words into sentences and assigns meanings to words and sentences, concentrating on elements that are universal to all human languages.

Three hours (lecture, web module); one term

LINGUIST 1A03 and 1AA3 prepare students for further study in Linguistics and Cognitive Science of Language.

LINGUIST 1Z03 - STRUCTURE OF MODERN ENGLISH I

This course introduces students to the description and transcription of sounds in contemporary English, to the rules governing pronunciation, and to the study of word formation and meaning in contemporary English.

Three hours; one term

LINGUIST 1ZZ3 - STRUCTURE OF MODERN ENGLISH II

This course examines the structure of contemporary English sentences, and how sentences are used to build larger meaningful units of written and spoken communication.

Three hours; one term

LINGUIST 2D03 - RESEARCH METHODS

An introduction to qualitative and quantitative approaches to research in linguistics, including topics such as research ethics, principles of data gathering and analysis, and fundamentals of statistical analysis and inference, including ANOVA.

Three hours; one term

Prerequisite(s): Registration in Level II or III of a program in Linguistics or Cognitive Science of Language

Antirequisite(s): GEOG 3MA3, HLTHAGE 2A03, POLSCI 2NN3, POLSCI 3N06 A/B, SOCIOLOG 2Z03, SOCIOLOG 3H06 A/B

Not open to students with credit in PSYCH 2RA3 or equivalent.

LINGUIST 2DD3 - STATISTICS FOR LANGUAGE RESEARCH

The course explores the use and analysis of quantitative data in empirical linguistic research using the statistical software package R. The covered techniques include descriptive and inferential statistics, ANOVA, and regression.

Three hours (lectures and tutorials); one term

Prerequisite(s): LINGUIST 2D03

Antirequisite(s): ECON 2B03, GEOG 3MB3, PNB 2XE3, POLSCI 3N06 A/B, POLSCI 3NN3, PSYCH 2RA3, SOCSCI 2J03, SOCIOLOG 3H06 A/B

LINGUIST 2E03 - THE NATURE OF TEXTS: FROM SLANG TO FORMAL DISCOURSE

This course introduces students to the field of discourse analysis and investigates a variety of styles and registers from the conversational to the literary and from the journalistic to the academic.

Three hours; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 2E03

LINGUIST 2FL3 - INTRODUCTION TO FORENSIC LINGUISTICS

An introduction to the discipline of language and the law. Through a consideration of several famous trials and cases, topics covered include: speaker/voice identification, the language of police interrogations, courtroom language, forensic document investigation, the nature of legal language, the linguist as expert witness.

Three hours; one term

Prerequisite(s): Registration in Level II or above

LINGUIST 2L03 - PHONETICS

A study of the sounds of language, human articulatory capabilities and speech production, human auditory and speech perception (ear and brain) and phonetic transcription.

Three hours; one term

Prerequisite(s): LINGUIST 1A03

LINGUIST 2LC3 - HISTORICAL LINGUISTICS: LANGUAGE EVOLUTION AND CHANGE

An examination of key concepts in language change including: grammatical change (e.g. phonological change), comparative and internal reconstruction, socio-historical considerations (language contact and variation), the birth and death of languages.

Three hours; one term

Prerequisite(s): LINGUIST 1AA3

Antirequisite(s): LINGUIST 2AA3

LINGUIST 2LL3 - INTRODUCTION TO LINGUISTIC TYPOLOGY

The study of diversity in the languages of the world, language universals and the parameters of cross-linguistic analysis of grammatical systems.

Three hours; one term

Prerequisite(s): LINGUIST 1A03 and 1AA3

LINGUIST 2PH3 - PHONOLOGY

A study of the patterns of distinctive sounds in the world's languages.

Three hours; one term

Prerequisite(s): LINGUIST 2L03

LINGUIST 2PS3 - PSYCHOLINGUISTICS

Examines evidence from behavioural experiments to study how the human mind understands sounds, words, and sentences. The class involves team-based projects; regular attendance is vital.

Three hours; one term

Prerequisite(s): LINGUIST 1A03 and 1AA3

LINGUIST 2S03 - LANGUAGE AND SOCIETY

An introduction to sociolinguistics covering such topics as linguistic variation (regional, social, situational), language and gender, language and disadvantage/power, language choice, language change, pidgin and creole languages.

Three hours; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 3G03, LINGUIST 3X03, IBH 1AC3

Cross-list(s): PEACEST 2LS3

This course is administered by the Department of Linguistics and Languages

LINGUIST 2SL3 - INTRODUCTION TO AMERICAN SIGN LANGUAGE

This course introduces students to concepts related to people, places and things within the immediate environment, as well as the basic values and norms of the Deaf culture. Students will learn how to conduct simple, everyday conversations and will gain basic numeracy skills.

Three hours; one term

Not open to students with credit in ASL 101 from the Canadian Hearing Society or elsewhere.

LINGUIST 2SY3 - SYNTAX

The study of sentence structure in many languages. The emphasis is on using empirical data to test theoretical proposals.

Three hours; one term

Prerequisite(s): LINGUIST 1AA3

LINGUIST 3C03 - CHILD LANGUAGE ACQUISITION

Language behaviour and development in children, from birth to school age. The course examines how data from children's language acquisition can inform linguistic theory.

Three hours; one term

Prerequisite(s): LINGUIST 1A03; and one of LINGUIST 1AA3, PNB 2XA3 or PSYCH 2H03

Cross-list(s): PSYCH 3C03

This course is administered by the Department of Linguistics and Languages.

LINGUIST 3F03 - ANATOMY AND PHYSIOLOGY FOR SPEECH, LANGUAGE AND HEARING

Anatomy and physiology of human speech production and hearing. Systems for speech production (lungs, glottis, vocal tract, jaw, lips) and perception (outer/middle/inner ear, auditory processing) and anatomy of brain areas for speech perception.

Three hours; one term

Prerequisite(s): LINGUIST 1A03

LINGUIST 3I3 - SEMANTICS

The study of patterns of meaning in language; a critical survey of theories and issues.

Three hours; one term

Prerequisite(s): LINGUIST 2SY3

LINGUIST 3LA3 - INTRODUCTION TO SECOND LANGUAGE ACQUISITION

The course introduces the students to major theories in second language acquisition through readings and problem-based assignments. The objective is to learn about theories as well as practise using them as a basis for generating ideas for both practical applications and research.

Three hours; one term

Prerequisite(s): LINGUIST 1AA3

LINGUIST 3M03 - MORPHOLOGY

The study of word formation in the languages of the world; a critical survey of current theories and issues.

Three hours; one term

Prerequisite(s): LINGUIST 2SY3 and 2PH3

LINGUIST 3NL3 - COGNITIVE NEUROSCIENCE OF LANGUAGE

A survey of the current scientific literature dealing with brain function related to language processes in typical and special populations.

Three hours; one term

Prerequisite(s): Registration in Level III or IV of a program in Linguistics or Cognitive Science of Language or Psychology, Neuroscience & Behaviour

Antirequisite(s): LINGUIST 4F03, PSYCH 4L03

Cross-list(s): PSYCH 3NL3

LINGUIST 3P03 - PRAGMATICS

A discussion of the problems confronting the linguist in the study of text and discourse at the level beyond the sentence. The course will deal with the interaction between grammar and situational factors.

Three hours; one term

Prerequisite(s): LINGUIST 1AA3 or FRENCH 2H03

Antirequisite(s): CMST 3V03

LINGUIST 3RP3 A/B S - INDIVIDUAL RESEARCH PRACTICUM

In this Experiential Learning course, students learn hands-on linguistic research skills (e.g., running experiments, conducting interviews, reviewing literature) by collaborating in a faculty member's research project. Consult the department website for instructions on requesting permission for this course.

Prerequisite(s): LINGUIST 2D03 and registration in Level III or IV of Honours Linguistics or Honours Cognitive Science of Language; and permission of the Department.

LINGUIST 3SL3 - INTERMEDIATE AMERICAN SIGN LANGUAGE

Expands students vocabulary and grammar for communication in American Sign Language. Further explores the attributes of Deaf culture.

Three hours; one term

Prerequisite(s): LINGUIST 2SL3 or equivalent

Not open to students with credit in ASL 201 from the Canadian Hearing Society or elsewhere.

LINGUIST 3TT3 - TRANSLATION THEORY

This course examines cognitive, linguistic, cultural, artistic and ethical aspects of translation from ancient interlinear translations to modern computer aided technologies.

Three hours; one term

Prerequisite(s): Registration in Level III or IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4AA3 - SEMINAR IN APPLIED LINGUISTICS

Topics may include adult language acquisition, language disorders, linguistics in education, reading, or other applications.

Seminar (two hours); one term

Prerequisite(s): LINGUIST 2PH3 or 3A03; and LINGUIST 2SY3 or 3I03; and registration in Level IV of a program in Linguistics or Cognitive Science of Language

Not open to students with credit in LINGUIST 4B03 if the topic is Adult Language Acquisition. Not open to students with credit in LINGUIST 4CS3 if the topic is Clinical Linguistics. Consult the Department for the topic each year.

LINGUIST 4AS3 - TOPICS IN ADVANCED SEMANTICS

This course examines advanced issues in formal semantics, seeking to evaluate the current formal semantics theory and to address the data that fall beyond the basic theory introduced in LINGUIST 3I13.

Seminar (two hours); one term

Prerequisite(s): LINGUIST 3I13 and registration in Level IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4D03 - COMPUTERS AND LINGUISTIC ANALYSIS

This course studies the applications of computer technology to language processing, including corpus research, parsers and machine translation.

Lecture and lab (three hours); one term

Prerequisite(s): LINGUIST 2DD3 and registration in Level IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4E03 - ENGLISH AS A SECOND LANGUAGE (ESL) TEACHING METHODS

This course will look at the phenomenon of Teaching English as a Second Language (TESL) not only in the Canadian context but also worldwide. There will also be a detailed investigation of the dominant teaching methodologies associated with TESL. Three hours; one term

Prerequisite(s): One of LINGUIST 3LA3 or 4B03 and registration in Level III or IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4EL3 - LABORATORY IN EXPERIMENTAL LINGUISTICS

Students collaborate to plan, carry out, and analyze an experiment addressing a cognitive aspect of language processing or acquisition. Students write a report of their findings and present a poster at the department's Student Research Day. Two hours plus lab work; one term

Prerequisite(s): LINGUIST 2D03; and one of LINGUIST 2PS3, 3C03, 3LA3, 3NL3 or 4F03 and registration in Level IV of a program in Linguistics or Cognitive Science of Language

Antirequisite(s): LINGUIST 3PS3

LINGUIST 4I13 A/B S - INDEPENDENT STUDY

The student will prepare, under the supervision of a faculty member, a research paper involving independent study in an area where the student has already demonstrated competence. Consult the department website for instructions on requesting permission for this course.

Prerequisite(s): 18 units of Linguistics above Level I and permission of the Department

Antirequisite(s): LINGUIST 4Y06 A/B

LINGUIST 4LB3 - ADVANCED PHONETICS AND PHONOLOGY

This course examines advanced issues in phonetics and phonology, seeking to evaluate current theory and to address data that fall beyond the explanatory capacities of those paradigms. The course is data oriented, with material taken from several languages.

Three hours; one term

Prerequisite(s): LINGUIST 2L03 and 2PH3; and registration in Level IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4LC3 - ADVANCED MORPHOLOGY AND SYNTAX

This course examines advanced issues in morphology and syntax, seeking to evaluate current theory and to address data that fall beyond the explanatory capacities of those paradigms. The course is data oriented, with material taken from several languages.

Three hours; one term

Prerequisite(s): LINGUIST 2SY3 and 3M03; and registration in Level IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4LX3 - THE STRUCTURE OF X

This course will offer the student an opportunity to examine one or more languages in detail in order to apply in a realistic setting abstract principles and techniques learned in topical courses. Methods of elicitation and recording will also be taught. Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4NN3 - COGNITIVE NEUROLINGUISTICS LABORATORY

Cognitive neuroscience methods used to study language. Hands-on experience using electrophysiological methods and EEG/ERP analysis techniques. Students write a report of their findings and present a poster at the department's Student Research Day.

Seminar (two hours) plus lab work; one term

Prerequisite(s): LINGUIST 2D03 and 3NL3 and registration in Level IV of a program in Linguistics or Cognitive Science of Language

Antirequisite(s): LINGUIST 3N03

LINGUIST 4PL3 - PROGRAMMING FOR LINGUISTS

A practical study of a programming language/environment such as Matlab, Praat or Python and its applications for natural language processing. Topics might include word categorization and tagging, text classification, or speech analysis and synthesis.

Three hours; one term

Prerequisite(s): Registration in Level III or IV of a program in Linguistics or Cognitive Science of Language

Antirequisite(s): LINGUIST 3PL3

LINGUIST 4R03 - CROSS-CULTURAL COMMUNICATION

Students will explore the links between language and culture and learn skills necessary to be intermediaries between cultures. Topics include: communication between genders, the cognitive role of metaphor, language and perception, emotions across cultures, culture and advertising, body language and cultural stereotyping. Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4S03 - INTERPERSONAL COMMUNICATION

This course offers an introduction to contemporary interpersonal communication theories and research. Topics include: small group communication, persuasive communication, argumentation strategies, conflict resolution and computer mediated, intercultural, international and political communication.

Seminar (two hours); one term

Prerequisite(s): Registration in Level IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4SL3 - SLP PRACTICUM

In this Experiential Learning course, students complete at least 36 hours observing and working under the supervision of a registered Speech-Language Pathologist and complete a Learning Portfolio documenting their experience. Consult the department website for instructions on requesting permission for this course.

One term

Prerequisite(s): Registration in Level IV of the Honours Cognitive Science of Language program with a Grade Point Average of 9.0; and permission of the Department

LINGUIST 4SS3 - SEMINAR IN SOCIOLINGUISTICS

Topics may include pidgins & creoles, language and gender, language variation & change, or others.

Seminar (two hours); one term

Prerequisite(s): LINGUIST 2S03, or 3X03; and registration in Level IV of a program in Linguistics or Cognitive Science of Language

Not open to students with credit in LINGUIST 4M03 if the topic is Pidgins & Creoles. Consult the Department for the topic each year.

LINGUIST 4TE3 - TESL PRACTICUM

In this Experiential Learning course, students complete at least 36 hours observing and practice teaching under the supervision of an accredited ESL instructor and complete a Learning Portfolio documenting their experience. Consult the department website for instructions on requesting permission for this course.

One term

Prerequisite(s): LINGUIST 4E03; registration in Level IV of a program in Linguistics with a Grade Point Average of 9.0; and permission of the Department

LINGUIST 4XX3 - TOPICS IN LINGUISTIC THEORY

Issues in different aspects of Linguistic Theory and Advanced Philology. Consult the Department for the topic to be offered.

Seminar (two hours); one term

Prerequisite(s): LINGUIST 2PH3 and 2SY3; and registration in Level IV of a program in Linguistics or Cognitive Science of Language

LINGUIST 4Y06 A/B - HONOURS THESIS

Students conduct an individual research project under the supervision of a Department of Linguistics and Languages faculty member or associate member. A written paper and a presentation at the Department's Student Research Day are required. Consult the department website for instructions on requesting permission for this course.

Prerequisite(s): LINGUIST 2D03; and registration in Level IV of a program in Linguistics or Cognitive Science of Language with a Grade Point Average of at least 9.0; and permission of the Department

Antirequisite(s): LINGUIST 4I3 A/B S

MANUFACTURING TECHNOLOGY

Courses in Manufacturing Engineering Technology are administered by the Bachelor of Technology Program.

Engineering Technology Building (ETB), Room 121, ext. 20195

<http://mybtechdegree.ca>

MANTECH 3LS3 - QUALITY CONTROL AND ASSURANCE METHODS

Formerly MANTECH 4LS3

Detail understanding of Six sigma, Kaizen, KANBAN, supply chain and outsourcing. Concepts on planning, measurement, control, improvement of quality, analysis of variation and sampling techniques.

Two lectures, one lab; one term

Prerequisite(s): ENGTECH 3MA3 and registration in Manufacturing Engineering Technology

Antirequisite(s): MANTECH 4ST3, GENTECH 3LS3

MANTECH 3MF3 - MICRO MANUFACTURING AND FABRICATION

Joining, welding, casting, forming, grinding, abrasive waterjet, ultrasonic machining, grinding, laser processes, micro-scale cutting, chemical etching, polishing, electric discharge machining, lithographic process, ion beam technology, inspection. Three lectures; one term

Prerequisite(s): ENGTECH 3SP3 and registration in Manufacturing Engineering Technology

Cross-list(s): MECHENG 3C03

This course is administered by the Department of Mechanical Engineering.

MANTECH 4DA3 - DESIGN AND ADVANCED MANUFACTURING

Fundamental concepts in design and manufacturing strategies; computer aided manufacturing; non conventional machining; 3D metallic printing; rapid prototyping. Three lectures; one term

Prerequisite(s): MANTECH 3MF3 and registration in Manufacturing Engineering Technology

Antirequisite(s): MANTECH 4DM3

MANTECH 4FM3 - CIM AND FLEXIBLE MANUFACTURING

Facility layout; cellular manufacturing; flexible manufacturing systems; programmable logic controllers (PLCs); computer-aided process control; quality control and inspection principles; inspection technologies; coordinate measuring machines (CMM.)

Two lectures, one lab; one term

Prerequisite(s): MANTECH 3MF3 and registration in Manufacturing Engineering Technology Co-op (B.Tech.)

Antirequisite(s): MANTECH 3FM3

MANTECH 4MM3 - DESIGN AND MANUFACTURING OF MACHINE ELEMENTS

Theory and methodology related to conceptual design; simple design factor; variable loads; stress concentrations; bolted joints; shaft and bearing design; characterization of manufacturing in design.

Three lectures; one term

Prerequisite(s): ENGTECH 4FA3, and registration in Manufacturing Engineering Technology or ENGTECH 3FE3 and registration in Automotive Engineering Technology

Antirequisite(s): MANTECH 4MT3

MANTECH 4PM3 - PRODUCTION MANAGEMENT

Identification of technical, economic, social, characteristics in the production system; forecasting techniques; inventory models; aggregate planning of production; materials requirements planning; scheduling; sequencing; production control. Three lectures; one term

Prerequisite(s): MANTECH 3LS3 or 4LS3 and registration in Manufacturing Engineering Technology Co-op (B.Tech.)

MANTECH 4RM3 - ROBOT MECHANICS AND MECHATRONICS

Basic robot categories; robot components; mobility/constraint analysis; workspace analysis; manipulator kinematics and motion trajectories; non-redundant and redundant sensing/actuation of manipulators; manipulator statics; singularities; manipulator dynamics.

Two lectures, one lab; one term

Prerequisite(s): ENGTECH 3CT3 and registration in Manufacturing Engineering Technology Co-op (B.Tech.)

Antirequisite(s): MANTECH 4MC3

MATERIALS

Courses in Materials Science and Engineering are administered by the Department of Materials Science and Engineering.

John Hodgins Engineering Building, Room 357, ext. 24293

<https://www.eng.mcmaster.ca/materials>

Courses

If no prerequisite is listed, the course is open.

Department Note

All Materials Science & Engineering courses are open to students registered in a Materials Science and Engineering program, subject to prerequisite requirements. Prior permission of the department may be necessary for students from other Engineering departments and other faculties.

MATLS 1M03 - STRUCTURE AND PROPERTIES OF MATERIALS

An introduction to the structure of both crystalline and amorphous solids; the physical and chemical basis for properties exhibited by materials; an overview of material properties including mechanical, electrical, magnetic and thermal behaviour. Three lectures; second term

Prerequisite(s): Registration in any program in the Faculties of Engineering or Science

MATLS 2B03 - INTRODUCTION TO THE THERMODYNAMICS OF MATERIALS

First and Second Laws. Reversible and irreversible processes. State functions, variables, relations among them. The Third Law. Thermodynamics of reactions. Unary systems. Real gases. Electrochemistry.

Two lectures, two tutorials, one (1.5 hours) lab; first term

Prerequisite(s): CHEM 1A03 or CHEM 1E03; registration in Level II or above in Materials Engineering

Antirequisite(s): ENGPHYS 2H04, PHYSICS 2H04

MATLS 2D03 - THERMODYNAMICS OF ALLOYS AND PHASE DIAGRAMS

Configurational entropy. Molar Gibbs energies. Activities, chemical potentials. Raoult's and Henry's Laws. Regular solutions. Eutectic, peritectic, other types of phase diagrams. Phase rule. Multicomponent solutions.

Two lectures, two tutorials, one (1.5 hours) lab; second term

Prerequisite(s): CHEM 1A03 or 1E03; and MATLS 2B03; and Registration in Level II or above in Materials Engineering

MATLS 2H04 A/B - INTEGRATED MATERIALS ENGINEERING LABORATORY

Characterization of materials by microscopy and electrical, mechanical and chemical methods. Matlab and computer graphics. Team projects involving materials characterization and synthesis.

One lecture, two three-hour labs; both terms. One tutorial per week; both terms

Prerequisite(s): Registration in Level II or above in Materials Engineering

MATLS 2Q04 - ELECTRONIC PROPERTIES OF MATERIALS

An introduction to the electronic structure and properties of materials: electrons and their behaviour in vacuum and in a crystal lattice, electronic structure of elements, crystal bonding, free electron theory of metals and band structure of solids, electrical and thermal properties of solids.

Three lectures; one lab (3 hours); first term

Prerequisite(s): Registration in Level II or above in Materials Engineering

MATLS 2X03 - CRYSTALLINE STRUCTURE OF MATERIALS

Crystal geometry, point groups, space groups, x-ray diffraction analysis to determine crystalline solubility limits in structures, phase diagrams, phase identification, chemical compositions, epitaxy, nanocrystals and strain, electron and neutron diffraction, crystalline defects, properties of crystals, crystal growth, phase analysis, phase transitions, protein crystallography.

Two lectures, one lab (three hours), one tutorial (three hours); first term

Prerequisite(s): Registration in Level II or above in Materials Engineering

MATLS 3B03 - MANUFACTURING ENGINEERING OF MULTIFUNCTIONAL AND BIOMEDICAL MATERIALS

Surface science and technology related to the preparation of fine particles of minerals, metals and ceramics for industrial production. Application of electrochemistry for diverse materials processing, such as electrometallurgy, thin film production and anodizing.

Three lectures; second term

Prerequisite(s): MATLS 2D03; and Registration in Level II or above in Materials Engineering

MATLS 3C03 - APPLIED THERMODYNAMICS

Gaseous systems. Phase rule. Systems with gas phase and pure condensed phases. Ellingham diagram. Predominance diagrams. Systems with gas phase and condensed solutions. Pourbaix diagrams.

Two lectures, two tutorials, one lab (one and a half hours); first term

Prerequisite(s): MATLS 2D03; and Registration in Level II or above in Materials Engineering

Antirequisite(s): MATLS 3C04

MATLS 3E04 - MASS TRANSFER

Phenomenological and mechanistic approaches to steady and non-steady state diffusion, boundary conditions, mechanisms of diffusion, Arrhenius behaviour, gas-solid reactions, precipitate growth and dissolution, plate and spherical geometries, plane front solidification, diffusion in concentrated alloys, the Kirkendall effect, the interdiffusion coefficient, diffusion couples with intermediate phases, mass transport with convection, transient diffusion in fluids, the mass transfer coefficient.

Two lectures (three hours), one tutorial (two hours); first term

Prerequisite(s): MATLS 2D03 and MATH 2ZZ3; and Registration in Level II or above in Materials Engineering

MATLS 3F03 - HIGH-TEMPERATURE MATERIALS PRODUCTION

Fundamentals of processing, building on a knowledge of heat and mass transfer. High temperature processing of materials, focusing on heat sources, solid state processing of powders and liquid state processing, high temperature production routes for most important metals.

Three lectures, one tutorial (one hour); second term.

Prerequisite(s): MATLS 2D03; and Registration in Level II or above in Materials Engineering

MATLS 3J03 - STATISTICAL METHODS FOR MATERIALS ENGINEERS

Introduction to probability. Linear and non-linear regression analysis, multi-response estimation, design of experiments including factorial and optimal design, statistical process control. Emphasis on analysis of industrial problems.

Three lectures; first term

Antirequisite(s): STATS 3Y03

Prerequisite(s): Registration in in Level III above of Materials Engineering or Chemical Engineering.

MATLS 3M03 - MECHANICAL BEHAVIOUR OF MATERIALS

Elastic and Plastic Deformation of Materials. Strengthening Methods. Fracture Mechanisms. Fatigue and Creep failure.

Three lectures, one lab (one hour) every other week; first term

Prerequisite(s): ENGINEERING 2P04 and Registration in Level III or above of Materials Engineering; or MECHENG 2P04 and Registration in Level III or above in Mechanical Engineering; or permission of the department.

MATLS 3Q03 - MATERIALS FOR ELECTRONIC APPLICATIONS

Fundamental properties of materials used in electronic applications, operation of devices and fabrication methods of electronic circuits and packaging. Includes description of dielectric, magnetic and optoelectronic properties.

Three lectures; second term

Prerequisite(s): One of MATLS 2Q04, ENGPHYS 2QM3; or permission of the department

Antirequisite(s): ENGPHYS 3PN4

MATLS 3T04 - PHASE TRANSFORMATIONS

Molar Gibbs energy diagrams. Fundamentals of diffusion. Curved interfaces, Gibbs-Thomson effect. Grain growth, Zener pinning. Homogeneous and heterogeneous nucleation. Solidification. Scheil formalism. Constitutional supercooling. Eutectic

growth. Coarsening. Recovery, recrystallization. Spinodal decomposition. Eutectoid, massive, order-disorder and martensitic transformations.

Three lectures, one lab (three hours); second term

Prerequisite(s): MATLS 2D03 and 2X03; and Registration in Level II or above of Materials Engineering

MATLS 4B03 - BIOMATERIALS AND TISSUE ENGINEERING

Introduction to biomaterials. Includes material-tissue interactions, techniques for biomaterials testing, and characterization. Applications of biomaterials and the clinical context of their use will be introduced.

Three lectures; one term

Prerequisite(s): Registration in Level III or above in Materials Engineering; or Registration in Level IV or above in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Offered on an irregular rotation basis.

MATLS 4C03 - MODERN IRON AND STEELMAKING

Theory and practice of iron making. New processes for reduced energy consumption and pollution. Thermodynamics and kinetics of steelmaking. Steel refining. Casting, including new near net shape technologies. Specialty steelmaking.

Three lectures; second term

Prerequisite(s): Registration in Level III or above in Materials Engineering; or permission of the department

Co-requisite(s): MATLS 3F03

Offered on an irregular rotation basis.

MATLS 4D03 - CORROSION AND ITS CONTROL

Thermodynamics, electrochemistry, electrified interface, electrode potential, Faradays Law, Butler-Volmer equation, activation polarization, concentration polarization, mixed potential theory, passivity, rate measurement techniques, galvanic corrosion, stress corrosion cracking, intergranular corrosion, materials selection, cathodic protection, anodic protection, inhibitors/biocides.

Three lectures; first term

Prerequisite(s): Registration in Level III above in Materials Engineering; or permission of the department

Offered on an irregular rotation basis.

MATLS 4FF3 - SYNTHESIS, APPLICATIONS AND ENVIRONMENTAL IMPACT OF NANOMATERIALS

Synthesis routes for nanomaterials, bottom-up and top-down approaches, green chemistry methods, properties of materials: carbon nanotubes, nanoparticles, quantum dots. Environmental and health impact of nanomaterials.

Three lectures; second term

Prerequisite(s): Registration in Level III or above in Materials Engineering, Engineering Physics or Chemistry; or permission of the department

MATLS 4G03 - CHARACTERIZATION OF NANOMATERIALS

Interaction of electrons and photons with matter. Imaging methods with electron microscopy, scanning probe techniques, x-ray photoelectron spectroscopy and X-ray absorption analysis with high spatial resolution.

Three lectures; first term

Prerequisite(s): Registration in Level III or above in Materials Engineering, Chemical Engineering, Engineering Physics or Honours Chemistry; or permission of the department

Offered on an irregular rotation basis.

MATLS 4H03 - THIN FILM SCIENCE AND ENGINEERING

Deposition and fabrication techniques, surfaces, growth mechanisms, epitaxy, kinetic effects in thin films, defects and properties of thin films. Materials for packaging.

Three lectures; first term

Prerequisite(s): Registration in Level III or above of Materials Engineering; or permission of the department

Offered on an irregular rotation basis.

MATLS 4I03 - SUSTAINABLE MANUFACTURING PROCESSES

Sustainable development, ingenuity gap, materials cycles, Eco-Efficiency, Environmental Impact parameters, introduction and computational structure of life cycle analysis, waste treatment and recycling technologies, impact of sustainable practice, stakeholder strategies.

Two lectures (three hours); one tutorial (one hour); first term

Prerequisite(s): Registration in Level III or above of Materials Engineering; or permission of the department

MATLS 4K06 A/B - SENIOR THESIS

Individual experimental research problem with a selected supervisor. A written and oral report is required in the first term. The thesis is defended orally. Nine unscheduled hours each week, both terms.

Prerequisite(s): Registration in Level IV or above in Materials Engineering and a GPA of at least 8.0

MATLS 4LA2 - HEAT-TREATABLE AL ALLOYS

A sequence of experiments to simulate industrial production of an Al-Mg-Si alloy. Accompanying lectures illustrate the engineering principles that underpin the industrial process.

One lecture, one lab (three hours)

Prerequisite(s): Registration in the final level of Materials Engineering

Antirequisite(s): MATLS 4A02, 4L02, 4L04

MATLS 4LB2 - BIOMATERIALS

A sequence of experiments to investigate surface modification of biomaterials involving electrodeposition of composite biopolymers and relevant biological characterization methods.

One lecture, one lab (three hours)

Prerequisite(s): Registration in the final level of Materials Engineering

Antirequisite(s): MATLS 4A02, 4L02, 4L04

First offered in 2020-2021

MATLS 4LF2 - SYNTHESIS, PROPERTIES AND APPLICATION OF THIN FILMS

A sequence of experiments to investigate and study a wide range of thin film growth methods and applications including vacuum deposition, electrodeposition, spin coating, sol gel, and sacrificial oxidation.

One lecture, one lab (three hours)

Prerequisite(s): Registration in the final Level of Materials Engineering

Antirequisite(s): MATLS 4A02, 4L02, 4L04

MATLS 4LS2 - PHYSICAL METALLURGY OF STEELS

A sequence of experiments to simulate industrial thermal-mechanical processing of low-carbon, low alloy steels. Accompanying lectures illustrate the engineering principles that underpin the industrial process.

One lecture, one lab (three hours)

Prerequisite(s): Registration in the final Level of Materials Engineering

Antirequisite(s): MATLS 4A02, 4L02, 4L04

MATLS 4ML3 - APPLICATIONS OF MACHINE LEARNING TO MATERIALS AND CHEMICAL ENGINEERING

Materials and chemical engineering applications of machine learning with topics in: Bias, neural networks, deep learning and learning theory. Classification, supervised learning, unsupervised learning, generative networks, reinforcement learning.

Prerequisite(s): MATLS 3J03

Offered on an irregular rotation basis.

MATLS 4NN3 - COMPUTATIONAL MODELLING IN MATERIALS ENGINEERING AT THE NANO-SCALE

Microscopic insight to the structure of functional materials used in photovoltaics, light generation, piezoelectronics and origin of their properties from atomic-scale simulations.

One lecture (one hour) and One lecture (two hours); second term

Prerequisite(s): Registration in Level III or above in Materials Engineering or Engineering Physics; or permission of the department

Offered on an irregular rotation basis.

MATLS 4NP3 - COMPUTATIONAL MODELLING IN MATERIALS ENGINEERING AT THE PROCESS-SCALE

Applications of heat transfer, mass transfer, and fluid flow conservation equations to industrial materials processes in metals and polymers; scaling analysis; finite element analysis.

Two lectures (three hours), one tutorial (one hour); fall term

Prerequisite(s): Two of CHEMENG 2004, CHEMENG 3A04, MATLS 3E04; or permission of the department

Offered on an irregular rotation basis.

MATLS 4P03 - PROPERTIES OF POLYMERIC MATERIALS

Structure of amorphous and crystalline polymeric materials; mechanical, electrical and optical properties, and their modification through processing.

Three lectures; first term

Prerequisite(s): Registration in Level III or above of Materials Engineering; or permission of the department

Open to Level III and IV students registered in a program in the Faculty of Science or Engineering with permission of the department. Offered on an irregular rotation basis.

MATLS 4T03 - PROPERTIES AND PROCESSING OF COMPOSITES

Intrinsic properties of matrix materials and fibres; mechanics and thermodynamics of interfaces; mechanical properties and fabrication of engineering composites.

Three lectures; second term

Prerequisite(s): MATLS 3M03; or permission of the department

Offered on an irregular rotation basis.

MATLS 4Y03 - ADVANCED BIOMATERIALS: APPLICATIONS AND DEVICE DESIGN

Advanced applications of biomaterials including nanobiomaterials, drug delivery, regenerative medicine, microfluidics, biosensing, immunomodulatory materials.

Three lectures; one term

Prerequisite(s): MATLS 4B03 and registration in Level III or above in Materials Engineering; or Registration in Level IV or above in the Integrated Biomedical Engineering and Health Sciences (IBEHS) program

Offered on an irregular rotation basis.

MATLS 4Z06 A/B - INDUSTRIAL PROJECTS

Projects, in cooperation with industry, focusing on materials or energy, involving design, economic analysis and sustainability. Students working in teams of four are assessed on oral and written reports.

Two labs (three hours total); both terms

Prerequisite(s): Registration in the final year of Materials Engineering

MATHEMATICS

Courses in Mathematics are administered by the Department of Mathematics and Statistics.

Hamilton Hall, Room 218, ext. 27034

<http://www.math.mcmaster.ca/>

Department Notes

1. Course codes ending with * indicate that the course is not necessarily offered every session; consult the Chair of the Department or the Associate Dean of Science (Academic).
2. Courses in Mathematics and Statistics are not open to students registered in the Bachelor of Technology (B.Tech.) program.

Courses

If no prerequisite is listed, the course is open.

See also courses in *Statistics*.

MATH 1A03 - CALCULUS FOR SCIENCE I

For students in science: geared towards applications, with attention to underlying concepts. Functions: limits, continuity, derivatives, optimization, curve sketching. Antiderivative, definite integral, techniques of integration.

Three lectures, one tutorial; one term

Prerequisite(s): Grade 12 Calculus and Vectors U or MATH 1F03

Antirequisite(s): ARTSSCI 1D06 A/B, MATH 1LS3, 1N03, 1X03, 1Z04, 1ZA3

Not open to students who have achieved a grade of at least B- in MATH 1M03.

Not open to students in Mathematics and Statistics I or an Engineering program or with credit or registration in ISCI 1A24 A/B.

MATH 1AA3 - CALCULUS FOR SCIENCE II

For students in science: additional techniques of integration, applications of definite integrals, differential equations, polar coordinates, parametrized curves. Sequences, infinite series, power series. Partial derivatives, double integrals.

Three lectures, one tutorial; one term

Prerequisite(s): One of MATH 1A03, 1X03, 1ZA3; or a grade of at least B- in MATH 1LS3 or 1M03

Antirequisite(s): ARTSSCI 1D06 A/B, MATH 1LT3, 1NN3, 1XX3, 1ZB3, 1ZZ5

Not open to students in Mathematics and Statistics I or with credit or registration in ISCI 1A24 A/B.

MATH 1B03 - LINEAR ALGEBRA I

Vector spaces given by solutions to linear systems. Linear independence, dimension. Determinants. Eigenvalues, eigenvectors and diagonalisation. Complex numbers.

Three lectures, one tutorial; one term

Prerequisite(s): Grade 12 Calculus and Vectors U or MATH 1F03

Antirequisite(s): MATH 1ZC3

Not open to students registered in an Engineering program.

MATH 1C03 - INTRODUCTION TO MATHEMATICAL REASONING

Inquiry into the ideas and methods of advanced mathematics. Material will include topics selected from algebra, calculus, discrete math, geometry and number theory.

Three lectures; one term

Prerequisite(s): Grade 12 Calculus and Vectors U or MATH 1F03; and credit or registration in MATH 1B03

MATH 1F03 - INTRODUCTION TO CALCULUS AND ANALYTIC GEOMETRY

A first course in the techniques of the differential calculus including exponential, logarithmic and trigonometric functions. An introduction to vector geometry.

Three lectures, one tutorial; one term

Prerequisite(s): Grade 12 Advanced Functions U or MATH 1K03

Not open to students with credit in Grade 12 Calculus and Vectors U; or credit or registration in MATH 1A03, 1LS3, 1M03, 1ZA3.

MATH 1K03 - ADVANCED FUNCTIONS & INTRODUCTORY CALCULUS FOR HUMANITIES AND THE SOCIAL SCIENCES

Properties of polynomial, rational, exponential and logarithmic functions. Derivatives of functions with applications.

Three lectures, one tutorial; one term

Prerequisite(s): MCR3U (or equivalent)

Normally not open to students who have completed Grade 12 Calculus and Vectors U, Grade 12 Advanced Functions U; or credit or registration in MATH 1A03, 1F03, 1LS3, 1M03, 1ZA3.

MATH 1LS3 - CALCULUS FOR THE LIFE SCIENCES I

Topics from differential and integral calculus, differential equations, discrete-time dynamical systems, chosen for their relevance to the life sciences.

Three lectures, one tutorial; one term

Prerequisite(s): Grade 12 Calculus and Vectors U or MATH 1F03

Antirequisite(s): MATH 1A03

Not open to students with credit or registration in ARTSSCI 1D06 A/B, ISCI 1A24 A/B, MATH 1M03, 1N03, 1X03, 1Z04, 1ZA3.

MATH 1LT3 - CALCULUS FOR THE LIFE SCIENCES II

Applications of integration, autonomous differential equations, functions of several variables; probability as application of calculus. All topics chosen for their relevance to the life sciences.

Three lectures, one tutorial; one term

Prerequisite(s): MATH 1LS3, or a grade of at least B- in MATH 1A03 or 1M03

Antirequisite(s): MATH 1AA3

Not open to students with credit or registration in ARTSSCI 1D06 A/B, ISCI 1A24 A/B, MATH 1XX3, 1ZZ5, 1ZB3.

MATH 1M03 - CALCULUS FOR BUSINESS, HUMANITIES AND THE SOCIAL SCIENCES

Integral calculus of polynomial, rational, exponential and logarithmic functions. Optimization problems. Applications in the Social Sciences and Business.

Three lectures, one tutorial; one term

Prerequisite(s): One of Grade 12 Calculus and Vectors U, MATH 1F03 or a grade of at least B- in MATH 1K03

Students considering upper year mathematics courses should take MATH 1A03.

Not open to students with credit or registration in ARTSSCI 1D06 A/B, ISCI 1A24 A/B, MATH 1A03, 1LS3, 1N03, 1X03, 1Z04, 1ZA3.

MATH 1MP3 - INTRODUCTION TO MATHEMATICAL SCIENTIFIC COMPUTATION

Introduction to mathematical problem-solving using computational methods. Introduction to a programming language; good scientific programming practices.

Three lectures, one lab; one term

Prerequisite(s): Credit or registration in one of MATH 1A03, 1LS3, 1X03 (or ISCI 1A24 A/B); and registration in a program in the Faculty of Science

Not open to students with credit or registration in COMPSCI 1MD3 or ENGINEER 1D04.

MATH 1X03 - CALCULUS FOR MATH AND STATS I

Algebraic, geometric and numeric approaches to calculus, development of mathematical thinking, intuition and theoretical foundations. Functions: limits, continuity, derivatives, applications. Antiderivative, definite integral, integration techniques.

Three lectures, one tutorial; one term

Prerequisite(s): Registration in Level I Math and Stats

Antirequisite(s): ARTSSCI 1D06 A/B, MATH 1A03, MATH 1LS3, 1N03, 1Z04, 1ZA3

Not open to students with credit or registration in ISCI 1A24 A/B.

MATH 1XX3 - CALCULUS FOR MATH AND STATS II

For students in mathematics/statistics. Additional techniques of integration, applications of definite integrals, differential equations, polar coordinates, parametrized curves. Sequences, infinite series, power series. Partial derivatives, double integrals.

Three lectures, one tutorial; one term

Prerequisite(s): MATH 1X03 and registration in Level I Math and Stats

Antirequisite(s): ARTSSCI 1D06 A/B, MATH 1AA3, 1LT3, 1NN3, 1ZB3, 1ZZ5

Not open to students with credit or registration in ISCI 1A24 A/B.

MATH 1ZA3 - ENGINEERING MATHEMATICS I

Functions: limits, continuity, derivatives, optimization, curve sketching. Antiderivative, definite integral, techniques of integration, with applications.

Three lectures, one tutorial, one lab; one term

Prerequisite(s): Registration in a program in Engineering

Antirequisite(s): ARTSSCI 1D06 A/B, MATH 1A03, 1LS3, 1N03, 1NN3, 1X03, 1Z04

Not open to students with credit or registration in ISCI 1A24 A/B.

MATH 1ZB3 - ENGINEERING MATHEMATICS II-A

Techniques of integration, applications of definite integrals, differential equations, polar coordinates, parametrized curves. Sequences, infinite series, power series. Partial derivatives.

Three lectures, one tutorial, one lab; one term

Prerequisite(s): MATH 1ZA3

Antirequisite(s): ARTSSCI 1D06 A/B, MATH 1AA3, 1LT3, 1N03, 1NN3, 1XX3, 1ZZ5

Not open to students with credit or registration in ISCI 1A24 A/B.

MATH 1ZC3 - ENGINEERING MATHEMATICS II-B

Vector spaces given by solutions to linear systems. Linear independence, dimension. Determinants. Eigenvalues, eigenvectors and diagonalisation. Complex numbers.

Three lectures, one tutorial, one lab; one term

Prerequisite(s): One of Grade 12 Calculus and Vectors U, MATH 1F03, or credit or registration in MATH 1ZA3

Antirequisite(s): MATH 1B03, 1ZZ5

MATH 2C03 - INTRODUCTION TO DIFFERENTIAL EQUATIONS

First order ordinary differential equations and higher order linear ordinary differential equations including Laplace transforms and series solutions.

Three lectures, one tutorial; one term

Prerequisite(s): One of MATH 1AA3, 1LT3, 1NN3, 1XX3, 1ZB3, ARTSSCI 1D06 A/B, ISCI 1A24 A/B; and one of MATH 1B03, 1ZC3

Antirequisite(s): ENGINEER 2Z03, MATH 2M03, 2M06, 2P04, 2Z03

MATH 2ET3* - THEORY AND PRACTICE OF TEACHING MATHEMATICS

This course is designed to give a maximum of 20 students practical experience with teaching mathematics in various contexts. The course is also an introduction to mathematics writing and development of communication skills relevant to mathematics.

Applications must be submitted to the instructor by May 1 of the preceding year, with selection for placements announced by September 9.

Two lectures, one practicum; one term

Prerequisite(s): Six units from MATH 1A03, 1AA3, 1LS3, 1LT3, 1X03, 1XX3, 1ZA3, 1ZB3 with a grade of at least A- in each, or ARTSSCI 1D06 A/B with a grade of A-, or ISCI 1A24 A/B (with a grade of at least A- in the Math component); and permission of the course instructor

MATH 2FM3 - INTRODUCTION TO MATHEMATICAL FINANCE

Nominal and effective rates of interest and discount, forces of interest and discount, compound interest, annuities certain; amortization, sinking funds, bonds, security evaluation, determination of yields.

Three lectures, one tutorial; one term

Prerequisite(s): One of MATH 1A03, 1LS3, 1M03, 1N03, 1X03, 1Z04, 1ZA3, ARTSSCI 1D06 A/B, ISCI 1A24 A/B

Antirequisite(s): MATH 2K03

MATH 2L03 - MATHEMATICAL METHODS FOR BUSINESS AND SOCIAL SCIENCES

Selected topics from: linear programming, Markov chains, game theory, differential equations, and the calculus of several variables.

Three lectures; one term

Prerequisite(s): One of MATH 1A03, 1LS3, 1M03, 1N03, 1X03, 1Z04, 1ZA3, ARTSSCI 1D06 A/B, ISCI 1A24 A/B

Not open to students registered in Science or Engineering programs.

MATH 2R03 - LINEAR ALGEBRA II

Abstract vector spaces. Linear transformations. Inner product spaces. Spectral theorems. Orthogonal bases, other topics.

Three lectures, one tutorial; one term

Prerequisite(s): One of MATH 1AA3, 1LT3, 1NN3, 1XX3, 1ZB3, ARTSSCI 1D06 A/B, ISCI 1A24 A/B; and one of MATH 1B03, 1ZC3, 1ZZ5

MATH 2UJ3 - NUMBERS FOR LIFE

Principles of quantitative reasoning, problem-solving and critical thinking, discussed in contexts related to, and relevant for, our daily lives, our society and the environment we live in. Content delivered through lecture and class discussion in an engaging and non-threatening way. Course develops core competencies often referred to as numeracy, or numeric literacy.

Three lectures; one term

MATH 2X03 - ADVANCED CALCULUS I

Multiple integration, line and surface integrals and applications. The classical integration theorems of Green, Gauss and Stokes.

Three lectures, one tutorial; one term

Prerequisite(s): One of MATH 1AA3, 1LT3, 1XX3, 1ZB3, 1ZZ5, ARTSSCI 1D06 A/B, ISCI 1A24 A/B; and credit or registration in one of MATH 1B03, 1ZC3

Students who have completed MATH 1LS3 and 1LT3 should contact the Associate Chair, in Mathematics and Statistics, to discuss the recommended independent learning needed for success in MATH 2X03.

Not open to students with credit or registration in ISCI 2A18 A/B.

Not open to students with credit in MATH 2A03, 2M06, 2MM3, 2Q04, 2ZZ3.

MATH 2XX3 - ADVANCED CALCULUS II

Theory of functions of several variables: limits, continuity, differentiability, Inverse Function Theorem, Taylor's Theorem. Extreme values, optimization, introduction to Fourier series.

Three lectures, one tutorial; one term

Prerequisite(s): MATH 2X03; or credit or registration in ISCI 2A18 A/B

MATH 2Z03 - ENGINEERING MATHEMATICS III

Ordinary differential equations, Laplace transforms, introduction to partial differential equations, applications.

Three lectures, one tutorial, one lab (two hours) every other week; one term

Prerequisite(s): MATH 1ZB3 or 1ZC3

Prerequisite(s) (EFFECTIVE 2020-2021): MATH 1ZB3

Antirequisite(s): ENGINEER 2Z03, MATH 2C03, 2M03, 2P04

MATH 2ZZ3 - ENGINEERING MATHEMATICS IV

Fourier series, vector calculus, line and surface integrals, integral theorems, applications.

Three lectures, one tutorial, one lab (two hours) every other week; one term

Prerequisite(s): MATH 1ZB3; and MATH 1ZC3 or MATH 1ZZ5

Antirequisite(s): ENGINEER 2ZZ3, MATH 2A03, 2MM3, 2Q04

MATH 3A03 - INTRODUCTION TO REAL ANALYSIS

Sequences of real numbers; supremum, continuity. Riemann integral, differentiation.

Sequences and series of functions; uniform continuity and uniform convergence.

Three lectures, one tutorial; one term

Prerequisite(s): Registration in Level III or above of an Honours program in Mathematics and Statistics; or MATH 2R03 and 2X03; or permission of the instructor

Prerequisite(s) (EFFECTIVE 2020-2021): MATH 1C03, 2R03, 2X03; or registration in Level III or above of an Honours program in Mathematics and Statistics; or permission of the instructor

MATH 3B03 - GEOMETRY

Selected topics from: affine and projective geometry, Euclidean, spherical and hyperbolic geometry, differential geometry of curves and surfaces.

Three lectures; one term

Prerequisite(s): One of MATH 2A03, 2X03, ISCI 2A18 A/B; and MATH 2R03

MATH 3C03 - MATHEMATICAL PHYSICS I

Eigenvalue problems, Fourier transforms, special functions, spherical harmonics, partial differential equations, boundary value problems.

Three lectures, one tutorial; one term

Prerequisite(s): One of MATH 2A03, 2MM3, 2Q04, 2X03, 2Z03, ISCI 2A18 A/B; and one of MATH 2C03, 2M03, 2P04, 2ZZ3. One of PHYSICS 2B06, 2D03, 2E03 is recommended.

Not open to students with credit or registration in MATH 3FF3.

MATH 3CY3 - CRYPTOGRAPHY

Introduction to cryptosystems used in modern security systems: elementary number theory, primality testing and factorization, discrete logarithm, SRA cryptosystems, elliptic curve cryptosystems. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): MATH 2R03

MATH 3D03 - MATHEMATICAL PHYSICS II

Functions of a complex variable, contour integrals, probability and statistics.

Three lectures, one tutorial; one term

Prerequisite(s): MATH 3C03

Not open to students with credit or registration in MATH 3X03 or to students registered in Honours Mathematics and Physics.

MATH 3DC3 - DISCRETE DYNAMICAL SYSTEMS AND CHAOS

Iteration of functions: orbits, graphical analysis, fixed and periodic points, stability, bifurcations, chaos, fractals, Julia sets. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): One of MATH 2A03, 2X03, 2ZZ3, or ISCI 2A18 A/B

MATH 3ET3 A/B S - MATHEMATICS TEACHING PLACEMENT

Explore teaching as a profession and integrate academics with a community, volunteer or professional experience. The student will complete an academic component in addition to the placement. This course includes a scientific communication component.

Students are responsible to arrange a suitable placement and supervision, and are required to submit an application to the Science Career and Cooperative Education two months prior to registration.

Normally students complete 60 hours of placement work involving teaching and/or tutoring through the duration of the experience; may be completed over one or two terms

Prerequisite(s): Registration in Level III or above in an Honours program in Mathematics and Statistics; and permission of the Department of Mathematics and Statistics. MATH 2ET3* is recommended.

A maximum of three units of MATH 3ET3 A/B S may be used toward the Mathematics and Statistics requirements of the degree. With permission, MATH 3ET3 A/B S may be repeated, to a total of six units, if the placement is deemed sufficiently different from the first experience.

MATH 3F03 - ORDINARY DIFFERENTIAL EQUATIONS

Systems of ordinary differential equations, autonomous systems in the plane, phase portraits, linear systems, stability, Lyapunov's method, Poincare-Bendixson theorem, applications.

Three lectures, one tutorial; one term

Prerequisite(s): MATH 1C03, 2C03; and MATH 2X03 (or MATH 2A03 or ISCI 2A18 A/B); and credit or registration in MATH 2R03

MATH 3FF3 - PARTIAL DIFFERENTIAL EQUATIONS

First order equations, well-posedness, characteristics, wave equation, heat equation, Laplace equation, boundary conditions, Fourier series, applications.

Three lectures; one term

Prerequisite(s): MATH 2C03; and 2R03; and 2XX3 (or 2A03 or ISCI 2A18 A/B)

MATH 3FM3 - MATHEMATICS OF FINANCE

Introduction to finance in discrete time: Options and forwards, efficient markets and the no arbitrage condition, binomial asset pricing model, portfolio strategies, stochastic processes, conditional expectation, martingales, optimal portfolio selection, exotic options.

Three lectures; one term

Prerequisite(s): One of ISCI 2A18 A/B, MATH 2A03, 2X03; and STATS 2D03

Antirequisite(s): MATH 4K03

MATH 3G03 - PROBLEM SOLVING

A course designed to illustrate the principles of mathematical problem solving. This course includes a scientific communication component. Maximum enrolment is 20 students.

Three lectures; one term

Prerequisite(s): One of MATH 2A03, MATH 2X03 or ISCI 2A18 A/B; and MATH 2R03

MATH 3GR3 - ABSTRACT ALGEBRA

An introduction to groups and rings, with an emphasis on concrete examples. Topics include: groups, subgroups, normal subgroups, quotient groups, group homomorphisms, First Isomorphism Theorem for groups, symmetric and alternating groups, rings, subrings, ideals, quotient rings, ring homomorphisms, and the First Isomorphism for rings.

Three lectures, one tutorial (one hour); one term

Prerequisite(s): MATH 2R03

Prerequisite(s) (EFFECTIVE 2020-2021): MATH 1C03, 2R03

Antirequisite(s): MATH 3E03

MATH 3H03* - NUMBER THEORY

Selected topics from: congruence and residues, continued fractions, approximation of irrationals, arithmetic in selected quadratic number fields. Diophantine equations, partitions, geometry of numbers, quadratic reciprocity.

Three lectures; one term

Prerequisite(s): Credit in at least 12 units of Mathematics or Statistics Level II or above

MATH 3I03 - PARTIAL DIFFERENTIAL EQUATIONS FOR ENGINEERING

Topics in partial differential equations of interest to mechanical, material and ceramic engineering, including the wave equation, the heat diffusion equation and Laplace equation, in various co-ordinate systems.

Three lectures, one tutorial; first term

Prerequisite(s): One of MATH 2M03, 2P04, 2ZZ3 or registration in Level III or IV of a program in the Department of Materials Science and Engineering

MATH 3MB3 - INTRODUCTION TO MODELLING

Introduction to computational modelling using software such as R or MATLAB. Analytical modelling using algebra and calculus. The development and analysis of models will be illustrated with examples selected from biology, medicine, chemistry, physics, economics, or other areas of natural or social sciences. This course includes a scientific communication component.

Three lectures, one lab (one hour); one term

Prerequisite(s): One of MATH 1AA3, 1LT3, 1XX3, ARTSSCI 1D06 A/B, ISCI 1A24 A/B; and one of MATH 1B03, 1ZC3, 1ZZ5

Antirequisite(s): MATH 2E03

MATH 3NA3 - NUMERICAL LINEAR ALGEBRA

Conditioning and numerical stability, rounding and truncation errors, convergence rates, linear and nonlinear systems of equations, eigenvalue problems, least squares, QR and singular-value decomposition, optimization.

Three lectures; one term

Prerequisite(s): MATH 2R03 and one of MATH 1MP3, COMPSCI 1MD3, PHYSICS 2G03

Antirequisite(s): MATH 2T03

MATH 3QC3 - INTRODUCTION TO QUANTUM COMPUTING

Postulates of quantum mechanics for finite dimensional systems; information on quantum bits, logical operations and quantum gates; quantum parallelism and complexity theory; examples of quantum algorithms. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): One of MATH 2A03, 2X03 or ISCI 2A18 A/B; and MATH 2R03

MATH 3T03 - INQUIRY IN TOPOLOGY

Size and shape in topology and analysis, compactness, connectedness, limit sets, theory of dimension, fractals and self-similarity.

Three lectures; one term

Prerequisite(s): MATH 2X03 (or ISCI 2A18 A/B)

Prerequisite(s) (EFFECTIVE 2020-2021): MATH 1C03, 2X03 (or ISCI 2A18 A/B)

MATH 3TP3 - TRUTH AND PROVABILITY: G

The goal is to inquire into Gödel's proof of incompleteness; in any sufficiently powerful axiom system there will be statements which are true but not provable.

Three lectures; one term

Prerequisite(s): MATH 2R03

Prerequisite(s) (EFFECTIVE 2020-2021): MATH 1C03

MATH 3U03 - COMBINATORICS

Inversion formulae, systems of distinct representatives, block designs and other configurations; other topics. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): One of MATH 2A03, 2X03 or ISCI 2A18 A/B; and MATH 2R03

Antirequisite(s): MATH 4C03

MATH 3V03 - GRAPH THEORY

Graphs, trees, bipartite graphs, connectivity, graph colouring, matrix representations, applications. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): One of MATH 2A03, 2X03 or ISCI 2A18 A/B; and MATH 2R03

MATH 3X03 - COMPLEX ANALYSIS I

Analytic functions, Cauchy's theorem, Cauchy's integral formula, residues, zeroes of analytic functions; Laurent series, the maximum principle.

Three lectures, one tutorial; one term

Prerequisite(s): MATH 2R03 and 2XX3

MATH 3Z03 - INQUIRY: HISTORY OF MATHEMATICS

An introduction to the history of mathematics, including interaction with other phases of culture, with special emphasis on the past three centuries. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): At least two Level II Mathematics or Statistics courses other than MATH 2K03, MATH 2L03

MATH 4A03 - REAL ANALYSIS II

Metric spaces, compactness. Spaces of continuous functions, functions of several variables, inverse and implicit function theorems. Lebesgue integration.

Three lectures; one term

Prerequisite(s): MATH 3A03

Antirequisite(s): MATH 3AA3

MATH 4AT3* - TOPICS IN ANALYSIS

Precise topics will vary; consult the department for current information. Possible topics include: functional analysis, measure theory, harmonic analysis, calculus of variations, theory of distributions.

Three lectures; one term

Prerequisite(s): Permission of the instructor

MATH 4AT3 may be repeated, if on a different topic.

MATH 4B03* - CALCULUS ON MANIFOLDS

Review of multivariable calculus, basic properties of manifolds, differential forms, Stokes' theorem, de Rham cohomology and applications.

Three lectures; one term

Prerequisite(s): One of MATH 3A03, 3B03, 3C03

MATH 4BT3* - TOPICS IN GEOMETRY

Precise topics will vary; consult the department for current information. Possible topics include: differential geometry, riemannian metrics, connections, curvature, geodesics, topological and analytic properties of Riemannian manifolds.

Three lectures; one term

Prerequisite(s): Permission of the instructor

MATH 4BT3 may be repeated, if on a different topic.

MATH 4E03 - GALOIS THEORY

An introduction to Galois Theory. Topics include: field extensions, splitting fields, normality and separability, Galois extensions, finite fields, solvability by radicals, cyclic extensions, cyclotomic extensions, algebraic closure, classical constructions, computations of Galois groups.

Three lectures; one term

Prerequisite(s): MATH 3E03 or 3GR3

MATH 4ET3* - TOPICS IN ALGEBRA

Precise topics will vary; consult the department for current information. Possible topics include: algebraic geometry, algebraic number theory, computational commutative algebra.

Three lectures; one term

Prerequisite(s): Permission of the instructor

MATH 4ET3 may be repeated, if on a different topic.

MATH 4FM3 - FINANCIAL MARKETS AND DERIVATIVES

Modelling of options, futures, interest rate securities and other financial derivatives in continuous time using Brownian motion and stochastic calculus. Topics include risk-neutral pricing, the Black-Scholes framework, dynamic hedging, volatility and risk. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): MATH 3FM3

MATH 4FT3 - TOPICS IN DIFFERENTIAL EQUATIONS

Topics to be selected from the theory of ordinary differential equations, bifurcation and stability, and partial differential equations.

Three lectures; one term

Prerequisite(s): Permission of the instructor

MATH 4FT3 may be repeated, if on a different topic.

MATH 4GR3 - GROUPS AND RINGS

Further topics in group theory and ring theory. Topics include: direct products, Fundamental Theorem of Finite Abelian Groups, Sylow Theorems, free groups, group presentations, fields and integral domains, special integral domains (Euclidean, principal ideal, unique factorization), fields of fractions of integral domains, polynomial rings in many variables, and additional topics at the discretion of the instructor (e.g., Groebner bases, algebraic coding theory.)

Three lectures; one term

Prerequisite(s): MATH 3E03 or 3GR3

MATH 4L03* - INTRODUCTION TO MATHEMATICAL LOGIC

First order logic, deduction systems, completeness and compactness theorems, model theory.

Three lectures; one term

Prerequisite(s): MATH 3E03 or 3GR3

MATH 4LT3* - TOPICS IN LOGIC

Precise topics will vary; consult the department for current information. Possible topics include: axiomatic set theory, computability theory, model theory or proof theory.

Three lectures; one term

Prerequisite(s): Permission of the instructor

MATH 4LT3 may be repeated, if on a different topic.

MATH 4MB3 - MATHEMATICAL BIOLOGY

Population dynamics: models of discrete and continuous growth; competition and predation; epidemic models. Other topics selected by instructor.

Three lectures; one term

Prerequisite(s): MATH 3F03

Antirequisite(s): MATH 3N03

MATH 4NA3 - NUMERICAL METHODS FOR DIFFERENTIAL EQUATIONS

Interpolation and approximation, numerical differentiation and integration, numerical methods for ODEs: initial-value and boundary-value problems, finite-difference methods for PDEs, selected advanced numerical methods.

Three lectures; one term

Prerequisite(s): MATH 2C03; and MATH 3NA3 or 3Q03

Antirequisite(s): MATH 3Q03

MATH 4P06 A/B S - SENIOR RESEARCH PROJECT

A project in pure or applied mathematics to be carried out under the supervision of a faculty member from the Department of Mathematics and Statistics. A written report and oral presentation will be required. This course includes a scientific communication component.

One occasional tutorial; two terms

Prerequisite(s): Registration in Level IV of any Honours Mathematics and Statistics program; and a GPA of at least 9.0; and permission of the Chair of the Department
Not open to students with credit or registration in STATS 4T06 A/B or ISCI 4A12 A/B.

MATH 4TT3* - TOPICS IN TOPOLOGY

Precise topics will vary; consult the department for current information. Possible topics include: fundamental group and covering spaces, cell complexes and homology theory, theory of knots, links, and braids.

Three lectures; one term

Prerequisite(s): Permission of the instructor

Antirequisite(s): MATH 4T03

MATH 4TT3 may be repeated, if on a different topic.

MATH 4W03 - READING IN MATHEMATICS

Directed reading in areas of mathematics of interest to the student and the instructor. This course includes a scientific communication component.

Prerequisite(s): GPA of at least a 7.0 and permission of the Chair of the Department
MATH 4W03 may be repeated, if on a different topic.

MATH 4WW3 - READING IN MATHEMATICS II

Directed reading in areas of mathematics of interest to the student and the instructor. This course includes a scientific communication component.

Prerequisite(s): GPA of at least 7.0 and permission of the Chair of the Department
MATH 4WW3 may be repeated, if on a different topic.

MATH 4X03* - COMPLEX ANALYSIS II

Conformal maps, analytic continuation, harmonic functions, the Riemann mapping theorem, Riemann surfaces.

Three lectures; one term

Prerequisite(s): MATH 3X03

MCMASTER ENGLISH LANGUAGE DEVELOPMENT

Department of Linguistics and Languages (Faculty of Humanities)

(+1) 905-525-9140 Ext. 24388

Email: meld@mcmaster.ca

Web: <http://meld.mcmaster.ca>

Note

All MELD courses require enrolment in the McMaster English Language Development Diploma program.

Courses

MELD 1A03 - ACADEMIC WRITING AND INTEGRITY

A writing course that focuses on the development of grammatically, lexically and stylistically appropriate English for writing summaries and short academic texts. Includes a focus on academic integrity.

Four hours; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1AA3 - ADVANCED ACADEMIC WRITING

A writing course that focuses on the development of the appropriate language (grammar, vocabulary, style) and structure for essays and analysing charts/graphs. Includes a focus on documenting sources and citation styles.

Four hours; one term

Prerequisite(s): Registration in the McMaster English Language Development (MELD) Diploma program

MELD 1B03 - ENGLISH PHONETICS AND PRONUNCIATION

This course offers an overview of the principal speech features of contemporary spoken English, with a focus on Canadian English. Students are given opportunities to examine and practise their spoken language skills for a variety of contexts and are introduced to academic presentations.

Four hours; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1BB3 - ADVANCED SPEAKING AND PRESENTATION SKILLS

Students build appropriate speaking skills through a variety of individual and collaborative speaking and presentation exercises, based on academic content (oral reports, article summaries, audio/video recordings, formal presentations.)

Four hours; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1C03 - ACADEMIC READING AND LISTENING SKILLS

In this course students summarize and critically evaluate (both orally and in writing) a variety of texts in advanced English. The texts to be evaluated represent a range of academic disciplines.

Four hours; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1CC3 - ADVANCED ACADEMIC READING SKILLS

This course further develops students' skills in academic writing. The focus in this course is on the comprehension and critical evaluation of scholarly articles and texts from a range of disciplines.

Four hours; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1D03 - SOCIAL PERSPECTIVES ON LANGUAGE

Through introductory lectures on sociolinguistic aspects of English, students develop socio-pragmatic awareness of communication, and listening and note-taking strategies for university lectures. This course also covers general strategies for academic success.

Four hours; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1DD3 - ADVANCED ACADEMIC LISTENING SKILLS

Students build on the lecture-listening skills developed in 1D03 by moving through advanced academic content, representing a range of disciplines. The focus is on oral academic communication (e.g., discussions) and the development of superior listening, note-taking and studying skills.

Four hours; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1L00 - LINGUISTICS LAB 1

Compulsory weekly meetings for academic support for the degree credit course in MELD. This hour is in addition to three hours (lecture) of the credit course.

One hour; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1LLO - LINGUISTICS LAB 2

Compulsory weekly meetings for academic support for the degree credit course in MELD. This hour is in addition to three hours (lecture) of the credit course.

One hour; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1M00 - MENTORSHIP LAB 1

Compulsory weekly mentorship meetings aimed at promoting cultural awareness.

One hour; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MELD 1MM0 - MENTORSHIP LAB 2

Compulsory weekly mentorship meetings aimed at promoting cultural awareness.

One hour; one term

Prerequisite(s): Registration in the McMaster English Language Development Diploma (MELD) program

MECHANICAL ENGINEERING

Courses in Mechanical Engineering are administered by the Department of Mechanical Engineering.

John Hodgins Engineering Building, Room 316, ext. 24294

<http://mech.mcmaster.ca/>

Department Note

Enrolment in Mechanical Engineering courses by students in programs other than those administered by the Department may be restricted.

Courses

If no prerequisite is listed, the course is open.

MECHENG 2A03 - DESIGN COMMUNICATION

Formal mechanical engineering drawings, views, dimensioning and tolerancing, technical illustrations and symbols and written or oral technical communication. Three lectures, plus one tutorial or lecture (one hour) devoted to applications at the discretion of the instructor; first term

Prerequisite(s): Registration in Level II of any Mechanical Engineering program or Honours Art Program

MECHENG 2B03 - MECHANICAL ENGINEERING MEASUREMENTS

Static and dynamic characteristics of instruments, statistical analysis of measurement errors, variable conversion elements and signal amplification. Metrology, measurement of strain and force, pressure, flow, temperature and power.

Two lectures, one lab (three hours every other week); second term

Prerequisite(s): Registration in Level II of any Mechanical Engineering program
Antirequisite(s): MECHENG 2BA3

MECHENG 2BA3 - MECHANICAL ENGINEERING MEASUREMENTS

Static and dynamic characteristics of instruments, statistical analysis of measurement errors, variable conversion elements and signal amplification. Metrology, measurement of strain and force, pressure, flow, temperature and power.

Two lectures, one lab (three hours every other week); second term

Prerequisite(s): Registration in Level II of any Mechatronics Engineering program
Antirequisite(s): MECHENG 2B03

MECHENG 2C04 - MECHANICAL ENGINEERING DESIGN I

Design/Build/Test projects involving synthesis, modelling, and analysis.

Two lectures, one lab (two hours); second term

Prerequisite(s): Registration in Level II of any Mechanical Engineering program

MECHENG 2D03 - MECHANICAL ENGINEERING DESIGN ELEMENTS

Design synthesis, fundamental principles of standard design elements, mechanical and fluid power elements, component specification and optimization.

Three lectures, one tutorial; first term

Prerequisite(s): Registration in Level II of any Mechanical Engineering program
Antirequisite(s): MECHENG 2DA3

MECHENG 2DA3 - MECHANICAL ENGINEERING DESIGN ELEMENTS

Design synthesis, fundamental principles of standard design elements, mechanical and fluid power elements, component specification and optimization.

Three lectures, one tutorial; second term

Prerequisite(s): Registration in Level III of any Mechatronics Engineering program
Antirequisite(s): MECHENG 2D03

MECHENG 2P04 - STATICS AND MECHANICS OF MATERIALS

Principles of statics as applied to deformable solid bodies. Stress and strain, elastic behaviour of simple members under axial force, bending and torsion. Principal stresses; statical indeterminacy.

Three lectures, plus one unit comprising tutorials or lectures devoted to applications at the discretion of the instructor; first term

Prerequisite(s): PHYSICS 1D03 and registration in Level II of any Mechanical Engineering program

Antirequisite(s): CIVENG 2P04, ENGINEER 2P04

MECHENG 2Q04 - ENGINEERING MECHANICS: KINETICS AND DYNAMICS

Kinematics and dynamics of particles and rigid bodies. Analysis of planar mechanisms. Displacement, velocity and acceleration analysis methods. Motion with respect to a rotating frame reference. Work, energy and momentum principles. Three lectures, plus one unit comprising tutorials or lectures devoted to applications at the discretion of the instructor; first term

Prerequisite(s): Registration in Level II of any Mechanical Engineering program
Antirequisite(s): CIVENG 2Q03, 2Q04, ENGINEER 2Q04, MECHENG 2QA4, 2QR4

MECHENG 2QA4 - ENGINEERING MECHANICS: KINETICS AND DYNAMICS

Kinematics and dynamics of particles and rigid bodies. Analysis of planar mechanisms. Displacement, velocity and acceleration analysis methods. Motion with respect to a rotating frame reference. Work, energy and momentum principles. Three lectures, plus one unit comprising tutorials or lectures devoted to applications at the discretion of the instructor; first term

Prerequisite(s): Registration in Level II of any Mechatronics Engineering program
Antirequisite(s): CIVENG 2Q03, 2Q04, ENGINEER 2Q04, MECHENG 2Q04, 2QR4

MECHENG 2W04 - THERMODYNAMICS

Introduction to the principles of thermodynamics, and applications in engineering. Basic concepts: energy systems, properties of pure substances, entropy. Laws of thermodynamics, power and refrigeration cycles.

Three lectures, one tutorial (two hours); second term

Prerequisite(s): Registration in Level II of any Mechanical Engineering program
Antirequisite(s): ENGINEER 2H03, ENGPYHS 2NE3

MECHENG 3A03 - ENGINEERING MECHANICS

Singularity functions, generalized Hooke's law; shear stress, shear flow in beams; shear centre. Biaxial and unsymmetrical bending, analysis of indeterminate beams and frames using energy methods, impact loads. Buckling of compression members. Introduction to yield criteria.

Three lectures, one tutorial; second term

Prerequisite(s): ENGINEER 2P04 or MECHENG 2P04 and registration in any Mechanical Engineering program

Antirequisite(s): CIVENG 2C04

MECHENG 3C03 - MANUFACTURING ENGINEERING

A general introduction, encompassing the wide field of activities from iron and steel making through casting, rolling, forging, to cold forming, metal cutting, welding, bonding, electrical machining, surface treatment, mechanical handling, assembly, cleaning, packaging.

Three lectures; first term

Prerequisite(s): Registration in any Mechanical Engineering, Chemical Engineering or Materials Science and Engineering program, or, registration in Level III or IV of the Manufacturing Engineering Technology Co-op (B.Tech.) program

Cross-list(s): MANTECH 3MF3

This course is administered by the Department of Mechanical Engineering.

MECHENG 3E05 - MECHANICAL ENGINEERING DESIGN II

3-D stress transformation, curved beams, thick walled pressure vessels, contact stresses, fatigue, bolted and welded joints, machine elements. The laboratories feature a major design project from concept development through analysis to formal report preparation.

Four lectures, one lab (two hours); second term

Prerequisite(s): ENGINEER 2P04 or MECHENG 2P04; 2Q04 or, 2QA4 and 3A03

Antirequisite(s): MECHENG 3E04

MECHENG 3F04 - MODELLING AND NUMERICAL SOLUTIONS

An introductory course in numerical analysis covering such topics as numerical differentiation, integration, curve-fitting and the solution of differential equations and systems of linear and non-linear equations.

Four lectures; first term

Prerequisite(s): Registration in any Mechanical Engineering program

MECHENG 3M03 A/B - COMPOSITE LABORATORY

Laboratory exercises in fluid mechanics, thermodynamics, solid mechanics, and machining processes.

One lab (three hours); both terms

Prerequisite(s): Registration in any Mechanical Engineering program

Antirequisite(s): MECHENG 3M02

MECHENG 3004 - FLUID MECHANICS

Fluid properties and statics, conservation laws, applications of the continuity, momentum and energy equations, dimensional analysis and similarity, boundary layer flow, internal and external flows.

Three lectures, one tutorial (two hours); first term

Prerequisite(s): Both MATH 2M03 and 2MM3 (or 2M06), or both MATH 2Z03 and MATH 2ZZ3, or both MATH 2P04 and 2Q04; and registration in any Mechanical Engineering program

Antirequisite(s): CIVENG 2004

MECHENG 3R03 - HEAT TRANSFER

Application of the laws of conduction, convection and radiation to problems in heat transfer. Steady and transient conduction in solids. Laminar and turbulent convection. Radiation heat transfer processes. Boiling and condensation heat transfer.

Three lectures, one tutorial; second term

Prerequisite(s): MATH 2M03 (or 2M06), or 2Z03; and MECHENG 2W04

MECHENG 4B03 - TOPICS IN PRODUCT DEVELOPMENT

Case studies using modern product development methods, value engineering, product specification, rapid product development, lean design and continuous improvement. Product liability and robust design.

Three lectures, one tutorial; second term

Prerequisite(s): Registration in Level IV or above of any Mechanical Engineering or Mechatronics Engineering program

MECHENG 4BB3 - BIOMECHANICS

Application of mechanical engineering principles to biomechanics problems including cellular biomechanics, hemodynamics, circulatory system, respiratory system, muscles and movement and skeletal biomechanics.

Three lectures, one tutorial; first term

Prerequisite(s): Registration in Level IV or above of any Engineering program

Antirequisite(s): IBEHS 4B03

MECHENG 4BF3 - BIOFLUID MECHANICS SYSTEMS

The objective is to learn blood flow mechanics through the circulatory system and its subsystems. The course examines mechanics of circulation, mechanobiology and biomechanics of different components of circulatory system, in-vivo and in-vitro techniques and their medical applications.

Three lectures, one tutorial; first term

Prerequisite(s): Registration in Level IV or above of any Engineering program or Integrated Biomedical Engineering and Health Sciences (IBEHS) program

MECHENG 4C03 - PRODUCTION SYSTEMS ENGINEERING

Analytical tools to evaluate and design production systems to meet specified performance metrics. Quantitative and qualitative evaluation of production cells, flexible manufacturing systems and production lines.

Three lectures; second term

Prerequisite(s): Registration in Level IV or above of any Mechanical Engineering program or permission of the Department

MECHENG 4CC3 - EXPERIMENTAL AND COMPUTATIONAL BIOMECHANICS

Introduction to experimental and computational biomechanics including biomechanical testing concepts and application of finite element methods in simulations of biomechanical structures/systems.

Three lectures; second term

Prerequisite(s): Registration in Level IV or above of any Mechanical Engineering or Integrated Biomedical Engineering and Health Sciences (IBEHS) program or permission of the Department

MECHENG 4D03 - MANUFACTURING PROCESSES (METAL REMOVAL)

Fundamentals of metal removing processes, including mechanics and tribological aspects of material removal. Application of theory to the practice of machining processes such as turning, milling, drilling and grinding.

Three lectures; second term

Prerequisite(s): MECHENG 3C03 and registration in any Level IV or above of any Mechanical Engineering program

MECHENG 4E03 - MICROELECTROMECHANICAL SYSTEMS (MEMS)

Introduction, microfabrication and micromachining fundamentals, scaling effects, mechanics and transduction at microscale, actuation and sensing methods - Electrostatic, piezoelectric, thermal, electromagnetic, resonant, tunneling and microfluidic techniques. Capacitive sensors, resonators, lab on chip devices, microfluidic devices, micromirrors, assembly techniques for MEMS, microsystem packaging.

Three lectures; second term

Prerequisite(s): Registration in Level IV or above of any Mechanical Engineering, Engineering Physics or Integrated Biomedical Engineering and Health Sciences (IBEHS) program or permission of the Department

MECHENG 4H03 - MECHATRONICS

Integration of mechanical engineering with electronics and computer control. Sensors, actuators (including pneumatic and hydraulic), modelling using building block and state space methods, model-based control, programming of PLCs with practical demonstrations.

Three lectures; second term

Prerequisite(s): MECHENG 4R03, MECHTRON 3DX4, ELECENG 3CL4 or SFWRENG 3DX4 and registration in any Mechanical Engineering, Mechatronics Engineering or Electrical Engineering program

MECHENG 4I03 - NOISE ANALYSIS AND CONTROL

Acoustic quantities; noise measurements and analysis; noise standards; sound generation, propagation, absorption, transmission; acoustic materials; noise control techniques; case studies.

Three lectures; first term

Prerequisite(s): MECHENG 4Q03

MECHENG 4J03 - INTRODUCTION TO COMPUTATIONAL FLUID MECHANICS AND HEAT TRANSFER

Computational Methods for Fluid Mechanics and Heat Transfer covering: concepts of modelling and numerical analysis, governing equations of thermo-fluid problems, finite difference discretization methods. Use of commercial computational software for solving thermo-fluid problems.

Three lectures, one tutorial (one and one-half hours); second term

Prerequisite(s): MECHENG 3004 or 4S03, and MECHENG 3F04 or ENGPYHS 2CE4, or permission of the Department

MECHENG 4K03 - ROBOTICS

Fundamental theory and practical applications of robotic manipulators and mobile robots. Equations of motion, robot dynamics and statics, motion planning, introduction to machine vision, basics of robot programming.

Three lectures; first term

Prerequisite(s): ENGINEER 2Q04 or MECHENG 2Q04 or 2QA4 and registration in Level IV or above of any Mechanical Engineering or Mechatronics Engineering program

MECHENG 4L03 - INDUSTRIAL DESIGN

Introduction for engineering students to the techniques of industrial design, case studies and introduction to illustration techniques.

Three lectures; second term

Prerequisite(s): MECHENG 2C04 or (2C03) and registration in Level IV or above of any Mechanical Engineering program

MECHENG 4M06 A/B - PROJECT

A major mechanical or manufacturing engineering design or experimental project to be completed under the supervision or co-supervision of a faculty member holding an appointment in the Department of Mechanical Engineering.

Lectures, one capstone project; both terms

Prerequisite(s): Registration in Level IV Mechanical Engineering, Mechanical Engineering Co-op (B.Eng.); or Level V Mechanical Engineering and Management, Mechanical Engineering and Management Co-op (B.Eng.Mgt.) or Mechanical Engineering and Society, Mechanical Engineering and Society Co-op (B.Eng.Society)

MECHENG 4N03 - NANOBIO ENGINEERING

Introduction to nanotechnology, nanomaterials, nanotechnology in living systems, nanotechnology in biomedical devices, nanobiomaterials, characterization of biomaterials, nano-coatings, nano-biofunctional interfaces, biosensing and diagnostics, organs-on-chips.

Three lectures; first term

Prerequisite(s): Registration in Level IV or above of Engineering or Integrated Biomedical Engineering and Health Sciences (IBEHS) program or permission of Department

MECHENG 4O04 - SUSTAINABLE ENERGY SYSTEMS

Assessment of current and future energy systems, covering resources, extraction, conversion with emphasis on meeting regional and global energy needs in

a sustainable manner. Different renewable and conventional energy technologies and their attributes. Evaluation and analysis of energy technology systems in the context of political, social, economic and environmental goals.

Four lectures; second term

Prerequisite(s): MECHENG 2W04, 3004; or ENGPYHS 2NE3, 3004; or permission of the Department

MECHENG 4P03 A/B - COMPOSITE LABORATORY

Laboratory exercises in vibration analysis, machine structures, controls, heat transfer, gas dynamics, fluid mechanics and thermodynamics.

Three lectures; first term

Prerequisite(s): ENGINEER 2Q04 or MECHENG 2Q04 or 2QA4 and registration in any Mechanical Engineering or Mechatronics program

MECHENG 4Q03 - MECHANICAL VIBRATIONS

Transient and steady state vibration of single- and multi-degree of freedom systems. Free and forced vibrations of single and multiple degree-of-freedom mechanical systems, transient response, damping and vibration isolation.

Three lectures; first term

Prerequisite(s): ENGINEER 2Q04 or MECHENG 2Q04 or 2QA4 and registration in any Mechanical Engineering or Mechatronics program

MECHENG 4R03 - CONTROL SYSTEMS

Fundamentals of linear, continuous control systems. Control system performance in both time and frequency domains. Design and analysis of controllers.

Three lectures; second term

Prerequisite(s): Registration in Level III Mechanical Engineering; or Level IV Mechanical Engineering and Management or Mechanical Engineering and Society
Antirequisite(s): ELECENG 3TP3, ELECENG 3TP4, IBEHS 4A03

MECHENG 4S03 - INCOMPRESSIBLE FLOW

Introduction to internal and external laminar and turbulent incompressible flows. Topics include turbulent boundary layers, aerodynamics and convective heat transfer.

Three lectures; first term

Prerequisite(s): MECHENG 3004, CHEMENG 2004, 3004, or ENGPYHS 3004

MECHENG 4T03 - FINITE ELEMENT APPLICATIONS

Theory of the finite element method, element derivation, solution procedures. Applications to static and dynamic mechanical systems using a finite element package.

Three lectures, one tutorial; first term

Prerequisite(s): Registration in Level IV or above of any Mechanical Engineering program

Antirequisite(s): MECHENG 4TR3

MECHENG 4U03 - COMPRESSIBLE FLOW AND TURBOMACHINERY

Compressible flows: Fanno and Rayleigh flows, normal and oblique shocks. Turbomachines: axial flow gas and wind turbines, axial flow compressors and fans.

Three lectures; second term

Prerequisite(s): MECHENG 2W04, 3004; or ENGPYHS 2NE3, 3004

MECHENG 4V03 - THERMO-FLUIDS SYSTEMS DESIGN AND ANALYSIS

Design, operation and application characteristics of equipment commonly used in thermal systems. Modelling performance characteristics of piping systems, pumps, compressors, fans, heat exchangers, boilers and cooling towers. System simulation and optimization. Selection criteria of thermal equipment. Design optimization and system performance evaluation.

Three lectures, one tutorial; first term

Prerequisite(s): MECHENG 2W04, 3004, 3R03

MECHENG 4W03 - AIR CONDITIONING AND REFRIGERATION SYSTEMS

Re-examination of laws of thermodynamics, multicomponent vapour systems, psychrometry, air conditioning, mechanical vapour compression refrigeration, absorption refrigeration, heating and cooling load calculations, air quality and human thermal comfort.

Three lectures; first term

Prerequisite(s): MECHENG 2W04 or ENGPYS 2NE3, and registration in Level IV or above of any Mechanical Engineering program or Engineering Physics program

MECHENG 4X04 A/B - INDEPENDENT RESEARCH PROJECT

Individual research project over two terms to be arranged by mutual consent of a professor and the student with approval of the Department Associate Chair (Undergraduate.)

Prerequisite(s): A minimum GPA of 9.5, consent of a supervisor, and registration in Level IV Mechanical Engineering, Mechanical Engineering Co-op (B.Eng.) or Level V Mechanical Engineering and Management, Mechanical Engineering and Management Co-op (B.Eng.Mgt.) or Mechanical Engineering and Society, Mechanical Engineering and Society Co-op (B.Eng.Society).

MECHENG 4Y03 - INTERNAL COMBUSTION ENGINES

This course focuses on internal combustion engines (ICE), including operations, thermodynamics, combustion, and characteristics of gasoline and diesel engines, as well as hybrid powertrains.

Three lectures, first term

Prerequisite(s): Registration in Level IV or above of any Mechanical Engineering program or Engineering Physics program

MECHENG 4Z03 - CAD/CAM/CAE

Solid modelling theory, part creation, assemblies and rigid bodies, mechanism simulation, B-Splines, data exchange, CNC machining and inspection. Major project using computer laboratory facilities.

Three lectures, one lab (one hour); second term

Prerequisite(s): Registration in Level IV or above of any Mechanical Engineering or Mechatronics Engineering program

Antirequisite(s): MECHENG 4ZR3

MECHATRONICS

Courses in Mechatronics Engineering are administered by the Department of Computing and Software.

Information Technology Building, Room 202, ext. 24614

<http://www.cas.mcmaster.ca/>

Note

All Mechatronics Engineering courses are open to students registered in a Mechatronics Engineering or Software Engineering (Embedded Systems) program, subject to prerequisite requirements. Prior permission of the Department is necessary for other students.

MECHTRON 3DX4 - DYNAMIC MODELS AND CONTROL OF PHYSICAL SYSTEMS

Modeling of dynamic continuous physical phenomena in both continuous and discrete time. Control theory, stability analysis and feedback controller design.

Application of computer control to continuous processes, system identification.

Three lectures, one lab (three hours); second term

Prerequisite(s): One of SFWRENG 2MX3 or SFWRENG 3MX3

Antirequisite(s): ELECENG 3CL4, ENGINEER 3LO3, IBEHS 4A03, MECHENG 4R03, SFWRENG 3DX3, SFWRENG 3DX4

Cross-list(s): SFWRENG 3DX4

MECHTRON 3TA4 - EMBEDDED SYSTEMS DESIGN I

Interfacing to digital and analog systems, sensors and actuators. Signals and conditioning: data acquisition, active and passive filtering, optical and analog isolation, PWM, de/ multiplexing. Architecture of micro-controllers and DSP. Embedded system design and documentation.

Three lectures, one tutorial (two hours) every other week, one lab (three hours) every other week; first term

Prerequisite(s): One of ENGPYS 2E04, SFWRENG 2DA3 or 2DA4; and registration in Level 2 or above of a Mechatronics or Software Engineering - Embedded Systems, Software Engineering - Embedded Systems Co-op (B.Eng.) program

MECHTRON 3TB4 - EMBEDDED SYSTEMS DESIGN II

Design and implementation of embedded systems interacting with analog systems. Software design and implementation for embedded systems and DSP systems. Simulation and testing of embedded systems.

Three lectures, one tutorial (two hours) every other week, one lab (three hours) every other week; second term

Prerequisite(s): MECHTRON 3TA4

MECHTRON 4AA4 - REAL-TIME SYSTEMS AND CONTROL APPLICATIONS

Hard and soft real-time systems. Safety classification. Fail-safe design, hazard analysis. Discrete event systems. Modes. Requirements and design specifications. Tasks and scheduling. Clock synchronization. Data acquisition. Applications in real-time control.

Three lectures, one lab (three hours); first term

Prerequisite(s): SFWRENG 3BB4 or 3SH3; and SFWRENG 3DX4 or MECHTRON 3DX4

Antirequisite(s): SFWRENG 4A03, 4AA3, 4AA4, 4GA3

Cross-list(s): SFWRENG 4AA4

MECHTRON 4AX3 - PREDICTIVE AND INTELLIGENT CONTROL

This course introduces several concepts used in systems engineering, predictive control and artificial intelligence. A variety of techniques including prediction and estimation, linear models, basic optimization techniques, Monte Carlo techniques, neural networks, and clustering are introduced. The techniques are applied to predictive and smart systems by the example of model predictive control and intelligent control, classification and decision-making. The course is intended for engineering students with understanding in signals and systems and control.

Three lectures and one tutorial; one term

Prerequisite(s): MECHTRON 3DX4 or SFWRENG 3DX4 or IBEHS 4A03

Offered on an irregular basis.

MECHTRON 4TB6 A/B - MECHATRONICS CAPSTONE DESIGN PROJECT

Student teams prepare the requirements, design, documentation and implementation of a Mechatronics System taking economic, health, safety, cultural, legal and marketing factors into account. Students must demonstrate a working system and convincing test results.

Three hours (lectures, discussion, group project, seminar); two terms

Prerequisite(s): Registration in final level of a Mechatronics Engineering program or of Software Engineering (Embedded Systems)

MEDICAL PHYSICS

Courses in Medical Physics are administered by the Department of Physics and Astronomy.

A.N. Bourns Building, Room 241, ext. 24559

<http://www.physics.mcmaster.ca/>

Courses

MEDPHYS 3C03 - OPERATIONAL HEALTH PHYSICS: LABORATORY & COMMUNICATION

Six practical Health Physics operational exercises are undertaken. These include survey instruments, surveys of radiation fields, contamination surveys, air sampling for radioactivity, radiation dosimetry and radiological incident response. Each topic is introduced, followed by laboratory work and then students report on their findings. Two lectures/seminars, one lab; one term

Prerequisite(s): Registration in Level III or above of an Honours Medical and Biological Physics or Honours Medical Physics program; or permission of the instructor
Antirequisite(s): MEDPHYS 3A03, 3AA1, 3AB2

MEDPHYS 4B03 - RADIOACTIVITY AND RADIATION INTERACTIONS

Radioactivity and radiation phenomenology: interaction of radiations with matter, dosimetry, radiation in medicine, biological effects, radiation levels and regulations, radiation protection.

Three lectures; one term

Prerequisite(s): One of BIOPHYS 1S03, LIFESCI 1E03, MEDPHYS 1E03, MEDRADSC 1C03, PHYSICS 1AA3 (or 1BA3 or 1BB3 or 1E03), 1CC3, ISCI 1A24 A/B, SCIENCE 1E03; or permission of the instructor

Prerequisite(s) (EFFECTIVE 2020-2021): One of BIOPHYS 1S03, LIFESCI 1D03, 1E03, MEDPHYS 1E03, MEDRADSC 1C03, PHYSICS 1AA3 (or 1BA3 or 1BB3 or 1E03), 1CC3, ISCI 1A24 A/B, SCIENCE 1E03; or permission of the instructor

MEDPHYS 4D03 - IMAGING IN MEDICINE AND BIOLOGY

A theoretical and practical treatment of the math and physics underlying imaging techniques in medicine and biology, such as clinical imaging with computed tomography (CT) and magnetic resonance imaging (MRI), and deconvolution microscopy. Topics include image formation, 2D and 3D reconstruction, noise, filtering, storage, manipulation, and analysis. The course includes a practical MATLAB programming component to introduce students to image processing.

Two lectures, one tutorial (two hours); one term

Prerequisite(s): MATH 2C03 or 2Z03

MEDPHYS 4F03 - FUNDAMENTALS OF HEALTH PHYSICS

Introduces students to the fundamentals of occupational and environmental health physics encountered in the nuclear power, medical and research fields. Concepts include principles and regulatory framework for radiation safety; key dosimetric quantities, units and models; doses from internal and external exposures to ionizing radiation; elements of a radiation safety program; and environmental exposure pathways.

Three lectures; one term

Prerequisite(s): Enrolment in Level IV or above of a program in the Faculty of Science, Faculty of Health Sciences, or Faculty of Engineering. MEDPHYS 4B03 or ENGPHYS 3D03 is recommended.

MEDPHYS 4I03 - INTRODUCTION TO BIOPHOTONICS

Basic principles of light interaction with biological systems and specific biomedical applications of photonics such as optical light microscopy, endoscopic imaging, spectroscopy in clinical diagnosis, flow cytometry, micro-optical sensors, etc.

Three lectures; one term

Prerequisite(s): One of ENGPHYS 2A04, MEDPHYS 2B03, PHYSICS 2B03 (or 2B06) and registration in Level III or above. Completion of one of ENGPHYS 3E03, 4G03 or PHYSICS 3N03 is recommended.

Cross-list(s): ENGPHYS 4I03

This course is administered by the Department of Engineering Physics.

MEDPHYS 4RA3 - RADIATION AND RADIOISOTOPE METHODOLOGY I

An introduction to radiation detection and radioisotope production with emphasis on principles of gasfilled

radiation detectors, scintillation detectors and gamma-ray spectrometry.

Two lectures every week, one lab (three hours) every other week

Prerequisite(s): ENGPHYS 3D03 or MEDPHYS 4B03

Antirequisite(s): MEDPHYS 4R06 A/B

MEDPHYS 4RB3 - RADIATION AND RADIOISOTOPE METHODOLOGY II

Radiation detector signal processing theory, semiconductor radiation detectors, neutron detection methods.

Two lectures every week, one lab (three hours) every other week

Prerequisite(s): ENGPHYS 3D03 or MEDPHYS 4B03

Antirequisite(s): MEDPHYS 4R06 A/B

MEDPHYS 4T03 - CLINICAL APPLICATIONS OF PHYSICS IN MEDICINE

Basic physical concepts underlying medical imaging, nuclear medicine, physiological measurement, radiation therapy and biomedical laser applications with an overview of their technical implementation.

Three lectures; one term

Prerequisite(s): One of MATH 2A03, 2Q04, 2X03 (or ISCI 2A18 A/B); and MATH 2C03 or 2P04; and one of ENGPHYS 3D03, or credit or registration in MEDPHYS 4B03

MEDPHYS 4U03 - RADIATION BIOLOGY

The effects of radiation on biological material at the molecular, cellular, tissue and whole organism level.

Three lectures, one tutorial (three hours); one term

Prerequisite(s): One of BIOLOGY 2B03, 2C03, ISCI 2A18 A/B; or registration in Honours Medical and Biological Physics

MEDPHYS 4Y06 A/B - SENIOR THESIS

An experimental or theoretical project carried out under the supervision of a faculty member in the field of Medical Physics. A thesis report will be required. One occasional tutorial (two hours); two terms

Prerequisite(s): Registration in Level IV of an Honours Medical Physics program or Honours Medical and Biological Physics program; and a GPA of at least 9.0; and permission of the Chair of the Department

Antirequisite(s): BIOPHYS 4P06 A/B, PHYSICS 4P06 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

MEDICAL RADIATION SCIENCES

Courses in Medical Radiation Sciences are administered by the School of Interdisciplinary Science.

General Sciences Building, Room 105, ext. 21181

<https://www.science.mcmaster.ca/sis/undergraduate/medical-radiation-sciences.html>

Department Notes

1. Courses for Levels I, II, III and IV Medical Radiation Sciences, Radiography, Ultrasonography or Radiation Therapy specialization are available only to students registered in the Medical Radiation Sciences program unless otherwise stated.
2. Lab courses may be held at learning settings external to the University.

- Students are responsible for arranging their own travel to and from or accommodation in learning settings external to the University and for covering any costs incurred. All students enrolled in the Medical Radiation Sciences program are expected to be able to travel to any learning setting in Ontario. The final assignment of learning settings for any clinical practicum course is constrained by the availability of the requested setting and resources. Students may, therefore, be required to complete a clinical practicum course in a learning setting that is not of their choosing.
- For all clinical practicum courses, the prerequisite skills and patient care courses must have been completed within the previous twelve months; otherwise the student must complete a skills reassessment course during that twelve-month period.

MEDRADSC 1B03 - INTRODUCTION TO PATHOLOGY

Processes of disease and trauma, from damage and repair processes at the cellular level to tissues and systems. Disease development and recovery, immunity and heredity are examined.

Lectures (three hours); one term

Prerequisite(s): Credit or registration in KINESIOL 1Y03 and registration in Medical Radiation Sciences (Level I)

MEDRADSC 1E03 - INQUIRY IN MEDICAL RADIATION SCIENCES

An introduction to the process of Inquiry. Library and research tools are used to identify literature and evaluate evidence related to a variety of topics.

Lectures or seminars (three hours); one term

Prerequisite(s): Registration in Medical Radiation Sciences (Level I)

MEDRADSC 1F03 - PROFESSIONS IN MEDICAL RADIATION SCIENCES

The professions and subspecialties within medical radiation sciences are introduced, including legislative and regulatory frameworks, the Canadian health care system, professionalism and reflective practice.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): Registration in Medical Radiation Sciences I

Antirequisite(s): MEDRADSC 1A03, 1D03

MEDRADSC 2A03 - PATIENT CARE

Theoretical foundation and skills development to enable the student to meet the physical and emotional needs of patients in the clinical setting while utilizing self-care concepts and safe practices. Communication (verbal and non-verbal) skills are emphasized.

Lecture (two hours), lab (two hours); one term

Prerequisite(s): MEDRADSC 1F03; and one of MEDRADSC 2G03, 2N03; and registration in Level II of a Medical Radiation Sciences specialization

MEDRADSC 2BB3 - DIGITAL IMAGING INFORMATICS

Using concepts of digital databases in healthcare, picture archiving and communication systems are examined, with attention to DICOM conformance standards and interconnectivity of medical imaging devices.

Lectures and web-modules (three hours), lab or tutorial (one hour); one term

Prerequisite(s): Registration in Level II of the Radiography or the Ultrasound Specialization

MEDRADSC 2D03 - RELATIONAL ANATOMY I

This course examines spatial relationships of anatomical structures (appendicular and axial skeleton, excepting skull, plus structures of the pelvic and thoracic cavities) using projection, sectional and volume-rendered images.

Lecture (two hours), lab (one hour); one term

Prerequisite(s): Registration in Level II of the Radiography Specialization

MEDRADSC 2G03 - RADIOGRAPHIC SKILLS I

Emphasis is on professional behaviours and fundamental radiographic techniques and basic radiography of the appendicular skeleton through image production using anatomical phantoms and performance of simulated examinations on peers. Communication (verbal and non-verbal) skills are emphasized.

This course is evaluated on a Pass/Fail basis.

Lecture (two hours), lab (four hours); one term

Prerequisite(s): MEDRADSC 1F03; and credit or registration in MEDRADSC 2D03, 2Y03; and registration in Level II of the Radiography Specialization

MEDRADSC 2H03 - RADIOGRAPHIC SKILLS II

Emphasis is on professional behaviours and fundamental radiographic techniques and basic radiography of the axial skeleton, chest and abdomen through image production using anatomical phantoms and performance of simulated examinations on peers. Communication (verbal and non-verbal) skills are emphasized.

This course is evaluated on a Pass/Fail basis.

Lecture (two hours), lab (four hours); one term

Prerequisite(s): MEDRADSC 2D03, 2G03 and registration in Level II of the Radiography Specialization

MEDRADSC 2I03 - PATHOLOGY AND PROCEDURES I

Radiological procedures and associated pathologies of the skeletal, digestive, respiratory and urinary systems. Physiological properties of contrast media and their use in radiological procedures are studied.

Lectures (four hours); one term

Prerequisite(s): Registration in Level II of the Radiography Specialization

MEDRADSC 2J15 - RADIOGRAPHY CLINICAL PRACTICUM I

Four month placement in a Diagnostic Imaging department. Students develop clinical and professional skills by participating in radiological procedures under direct supervision of a qualified professional. (See *Department Note 4* above.)

This course is evaluated on a Pass/Fail basis.

One term (Offered in Spring/Summer Term only)

Prerequisite(s): MEDRADSC 2A03, 2G03, 2H03, 2I03, 2RA3, 2X03, 2Y03, and registration in Level II of the Radiography Specialization

MEDRADSC 2K03 - APPLIED SONOGRAPHIC PHYSICS AND INSTRUMENTATION I

A comprehensive applied examination of sound wave principles, sound and tissue interaction, pulsed wave ultrasound, transducers, instrumentation, Doppler ultrasound, and diagnostic imaging ultrasound artifacts.

Lectures (three hours), lab (one hour); one term

Prerequisite(s): Registration in Level II of the Ultrasonography Specialization

MEDRADSC 2L03 - ABDOMINAL ULTRASONOGRAPHY I

A comprehensive study of the relational anatomy, sonographic technique/appearances of normal major abdominal organs and vasculature; pathology, sonographic correlation, clinical presentation and diagnostic tests of the vascular and reticulo-endothelial systems.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): Registration in Level II of the Ultrasonography Specialization

MEDRADSC 2M03 - OBSTETRICAL AND GYNECOLOGIC ULTRASONOGRAPHY I

A comprehensive study of the anatomy, physiology of the normal female pelvis including pregnancy. Sonographic technique, normal appearances, patient care and ethical issues will be examined.

Lectures (three hours); one term

Prerequisite(s): Registration in Level II of the Ultrasonography Specialization

MEDRADSC 2N03 - SONOGRAPHIC SKILLS I

Emphasis is on professional behaviours, patient care, communication skills (verbal and non-verbal), ergonomics, image recognition, image critique and performance of sonography of the abdominal vasculature, liver and biliary systems on peers, including routine and alternative techniques.

This course is evaluated on a Pass/Fail basis.

Lectures (one hour), lab (four hours); one term

Prerequisite(s): Credit or registration in MEDRADSC 2K03, 2L03 and registration in Level II of the Ultrasonography Specialization

MEDRADSC 2O03 - ABDOMINAL ULTRASONOGRAPHY II

A comprehensive study of pathology and sonographic correlation, clinical presentation and diagnostic tests of hepatic, biliary, pancreatic, urinary tract; relational anatomy, sonographic technique/appearances of normal thyroid.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): MEDRADSC 2K03, 2L03, 2N03 and registration in Level II of the Ultrasonography Specialization

MEDRADSC 2P03 - OBSTETRICAL AND GYNECOLOGICAL ULTRASONOGRAPHY II

A comprehensive study of gynecological pathologies and abnormal sonographic appearances of the female pelvis. Pathologies of the obstetrical patient will be examined.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): MEDRADSC 2M03 and registration in Level II of the Ultrasonography Specialization

Antirequisite(s): MEDRADSC 3PA3

MEDRADSC 2Q03 - SONOGRAPHIC SKILLS II

Emphasis is on professional behaviours, patient care, communication skills (verbal and non-verbal), ergonomics, image recognition, image critique and performance of sonography of the pancreas, urinary system, complete abdomen and female pelvis on peers, including routine and alternative techniques.

This course is evaluated on a Pass/Fail basis.

Lectures (two hours), lab (four hours); one term

Prerequisite(s): MEDRADSC 2K03, MEDRADSC 2L03, 2M03, 2N03; and registration in Level II of the Ultrasonography Specialization

MEDRADSC 2R15 - ULTRASONOGRAPHY CLINICAL PRACTICUM I

Four month placement in a Diagnostic Imaging department. Students develop clinical and professional skills by participating in sonographic procedures under direct supervision of a qualified professional. Communication skills (verbal and non-verbal) are emphasized. (See *Department Note 4* above.)

This course is evaluated on a Pass/Fail basis.

One term (Offered in Spring/Summer Term only)

Prerequisite(s): MEDRADSC 2A03, 2K03, 2N03, 2O03, 2P03, 2Q03 and registration in Level II of the Ultrasonography Specialization

MEDRADSC 2RA3 - RELATIONAL ANATOMY II

This course examines the spatial relationships of anatomical structures (contents of cranium, neck and abdominal cavity) using projection, sectional and volume-rendered images.

Lectures (three hours), lab (one hour); one term

Prerequisite(s): MEDRADSC 2D03 and registration in Level II of the Radiography or the Radiation Therapy Specialization

Antirequisite(s): MEDRADSC 3I03

MEDRADSC 2S03 - CLINICAL ONCOLOGY I

This course introduces the oncologic concepts that characterize all malignancies. Topics include epidemiology, etiology, signs and symptoms, routes of spread,

staging and management. An in-depth study of some of the more common disease sites is also undertaken.

Three hours (lectures); one term

Prerequisite(s): Registration in Level II of the Radiation Therapy Specialization
Not offered in 2019-2020.

MEDRADSC 2T03 - CLINICAL ONCOLOGY II

This course builds on MEDRADSC 2S03 (Clinical Oncology I) through continued in-depth study of prevalent malignancies.

Three hours (lectures); one term

Prerequisite(s): MEDRADSC 2S03 and registration in Level II of the Radiation Therapy Specialization
Not offered in 2019-2020.

MEDRADSC 2U03 - RADIATION THERAPY SKILLS I

Emphasis is on professional behaviours, patient care, communication skills (verbal and non-verbal), and basic radiation therapy treatment techniques are taught and evaluated through simulated labs.

This course is evaluated on a Pass/Fail basis.

Lectures (two hours), lab (four hours); one term

Prerequisite(s): Registration in Level II of the Radiation Therapy Specialization
Not offered in 2019-2020.

MEDRADSC 2V15 - RADIATION THERAPY CLINICAL PRACTICUM I

Four month placement in a Radiation Therapy department. Students develop clinical skills by participating in various areas of a Radiation Therapy Department under the direct supervision of a qualified professional. Communication skills (verbal and non-verbal) are emphasized. (See *Department Note 4* above.)

This course is evaluated on a Pass/Fail basis.

One term (Offered in Spring/Summer Term only)

Prerequisite(s): MEDRADSC 2A03, 2D03, 2T03, 2U03, 2W03, 2X03, 2Z03 and registration in Level II of the Radiation Therapy Specialization
Not offered in 2019-2020.

MEDRADSC 2W03 - PHYSICS AND INSTRUMENTATION FOR RADIATION THERAPY

Photon production, interaction processes, measurement of exposure and absorption characteristics are presented, followed by the calculation of doses and treatment times prescribed in radiation therapy.

Lectures (two hours), lab/tutorial (two hours); one term

Prerequisite(s): Registration in Level II of the Radiation Therapy Specialization
Not offered in 2019-2020.

MEDRADSC 2X03 - RADIOBIOLOGY AND PROTECTION

Radiation effects on cells, tissues and organs and bodies are covered with emphasis on clinical radiation hazards. Dose minimization and protective practices guidelines and regulations are examined.

Lectures (three hours); one term

Prerequisite(s): MEDRADSC 2U03 or 2Y03; and registration in Level II of the Radiography or the Radiation Therapy Specialization

MEDRADSC 2Y03 - RADIOGRAPHIC IMAGING AND INSTRUMENTATION I

Production of x-rays, interactions with matter, image production, display and quality; control of beam quality /quantity related to image quality and dose optimization are covered.

Lectures (two hours), lab (one hour), tutorial (one hour); one term

Prerequisite(s): Registration in Level II of the Radiography Specialization

Antirequisite(s): MEDRADSC 2E03, 2F03

MEDRADSC 2Z03 - IMAGING PROCEDURES IN RADIATION THERAPY

An examination of the various imaging modalities and procedures involved in the cancer patient's diagnostic work-up and treatment.

Lectures (three hours); one term

Prerequisite(s): Registration in Level II of the Radiation Therapy Specialization

Not offered in 2019-2020.

MEDRADSC 2ZZ0 - PRE-CLINICAL PROFESSIONAL SKILLS REASSESSMENT I

Practice and reassessment of skills performance prior to Clinical Practicum 1. Specific skills and performance criteria will be detailed in a learning contract.

This course is evaluated on a Pass/Fail basis.

Prerequisite(s): One of MEDRADSC 2H03, 2Q03, 2U03; and permission of the Department

MEDRADSC 3AA3 - INTERDISCIPLINARY ROUNDS IN MEDICAL RADIATION SCIENCES

An integration of patient signs and symptoms, clinical data, pathophysiology, medical imaging and relevant interventional procedures including treatments/therapies among numerous body systems mostly presented in a case study based format.

Lectures (three hours); offered in Spring/Summer term only

Prerequisite(s): One of MEDRADSCI 2J15, 2R15 or 2V15 and registration in Level III of a Medical Radiation Sciences specialization

Not open to students with credit or registration in MEDRADSC 3C03.

MEDRADSC 3B03 - QUALITY MANAGEMENT IN MEDICAL RADIATION SCIENCES

Examination of various quality management methodologies in health care facilities, external accreditation processes and legislation associated with quality in Medical Radiation Sciences.

Lectures (two hours), tutorial (two hours); one term (offered in Spring/Summer Term only)

Prerequisite(s): One of MEDRADSC 2J15, 2R15 or 2V15; and registration in Level III of a Medical Radiation Sciences specialization

MEDRADSC 3C03 - MULTIDISCIPLINARY INTERVENTIONAL PROCEDURES

A survey of changing approaches to treating pathologies of various organ systems through intervention using image guidance.

Lectures (three hours); one term (offered in Spring/Summer term only)

Prerequisite(s): One of MEDRADSC 2J15, 2R15, 2V15; and registration in Level III of a Medical Radiation Sciences specialization

Not offered in 2019-2020.

MEDRADSC 3DA3 - SUBSPECIALTIES IN MEDICAL RADIATION SCIENCES - ADVANCED STUDIES IN COMPUTED TOMOGRAPHY

A study of clinical use of CT in diagnosis, including clinical indications, pathophysiology, imaging appearances, imaging protocols and post-processing tools.

Lectures (three hours), lab (one hour); one term

Prerequisite(s): MEDRADSC 3K03 and registration in Level III of the Radiography Specialization

MEDRADSC 3DD3 - SUBSPECIALTIES IN MEDICAL RADIATION SCIENCES: MAMMOGRAPHY

A comprehensive overview of breast tissue patterns, pathologies and their appearances (includes correlation to other imaging modalities), treatment interventions and surgical options.

Lectures (three hours); one term

Prerequisite(s): Registration in Level III of the Radiography Specialization

MEDRADSC 3DE3 - SUBSPECIALTIES IN MEDICAL RADIATION SCIENCES: INTRODUCTION TO MAGNETIC RESONANCE IMAGING

Of magnetic resonance imaging, including instrumentation, image production, selection and control of magnetic fields, pulse sequences, safety and clinical application.

Lectures (two hours), web modules (one hour); offered in Spring/Summer term only

Prerequisite(s): Registration in Level III of a Medical Radiation Sciences specialization

MEDRADSC 3DH3 - CARING FOR THE PALLIATIVE PATIENT

The learner will gain an appreciation of the unique needs of the palliative care patient through examination of the many issues faced throughout the death and dying process.

Lecture and web modules (three hours); offered in Spring/Summer term only

Prerequisite(s): Registration in Level III of a Medical Radiation Sciences specialization

MEDRADSC 3DI3 - SUBSPECIALTIES IN MEDICAL RADIATION SCIENCES: IMAGE GUIDANCE IN RADIATION THERAPY

An in-depth study of image guidance principles used in modern day radiation therapy practice. Practical implications and future directions are examined in detail.

Lectures (three hours); offered in Spring/Summer term only

Prerequisite(s): Registration in Level III of the Radiation Therapy Specialization

Not offered in 2019-2020.

MEDRADSC 3DJ3 - SUBSPECIALTIES IN MEDICAL RADIATION SCIENCES: PEDIATRIC SONOGRAPHY

This course offers a comprehensive overview of pediatric normal and abnormal anatomy including the vascular system, spinal and intracranial structures along with scanning protocols.

Lectures (three hours); offered in Spring/Summer Term only

Prerequisite(s): Registration in Level III of the Ultrasonography Specialization

MEDRADSC 3G03 - RADIOGRAPHIC IMAGING AND INSTRUMENTATION II

The main operations of radiographic and fluorographic equipment, from underlying physical principles to clinical application.

Lectures (three hours), lab or tutorial (one hour); one term

Prerequisite(s): MEDRADSC 2J15, MEDRADSC 2Y03 and registration in Level III of the Radiography Specialization

MEDRADSC 3H03 - QUALITY CONTROL IN RADIOGRAPHY

Students perform quality control testing procedures on both analogue and digital radiographic equipment, comparing equipment performance to legislated standards and best practices concepts.

Lecture (one hour), lab (two hours), tutorial (one hour); one term

Prerequisite(s): MEDRADSC 2J15, 3G03 and registration in Level III of the Radiography Specialization

MEDRADSC 3J03 - PATHOLOGY AND PROCEDURES II

Radiological procedures and image appearances of associated pathologies of the cardiovascular, endocrine, nervous and reproductive systems.

Lectures (three hours); one term

Prerequisite(s): MEDRADSC 2I03, 2RA3 and 2J15; and registration in Level III of the Radiography Specialization

MEDRADSC 3K03 - COMPUTED TOMOGRAPHY

Processes of data acquisition, image reconstruction and post-processing are discussed. Scan protocol optimization in terms of image quality, demonstrated structures and patient dose are examined. Labs include scanning of anatomical phantoms.

Lectures (three hours), lab (one hour); one term

Prerequisite(s): MEDRADSC 2RA3 and registration in Level III of the Radiation Therapy or the Radiography Specialization

MEDRADSC 3L03 - RADIOGRAPHIC SKILLS III

Emphasis is on professional behaviours and radiography of cranio-facial structures and development of case management and adaptation skills in modifying standard radiographic procedures to the special needs patient. Communication skills (verbal and non-verbal) are emphasized.

This course is evaluated on a Pass/Fail basis.

Lecture (one hour), lab (four hours); one term (offered in Spring/Summer Term only)

Prerequisite(s): MEDRADSC 2H03, 2J15 and registration in Level III of the Radiography Specialization

MEDRADSC 3M03 - ABDOMINAL ULTRASONOGRAPHY III

A comprehensive overview with sonographic correlation of the relational anatomy, normal, anomalous and pathologic conditions of the adrenal glands, abdominopelvic and thoracic cavities, GI tract and specific superficial structures.

Lectures (three hours), tutorial (one hour); one term (offered in Spring/Summer Term only)

Prerequisite(s): MEDRADSC 2003, 2R15 and registration in Level III of the Ultrasonography Specialization

MEDRADSC 3N03 - VASCULAR ULTRASONOGRAPHY

A comprehensive study of vascular anatomy, physiology, hemodynamics, sonographic interpretation of normal and pathologic conditions in the assessment of the vasculature of the head, neck, abdomen and extremities.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): MEDRADSC 2K03, 2R15 and registration in Level III of the Ultrasonography Specialization

MEDRADSC 3O03 - SONOGRAPHIC SKILLS III

Emphasis is on professional behaviours, patient care, communication skills (verbal and non-verbal), ergonomics, image recognition, image critique and performance of the extracranial arteries, abdominal and peripheral vasculature on peers, including routine and alternative techniques.

This course is evaluated on a Pass/Fail basis.

Lecture (one hour), lab (four hours); one term

Prerequisite(s): MEDRADSC 2R15, 3N03 and registration in Level III of the Ultrasonography Specialization

MEDRADSC 3P03 - OBSTETRICAL AND GYNECOLOGIC ULTRASONOGRAPHY III

A comprehensive study of obstetric anomalies and abnormal sonographic appearances of amniotic fluid, fetal growth, fetal syndromes, Doppler studies of the gravid patient and fetal anomalies of each system.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): MEDRADSC 2P03 and registration in Level III of the Ultrasonography Specialization

MEDRADSC 3Q03 - APPLIED SONOGRAPHIC PHYSICS AND INSTRUMENTATION II

Recent and emerging technological advances in ultrasound instrumentation/imaging such as advanced signal processing, elastography, contrast ultrasound imaging and 3D/4D imaging. Bioeffects and quality assurance associated with diagnostic ultrasound will also be covered.

Lectures (three hours), tutorial (one hour); one term

Prerequisite(s): MEDRADSC 2K03, 2R15 and registration in Level III of the Ultrasonography Specialization

MEDRADSC 3R03 - MUSCULOSKELETAL ULTRASONOGRAPHY

Sonographic correlation of upper/lower extremity joint anatomy; normal and pathologic musculoskeletal structures using standard scanning techniques and protocols.

Lectures (three hours), lab (one hour); one term

Prerequisite(s): MEDRADSC 2R15 and registration in Level III of the Ultrasonography Specialization

MEDRADSC 3S03 - TREATMENT PLANNING I

Students gain the knowledge and skills required to independently plan and calculate radiation therapy treatments for a variety of sites under variable conditions.

Lectures (two hours), lab (two hours); one term

Prerequisite(s): MEDRADSC 2V15, 2W03 and registration in Level III of the Radiation Therapy Specialization

Not offered in 2019-2020.

MEDRADSC 3T03 - APPLIED PATIENT CARE IN RADIATION THERAPY

This course presents the theory and skills to provide the radiation therapy patient with appropriate patient care. Patient assessment, professionalism, communication (verbal and non-verbal), and management of radiation therapy toxicities are emphasized.

This course is evaluated on a Pass/Fail basis.

Lectures (two hours), tutorial (two hours); one term (offered in Spring/Summer term only)

Prerequisite(s): MEDRADSC 2A03, 2V15, 3W03 and registration in Level III of the Radiation Therapy Specialization

Not offered in 2019-2020.

MEDRADSC 3U03 - RADIATION PROTECTION AND RADIATION BIOLOGY IN RADIATION THERAPY

This course provides an in depth understanding of radiation protection and radiobiological principles related to high energy radiation used in Radiation Therapy.

Lectures (three hours); one term

Prerequisite(s): MEDRADSC 2X03 and registration in Level III of the Radiation Therapy Specialization

Not offered in 2019-2020.

MEDRADSC 3V03 - TREATMENT PLANNING II

This course further develops problem-solving skills related to dosimetry. Photon and electron beams, brachytherapy, conformal therapy and Intensity Modulated Radiation Therapy principles are emphasized.

Lectures (two hours), lab (two hours); one term

Prerequisite(s): MEDRADSC 3S03 and registration in Level III of the Radiation Therapy Specialization

Not offered in 2019-2020.

MEDRADSC 3W03 - RADIATION THERAPY SKILLS II

Students develop critical thinking, psychomotor and problem-solving skills that are required in the simulation and treatment of radiation therapy patients. Communication (verbal and non-verbal) are emphasized. The student will practice through simulated labs on radiation therapy units.

This course is evaluated on a Pass/Fail basis.

Lectures (two hours), lab (two hours), tutorial (two hours); one term

Prerequisite(s): MEDRADSC 2U03, 2V15 and registration in Level III of the Radiation Therapy Specialization

Not offered in 2019-2020.

MEDRADSC 3X03 - RESEARCH METHODS IN MEDICAL RADIATION SCIENCES

Prepares students for applied clinical research in Medical Radiation Sciences. Topics include systematic description of observations, testing hypotheses, distinctive of quantitative and qualitative research and critical review of published literature.

Lectures (three hours), tutorials (two hours); one term

Prerequisite(s): STATS 2B03; and registration in Level III of a Medical Radiation Sciences specialization or Level III or above a Life Sciences program

MEDRADSC 3Y03 - ETHICS FOR MEDICAL RADIATION SCIENCES

An overview of the major areas of clinical biomedical ethics. Extensive use of case discussion and analysis will help to develop the students' ethical problem-solving skills.

Lectures (three hours); one term

Prerequisite(s): Registration in Level III of a Medical Radiation Sciences specialization; or Level III or above of an Honours Medical Physics program

MEDRADSC 3Z06 - RESEARCH PROJECT

Students conduct an individual research project under the supervision of a faculty member. Students wishing to enroll in this course should contact the Department for further information. Students are expected to have a C.A. of at least 7.0.

Prerequisite(s): Permission of the Department

Not open to students with credit or registration in ISCI 4A12 A/B.

MEDRADSC 3Z00 - CLINICAL SKILL DEVELOPMENT FOR PROFESSIONALS

Practice and assessment of skill performance by professional medical radiation technologists. Specific skills and performance criteria will be detailed in a learning contract.

Prerequisite(s): Permission of the Director, School of Interdisciplinary Science (or delegate).

This course is evaluated on a Pass/Fail basis.

MEDRADSC 4A15 - RADIOGRAPHY CLINICAL PRACTICUM II

Four month placement in a Diagnostic Imaging department. Students further develop clinical and professional skills, integrating theory, developing independent decision-making capacity in the management of cases, working towards competence in general radiography, fluoroscopy and computed tomography. (See *Department Note 4* above.)

This course is evaluated on a Pass/Fail basis.

One term

Prerequisite(s): MEDRADSC 3G03, 3H03, 3J03, 3K03, 3L03 and registration in Level IV of the Radiography Specialization

MEDRADSC 4B15 - RADIOGRAPHY CLINICAL PRACTICUM III

Four month placement in a Diagnostic Imaging department. Students further develop clinical skill and professional skills, integrating theory, developing independent decision-making capacity in the management of cases, attaining competence in general radiography, fluoroscopy and computed tomography.

This course is evaluated on a Pass/Fail basis.

One term

Prerequisite(s): MEDRADSC 4A15 and registration in Level IV of the Radiography Specialization

MEDRADSC 4C15 - ULTRASONOGRAPHY CLINICAL PRACTICUM II

Four month placement in the Sonography department. Students further develop clinical and professional skills, integrating theory, developing independent decision-making capacity in the management of cases, working towards competence in the generalist sonographic specializations. (See *Department Note 4* above.)

This course is evaluated on a Pass/Fail basis.

One term

Prerequisite(s): MEDRADSC 2R15, 3M03, 3N03, 3O03, 3P03 and registration in Level IV of the Ultrasonography Specialization

MEDRADSC 4D15 - ULTRASONOGRAPHY CLINICAL PRACTICUM III

Four month placement in the Sonography department. Students further develop clinical and professional skills, integrating theory, developing independent

decision-making capacity in the management of cases, attaining competence in the generalist sonographic specializations. Communication skills (verbal and non-verbal) are emphasized.

This course is evaluated on a Pass/Fail basis.

One term

Prerequisite(s): MEDRADSC 4C15 and registration in Level IV of the Ultrasonography Specialization

MEDRADSC 4E15 - RADIATION THERAPY CLINICAL PRACTICUM II

Four month placement in a Radiation Therapy department. Students further develop clinical and professional skills, integrating theory, developing independent decision-making capacity in the management of cases, working towards competence in radiation therapy. Communication skills (verbal and non-verbal) are emphasized. (See *Department Note 4* above.)

This course is evaluated on a Pass/Fail basis.

One term

Prerequisite(s): MEDRADSC 3K03, 3T03, 3U03, 3V03, 3W03 and registration in Level IV of the Radiation Therapy Specialization

MEDRADSC 4F15 - RADIATION THERAPY CLINICAL PRACTICUM III

Four month placement in a Radiation Therapy department. Students further develop clinical and professional skills, integrating theory, developing independent decision-making capacity in the management of cases, attaining competence in radiation therapy.

This course is evaluated on a Pass/Fail basis.

One term

Prerequisite(s): MEDRADSC 4E15 and registration in Level IV of the Radiation Therapy Specialization

MEDRADSC 4Z00 - PRE-CLINICAL PROFESSIONAL SKILLS REASSESSMENT II

Practice and reassessment of skills performance prior to Clinical Practicum 2 or 3. Specific skills and performance criteria will be detailed in a learning contract.

This course is evaluated on a Pass/Fail basis.

Prerequisite(s): Permission of the Department

MIDWIFERY

Courses in Midwifery are administered by the B.H.Sc. Midwifery Education Program. Health Sciences Centre (HSC), Room 4H24, ext. 26654

<http://www.fhs.mcmaster.ca/midwifery>

midwifery@mcmaster.ca

MIDWIF 1D03 - MIDWIFERY THE PROFESSION I

Seminar presentations, discussion and arranged experiences to introduce students to the history, philosophy of care, and role of the midwife in Canada and elsewhere. Seminar (three hours); first term

Prerequisite(s): Registration in the Midwifery Education Program

Antirequisite(s): MIDWIF 1A06

MIDWIF 1F03 - INTRODUCTION TO RESEARCH METHODS AND CRITICAL APPRAISAL

Introduction to the principles of clinical research and statistical inference, with particular emphasis on critical assessment of research evidence (both qualitative and quantitative) as presented in the health sciences literature related to midwifery care.

Lectures/tutorials (three hours); second term

Prerequisite(s): Registration in the Midwifery Program (B.H.Sc.)

Antirequisite(s): HTHSCI 3C04

MIDWIF 1G03 - MIDWIFERY THE PROFESSION II

Seminar presentations, discussions, and laboratory practice to introduce students to communication theory and strategies, equity, diversity and inclusion in the provision of midwifery care.

Seminar (3 hours); second term

Prerequisite(s): Registration in the Midwifery Education Program

Antirequisite(s): MIDWIF 2G06

MIDWIF 2F03 - PHARMACOTHERAPY

This course is an overview of basic concepts in pharmacy, pharmacology and therapeutics relevant to the practice of midwifery in Ontario. Content areas include pharmacokinetics, toxicology, adverse drug reactions during pregnancy and lactation and pharmacology in the neonate.

One lecture (three hours); first term

Prerequisite(s): HTHSCI 1D06 A/B

MIDWIF 2G06 - CLINICAL SKILLS FOR MIDWIFERY PRACTICE

Lecture, demonstration and laboratory practice of fundamental skills for midwifery practice. This course combines theoretical aspects with clinical lab as well as including short placement components in which students attend births and midwifery clinics. One Lecture (three hours), Lab (three hours); first term

Prerequisite(s): MIDWIF1D03

Antirequisite(s): MIDWIF 2G03

May be taken concurrently with MIDWIF 1D03 with permission of the Program Director.

MIDWIF 2H15 - NORMAL CHILDBEARING

First clinical placement under the supervision of a registered midwife (18 weeks): students focus on beginning level skills for the care of women experiencing normal childbearing. Weekly problem-based tutorials include normal antepartum, intrapartum, postpartum and newborn care situations. Second term

Prerequisite(s): HTHSCI 2M03, MIDWIF 1D03, 2F03, 2G06 (or 1A06 or 2G03). A minimum GPA of 6.0 in first term is required.

Antirequisite(s): MIDWIF 2E12

MIDWIF 3A09 - INTERPROFESSIONAL PRACTICE I

Students will be placed in clinical settings and supervised by physicians, nurses, social workers and other health and social service providers. Some placements may be hospital or community-based while others involve a combination of clinic and hospital on call work. Through these varied experiences, students will gain insight into the roles of other health and social service professionals, develop communication skills and learn how to function in an interprofessional team. Students will be given an option to arrange one placement out of province or out of country pending approval.

Prerequisite(s): MIDWIF 2H15

Co-requisite(s): MIDWIF 3F03

MIDWIF 3F03 - MIDWIFERY ISSUES

This course addresses the theoretical basis for inter-professional collaboration and explores related professional issues such as global midwifery, ethics and risk management. The course includes critical analysis of issues in asynchronous online discussion and submission of a major paper.

Prerequisite(s): MIDWIF 2H15

Co-requisite(s): MIDWIF 3A09

MIDWIF 3H15 - COMPLICATIONS AND CONSULTATION

Second placement in a midwifery practice: students extend skills to more complex childbearing situations. Problem-based tutorials focus on expanding the knowledge base of maternal-newborn complications, for consultation and referral, and relationships with other health care providers.

Summer term

Prerequisite(s): MIDWIF 2H15, 3A09, 3F03, 3I03, 3J06, 3K06, 3L03

MIDWIF 3I03 - ADVANCED CLINICAL SKILLS I

A five day intensive course using workshop format to focus on emergency interventions, evidence based management of prenatal and intrapartum situations and communication. Students receive instruction from midwifery faculty and interdisciplinary experts in preparation for community placements and senior midwifery clinical placements.

First term

Prerequisite(s): MIDWIF 2H15

MIDWIF 3J06 - PREPARATION FOR PRIMARY MATERNITY CARE

Web-tutorial and lecture format are utilized to provide a greater theoretical understanding of progressively complex midwifery scenarios. The course will also focus on situations where midwives consult and or work collaboratively with other care providers in the provision of care.

Prerequisite(s): MIDWIF 2H15

Co-requisite(s): MIDWIF 3K06

MIDWIF 3K06 - INTERPROFESSIONAL PRACTICE II

Students will be placed in clinical settings and supervised by physicians, nurses, social workers and other health and social service providers. Some placements may be hospital or community-based while others involve a combination of clinic and hospital on call work. Through these varied experiences, students will gain insight into the roles of other health and social service professionals, develop communication skills and learn how to function in an interprofessional team. Students will be given an option to arrange one placement out of province or out of country pending approval.

Prerequisite(s): MIDWIF 2H15

Co-requisite(s): MIDWIF 3J06

MIDWIF 3L03 - ADVANCED CLINICAL SKILLS II

Short intensive course of five to six days. The course builds on the skills introduced in MIDWIF 3I03 and focuses on preparing the student for recognizing situations where consultation and transfer of care is required, as well as in being able to initiate and facilitate such consultation.

Second term

Prerequisite(s): MIDWIF 3I03

MIDWIF 4A15 - MATERNAL AND NEWBORN PATHOLOGY

Third placement in a midwifery practice. In defined situations, supervision is indirect. Students care for an assigned caseload, including situations with complications. Problem-based tutorials focus on midwifery roles and responsibilities in highly complex and urgent situations.

First term

Prerequisite(s): MIDWIF 3H15

MIDWIF 4B15 - MIDWIFERY CLERKSHIP

Final placement in a midwifery practice. Supervision is increasingly indirect. Students formulate and provide care to an entire caseload of women. Tutorials and workshops include case review, preparation for registration and establishing a practice in Ontario. Second term

Prerequisite(s): MIDWIF 4A15

MOLECULAR BIOLOGY

Courses in Molecular Biology are administered by the Department of Biology, Life Sciences Building, Room 215, ext. 23049

<http://www.biology.mcmaster.ca>

Courses

If no prerequisite is listed, the course is open.

MOLBIOL 2C03 - GENETICS

Structure, function and transmission of genes; chromosomal basis of inheritance; mono- and dihybrid crosses; sequential steps in gene function; linkage maps; sex chromosome inheritance.

Lectures, web modules (three hours), one lab or tutorial (two hours); one term

Prerequisite(s): BIOLOGY 1A03, 1M03 (or ISCI 1A24 A/B) and registration in Honours Molecular Biology and Genetics (B.Sc.) or Honours Arts & Science (B.Arts Sc.) and Molecular Biology and Genetics

Antirequisite(s): BIOLOGY 2C03

Students not registered in an Honours Molecular Biology and Genetics program should register in BIOLOGY 2C03.

MOLBIOL 3A03 - CURRENT TOPICS IN MOLECULAR BIOLOGY AND GENETICS

A review of current literature in molecular biology and genetics. A combination of lectures and student presentations on selected topics.

One lecture (three hours); one term

Prerequisite(s): Registration in Honours Biology (B.Sc.), Honours Molecular Biology and Genetics (B.Sc.) or Honours Molecular Biology and Genetics Co-op (B.Sc.)

MOLBIOL 3B03 - ADVANCED CELL BIOLOGY

The molecular organisation and function of eukaryotic cells are examined, with a focus on information transfer from the cell surface and from the nucleus. Emphasis is placed upon interpretation of the research literature.

Three lectures, one tutorial; one term

Prerequisite(s): BIOLOGY 2B03 (or ISCI 2A18 A/B); and one of BIOLOGY 2C03 or MOLBIOL 2C03

Antirequisite(s): LIFESCI 3M03

MOLBIOL 3CC3 - GENOMICS AND SYSTEMS BIOLOGY

Formerly MOLBIOL 4CC3

Exploration of genomic, proteomic, metabolomic approaches to study biological systems on small and large scale. Integration of knowledge to understand cell dynamics and regulatory networks.

Three lectures; one term

Prerequisite(s): MOLBIOL 3003

Antirequisite(s): MOLBIOL 4CC3

MOLBIOL 3D03 - EXPERIMENTAL APPROACHES IN CELL BIOLOGY

Intensive laboratory based inquiry course focused on cell biological research. Cell biology techniques from various disciplines will be used to investigate the structure and function of organisms at the cellular and molecular level. Techniques employed may include light and immune fluorescent microscopy, time lapse, tissue culture, biochemistry, genetics and molecular biology. This course will also provide opportunity to develop scientific literacy skills.

NOTE: Course will consist of two weeks of laboratory instruction, seminars and workshops, with an evaluation component at the end of the third week. To be held during the first three weeks of May.

Prerequisite(s): BIOLOGY 2B03; and BIOLOGY 2C03 or MOLBIOL 2C03 or LIFESCI 2G03. If not already completed, BIOSAFE 1BS0 (or HTHSCI 1BS0) must be done prior to the first lab

Antirequisite(s): LIFESCI 3DD3

MOLBIOL 3I03 A/B S - INDEPENDENT RESEARCH PROJECT

Students will conduct an independent research study in a faculty member's laboratory.

For further information, please refer to <http://www.biology.mcmaster.ca/undergraduate-programs/courses.html> and click on MOLBIOL 3I03.

8-10 hours per week (scheduling to be arranged by supervisor); one or two term(s)

Prerequisite(s): Registration in Honours Molecular Biology and Genetics or Honours Molecular Biology and Genetics Co-op. BIOLOGY 2L06 A/B (or 2L03) is recommended preparation. Permission of the department is required. Students are expected to have a GPA of at least 9.0.

Antirequisite(s): BIOLOGY 3IR3 A/B S

MOLBIOL 3II3 - MOLECULAR GENETICS OF EUKARYOTES

Study of the eukaryotic genome and control mechanisms of gene expression; the emphasis will be on transcriptional control, RNA surveillance and the study of epigenetic mechanisms in several model systems (yeast, nematodes, insects, plants and vertebrates). The histone code and several mechanisms of epigenetic trans-generational inheritance will be discussed.

Three lectures, one tutorial; one term

Prerequisite(s): MOLBIOL 3B03 or 3003

MOLBIOL 3M03 - FUNDAMENTAL CONCEPTS OF DEVELOPMENT

Recent advances using genetic and molecular approaches will be discussed in the context of classical experiments. Various model systems (mice, fruitflies, worms) will be examined.

Two lectures, one tutorial or lab (three hours); one term

Prerequisite(s): BIOLOGY 2B03 (or ISCI 2A18 A/B), BIOLOGY 2C03 or MOLBIOL 2C03

MOLBIOL 3003 - MICROBIAL GENETICS

Molecular genetics of bacteria and bacteriophage. Special emphasis will be placed on relationships between microbial genetics and general problems in genetics and gene regulation.

Three lectures, one tutorial; one term

Prerequisite(s): BIOLOGY 2C03 or MOLBIOL 2C03; and credit or registration in BIOLOGY 2EE3

MOLBIOL 3V03 - TECHNIQUES IN MOLECULAR GENETICS

A laboratory course providing hands-on experience in experimental design and molecular biology and molecular genetic techniques.

One lecture, two labs (three hours each); one term

Prerequisite(s): BIOLOGY 2EE3; and credit or registration in MOLBIOL 3003; and registration in Level III or above of an Honours program in Biology or Molecular Biology and Genetics. If not already completed, BIOSAFE 1BS0 (or HTHSCI 1BS0) and WHMIS 1A00 must be done prior to the first lab.

Antirequisite(s): BIOLOGY 3VV3

MOLBIOL 3Y03 - PLANT RESPONSES TO THE ENVIRONMENT

How plants respond at the genetic, molecular, biochemical and phenotypic levels to environmental stress. Manipulation of these responses to improve crops will be explored.

Three lectures; one term

Prerequisite(s): BIOLOGY 2B03 (or ISCI 2A18 A/B); and BIOLOGY 2C03 (or MOLBIOL 2C03); and BIOLOGY 2D03

MOLBIOL 4BB3 - PLANT METABOLISM AND MOLECULAR BIOLOGY

Formerly BIOLOGY 4B03

Analysis of plant cell metabolism and the regulation of metabolism at the biochemical and molecular genetic level.

Three lectures; one term

Prerequisite(s): BIOLOGY 2B03 (or ISCI 2A18 A/B) and BIOLOGY 2C03 (or MOLBIOL 2C03); or one of BIOLOGY 3B03, MOLBIOL 3Y03; or ISCI 2A18 A/B; and registration in Level III or above of any Honours program. MOLBIOL 3B03 is recommended.

MOLBIOL 4DD3 - MOLECULAR EVOLUTION

The study of how molecules change over time within and between species. The experimental data, techniques and theories will be examined.

Two lectures, one tutorial; one term

Prerequisite(s): ANTHROP 2D03 or BIOLOGY 3FF3 or BIOLOGY 3S03; and registration in Level III or above of any Honours program

Antirequisite(s): BIOCHEM 4Y03

MOLBIOL 4G12 A/B S - SENIOR CO-OP THESIS

A thesis based upon a research project in an area of molecular biology and genetics. Arrangements to take MOLBIOL 4G12, including the agreement of the supervisory committee, should be made according to Departmental Guidelines before the end of March in Level III. For information on Departmental Guidelines, please refer to the Biology web site at <http://www.biology.mcmaster.ca/undergraduate-programs/courses.html>.

Prerequisite(s): Registration in Level IV of Honours Molecular Biology and Genetics Co-op; and permission of the Course Administrator, Life Sciences Building, Room 215
Not open to students with credit or registration in any Level IV department- or program-based thesis or independent study/project course.

MOLBIOL 4H03 - MOLECULAR BIOLOGY OF CANCER

Cancer at the cellular and molecular level. Topics include: properties of cancer cells, activation of proto-oncogenes, function of oncoproteins, transgenic mouse models, and tumour viruses, tumour suppressor genes.

Three lectures, one tutorial; one term

Prerequisite(s): BIOLOGY 2C03 (or MOLBIOL 2C03); and MOLBIOL 3B03; and registration in Level III or above of any Honours program

MOLBIOL 4K03 - RESEARCH ADVANCES IN BIOLOGY OF AGING

A critical analysis of the biology of aging in model organisms and age-related human disorders. Emphasis is on the molecular pathways that regulate the process of aging at the cellular and organismal levels.

One lecture (two hours), one lecture (one hour); one term

Prerequisite(s): BIOLOGY 2B03 and BIOLOGY 2C03 (or MOLBIOL 2C03) and registration in Level IV or above of any Honours program

MOLBIOL 4P03 - MEDICAL MICROBIOLOGY

Infectious diseases: identification, epidemiology and treatment.

One lecture (two hours), one tutorial (three hours); one term

Prerequisite(s): BIOLOGY 2EE3 and registration in Level III or above of any Honours program. Credit or registration in MOLBIOL 3O03 is strongly recommended.

MOLBIOL 4RR3 - HUMAN GENETICS

The human genome and genetic medicine. Topics include normal and pathological cytology; the human genome project; gene mapping, linkage and therapy.

Two lectures, one tutorial (one hour); one term

Prerequisite(s): MOLBIOL 3I13 and registration in Level III or above of any Honours program

MOHAWK

Courses in Mohawk are administered by the Indigenous Studies Program.

Hamilton Hall, Room 103, ext. 27426

<http://www.mcmaster.ca/indigenous>

Courses

If no prerequisite is listed, the course is open.

MOHAWK 1Z03 - INTRODUCTION TO MOHAWK LANGUAGE AND CULTURE

This course will study the Mohawk language, in its spoken and written forms, in the context of Iroquoian cultural traditions, values, beliefs and customs.

Lecture and seminars (three hours); one term

MOHAWK 2Z03 - INTERMEDIATE MOHAWK

This course expands on the vocabulary and the oral skills for the Mohawk language. In addition, the course reviews the written component of the language.

Lecture and seminars (three hours); one term

Prerequisite(s): MOHAWK 1Z03

MULTIMEDIA

Courses in Multimedia are administered by the Department of Communication Studies and Multimedia.

Togo Salmon Hall, Room 331, ext. 23488

<http://csmm.humanities.mcmaster.ca/>

Courses

If no prerequisite is listed, the course is open. See also courses in Communication Studies.

MMEDIA 1A03 - MULTIMEDIA AND DIGITAL SOCIETY

This course examines the impact of digital technologies on contemporary life. Lectures, readings, discussions, and multimedia projects will enable students to both reflect upon and participate in today's digital society.

One lecture (two hours), one tutorial; one term

MMEDIA 2A06 - DESIGN & CODE

This course explores both design and code strategies for multimedia projects, including web applications. Students will create original works using design principles and programming languages, and participate in group projects.

Lecture and lab (six hours); one term

Prerequisite(s): Registration in Level II of a Multimedia program

Antirequisite(s): MMEDIA 2A03, 2M03

MMEDIA 2B06 - TIME-BASED MEDIA I

An exploration of time-based media through video and animation. Students will complete projects to develop conceptual, production, and post-production skills while readings and discussions address contemporary time-based media practices.

Lecture and lab (six hours); one term

Prerequisite(s): Registration in Level II of a Multimedia program

Antirequisite(s): MMEDIA 2B03, 2H03

MMEDIA 2G03 - INTRODUCTION TO DIGITAL AUDIO

Introduction to audio capture, synthesis, transformation and delivery across diverse contexts, including field recording, studio and performance settings. Discussions, demonstrations and assignments support the growth of aural awareness, skills and vocabulary.

Lecture, web module, tutorial (three hours); one term

Prerequisite(s): Registration in Level II of a Multimedia program or registration in Level II or above of a Music, Theatre & Film, Art History or Studio Art program
Antirequisite(s): ART 2Z03, MUSIC 2Z03, THTRFLM 2Z03

MMEDIA 3B03 - DIGITAL CULTURES

This course explores current contests over access to the production, distribution, and consumption of digital culture across a range of technologies and practices. Assignments will include digital production.

Three hours, one term

Prerequisite(s): Registration in Level III or IV of a Multimedia or Communication Studies program

MMEDIA 3BB3 - NEW MEDIA ART PRACTICES

This course offers a critical perspective on theories and practices of contemporary media art through screenings, production-based projects and field trip engagement with new media work.

Three hours, one term

Prerequisite(s): Registration in Level III or IV of a Multimedia or Communication Studies program

Antirequisite(s): CMST 3BA3, MMEDIA 2PA3

MMEDIA 3C03 - INTERACTIVE AND SPATIAL AUDIO

This course covers the creation and delivery of interactive and spatial audio. Projects explore surround and multichannel sound, interactive sound design, software synthesis, and other advanced electroacoustic techniques.

Three hours (lecture and lab); one term

Prerequisite(s): Registration in Level III or IV of a Multimedia program or MMEDIA 2G03 (or, if previously taken, MUSIC 2Z03, ART 2Z03 or THTRFLM 2Z03)

Antirequisite(s): MUSIC 3Z03

MMEDIA 3EE3 - GRAPHIC DESIGN

A technical and conceptual exploration of graphic design using computer drawing and illustration tools to solve problems posed within the context of contemporary media design practices.

Lecture and lab (three hours); one tutorial; one term

Prerequisite(s): Registration in Level III or IV of a Multimedia program

Antirequisite(s): MMEDIA 2E03

MMEDIA 3H03 - TIME-BASED MEDIA II

Theories and practices of time-based media, including traditional, experimental, and interactive formats of video, animation, motion graphics, and sound. Students will theorize, propose, design and produce projects in selected time-based media.

Lecture and lab (three hours); one term

Prerequisite(s): Registration in Level III or IV of a Multimedia program

MMEDIA 3I03 - NARRATIVE STRATEGIES

Students will consider how meaning is structured and perceived through narrative approaches to time-based media such as video and animation. Concepts include structure, plot, theme, genre, characterization, and point of view.

Lecture and lab (three hours); one tutorial; one term

Prerequisite(s): Registration in Level III or IV of a Multimedia program

MMEDIA 3K03 - GAME STUDIES

A study of the form, content, and playing of digital games. Topics include: form, genre, and technology; time and space; representation and narrative; and participatory play. Assignments include digital production.

One lecture (two hours), one tutorial; one term

Prerequisite(s): Registration in Level III or above of a Multimedia program, a program in Communication Studies, or the Software Engineering (Game Design) program

MMEDIA 3L03 - GAME DESIGN

Students will develop designs and multimedia assets for digital games, informed by readings and discussions of game design theory.

Lecture and lab (three hours); one term

Prerequisite(s): Registration in Level III or IV of a Multimedia program

MMEDIA 3MU3 - MUSICS, TECHNOLOGIES AND AUDIO CULTURES

What effects have broadcasting, mechanical and digital reproduction technologies had upon our experience of music? What are the differences between live performances, broadcasting and audio objects? This course addresses these questions by examining diverse musical and sound art genres as reflected in readings, sound recordings, videos and live performances.

Three lectures; one term

Prerequisite(s): Registration in Level III or above in a Communication Studies or Multimedia program

Antirequisite(s): CMST 3MU3

MMEDIA 3PC3 - PHOTOGRAPHIC COLLAGE AND COMPOSITE IMAGES

Studio course exploring theory and practice of collage and composite image-making (both analog and digital.) Students will develop a series of creative projects, and will learn strategies of camera control, lighting, and digital compositing. No previous technical background required, but basic familiarity with Photoshop and digital photography is recommended.

Lecture and lab (three hours); one term

Prerequisite(s): Registration in Level III or IV of a Multimedia or Studio Art program

Antirequisite(s): ART 3PC3

MMEDIA 3Q03 - EMERGING MEDIA

This course unites student multimedia learning with the research and media creation activities of multimedia faculty. Students critically engage with emerging practices and formats of digital media culture.

Lecture and lab (three hours); one term

Prerequisite(s): Registration in Level III or IV of a Multimedia program

MMEDIA 3S03 - SOUND AND IMAGE

A study of contemporary research and creative practices that explore combined audiovisual perception and digital translations between sound and image. Students will discuss theoretical readings and complete creative projects.

Lecture and lab (three hours); one term

Prerequisite(s): Registration in Level III or IV of a Multimedia program

MMEDIA 3X03 A/B - PRESENTATION AND CRITIQUE

Students will refine and evolve their current media production concepts, practices, and works through a cycle of presentation and review, critical analysis and troubleshooting.

Lecture/seminar (three hours); two terms

Prerequisite(s): Registration in Level III of a Multimedia program

MMEDIA 4F03 - TOPICS IN MULTIMEDIA PRODUCTION

Advanced multimedia production in a topic to be determined by instructor. Students will complete production projects exploring assigned themes or media formats.

Three hours (lecture and lab); one term

Prerequisite(s): Registration in Level IV of a Multimedia program.

MMEDIA 4F03 may be repeated, if on a different topic, to a total of six units.

MMEDIA 4ST6 A/B - SENIOR THESIS RESEARCH AND PRODUCTION

Students will complete multimedia thesis projects under faculty supervision. Working alone, or collaboratively, students will conduct scholarly research into the formal issues and subject matters indicated by their creative projects. Emphasis

will be placed upon the integration of research outcomes throughout a sustained production cycle to realize advanced and informed multimedia works.

Lecture and lab (three hours); two terms

Prerequisite(s): Registration in Level IV of a Multimedia Program

MUSIC

Courses in Music are administered by the School of the Arts.

Togo Salmon Hall, Room 414, ext. 27671

<http://sota.humanities.mcmaster.ca/>

Notes

1. Applicants to Music 1 must book an audition with the School of the Arts to take place usually in February and March.
2. The following courses are open as electives to students not registered in a Music program. Check course descriptions to see other requirements (such as qualifying tests, auditions, specific course, or level prerequisites, etc.).
 - MUSIC 1A03 - Introduction to the History of Music I
 - MUSIC 1AA3 - Introduction to the History of Music II
 - MUSIC 2A03 - Music of the World's Cultures
 - MUSIC 2CG3 - Classical Guitar Methods
 - MUSIC 2F03 - Music for Film and Television
 - MUSIC 2II3 - Popular Music in North America and the United Kingdom: Post-World War II
 - MUSIC 2MT3 - Introduction to the Practice of Music Therapy
 - MUSIC 2MU3 - Introduction to Music Therapy Research
 - MUSIC 2TT3 - Broadway and the Popular Song
 - MUSIC 2U03 - Jazz
 - MUSIC 3AA3 - Elementary Music Education
 - MUSIC _EE3/_EE6 (levels 1-4) - Solo Performance
 - MUSIC _GB3,_GC3,_GF3,_GJ3,_GP3,_GR3,_GW3 (levels 1-4) - Ensemble Performance in one of the following: Concert Band, Choir, Flute, Jazz Band, Percussion, Orchestra, Women's Choir.

Courses

If no prerequisite is listed, the course is open.

MUSIC 1A03 - INTRODUCTION TO THE HISTORY OF MUSIC I

An introductory survey of Western music, from Gregorian chant to the time of Bach and Handel. Emphasis is on important composers and their works in relation to their society and culture. No previous knowledge of music required.

Three lectures; one term

Not open to students registered in any Music program.

MUSIC 1AA3 - INTRODUCTION TO THE HISTORY OF MUSIC II

An introductory survey of Western music, from the time of Mozart to the present. Composers studied include Beethoven, Schubert, Chopin, Verdi, Wagner, Debussy, and Stravinsky. No previous knowledge of music required.

Three lectures; one term

Not open to students registered in any Music program.

MUSIC 1CA3 - THEORY AND ANALYSIS I

The analysis and writing of functional harmony. Includes study of music by J.S. Bach and others. Three lectures; one term

Prerequisite(s): Registration in a Music program, or registration in Honours B.Sc. (Music Cognition Specialization), or Honours B.A. (Music Cognition Specialization). Permission of the department may also be granted for students with a grade of 80 percent on RCM Advanced Rudiments (within the last two years) or those passing qualifying tests (administered on selected dates between February and May), if space permits.

Antirequisite(s): Music 1CC3

MUSIC 1CB3 - THEORY AND ANALYSIS II

Continuation of MUSIC 1CA3

The analysis and writing of functional harmony. Includes study of music by J.S. Bach and others.

Three lectures; one term

Prerequisite(s): MUSIC 1CA3; and registration in a Music program, or registration in Honours B.Sc. (Music Cognition Specialization) or Honours B.A. (Music Cognition Specialization), or permission of the instructor if space permits

MUSIC 1DA3 - PRACTICAL MUSICIANSHIP I

Sight-singing, dictation, and keyboard harmony.

One lecture, two labs, one tutorial; one term

Prerequisite(s): Registration in a Music program, or permission of the instructor if space permits

Antirequisite(s): Music 1D03

MUSIC 1DB3 - PRACTICAL MUSICIANSHIP II

Continuation of MUSIC 1DA3.

Sight-singing, dictation, and keyboard harmony.

One lecture, two labs, one tutorial; one term

Prerequisite(s): Music 1D03 or 1DA3, and registration in a Music program or permission of the instructor if space permits

MUSIC 1E06 A/B - SOLO PERFORMANCE

Intensive study of the technique and repertoire of any orchestral instrument, piano, organ, harpsichord, voice, recorder, saxophone, or guitar.

12 one-hour meetings per term; two terms

Prerequisite(s): Registration in a Music program

MUSIC 1EE6 A/B - SOLO PERFORMANCE

Intensive study of the technique and repertoire of any orchestral instrument, piano, organ, harpsichord, voice, recorder, saxophone or guitar. Must be taken on a different instrument from MUSIC 1E06.

12 one-hour meetings per term; two terms

Prerequisite(s): Successful audition at a minimum level of Honours Grade 8 RCM or equivalent and permission of the School of the Arts.

MUSIC 1EE6 can only be taken in addition to MUSIC 1E06 A/B by students registered in Level III or IV Honours Music.

Lesson fees are charged to students taking MUSIC 1EE6. Lesson fees must be paid by September 1.

MUSIC 1GB3 A/B - ENSEMBLE PERFORMANCE: McMASTER CONCERT BAND

Prerequisite(s): Successful audition required. Auditions are held in the first week of classes in September. Students in Level II and above may have the antirequisite for this course waived if they complete a successful audition. Only 12 units of Ensemble Performance courses will count towards a Music degree.

Antirequisite(s): MUSIC 1GC3 A/B, 1GF3 A/B, 1GJ3 A/B, 1GP3 A/B, 1GR3 A/B, or 1GW3 A/B

MUSIC 1GC3 A/B - ENSEMBLE PERFORMANCE: McMASTER UNIVERSITY CHOIR

Prerequisite(s): Successful audition required. Auditions are held in the first week of classes in September. Students in Level II and above may have the antirequisite for this course waived if they complete a successful audition. Only 12 units of Ensemble Performance courses will count towards a Music degree.

Antirequisite(s): MUSIC 1GB3 A/B, 1GF3 A/B, 1GJ3 A/B, 1GP3 A/B, 1GR3 A/B or MUSIC 1GW3 A/B

**MUSIC 1GF3 A/B - ENSEMBLE PERFORMANCE:
McMASTER UNIVERSITY FLUTE ENSEMBLE**

Prerequisite(s): Successful audition required. Auditions are held in the first week of classes in September. Students in Level II and above may have the antirequisite for this course waived if they complete a successful audition. Only 12 units of Ensemble Performance courses will count towards a Music degree.

Antirequisite(s): MUSIC 1GB3 A/B, 1GC3 A/B, 1GJ3 A/B, MUSIC 1GP3 A/B, 1GR3 A/B, MUSIC 1GW3 A/B

MUSIC 1GJ3 A/B - ENSEMBLE PERFORMANCE: McMASTER JAZZ BAND

Prerequisite(s): Successful audition required. Auditions are held in the first week of classes in September. Students in Level II and above may have the antirequisite for this course waived if they complete a successful audition. Only 12 units of Ensemble Performance courses will count towards a Music degree.

Antirequisite(s): MUSIC 1GB3 A/B, 1GC3 A/B, 1GF3 A/B, 1GP3 A/B, 1GR3 A/B or 1GW3 A/B

**MUSIC 1GP3 A/B - ENSEMBLE PERFORMANCE:
McMASTER PERCUSSION ENSEMBLE**

Prerequisite(s): Successful audition required. Auditions are held in the first week of classes in September. Students in Level II and above may have the antirequisite for this course waived if they complete a successful audition. Only 12 units of Ensemble Performance courses will count towards a Music degree.

Antirequisite(s): MUSIC 1GB3 A/B, 1GC3 A/B, 1GF3 A/B, 1GJ3 A/B, 1GR3 A/B or 1GW3 A/B

**MUSIC 1GR3 A/B - ENSEMBLE PERFORMANCE:
McMASTER CHAMBER ORCHESTRA**

Prerequisite(s): Successful audition required. Auditions are held in the first week of classes in September. Students in Level II and above may have the antirequisite for this course waived if they complete a successful audition. Only 12 units of Ensemble Performance courses will count towards a Music degree.

Antirequisite(s): MUSIC 1GB3 A/B, 1GC3 A/B, 1GF3 A/B, 1GJ3 A/B, 1GP3 A/B, or 1GR3 A/B

**MUSIC 1GW3 A/B - ENSEMBLE PERFORMANCE:
McMASTER WOMEN'S CHOIR**

Prerequisite(s): Successful audition required. Auditions are held in the first week of classes in September. Students in Level II and above may have the antirequisite for this course waived if they complete a successful audition. Only 12 units of Ensemble Performance courses will count towards a Music degree.

Antirequisite(s): MUSIC 1GB3 A/B, 1GC3 A/B, 1GF3 A/B, 1GJ3 A/B, 1GP3 A/B, or 1GR3 A/B

MUSIC 1MH3 - MUSIC HISTORY I: MUSIC AND CULTURE

An introduction to thinking, researching and writing about music as a product of the culture in which it is practiced. Both Western and non-Western examples will be considered.

Three lectures; one term

Prerequisite(s): Registration in a Music program

Antirequisite(s): Music 1B03 and 1BB3

MUSIC 2A03 - MUSIC OF THE WORLD'S CULTURES

A survey of music traditions of non-European cultures, e.g., far Eastern, Indian, African.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 2Q03

**MUSIC 2B03 - MUSIC HISTORY: MUSIC IN WESTERN
CULTURE FROM C. 1750 TO THE PRESENT**

A survey of Western music from c. 1750 to the present. Includes consideration of performance practices, influences of the other arts and socio-political developments. In addition, musicological research and writing skills will be cultivated.

Three lectures; one term

Prerequisite(s): Registration in Level II of a Music program

MUSIC 2CA3 - THEORY AND ANALYSIS III

Continuation of Music 1CB3. Chromatic Harmony and the completed major minor system.

Three lectures; one term

Prerequisite(s): Music 1CC3 or 1CB3. Registration in a Music program; or registration in Honours B.Sc. (Music Cognition Specialization) or Honours B.A. (Music Cognition Specialization), or permission of the instructor if space permits.

Antirequisite(s): Music 2CC3 A/B

MUSIC 2CB3 - THEORY AND ANALYSIS IV

Continuation of MUSIC 2CA3.

Chromatic Harmony and the completed major minor system.

Three lectures; one term

Prerequisite(s): MUSIC 2CA3 and registration in a Music program; or registration in Honours B.Sc. (Music Cognition Specialization) or Honours B.A. (Music Cognition Specialization), or permission of the instructor if space permits

First offered in 2018-2019.

MUSIC 2CG3 - CLASSICAL GUITAR METHODS

Basic techniques of playing classical guitar. Repertoire for guitar ensemble for various educational levels. Not open to students who have completed a solo performance course in guitar.

Three lectures; one term

Prerequisite(s): Registration in Level II or above of any program and permission of the School of the Arts.

Antirequisite(s): MUSIC 3CG3

Students must provide a classical guitar and foot rest.

MUSIC 2DA3 - PRACTICAL MUSICIANSHIP III

Continuation of MUSIC 1DB3. Sight-singing, dictation, and keyboard harmony.

One lecture, two labs, one tutorial; one term

Prerequisite(s): MUSIC 1DB3 and registration in a Music program or permission of the instructor if space permits.

Antirequisite(s): MUSIC 2D03 A/B

MUSIC 2E06 A/B - SOLO PERFORMANCE

A continuation of MUSIC 1E06 A/B on the same instrument.

12 one-hour meetings per term; two terms

Prerequisite(s): MUSIC 1E06 A/B and registration in Level II of any program in Music

MUSIC 2EE6 A/B - SOLO PERFORMANCE

A continuation of MUSIC 1EE6 A/B.

12 one-hour meetings per term; two terms

Prerequisite(s): MUSIC 1EE6 A/B

Antirequisite(s): MUSIC 2E06 A/B

Lesson fees are charged to students taking MUSIC 2EE6. Lesson fees must be paid by September 1. Not open to students in any Music program.

MUSIC 2F03 - MUSIC FOR FILM AND TELEVISION

An examination of how music functions to help create meanings in film and television programs. Examples will be drawn from throughout the history of film and television.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 2T03, THTRFLM 2T03

MUSIC 2GB3 A/B - ENSEMBLE PERFORMANCE: McMASTER CONCERT BAND

Prerequisite(s): Registration in Level II or above, MUSIC 1GB3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 2GC3 A/B - ENSEMBLE PERFORMANCE: McMASTER UNIVERSITY CHOIR

Prerequisite(s): Registration in Level II or above, MUSIC 1GC3 A/B or 1GW3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 2GF3 A/B - ENSEMBLE PERFORMANCE: McMASTER UNIVERSITY FLUTE ENSEMBLE

Prerequisite(s): Registration in Level II or above, MUSIC 1GF3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 2GJ3 A/B - ENSEMBLE PERFORMANCE: McMASTER JAZZ BAND

Prerequisite(s): Registration in Level II or above, MUSIC 1GJ3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 2GP3 A/B - ENSEMBLE PERFORMANCE: McMASTER PERCUSSION ENSEMBLE

Prerequisite(s): Registration in Level II or above, MUSIC 1GP3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 2GR3 A/B - ENSEMBLE PERFORMANCE: McMASTER CHAMBER ORCHESTRA

Prerequisite(s): Registration in Level II or above, MUSIC 1GR3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 2GW3 A/B - ENSEMBLE PERFORMANCE: McMASTER WOMEN'S CHOIR

Prerequisite(s): Registration in Level II or above, MUSIC 1GC3 A/B or 1GW3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 2I13 - POPULAR MUSIC IN NORTH AMERICA AND THE UNITED KINGDOM: POST-WORLD WAR II

Popular music, its social meanings, and media and technology interactions, from rock-and-roll to now. Topics include rhythm and blues (Chuck Berry), pop (Madonna), metal (Led Zeppelin.)

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 2R03

MUSIC 2MC3 - PSYCHOLOGY OF MUSIC

Overview of the psychological roots of the musical experience. Sample topics to include the perception of pitch, timbre, meter, and tonality as well as the communication of emotion. There will be a particular emphasis on the practical implications of basic principles of perception and cognition, with a focus on improving the quality and efficiency of music performance, learning, and education. Three lectures, one term

Prerequisite(s): Registration in Level II of an Honours, Combined Honours or B.A. Music program

Antirequisite(s): MUSICCOG 2MA3, 2MP3, PSYCH 2MA3, 2MP3

MUSIC 2MH3 - MUSIC HISTORY: MUSIC IN WESTERN CULTURE FROM ANTIQUITY TO C. 1750

An examination, through selected examples, of Western musical practice and its contexts, from Antiquity to approximately 1750. A significant portion of the course will be devoted to the cultivation of writing and research skills.

Three lectures; one term

Prerequisite(s): Registration in level II of a Music program

Antirequisite(s): Music 2BB3

MUSIC 2MT3 - INTRODUCTION TO THE PRACTICE OF MUSIC THERAPY

An introduction to the practice of music therapy, with an emphasis on the diversity of music therapy applications such as: bio-medical, psychoanalytical, behavioural and rehabilitation.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

MUSIC 2MU3 - INTRODUCTION TO MUSIC THERAPY RESEARCH

Current research papers will be explored in the fields of education, rehabilitation, neurology and mental health.

Three lectures; one term

Prerequisite(s): Registration in Level II or above. Completion of MUSIC 2MT3 is strongly recommended, but not required.

Antirequisite(s): MUSIC 3MT3

MUSIC 2TT3 - BROADWAY AND THE POPULAR SONG

An historical examination of the development of English-language musical theatre in the twentieth century. Attention will be paid to the history of American popular song and its impact on the genre.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): THTRFLM 2TT3

MUSIC 2U03 - JAZZ

An historical survey of jazz, focusing on selected performers and arrangers.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

MUSIC 3AA3 - ELEMENTARY MUSIC EDUCATION

A survey of elementary music education methods such as those of Kodály, Orff and Suzuki. Students in this course will be expected to read music at a basic level.

Three lectures; one term

Prerequisite(s): 18 units of Music

MUSIC 3CM3 - MODAL COUNTERPOINT

The writing and analysis of modal counterpoint in the style of the late renaissance. Includes study of music by composers such as Palestrina and Lasso.

Seminar (two hours); one term

Prerequisite(s): MUSIC 2CB3 or MUSIC 2CC3 A/B and registration in Honours Music

Antirequisite(s): MUSIC 2C03

Offered in alternate years.

MUSIC 3CT3 - TONAL COUNTERPOINT

The writing and analysis of tonal counterpoint in Baroque style. Includes study of music by major composers of the 17th and early 18th centuries.

Seminar (two hours); one term

Prerequisite(s): MUSIC 2CB3 or 2CC3 A/B and registration in Honours Music

Antirequisite(s): MUSIC 3C03

Offered in alternate years.

MUSIC 3E03 - SOLO PERFORMANCE

The technique and repertoire of any orchestral instrument, piano, organ, harpsichord, voice, recorder, saxophone or guitar.

12 one-hour meetings; one term

Prerequisite(s): MUSIC 2E06 A/B on the same instrument and registration in a program in Music

Antirequisite(s): MUSIC 3E06 A/B

MUSIC 3E06 A/B - SOLO PERFORMANCE

A continuation of MUSIC 2E06 A/B on the same instrument.

12 one-hour meetings per term; two terms

Prerequisite(s): MUSIC 2E06 A/B and registration in a program in Music

Antirequisite(s): MUSIC 3E03

MUSIC 3EE3 - SOLO PERFORMANCE

The technique and repertoire of any orchestral instrument, piano, organ, harpsichord, voice, recorder, saxophone or guitar.

12 one-hour meetings; one term

Prerequisite(s): MUSIC 2EE6 A/B

Antirequisite(s): MUSIC 3E03, 3EE6 A/B

Lesson fees are charged to students taking MUSIC 3EE3. Lesson fees must be paid by September 1 for Term 1 and by January 1 for Term 2. Not open to students in any Music Program.

MUSIC 3EE6 A/B - SOLO PERFORMANCE

A continuation of MUSIC 2EE6 A/B.

12 one-hour meetings per term; two terms

Prerequisite(s): MUSIC 2EE6 A/B

Antirequisite(s): MUSIC 3EE3, 3E03, 3E06 A/B

Lesson fees are charged to students taking MUSIC 3EE6. Lesson fees must be paid by September 1. Not open to students in any Music Program.

MUSIC 3GA3 A/B - ENSEMBLE PERFORMANCE: ACCOMPANYING

Accompanying a student in a solo performance course. Weekly attendance at the soloist's lesson is required.

Prerequisite(s): Registration in Level III or IV of a Music program and permission of the School of the Arts

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 3GB3 A/B - ENSEMBLE PERFORMANCE: McMASTER CONCERT BAND

Prerequisite(s): MUSIC 2GB3 A/B and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 3GC3 A/B - ENSEMBLE PERFORMANCE: McMASTER UNIVERSITY CHOIR

Prerequisite(s): MUSIC 2GC3 A/B or 2GW3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 3GF3 A/B - ENSEMBLE PERFORMANCE: McMASTER UNIVERSITY FLUTE ENSEMBLE

Prerequisite(s): MUSIC 2GF3 A/B and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 3GJ3 A/B - ENSEMBLE PERFORMANCE: McMASTER JAZZ BAND

Prerequisite(s): MUSIC 2GJ3 A/B and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 3GP3 A/B - ENSEMBLE PERFORMANCE: McMASTER PERCUSSION ENSEMBLE

Prerequisite(s): MUSIC 2GP3 A/B and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 3GR3 A/B - ENSEMBLE PERFORMANCE: McMASTER CHAMBER ORCHESTRA

Prerequisite(s): MUSIC 2GR3 A/B, and successful audition.

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 3GW3 A/B - ENSEMBLE PERFORMANCE: McMASTER WOMEN'S CHOIR

Prerequisite(s): MUSIC 2GW3 A/B or 2GC3 A/B, and successful audition

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 3H03 - ANALYSIS

Techniques of analysis applied to selected works of the 20th century.

Seminar (two hours); one term

Prerequisite(s): MUSIC 2CB3 or 2CC3 A/B and 2H03, and registration in Honours Music

Offered in alternate years.

MUSIC 3J03 - ORCHESTRATION AND ARRANGING

A study of the orchestral/band instruments; scoring of music for various ensembles. Three lectures; one term

Prerequisite(s): MUSIC 2CB3 or 2CC3 A/B and MUSIC 2H03, and registration in a Music program

Offered in alternate years.

MUSIC 3JJ3 - TOPICS IN MUSIC HISTORY: MUSIC BEFORE C. 1750

Advanced study of selected music prior to c. 1750 in its historical, socio-political and artistic contexts. Possible topics include: medieval music, Renaissance music, the music of J.S. Bach etc.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level III or IV of an Honours Music program

Antirequisite(s): MUSIC 3Y03

MUSIC 3JJ3 may be repeated, if on a different topic, to a total of six units.

Alternates with MUSIC 3KK3.

MUSIC 3K03 - BRASS METHODS

Basic techniques of playing brass instruments. Brass literature for various educational levels. The instruments studied differ from those studied in MUSIC 4K03.

Two lectures, one lab; one term

Prerequisite(s): Registration in Honours Music

Offered on rotational basis

MUSIC 3KK3 - TOPICS IN MUSIC HISTORY: MUSIC FROM C. 1750-C. 1900

Advanced study of selected music in its historical, socio-political and artistic contexts. Possible topics include: Mozart's operas, nineteenth-century piano music, Viennese Classicism, Lieder, etc.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level III or IV of an Honours Music program

Antirequisite(s): MUSIC 3YY3

Music 3KK3 may be repeated, if on a different topic, to a total of six units.

Alternates with MUSIC 3JJ3.

MUSIC 3LQ3 - WOODWIND METHODS

Basic techniques of playing woodwind instruments. Woodwind literature for various educational levels. The instruments studied differ from those studied in MUSIC 4LQ3.

Two lectures, one lab; one term

Prerequisite(s): Registration in Honours Music

Offered on rotational basis

MUSIC 3M03 A/B - STRING METHODS

Basic techniques of playing string instruments. String literature for various educational levels. The instruments studied differ from those studied in MUSIC 4M03 A/B

Two lectures, term 1; one lecture, term 2; two terms

Prerequisite(s): Registration in Honours Music

Offered on rotational basis

MUSIC 3N03 - VOCAL METHODS

The fundamentals of singing, including breath control, tone production, diction, and repertoire are introduced in a group setting. Solo and small ensemble performing assignments are made according to individual vocal need and level of ability.

Two lectures, one lab; one term

Prerequisite(s): Registration in Honours Music

Offered on rotational basis

MUSIC 3O03 - CONDUCTING

Fundamental conducting techniques applied to works selected from the standard repertoire.

Three lectures; one term

Prerequisite(s): MUSIC 2CB3, 2CC3 A/B or 2H03 and registration in Honours Music

MUSIC 3P03 - PERCUSSION METHODS

Basic techniques of playing percussion instruments. Percussion literature for various educational levels.

Two lectures, one lab; one term

Prerequisite(s): Registration in Honours Music

Offered on rotational basis

MUSIC 3SS3 - SPECIAL STUDIES IN CHAMBER MUSIC OR ACCOMPANYING I

Advanced supervised studies in chamber music performance or vocal or instrumental accompanying.

Times to be arranged between the students and instructor; one term

Prerequisite(s): A grade of at least A- in MUSIC 2E06 A/B or MUSIC 2EE6 A/B; and registration in Level III or IV of a Music program; and permission of the School of the Arts. Students requesting this course must submit a written proposal to the School of the Arts by April 15. This course is primarily for students pursuing the Diploma in Music Performance.

Antirequisite(s): MUSIC 3S03

This course cannot be repeated.

Students taking MUSIC 3SS3 must pay additional lesson fees to the School of the Arts by September 1 for Term 1 and by January 1 for Term 2.

MUSIC 3V03 - FOUNDATIONS OF MUSIC EDUCATION

A study of the philosophical, psychological and sociological foundations of music education, leading to the formation of a personal philosophy of music education.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours Music program

Offered in alternate years.

MUSIC 3X03 - INDEPENDENT STUDY

Supervised study in any area offered and approved by the School of the Arts.

Times to be arranged between the student and instructor; one term

Prerequisite(s): Registration in Level III or IV of an Honours Music program and permission of the School of the Arts. Students requesting this course must submit a written proposal to the School of the Arts by April 15th.

MUSIC 4C03 - ADVANCED STUDIES IN HARMONY AND COUNTERPOINT

Advanced harmonic and/or contrapuntal study focusing on a post-Baroque style or genre selected by the instructor. Possible topics include: sonatas, songs, jazz arranging and scoring.

Seminar (two hours); one term

Prerequisite(s): MUSIC 2CB3 or 2CC3 A/B and registration in Honours Music

Offered in alternate years.

MUSIC 4E03 - SOLO PERFORMANCE

A continuation of MUSIC 3E03 or MUSIC 3E06 A/B on the same instrument.

12 one-hour meetings; one term

Prerequisite(s): MUSIC 3E03 or 3E06 A/B; and registration in a program in Music

Antirequisite(s): MUSIC 4E06 A/B, 4E09 A/B

MUSIC 4E06 A/B - SOLO PERFORMANCE

A continuation of MUSIC 3E03 or 3E06 A/B on the same instrument.

12 one-hour meetings per term; two terms

Prerequisite(s): MUSIC 3E03 or 3E06 A/B; and registration in a Music Program

Antirequisite(s): MUSIC 4E03, 4E09 A/B

MUSIC 4E09 A/B - SOLO PERFORMANCE, DIPLOMA

A continuation of MUSIC 3E06 A/B on the same instrument.

Advanced technique and repertoire, leading to a final examination in a recital presentation of approximately forty minutes in duration. This course is for students who have demonstrated excellence in musical performance. May not be used for degree credit.

Individual instruction; two terms

Prerequisite(s): MUSIC 3E06 A/B or 3EE6 A/B with a grade of at least A-; a Grade Point Average of at least 8.0; registration in a program in Music, and permission of the School of the Arts

Antirequisite(s): MUSIC 4E03, 4E06 A/B or 4EE6 A/B

Open only to students pursuing the Diploma in Music Performance. May not be used for degree credit. Students requesting this course must apply in writing to the School of the Arts by April 15.

MUSIC 4EE3 - SOLO PERFORMANCE

A continuation of MUSIC 3EE3 or 3EE6 A/B.

12 one-hour meetings; one term

Prerequisite(s): MUSIC 3EE3 or 3EE6 A/B

Antirequisite(s): MUSIC 4E03, 4E09 A/B, 4EE6 A/B

Lesson fees are charged to students taking MUSIC 4EE3. Lesson fees must be paid by September 1 for Term One and by January 1 for Term Two. Not open to students in any Music Program.

MUSIC 4EE6 A/B - SOLO PERFORMANCE

A continuation of MUSIC 3EE3 or 3EE6 A/B.

12 one-hour meetings per term; two terms

Prerequisite(s): MUSIC 3EE3 or 3EE6 A/B

Antirequisite(s): MUSIC 4E06 A/B, 4E09 A/B, 4EE3

Lesson fees are charged to students taking MUSIC 4EE6. Lesson fees must be paid by September 1. Not open to students in any Music Program.

MUSIC 4EE9 A/B - SOLO PERFORMANCE, DIPLOMA

A continuation of MUSIC 3EE6 A/B on the same instrument.

Advanced technique and repertoire, leading to a final examination in a recital presentation of approximately forty minutes in duration. This course is for students who have demonstrated excellence in musical performance. May not be used for degree credit.

Individual instruction; two terms

Prerequisite(s): MUSIC 3EE6 A/B with a grade of at least A-; a Grade Point Average of at least 8.0; and permission of the School of the Arts

Antirequisite(s): MUSIC 4E03, 4E06 A/B, 4E09, 4EE3 or 4EE6 A/B

Open only to students pursuing the Diploma in Music Performance. May not be used for degree credit. Students requesting this course must apply in writing to the School of the Arts by April 15

Students taking MUSIC 4EE9 A/B must pay additional lesson fees to the School of the Arts by September 1.

MUSIC 4GA3 A/B - ENSEMBLE PERFORMANCE: ACCOMPANYING

Accompanying a student in a solo performance course. Weekly attendance at the soloist's lesson is required.

Prerequisite(s): MUSIC 3GA3 A/B; registration in Level III or IV of a Music program; and permission of the School of the Arts

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 4GB3 A/B - ENSEMBLE PERFORMANCE: McMASTER CONCERT BAND

Prerequisite(s): MUSIC 3GB3 A/B and successful audition

Those students registered in the diploma program must, where possible, perform in this course in the same medium as they do in their other diploma courses. Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 4GC3 A/B - ENSEMBLE PERFORMANCE: McMASTER UNIVERSITY CHOIR

Prerequisite(s): MUSIC 3GC3 A/B and successful audition

Those students registered in the diploma program must, where possible, perform in this course in the same medium as they do in their other diploma courses. Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 4GF3 A/B - ENSEMBLE PERFORMANCE: McMASTER UNIVERSITY FLUTE ENSEMBLE

Prerequisite(s): MUSIC 3GF3 A/B and successful audition

Those students registered in the diploma program must, where possible, perform in this course in the same medium as they do in their other diploma courses. Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 4GJ3 A/B - ENSEMBLE PERFORMANCE: McMASTER JAZZ BAND

Prerequisite(s): MUSIC 3GJ3 A/B and successful audition

Those students registered in the diploma program must, where possible, perform in this course in the same medium as they do in their other diploma courses.

Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 4GP3 A/B - ENSEMBLE PERFORMANCE: McMASTER PERCUSSION ENSEMBLE

Prerequisite(s): MUSIC 3GP3 A/B and successful audition

Those students registered in the diploma program must, where possible, perform in this course in the same medium as they do in their other diploma courses. Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 4GR3 A/B - ENSEMBLE PERFORMANCE: McMASTER CHAMBER ORCHESTRA

Prerequisite(s): MUSIC 3GR3 A/B and successful audition

Those students registered in the diploma program must, where possible, perform in this course in the same medium as they do in their other diploma courses. Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 4GW3 A/B - ENSEMBLE PERFORMANCE: McMASTER WOMEN'S CHOIR

Prerequisite(s): MUSIC 3GW3 A/B and successful audition

Those students registered in the diploma program must, where possible, perform in this course in the same medium as they do in their other diploma courses. Auditions are held in the first week of classes in September. Only 12 units of Ensemble Performance courses will count towards a Music degree.

MUSIC 4H03 - ADVANCED STUDIES IN ANALYSIS

Advanced studies in analysis. Possible topics include: Schenkerian analysis, song cycles of Schubert, advanced set theory.

Seminar (two hours); one term

Prerequisite(s): MUSIC 2CB3 or 2CC3 A/B, 3H03 and registration in Honours Music
Offered in alternate years.

MUSIC 4K03 - BRASS METHODS

A study of the basic techniques of playing brass instruments. Brass literature for various educational levels. The instruments studied differ from those studied in MUSIC 3K03.

Two lectures, one lab; one term

Prerequisite(s): Registration in Honours Music
Offered on rotational basis

MUSIC 4L03 - WOODWIND METHODS

A study of the basic techniques of playing woodwind instruments. Woodwind literature for various educational levels. The instruments studied differ from those studied in MUSIC 3L03.

Two lectures, one lab; one term

Prerequisite(s): Registration in Honours Music
Offered on rotational basis

MUSIC 4M03 A/B - STRING METHODS

A study of the basic techniques of playing string instruments. String literature for various educational levels. The instruments studied differ from those studied in MUSIC 3M03 A/B.

Two lectures, term 1; one lecture, term 2; two terms

Prerequisite(s): Registration in Honours Music
Offered on rotational basis

MUSIC 4N03 - CHORAL METHODS

Basic techniques of how to teach singing are presented as well as choral rehearsal techniques and choral literature for K-12 and community choirs.

Two lectures, one lab; one term

Prerequisite(s): Registration in Honours Music

Offered on rotational basis

MUSIC 40C3 - ADVANCED CONDUCTING: CHORAL

Rehearsal and conducting techniques, including warm-up exercises, tone, intonation, balance, attack, sustain, cueing, repertoire, score reading, and score preparation.

Three lectures; one term

Prerequisite(s): MUSIC 3003 and registration in Honours Music

Alternates with MUSIC 40I3.

MUSIC 40I3 - ADVANCED CONDUCTING: INSTRUMENTAL

A continuation of MUSIC 3003.

Refinement and development of conducting techniques. Exploration of in-depth score preparation, rehearsal techniques, odd and shifting meters, subdivision.

Three lectures; one term

Prerequisite(s): MUSIC 3003 and registration in Honours Music

Alternates with MUSIC 40C3.

MUSIC 4SS3 - SPECIAL STUDIES IN CHAMBER MUSIC OR ACCOMPANYING II

Advanced supervised studies in chamber music performance or instrumental accompanying.

Times to be arranged between the students and instructor; one term

Prerequisite(s): MUSIC 3SS3; and registration in Level III or IV of a Music program, and permission of the School of the Arts. Students requesting this course must submit a written proposal to the School of the Arts by April 15th. This course is primarily for students pursuing the Diploma in Music Performance.

This course cannot be repeated.

Students taking MUSIC 4SS3 must pay additional lesson fees to the School of the Arts by September 1 for Term One and by January 1 for Term Two.

MUSIC 4V03 - CURRENT ISSUES IN MUSIC EDUCATION

An investigation of new political initiatives, philosophical views, developing research, and curricular and administrative changes that are currently influencing the practice of music in the schools.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Music

Alternates with MUSIC 3V03.

MUSIC 4X03 - ADVANCED INDEPENDENT STUDY

Advanced supervised study in any area offered and approved by the School of the Arts.

Times to be arranged between the student and instructor; one term

Prerequisite(s): Registration in Level III or IV of an Honours Music program and permission of the School of the Arts. Students requesting this course must submit a written proposal to the School of the Arts by April 15th.

MUSIC 4Y03 - TOPICS IN MUSIC HISTORY: ADVANCED MUSICOLOGY SEMINAR

An intensive examination of a composer, period, genre, or issue from the style areas of 'classical' music, film music, popular music, or jazz.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours Music program

MUSIC 4Y03 may be repeated, if on a different topic, to a total of six units.

MUSIC 4Z03 - COMPOSITION

The composition of various instrumental or vocal works.

Times to be arranged between the student and instructor; one term

Prerequisite(s): Registration in Level III or IV of an Honours Music program and a grade of at least B+ in MUSIC 2CC3 A/B or MUSIC 2CB3; or permission of the instructor.

MUSIC 4ZZ3 - ADVANCED COMPOSITION

The composition of various instrumental or vocal works.

Times to be arranged between the student and instructor; one term

Prerequisite(s): MUSIC 4Z03; and registration in an Honours Music program; and permission of the instructor

MUSIC COGNITION

Courses in Music Cognition are administered by the School of the Arts and the Department of Psychology, Neuroscience & Behaviour.

Togo Salmon Hall, Room 414, ext. 27671

<http://sota.humanities.mcmaster.ca/>

Courses

If no prerequisite is listed, the course is open.

MUSICCOG 2MP3 - INTRODUCTION TO MUSIC COGNITION

This course presents an overview of music cognition, covering such topics as musical acoustics, perception of melody, harmony and rhythm, social and emotional responses to music, and the evolution of music. In addition a basic introduction to music theory is included.

Three lectures, one tutorial; one term

Prerequisite(s): One of PSYCH 1F03, 1X03, 1XX3 and registration in Level II or above; or registration in Level II or above of an Arts & Science program, a Bachelor of Health Sciences (Honours) program, or an Honours Music Cognition program (B.A., B.Arts&Sc., B.Mus., B.Sc.); or ISCI 1A24 A/B; or permission of the instructor

Antirequisite(s): MUSIC 2MC3, MUSICCOG 2MA3, PSYCH 2MA3

Cross-list(s): PSYCH 2MP3

This course is administered by the School of the Arts.

MUSICCOG 30Q3 A/B S - EXPERIMENTAL LABORATORY IN MUSIC COGNITION I

Students will be trained in the process of designing experiments, collecting data, performing statistical analyses and reporting on an experiment addressing an aspect of music perception and cognition. This course is intended for students with background in Music Cognition (such as MUSICCOG 2MA3, 2MP3 or 2MC3).

Two hours plus lab work; one term, or, one hour plus lab work; two terms

Prerequisite(s): Permission of the instructor

MUSICCOG 3SP3 - THE SCIENCE OF PERFORMANCE

This course explores empirical, methodological and cultural aspects of the study of performance, with a principal focus on the performing arts (music, dance, and theatre).

Three lectures; one term

Prerequisite(s): MUSICCOG 2MP3 (or MUSICCOG 2MA3) or PSYCH 2MP3 (or PSYCH 2MA3); and registration in a Music Cognition program (B.A., B.Arts.Sc., B.Mus. B.Sc.) or PNB 2XA3 or PSYCH 2E03 and registration in an Honours program, or ISCI2A18; or permission of the instructor. Completion of one of ARTSSCI 2R03, HTHSCI 2A03, LINGUIST 2DD3, PNB 2XE3, 3XE3, SOCSCI 2J03, STATS 2B03, 2D03 is recommended.

Prerequisite(s) (EFFECTIVE 2019-2020): PNB 2XA3 or PSYCH 2H03; and one of ARTSSCI 2R03, HTHSCI 2A03, LINGUIST 2DD3, PNB 2XE3, 3XE3, SOCSCI 2J03,

STATS 2B03, 2D03; and registration in Level III or IV of an Honours program; or ISCI 2A18 A/B. PSYCH/MUSICCOG 2MP3 is recommended.

Antirequisite(s): MUSICCOG 3MP3, 3MB3, PSYCH 3MP3, 3MB3

Cross-list(s): PSYCH 3SP3

This course is administered by the Department of Psychology, Neuroscience, and Behaviour.

MUSICCOG 4D06 A/B - THESIS IN MUSIC COGNITION

Students conduct an individual research project under the supervision of a faculty member in Psychology or Music.

Prerequisite(s): Registration in Level IV of Honours Music or any Music Cognition program (B.A., B.Mus., B.Sc.) with a Grade Point Average of at least 8.0 and permission of the instructor

MUSICCOG 4MP3 - NEUROSCIENCE OF MUSIC

This seminar explores theories on how and why music evolved, and how the perception, development, performance and emotional experience of music are mediated by the brain. Primary source materials are discussed in class and experimental designs developed to address critical questions.

Three hours (lecture/seminar); one term

Prerequisite(s): MUSICCOG 2MP3 (or MUSICCOG 2MA3) or PSYCH 2MP3 (or PSYCH 2MA3) or PSYCH 3H03; and registration in a Music Cognition program (B.A., B.Arts.Sc., B.Mus., B.Sc.), or PNB 2XA3 or PSYCH 2E03 and registration in an Honours program, or ISCI 2A18 A/B; or permission of the instructor. PSYCH 2E03 is recommended.

Cross-list(s): PSYCH 4MP3

This course is administered by the Department of Psychology, Neuroscience & Behaviour.

MUSICCOG 4QQ3 A/B S - EXPERIMENTAL LABORATORY IN MUSIC COGNITION II

Students will receive advanced training in the process of designing experiments, collecting data, performing statistical analyses and reporting on an experiment addressing an aspect of music perception and cognition.

Two hours plus lab work; one term, or, one hour plus lab work; two terms

Prerequisite(s): MUSICCOG 3QQ3 A/B S and permission of the instructor

NEUROSCIENCE

Courses in NEUROSCI are administered by the Department of Psychology, Neuroscience & Behaviour.

Psychology Building, Room 102, ext. 23000

<http://www.science.mcmaster.ca/pnb/>

Courses

If no prerequisite is listed, the course is open.

See also courses in PSYCH and PNB.

NEUROSCI 2BB3 A/B S - RESEARCH PRACTICUM IN CELLULAR/MOLECULAR NEUROSCIENCE

Independent research practicum in cellular/molecular neuroscience, conducted in a faculty member's laboratory that may be extended over both terms.

Prerequisite(s): Registration in Level II Honours Neuroscience and permission of faculty supervisor and program director

NEUROSCI 2CC3 A/B S - RESEARCH PRACTICUM IN SYSTEMS/CIRCUITS NEUROSCIENCE

Independent research practicum in systems/circuits neuroscience, conducted in a faculty member's laboratory that may be extended over both terms.

Prerequisite(s): Registration in Level II Honours Neuroscience and permission of faculty supervisor and program director

NEUROSCI 2DD3 A/B S - RESEARCH PRACTICUM IN BEHAVIOURAL/COGNITIVE NEUROSCIENCE

Independent research practicum in behavioural/cognitive neuroscience, conducted in a faculty member's laboratory that may be extended over both terms.

Prerequisite(s): Registration in Level II Honours B.Sc. Neuroscience and permission of Faculty Supervisor and Program Director

NEUROSCI 2XNO A/B - NEUROSCIENCE TUTORIAL

Tutorial supplementing the Honours B.Sc. Neuroscience program. Must be completed prior to enrolment in Level III.

This tutorial is evaluated on a Pass/Fail basis.

One lecture (one hour); two terms

Prerequisite(s): Registration in Level II Honours Neuroscience

NEUROSCI 3BB3 A/B S - INDIVIDUAL LAB STUDY IN CELLULAR/MOLECULAR NEUROSCIENCE

Independent laboratory project in cellular/molecular neuroscience, conducted in a faculty member's laboratory that may be extended over both terms.

Prerequisite(s): Registration in Level III or IV Honours Neuroscience and permission of faculty supervisor and program director

If NEUROSCI 3BB3 A/B S is taken concurrently with NEUROSCI 4L09 A/B or 4L12 A/B, a different faculty member must supervise each course.

NEUROSCI 3CC3 A/B S - INDIVIDUAL LAB STUDY IN SYSTEMS/CIRCUITS NEUROSCIENCE

Independent laboratory project in systems/circuits neuroscience, conducted in a faculty member's laboratory that may be extended over both terms.

Prerequisite(s): Registration in Level III or IV Honours Neuroscience and permission of faculty supervisor and program director

If NEUROSCI 3CC3 A/B S is taken concurrently with or NEUROSCI 4L09 A/B or 4L12 A/B, a different faculty member must supervise each course.

NEUROSCI 3DD3 A/B S - INDIVIDUAL LAB STUDY IN BEHAVIOURAL/COGNITIVE NEUROSCIENCE

Independent laboratory project in behavioural/cognitive neuroscience, conducted in a faculty member's laboratory that may be extended over both terms.

Prerequisite(s): Registration in Level III or IV Honours Neuroscience and permission of faculty supervisor and program director

If NEUROSCI 3DD3 A/B S is taken concurrently with NEUROSCI 4L09 A/B or 4L12 A/B, a different faculty member must supervise each course.

NEUROSCI 3E03 - NEUROSCIENCE LAB

Practical techniques in neuroanatomy and neurophysiology, including brightfield and fluorescence microscopy, neuronal visualization via staining, and invertebrate neurophysiological recording.

One lecture, one lab (three hours); one term

Prerequisite(s): PNB 2XB3 and registration in Level III or above of Honours Neuroscience

NEUROSCI 3J03 - VISUAL NEUROSCIENCE

Using human clinical cases, students will explore how genes and the environment affect the cells and circuits of the visual system. Cases will be investigated through the lenses of basic animal research and optometry.

Three lectures; one term

Prerequisite(s): One of PNB 2XB3, PSYCH 2E03, ISCI 2A18 A/B, or LIFESCI 2CC3; and registration in Level III or above of an Honours program

Antirequisite(s): PSYCH 3J03

NEUROSCI 3SN3 - NEURAL CIRCUITS

Circuit- and systems-level neuroscience. Role of cellular properties, synapses, and connectivity in establishing neural circuits, focusing on themes of plasticity and sensory processing.

Three lectures; one term

Prerequisite(s): BIOLOGY 2A03, 2B03 and one of LIFESCI 2CC3, PNB 2XB3; or ISCI 2A18 A/B; or BIOLOGY 3P03

Antirequisite(s): PSYCH 3SN3

NEUROSCI 4L09 A/B - NEUROSCIENCE THESIS

A research project conducted under the supervision of a faculty member affiliated with the Honours Neuroscience program.

Prerequisite(s): Registration in Level IV of Honours Neuroscience with a GPA of at least 8.5 and permission of faculty supervisor and program director

Antirequisite(s): BIOLOGY 4C09 A/B S, 4C12 A/B, 4F06 A/B S, NEUROSCI 4L12 A/B, PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B

Cannot be taken concurrently with PNB 4SC6 A/B.

NEUROSCI 4L12 A/B - NEUROSCIENCE SENIOR THESIS

A research project conducted under the supervision of a faculty member affiliated with the Honours Neuroscience program.

Prerequisite(s): Registration in Level IV of Honours Neuroscience with a GPA of at least 9.0 and permission of faculty supervisor and program director

Antirequisite(s): BIOLOGY 4C09 A/B S, 4C12 A/B, 4F06 A/B S, NEUROSCI 4L09 A/B, PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B

Cannot be taken concurrently with PNB 4SC6 A/B.

NEUROSCI 4S03 A/B - NEUROSCIENCE SEMINAR

An advanced seminar focussing on original research articles in cellular/molecular, systems/circuits, and behavioural/cognitive neuroscience.

One seminar (one and one-half hours); two terms

Prerequisite(s): Registration in Level IV of Honours Neuroscience or permission of instructor

Prerequisite(s) (EFFECTIVE 2020-2021): NEUROSCI 3E03, 3SN3 and registration in Level IV of Honours Neuroscience program or permission of the instructor

NURSING

Courses in Nursing are administered by the School of Nursing.

Health Sciences Centre, Room 2J16, ext. 22407

<http://www.fhs.mcmaster.ca/nursing/>

Courses

See also courses in *COLLAB (Nursing Consortium (A) Stream)*.

NURSING 1F03 - INTRODUCTION TO NURSING AND HEALTH I FOR BASIC STREAM

This introductory course will familiarize students with ways of knowing in nursing. Students will learn self-directed and person-based learning within a problem-based learning approach to facilitate their learning throughout the B.Sc.N. program.

Tutorial (three hours); one term

Prerequisite(s): Registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 1I02

NURSING 1G03 - INTRODUCTION TO NURSING AND HEALTH II FOR BASIC STREAM

Students will be introduced to concepts of health and healing and will explore group process theory. They will learn to define clinical questions relevant to nursing and to use evidence-based approach to address these questions.

Tutorial (three hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 1F03, 1I02 and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 1J02

NURSING 1I02 - INTRODUCTION TO NURSING PRACTICE FOR BASIC STREAM

This course introduces students to the scope of professional practice and the meaning of caring in nursing. Students will learn beginning assessment, communication, and intervention skills in the clinical laboratory.

Tutorial and clinical lab (four hours); one term

Prerequisite(s): Registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 1F03 and WHMIS 1A00

NURSING 1J02 - PROFESSIONAL NURSING PRACTICE I FOR BASIC STREAM

Students will extend their knowledge of professional practice in the clinical laboratory focusing on healthy adults. Students will apply knowledge of growth and development, professional relationships and narrative enquiry to healthy persons across the lifespan. Tutorial and clinical lab (four hours); one term

Prerequisite(s): WHMIS 1A00 and a minimum grade of C- in NURSING 1F03, 1I02 and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 1G03

NURSING 1K02 A/B - COMMUNITY ENGAGEMENT AND CITIZENSHIP FOR BASIC STREAM

Health and well-being are explored from multiple perspectives. Students will explore professional responsibilities of civic engagement.

32 hours service learning, twelve seminars (one hour each); two terms

Prerequisite(s): Registration in the B.Sc.N. Basic (A) Stream

This course is evaluated on a Pass/Fail basis.

NURSING 2A04 - INTRODUCTION TO PROFESSIONAL RN PRACTICE I FOR POST DIPLOMA RPN STREAM

Students are introduced to self-directed, person-based learning in a problem-based learning approach. Role differences between R.P.N. and R.N. are explored. Biological, physical, psychological, social science and nursing theories/ concepts are integrated and applied to health care problems and clinical practice.

Tutorials (three hours); guided self-study (one hour); one term

Prerequisite(s): Registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream

Co-requisite(s): WHMIS 1A00

NURSING 2AA3 - PROFESSIONAL RN PRACTICE II FOR POST DIPLOMA RPN STREAM

Theories/concepts from a variety of disciplines are integrated and applied to complex health care scenarios. Nursing concepts related to health and illness across the continuum of individual and family growth and development are examined.

Tutorial (three hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2A04 and registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream

Antirequisite(s): NURSING 2AA4

NURSING 2I04 - INTRODUCTION TO PROFESSIONAL NURSING AND HEALTH FOR ACCELERATED STREAM

Students will be introduced to core concepts related to nursing and health through problem-based tutorials. Biological, physical, psychological, social science and nursing theories/concepts are integrated and applied to health care problems.

Tutorial (four hours); one term

Prerequisite(s): Registration in the B.Sc.N. Accelerated (F) Stream

Co-requisite(s): NURSING 2PF3 A/B or HTHSCI 2PF3 A/B

NURSING 2J04 - PROFESSIONAL NURSING PRACTICE II FOR ACCELERATED STREAM

Nursing concepts basic to health and illness are examined across the continuum of individual and family growth and development. Planned and guided experiences are provided in the clinical laboratory and acute care institutions.

Clinical lab and professional practice (12 hours); one term

Prerequisite(s): WHMIS 1A00, and minimum grade of C- in NURSING 2U04 and registration in the B.Sc.N. Accelerated (F) Stream

Co-requisite(s): NURSING 2V04

This course is evaluated on a Pass/Fail basis.

NURSING 2L03 - PROFESSIONAL NURSING PRACTICE II FOR BASIC STREAM

This course is an applied professional practice course. Students will begin to apply their knowledge and skills to the care of ill clients and families, under supervision. Students will expand their understanding of internal and external influences on the health of individuals and families at the micro and macro level.

Professional practice and clinical lab (eight hours); one term

Prerequisite(s): WHMIS 1A00 and a minimum grade of C- in NURSING 1G03, 1J02, HTHSCI 1H06 A/B, 1LL3 and a Pass in NURSING 1K02 A/B and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 2MM3

This course is evaluated on a Pass/Fail basis.

NURSING 2MM3 - NURSING CONCEPTS IN HEALTH AND ILLNESS I FOR BASIC STREAM

This course uses a person-based learning within problem-based approach in which students will expand their knowledge of core nursing concepts and will enhance their ability to critique that knowledge.

Tutorial (three hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 1G03, 1J02. HTHSCI 1H06 A/B, 1LL3 and a Pass in NURSING 1K02 A/B and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 2L03

NURSING 2NN3 - NURSING CONCEPTS IN HEALTH AND ILLNESS II FOR BASIC STREAM

An extension of NURSING 2MM3, students will deepen their understanding and application of relevant nursing concepts.

Tutorial (three hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2MM3 and a Pass in NURSING 2L03 and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 2P03, and NURSING 2LA2 A/B or HTHSCI 2LA2 A/B

NURSING 2P03 - PROFESSIONAL NURSING PRACTICE III FOR BASIC STREAM

A continuation of NURSING 2L03 with applied professional practice in institutional settings.

Professional practice and clinical lab (eight hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2MM3 and a Pass in NURSING 2L03 and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 2NN3

This course is evaluated on a Pass/Fail basis.

NURSING 2U04 - INTRODUCTION TO NURSING PRACTICE I FOR ACCELERATED STREAM

This course focuses on the acquisition of foundational clinical and reasoning skills. History taking, nurse patient relationship, physical assessment and clinical reasoning are introduced.

Problem-based tutorials and clinical lab (four hours); one term

Prerequisite(s): Registration in the B.Sc.N. Accelerated (F) Stream

Co-requisite(s): WHMIS 1A00

NURSING 2V04 - NURSING CONCEPTS IN HEALTH & ILLNESS FOR ACCELERATED STREAM

In this people-based learning within problem-based learning course students will apply knowledge of core nursing and interprofessional healthcare content to individuals, families and communities in increasingly complex situations. Through independent learning and group learning, students will analyze professional practice situations from a variety of perspectives, and apply principles of evidence-based /best practice guidelines in their plan of care.

Tutorial (four hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2I04 and registration in the B.Sc.N. Accelerated (F) Stream

Co-requisite(s): NURSING 2J04

NURSING 3A04 - CLINICAL REASONING IN RN PRACTICE FOR POST DIPLOMA RPN STREAM

This course focuses on the development of clinical reasoning and clinical judgment for RN practice. Clinical assessment and evidence informed decisions making skills are applied to simulated patients, virtual clinical scenarios and clinical simulation experiences.

Seminar activities supported by clinical lab as applicable (four hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2AA3, HTHSCI 2C06, 2RR3, 3C04, Pass in NURSING 3QQ3, and registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream

Antirequisite(s): NURSING 2T04

NURSING 3QQ3 - PROFESSIONAL COMMUNITY NURSING PRACTICE

A professional practice course in which students learn about community as client by promoting health of communities.

Professional practice (six hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2NN3, HTHSCI 2H03, 2HH3, 2RR3, and a minimum grade of C- in NURSING 2LA2 A/B or HTHSCI 2LA2 A/B, and a Pass in NURSING 2K02 A/B, 2P03, and registration in the B.Sc.N. Basic (A) Stream; or registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream; or minimum grade of C- in NURSING 2V04, HTHSCI 2H03, 2HH3, 2RR3, 3C04, and a minimum grade of C- in NURSING 2PF3 A/B or HTHSCI 2PF3 A/B, and a Pass in NURSING 2J04, and registration in the B.Sc.N. Accelerated (F) Stream

Co-requisite(s): NURSING 2A04 or 2AA3 or 3SS3 or 3TT3 or 3V03

This course is evaluated on a Pass/Fail basis.

NURSING 3RS3 - NURSING CONCEPTS IN HEALTH AND ILLNESS III FOR POST DIPLOMA RPN STREAM

Knowledge of core nursing and interprofessional health care content to individuals, families and communities in increasingly complex situations, analyzing professional practice situations from a variety of perspectives.

Tutorial (three hours); one term

Prerequisite(s): minimum grade of C- in NURSING 2A04, 2RR3, and registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream

Co-requisite(s): ; NURSING 3PA2 A/B or HTHSCI 3PA2 A/B, and either NURSING 3YR4 or 3QQ3 for the B.Sc.N. Post Diploma R.P.N. (E) Stream

NURSING 3RT3 - NURSING CONCEPTS IN HEALTH AND ILLNESS IV FOR POST DIPLOMA RPN STREAM

An extension of NURSING 3RS3, students will expand their knowledge of core nursing and interprofessional health care content to individuals, families and communities in increasingly complex situations, analyzing professional practice situations from a variety of perspectives.

Tutorial (three hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 3RS3, and a Pass in either NURSING 3QQ3 or 3Y04, and registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream

Co-requisite(s): NURSING 3PA2 A/B or HTHSCI 3PA2 A/B, and either NURSING 3QQ3 or 3RY4 for the B.Sc.N. Post Diploma R.P.N. (E) Stream

NURSING 3RY4 - PROFESSIONAL NURSING PRACTICE V FOR POST DIPLOMA RPN STREAM

This is an applied professional practice course in which students gain confidence in their emerging professional practice through a guided clinical practice in increasingly complex and diverse settings.

Professional practice (twelve hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2AA3, HTHSCI 3C04, HTHSCI 2C06, 2RR3 and registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream

Co-requisite(s): NURSING 3RS3 or NURSING 3RT3 for the B.Sc.N. Post Diploma R.P.N. (E) Stream

This course is evaluated on a Pass/Fail basis.

NURSING 3SS3 - NURSING CONCEPTS IN HEALTH AND ILLNESS III FOR BASIC STREAM

A continuation of NURSING 2NN3, students will apply deepening knowledge of core nursing and interprofessional health care content to individuals, families and communities in increasingly complex situations, analyzing professional practice situations from a variety of perspectives.

Tutorial (three hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2NN3, HTHSCI 2H03, 2HH3, 2RR3, and a minimum grade of C- in NURSING 2LA2 A/B or HTHSCI 2LA2 A/B, and a Pass in NURSING 2K02 A/B, 2P03, and registration in the B.Sc.N. Basic (A) Stream;

Co-requisite(s): NURSING 3X04 and either NURSING 3PA2 A/B or HTHSCI 3PA2 A/B for the B.Sc.N. Basic (A) Stream

NURSING 3TT3 - NURSING CONCEPTS IN HEALTH AND ILLNESS IV FOR BASIC STREAM

An extension of NURSING 3SS3, students will apply deepening knowledge of core nursing and interprofessional health care content to individuals, families and communities in increasingly complex situations, analyzing professional practice situations from a variety of perspectives.

Tutorial (three hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 3SS3, and a Pass in NURSING 3X04, and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 3Y04 and either NURSING 3PA2 A/B or HTHSCI 3PA2 A/B for the B.Sc.N. Basic (A) Stream; or either NURSING 3PA2 A/B or HTHSCI 3PA2 A/B, and either NURSING 3QQ3 or 3Y04 for the B.Sc.N. Post Diploma R.P.N. (E) Stream

NURSING 3V03 - NURSING CONCEPTS IN HEALTH & ILLNESS FOR ACCELERATED STREAM II

An extension of NURSING 2V04, students will apply deepening knowledge of core nursing and inter-professional health care content to individuals, families and communities in increasingly complex situations. Through independent and group learning students will analyze professional practice situations from a variety of perspectives, and apply principles of evidence-based /best practice guidelines in their plan of care.

Tutorial (three hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2V04, HTHSCI 2H03, HTHSCI 2HH3, 2RR3, 3C04 and a minimum grade of C- in NURSING 2PF3 A/B or HTHSCI 2PF3 A/B, and a Pass in NURSING 2J04 and registration in the B.Sc.N. Accelerated (F) Stream

Antirequisite(s): NURSING 3SS3, 3TT3

Co-requisite(s): NURSING 3ZA3, 3ZB3, 3ZB3, and either NURSING 3PF1 or HTHSCI 3PF1

NURSING 3X04 - PROFESSIONAL NURSING PRACTICE IV

This is an applied professional practice course in which students gain confidence in their emerging professional practice through a guided clinical practice in increasingly complex and diverse settings.

Professional practice and clinical lab (twelve hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2NN3, HTHSCI 2H03, 2HH3, 2RR3, and a minimum grade of C- in NURSING 2LA2 A/B or 2LA2 A/B, and a Pass in NURSING 2K02 A/B , 2P03, and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 3SS3

This course is evaluated on a Pass/Fail basis.

NURSING 3Y04 - PROFESSIONAL NURSING PRACTICE V

This is an applied professional practice course in which students gain confidence in their emerging professional practice through a guided clinical practice in increasingly complex and diverse settings.

Professional practice (twelve hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 3SS3, HTHSCI 2H03, 2HH3, 2RR3, and a minimum grade of C- in NURSING 2LA2 A/B or HTHSCI 2LA2 A/B, and a Pass in NURSING 2K02 A/B, 3X04 and registration in the B.Sc.N. Basic (A) Stream

Co-requisite(s): NURSING 3TT3 the B.Sc.N. Basic (A) Stream; or NURSING 3SS3

This course is evaluated on a Pass/Fail basis.

NURSING 3ZA3 - PROFESSIONAL NURSING PRACTICE III FOR ACCELERATED STREAM

This is an applied professional practice course in which students gain confidence in their emerging professional practice through a guided clinical practice in increasingly complex and diverse settings.

Professional practice and clinical lab (eighteen hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 2V04, HTHSCI 2H03, 2HH3, 2RR3, 3C04 and a minimum grade of C- in NURSING 2PF3 A/B or HTHSCI 2PF3 A/B, and a Pass in NURSING 2J04 and registration in the B.Sc.N. Accelerated (F) Stream

Antirequisite(s): NURSING 3X04

Co-requisite(s): NURSING 3V03

This course is evaluated on a Pass/Fail basis.

NURSING 3ZB3 - PROFESSIONAL NURSING PRACTICE IV FOR ACCELERATED STREAM

This is an applied professional practice course in which students gain confidence in their emerging professional practice through a guided clinical practice in increasingly complex and diverse settings.

Professional practice and clinical lab (eighteen hours); one term

Prerequisite(s): Pass in NURSING 3ZA3 and registration in the B.Sc.N. Accelerated (F) Stream

Antirequisite(s): NURSING 3Y04

Co-requisite(s): NURSING 3V03

This course is evaluated on a Pass/Fail basis.

NURSING 4B06 A/B S - LEADERSHIP AND MANAGEMENT

Introduction to theories and methods of interprofessional leadership and management integrating nursing and health care and management disciplines. Offered in on-site tutorial, distance education webconference online and independent study formats. A certificate of completion is granted upon successful completion of the course.

Tutorial or equivalent (four hours); independent study in workplace (six hours); one term

Prerequisite(s): Registered Nurse or health care professional with a minimum of one year clinical experience and permission of the instructor

Antirequisite(s): HTHSCI 4E06

NURSING 4DD6 A/B S - ADVANCED LEADERSHIP AND MANAGEMENT

This advanced course builds upon NURSING 4B06 content. It integrates theories and research in leadership and management to enhance the health care provider's knowledge of key issues in today's workplace.

Tutorial or equivalent (four hours), independent study in an organization (six hours); one term

Prerequisite(s): NURSING 4B06 A/B S

Antirequisite(s): HTHSCI 4DD6 A/B S

NURSING 4FF3 A/B S - INTEGRATIVE LEADERSHIP PROJECT

Students integrate learning and demonstrate a leadership role in addressing a real health care issue. Students work with both a tutor and a health care leader to address a mutually agreed upon leadership issue in the workplace.

Seminar and clinical lab (three hours); one term

Prerequisite(s): NURSING 4B06 A/B S, 4DD6 A/B S, 4I03 A/B S, 4HH3 A/B S, 4Z03 A/B S

Antirequisite(s): HTHSCI 4FF3 A/B S

NURSING 4H03 - INTRODUCTION TO CONCEPTS IN GLOBAL HEALTH

An introduction to the determinants of inequalities in the health of select populations in Canadian and international contexts as viewed through the lenses of historical development, political economy and medical anthropology.

Lecture/seminar (three hours); one term

Prerequisite(s): HTHSCI 2RR3; and registration in Level III or above in any Stream of the B.Sc.N. Program or permission of the instructor

Antirequisite(s): COLLAB 4H03, HTHSCI 4H03

NURSING 4HH3 A/B S - QUALITY MANAGEMENT

This course focuses on the role of leadership in quality management in health care organizations. Theories, concepts and best practices are utilized to examine issues in the health care work environments. Concepts studied include patient safety, safety culture, benchmarks and scorecards, program evaluation and risk/utilization management.

Lecture/seminar (three hours); one term

Prerequisite(s): Registered Nurse or health care professional and permission of the instructor

Antirequisite(s): HTHSCI 4HH3 A/B S

NURSING 4I03 A/B S - LEADING INTERPROFESSIONAL TEAMS

This course studies types and structures of interprofessional teams in health care organizations. Theories and concepts related to leadership, communication and health systems are applied in the current work environment.

Problem-based tutorial or equivalent (three hours); one term

Prerequisite(s): Registered Nurse or health care professional and permission of the instructor

Antirequisite(s): HTHSCI 4I03 A/B S

NURSING 4J07 - PROFESSIONAL NURSING PRACTICE VI

This course focuses on the application of theory and concepts to clinical practice, including the introduction to the leadership role in patient care. Students are individually placed in a variety of health-care settings.

Professional practice (24 hours per week); one term

Prerequisite(s): Minimum grade of C- in NURSING 3TT3, HTHSCI 2S03, 3BB3, and a minimum grade of C- in NURSING 3PA2 A/B or HTHSCI 3PA2 A/B, and a Pass in NURSING 3QQ3, 3Y04, and registration in any Stream of the B.Sc.N. Basic (A) Stream; or a minimum grade of C- in NURSING 3TT3, HTHSCI 2S03, and a minimum grade of C- in NURSING 3PA2 A/B or HTHSCI 3PA2 A/B, and a Pass in NURSING 3QQ3, 3Y04, and registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream Program; or a minimum grade of C- in NURSING 3V03, and a minimum

grade of C- in NURSING 3PF1 or HTHSCI 3PF1, and a Pass in NURSING 3QQ3, 3ZB3, and registration in the B.Sc.N. Accelerated (F) Stream

Co-requisite(s): NURSING 4P04

This course is evaluated on a Pass/Fail basis.

NURSING 4K10 - PROFESSIONAL PRACTICE AND THE NEW GRADUATE

As an applied professional practice course, students focus on the integration and application of research, theory and concepts to professional practice, including an introduction to the leadership role in client care. Students are individually placed in a variety of contexts, where they are actively involved in the enactment of the nursing role.

Professional practice (24 hours for six weeks, 35-36 hours for six - seven weeks); one term

Prerequisite(s): Minimum grade of C- in NURSING 4P04, and a Pass in NURSING 4J07, and registration in any Stream of the B.Sc.N. Program

Antirequisite(s): NURSING 4K07

Co-requisite(s): NURSING 4Q03

This course is evaluated on a Pass/Fail basis.

NURSING 4P04 - ADVANCED NURSING CONCEPTS I

This course is designed to allow students to explore first hand some of the facets and elements of the act of leading in the everyday world of professional nursing. The focus on leading will be on the challenges and issues of nurses' work. This course engages students in learning about the meaning of leading through influence. Tutorial (three and one half hours); one term

Prerequisite(s): Minimum grade of C- in NURSING 3TT3, HTHSCI 2S03, 3BB3, and a minimum grade of C- in NURSING 3PA2 A/B or HTHSCI 3PA2 A/B, and a Pass in NURSING 3QQ3, 3Y04 and registration in the B.Sc.N. Basic (A) Stream program; or minimum grade of C in NURSING 3TT3, HTHSCI 2S03, and a minimum grade of C- in NURSING 3PA2 A/B or HTHSCI 3PA2 A/B, and a Pass in NURSING 3QQ3, 3Y04 and registration in the B.Sc.N. Post Diploma R.P.N. (E) Stream; or a minimum C- in NURSING 3V03, and a minimum grade of C- in NURSING 3PF1 or HTHSCI 3PF1, and a Pass in NURSING 3QQ3, 3ZB3, and registration in the B.Sc.N. Accelerated (F) Stream

Co-requisite(s): NURSING 4J07

NURSING 4Q03 - ADVANCED NURSING CONCEPTS II

This course engages students in exploring the meaning of becoming a nurse. Transitioning into this role draws upon their understanding of what nursing is and the possibilities for action in professional practice involvements. This course also provides learning activities that accentuate the exploration of becoming a professional, interprofessional collaboration, and self-regulation.

Tutorial (six hours, six weeks); one term

Prerequisite(s): Minimum grade of C- in NURSING 4P04, and a Pass in NURSING 4J07, and registration in any Stream of the B.Sc.N. Program

Antirequisite(s): NURSING 4Q04

Co-requisite(s): NURSING 4K10

NURSING 4Z03 A/B S - CONFLICT MANAGEMENT

This course explores types and processes of conflict in health care organizations. Application of theories and principles of conflict and negotiations to situations in the health care environment.

Tutorial (three hours); one term

Prerequisite(s): A minimum of one year clinical work experience in a health care profession and permission of the instructor

Antirequisite(s): HTHSCI 4Z03 A/B S

OJIBWE

Courses in Ojibwe are administered by the Indigenous Studies Program.

L.R. Wilson Hall, Room 1811, ext. 23788

<https://indigenous.mcmaster.ca>

Courses

If no prerequisite is listed, the course is open.

OJIBWE 1Z03 - INTRODUCTION TO OJIBWE LANGUAGE AND CULTURE

This course will study the Ojibwe language, in its spoken and written forms, in the context of Ojibwe cultural traditions, values, beliefs and customs.

Lecture and seminars (three hours); one term

OJIBWE 2Z03 - INTERMEDIATE OJIBWE

This course expands on the vocabulary and the oral skills for the Ojibwe language. In addition, the course reviews the written component of the language.

Lecture and seminars (three hours); one term

Prerequisite(s): OJIBWE 1Z03

PEACE STUDIES

Courses in Peace Studies are administered by the Office of Interdisciplinary Studies.

Togo Salmon Hall, Room 721, ext. 27734

<http://peacestudies.humanities.mcmaster.ca/>

Courses

If no prerequisite is listed, the course is open.

PEACEST 1A03 - INTRODUCTION TO PEACE STUDIES

An introduction to the discipline of peace research, focusing on the concepts of peace, war, security, conflict, violence and nonviolence, and examining the roles of values and ideologies in the attainment of peace.

Two lectures, one tutorial (three hours); one term

PEACEST 2A03 - CONFLICT TRANSFORMATION: THEORY AND PRACTICE

An examination of ways of preventing, resolving and transforming conflicts in everyday life, in our own culture and others, and in the arenas of family, business, the law, schools and large-scale political conflicts.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

PEACEST 2B03 - HUMAN RIGHTS AND SOCIAL JUSTICE

An introduction to the growing national and international discussion of human rights, exploring the value and limitations of universal rights, equality under the law and social justice.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): PEACEST 1A03; or WOMENST 1A03 or 1AA3; or registration in Level II or above of a program in Indigenous Studies, Labour Studies, Peace Studies or Justice, Political Philosophy and Law

Antirequisite(s): WOMENST 2A03

Cross-list(s): LABRST 2W03

PEACEST 2BB3 - INTRODUCTION TO THE STUDY OF WAR

A Peace Studies approach to the study of war, including the effects of war on people, societies and the earth. War prevention processes will be examined at the levels of interstate and state politics, social movements, and individual peace.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): PEACEST 1A03 and registration in Level II or above; or registration in a program in Peace Studies or Justice, Political Philosophy and Law

PEACEST 2C03 - PEACE AND POPULAR CULTURE

This course conveys concepts of peace in popular culture in selected periods and places, with emphasis on the post-WWII period, and including contemporary manifestations.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): Registration in Level II or above

PEACEST 2E03 - PEER-TO-PEER PROBLEM-BASED INQUIRY: ARCHIVAL PEACE RESEARCH

What is considered evidence in archival research? This question will be investigated in student-led, peer-to-peer problem-based inquiry, emphasizing use of primary sources such as the Russell Archives and other peace-related archival collections at McMaster.

Three hours; one term

Prerequisite(s): PEACEST 1A03 and permission of the Director of Peace Studies

PEACEST 2LS3 - LANGUAGE AND SOCIETY

An introduction to sociolinguistics covering such topics as linguistic variation (regional, social, situational), language and gender, language and disadvantage/power, language choice, language change, pidgin and creole languages.

Three hours; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 3G03, LINGUIST 3X03

Cross-list(s): LINGUIST 2S03

This course is administered by the Department of Linguistics and Languages

PEACEST 3B03 - PEACE-BUILDING AND HEALTH INITIATIVES

An examination of the multiple links between health and peace, concentrating on social determinants; conflict reduction; food, sanitation and water supplies; and violence prevention; in crisis and non-crisis situations.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

PEACEST 3C03 - RESEARCH METHODS FOR PEACE STUDIES

Introduction to applied research methods for peace studies and exploration of peace research applications.

Seminar (two hours); one term

Prerequisite(s): At least six units of Peace Studies; and registration in Level III or above of a program in Peace Studies; and permission of the Director of Peace Studies

PEACEST 3D03 - GLOBALIZATION AND PEACE

Investigation of complex systems approaches to understanding how social-cultural-ecological change influences globalization and peace.

Seminar (two hours); one term

Prerequisite(s): At least six units of Peace Studies, and registration in Level III or above; or registration in Level III or above of the Justice, Political Philosophy and Law program

PEACEST 3GG3 - THEORIES OF DECOLONIZATION AND RESISTANCE

A study of theoretical and cultural works that examine the effects of empire and chart projects for decolonization. Introduces debates in Indigenous and postcolonial studies, including as they engage with theories of racial capitalism, gender and sexuality, globalization, war, environmental change.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

Antirequisite(s): CSCT 3R06 A/B, ENGLISH 3R06 A/B, PEACEST 3E06 A/B

Cross-list(s): ENGLISH 3GG3

This course is administered by the Department of English and Cultural Studies

PEACEST 3P03 - PRACTICUM I: PRACTICAL PEACE BUILDING

Exploration of service, entrepreneurship, and other modes of engagement with practical peace building through workplace experience.

Student-initiated voluntary placement for one day per week under supervised practice; one term

Prerequisite(s): At least six units of Peace Studies; and registration in Level III or above of a program in Peace Studies; and permission of the Director of Peace Studies
This course is evaluated on a Pass/Fail basis.

PEACEST 3PA3 A/B S - PRACTICUM II: PRACTICAL PEACE BUILDING

Exploration of service, entrepreneurship, and other modes of engagement with practical peace building through workplace experience.

Student-initiated voluntary placement for one day, every second week under supervised practice; two terms

Prerequisite(s): At least six units of Peace Studies; and registration in Level III or above of a program in Peace Studies; and permission of the Director of Peace Studies
This course is evaluated on a Pass/Fail basis.

PEACEST 3Q03 - PHILOSOPHY OF LAW

An investigation of the nature of law and of issues arising within legal systems. These issues include legal reasoning, equality, legal insanity, punishment, and the Charter of Rights and Freedoms.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above

Cross-list(s): PHILOS 3Q03

This course is administered by the Department of Philosophy

PEACEST 3W03 - CONTEMPORARY NATIVE LITERATURE IN CANADA

A study of significant works by Native writers who give voice to their experience in Canada. Issues examined include appropriation of voice, native identity, women in indigenous societies, and stereotyping.

Three hours (lectures and seminars); one term

Prerequisite(s): Six units of Level II Indigenous Studies or six units of Level II English or permission of the instructor

Antirequisite(s): CSCT 3W03

Cross-list(s): ENGLISH 3W03, INDIGST 3D03

This course is administered by Indigenous Studies.

PEACEST 3X03 - CONTEMPORARY NATIVE LITERATURE IN THE UNITED STATES

A study of contemporary works by Native writers in the United States within the context of American society and Post-Modern and Post-Colonial Literary Theory.

Three hours (lectures and seminars); one term

Prerequisite(s): Six units of Level II Indigenous Studies or six units of Level II English or permission of the instructor

Antirequisite(s): CSCT 3X03

Cross-list(s): ENGLISH 3X03, INDIGST 3E03

This course is administered by Indigenous Studies.

PEACEST 3XX3 - HUMAN RIGHTS IN HISTORY

A thematic examination of the global historical evolution of the notion of human rights from antiquity up to the Universal Declaration of Human Rights in the 20th century.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): HISTORY 3XX3

May be offered in person or online.

This course is administered by the Department of History

PEACEST 3Y03 - SPECIAL TOPICS IN PEACE STUDIES

Consult the Peace Studies Office for the topic to be offered.

Seminar (three hours); one term

Prerequisite(s): Registration in Level III or IV of the Combined Honours in Peace Studies Program

PEACEST 3Y03 may be repeated, if on a different topic, to a total of six units.

PEACEST 4A03 - RESEARCH SEMINAR

An interdisciplinary examination of selected topics of current relevance to peace research.

Seminar (two hours); one term.

Prerequisite(s): Registration in Level III or IV of the Combined Honours in Peace Studies Program

PEACEST 4B03 - INDEPENDENT RESEARCH

Students develop and execute their own research projects, in regular consultation with a faculty supervisor, and produce and orally defend a substantial paper. May include a practicum component.

Prerequisite(s): Registration in Level III or IV of the Combined Honours in Peace Studies Program with a Grade Point Average of at least 8.5, and permission of the Director of Peace Studies

PEACEST 4FC3 - EXPERIENTIAL LEARNING, THEORY AND PRACTICE

Intensive experiential learning: examining theory and practice in situ through action learning and/or action research. Preparatory instruction on campus will precede field work and/or travel. Students and project-partners will explore problem-based learning opportunities.

Prerequisite(s): Registration in Level III or IV of any program and permission of the instructor

Offered during the Spring/Summer term only.

PEACEST 4G03 - PEACE THROUGH HEALTH: PRAXIS

Exploring global perspectives of peace through health, addressing social determinants of health, gender and environment, and examining individual and institutional leadership, using problem-based and experiential learning.

Seminar (two hours); one term

Prerequisite(s): One of PEACEST 1A03 or 2C03; and registration in Level IV of a program in Peace Studies; or permission of the Director of Peace Studies

PEACEST 4GG3 - NATION AND GENOCIDE IN THE MODERN WORLD

A thematic study of genocide and mass murder in the twentieth century from a human rights perspective. The first part of the course covers the theoretical and legal aspects of genocide studies. The second part explores specific case studies of colonial massacres, the Holocaust, and the Cambodian and Rwandan genocides.

Prerequisite(s): Registration in Level III or IV of any Honours program in History or Peace Studies

Cross-list(s): HISTORY 4G03

Departmental permission required.

This course is administered by the Department of History

PEACEST 4J03 - INTERNATIONAL LAW, PEACE AND ECOLOGY

Selected problems and processes of international law linking culture and ecology and exploring the consequences for peace.

Seminar (two hours); one term

Prerequisite(s): One of PEACEST 1A03 or PEACEST 2C03; and registration in Level IV of a program in Peace Studies; or permission of the Director of Peace Studies

PEACEST 4L03 - PEACE, ENVIRONMENT AND HEALTH

Selected environmental issues influencing peace and health. Topics may include social, ecological and economic perspectives on global change, biodiversity and water issues locally and globally.

Seminar (two hours); one term

Prerequisite(s): One of PEACEST 1A03 or 2C03; and registration in Level IV of a program in Peace Studies; or permission of the Director of Peace Studies

PEACEST 4MA3 - FORENSIC ARCHIVAL RESEARCH IN CONFLICT AND PEACE I

Practical forensic uses of archival resources as evidence in reconstructing, reconciling and making meaning in the context of contemporary conflicts from historical roots. Problem-based inquiry emphasizing engagement through peace and conflict research.

Seminar (two hours); one term

Prerequisite(s): At least six units of Peace Studies; and registration in Level IV of a program in Peace Studies; and permission of the Director of Peace Studies
Non-program students will be accommodated when possible.

PEACEST 4MB3 - FORENSIC ARCHIVAL RESEARCH IN CONFLICT AND PEACE II

Advanced practical forensic uses of archival resources as evidence in reconstructing, reconciling and making meaning in the context of contemporary conflicts from historical roots and post-conflict peacebuilding. Problem-based inquiry emphasizing engagement and critical analysis through peace and conflict research.

Seminar (two hours); one term

Prerequisite(s): Successful completion of PEACEST 4MA3; at least six units of Peace Studies; and registration in Level IV of a program in Peace Studies; and permission of the Director of Peace Studies

Non-program students will be accommodated when possible.

PHARMACOLOGY

Courses in Pharmacology are administered by the Honours Biology & Pharmacology Co-op Program, Faculty of Health Sciences, Health Sciences Centre Room 2E21A, ext. 22312.

<https://healthsci.mcmaster.ca/biopharm>

biopharm@mcmaster.ca

PHARMAC courses are available only to those students registered in Honours Biology and Pharmacology.

Note

PHARMAC 3A06 A/B, 3B06 A/B, 4A03, 4AA3, 4C03, 4D03 and 4E03 will be based on self-directed problem based learning.

Courses

PHARMAC 3A06 A/B - INTRODUCTION TO PHARMACOLOGY

Principles of pharmacodynamics, principles of pharmacokinetics. Drugs acting on the CNS, female reproductive system, autonomic nervous system and respiratory system. Antimicrobials. Course teaches skills needed to perform effectively in a problem-based learning environment, critically read literature, and design a clinical trial.

One tutorial (three hours); two terms

Prerequisite(s): Registration in the Honours Biology and Pharmacology Co-op (B.H.Sc.) program

PHARMAC 3B06 A/B - METHODS IN PHARMACOLOGY

Laboratory course with extensive teaching and guidance by teaching assistants. Experimental methods for the study of drugs in vitro. Interpretation and communication of experimental data. Design and conducting a Discovery Project at an academic laboratory.

One lab (three hours); two terms

Prerequisite(s): Credit or registration in PHARMAC 3A06 A/B

PHARMAC 4A03 - RECEPTOR-DRUG INTERACTIONS

Receptor classification, receptor theory, stimulus response coupling, second messengers.

One tutorial (three hours); one term

Prerequisite(s): PHARMAC 3A06 A/B

PHARMAC 4AA3 - ADVANCED TOPICS IN PHARMACOLOGY

New developments in pharmacology, with an emphasis on mechanisms of drug action.

One tutorial (three hours); one term

Prerequisite(s): PHARMAC 4A03

PHARMAC 4C03 - PRINCIPLES OF TOXICOLOGY

General principles of toxicology, adverse effects of selected agents on humans and other organisms. This course includes learning skills related to oral presentations and making and presenting a poster presentation.

One tutorial (three hours); one term

Prerequisite(s): PHARMAC 3A06 A/B

PHARMAC 4D03 - DRUG DESIGN

Principles of drug design based on drug transport, metabolism and selectivity of action at the target sites with emphasis on quantitative structure-activity relationships.

One tutorial (three hours); one term

Prerequisite(s): PHARMAC 3A06 A/B, 4A03

PHARMAC 4E03 - SOCIAL PHARMACOLOGY

Epidemiological analysis of drug use in humans; adverse drug reactions; legal and economic aspects of drug utilization, prescribing patterns in national and international contexts.

One tutorial (three hours); one term

Prerequisite(s): PHARMAC 3A06 A/B

PHARMAC 4F09 - SENIOR THESIS

A thesis based upon a research project carried out under the direction of a supervisor approved by the Program Director.

Prerequisite(s): PHARMAC 3A06 A/B

Not open to students with credit or registration in any Level IV department- or program-based thesis or independent study/project course.

This course will last be offered in 2019-20.

PHARMAC 4T12 - SENIOR THESIS

A thesis based upon a research project carried out under the direction of a supervisor approved by the Program Director.

Prerequisite(s): PHARMAC 3A06 A/B

PHILOSOPHY

Courses in Philosophy are administered by the Department of Philosophy.
University Hall, Room 310, ext. 26445

<http://philos.humanities.mcmaster.ca/>

Department Notes

1. The Department of Philosophy offers courses in all major areas of Philosophy, namely History of Philosophy, Logic, Ethics and Theory of Value, Legal and Political Philosophy, and Theory of Knowledge and Metaphysics. Students are advised to include courses from each of these areas in their programs.
2. Students are advised to note carefully the prerequisites for all courses. Students who do not meet the specified prerequisites for a course may, in exceptional circumstances, obtain permission of the Departmental Undergraduate Counsellor to take the course. Note that not all courses are offered every year, however, all required courses are offered every year. Please consult the university Master Schedule.
3. Students interested in registering in PHILOS 3W03, 4W03 are strongly encouraged to obtain permission from the Departmental Undergraduate Counsellor by the end of May of the preceding year. Access to these courses cannot be guaranteed beyond that date.
4. Students in Level 3 of an Honours Philosophy program may seek permission from the Departmental Undergraduate Counsellor to gain access to Level 4 courses.

Courses

If no prerequisite is listed, the course is open.

PHILOS 1A03 - PHILOSOPHICAL TEXTS

An introduction to philosophy through the close reading of selected classical texts. Authors to be considered may include Plato, Descartes, Hobbes, Hume, Marx, Mill, Nietzsche, Russell, and De Beauvoir.

Two lectures, one tutorial; one term

PHILOS 1B03 - PHILOSOPHY, LAW AND SOCIETY

An introduction to philosophy through an exploration of issues in moral, political and legal philosophy. Topics may include: The Canadian Charter of Rights; terrorism, torture, and the rule of law; legal restrictions on hate speech and pornography.

Two lectures, one tutorial; one term

PHILOS 1E03 - PHILOSOPHICAL QUESTIONS

An introduction to philosophy through the study of some of its central questions. Topics may include God, knowledge, mind and body, free will, politics, morality, and art.

Two lectures, one tutorial; one term

PHILOS 1F03 - MEANING IN LIFE

An introduction to philosophy through an exploration of the question: What makes life meaningful? Topics may include such themes as happiness, suffering, suicide, faith, love, friendship, work, art, and hope.

Two lectures, one tutorial; one term

First offered in 2019-2020

PHILOS 2B03 - INTRODUCTORY LOGIC

An introduction to logical reasoning and the analysis of argument through the study of propositional and quantification logic.

Three lectures; one tutorial; one term

Prerequisite(s): Registration in Level II or above

PHILOS 2CT3 - CRITICAL THINKING

This course aims to improve skills in analyzing and evaluating arguments from everyday life and academic contexts.

Two lectures; one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): ARTSSCI 1B06, ARTSSCI 1BB3, IBH 2AE3

PHILOS 2D03 - BIOETHICS

An introduction to moral philosophy, through a consideration of issues in health care ethics. Topics such as abortion, human experimentation, euthanasia, and genetic screening will be investigated.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): IBH 2BD3, HTHSCI 3L03, PEACEST 2D03, RELIGST 2C03

PHILOS 2E03 - CLASSICAL CHINESE PHILOSOPHY

Introductory survey of classical Chinese philosophy, especially Confucianism and Daoism. Readings include Confucius, Mencius, Laozi and Zhuangzi.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

PHILOS 2F03 - PHILOSOPHICAL PSYCHOLOGY

A consideration of such questions as: In what terms might human nature be described? How do intentional and unintentional behaviour differ? How do physical and mental states differ? When is action free? Can intelligence be duplicated artificially?

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

PHILOS 2G03 - SOCIAL AND POLITICAL ISSUES

A philosophical exploration of current social and political issues. Topics may include discrimination, violence, environmental problems, poverty, liberty, equality, democracy, or terrorism.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): PEACEST 2I03

PHILOS 2H03 - AESTHETICS

An introduction to some main theories of the nature of art, criticism, and the place of art in life and society.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 2003

Cross-list(s): ARTHIST 2H03

PHILOS 2N03 - BUSINESS ETHICS

An analysis of ethical issues arising in contemporary business life. Sample topics include: fair and unfair competition; responsibilities towards employees, society and the environment; honesty and integrity in business; the moral status of corporations.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): COMMERCE 2SB3

PHILOS 2P03 - ANCIENT GREEK PHILOSOPHY

A survey of ancient Greek and Roman philosophical thought from its beginnings to the Hellenistic period, including Socrates, Plato, Aristotle, the Stoics and the Epicureans.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CLASSICS 2P03

PHILOS 2Q03 - JUSTICE, POLITICAL PHILOSOPHY, AND LAW

A critical survey of the essentials of private law (tort, contracts, and property), criminal law, administrative law, the Canadian Charter, and international law and institutions.

Lecture and discussion (three hours); one term

Prerequisite(s): Registration in level II of the Honours Justice, Political Philosophy, and Law program

PHILOS 2S03 - HISTORY OF POLITICAL PHILOSOPHY

A survey of major historical works in political philosophy, including works by some or all of: Plato, Aristotle, Hobbes, Locke, Rousseau, Kant, Wollstonecraft, Bentham, Mill, Taylor, and Marx.

Three hours (lecture and discussion); one term

Prerequisite(s): Registration in Level II or above

PHILOS 2TT3 - ETHICAL ISSUES IN COMMUNICATION

This course will examine ethical issues as they arise in interpersonal communication, social media, and mass communication. The dominant moral theories and approaches to moral decision-making will be analyzed and put to use to help students understand and evaluate concrete examples.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): CMST 2TT3 , 3N03, PEACEST 2TT3 , 3N03

PHILOS 2X03 - EARLY MODERN PHILOSOPHY I

An introduction to the political, epistemological and ontological problems investigated by philosophers of the 17th and 18th centuries (Bacon, Hobbes, Descartes, Spinoza, Leibniz, Malebranche, Locke, Berkeley and Hume.)

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

PHILOS 2XX3 - EARLY MODERN PHILOSOPHY II

A sequel to Early Modern Philosophy I, continuing in the study of 17th and 18th century philosophy.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

PHILOS 2YY3 - ETHICS

An introduction to moral philosophy and its application to contemporary moral problems. Topics may include the objectivity of values, the nature of moral judgments, rights and duties, virtues, and consequentialism.

(Two lectures, one tutorial); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): IBH 1BC3

PHILOS 2ZZ3 - PHILOSOPHY OF LOVE AND SEX

An exploration of philosophical texts concerned with the nature of love and sex, including such themes as friendship, romance, perversity, intimacy, desire, sex and sexuality.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

PHILOS 3B03 - CONTINENTAL PHILOSOPHY AFTER HEGEL

A study of the different lines of thought that emerged in philosophy in 19th-century continental Europe after Hegel. Authors may include Schopenhauer, Feuerbach, Kierkegaard, Nietzsche, or Bergson.

lecture and discussion (Three hours); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above

PHILOS 3C03 - ADVANCED BIOETHICS

An advanced study of the application of ethical theory to selected problems in health care, such as our reproductive practices, care of the dying, the therapeutic relationship.

Three hours (lecture and discussion); one term

Prerequisite(s): One of PHILOS 2D03, PHILOS 2YY3, or RELIGST 2C03, and at least three additional units of Philosophy, and registration in Level III or above

PHILOS 3CC3 - ADVANCED ETHICS

An advanced discussion of one or more theories or current issues in ethics. Topics may include meta-ethics, ethical naturalism, theories of rights and obligations, moral psychology, the role of moral emotions, or moral responsibility.

Three hours (lecture and discussion); one term

Prerequisite(s): One of PHILOS 2D03, PHILOS 2YY3, or RELIGST 2C03, and at least three additional units of Philosophy, and registration in Level III or above

PHILOS 3D03 - PHILOSOPHY OF SCIENCE

A survey of philosophical problems concerning science. Topics to be considered include explanation, causation, scientific laws, and instrumentalism vs. realism.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above

PHILOS 3E03 - PHILOSOPHY OF LANGUAGE

This course surveys some of the main themes pertaining to the philosophical study of language and communication and attempts to understand the most significant developments of the discipline in the course of the last century.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy or PHILOS 2B03; and registration in Level III or above

Antirequisite(s): CMST 3Y03

PHILOS 3EE3 - CONTEMPORARY CONTINENTAL PHILOSOPHY

An examination of the work of 20th- and 21st-century continental philosophers such as Heidegger, Sartre, Beauvoir, Foucault, Deleuze, Derrida or Agamben.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above

Antirequisite(s): PHILOS 4E03

PHILOS 3HH3 - METAPHYSICS

An investigation of metaphysical concepts, such as substance, individuation, identity, essence, quality, process, mind, time and causality. Some contemporary criticisms of metaphysics will be discussed.

Three hours (lecture and discussion); one term

Prerequisite(s): Six units of philosophy and registration in Level III or above

PHILOS 3I03 - PHILOSOPHY AND FEMINISM

A philosophical investigation of current feminist theorizing at the intersection of gender, race, sexuality, ability, and other categories of social difference.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy or WOMENST 1A03, 1AA3; and registration in Level III or above

Antirequisite(s): WOMENST 3I03

PHILOS 3L03 - ENVIRONMENTAL PHILOSOPHY

A consideration of the characterization of nature and/or our evaluative responses to it.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above

PHILOS 3N03 - POLITICAL PHILOSOPHY

A study of major political concepts and themes, such as social contract, ideology, justice, freedom, equality, reform vs. revolution, state vs. individual.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above

PHILOS 3NN3 - PHILOSOPHY OF THE ENLIGHTENMENT

An examination of the philosophy of 18th-century Europe, particularly of the thinkers associated with the Encyclopedia project. This movement was a concerted attempt to replace the old theological-cum-political order with one based on scientific reason and human rights.

Three hours (lecture and discussion); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above

PHILOS 3003 - THEORY OF KNOWLEDGE

A study of scepticism and certainty, knowledge and belief, perception, memory, and truth.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy and registration in level III or above

PHILOS 3P03 - PHILOSOPHIES OF WAR AND PEACE

A philosophical appraisal of the rationality and morality of the conduct of war and proposals for fostering peace among nations.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above; or registration in Level III or IV of the Combined Honours in Peace Studies Program

Antirequisite(s): PEACEST 3M03

PHILOS 3Q03 - PHILOSOPHY OF LAW

An investigation of the nature of law and of issues arising within legal systems. These issues include legal reasoning, equality, legal insanity, punishment, and the Charter of Rights and Freedoms.

Three hours (lecture and discussion); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above; or registration in Level III or IV of the Combined Honours in Peace Studies Program

Cross-list(s): PEACEST 3Q03

PHILOS 3VV3 - KANT

An introduction to Kant's critical philosophy through a study of the Critique of Pure Reason and of the debates between Kant and such contemporaries as Jacobi, Reinhold and Fichte.

Lecture and discussion (three hours); one term

Prerequisite(s): PHILOS 2X03, 2XX3, and registration in Level III or above

PHILOS 3W03 - READING COURSE

A tutorial course in which individual students meet regularly with an instructor on a list of readings outside normally available course offerings. It is the student's responsibility to secure the agreement of an instructor and to complete a proposal form (available in the Philosophy Department office), before attempting to register in the course.

Prerequisite(s): Registration in Level III or IV of any program in Philosophy, with a Grade Point Average of at least 8.5 and permission of the Department

PHILOS 3XX3 - PLATO

A detailed study of one or more of Plato's dialogues, with an emphasis on his philosophical ideas.

Lecture and discussion (three hours); one term

Prerequisite(s): PHILOS 2P03 or CLASSICS 2P03

Antirequisite(s): CLASSICS 3XX3

PHILOS 3YY3 - HEGEL

An introduction to Hegel's philosophy and to the further developments of his thought by nineteenth century philosophers such as Marx, Schleiermacher, Kierkegaard, and Nietzsche.

Lecture and discussion (three hours); one term

Prerequisite(s): Six units of Philosophy and registration in Level III or above

PHILOS 3ZZ3 - ARISTOTLE

A detailed study of various parts of the philosophy of Aristotle. Topics covered may include Aristotle's views on logic, nature, the soul, metaphysics, ethics and politics.

Lecture and discussion (three hours); one term

Prerequisite(s): PHILOS 2P03 or CLASSICS 2P03

Antirequisite(s): CLASSICS 3ZZ3

PHILOS 4A03 - EARLY MODERN PHILOSOPHY

A critical study of one or more 17th- or 18th-century European or British philosophers, such as Descartes, Leibniz, Hume.

Seminar (three hours); one term

Prerequisite(s): PHILOS 2X03 and 2XX3 and registration in Level IV of any program in Philosophy

Departmental permission required

PHILOS 4C03 - PHILOSOPHY OF CONSTITUTIONAL LAW

A philosophical study of the nature and role of constitutions and of the judicial interpretation and application of constitutional charters of rights.

Seminar (three hours); one term

Prerequisite(s): PHILOS 3Q03 and registration in Level IV of any program in Philosophy

Departmental permission required

PHILOS 4D03 - TWENTIETH-CENTURY ANALYTIC PHILOSOPHY

A study of some main currents of 20th-century analytic philosophy and of the work of some of the key philosophers involved (e.g. Russell, Moore, Wittgenstein, Quine and Davidson).

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV of any program in Philosophy

Departmental permission required

PHILOS 4F03 - ISSUES IN CONTINENTAL PHILOSOPHY

An exploration of a particular theme or issue important to recent continental philosophers, such as violence, xenophobia, justice, dissent, community, identity, or ecology.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV of any program in Philosophy

Departmental permission required

PHILOS 4I03 - MEDIEVAL PHILOSOPHY

A study of one or more central medieval philosophers, such as Augustine, Aquinas, or William of Ockham.

Seminar (three hours); one term

Prerequisite(s): PHILOS 2P03; and registration in Level IV of any program in Philosophy

Departmental permission required

PHILOS 4K03 - SEMINAR IN ANCIENT PHILOSOPHY

A critical examination of a major thinker, movement, theme, or work in ancient Greek and Roman philosophy (e.g. pre-Socratic philosophy, a particular Platonic dialogue, Stoic ethics, ancient skepticism, or philosophy in late antiquity).

Seminar (three hours); one term

Prerequisite(s): PHILOS 2P03 or CLASSICS 2P03; and registration in Level IV of any program in Philosophy or Classics

Antirequisite(s): CLASSICS 4K03

Departmental permission required

PHILOS 4Q03 - NORMATIVE JURISPRUDENCE

This course critically examines the structure and underlying rationale of one or more key areas of law, such as (but not limited to) tort, contract, property, or criminal law. Seminar (three hours); one term

Prerequisite(s): Registration in level IV of the Honours Justice, Political Philosophy, and Law program

Departmental permission required

PHILOS 4S03 - HUMAN RIGHTS AND GLOBAL JUSTICE

This course examines the philosophical foundations and political implications of human rights and theories of justice in the international sphere. We will also consider related topics of sovereignty, political legitimacy, international responsibility, humanitarian intervention, international criminal law.

Seminar (three hours); one term

Prerequisite(s): Registration in level IV of the Honours Justice, Political Philosophy, and Law program

Departmental permission required

PHILOS 4V03 - MULTIDISCIPLINARY WORKSHOP IN THE ETHICS AND POLICY OF TECHNOLOGICAL INNOVATION

This course is a multidisciplinary, team-based workshop focused on identifying and resolving the ethical and policy challenges presented by new technologies that are promising but also potentially socially disruptive. Open to students from Health Sciences, Engineering, Business, Humanities, Sciences and Social Sciences. Three hours; one term

Prerequisite(s): PHILOS 2D03 or 2YY3; 3 units of PHILOS 2S03 or PHILOS 2G03; 3 units of PHILOS 2N03 or PHILOS 2TT3; 3 units of PHILOS 3C03, PHILOS 3CC3, PHILOS 3I03, PHILOS 3L03, PHILOS 3Q03, or PHILOS 3N03; and permission of the department.

This course is restricted to students accepted into EPTIC (Ethics and Policy for Technological Innovation Certificate).

PHILOS 4W03 - INDEPENDENT STUDY

In consultation with a member of the Department of Philosophy, students will prepare an essay on an approved topic, on the basis of a list of readings outside normally available course offerings. It is the student's responsibility to secure the agreement of an instructor and to complete a proposal form (available in the Philosophy Department office), before attempting to register in the course.

Prerequisite(s): Registration in Level IV of any Honours program in Philosophy, with a Grade Point Average of at least 8.5 and permission of the Department

PHILOS 4XP3 A/B - LAW AND COMMUNITY

This course seeks to foster a sophisticated understanding of the legal institutions that make up the social world by hosting visits with a number of offices whose central mission involves participating in the political and legal processes in which laws are made, applied and developed.

This course is evaluated on a Pass/Fail basis.

Three hours; two terms (alternate weeks)

Prerequisite(s): Registration in level IV of the Honours Justice, Political Philosophy, and Law program

Departmental permission required

PHILOS 4XX3 - INTERMEDIATE LOGIC

A study of one or more advanced topics in formal logic, such as the metatheory of classical logic, extensions of or alternatives to classical logic, or the philosophy of logic.

Seminar (three hours); one term

Prerequisite(s): PHILOS 2B03; and registration in Level IV of any program in Philosophy

Departmental permission required

PHILOS 4YE3 A/B - PHILOSOPHY, PEDAGOGY AND COMMUNITY

This experiential learning course introduces students to A) fundamental issues in the philosophy of education with an emphasis on the intersection of education and community building, B) training in methods of facilitating philosophical enquiry, C) application of these methods within the community. In partnership with McMaster Children and Youth University.

Three hours; two terms (alternate weeks)

Prerequisite(s): Registration in level IV Honours Philosophy only

Departmental permission required

PHILOS 4YY3 - TOPICS IN ETHICS

An advanced study of ethics broadly defined to include those aspects of human life that provide meaning and value (e.g. aesthetic, moral, religious, social or political experience.)

Seminar (three hours); one term

Prerequisite(s): One of PHILOS 2YY3, 3C03, 3CC3, and registration in Level IV of any program in Philosophy or

Peace Studies

Antirequisite(s): PHILOS 4B03, PEACEST 4C03

PHILOS 4YY3 may be repeated, if on a different topic, to a total of six units.

Departmental permission required

PHYSICS

Courses in Physics are administered by the Department of Physics and Astronomy, A.N. Bourns Science Building, Room 241, ext. 24559

<http://www.physics.mcmaster.ca/>

Department Notes

1. The Department reserves the right to withdraw a Level III or IV course which is not specifically required in a Physics program if the registration falls below ten.
2. Students in Level III or IV of Physics programs will find a number of relevant electives among the offerings of the Department of Biology, the Department of Engineering Physics and the School of Geography and Earth Sciences.
3. Courses in Physics and Astronomy are not open to students registered in the Bachelor of Technology program.

Courses

If no prerequisite is listed, the course is open.

PHYSICS 1A03 - INTRODUCTORY PHYSICS

A first course in university physics, taught using examples and applications from many areas of science. Topics include the concepts of force and energy, mechanics, waves and fluids.

Lectures, web modules (three hours), one lab (two hours) every other week; one term
Prerequisite(s): One of Grade 12 Calculus and Vectors U, Grade 12 Advanced Functions and Introductory Calculus U, MATH 1F03

Co-requisite(s): WHMIS 1A00 if not already completed, must be completed prior to the first lab.

Antirequisite(s): PHYSICS 1B03, 1C03

Not open to students with credit or registration in ISCI 1A24 A/B or PHYSICS 1D03. It is recommended that students in Chemical and Physical Sciences Gateway complete PHYSICS 1C03.

PHYSICS 1AA3 - INTRODUCTION TO MODERN PHYSICS

A course presenting aspects of modern physics relevant to life sciences. Electromagnetic fields. Atomic, quantum, and nuclear physics. Applications to imaging and understanding biological systems.

Three lectures, one lab (three hours) every other week; one term

Prerequisite(s): One of PHYSICS 1A03, 1B03 , 1C03

Antirequisite(s): PHYSICS 1BA3 , 1BB3 , 1CC3

Not open to students with credit or registration in ISCI 1A24 A/B.

It is recommended that students in Chemical and Physical Sciences Gateway complete PHYSICS 1CC3.

PHYSICS 1C03 - PHYSICS FOR THE CHEMICAL AND PHYSICAL SCIENCES

A first course in university physics intended for physics and chemistry students, or students in any other discipline who have an appropriate secondary school background. This course is a comprehensive treatment of linear and rotational mechanics - kinematics, dynamics, and the relevant conservation laws.

Three lectures, one lab (two hours) every week; one term

Prerequisite(s): Either Grade 12 Physics U or PHYSICS 1L03 ; and either Grade 12 Calculus and Vectors U or MATH 1F03; and credit or registration in one of ARTSSCI 1D06 A/B, MATH 1A03, 1LS3, MATH 1X03, 1ZA3

Co-requisite(s): WHMIS 1A00 if not already completed, must be completed prior to the first lab.

Antirequisite(s): PHYSICS 1A03, 1B03

Not open to students with credit or registration in ISCI 1A24 A/B or PHYSICS 1D03.

PHYSICS 1CC3 - MODERN PHYSICS FOR THE CHEMICAL AND PHYSICAL SCIENCES

This course is the continuation of PHYSICS 1C03.

Topics include simple harmonic motion, waves, interference, electrostatics, magnetostatics and an introduction to quantum physics.

Three lectures, one lab (three hours) every other week; one term

Prerequisite(s): PHYSICS 1A03, 1B03 or 1C03

Antirequisite(s): PHYSICS 1AA3, 1BA3 , 1BB3

Not open to students with credit or registration in ISCI 1A24 A/B.

PHYSICS 1D03 - INTRODUCTORY MECHANICS

A course for engineering students. Principles of mechanics of particles and rigid bodies, including Newton's Laws, rotational kinematics and dynamics, torque, energy, momentum, angular momentum, and simple harmonic motion.

Three lectures, one lab (three hours) every other week; one term

Prerequisite(s): Registration in a program in the Faculty of Engineering

PHYSICS 1E03 - WAVES, ELECTRICITY AND MAGNETIC FIELDS

A course for engineering students. Oscillations and waves, interference; electrostatics, electric potential, circuit elements; magnetic fields.

Three lectures, one lab (three hours) every other week; one term

Prerequisite(s): PHYSICS 1D03 and registration in Engineering

Antirequisite(s): PHYSICS 2A03

PHYSICS 1X00 - IMPORTANT PROBLEMS IN THEORETICAL PHYSICS

Applies the basic laws of physics encountered in introductory courses to problems of great historical significance which are of relevance to modern research. Possible topics include; Kepler orbits, Dark Matter, Scattering, the discovery of atoms, phonons, special relativity and space time symmetries.

This course is evaluated on a Pass/Fail basis.

One lecture; one term

Prerequisite(s): One of PHYSICS 1A03, 1B03 , 1C03, 1D03; and credit or registration in one of PHYSICS 1AA3, 1BA3 , 1BA3 , 1CC3, 1E03; or ISCI 1A24 A/B

PHYSICS 2B03 - ELECTRICITY AND MAGNETISM I

Electric and magnetic fields, electric potential, Maxwell's equations, D.C. circuits. Three lectures, one lab (three hours) every other week; one term

Prerequisite(s): One of ARTSSCI 2D06 A/B, ISCI 1A24 A/B, PHYSICS 1A03, 1B03 , 1C03, 1D03; and one of MATH 1A03, 1LS3, 1X03, 1ZA3 (or ISCI 1A24 A/B); and credit or registration in one of MATH 1AA3, 1LT3, 1XX3, 1ZB3 (or ISCI 1A24 A/B)

Antirequisite(s): MEDPHYS 2B03 , PHYSICS 1E03, 2A03, 2B06

PHYSICS 2BB3 - ELECTRICITY AND MAGNETISM II

Differential form of Maxwell's equations, A.C. circuits.

Three lectures, one lab (three hours) every other week; one term

Prerequisite(s): PHYSICS 2B03; and MATH 2X03 (or ISCI 2A18 A/B or MATH 2A03); and credit or registration in MATH 2C03

Antirequisite(s): MEDPHYS 2B03 , PHYSICS 2A03, 2B06

PHYSICS 2C03 - MODERN PHYSICS

Special relativity. Introductory quantum physics.

Three lectures; one term

Prerequisite(s): One of ARTSSCI 2D06 A/B , PHYSICS 1AA3 , 1BA3, 1BB3, 1CC3 , 1E03; and one of ARTSSCI 1D06 A/B , MATH 1AA3 , 1LT3 , 1XX3 , 1ZB3 ; or ISCI 1A24 A/B ; or registration in an Honours Biophysics or an Honours Medical and Biological Physics program

Antirequisite(s): PHYSICS 3M03

PHYSICS 2E03 - MECHANICS

Dynamics of a particle, simple harmonic motion and resonance, central field problem, many-particle systems, non-inertial systems, generalized coordinates and Lagrange's equations.

Three lectures; one term

Prerequisite(s): Registration in a program in Biophysics, Medical and Biological Physics, or Physics; or one of PHYSICS 1A03 , 1C03 , 1D03 (or 1B03), ARTSSCI 2D06 A/B , ISCI 1A24 A/B , and credit or registration in MATH 2X03 (or MATH 2A03 or 2Z03 or ISCI 2A18 A/B) and MATH 2C03 (or 2ZZ3)

Antirequisite(s): PHYSICS 2D03

PHYSICS 2G03 - SCIENTIFIC COMPUTING

A hands-on introduction to modern scientific structured programming using standard C/C++ under Linux. Assumes no prior programming experience. Students develop a programming project on a research topic of their choosing (e.g. living populations, disease simulation, dynamics, economics). The course covers programming fundamentals, floating point and number representation and introduces algorithms and numerical methods. Class discussions include topics such as scripting, web content, objects/classes, graphics and parallel programming, according to student interest. Students are required to have a laptop for in-class work.

Two lectures, two labs; one term

Prerequisite(s): One of ARTSSCI 1D06 A/B, ISCI 1A24 A/B, MATH 1A03, 1LS3, 1X03, 1ZA3

PHYSICS 2H04 - THERMODYNAMICS

An introduction to thermodynamics and its statistical basis at the microscopic level, with applications.

Three lectures, one tutorial every other week, one lab (three hours); one term

Prerequisite(s): One of PHYSICS 1A03, 1B03 , 1C03, and credit or registration in PHYSICS 1AA3, 1BA3 , 1BB3 , 1CC3, or registration in Honours Biophysics, or ARTSSCI 2D06 A/B or ISCI 1A24 A/B; and credit or registration in MATH 2X03 (or 2A03), 2C03

Antirequisite(s): CHEM 2PA3, 2PD3, 2R03, CHEMBIO 2P03, ENGINEER 2H03, MATLS 2B03

Cross-list(s): ENGPYS 2H04

Not open to students with credit or registration in ISCI 2A18 A/B.

This course is administered by the Department of Engineering Physics.

PHYSICS 2NM3 - MEDIA NUMERACY: TELLING STORIES WITH NUMBERS

As public discourse moves to a "post-truth" era, the evaluation of numerical information used in support of narratives is an essential skill in a democratic society. Course develops simple, practical numeracy skills to interpret and compare the stories told by text and numbers in articles selected from the popular media. Content delivered through class discussion and presentations.

Three hours (lectures); one term

PHYSICS 2X00 - FROM CLASSICAL PHYSICS INTO THE QUANTUM WORLD

An enrichment course focusing on the connections between classical and quantum physics.

This course is evaluated on a Pass/Fail basis.

One lecture; one term

Prerequisite(s): PHYSICS 2C03 or permission of the instructor

PHYSICS 3A03 - RELATIVITY, GRAVITY AND THE GEOMETRY OF SPACETIME

An introduction to general relativity. Topics include: special relativity and Minkowski spacetime, introductory tensor analysis, gravity as curvature, Einstein Field equations, black holes and cosmology.

Three lectures; one term

Prerequisite(s): PHYSICS 2C03, and credit or registration in MATH 3C03, and registration in any Honours program in the Faculty of Science or any program in the Faculty of Engineering; or registration in Honours Mathematics and Physics Alternates with PHYSICS 3C03.

PHYSICS 3C03 - ANALYTICAL MECHANICS

Topics include: Motion of rigid bodies; coupled oscillators and normal modes; Lagrangian and Hamiltonian dynamics; transformation theory and action-angle variables; perturbation theory; nonintegrable systems and chaos; classical field theory.

Three lectures; one term

Prerequisite(s): PHYSICS 2D03 or 2E03, and credit or registration in MATH 3C03 and registration in any Honours program in the Faculty of Science or any program in the Faculty of Engineering; or registration in Honours Mathematics and Physics; or permission of the instructor

Alternates with PHYSICS 3A03.

PHYSICS 3D03 A/B - INQUIRY IN PHYSICS

Independent study of the scientific literature, including the preparation of seminars and reports on assigned topics.

Two lectures or seminars; two terms

Prerequisite(s): Registration in an Honours Physics program or Honours Mathematics and Physics (B.Sc.)

Antirequisite(s): MEDPHYS 3A03, 3AA1, 3AB2, 4A03, 4AA1, 4AB2, PHYSICS 3DA1, 3DB2, 4A03, 4AA1, 4AB2

Not open to students with credit or registration in ISCI 3A12 A/B.

PHYSICS 3DA1 - INQUIRY IN PHYSICS (I)

Independent study of the scientific literature, including the preparation of seminars and reports on assigned topics.

Two lectures or seminars; one term

Prerequisite(s): Registration in Level III of Honours Biophysics Co-op or Honours Physics Co-op

Antirequisite(s): MEDPHYS 3A03, 3AA1, 3AB2, 4A03, 4AA1, 4AB2, PHYSICS 3D03 A/B, 4A03, 4AA1, 4AB2

Not open to students with credit or registration in ISCI 3A12 A/B.

PHYSICS 3DB2 - INQUIRY IN PHYSICS (II)

The continuation of PHYSICS 3DA1.

Two lectures or seminars; one term

Prerequisite(s): PHYSICS 3DA1 or 4AA1

Antirequisite(s): MEDPHYS 3A03, 3AA1, 3AB2, 4A03, 4AA1, 4AB2, PHYSICS 3D03 A/B, 4A03, 4AB2

Not open to students with credit or registration in ISCI 3A12 A/B.

PHYSICS 3H03 A/B - INTERMEDIATE LABORATORY

Experiments in atomic physics, neutron physics, optics, spectroscopy, mechanics. As part of this course, students will become familiar with computing for instrument interfacing, data visualization and data analysis.

Two lectures, one term; one lab (three hours), two terms

Prerequisite(s): One of MEDPHYS 2B03, PHYSICS 2B03; and credit or registration in one of ENGPYS 2QM3, PHYSICS 2C03, 3M03

Antirequisite(s): PHYSICS 3H04, PHYSICS 3HC1

PHYSICS 3HC1 - INTERMEDIATE LABORATORY (I)

Experiments in atomic physics, neutron physics, optics, spectroscopy, mechanics. As part of this course students will become familiar with computing for instrument interfacing, data visualization and data analysis.

One lecture, one lab (three hours); one term

Prerequisite(s): One of MEDPHYS 2B03, PHYSICS 2B03; and credit or registration in one of ENGPYS 2QM3, PHYSICS 2C03, 3M03; and registration in Level III of Honours Biophysics Co-op (B.Sc.), Honours Medical and Biological Physics Co-op (B.Sc.), Honours Medical Physics Co-op (B.Sc.) or Honours Physics Co-op (B.Sc.)

Antirequisite(s): PHYSICS 3H03 A/B, 3H04

PHYSICS 3HD2 - INTERMEDIATE LABORATORY (II)

The continuation of PHYSICS 3HC1.

One lab (three hours); one term

Prerequisite(s): PHYSICS 3HC1

PHYSICS 3K03 - THERMODYNAMICS AND STATISTICAL MECHANICS

The laws of thermodynamics, with emphasis on the mathematical structure of the theory; classical and quantum statistical mechanics.

Three lectures; one term

Prerequisite(s): MATH 2X03 (or 2A03), 2C03, PHYSICS 2H04; or ISCI 2A18 A/B and MATH 2C03; or registration in Honours Mathematics and Physics (B.Sc.) or an Honours Medical and Biological Physics (B.Sc.) program

PHYSICS 3MM3 - QUANTUM MECHANICS I

Quantum physics in 1D and 3D systems, with applications including the hydrogen atom.

Three lectures; one term

Prerequisite(s): Credit or registration in MATH 3C03, and one of ENGPYS 2QM3, PHYSICS 2C03, 3M03; or registration in Honours Mathematics and Physics (B.Sc.)

PHYSICS 3N03 - PHYSICAL OPTICS

Geometrical optics, electromagnetic waves, interference of light, Fraunhofer and Fresnel diffraction, polarized light, Fresnel equations, optical properties of materials, introduction to optical systems and precision optics experiments, selected topics in modern optics.

Three lectures; one term

Prerequisite(s): One of ISCI 2A18 A/B, MATH 2A03 , 2Q04, 2X03, 2ZZ3; and one of MATH 2C03, 2P04, 2Z03; and one of MEDPHYS 2B03 , PHYSICS 2B06, 2BB3 or both ENGPYS 2A04 (or 2A03) and 2E04

Cross-list(s): ENGPYS 3E03

PHYSICS 3QI3 - INTRODUCTION TO QUANTUM INFORMATION

An introduction to basic notions of quantum information and information processing. Topics may include the Einstein-Podolsky-Rosen (EPR) paradox, Bells inequalities, the measurement problem, quantum entanglement, quantum teleportation, quantum cryptography, and quantum computing.

Three lectures; one term

Prerequisite(s): One of MATH 1AA3, 1LT3, 1XX3, 1ZB3, ISCI 1A24, ARTSSCI 1D06 A/B; and either MATH 1B03 or 1ZC3

PHYSICS 4B03 - ELECTROMAGNETIC THEORY

Potential theory, electrostatics and magnetostatics in matter, electrodynamics, electromagnetic waves and wave guides, radiation.

Two lectures; one term

Prerequisite(s): MATH 3D03 and either PHYSICS 2B06 or 2BB3 or both ENGPYS 2A04 (or 2A03) and 2E04; or registration in Honours Mathematics and Physics (B.Sc.) or Honours Physics Co-op (B.Sc.)

Antirequisite(s): PHYSICS 4B04

PHYSICS 4E03 - PARTICLE AND NUCLEAR PHYSICS

An introduction to modern particle and nuclear physics. Topics include: radioactive decay, classical and quantum scattering, structure of the nucleus, structure of nucleons, antiparticles, quarks and leptons, the Standard Model.

Three lectures; one term

Prerequisite(s): PHYSICS 3MM3

Alternates with PHYSICS 4Q03

PHYSICS 4F03 - QUANTUM MECHANICS II

Advanced quantum mechanics with applications such as scattering, perturbation theory and the variational method.

Three lectures; one term

Prerequisite(s): PHYSICS 3MM3 and credit or registration in MATH 3D03; or registration in Honours Mathematics and Physics (B.Sc.)

PHYSICS 4G03 - COMPUTATIONAL PHYSICS

A course using computers to solve selected problems in physics. Students are required to develop working programs for solving problems such as: Monte Carlo simulations, The Schrodinger equation, molecular dynamics, differential equations among others.

Three lectures; one term

Prerequisite(s): PHYSICS 2G03; and PHYSICS 3MM3 or ENGPYS 2QM3; or registration in one of Honours Physics Co-op (B.Sc.), an Honours Biophysics, or Honours Medical and Biological Physics (B.Sc.) program; or permission of the instructor

PHYSICS 4IS3 - INDEPENDENT STUDY

Independent study to be carried out under the supervision of a faculty member.

One term

Prerequisite(s): Permission of the Chair of the Department

PHYSICS 4K03 - SOLID STATE PHYSICS

Crystal structure and binding; lattice vibrations; electron energy bands; metals and semiconductors; magnetism.

Three lectures; one term

Prerequisite(s): PHYSICS 3MM3

PHYSICS 4L03 A/B - LITERATURE REVIEW

A directed reading and review of the literature in any field of physics or astronomy, associated with a faculty member's research area. Normally, a report and poster presentation will be required.

Occasional tutorial (two hours); two terms

Prerequisite(s): Registration in Level IV of Honours Mathematics and Physics (B.Sc.) or any Honours Physics program; and permission of the Chair of the Department

Not open to students with credit or registration in ISCI 4A12 A/B.

PHYSICS 4P06 A/B - SENIOR RESEARCH PROJECT

An experimental or theoretical project to be carried out under the supervision of a faculty member. Normally, a report, oral and poster presentation will be required.

One occasional tutorial (two hours); two terms

Prerequisite(s): Registration in Level IV of any Honours Physics or the Honours Mathematics and Physics program; and a GPA of at least 9.0; and permission of the Chair of the Department

Antirequisite(s): BIOPHYS 4P06 A/B, MEDPHYS 4Y06 A/B

Not open to students with credit or registration in ISCI 4A12 A/B.

PHYSICS 4Q03 - INTRODUCTION TO QUANTUM FIELD THEORY

An introduction to quantum field theory. Topics include: creation and annihilation operators, many-particle systems, Bose-Einstein condensation, fields and forces, relativistic quantum field theory, spin-statistics connection, antiparticles.

Three hours (lectures); one term

Prerequisite(s): PHYSICS 3MM3

Alternates with PHYSICS 4E03.

PSYCHOLOGY, NEUROSCIENCE & BEHAVIOUR

Courses in PNB are administered by the Department of Psychology, Neuroscience & Behaviour.

Psychology Building, Room 102, ext. 23000

<http://www.science.mcmaster.ca/pnb/>

Department Notes

1. The PNB course designation stands for Psychology, Neuroscience & Behaviour. PNB courses require registration in a program in the Department of Psychology, Neuroscience & Behaviour. PSYCH courses are open to all students who meet the stated prerequisites.
2. The University reserves the right to limit enrolment in any course. Where priorities have to be established, first consideration will be given to students registered in an Honours program in the Department of Psychology, Neuroscience & Behaviour.
3. The Psychology, Neuroscience & Behaviour Department pre-registration ballot will include the thesis courses (PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B), and the Individual Study courses (PNB 3Q03 A/B S, 3Q03 A/B S, 4Q03 A/B S, 4Q03 A/B S). Students wishing to take these courses must complete and submit a ballot by **mid February**. Students will be informed of the outcome by mid March. Specific dates will be announced during the fall term. Ballots can be obtained from the Psychology, Neuroscience & Behaviour Department web site at <http://www.science.mcmaster.ca/pnb/>.
4. Students interested in Honours or Combined Honours Psychology, Neuroscience & Behaviour programs should be aware that they will not be able to complete the program requirements through evening courses.

Courses

If no prerequisite is listed, the course is open.

See also courses in *PSYCH*.

PNB 2Q03 A/B S - RESEARCH PRACTICUM

Independent research practicum that provides students the opportunity to participate in research projects in a PNB laboratory.

By application through PNB 2XT0 in December of preceding Fall Term.

Prerequisite(s): PNB 2XA3 , 2XB3 , 2XC3 with an average of at least 9.0; and permission of the course coordinator

PNB 2XA3 - HUMAN PERCEPTION & COGNITION

Humans gain knowledge by sensing, perceiving, evaluating and acting upon the world around us. This course explores psychological theories and measurements of these processes.

Three lectures, one tutorial; one term

Prerequisite(s): Registration in an Honours or Combined Honours Psychology, Neuroscience & Behaviour program or Honours Neuroscience program or Honours Music (Music Cognition) program

Antirequisite(s): PSYCH 2H03

PNB 2XB3 - NEUROANATOMY & NEUROPHYSIOLOGY

This course describes the physiology of the neuron, communication between neurons, and the neural circuits that underlie touch, vision, audition, vestibular sensation, and movement.

Three lectures; one term

Prerequisite(s): Registration in an Honours or Combined Honours Psychology, Neuroscience & Behaviour program or Honours Neuroscience program

Antirequisite(s): LIFESCI 2C03

Not open to students with credit or registration in ISCI 2A18 A/B.

PNB 2XC3 - ANIMAL BEHAVIOUR & EVOLUTION

This course integrates evolutionary analyses with in-depth discussions of genetic and cognitive mechanisms that generate major classes of behaviour shared by most animals, including humans.

Three lectures; one term

Prerequisite(s): Registration in an Honours or Combined Honours Psychology, Neuroscience & Behaviour program or Honours Neuroscience program

Antirequisite(s): LIFESCI 2D03

PNB 2XD3 - INTEGRATIVE PNB THROUGH SCIENTIFIC WRITING

The course promotes integration across themes within Psychology, Neuroscience & Behaviour and teaches fundamental writing skills for the sciences. Students will be exposed to multiple topic areas and multiple faculty members.

Three lectures, one tutorial; one term

Prerequisite(s): PNB 2XA3 (or PSYCH 2H03), PNB 2XB3 (or one of ISCI 2A18 A/B, LIFESCI 2CC3), and PNB 2XC3 (or LIFESCI 2D03); and registration in an Honours or Combined Honours Psychology, Neuroscience & Behaviour program; or registration in Honours Neuroscience program

PNB 2XE3 - DATA AND DESCRIPTIVE STATISTICS

Students will learn to visualize and statistically describe data using various software packages and be introduced to advanced topics in data exploration.

Two lectures, one computer lab (two hours); one term

Prerequisite(s): Registration in an Honours or Combined Honours Psychology, Neuroscience & Behaviour program or Honours Neuroscience program

Not open to students with credit or registration in ISCI 2A18 A/B or STATS 2B03.

PNB 2XF3 - PERSPECTIVES IN PNB

Students will read and discuss scientific articles, and attend research seminars delivered by investigators within the Department of Psychology, Neuroscience & Behaviour (Faculty of Science).

Two lectures or colloquia, one tutorial; one term

Prerequisite(s): Registration in an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

PNB 2XT0 - PNB TUTORIAL

Tutorial supplementing the Honours programs offered through the Department of Psychology, Neuroscience & Behaviour. This tutorial is a prerequisite for PNB 3RM3 and therefore must be completed prior to enrollment in Level III.

This tutorial is evaluated on a Pass/Fail basis.

One hour (tutorial); one term

Prerequisite(s): Registration in Level II or above of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

PNB 3EE3 - PERCEPTION LABORATORY

Learn the skills needed for graduate school: experimental design, computer programming, manuscript writing and oral presentation. Previous programming experience not required.

One tutorial (one hour), one lab (three hours); one term

Prerequisite(s): Credit or registration in PNB 3RM3 and 3XE3; or ISCI 2A18 A/B

PNB 3EV3 - EVOLUTIONARY PSYCHOLOGY LAB

Students will conduct an experiment recording and analyzing, and manipulating human speech, as well as photographing human faces, learning morphing techniques, and testing perceptions.

Seminar and lab (three hours); one term

Prerequisite(s): Credit or registration in PNB 3RM3 and 3XE3; or ISCI 2A18 A/B

PNB 3HP3 - HISTORY OF PSYCHOLOGY

An account of the various schools of thought leading up to contemporary psychology including a history of how philosophers and physiologists influenced the earliest roots of Psychology as a science.

Three lectures; one term

Prerequisite(s): Registration in Level III or IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

PNB 3I06 A/B - PRACTICA IN PSYCHOLOGY

Supervised field placements will be arranged each year. The placements may vary from year to year, but will include cognitive, language, perceptual, memory, neuropsychological and behavioural disorders. A final report must be submitted electronically to the coordinator by April 1. Applications must be submitted to the coordinator by the beginning of February of the preceding academic year, with selection for placements announced by the end of March.

Prerequisite(s): One of ARTSSCI 2R03, PNB 2XE3, 3XE3, STATS 2MB3; and registration in Level III or IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program and permission of the coordinator. Preference will be given to students registered in Honours Psychology, Neuroscience & Behaviour (Mental Health Specialization).

This course cannot be taken concurrently with any independent study course (PNB 3Q03 A/B S, 3Q03 A/B S, 4Q03 A/B S, 4Q03 A/B S) with the same supervisor.

This course cannot be taken concurrently with any of PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B.

PNB 3L03 - NEURODEVELOPMENT & PLASTICITY LAB

Seminars and laboratory experience in current problems in neurobiology.

One lab (three hours); one term

Prerequisite(s): Credit or registration in PNB 3RM3 and 3XE3; or ISCI 2A18 A/B; or registration in Level III or above of Honours Neuroscience program

PNB 3MM3 - COGNITIVE NEUROSCIENCE LAB

Working in groups, students will learn to conduct experiments in the field of cognitive neuroscience. Issues related to research design and scientific communication will be emphasized.

Labs (three hours), tutorial (two hours); one term

Prerequisite(s): Credit or registration in PNB 3RM3 and 3XE3; or ISCI 2A18 A/B

PNB 3Q03 A/B S - INDIVIDUAL LIBRARY STUDY

A library project under the supervision of a faculty member that may extend over both terms.

Prerequisite(s): Registration in Level III or IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program or B.A. Psychology program
If PNB 3Q03 is taken concurrently with PNB 4D06 A/B, PNB 4D09 A/B or PNB 4DD6 A/B, a different faculty member must supervise each course.
Permission is by preregistration ballot. (See *Department Note 3* above.)

PNB 3Q03 A/B S - INDIVIDUAL LAB STUDY

A laboratory project under the supervision of a faculty member that may extend over both terms.

Prerequisite(s): Registration in Level III or IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program or B.A. Psychology program
If PNB 3Q03 is taken concurrently with PNB 4D06 A/B, 4D09 A/B or 4DD6 A/B, a different faculty member must supervise each course.
Permission is by preregistration ballot. (See *Department Note 3* above.)

PNB 3RM3 - RESEARCH METHODS

Students will be provided with an ability to critically appraise articles in popular press reporting results of research studies and to draw inferences carefully from the limited data presented in many daily-life situations.

Three lectures, one tutorial; one term

Prerequisite(s): PNB 2XA3 (or PSYCH 2H03), 2XB3 (or LIFESCI 2CC3), 2XC3 (or LIFESCI 2D03), 2XT0, and credit or registration in PNB 3XE3; or PNB 2XA3 (or PSYCH 2H03), 2XC3 (or LIFESCI 2D03), ISCI 2A18 A/B and credit or registration in one of PNB 3XE3, PSYCH 4KK3, STATS 2MB3

Antirequisite(s): HUMBEHV 3MD3

PNB 3S03 - ANIMAL BEHAVIOUR LAB

Laboratory and field studies involving a wide variety of species.

One lab (three hours); one term

Prerequisite(s): Credit or registration in PNB 3RM3 and 3XE3; or ISCI 2A18 A/B

PNB 3V03 - LABORATORY IN HUMAN MEMORY AND COGNITION

Students will conduct a series of experiments aimed at contemporary issues in human memory and cognition. Understanding of background literature, experimental design, links between research questions and data analysis, and scientific communication will be emphasized.

One lab (three hours); one term

Prerequisite(s): PSYCH 3VV3; and credit or registration in PNB 3RM3 and 3XE3, or ISCI 2A18 A/B

PNB 3XE3 - INFERENCE STATISTICS

Advanced topics include general linear model; multiple regression; analysis of variance; repeated measures; data transformations; factor analysis.

Three lectures, one computer lab (two hours); one term

Prerequisite(s): One of ARTSSCI 2R03, PNB 2XE3 or credit or registration in ISCI 2A18 A/B; or registration in Level III or above of Honours Neuroscience program
Not open to students with credit or registration in STATS 2MB3.

PNB 4A03 - ASSESSMENT IN CHILDREN

Examines intellectual, educational, neuropsychological and clinical standardized assessment measures and explores the intricacies of interviewing, test selection, scoring, interpretation and report writing.

Three lectures; one term

Prerequisite(s): Registration in Level IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program; and PSYCH 2AP3, 3B03, 3MT3.
Preference will be given to students registered in Honours Psychology, Neuroscience & Behaviour (Mental Health Specialization).

PNB 4D06 A/B - SENIOR THESIS

Students conduct an individual research project under the supervision of a faculty member. If any of PNB 3Q03 A/B, 3Q03 A/B, 4Q03 A/B or 4Q03 A/B are taken concurrently with PNB 4D06, a different faculty member must supervise each course. For information and guidelines regarding this course, refer to the department web site at <http://www.science.mcmaster.ca/pnb/undergraduate/courses.html> and click on PNB 4D06, or contact the Course Administrator.

Prerequisite(s): Registration in Level IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program with a Grade Point Average of at least 8.0; and PNB 3RM3, 3XE3

Antirequisite(s): ORIGINS 4A09 A/B, PNB 4D09 A/B, 4DD6 A/B

Cannot be taken concurrently with ISCI 4A12 A/B or PNB 4SC6 A/B.

Permission is by preregistration ballot. (See *Department Note 3* above.)

PNB 4D09 A/B - SENIOR HONOURS THESIS

Students conduct an individual research project under the supervision of a faculty member. If any of PNB 3Q03 A/B, 3Q03 A/B, 4Q03 A/B, 4Q03 A/B are taken concurrently with PNB 4D09, a different faculty member must supervise each course. For information and guidelines regarding this course, refer to the department web site at <http://www.science.mcmaster.ca/pnb/undergraduate/courses.html> and click on PNB 4D09, or contact the Course Administrator.

Prerequisite(s): Registration in Level IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program with a Grade Point Average of at least 8.5; and PNB 3RM3, 3XE3

Antirequisite(s): BIOLOGY 4C09 A/B, 4C12 A/B, 4F06 A/B, NEUROSCI 4L09 A/B, 4L12 A/B, ORIGINS 4A09 A/B, PNB 4D06 A/B, 4DD6 A/B

Cannot be taken concurrently with ISCI 4A12 A/B or PNB 4SC6 A/B.

Permission is by preregistration ballot. (See *Department Note 3* above.)

PNB 4DD6 A/B - SENIOR THESIS

Students conduct an individual research project under the supervision of a faculty member. If any of PNB 3Q03 A/B, 3Q03 A/B, 4Q03 A/B or 4Q03 A/B are taken concurrently with PNB 4DD6, a different faculty member must supervise each course. For information and guidelines regarding this course, refer to the department web site at <http://www.science.mcmaster.ca/pnb/undergraduate/courses.html> and click on PNB 4DD6, or contact the Course Administrator.

Prerequisite(s): Registration in Level IV of the Honours Biology and Psychology, Neuroscience & Behaviour program with a minimum Grade Point Average of at least 8.5; and PNB 3RM3, 3XE3

Antirequisite(s): BIOLOGY 4C09 A/B, 4C12 A/B, 4F06 A/B, NEUROSCI 4L09 A/B, 4L12 A/B, ORIGINS 4A09 A/B, PNB 4D06 A/B, 4D09 A/B

Cannot be taken concurrently with ISCI 4A12 A/B or PNB 4SC6 A/B.

Permission is by preregistration ballot. (See *Department Note 3* above.)

PNB 4E03 - SOCIAL COGNITIVE NEUROSCIENCE

The aim of this course is to provide students with a general appreciation of the field, and a deeper understanding of selected topics that are popular in the contemporary literature.

Three lectures; one term

Prerequisite(s): PSYCH 2C03, and registration in Level III or IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

PNB 4J03 - INQUIRY IN PSYCHOLOGY, NEUROSCIENCE & BEHAVIOUR

This course provides students with an opportunity to develop skills for investigations in selected areas of psychology, neuroscience and behaviour.

Three lectures; one term

Prerequisite(s): Registration in Level IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

Not open to students with credit or registration in ISCI 4A12 A/B.

PNB 4Q03 A/B S - ADVANCED INDIVIDUAL LIBRARY STUDY

A library project under the supervision of a faculty member that may extend over both terms.

Prerequisite(s): Registration in Level IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

If PNB 4Q03 A/B S is taken concurrently with PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B a different faculty member must supervise each course.

Permission is by preregistration ballot. (See Department Note 3 above.)

PNB 4Q03 A/B S - ADVANCED INDIVIDUAL LAB STUDY

A laboratory project under the supervision of a faculty member that may extend over both terms.

Prerequisite(s): Registration in Level IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

If PNB 4Q03 A/B S is taken concurrently with PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B, a different faculty member must supervise each course.

PNB 4Q03 A/B S may be repeated once with permission of the course coordinator.

Permission is by preregistration ballot. (See Department Note 3 above.)

PNB 4SC6 A/B - SCIENCE COMMUNICATION IN THE BEHAVIOURAL SCIENCES

Students will learn critical writing skills to translate basic research for popular media outlets. Examples of bad journalism and inaccurate reporting will be highlighted. Lecture (two hours), tutorial (two hours); two terms

Prerequisite(s): Registration in Level IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program or Level IV Honours Neuroscience program

Antirequisite(s): HUMBEHV 4SC6 A/B

Cannot be taken concurrently with BIOLOGY 4C09 A/B, 4C12 A/B, 4F06 A/B, ISCI 4A12 A/B, NEUROSCI 4L09 A/B, 4L12 A/B, ORIGINS 4A09 A/B, PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B.

POLISH

Courses in Polish are administered by the Department of Linguistics and Languages. Togo Salmon Hall, Room 629, ext. 24388

<http://linguistics.humanities.mcmaster.ca/>

Notes

- Students should note that the Department has classified its Polish language courses under the following categories:
 - Introductory Level Language Courses:** POLISH 1Z03, 1ZZ3
 - Intermediate Level Language Courses:** POLISH 2Z03, 2ZZ3
- POLISH 1Z03 and 1ZZ3 are open only to students with very limited or no prior knowledge of Polish. Students with more advanced knowledge of written and oral Polish are advised to enroll in POLISH 2Z03 and 2ZZ3.
- Not all courses are offered on an annual basis. Students should consult the timetable for available courses.

Courses

If no prerequisite is listed, the course is open.

POLISH 1Z03 - BEGINNER'S POLISH I

An introduction to basic conversational and written Polish, teaching the skills of listening, speaking, and writing. The sequel to this course is POLISH 1ZZ3.

Three hours; one term

Open only to students with very limited or no prior knowledge of Polish.

Not open to students with credit or registration in POLISH 1ZZ3.

The Department reserves the right to place students in the course most appropriate to their abilities.

POLISH 1ZZ3 - BEGINNER'S POLISH II

A course designed to further the student's command of oral and written Polish. The sequel to this course is POLISH 2Z03.

Three hours; one term

Prerequisite(s): POLISH 1Z03 or permission of the Department

The Department reserves the right to place students in the course most appropriate to their abilities.

POLISH 2Z03 - INTERMEDIATE POLISH I

This course concentrates on the study of Polish grammar and develops skills for conversation, reading and writing. The sequel to this course is POLISH 2ZZ3.

Three hours; one term

Prerequisite(s): POLISH 1ZZ3

The Department reserves the right to place students in the course most appropriate to their abilities.

POLISH 2ZZ3 - INTERMEDIATE POLISH II

This course concentrates on the study of grammatical structures and rules of composition. It develops written and oral skills.

Three hours; one term

Prerequisite(s): POLISH 2Z03

The Department reserves the right to place students in the course most appropriate to their abilities.

POLITICAL SCIENCE

Courses in Political Science are administered by the Department of Political Science. Kenneth Taylor Hall, Room 527, ext. 24741

<https://politicalscience.mcmaster.ca/>

Department Notes

- The Department of Political Science offers courses in the fields of Canadian Politics, Comparative Politics, International Relations, Political Theory and Public Policy, as well as courses that are not field specific. The Department does not require students to concentrate in any field of study. (Please see Department of Political Science in the Faculty of Social Sciences section of this Calendar for specific program requirements.) However, students should note that prerequisites for upper year courses normally come from the specific field of which those courses are part. In some instances, prerequisites call simply for prior coursework in a particular field, in which case students may consult the lists below to determine which courses satisfy these requirements.
- Not every Political Science course listed in this Calendar is offered every year. Students are advised to consult the Master Timetable published by the Office of the Registrar or contact the Department after April 1st for the list of courses that will be offered in the following academic year.
- All students are encouraged to seek advice from members of the Department in developing a program of study. All Honours students are strongly advised to discuss their program with an undergraduate advisor to ensure that it meets Departmental requirements.
- POLSCI 2NN3 and POLSCI 3NN3 or POLSCI 3N06 A/B are required for students in Honours Political Science programs.
- POLSCI 2006 A/B is required for students enrolled in Honours Political Science programs and is recommended for students in the B.A. program.
- Students should be alerted to those Level II and III courses that are required to qualify for a number of Level IV courses. Students who wish to enter courses but who lack the necessary prerequisites must obtain the permission of the instructor.
- Some Level III courses do not have course prerequisites. However, students without related Level II courses should contact one of the Department's

undergraduate advisors or the course instructor to determine whether they have the appropriate academic background for any specific Level III course.

8. Political Science Honours and Combined Honours students are encouraged but not required to take one or more of the Level III Honours Issues courses (POLSCI 3B03, 3H03 and 3J03). The topics of the courses will be described on the Department's website in advance of the date on which registration for them begins. Normally they will correspond to the research interests of the permanent faculty members (if available) who will teach them.

Fields of Study

Students are responsible for ensuring that course prerequisites are fulfilled.

I. Canadian Politics

POLSCI 2C03, 2D03, 2F03, 2PF3, 2U03, 3BB3, 3C03, 3CL3, 3FF3, 3FG3, 3GG3, 3J03, 3JJ3, 3K03, 3NN6 A/B, 3RF3, 3Z03, 4CA3, 4CF3, 4JS3, 4JS6 A/B, 4LC3, 4O06 A/B, 4P03, 4RR3, 4T06 A/B

II. Comparative Politics

POLSCI 2C03, 2M03, 2PF3, 2U03, 2US3, 2XX3, 3BB3, 3D03, 3EE3, 3F03, 3G03, 3GG3, 3H03, 3I03, 3JR3, 3K03, 3KK3, 3LC3, 3LL3, 3U03, 3V03, 3VV3, 3Y03, 4A03, 4AA6 A/B, 4D06 A/B, 4G06 A/B, 4KC3, 4LA3, 4PA3, 4P03, 4Q06 A/B, 4R06, 4RR3, 4SS3, 4UF3, 4YR3

III. International Relations

POLSCI 2H03, 2I03, 2J03, 2XX3, 3AA3, 3B03, 3E03, 3EE3, 3FF3, 3GC3, 3JR3, 3K03, 3KK3, 3LB3, 3P03, 3Q03, 3Q03, 3X03, 3Y03, 4D06 A/B, 4DV3, 4GC3, 4GG3, 4HR3, 4KB3, 4KD3, 4KK3, 4LL3, 4NN3, 4PE3, 4PP3, 4QQ3, 4Y03, 4YR3

IV. Political Theory

POLSCI 2006 A/B, 3CC3, 3FR3, 3LA3, 3PB3, 3VV3, 4AA6, 4C06 A/B, 4DD3, 4E06 A/B, 4DV3, 4FF3, 4HH3, 4JJ3, 4KA3, 4OL3, 4Y03

V. Public Policy

POLSCI 2C03, 2U03, 3B03, 3D03, 3E03, 3FF3, 3GC3, 3J03, 3LL3, 3LP3, 3U03, 3Z03, 4CF3, 4G06 A/B, 4JS3, 4L03, 4LC3, 4O06 A/B, 4P03, 4LC3, 4R06, 4RR3, 4SS3

The following courses while satisfying the requirements of the program are not specific to any field of study:

POLSCI 1AA3, 1AB3, 1G06 A/B, 2NN3, 2MN3, 3N06 A/B, 3NN3, 3PR3, 3UU3, 3WP3, 4Z06 A/B, 4ZZ3, 4ZZ6 A/B

Courses

If no prerequisite is listed, the course is open.

POLSCI 1AA3 - GOVERNMENT, POLITICS, AND POWER

What forces shape the political process? Towards what ends? In whose interests? In this course we will investigate these questions by focusing on the ideas, institutions, and structures that have shaped the contemporary political landscape.

Lectures and tutorials (three hours); one term

Antirequisite(s): POLSCI 1G06 A/B

POLSCI 1AB3 - POLITICS AND POWER IN A GLOBALIZING WORLD

This course explores theories of conflict/cooperation, cases of international action/inaction, and the formal and informal rules written by global political actors. We will also ask questions about why states resemble or differ from one another.

Lectures and tutorials (three hours); one term

Antirequisite(s): POLSCI 1G06 A/B

POLSCI 2C03 - FORCE AND FEAR, CRIME AND PUNISHMENT

This course examines the use of the criminal justice system, other coercive policies and the use of actual force by governments in Canada and other democratic states and the impact it has on citizens.

Lectures and tutorials (three hours); one term

POLSCI 2D03 - CANADIAN DEMOCRACY

An introduction to institutions delimiting the practice of citizenship in Canada and of the political values they embody.

Three hours (lectures and tutorials); one term

POLSCI 2F03 - POLITICS, POWER AND INFLUENCE IN CANADA

This course analyzes who gets represented and whose interests get translated into public policies in Canada, including issues of inequality, immigration and citizenship, and representation by parties, interest groups and social movements.

Lectures and tutorials (three hours); one term

POLSCI 2H03 - GLOBALIZATION AND THE STATE

An overview of the impact that globalization has had on the powers of the state and an assessment of how states have tried to preserve their authority in the face of globalization.

Lectures and tutorials (three hours); one term

POLSCI 2I03 - GLOBAL POLITICS

A study of institutions and processes of the international political system.

Three hours (lectures and tutorials); one term

POLSCI 2J03 - GLOBAL POLITICAL ECONOMY

A study of institutions and processes of the international political economy.

Three hours (lectures and tutorials); one term

POLSCI 2M03 - GOVERNANCE, REPRESENTATION, AND PARTICIPATION IN DEMOCRACIES

A systematic introduction to comparing the politics of industrialized and post-industrial countries including electoral and government institutions, parties, ideologies and values, and political economy.

Three hours (lectures and tutorials); one term

POLSCI 2MN3 - REEL POLITICS

This course examines various trends and issues in politics as depicted in and through film.

This course cannot be used to satisfy any of the Political Science course requirements in fulfillment of a Political Science degree, however it can be applied to elective requirements.

Prerequisite(s): Registration in Level II or above

Three hours; one term

POLSCI 2NN3 - POLITICS BY DESIGN

What steps are involved in designing and implementing a primary-source research project? This course focuses on the key elements of the research process from developing original research questions, to gathering and analysing primary data.

Three hours (lectures and tutorials); one term

Prerequisite(s): POLSCI 1AB3 or POLSCI 1G06 A/B

Antirequisite(s): POLSCI 3N06 A/B

(See Note 4)

POLSCI 2006 A/B - POLITICAL THEORY

An introduction to political theory that includes Classical Greek thought, early modern natural right theory and contemporary political theory.

Three hours (lectures and tutorials); two terms (see *Note 5* above.)

POLSCI 2PF3 - POLITICS OF FUNNY

Examination of politics through the lens of comedy, from stand up to satirical news and including perspectives on race, class, gender, and free speech.

Lectures and tutorials (three hours); one term

Prerequisite(s): Registration in Level II or above

POLSCI 2U03 - PUBLIC POLICY AND ADMINISTRATION

This course examines the forces and factors influencing government policy decisions and the implementation of those policy choices from Canadian and comparative perspectives as means of understanding the distribution of wealth and power in society.

Lectures and tutorials (three hours); one term

POLSCI 2U53 - US POLITICS

An introduction into the politics and institutions of the United States of America.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

POLSCI 2XX3 - POLITICS OF THE DEVELOPING WORLD

An examination of major theoretical approaches to the study of development and underdevelopment, such as modernization, politics of order, dependency and modes of production.

Three hours (lectures and tutorials); one term

POLSCI 3B03 - HONOURS ISSUES IN INTERNATIONAL RELATIONS AND GLOBAL PUBLIC POLICY

In-depth examination of a theoretical and empirical issue or topic in international relations or global public policy. Specific topic to be chosen by the instructor.

Three hours; (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above of an Honours Political Science Program. (See *Note 8* above.)

POLSCI 3BB3 - POLITICAL COMMUNICATION: CANADA AND THE WORLD

The relationship between politics and the media is analysed in terms of issues such as political news coverage, electioneering, political marketing, policy formation and publicity, and agenda setting and public opinion.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above of a Communication Studies or Political Science program; or POLSCI 1AA3 and 1AB3 or 1G06 and registration in Level III or above of the Honours Social Psychology (B.A.) program

Cross-list(s): CMST 3D03

POLSCI 3C03 - GOVERNMENT AND POLITICS OF INDIGENOUS PEOPLE

An historical examination of the leadership and politics in Canada's indigenous communities, with a particular focus on pre-contact political structures, the Indian Act and its consequences, and contemporary social questions.

Three hours; (lectures and discussion); one term

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the instructor or registration in Honours Political Science Specialization in Public Law and Judicial Studies.

Cross-list(s): INDIGST 3J03

This course is administered by Indigenous Studies.

POLSCI 3CC3 - POLITICAL AUTHORITY: 20TH-CENTURY POLITICAL THEORY

An examination of major themes in political theory in the 20th century focusing on concerns about legitimate political authority and the nature of power and human relations in modern society.

Lectures and discussion (three hours); one term

Prerequisite(s): ARTSSCI 2A06 or POLSCI 2006 and registration in Level III or above

POLSCI 3CL3 - CONSTITUTIONAL AND PUBLIC LAW IN CANADA

This course examines how law mediates the relationship between government and citizens with a focus on the constitutional, administrative and criminal law in Canada.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above

Antirequisite(s): POLSCI 3NN6 A/B

POLSCI 3EE3 - INTERNATIONAL RELATIONS: NORTH-SOUTH

An examination of recent North-South relations concentrating on such issues as commodity trade, protectionism, the debt crisis and negotiations over a new international economic order.

Three hours; (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above

Priority will be given to students registered in a Political Science program. (See *Note 7* above.)

POLSCI 3FG3 - PUBLIC SERVICE LEADERSHIP

Focuses on core leadership competencies identified by the federal public service as key in dynamic organizations and effective leaders.

Three hours; (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above of an Honours program

Antirequisite(s): SOCSCI 3EL3

POLSCI 3G03 - ETHNICITY AND MULTICULTURALISM: THEORY AND PRACTICE

An examination of ethnicity, multiculturalism and citizenship in theoretical and comparative perspectives, principally in industrially advanced societies.

Three hours (lectures and discussion); one term

Prerequisite(s): Six units of Political Science and registration in Level III or above. (See *Note 7* above.)

POLSCI 3GC3 - GLOBAL CLIMATE CHANGE

This course provides students with an introduction to the domestic and international politics of climate change.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in level III or above

Cross-list(s): GEOG 3EG3

Not open to students with credit in POLSCI 3B03 if the topic was Global Climate Change.

POLSCI 3GG3 - FEDERALISM

An analysis of the constitutional framework, evolution, and structure of the federal system in Canada and/or other Western countries.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above. (See *Note 7* above.)

POLSCI 3H03 - HONOURS ISSUES IN COMPARATIVE POLITICS

Examination of a theoretical and empirical issue or topic in comparative politics of the developing or developed world. Specific topic to be chosen by instructor.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above of an Honours Political Science Program. (See *Note 8* above.)

POLSCI 3I03 - TOPICS IN AMERICAN POLITICS

The study of a central component of the U.S. political system.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above

POLSCI 3I03 may be repeated, if on a different topic, to a total of six units.

Priority will be given to students registered in a Political Science program. (See *Note 9* above.)

POLSCI 3J03 - HONOURS ISSUES IN CANADIAN POLITICS AND CANADIAN PUBLIC POLICY

In-depth examination of a theoretical and empirical issue or topic in Canadian politics or Canadian public policy. Specific topic to be chosen by instructor.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above of an Honours Political Science Program. (See *Note 8* above.)

POLSCI 3JJ3 - PROVINCIAL POLITICS IN CANADA

A study of the development, nature and functioning of the political systems of the Canadian provinces.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above. (See *Note 7* above.)

POLSCI 3JR3 - THE RULE OF LAW AND LEGAL AND JUDICIAL REFORMS IN THE DEVELOPING WORLD

The course offers an examination of legal systems throughout the developing world following World Bank, IMF, international aid agencies' push to homogenize the rule of law through legal and judicial reforms.

Three hours (lectures); one term

Prerequisite(s): POLSCI 2XX3 or permission of the instructor

POLSCI 3K03 - MIGRATION AND CITIZENSHIP: CANADIAN, COMPARATIVE AND GLOBAL PERSPECTIVES

This course examines immigration as a local, national and global phenomenon. It considers the process of incorporation of immigrants into receiving societies, and the implications of migration for our understanding of citizenship and the nation-state.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above. (See *Note 7* above.)

POLSCI 3KA3 - INDIGENOUS HUMAN RIGHTS

A study of government policies and their impact on Indigenous Peoples, specifically Indian Affairs in Canada and the United States. Topics will include individual and collective rights of Indigenous Peoples and the conceptual problems which arise in a Westernized justice system.

Lectures and seminars (three hours); one term

Prerequisite(s): Three units of Level II Indigenous Studies or permission of the instructor or registration in Honours Political Science Specialization in Public Law and Judicial Studies.

Cross-list(s): INDIGST 3K03

This course is administered by Indigenous Studies.

POLSCI 3KK3 - GENOCIDE: SOCIOLOGICAL AND POLITICAL PERSPECTIVES

An examination of genocide and other extreme crimes against humanity.

Three hours; one term

Prerequisite(s): Registration in Level III or above

Antirequisite(s): SOCSCI 2C03

Cross-list(s): SOCIOL 3KK3

Priority will be given to students registered in a Political Science or Sociology program. (See *Note 7* above.)

POLSCI 3LA3 - RELIGION AND POLITICS

The relationship between religion and politics is explored by way of readings by Locke, Rousseau, and Schmitt, and case studies concerning the place of religion in public life.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): RELIGST 3CC3

POLSCI 3LB3 - GLOBALIZATION AND THE WORLD ORDER

Addresses the past and current dynamics of globalization and how global systems have evolved into their current forms, including global economy, global governance and citizenship.

Lectures and discussion (three hours); one term

Prerequisite(s): One of POLSCI 2I03, 2J03; and registration in Level III or above

POLSCI 3LC3 - SOUTHEAST ASIAN POLITICS

Examines the politics of select Southeast Asian countries including history, economy, regime type, civil-military relations, party system, socio-political cleavages, human rights and development.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above

POLSCI 3LL3 - DEVELOPMENT AND PUBLIC POLICY

An examination of critical issues in public policy as they impact on the process of development.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above (see *Note 7* above.)

POLSCI 3LP3 - TOPICS IN LAW AND POLICY

In-depth examination of a specific area or field of law and its intersection with politics and public policy at the domestic and/or international level. Specific topic to be chosen by the instructor.

Three hours (lectures); one term

Prerequisite(s): Registration in Level III or above

POLSCI 3NN3 - STATISTICAL ANALYSIS OF PRIMARY DATA

Social scientific research often produces enormous quantities of primary data on voters, states, beliefs, and actions. This course highlights statistical techniques we can use to simplify that data allowing us to identify patterns and relationships.

Three hours (lectures and labs); one term

Prerequisite(s): POLSCI 2NN3

Antirequisite(s): POLSCI 3N06

(See *Note 4* above.)

POLSCI 3PB3 - POLITICS FROM BELOW

This course examines social and political problems with large-scale democracies and considers several contemporary responses that, in their own distinctive ways, turn to community/locality.

Lectures and discussion (three hours); one term

Prerequisite(s): ARTSSCI 2A06 A/B or POLSCI 2006 A/B and registration in Level III or above

POLSCI 3PR3 - PRACTICE OF POLITICS

Connects theories and generalizations about politics with experience on the ground. Students engage real-world issues, while reflecting upon issues of citizenship, power, opportunity, and exclusion.

One term

Prerequisite(s): Registration in Level III or above Political Science; and permission of the Department

Antirequisite(s): SOCSCI 3EL3

POLSCI 3Q03 - THE CAUSES OF WAR

An examination of theoretical perspectives on the causes of war and conditions for peace between and within political communities.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above

Priority will be given to students registered in a Political Science program. (See Note 7 above.)

POLSCI 3RF3 - THE CHARTER OF RIGHTS AND FREEDOMS

An examination of the Charter of Rights and Freedoms and its interpretation and impact on governments, public policy and governance in Canada.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above

Antirequisite(s): POLSCI 3NN6 A/B

POLSCI 3UU3 - READING COURSE

Topics to be arranged between an individual student and instructor.

One term

Prerequisite(s): Registration in Level III or IV of any program in Political Science, and the written permission of an Undergraduate Advisor on behalf of the Department. A written proposal must be submitted to the Department by the instructor prior to the term in which the course is to be taken.

POLSCI 3V03 - GENDER AND POLITICS

Theoretical and empirical approaches to understanding the role of gender in politics, including electoral politics, democratization, peace and security, organized womens movements.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above. (See *Note 7* above.)

POLSCI 3VV3 - DEMOCRATIC THEORY

An examination of historical and contemporary debates about democracy and its challenges.

Lectures and discussion (three hours); one term

Prerequisite(s): ARTSSCI 2A06 A/B or POLSCI 2006 A/B and registration in Level III or above

POLSCI 3WP3 - WORKING IN POLITICS

This course will provide students with the opportunity to earn academic credit for their work in an employment or internship position. The department does not provide positions, but may assist students in finding their own position.

Prerequisite(s): Registration in Level II or above; and permission of the Department

POLSCI 3Y03 - DEMOCRATIZATION AND HUMAN RIGHTS

A review of the process of democratization and the forces that drive it and an assessment of the place of human rights in emerging democracies.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above. (See *Note 7* above.)

POLSCI 3Z03 - CANADIAN PUBLIC SECTOR MANAGEMENT

The organizational arrangements for implementing public policies in Canada, including an assessment of their efficiency, effectiveness and accountability.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level III or above. (See *Note 7* above.)

POLSCI 4AA6 A/B - CONTEMPORARY POLITICS

An in-depth and extensive examination of theoretical, conceptual, methodological and/or empirical issues associated with a specific topic affecting the practice of politics in modern times.

Three hours (seminar); two terms

Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4CA3 - ISSUES IN CANADIAN POLITICS

An examination of the major issues in contemporary Canadian politics, with a particular emphasis on democratic institutions.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4CF3 - CANADIAN FOREIGN POLICY

This seminar will consider the theories and practice of Canadian foreign policy.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4D06 A/B - INTERNATIONAL POLITICS

In-depth and extensive examination of theoretical, conceptual, methodological and/or empirical issues associated with a specific topic in international relations, global politics or global public policy.

Three hours (seminar); two terms

Prerequisite(s): One of POLSCI 2I03 or 2J03; and registration in Level IV Honours Political Science

POLSCI 4DV3 - DEATH AND VIOLENCE

Is violence a continuation of politics? Is death the end? Considers topics in mortality and vulnerability including self-sacrifice, revolution, tragedy, grief and the hallowed dead.

Seminar (three hours); one term

Prerequisite(s): 3 units of Level III Political Theory and registration in Level IV Honours Political Science

POLSCI 4FF3 - RIGHTS AND JUSTICE

An examination of major debates in liberal political theory, with emphasis on rights, individualism, and egalitarianism.

Three hours (seminar); one term

Prerequisite(s): ARTSSCI 2A06 A/B or POLSCI 2006 A/B and registration in Level IV Honours Political Science

POLSCI 4G06 A/B - POLITICS OF PUBLIC POLICY

An examination of the political causes and mechanisms that shape public policies, such as political parties, interest groups, policy legacies, and how they influence policy choices on challenging issues as well as account for cross-national differences.

Seminar (three hours); two terms

Prerequisite(s): one course in Public Policy or Comparative Politics; and registration in Level IV Honours Political Science

POLSCI 4GC3 - ADVANCED ISSUES IN GLOBAL CITIZENSHIP

This seminar critically assesses what it means to be a global citizen in relation to pressing global challenges, including refugee movements, climate change, corporate responsibility, humanitarian interventions, and global inequality.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Political Science Specialization in Global Citizenship

POLSCI 4GG3 - CONCEPTUAL ISSUES IN GLOBAL POLITICS

An examination of contending theoretical approaches and issues to global politics.

Three hours (seminar); one term

Prerequisite(s): POLSCI 2I03 and registration in Level IV Honours Political Science

POLSCI 4HH3 - CRITICAL THEORY

An examination of selected critical political theories from the 1930s to the present.

Seminar (three hours); one term

Prerequisite(s): ARTSSCI 2A06 A/B or POLSCI 2006 A/B and registration in Level IV Honours Political Science

POLSCI 4HR3 - HUMAN RIGHTS

An examination of the concept of human rights as reflected in international declarations and practices.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4JJ3 - COSMOPOLITANISM

An examination of historical and contemporary debates about the idea that we should think and act as citizens of the world.

Seminar (three hours); one term

Prerequisite(s): ARTSSCI 2A06 A/B or POLSCI 2006 A/B and registration in Level IV Honours Political Science

Antirequisite(s): POLSCI 4C06

POLSCI 4JS3 - JUDICIAL STUDIES

An examination of the theories, factors and principles underlying the impact of the judiciary on political and policy outcomes in democratic states.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV Honours Political Science Specialization in Public Law and Judicial Studies

POLSCI 4KB3 - NON-WESTERN INTERNATIONAL RELATIONS

This seminar challenges the assumptions found in the 'canonical' readings of IR Theory. It draws on a plethora of Non-Western thinkers such as Frantz Fanon, Aimé Césaire, Al-Afghani, Gandhi, Soekarno, Kwame Nkrumah, and Edward Said, among others.

Three hours (seminar); one term

Prerequisite(s): POLSCI 2I03 and registration in Level IV Honours Political Science.

POLSCI 4KC3 - COMPARATIVE DEMOCRATIZATION

Concepts, theories and issues in democratization, including: definitions and measurement, emergence and consolidation; institutional design, party and electoral systems, rule of law, political culture, civil society, media freedom and foreign assistance.

Seminar (three hours); one term

Prerequisite(s): one course in Comparative Politics and registration in Level IV Honours Political Science

POLSCI 4KK3 - ADVANCED ISSUES IN GLOBAL SECURITY

An examination of conceptual issues and particular cases in contemporary thinking about the global security environment.

Three hours (seminar); one term

Prerequisite(s): One of POLSCI 2I03 or POLSCI 2J03 and registration in Level IV Honours Political Science

POLSCI 4LA3 - POLITICS IN LATIN AMERICA

An examination of Latin America's longstanding hegemonic crisis and corresponding ideologies such as populism, corporatism, and authoritarianism.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4LC3 - RESEARCH ON LAW AND COURTS

This course reviews the methodological and empirical foundations for judicial research and requires the completion of a major research paper in the field.

Three hours (seminar); one term

Prerequisite(s): Registration in Level IV Honours Political Science Specialization in Public Law and Judicial Studies

POLSCI 4NN3 - STUDIES IN GLOBAL POLITICAL ECONOMY

An examination of selected issues in the global political economy.

Three hours (seminar); one term

Prerequisite(s): POLSCI 2J03 and registration in Level IV Honours Political Science

POLSCI 4006 A/B - CANADIAN POLITICS

In-depth extensive examination of the theoretical, conceptual, methodological and/or empirical issues associated with a specific topic in Canadian politics or Canadian public policy.

Seminar (three hours); two terms

Prerequisite(s): POLSCI 1AA3 and 1AB3 or POLSCI 1G06; and registration in Level IV Honours Political Science

POLSCI 40L3 - ORIGINS OF LAW

Is the birth of law inevitable? Why? Considers topics such as divinity, rationality, performativity, and "the people" in the development and reform of legal order.

Seminar (three hours); one term

Prerequisite(s): ARTSSCI 2A06 A/B or POLSCI 2006 A/B and registration in Level IV Honours Political Science

POLSCI 4PA3 - POLICY ANALYSIS AND IMPLEMENTATION

This course examines the methods to analyze the efforts of policy actors to improve policy outcomes through the development and implementation of policy options.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4PE3 - GLOBAL POLITICAL ECOLOGY

An introduction to the field of global political ecology which examines the politics of the relationship between global capitalism and the environment.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4PO3 - PUBLIC OPINION

This course examines the conceptual foundations and theoretical frameworks of public opinion research. It also develops practical skills by offering exercises in survey design and analysis.

Seminar (three hours); one term

Prerequisite(s): POLSCI 3NN3

POLSCI 4Q06 A/B - COMPARATIVE POLITICS

An in-depth an extensive examination of theoretical, conceptual, methodological and/or empirical issues associated with a specific topic in comparative politics.

Seminar (three hours); two terms

Prerequisite(s): One course in Comparative Politics and registration in Level IV Honours Political Science

POLSCI 4QQ3 - ISSUES IN INTERNATIONAL POLITICS

An examination of selected issues in international politics and foreign policy.

Three hours (seminar); one term

Prerequisite(s): One of POLSCI 2I03 or POLSCI 2J03 and registration in Level IV Honours Political Science

POLSCI 4RR3 - HEALTH POLICY IN THE INDUSTRIALIZED WORLD

Discussion of the Canadian health system and comparison to alternate examples (i.e. UK or US.) Topics include multilevel governance, reform initiatives, health spending, and tools for evaluation.

Seminar (three hours); one term

Prerequisite(s): POLSCI 2M03 and registration in Level IV Honours Political Science

POLSCI 4SS3 - PUBLIC OPINION AND POLICY

An examination of public opinion about public policies, like education, social assistance, and health care, through analysis of survey data from around the globe.

Seminar (three hours); one term

Prerequisite(s): A grade of at least B- in POLSCI 3NN3 and registration in Level IV Honours Political Science

POLSCI 4UF3 - US FOREIGN POLICY

This seminar will consider the theories and practice of current US foreign policy.

Seminar (three hours); one term

Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4Y03 - DOMINATION AND DECOLONIZATION

This course explores political theories of decolonization from the early 20th century to the present day criticizing the conceptual and practical foundations of empire. Seminar (three hours); one term
Prerequisite(s): ARTSSCI 2A06 A/B or POLSCI 2006 A/B and registration in a Level IV Honours Political Science (B.A.)

POLSCI 4YR3 - CHILD/YOUTH RIGHTS AND SECURITY IN GLOBAL POLITICAL PERSPECTIVE

An examination into how global power and politics construct, rely upon, constrain, regulate, diminish, and deny the possibilities and prospects for young people's political subjecthood. Seminar (three hours); one term
Prerequisite(s): Registration in Level IV Honours Political Science

POLSCI 4Z06 A/B - HONOURS ESSAY

A major research paper, supervised by a faculty member. The subject matter is to be different from that covered in 3UU3, if the student is registered or has credit in that course.
Prerequisite(s): Registration in Level IV Honours Political Science normally with a minimum C.A. of 9.0; and written permission of the faculty member supervising the students Honours Essay; and permission of the Department.

POLSCI 4ZZ3 - EXPERIENTIAL LEARNING IN RESEARCH

A major collaborative research project supervised by a faculty member and involving a unique course of instruction. one term
Prerequisite(s): Registration in Level IV Honours Political Science; and written permission of the faculty member supervising the research; and permission of the Department.
Not open to students with credit in POLSCI 3UU3 or POLSCI 4Z06 A/B if on a similar topic.

POLSCI 4ZZ6 A/B - EXPERIENTIAL LEARNING IN RESEARCH

A major collaborative research project supervised by a faculty member and involving a unique course of instruction.
Prerequisite(s): Registration in Level IV Honours Political Science; and written permission of the faculty member supervising the research; and permission of the Department.
Not open to students with credit in POLSCI 3UU3 or POLSCI 4Z06 A/B if on a similar topic.

PROCESS AUTOMATION TECHNOLOGY

Courses in Process Automation Technology are administered by the Bachelor of Technology Program.
 Engineering Technology Building (ETB), Room 121, ext. 20195
<http://mybtechdegree.ca>

For the Four-Year Program, registration is only permitted for courses of the same level in which the student is registered, unless otherwise specified.

PROCTECH 2CA3 - CAD FOR DESIGN

Two-dimensional drafting: drawing environment and commands, drafting settings, drawing editing, plotting output, dimensioning, orthographic projections and views, sectional and auxiliary views. Three-dimensional solid modeling: parts, assemblies, 2D drawings generation. One lab (three hours); first term
Prerequisite(s): Registration in level II or above of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 2CE3 - CHEMICAL ENGINEERING I: MASS BALANCE

Steady-State mass balances with possible recycle and reactions. Gas laws. Phase rule. Vapour-liquid equilibrium basics. Two lectures, one tutorial, one lab (two and one half hours); first term
Prerequisite(s): ENGTECH 1CH3, 1MC3, 1PH3 and registration in level II or above of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 2EC3 - CHEMICAL ENGINEERING II

Steady-state energy balances including possible reactions. Combined mass and energy balances. First and second law of thermodynamics. Physical/chemical equilibrium. Application to industrial processes. Drawing and interpretation of Piping and Instrumentation diagrams (P&ID). Two lectures, one tutorial, one lab (two and one half hours); second term
Prerequisite(s): ENGTECH 1MC3, PROCTECH 2CE3 and registration in level II or above of Automation Engineering Technology.

PROCTECH 2EE3 - ELECTRICITY AND ELECTRONICS II

Second course in electricity and electronics covers transformers, passive and active filters, and semiconductor diodes and transistors theory and applications. Three lectures, one tutorial, one lab (three hours); first term
Prerequisite(s): ENGTECH 1EL3, 1MC3 and registration in level II or above of Automation Engineering Technology.

PROCTECH 2I03 - INDUSTRIAL ORGANIC CHEMISTRY

A study of organic chemistry, including structure, nomenclature, major reactions and industrial applications. Emphasis will be placed on industrial manufacturing and uses. Lab sessions emphasize common organic chemistry techniques. Three lectures, one lab (three hours); second term
Prerequisite(s): ENGTECH 1CH3 and registration in level II or above of Automation Engineering Technology.

PROCTECH 2IC3 - INSTRUMENTATION AND CONTROL

This course covers common pressure, level, temperature and flow measuring systems that provide the basis to specify, design, construct, test and tune a control loop using a PID controller. A distributed control system is also introduced. Three lectures, one lab (three hours); first term
Prerequisite(s): ENGTECH 1MC3 and registration in level II or above of Automation Engineering Technology.

PROCTECH 2PL3 - INTRODUCTION TO PLC PROGRAMMING

An introduction to Programmable Logic Controllers (PLCs) and their use in automation applications. AC and DC motors, PLC basics, Input/output, memory addressing and program control instructions, PLC networking, motor control protection and starting. Three lectures, one lab (three hours); second term
Prerequisite(s): ENGTECH 1MT3, PROCTECH 2EE3, 2IC3 and registration in level II or above of Automation Engineering Technology.

PROCTECH 3CE3 - CHEMICAL ENGINEERING III: UNIT AND PROCESS DESIGN

This course covers simulation and analysis of integrated process units within a chemical process plant. Key topics covered are: process flow diagrams and simulation models, process analysis using simulation model, rudimentary process optimization and plant simulation. Three lectures, one lab (two hours); first term
Prerequisite(s): ENGTECH 2MA3, PROCTECH 2EC3, 3CT3 and registration in Level IV of Automation Engineering Technology.

PROCTECH 3CT3 - CONTROL THEORY I

This course covers analysis and design of closed loop control systems. System characteristics and performance, stability analysis, system types, performance improvement, digital control systems, compensation, filtering and motion system tuning.

Three lectures, one lab (three hours); first term

Prerequisite(s): ENGTECH 2MT3, PROCTECH 2IC3, 2PL3 and registration in level III or above of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 3MC3 - MOTION CONTROL AND ROBOTICS

The motion control part of this course covers the theory and operation of AC and DC drive systems and digital motion control. The robotics portion of the course covers robot anatomy and attributes, end effectors, robot programming and applications.

Three lectures, one lab (three hours); first term

Prerequisite(s): PROCTECH 3CT3, 3PL3, 3SC3 and registration in Level IV of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 3PL3 - ADVANCED PLC PROGRAMMING AND CONTROL

Advanced PLC programming concepts such as files, subroutines and indexing, industrial networks, PID and PWM, HMI, AC and DC drives integration and implementation in PLCs, and automation design project.

Three lectures, one lab (three hours); first term

Prerequisite(s): PROCTECH 2PL3 and registration in level III or above of Automation Engineering Technology.

PROCTECH 3SD3 - PLCs AND NETWORKING

DCS architecture, bus standards and protocols, multi-loop PID control, workstation design, system safety, redundancy and maintenance and SCADA project design.

Three lectures, one lab (three hours); first term

Prerequisite(s): PROCTECH 3CT3, 3SC3 and registration in Level IV of Automation Engineering Technology.

PROCTECH 4AS3 - ADVANCED SYSTEM COMPONENTS AND INTEGRATION

This course covers advanced sensor and actuator technology, robotics and vision systems, automated workcell, flexible manufacturing systems, computer integrated manufacturing. Hardware and software integration issues, when and how to automate, OPC and HMI.

Three lectures, one lab (three hours); first term

Prerequisite(s): PROCTECH 4IC3, 4IT3; ENGTECH 4EEO and registration in level IV of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 4CT3 - ADVANCED CONTROL THEORY II

This course covers process characteristics, methods of analysis, controller design, adaptive control, loop tuning, process control improvement examples with emphasis on plant control and tutorial exercises using MATLAB.

Three lectures, one tutorial; second term

Prerequisite(s): PROCTECH 3CE3, 3CT3 and registration in level IV of Automation Engineering Technology.

Co-requisite(s): PROCTECH 4IC3

PROCTECH 4IC3 - INDUSTRIAL NETWORKS AND CONTROLLERS

Corporate and industrial networks, OSI model, Ethernet and TCP/IP, Modbus, Foundation Field bus, DeviceNet, PROFIBUS, AS-I, proprietary buses and protocols and interfaces, distributed I/O, drivers and devices and their implementation in PC and PLC based systems.

Three lectures, one lab (three hours); second term

Prerequisite(s): PROCTECH 3MC3, 3PL3, 3SD3 and registration in level IV of Automation Engineering Technology.

Co-requisite(s): PROCTECH 4CT3

PROCTECH 4IT3 - INTERNET TECHNOLOGIES AND DATABASES

This course covers the following topics: internet technologies and standards, database concepts, structured query language elements, web database processing and client and server side scripts.

Two lectures, one lab (two hours); second term

Prerequisite(s): ENGTECH 1CP3, 1PR3 and registration in level IV of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 4MH3 - MACHINE HEALTH AND REMOTE MONITORING

This course covers machine monitoring using an electronic interface to a machine PLC and with Direct Machine Interface (DMI) modules, installation of noise and vibration sensor network and analysis of data from the sensors. It also covers, signal processing, mobile and remote monitoring through sensors, wired and wireless Local Area Networks, cloud, and the Internet of Things (IoT).

Three lectures, one lab (1.5 hours); first term

Prerequisite(s): ENGTECH 4EEO and registration in level IV of Automation Engineering Technology program or the Automotive and Vehicle Engineering Technology program

First offered in Fall 2020.

PROCTECH 4MS3 - MANUFACTURING TECHNOLOGIES

This course examines manufacturing and production technologies, material selection and design process, measurement and quality assurance. Plastics, steels, and ceramics manufacturing, environmental and safety management, asset management and reliability.

Three lectures, one lab (two hours every other week); first term

Prerequisite(s): PROCTECH 2CA3, 4MT2; ENGTECH 4EEO and registration in level IV of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 4MT2 - MATERIALS TECHNOLOGY

This course covers classes of engineering materials, their important properties and applications. Topics include: metals and alloys, stress and strain, plastics and elastomers, ceramic materials and selection of a material for an application.

Two lectures; second term

Prerequisite(s): ENGTECH 1CH3, 1PH3 and registration in level IV of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 4SS3 - SYSTEM SPECIFICATION AND DESIGN

This course focuses on requirement analysis, functional design, detailed design, reliability, maintainability and system life cycle. Methodologies and tools, requirements and validations, requirements for safety-related systems and mission critical systems.

Two lectures, one tutorial; first term

Prerequisite(s): PROCTECH 2CA3 and registration in level IV of Automation Engineering Technology

PROCTECH 4TR1 - CAPSTONE DESIGN PROJECT I

This course requires students to research, design, develop and implement an independent project. The project plan and a model developed will be documented as a technical report and presented in a seminar.

One tutorial, one lab (two hours); second term

Prerequisite(s): ENGTECH 3MT3, PROCTECH 3CE3, 3MC3, 3SD3 and registration in level IV of Automation Engineering Technology Co-op (B.Tech.)

PROCTECH 4TR3 - CAPSTONE DESIGN PROJECT II

This course is a continuation of PROCTECH 4TR1 and it requires students to conduct further research, modify/refine project design, develop and implement the independent project proposal submitted as a part of the Capstone Design Project I course. The project will be documented as a technical report and presented in a seminar.

One tutorial, one lab (three hours); first term

Prerequisite(s): PROCTECH 4TR1 , 4IC3 , 4IT3 ; ENGTECH 4EE0 and registration in level IV of Automation Engineering Technology.

PSYCHOLOGY

Courses in PSYCH are administered by the Department of Psychology, Neuroscience & Behaviour.

Psychology Building, Room 102, ext. 23000

<http://www.science.mcmaster.ca/pnb/>

Department Notes

1. The PNB course designation stands for Psychology, Neuroscience & Behaviour. PNB courses require registration in a program in the Department of Psychology, Neuroscience & Behaviour. PSYCH courses are open to all students who meet the stated prerequisites.
2. The University reserves the right to limit enrolment in any course. Where priorities have to be established, first consideration will be given to students registered in an Honours program in the Department of Psychology, Neuroscience & Behaviour.
3. The Psychology, Neuroscience & Behaviour Department pre-registration ballot will include the thesis courses (PNB 4D06 A/B, 4D09 A/B, 4DD6 A/B), and the Individual Study courses (PNB 3Q03 A/B S, 3Q03 A/B S, 4Q03 A/B S, 4Q03 A/B S). Students wishing to take these courses must complete and submit a ballot by **mid February**. Students will be informed of the outcome by mid March. Specific dates will be announced during the fall term. Ballots can be obtained from the Psychology, Neuroscience & Behaviour Department web site at <http://www.science.mcmaster.ca/pnb/>.
4. Students interested in Honours or Combined Honours Psychology, Neuroscience & Behaviour programs should be aware that they will not be able to complete the program requirements through evening courses.

Courses

If no prerequisite is listed, the course is open.

See also courses in *HUMBEHV* and *PNB*.

PSYCH 1F03 - SURVEY OF PSYCHOLOGY

Students completing this course will have a good understanding of the methods, research questions and major areas of psychology. This course would be ideal for students looking to complete an elective requirement without necessarily planning to continue study in psychology. Students considering applying to an Honours Psychology, Neuroscience & Behaviour program are referred to PSYCH 1X03 for which this course is an anti-requisite.

On-line web modules, discussions and testing; one term

Antirequisite(s): PSYCH 1N03, 1X03

Not open to students with credit or registration in ISCI 1A24 A/B.

PSYCH 1FF3 - SURVEY OF BIOLOGICAL BASIS OF PSYCHOLOGY

This course introduces important themes as the foundations to investigate psychology, neuroscience and behaviour with an emphasis on sensory systems, and behaviours critical to survival. This course would be ideal for students looking to complete an elective requirement without necessarily planning to continue study in psychology. Students considering applying to an Honours Psychology, Neuroscience & Behaviour program are referred to PSYCH 1XX3 for which this course is an anti-requisite.

Online web modules, discussions and testing; one term

Prerequisite(s): Grade 12 Biology U or credit or registration in one of BIOLOGY 1A03, 1M03, 1P03; or registration in a Nursing program; or registration in Level I or above of an Arts & Sciences program

Antirequisite(s): PSYCH 1NN3, 1XX3

Not open to students with credit or registration in ISCI 1A24 A/B or students registered in the Bachelor of Health Sciences (Honours) (B.H.Sc.) program or B.Sc.N. Conestoga campus.

PSYCH 1N03 - INTRODUCTION TO PSYCHOLOGY, NEUROSCIENCE & BEHAVIOUR

This course introduces the scientific methods used to study the psychology of higher order processes and interpersonal behaviour.

Lecture, web modules, weekly tutorials (three hours); one term

Prerequisite(s): Registration in B.Sc.N., Conestoga campus

Antirequisite(s): PSYCH 1F03, 1X03

PSYCH 1NN3 - FOUNDATIONS OF PSYCHOLOGY, NEUROSCIENCE & BEHAVIOUR

This course introduces important themes as the foundations to investigate psychology, neuroscience and behaviour with an emphasis on sensory systems, and behaviours critical to survival.

Three hours (lecture, web modules, weekly tutorials); one term

Prerequisite(s): Registration in B.Sc.N., Conestoga campus

Antirequisite(s): PSYCH 1FF3, 1XX3

PSYCH 1X03 - INTRODUCTION TO PSYCHOLOGY, NEUROSCIENCE & BEHAVIOUR

This course introduces the scientific methods used to study the psychology of higher order processes and interpersonal behaviour. Students interested in applying to an Honours Psychology, Neuroscience & Behaviour program are encouraged to take PSYCH 1X03 rather than PSYCH 1F03.

Lecture, web modules, weekly tutorials (three hours); one term

Antirequisite(s): PSYCH 1F03, 1N03

It is recommended that students without Grade 12 Biology U complete BIOLOGY 1P03 prior to or concurrently with this course.

Not open to students with credit or registration in ISCI 1A24 A/B or registered in B.Sc.N. Conestoga campus.

PSYCH 1XX3 - FOUNDATIONS OF PSYCHOLOGY, NEUROSCIENCE & BEHAVIOUR

This course introduces important themes as the foundations to investigate psychology, neuroscience and behaviour with an emphasis on sensory systems, and behaviours critical to survival. Students interested in applying to an Honours Psychology, Neuroscience & Behaviour program are encouraged to take PSYCH 1XX3 rather than PSYCH 1FF3.

Three hours (lecture, web modules, weekly tutorials); one term

Prerequisite(s): Grade 12 Biology U or credit or registration in one of BIOLOGY 1A03, 1M03, 1P03; or registration in a Nursing program; or registration in Level I or above of an Arts & Sciences program

Antirequisite(s): HTHSCI 1G03, PSYCH 1FF3, 1NN3

Not open to students with credit or registration in ISCI 1A24 A/B or students registered in the B.Sc.N. Conestoga campus.

PSYCH 2AA3 - CHILD DEVELOPMENT

A general survey of theories and mechanisms of child development, illustrated through examples from neural, perceptual, cognitive, social and emotional development.

Students in Honours programs are referred to PSYCH 3GG3 for which this course is an antirequisite.

Three lectures; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1F03, 1N03, 1X03, and registration in Level II or above; or registration in Level II or above of an Arts & Science or Bachelor of Health Sciences (Honours) (B.H.Sc.) program

Antirequisite(s): PSYCH 3GG3

PSYCH 2AP3 - ABNORMAL PSYCHOLOGY: FUNDAMENTALS AND MAJOR DISORDERS

Provides students with a survey of the fundamentals of psychopathology, focusing on the description and etiology of major disorders.

Three lectures; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1F03, 1N03, 1X03, and registration in Level II or above; or registration in Level II or above of an Arts & Science or Bachelor of Health Sciences (Honours) (B.H.Sc.) program

PSYCH 2B03 - PERSONALITY

An introduction to the scientific study of personality which will consider theory, assessment and research in five approaches to personality: psychodynamic, biological, trait, behavioural and humanistic.

Three lectures; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1F03, 1N03, 1X03, and registration in Level II or above; or registration in Level II or above of an Arts & Science or Bachelor of Health Sciences (Honours) (B.H.Sc.) program

PSYCH 2C03 - SOCIAL PSYCHOLOGY

An overview of research and theory in social psychology. Topics include, but are not limited to, social influence, persuasion, prejudice, aggression, altruism, sexuality, and processes related to attitude formation and change.

Three lectures; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1F03, 1N03, 1X03, and registration in Level II or above; or registration in Level II or above of an Arts & Science or Bachelor of Health Sciences (Honours) (B.H.Sc.) program

PSYCH 2E03 - SENSORY PROCESSES

General processes mediating sensation and perception. Topics include neural principles of sensory pathways, the measurement of perception and the role of sensory processes in behaviour.

Three lectures; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1FF3, 1NN3, 1XX3 and registration in Level II or above; or registration in Level II or above of an Arts & Science, B.H.Sc. (Honours), the Honours Music (Music Cognition) or any Honours Cognitive Science of Language program

PSYCH 2GG3 - LEARNING, MEASURING, AND SHAPING BEHAVIOUR

This course will survey principles of learning theories along with measurement and assessment of behaviour through theoretical, experimental, and real-world applications in humans and animals.

Lectures (three hours), one tutorial; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1F03, 1N03, 1X03 and registration in Level II or above; or registration in Level II or above of an Arts & Science or Bachelor of Health Sciences (Honours) (B.H.Sc.) program

PSYCH 2H03 - HUMAN LEARNING AND COGNITION

The psychological study of knowledge and how people use it. Topics include pattern recognition, remembering and reasoning.

Three lectures; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1F03, 1N03, 1X03 and credit or registration in one of PSYCH 1FF3, 1NN3, 1XX3, and registration in Level II or above; or registration in Level II or above of an Arts & Science, B.H.Sc. (Honours), Honours Music (Music Cognition) or any Honours Cognitive Science of Language program
Antirequisite(s): PNB 2XA3

PSYCH 2MP3 - INTRODUCTION TO MUSIC COGNITION

This course presents an overview of music cognition, covering such topics as musical acoustics, perception of melody, harmony and rhythm, social and emotional responses to music, and the evolution of music. In addition a basic introduction to music theory is included.

Three lectures; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1F03, 1FF3, 1X03, 1XX3 and registration in Level II or above; or registration in Level II or above of an Arts & Science, a B.H.Sc. (Honours) program, or an Honours Music Cognition program (B.A., B.Arts.Sc., B.Mus., B.Sc.); or permission of the instructor
Antirequisite(s): MUSIC 2MC3, MUSICCOG 2MA3, PSYCH 2MA3

Cross-list(s): MUSICCOG 2MP3

This course is administered by the School of the Arts.

PSYCH 2NF3 - BASIC & CLINICAL NEUROSCIENCE

The physiology of the neuron, and the functional anatomy of sensory, motor, and cognitive systems, with a focus on both basic neuroscience and neurological disorders.

Two lectures, one tutorial; one term

Prerequisite(s): ISCI 1A24 A/B or one of PSYCH 1FF3, 1NN3, 1XX3 and registration in Level II or above; or registration in Level II or above of an Arts & Science, B.H.Sc. (Honours), the Honours Music (Music Cognition) or any Honours Cognitive Science of Language program

Not open to students with credit or registration in ISCI 2A18 A/B.

PSYCH 3A03 - AUDITION

An introduction to the biology of hearing with an emphasis on fundamental auditory principles and underlying physiological mechanisms. Topics include physical acoustics, sound analysis, anatomy and physiology of mammalian auditory system, and perception and psychoacoustics.

Three lectures, one tutorial; one term

Prerequisite(s): One of BIOLOGY 2A03, ISCI 2A18 A/B, LIFESCI 2CC3, PNB 2XA3, PNB 2XB3, PSYCH 2E03, 2NF3

PSYCH 3AB3 - ADOLESCENT PSYCHOLOGY

This course will explore cognitive, social, emotional, neurological and physical development from puberty through the teenage years.

Three lectures; one term

Prerequisite(s): PSYCH 2AA3 or 3GG3

PSYCH 3AC3 - HUMAN SEXUALITY

This course will survey research and theory on human sexuality from evolutionary, social, cultural, and clinical perspectives.

Three lectures; one term

Prerequisite(s): One of PSYCH 2AA3, 2C03, 3GG3

PSYCH 3AG3 - AGING

A survey of sensory, cognitive, personality, and social changes that occur during the normal aging process.

Two lectures, one tutorial; one term

Prerequisite(s): PSYCH 2AA3 or 3GG3

Antirequisite(s): GERONTOL 3D03, HLTHAGE 3F03

PSYCH 3B03 - SPECIAL POPULATIONS

Discusses selected topics related to normal and abnormal development in children, including behavioral affective, perceptual, and cognitive disorders and developmental disability.

Two lectures (one hour); tutorial (one hour); one term

Prerequisite(s): PSYCH 2AP3; and credit or registration in PSYCH 2AA3 or 3GG3; and registration in Level III or IV of an Honours program.

PSYCH 3BA3 - POSITIVE PSYCHOLOGY

This course will explore the physiology, psychological effects, and adaptive value of positive emotional and cognitive responses to the outside world, and to our own thoughts and behaviors.

Three lectures; one term

Prerequisite(s): PSYCH 2B03

PSYCH 3BN3 - COGNITIVE NEUROSCIENCE I

An introduction to cognitive neuroscience, which is aimed at the study of psychological, computational, and neuroscientific bases of perception and cognition. Classes include traditional lectures, student presentations and critical discussions of articles from the current research literature.

Three lectures; one term

Prerequisite(s): One of LIFESCI 2CC3, PNB 2XB3, PSYCH 2E03, 2NF3, and one of PNB 2XA3, 3MM3, PSYCH 2H03, and one of ARTSSCI 2R03, PNB 3XE3, STATS 2B03, 2MB3; or one of PNB 2XA3, 3MM3, PSYCH 2H03 and ISCI 2A18 A/B

PSYCH 3C03 - CHILD LANGUAGE ACQUISITION

Language behaviour and development in children, from birth to school age. The course examines how data from children's language acquisition can inform linguistic theory.

Three hours; one term

Prerequisite(s): LINGUIST 1A03; and one of LINGUIST 1AA3, PNB 2XA3 or PSYCH 2H03

Cross-list(s): LINGUIST 3C03

This course is administered by the Department of Linguistics and Languages.

PSYCH 3CB3 - ATTITUDES AND PERSUASION

This course will explore social psychological theories and research relating to attitude formation and change, and the impact of attitudes on behavior.

Three lectures; one term

Prerequisite(s): PSYCH 2C03

PSYCH 3CC3 - FORENSIC PSYCHOLOGY

Introduces students to applications of psychology to the law. Includes topics such as eyewitness testimony, criminal profiling, assessment of criminal responsibility, jury psychology and psychopathy.

Three lectures; one term

Prerequisite(s): Completion of at least 9 units of Psychology (PSYCH and/or PNB) courses and registration in Level III or above; or ISCI 2A18

PSYCH 3D03 - THE MULTISENSORY MIND

This course will consider how unisensory phenomena rely on more than one sensory modality. Topics will include: flavour, posture, music, empathy, synesthesia and sensory substitution.

Three lectures; one term

Prerequisite(s): PNB 2XA3 or both PSYCH 2H03 and 2E03; and one of LIFESCI 2CC3, PNB 2XB3, PSYCH 2NF3 or ISCI 2A18 A/B; and registration in an Honours program

PSYCH 3EV3 - EVOLUTION AND MENTAL HEALTH

This seminar course explores how evolutionary theory can be used to examine fundamental issues in mental health science.

Three lectures; one term

Prerequisite(s): PNB 2XC3; and credit or registration in PSYCH 3F03 or 3T03; and registration in Level III or IV of an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

PSYCH 3F03 - EVOLUTION AND HUMAN BEHAVIOUR

The study of human social psychology and behaviour in light of evolutionary theories. Topics include family relations, sex differences, mate choice, cooperation and conflict, and universality and diversity across cultures.

Three lectures; one term

Prerequisite(s): One of ANTHROP 2D03, LIFESCI 2D03, PNB 2XC3, PSYCH 2GG3; or BIOLOGY 1A03, BIOLOGY 1M03; or BIOLOGY 1M03, HTHSCI 1I06 A/B; or ISCI 1A24 A/B

PSYCH 3FA3 - THE NEUROBIOLOGY OF LEARNING AND MEMORY

Learning and memory mechanisms will be discussed from several perspectives ranging from cognitive neuroscience to synaptic physiology.

Three lectures, one tutorial (two hours); one term

Prerequisite(s): One of ISCI 2A18 A/B, LIFESCI 2CC3, PNB 2XB3, PSYCH 2NF3

PSYCH 3GG3 - ESSENTIALS OF DEVELOPMENTAL PSYCHOLOGY

This course concentrates on theories and mechanisms of development. The evidence for biological and environmental influences on development are examined and the principles and mechanisms of development are illustrated through examples from neural, perceptual, cognitive, social and emotional development.

Three lectures; one term

Prerequisite(s): Six units from LIFESCI 2CC3, 2D03, PNB 2XA3, 2XB3, 2XC3, PSYCH 2E03, 2GG3, 2H03, 2NF3; and one of ARTSSCI 2R03, HTHSCI 1F03, 2A03, LINGUIST 2DD3, PNB 2XE3, SOCSCI 2J03, STATS 2B03, 2D03; and registration in an Honours program; or ISCI 2A18 A/B

Antirequisite(s): PSYCH 2AA3

PSYCH 3H03 - THE ARTS AND THE BRAIN

This course deals with the neurocognitive bases of the production and perception of the major art forms, including music, dance, the literary arts and the visual arts.

Three lectures; one term

Prerequisite(s): PNB 2XA3 or PSYCH 2E03; and registration in Level III or above of an Honours program

PSYCH 3JJ3 - SOCIO-EMOTIONAL DEVELOPMENT

Discusses historical and contemporary topics related to socio-emotional development from infancy to middle childhood, with an emphasis on the development of maladaptive social behaviours.

Three lectures; one term

Prerequisite(s): PSYCH 2C03; and credit or registration in one of PSYCH 2AA3 or 3GG3; and registration in Level III or IV of an Honours program

PSYCH 3M03 - MOTIVATION AND EMOTION

The biological basis of motivation and emotion in humans and other mammals, with an integration of evolutionary, physiological, developmental, and social perspectives.

Three lectures; one term

Prerequisite(s): One of LIFESCI 2D03, PNB 2XC3, PSYCH 2GG3; and one of ISCI 2A18 A/B, LIFESCI 2CC3, PNB 2XB3, PSYCH 2NF3

Not open to students with credit or registration in PSYCH 4Y03.

PSYCH 3MT3 - PSYCHOMETRICS

An introduction to theoretical and practical concepts in standardized psychological measurement. It will cover applications in areas, such as education, employment, health, and clinical psychology.

Three lectures; one term

Prerequisite(s): One of PSYCH 1F03, 1N03, 1X03, and one of PSYCH 1FF3, 1NN3, 1XX3, and one of ARTSSCI 2R03, COMMERCE 2QA3, ECON 2B03, HTHSCI 2A03, KINESIOL 3C03, LINGUIST 2DD3, PNB 2XE3, SOCSCI 2J03, STATS 2B03, 2D03, or credit or registration in HUMBEHV 3HB3 or 3ST3, and registration in Level III

or above; or registration in Level III or IV of an ISCI program or B.H.Sc. (Honours) program

PSYCH 3NL3 - COGNITIVE NEUROSCIENCE OF LANGUAGE

A survey of the current scientific literature dealing with brain function related to language processes in typical and special populations.

Three hours; one term

Prerequisite(s): Registration in Level III or IV of a program in Cognitive Science of Language or Psychology, Neuroscience & Behaviour

Antirequisite(s): LINGUIST 4F03

Cross-list(s): LINGUIST 3NL3

This course is administered by the Department of Linguistics and Languages.

PSYCH 3SP3 - THE SCIENCE OF PERFORMANCE

This course explores empirical, methodological and cultural aspects of the study of performance, with a principal focus on the performing arts (music, dance, and theatre).

Three lectures; one term

Prerequisite(s): Credit or registration in PNB 2XA3 or PSYCH 2H03; and one of ARTSSCI 2R03, HTHSCI 2A03, HUMBEHV 3HB3 or 3ST3, LINGUIST 2DD3, PNB 2XE3, 3XE3, SOCSCI 2J03, STATS 2B03, 2D03; and registration in Level III or IV of an Honours program; or ISCI 2A18 A/B. PSYCH 2MP3 (MUSICCOG 2MP3) is recommended.

Antirequisite(s): MUSICCOG 3MP3, 3MB3, PSYCH 3MP3, 3MB3

Cross-list(s): MUSICCOG 3SP3

PSYCH 3T03 - BEHAVIOURAL ECOLOGY

This course will explore proximate causes and ultimate function of behaviour from the perspective of evolutionary and ecological theory. Topics include aggression, altruism, kinship, parent-offspring interaction, sex and reproduction. In addition, students will have a chance to learn how behaviour can be studied to better understand human impacts on the environment.

Three lectures; one term

Prerequisite(s): One of BIOLOGY 2C03, 2F03, 3FF3, 3SS3, ISCI 2A18 A/B, LIFESCI 2D03, PNB 2XC3

Antirequisite(s): LIFESCI 3C03

PSYCH 3TT3 - SCIENCE OF TEACHING AND LEARNING

Students will gain practical experience with teaching methods and communication skills relevant to psychology, neuroscience and behaviour and explore issues in educational psychology. Applications must be submitted by March 1 of the preceding academic year, with selection for placements announced by May 15.

Three lectures; one term

Prerequisite(s): A grade of A- in both PSYCH 1X03 (or 1F03) and PSYCH 1XX3 (or 1FF3) or ISCI 1A24 A/B; and registration in Level III or IV of an Honours program; and permission of the instructor/ coordinator

PSYCH 3UU3 - PSYCHOLOGY OF LANGUAGE

This course discusses the cognitive and neurological basis of language comprehension and production, from an experimental perspective. The emphasis is on the processing of spoken language.

Three lectures; one term

Prerequisite(s): PNB 2XA3 or PSYCH 2H03; or LINGUIST 1A03, 1AA3; or permission of the instructor

PSYCH 3VV3 - HUMAN MEMORY

This course focuses on a selected set of themes that have shaped the study of human memory over the past half century. These themes will be considered in light of contemporary research that encourages critical analysis of widely held beliefs about human memory.

Three lectures; one term

Prerequisite(s): PNB 2XA3 or PSYCH 2H03; and registration in Level III or IV of an Honours program

PSYCH 3WA3 - THE MIND AS A WORK OF ART

This course explores how the arts can be used as a model to understand the nature of human cognition and behaviour. Through an analysis of the psychology and neuroscience of visual art, theatre, dance and music, we can develop an understanding of perception, learning, memory, motor control, reasoning, problem solving, decision making, language, emotion, motivation, and social cognition.

Three lectures; one term

Prerequisite(s): One of PNB 2XA3 or PSYCH 2H03 and registration in Level III or above of an Honours program

PSYCH 4BN3 - COGNITIVE NEUROSCIENCE II

Students work in small groups to conduct research into the cognitive neuroscience of different brain regions and how alcohol exposure affects the brain and cognition.

Three hours (seminar); one term

Prerequisite(s): One of LINGUIST 3NL3, PNB 3MM3, PSYCH 3NL3

PSYCH 4KK3 - BAYESIAN INFERENCE

This course explores a sophisticated method for drawing inferences from data, used both for statistical analysis and as a model of human brain function.

Three lectures, one tutorial (optional); one term

Prerequisite(s): One of ARTSSCI 2R03, ECON 2B03, GEOG 3MB3, HTHSCI 2A03, ISCI 2A18 A/B, PNB 3XE3, STATS 2B03, 2D03, 2MB3, 3J04, 3Y03; and registration in Level III or above of an Honours program

Prerequisite(s) (EFFECTIVE 2020-2021): One of Math 1A03, 1LS3; and one of ARTSSCI 2R03, ECON 2B03, GEOG 3MB3, HTHSCI 2A03, ISCI 2A18 A/B, PNB 3XE3, STATS 2B03, 2D03, 2MB3, 3J04, 3Y03; and registration in Level III or above of an Honours program

PSYCH 4MP3 - NEUROSCIENCE OF MUSIC

This seminar explores theories on how and why music evolved, and how the perception, development, performance and emotional experience of music are mediated by the brain. Primary source materials are discussed in class and experimental designs developed to address critical questions.

Three hours (lecture/seminar); one term

Prerequisite(s): MUSICCOG 2MP3 (or MUSICCOG 2MA3) or PSYCH 2MP3 (or PSYCH 2MA3) or PSYCH 3H03; and registration in a Music Cognition program (B.A., B.Arts.Sc., B.Mus., B.Sc.), or PNB 2XA3 or PSYCH 2E03 and registration in an Honours program, or ISCI 2A18 A/B; or permission of the instructor. PSYCH 2E03 is recommended.

Antirequisite(s): MUSICCOG 3MA3, 4LA3, PSYCH 3MA3, 4LA3

Cross-list(s): MUSICCOG 4MP3

PSYCH 4R03 - SPECIAL TOPICS IN ANIMAL BEHAVIOUR

An advanced seminar focusing on selected topics in animal behaviour.

Seminar and discussions (three hours); one term

Prerequisite(s): PNB 2XC3 or PSYCH 2GG3; and one of PSYCH 3F03, PSYCH 3T03, PSYCH 3YY3; and registration in Level IV of an Honours Biology, or an Honours or Combined Honours Psychology, Neuroscience & Behaviour program

This course may be repeated, if on a different topic.

PSYCH 4S03 - GENETICS, BEHAVIOUR AND EVOLUTION

This seminar course will explore how genetics can help answer important questions about the evolution of behavioural and psychological traits.

Seminar and discussions (three hours); one term

Prerequisite(s): BIOLOGY 1A03, and one of BIOLOGY 1M03, LIFESCI 2D03, PNB 2XC3; and registration in Level III or IV of an Honours program

Antirequisite(s): PNB 4G03

PSYCH 4Y03 - HORMONES, NEUROCHEMISTRY AND BEHAVIOUR

Steroids, peptides, monoamines, and interacting neural structures are considered in relation to feeding, reproductive behaviour, aggression, stress, and learning in humans and other vertebrates.

Seminar and discussions (three hours); one term

Prerequisite(s): PSYCH 3M03; and six units of Biochemistry and/or Biology; and registration in Level IV of an Honours program

RECONCILIATION

Courses in Reconciliation are administered by the Indigenous Studies Program. L.R. Wilson Hall, Room 1811, ext. 23788

<https://indigenous.mcmaster.ca>

Fields of Study

I. Asian Religious Traditions

RELIGST 1J03, 2BF3, 2BN3, 2BT3, 2E03, 2F03, 2I03, 2K03, 2L03, 2MT3, 2P03, 2TT3, 3AA3, 3E03, 3L03, 3P03, 3RR3, 3S03, 3U03, 3UU3, 3V03, 4H03, SANSKRIT 3A06 A/B, 4B06 A/B

II. Biblical Studies

RELIGST 1AB3, 1L03, 2AP3, 2B03, 2CE3, 2DD3, 2EE3, 2GG3, 2HB3, 2HH3, 2NT3, 2RB3, 2VV3, 2YY3, 2Z03, 3DD3, 3J03, 3JB3, 3K03, 3M03, 3N03, 3R03, 3T03, 4I03, HEBREW 2A03, 2B03, 3A03, 3B03

III. Western Religious Traditions

- i) Judaism: RELIGST 1L03, 2EE3, 2HB3, 2J03, 2JP3, 2X03, 3A03, 3DD3, 3GG3, 3J03, 3JB3, 3Z03, 3ZZ3, 4N03, HEBREW 2A03, 2B03, 3A03, 3B03
- ii) Christianity: RELIGST 2CA3, 2CE3, 2ER3, 2KK3, 2MM3, 2NT3, 2TH3, 2VR3, 3B03, 3CA3, 3CE3, 3K03, 3KK3, 3X03, 4N03
- iii) Islam: RELIGST 2AA3, 2AR3, 2EA3, 2EB3, 2FF3, 2Q03, 2TA3, 2V03, 3C03, 3FA3, 3GH3 4N03

IV. Religion and Culture

RELIGST 1R03, 2BB3, 2ER3, 2HR3, 2M03, 2MT3, 2MW3, 2N03, 2P03, 2QQ3, 2RD3, 2RN3, 2SS3, 2TA3, 2TT3, 2VR3, 2W03, 2WW3, 3AA3, 3AR3, 3C03, 3E03, 3EE3, 3FF3, 3GH3, 3RH3, 3ZZ3, 4P03

V. Religion, Philosophy, and Politics

RELIGST 1103, 2C03, 2DS3, 2G03, 2GR3, 2JP3, 2LL3, 2U03, 2ZZ3, 3A03, 3CC3, 3CP3, 3D03, 3LL3, 3MM3, 3NN3, 3W03, 3Y03, 4RP3

Courses

If no prerequisite is listed, the course is open.

RELIGST 1AB3 - ARCHAEOLOGY AND THE BIBLE

Archaeological discoveries have revolutionized the way in which we read the Bible. This course explores archaeology and ancient texts, both canonical and non-canonical, in light of each other with a view to reconstructing key moments in the history of Judaism and Christianity.

Two lectures, one tutorial; one term

Antirequisite(s): RELIGST 2AB3

RELIGST 1B03 - WHAT ON EARTH IS RELIGION?

An introduction to the academic study of religion and religions focusing on key themes and on how scholars approach religiosity both historically and in contemporary global cultures. Topics covered may include truth and truth-claims, ritual and practice, myth and history, authority and power, community and conformity. Lectures and discussion (three hours); one term

Antirequisite(s): RELIGST 1B06 A/B

RELIGST 1103 - RELIGIOUS THEMES IN MODERN CULTURE

An introduction to religious themes, imagery and issues through a study of selected works of modern literature (novels, short stories, poetry, drama), music, art, and film. Lectures and discussion (three hours); one term

Antirequisite(s): RELIGST 1106, 2G03

RELIGST 1J03 - GREAT BOOKS IN ASIAN RELIGIONS

This course introduces foundational books of the major religious traditions of Asia, including Buddhism, Hinduism, Taoism, Confucianism and Shinto, in their historical and cultural contexts.

Two lectures, one tutorial; one term

RELIGST 1L03 - ABRAHAM IN JUDAISM, CHRISTIANITY, AND ISLAM

This course looks at the early depictions of the central figure of Abraham, as well as Sarah and Hagar, Isaac and Ishmael, in what scholars often refer to as the three Abrahamic Faiths.

Lectures and discussion (three hours); one term

RELIGST 1R03 - INTRODUCTION TO ANTHROPOLOGY: RACE, RELIGION AND CONFLICT

This course examines major issues in Anthropology in both contemporary and past societies from archaeological, biological, cultural and linguistic perspectives. It will focus on identity, power, migration, race, and related themes.

Lectures, discussion (three hours); one term

Cross-list(s): ANTHROP 1AB3

This course is administered by the Department of Anthropology.

RELIGST 2AA3 - INTRODUCTION TO MODERN STANDARD ARABIC

This course introduces students to the basics of the Arabic language. Students will learn the Arabic alphabet, pronunciation, verb forms, and basic grammar. No prior knowledge of Arabic is necessary.

Lectures and discussion (four hours); one term

Cross-list(s): ARABIC 2AA3

RELIGST 2AP3 - APOCALYPSE, THEN AND NOW

How did ancient Jews and Christians portray the end of the world? How do such depictions affect current religious and secular portrayals of the end of the world in modern writing and cinema?

Lectures and discussion (three hours); one term

RELIGST 2AR3 - INTRODUCTION TO MODERN STANDARD ARABIC II

This course builds on the fundamentals covered in RELIGST 2AA3. The course expands students vocabulary, reading fluency, composition skills, and knowledge of grammatical constructions.

Lectures and discussion (four hours); one term

Cross-list(s): ARABIC 2AR3

Prerequisite(s): RELIGST 2AA3

RELIGST 2B03 - WOMEN IN THE BIBLICAL TRADITION

This course will focus on the portrayal of women in the Hebrew Scriptures and the New Testament. Among the texts to be dealt with are examples of biblical narrative and legal material, the gospels, the letters of Paul and extra-biblical material.

Two lectures, one tutorial; one term

Cross-list(s): WOMENST 2B03

RELIGST 2BB3 - IMAGES OF THE DIVINE FEMININE

An examination of some of the ways the divine has been portrayed as feminine in diverse cultures.

Three hours (lectures and discussion); one term

Cross-list(s): WOMENST 2BB3

RELIGST 2BF3 - BUDDHISM AND FILM

A survey of depictions of Buddhism in select films from around the world.

Lectures and discussion (three hours); one term

RELIGST 2BN3 - SEX AND THE CITY IN BUDDHISM: THE URBAN LIFE OF BUDDHIST NUNS IN NORTH INDIA

A survey of sex, celibacy, family, married monks, pregnant nuns, monastic motherhood, entrepreneurial ecclesiastics, and other hopelessly romanticized topics in scholarly portrayals of Buddhism.

Two lectures; one tutorial; one term

RELIGST 2BT3 - THE BUDDHIST TRADITION IN INDIA

A study of the origins and early development of Indian Buddhism, largely through readings in Buddhist scripture (pre-Mahayana and Mahayana) in translation.

Two lectures, one tutorial; one term

Antirequisite(s): RELIGST 3U03

RELIGST 2CA3 - CHRISTIANITY AND ART

An exploration of Christian attitudes to art and the depictions of biblical stories, God, Christ, and the Church in painting, sculpture, and illumination from the 2nd to the 21st centuries.

Two lectures, one tutorial; one term

RELIGST 2CE3 - THE SERMON ON THE MOUNT IN CHRISTIAN ETHICS

The most famous of Jesus' teachings has been variously interpreted in the history of Christian ethical reflection. After placing the text in its biblical setting, this course will examine a range of interpretations, traditional (e.g., Augustine, Aquinas, Menno Simons) and contemporary (e.g., Kierkegaard, Tolstoy, Bonhoeffer.)

Two lectures, one tutorial; one term

RELIGST 2DD3 - THE FIVE BOOKS OF MOSES

An examination of selected texts from the Pentateuch and their significance for Ancient Israelite religion and modern thought.

Two lectures, one tutorial; one term

RELIGST 2DS3 - DIVINE SHAKESPEARE

Jews against Christians, scheming Friars, a Ghost demanding revenge: this course will study Shakespeare's dramatic presentation of religious controversies and his

use of religious symbolism in *The Merchant of Venice*, *Measure for Measure*, *Romeo and Juliet*, and *Hamlet*.

Lectures and discussion (three hours); one term

RELIGST 2EE3 - PROPHETS OF THE BIBLE

The role and teaching of biblical prophets in their ancient setting and their impact on modern religious life and thought.

Two lectures, one tutorial; one term

RELIGST 2ER3 - RELIGION, THE BODY, AND THE MACHINE

This course will focus on the religious ethics of embodiment in various technological contexts of contemporary life (e.g. bioengineering and eugenics, medically assisted suicide, designer babies, cosmetic enhancement, and artificial intelligence.)

Lectures and discussion (three hours); one term

RELIGST 2F03 - STORYTELLING IN EAST ASIAN RELIGIONS

An in-depth study of selected examples of story literature in China and Japan with attention to the way religion is represented.

Two lectures, one tutorial; one term

Antirequisite(s): JAPANST 3H03, RELIGST 3H03

RELIGST 2FF3 - MEDITERRANEAN ENCOUNTERS 1500-1800

This course examines the Mediterranean region as a zone of intense cultural interaction. Particular emphasis will be given to the interaction between Christian, Jewish and Islamic societies.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): HISTORY 2HH3

This course is administered by the Department of History.

RELIGST 2GG3 - WHO WAS JESUS?

A study of the Gospels. Special attention will be given to the possible literary relationships among the Gospels as well as to the distinctive features of their Jesus stories.

Two lectures, one tutorial; one term

RELIGST 2GR3 - EVIL

An examination of understandings of reason and evil in ancient Greek, medieval Christian and modern times, and of how these understandings are related to accounts of the nature of God.

Lectures and discussion (three hours); one term

RELIGST 2HB3 - FROM CREATION TO EXILE

An introduction to the writings of the Hebrew Bible/Old Testament in their historical setting, to their role as scripture in Jewish and Christian tradition, and to various methodologies used in their modern academic study.

Two lectures, one tutorial; one term

Antirequisite(s): RELIGST 1D06 A/B

RELIGST 2HC3 - INTRODUCTION TO BIBLICAL HEBREW I

Hebrew Bible. The student will begin to read in the Hebrew Bible.

Two lectures (four hours); one term

Cross-list(s): HEBREW 2A03

Antirequisite(s): HEBREW 2A06

RELIGST 2HD3 - INTRODUCTION TO BIBLICAL HEBREW II

An introduction to more grammar, syntax and vocabulary of the language of the Hebrew Bible. The knowledge acquired should enable the student to read the simple prose and poetry of the Hebrew Bible.

Two lectures (four hours); one term

Cross-list(s): HEBREW 2B03

Prerequisite(s): HEBREW 2A03 or permission of the instructor

Antirequisite(s): HEBREW 2A06

RELIGST 2HH3 - THE BIRTH OF CHRISTIANITY

A study of the controversial role played by Paul in the definition and expansion of early Christianity, based on the Acts of the Apostles and Paul's own extant correspondence.

Two lectures, one tutorial; one term

RELIGST 2HR3 - HUMOUR AND RELIGION

Starting with Freud's theoretical accounts, this course explores the ways in which scholars have analyzed the relationship between religion and humour.

Lectures and discussion (three hours); one term

RELIGST 2I03 - STORYTELLING IN INDIAN RELIGION

A survey of some of the many stories that were told by Buddhists, Jains and Hindus as a form of popular religious instruction and of the various uses made of humour and wit in religious teaching.

Two lectures, one tutorial; one term

Antirequisite(s): RELIGST 3I03

RELIGST 2IR3 - HOLLYWOOD/BOLLYWOOD AND INDIAN RELIGIONS

A survey of depictions of Indian religious traditions in select films from around the world.

Lectures and discussion (three hours); one term

RELIGST 2J03 - INTRODUCTION TO JUDAISM

Survey of major facets of Jewish religion and identity from antiquity to the present, including foundational texts, major historical developments and central beliefs and practices.

Two lectures, one tutorial; one term

The place of the Reformation in the development of Christian thought and practice -its background, context and sequels. Attention is given to such figures and movements as Martin Luther, John Calvin, the Anabaptists, the reformation in England, the Catholic Reformation.

Two lectures, one tutorial; one term

RELIGST 2LL3 - GOD AND PHILOSOPHY

A study of conceptions of religious belief, knowledge and God in the history of modern thought up to the 20th century, with special attention to major challenges to the role of religious faith in human existence. Authors may include:

Descartes, Hume, Kant, Schleiermacher, Nietzsche, Dostoevsky, Kierkegaard, Camus, Buber, Levinas.

Two lectures, one tutorial; one term

Antirequisite(s): RELIGST 3MM3

RELIGST 2M03 - DEATH AND DYING: COMPARATIVE VIEWS

A comparative survey of the diversity of social and ritual practices, religious beliefs, and emotional responses surrounding death in a variety of non-Western cultural contexts.

Two lectures, one tutorial; one term

RELIGST 2MT3 - ASIAN MEDITATION TRADITIONS

A study of the historical traditions and modern transformations of Asian religious practices of meditation and mental cultivation.

Lectures and discussion (three hours); one term

RELIGST 2MW3 - RELIGION, MAGIC AND WITCHCRAFT

Selected issues in the study of religion, magic and witchcraft, science and the supernatural. Perspectives from history, psychology and sociology also will be discussed.

Lectures and discussion (three hours); one term

Prerequisite(s): Three units of Level I Anthropology and registration in Level II or above in any program

Cross-list(s): ANTHROP 2R03

This course is administered by the Department of Anthropology.

RELIGST 2N03 - DEATH AND DYING: THE WESTERN EXPERIENCE

Drawing on theoretical perspectives and evidence from anthropology and sociology, this course examines death and dying in Western contexts, focusing on biomedical, social and cultural themes.

Two lectures, one tutorial; one term

RELIGST 2NT3 - THE NEW TESTAMENT

An introduction to the writings of the New Testament in their historical setting, to their role as scripture in the Christian tradition, and to various methodologies used in their modern academic study.

Two lectures, one tutorial; one term

Antirequisite(s): RELIGST 1D06 A/B

RELIGST 2O03 - INTRODUCTION TO ISLAM

The origins and early history of Islam with an emphasis on the Koran and the early Muslim community.

Two lectures, one tutorial; one term

RELIGST 2OQ3 - CULTS, CONSPIRACIES AND CLOSE ENCOUNTERS

Why are people often attracted to "alternative" perspectives/religious movements? An examination of some marginal or marginalized groups, beliefs and practices and the ways they challenge and enforce "received wisdom."

Lectures and discussion (three hours); one term

RELIGST 2RB3 - ETHNICITY, RACE, AND THE BIBLE

This course will examine the variety of ethnic discourses that exist within the Bible. In what ways did biblical writers construct ethnic identity and how has the Bible been used in modern racial ideologies?

Lectures and discussion (three hours); one term

RELIGST 2RD3 - RELIGION AND DIVERSITY

This course examines religious practices and traditions in the context of multi-cultural, diverse societies. Issues to be focused on may include: the intersection

of particular religious practices and beliefs and civil rights, medical ethics, and legal issues.

Lectures and discussion (three hours); one term

RELIGST 2RN3 - RELIGION IN THE NEWS

Examination of a variety of topical religious issues covered in the Canadian and global news media, to cultivate awareness of key historical, cultural, and social contexts framing these issues.

Lectures and discussion (three hours); one term

RELIGST 2SP3 - SPORT AND/AS RELIGION

An examination of relationships between sport and religion, including ritual aspects of sport, connections between social collectivities and sports teams, and sport as meaning-making activity.

Lectures and discussion (three hours); one term

Cross-list(s): ANTHROP 2EE3

RELIGST 2TA3 - ISLAM IN NORTH AMERICA

This course will explore the history and different expressions of North American Islam. Students will compare and contrast the different manifestations of Islam in North America.

Two lectures, one tutorial; one term

Cross-list(s): SOCIOL 2TA3

RELIGST 2TH3 - CHRISTIANITY: THE FIRST THOUSAND YEARS

The essentials of Christian thought and practice in their intellectual and cultural contexts from their beginnings in the 2nd century until their flowering in the Middle Ages.

Two lectures, one tutorial; one term

Antirequisite(s): RELIGST 2I13 , 2JJ3

RELIGST 2TT3 - RELIGION AND POPULAR CULTURE IN CONTEMPORARY JAPAN

An introduction to the study of Japanese popular culture in the contemporary period and the religious traditions and world-views that inform it through textual, visual and other multi-media sources, including manga and anime.

Two lectures, one tutorial; one term

Antirequisite(s): JAPANST 2TT3

RELIGST 2UD3 - UTOPIAS, DYSTOPIAS

Calendar Description: Utopias and dystopias have become widespread in modern culture. This course discusses the origin and character of utopias and dystopias through an examination of their presentation in various works of modern literature, movies, and TV series.

Two lectures, one tutorial, one term

RELIGST 2VR3 - VIOLENCE AND RELIGION

Religious ideas of violence and peace are related to many secular social practices. This course will examine the complexities of these relationships in our global world, through literature, film, and a range of theoretical perspectives.

Lectures and discussion (three hours); one term

RELIGST 2VV3 - THE BIBLE AS LITERATURE

An examination of narratives from the Hebrew Bible, Intertestamental literature, and New Testament, from a literary perspective. Attention is paid to narrative features such as character, plot, irony and symbolism, as well as to the dynamics of the reading experience.

Two lectures, one tutorial; one term

Antirequisite(s): COMPLIT 2G03

RELIGST 2WW3 - HEALTH, HEALING AND RELIGION: WESTERN PERSPECTIVES

An overview of the intersection of religious beliefs and practices with concepts of health, wellness, and possibilities for healing in both traditional and contemporary Western contexts.

Two lectures, one tutorial; one term

RELIGST 2WX3 - HEALTH, HEALING AND RELIGION: COMPARATIVE VIEWS

A comparative survey of the intersection of religious beliefs and practices with concepts of health, wellness, and possibilities for healing in a variety of non-Western cultural contexts, both traditional and contemporary.

Two lectures, one tutorial, one term

Available as a study-abroad experience in the Spring only. This course is intended for students who are entering Level III or above in the following Fall/Winter Session. Students interested in this course must contact Dr. E. Amster by February 15 for application instructions. There is an additional cost associated with this course. This course is administered by the Department of History.

RELIGST 3HC3 - INTERMEDIATE HEBREW I

A reading course in classical (biblical) Hebrew. Sample texts will be read from some or all of the following: the Hebrew Bible, Mishnah, ancient Hebrew inscriptions and the Dead Sea Scrolls.

Two lectures (four hours); one term

Cross-list(s): HEBREW 3A03

Prerequisite(s): HEBREW 2B03 or permission of the instructor

Antirequisite(s): HEBREW 3A06

RELIGST 3HD3 - INTERMEDIATE HEBREW II

Further sample texts will be read from some or all of the following: the Hebrew Bible, the Mishnah, ancient inscriptions and the Dead Sea Scrolls.

Two lectures (four hours); one term

Cross-list(s): HEBREW 3B03

Prerequisite(s): HEBREW 2B03 or permission of the instructor

Antirequisite(s): HEBREW 3A06

RELIGST 3JB3 - THE BIBLE'S EARLIEST READERS

A look at how the Jewish Bible was interpreted in ancient Jewish and Christian texts up to the second century C.E., and at how scriptural interpretation shaped religious thought and worldviews.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above. RELIGST 1D06 A/B or three units from the Biblical Studies Field of Study is strongly recommended.

RELIGST 3K03 - INTERPRETING THE CHRISTIAN BIBLE

A study of the different ways in which the Bible has been read, from antiquity to the modern world, both inside and outside the communities for which it serves as sacred scripture. The course will focus on selected key figures in the history of biblical interpretation. A look at how Scripture has been interpreted within the Christian tradition from the second century to the present.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above; RELIGST 1D06 A/B or three units from the Biblical Studies Field of Study is strongly recommended

RELIGST 3KK3 - CHRISTIANITY IN THE MODERN WORLD

A study of the principal Christian thinkers, Catholic and Protestant, from the 19th to the 21st centuries and their responses to the philosophical and social challenges in the post-Christian world.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

RELIGST 3L03 - THE INDIAN RELIGIOUS TRADITION

Readings of Indian religious texts in translation will concentrate on themes such as the nature of human nature; free will and determinism; personal identity and the quest for perfection; renunciation and social action; violence and non-violence; altruism and selfishness.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level III and above

Cross-list(s): ARTSSCI 3L03

RELIGST 3LL3 - RELIGION AND HUMAN NATURE

What is the nature of human nature and its fulfilment? A study of recent philosophical, scientific and religious anthropology.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

RELIGST 3M03 - PSALMS AND WISDOM IN THE BIBLE

A study of selected texts from Psalms, Job, and Proverbs with attention to how poetic and wisdom literature in the Hebrew Scriptures has functioned in Jewish and Christian worship and everyday life.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

RELIGST 3R03 - DEATH AND THE AFTERLIFE IN EARLY JUDAISM AND CHRISTIANITY

An examination of the variety of ways in which physical death and the afterlife were understood in biblical and post-biblical Judaism as well as in the New Testament and early Christianity. Among the topics to be considered are the netherworld, immortality and resurrection, as well as the relationship of these concepts to issues of faith and morality.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

RELIGST 3RH3 - RELIGION IN HAMILTON AND ITS ENVIRONS

An exploration of religion and religions as they are expressed locally. Students will explore a variety of religious sites and communities in the service of developing a digital 'map' that will track religious diversity in Hamilton and its environs. Lectures and discussion (three hours); one term

RELIGST 3S03 - THE EAST ASIAN RELIGIOUS TRADITION

Readings in East Asian religious texts in translation will concentrate on themes such as culture vs. nature, virtue vs. power, social responsibility vs. personal cultivation, bookish learning vs. meditation.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level III and above

Antirequisite(s): JAPANST 3S03

Cross-list(s): ARTSSCI 3S03

RELIGST 3SA6 A/B - INTRODUCTION TO SANSKRIT GRAMMAR

Basic course in the elements of Sanskrit grammar. No previous knowledge of Sanskrit is required.

Three lectures; two terms

Cross-list(s): SANSKRIT 3A06 A/B

RELIGST 3UU3 - BUDDHISM IN EAST ASIA

An examination of myth, history, doctrine, monastic culture, and ritual practices in East Asian Buddhism.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above, and three units from the Asian Religions Field of Study

Antirequisite(s): JAPANST 3UU3

RELIGST 3X03 - CHRISTIAN MYSTICISM

Close reading of selected primary texts in Eastern and Western traditions of Christian spiritual life. Possible readings include: the Desert Fathers, Augustine, the Philokalia, John of the Cross, Simone Weil, Thomas Merton.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

RELIGST 3Y03 - LOVE

A discussion of the variety of accounts of love in Western civilization from the time of the ancient Greeks and the rise of Christianity to modernity.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): RELIGST 1E03, 1E06

RELIGST 3ZZ3 - JUDAISM IN THE MODERN WORLD

Jews and Judaism in a century of catastrophe and renewal. The progress of Emancipation; Jews in Canada and the U.S.; the Jewish catastrophe in Europe; the Jewish state; Jewish identities in literature and the arts.

Two lectures, one tutorial; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): RELIGST 2XX3

Cross-list(s): HISTORY 3ZZ3

RELIGST 4AE3 - ACADEMIC ENGAGEMENT IN SOCIETY, CULTURE, RELIGION

This course runs over two years beginning in Level III. Three units at Level IV are awarded upon successful completion of the course. Students enrolled in the Hons. B.A. program complete a variety of tasks that enhance their appreciation of the academic study of religion. The course is administered through Avenue by students departmental faculty mentors.

Independent Study

Prerequisite(s): Enrolment in Level IV Honours Religious Studies B.A.

RELIGST 4B06 A/B - READINGS IN SANSKRIT TEXTS

Intermediate course with readings in selected texts.

Three lectures; two terms

Cross-list(s): SANSKRIT 4B06 A/B

Prerequisite(s): SANSKRIT 3A06 A/B

RELIGST 4H03 - TOPICS IN ASIAN RELIGIONS

Advanced seminar in Asian religions.

One term

Prerequisite(s): Registration in Level III or above of an Honours Religious Studies program, six units in the Field of Study of the seminar; or permission of the instructor; credit or registration in RELIGST 3F03

RELIGST 4H03 may be repeated, to a total of six units, if on a different topic.

Offered in alternate years.

RELIGST 4I03 - TOPICS IN BIBLICAL STUDIES

Advanced seminar in Early Judaism and Early Christianity.

One term

Prerequisite(s): Registration in Level III or above of an Honours Religious Studies program, six units in the Field of Study of the seminar; or permission of the instructor

RELIGST 4I03 may be repeated, to a total of six units, if on a different topic.

Offered in alternate years.

RELIGST 4N03 - TOPICS IN WESTERN RELIGIOUS TRADITIONS

Advanced seminar in Western Religious Traditions.

One term

Prerequisite(s): Registration in Level III or above of an Honours Religious Studies program, six units in the Field of Study of the seminar; or permission of the instructor

RELIGST 4N03 may be repeated, to a total of six units, if on a different topic.

Offered in alternate years.

RELIGST 4P03 - RELIGION AND CULTURE

Advanced seminar in Religion and Culture, from the perspectives of the anthropology and sociology of religion.

One term

Prerequisite(s): Registration in Level III or above of an Honours Religious Studies program, six units in the Field of Study of the seminar; or permission of the instructor

RELIGST 4P03 may be repeated, to a total of six units, if on a different topic.

Offered in alternate years.

RELIGST 4Q03 - ADVANCED READINGS IN RELIGIOUS STUDIES

Independent study of special topics in Religious Studies.

One term

Prerequisite(s): Registration in Level III or above of an Honours Religious Studies program and permission of the instructor

RELIGST 4Q03 may be repeated, to a total of six units, if on a different topic.

RELIGST 4R06 A/B - HONOURS THESIS

Students in this course will work closely with faculty members who specialize in the fields of study in which they plan to write their honours essay.

Two terms

Prerequisite(s): Registration in Level IV of an Honours Religious Studies program with a minimum C.A. of 9.5; or permission of the instructor

Antirequisite(s): RELIGST 4J06

RELIGST 4RP3 - TOPICS IN RELIGION, PHILOSOPHY, AND POLITICS

Advanced seminar in religion, philosophy, and politics, dealing with contemporary and historical materials.

One term

Prerequisite(s): Registration in Level III or above of an Honours Religious Studies program, six units in the Religion, Philosophy, and Politics Field of Study; or permission of the instructor.

RELIGST 4SC3 - SOCIETY, CULTURE, RELIGION SEMINAR

Students read the work of, and engage with, a different faculty member from the department each week.

One lecture, one term

Prerequisite(s): Enrolment in Level III

RELIGST 4SR3 - TOPICS IN THE SOCIOLOGY OF RELIGION

This course will examine sociological perspectives on Islam. Particular attention will be paid to issues of Muslim authority, identity and religious practices in the diaspora.

Prerequisite(s): Registration in Level III or above of an Honours Religious Studies program or Honours Sociology program; or permission of the instructor

Cross-list(s): SOCIOL 4SR3

RUSSIAN

Courses in Russian are administered by the Department of Linguistics and Languages.

Togo Salmon Hall, Room 629, ext. 24388

<http://linguistics.humanities.mcmaster.ca/>

Department Notes

- Students should note that the Department has classified its Russian language courses under the following categories:
Introductory Level Language Courses: RUSSIAN 1Z03, 1ZZ3
Intermediate Level Language Courses: RUSSIAN 2Z03, 2ZZ3
- Not all courses are offered on an annual basis. Students should consult the timetable for available courses.

Courses

If no prerequisite is listed, the course is open.

RUSSIAN 1Z03 - INTENSIVE BEGINNER'S RUSSIAN I

This course is designed for students with no prior knowledge of Russian. Students will learn the Cyrillic alphabet, some basic rules of pronunciation and the essentials of Russian grammar. The sequel to this course is RUSSIAN 1ZZ3.

Three hours; one term

Antirequisite(s): Grade 12 U or M equivalent

Not open to students with credit in RUSSIAN 1ZZ3. The Department reserves the right to place students in the course most appropriate to their abilities.

RUSSIAN 1ZZ3 - INTENSIVE BEGINNER'S RUSSIAN II

This course is designed to develop the four basic skills of listening, speaking, reading and writing. Students will continue to learn new vocabulary and the essentials of Russian grammar and to use them in simple conversations and in writing. The sequel to this course is RUSSIAN 2Z03.

Three hours; one term

Prerequisite(s): RUSSIAN 1Z03

Antirequisite(s): Grade 12 U or M equivalent

The Department reserves the right to place students in the course most appropriate to their abilities.

RUSSIAN 2G03 - MASTERPIECES OF RUSSIAN LITERATURE IN FILM AND TV SERIES (TAUGHT IN ENGLISH)

An examination of 19th and 20th century Russian literature through the prism of contemporary film and TV series, with a special focus on interpretations offered by European and North American cinema.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

RUSSIAN 2H03 - SOVIET PROPAGANDA IN FILMS AND OTHER MASS MEDIA (TAUGHT IN ENGLISH)

A study of Soviet and post-Soviet propaganda in films, news, posters, TV reels, and other mass media. The "fake news" phenomenon is explored through the history of propaganda in Soviet Union and other countries.

Three hours; one term

Prerequisite(s): Registration in Level II or above of any program

RUSSIAN 2Z03 - INTERMEDIATE RUSSIAN I

This course continues the study of Russian grammar with emphasis on extending skills for conversation, reading and writing. Video film and interactive computer software will be used to supplement traditional printed materials. The sequel to this course is RUSSIAN 2ZZ3.

Three hours; one term

Prerequisite(s): RUSSIAN 1ZZ3

Not open to students with credit or registration in RUSSIAN 2ZZ3

The Department reserves the right to place students in the course most appropriate to their abilities.

RUSSIAN 2ZZ3 - INTERMEDIATE RUSSIAN II

Emphasis will be on extending skills for conversation, reading and writing. Video film and interactive computer software will be used to supplement traditional printed materials.

Three hours; one term

Prerequisite(s): RUSSIAN 2Z03

The Department reserves the right to place students in the course most appropriate to their abilities.

SANSKRIT

Courses in Sanskrit are administered by the Department of Religious Studies. University Hall, Room 123, ext. 23109

<http://religiousstudies.mcmaster.ca>

Department Notes

- Students are advised to consult both the Department (University Hall, Room 123) and the Undergraduate Timetable for a list of the courses offered in the current year.
- Students wishing to specialize in Asian Religious Traditions should consider beginning language training in Sanskrit or Japanese or both early in their program (See Sanskrit course offerings listed below or course offerings listed under *Japanese* in the *Course Listings* section of this Calendar).

Courses

If no prerequisite is listed, the course is open.

SANSKRIT 3A06 A/B - INTRODUCTION TO SANSKRIT GRAMMAR

Basic course in the elements of Sanskrit grammar. No previous knowledge of Sanskrit is required.

Three lectures; two terms
Cross-list(s): RELIGST 3SA6 A/B

SANSKRIT 4B06 A/B - READINGS IN SANSKRIT TEXTS

Intermediate course with readings in selected texts.
 Three lectures; two terms
Cross-list(s): RELIGST 4B06 A/B
Prerequisite(s): SANSKRIT 3A06 A/B

SCHOOL FOR ENG PRACTICE

SEP 4E03 - ENTREPRENEURIAL OPPORTUNITY IDENTIFICATION

Students will develop an understanding of the fundamentals of sustainable businesses by exploring and evaluating their new business ideas. Students will develop an awareness of, and skills in innovation and entrepreneurial behaviour. There will be a focus on understanding business idea generation, development, and evaluation.

Prerequisite(s): Enrolment in Level IV of any program, permission of the instructor, and permission of the home department

Co-requisite(s): SEP 4EP3

Cross-list(s): ENGNMGT 5E03

SEP 4EL3 - LEADING INNOVATION

This course will explore leadership in an innovation context and provide a conceptual understanding of role model leadership. A personal leadership capacity development approach will be explored.

Prerequisite(s): Enrolment in Level III of any program, permission of the instructor, and permission of the home department

Cross-list(s): ENGNMGT 5EL3

SEP 4EP3 - NEW ENTERPRISE CAPSTONE PROJECT

Students work in multidisciplinary teams to carry out a feasibility study for the creation of a new, knowledge-based business.

Lectures, labs, tutorials; term one

Prerequisite(s): SEP 4E03 or ENGNMGT 5E03

Co-requisite(s): SEP 4E03

Cross-list(s): ENGNMGT 5EP3

SEP 4E03 or ENGNMGT 5E03 may be taken concurrently with this course.

SEP 4X03 - LIVABLE CITIES, THE BUILT AND NATURAL ENVIRONMENT

This course explores urban renewal with respect to concepts of the natural and built environment. Students are expected to apply various tools and evaluate the methods that promote best practices, in the context of theory and case studies.

SCIENCE

Courses with the subject code SCIENCE are administered by the Faculty of Science. Burke Science Building, Room 129, ext. 27590
<http://www.science.mcmaster.ca/>
science@mcmaster.ca

Courses

If no prerequisite is listed, the course is open.

SCIENCE 1A03 - INVESTIGATING SCIENCE: OPPORTUNITIES & EXPERIENCES

Designed to prepare students for their university careers through the introduction to the people, academic programs, resources and attitudes needed during their undergraduate studies. Course content is taught through in-class sessions and

mini-projects and will focus on investigating science through research to explore the opportunities and experiences available to students in the Faculty of Science.

Lecture (two hours), tutorial (three hours); one term

Prerequisite(s): Registration in one of Chemical and Physical Sciences I, Environmental and Earth Sciences I, Life Sciences I, or Mathematics and Statistics I
This course is administered by the School of Interdisciplinary Science (SIS).

SCIENCE 2A03 - PEER MENTORING IN SCIENCE

This course will engage students in considering the role of mentorship in their science education and developing their own mentoring skills. It explores the theory and practice of how mentoring benefits both mentors and mentees. Emphasis will be placed on facilitative leadership, reflective practice, and scientific discourse. Students will gain practical experience, as well as leadership and communication skills, which can be applied to the development of peer-mentoring relationships with science students transitioning to university.

Seminar (three hours), tutorial (three hours); one term

Prerequisite(s): SCIENCE 1A03, registration in Level II or above of an Honours program in the Faculty of Science, and a GPA of at least 8.0; or permission of the Department

Not open to students with credit in SCIENCE 3A03.

This course is administered by the School of Interdisciplinary Science (SIS).

SCIENCE 2C00 - SKILLS FOR CAREER SUCCESS IN SCIENCE

Develop career skills (resume, cover letter, interview, job search, networking, professionalism) necessary to create a career path.

This course is evaluated on a Complete/Fail basis.

Eight lectures/workshops (each one hour); one term

Prerequisite(s): Registration in Level II or above of any program in the Faculty of Science

Students intending to register in a Co-op program in Level III must complete this course before their first work placement and, therefore, are strongly encouraged to complete this course in Level II.

SCIENCE 2P03 - IMPACTFUL INITIATIVES IN HEALTH

The IMPACT (Interdisciplinary, Mentorship, Practice, Applied, Community, Transformative) initiative collaboratively engages undergraduate and graduate students from various Faculties, McMaster alumni, healthcare partners, and real community clients to understand and address challenges experienced by people living with disabilities associated with the conditions of arthritis, cerebral palsy, dementia, expressive aphasia, multiple sclerosis, amyotrophic lateral sclerosis, Parkinson's disease, and visual impairment related to diabetes. Students will learn and mobilize their applied and conceptual knowledge of science to collaboratively create customized devices that help real community clients with activities critical to their health to improve their quality of life.

Lectures/tutorials (three hours); one term

Prerequisite(s): Grade 12 Biology U or BIOLOGY 1P03 and registration in Level II or above of any Arts & Science program, the Honours Bachelor of Health Sciences program, or any program in the Faculty of Science; or permission of the instructor
Antirequisite(s): ENGINEER 1P03, SCIENCE 1P03

Students will be required to participate in collaborative interdisciplinary design reviews (minimum of four hours) outside of lecture/tutorial time.

SCIENCE 3C00 - ADVANCED JOB SEARCH SKILLS FOR SCIENCE CO-OP STUDENTS

This course will develop advanced skills in conducting a successful job search and prepare students for

their first work term. Using case studies and drawing on current best practice in career education, students will further develop their professional acumen and maximize their accomplishments during their time in co-op.

This course is evaluated on a Complete/Fail basis.

Eight, one hour seminars; one term

Prerequisite(s): SCIENCE 2C00 and registration in a co-operative education program in the Faculty of Science

SCIENCE 3EP3 A/B S - APPLIED SCIENCE PLACEMENT

This course provides students with the opportunity to explore career options and integrate academics with a community, volunteer or professional experience. In most cases, these placements require an academic and a site placement supervisor (typically, off-campus). In addition to successfully completing a minimum of 60 hours of placement work, students must complete an academic component that will be evaluated.

Students are responsible to arrange a suitable placement and supervision, and are required to submit an application, including a detailed learning contract to the Science Career & Cooperative Education office thirty days prior to the date classes begin in each Term (see the Sessional Dates section of this Calendar). More information and the application form can be found at <https://www.science.mcmaster.ca/scce/experiential-learning/experiential-education.html>.

May be completed over one or two terms

Prerequisite(s): Credit or registration in SCIENCE 2C00; and registration in Level III or above of a program in the Faculty of Science; and permission of the academic supervisor and the Associate Dean of Science (Academic) or delegate

Students with credit or registration in any department- or program-based applied placement, internship or practicum course within the University, who wish to complete more than one opportunity, must demonstrate each experience is substantively different for consideration.

SCIENCE 3EX6 A/B S - APPLIED SCIENCE PLACEMENT

This course provides students with the opportunity to explore career options and integrate academics with a community, volunteer or professional experience. In most cases, these placements require an academic and a site placement supervisor (typically, off-campus). In addition to successfully completing a minimum of 120 hours of placement work, students must complete an academic component that will be evaluated.

Students are responsible to arrange a suitable placement and supervision, and are required to submit an application, including a detailed learning contract to the Science Career & Cooperative Education office thirty days prior to the date classes begin in each Term (see the Sessional Dates section of this Calendar). More information and the application form can be found at <https://www.science.mcmaster.ca/scce/experiential-learning/experiential-education.html>.

Two terms

Prerequisite(s): Credit or registration in SCIENCE 2C00; and registration in Level III or above of a program in the Faculty of Science; and permission of the academic supervisor and the Associate Dean of Science (Academic) or delegate

Students with credit or registration in any department- or program-based applied placement, internship or practicum course within the University, who wish to complete more than one opportunity, must demonstrate each experience is substantively distinct for consideration.

SCIENCE 3IE0 - UNDERGRADUATE SCIENCE INTERNSHIP

Full-time, academically relevant, paid, 4-month internship approved by the Science Career & Cooperative Education office. Students self-generate work placements, in consultation with the Science Career & Cooperative Education office, with participating companies through an application and interview process. Students wishing to extend the duration of their SCIENCE 3IE0 internship to 8, 12 or 16 months, with permission of the Manager, Science Career & Cooperative Education; will enrol in SCIENCE 3IF0, 3IG0, 3IH0 in the subsequent terms.

This course is evaluated on a Complete/Not Complete basis.

Four months in length

Prerequisite(s): Completion of SCIENCE 2C00 and all mandatory orientation activities; and registration in Level II or III of an Honours program in the Faculty

of Science, with at least 9 units of course work left to complete; and permission of the Manager, Science Career & Cooperative Education
Course fee of \$500 is payable to McMaster University within first month of internship.

SCIENCE 3IF0 - UNDERGRADUATE SCIENCE INTERNSHIP

Extends SCIENCE 3IE0 to an eight month internship.

This course is evaluated on a Complete/Not Complete basis.

Prerequisite(s): SCIENCE 3IE0; and registration in Level II or III of an Honours program in the Faculty of Science, with at least 9 units of course work left to complete; and permission of the Manager, Science Career & Cooperative Education

SCIENCE 3IG0 - UNDERGRADUATE SCIENCE INTERNSHIP

Extends SCIENCE 3IE0 to a 12-month internship.

This course is evaluated on a Complete/Not Complete basis.

Prerequisite(s): SCIENCE 3IF0; and registration in Level II or III of an Honours program in the Faculty of Science, with at least 9 units of course work left to complete; and permission of the Manager, Science Career & Cooperative Education

SCIENCE 3IH0 - UNDERGRADUATE SCIENCE INTERNSHIP

Extends SCIENCE 3IE0 to a 16-month internship.

This course is evaluated on a Complete/Not Complete basis.

Prerequisite(s): SCIENCE 3IG0; and registration in Level II or III of an Honours program in the Faculty of Science, with at least 9 units of course work left to complete; and permission of the Manager, Science Career & Cooperative Education

SCIENCE 3M03 - APPLIED CURRICULUM DESIGN IN SCIENCE

An experiential approach to teaching and learning, the course will allow students to investigate and apply the fundamentals of curriculum design through the development of learning modules in their scientific field of interest. Students will explore both in theory and in practice how research in pedagogy can inform science education and curriculum design. By the end of the course, students will have developed research-grounded learning modules targeted at students who are transitioning from high school to university.

Applications must be submitted by November 1 of the preceding term. Successful students will be notified by December 1.

Seminars/discussions (three hours); one term

Prerequisite(s): Registration in Level III or above of a program in the Faculty of Science; and a GPA of at least 8.0; and permission of the Associate Dean of Science (Academic) or delegate

This course is administered by the School of Interdisciplinary Science (SIS).

SCIENCE 3RP3 A/B S - RESEARCH PRACTICUM

Students will conduct research, as directed by a faculty member, in a wide range of scientific lab/field settings. Students will complete an academic component in addition to their research. Serves as excellent preparation for a Level IV Thesis or Independent Study experience.

Students are responsible to arrange a suitable research experience and supervision, and are required to submit an application, including a detailed learning contract and confirmation of an academic supervisor to the Science Career & Cooperative Education office thirty days prior to the date classes begin in each Term (see the Sessional Dates section of this Calendar). More information and the application form can be found at <https://www.science.mcmaster.ca/scce/experiential-learning/experiential-education.html>.

Minimum of 6 hours per week is required over the duration of the research experience (scheduling to be arranged by supervisor); one term

Prerequisite(s): Registration in Level III or above of an Honours program in the Faculty of Science; and permission of the academic supervisor and the Associate Dean of Science (Academic) or delegate. Credit or registration in SCIENCE 2C00 is recommended.

Students with credit or registration in any department- or program-based independent study or research seminar course within the University, who wish to complete more than one opportunity, must demonstrate each experience is substantively distinct for consideration.

SCIENCE 3WTO - SCIENCE CO-OP WORK TERM

Full-time, academically relevant, paid work experiences, approved by the Science Career & Cooperative Education office. Students enrolled in Co-op programs must be registered in full-time studies, including all prescribed courses, during the academic terms of their program (a minimum of 18 units in a full-term; and at least 9 units in a half-term) and will be charged per unit registered. An additional Science Co-op fee will be charged for each work term of a Co-op program. Students compete for employment with participating companies through an application and interview process, as well as conduct a personalized job search. Upon completion of the co-op work term, all students must submit a Final Work Term Report for evaluation and receive a successful employer evaluation.

This course is evaluated on a Complete/Not Complete basis.

Students will register in this course in Level III in both, the Winter Term (January to April) and Spring/Summer Term (May to August)

Prerequisite(s): SCIENCE 3C00; and registration in Level III of an Honours Co-op program in the Faculty of Science; and completion of all mandatory orientation activities; and permission of Manager, Science Career & Cooperative Education

SCIENCE 3WWO - SCIENCE CO-OP WORK TERM

Full-time, academically relevant, paid work experiences, approved by the Science Career & Cooperative Education office. Students enrolled in Co-op programs must be registered in full-time studies, including all prescribed courses, during the academic terms of their program (a minimum of 18 units in a full-term; and at least 9 units in a half-term) and will be charged per unit registered. An additional Science Co-op fee will be charged for each work term of a Co-op program. Students compete for employment with participating companies through an application and interview process, as well as conduct a personalized job search. Upon completion of the co-op work term, all students must submit a Final Work Term Report for evaluation and receive a successful employer evaluation.

This course is graded on a Complete/Not Complete basis.

Prerequisite(s): SCIENCE 3C00; and registration in Level III of the B.H.Sc. Biology and Pharmacology Co-op Program; and completion of all mandatory orientation activities; and permission of Manager, Science Career & Cooperative Education

SCIENCE 4WTO - SCIENCE CO-OP WORK TERM

Full-time, academically relevant, paid work experiences, approved by the Science Career & Cooperative Education office. Students enrolled in Co-op programs must be registered in full-time studies, including all prescribed courses, during the academic terms of their program (a minimum of 18 units in a full-term; and at least 9 units in a half-term) and will be charged per unit registered. An additional Science Co-op fee will be charged for each work term of a Co-op program. Students compete for employment with participating companies through an application and interview process, as well as conduct a personalized job search. Upon completion of the coop work term, all students must submit a Final Work Term Report for evaluation and receive a successful employer evaluation.

This course is graded on a Complete/Not complete basis.

Prerequisite(s): SCIENCE 3WTO ; and registration in Level IV of an Honours Co-op program in the Faculty of Science; and completion of all mandatory orientation activities; and permission of Manager, Science Career & Cooperative Education

SCIENCE 4WWO - SCIENCE CO-OP WORK TERM

Full-time, academically relevant, paid work experiences, approved by the Science Career & Cooperative Education office.

Students enrolled in Co-op programs must be registered in full-time studies, including all prescribed courses, during the academic terms of their program (a

minimum of 18 units in a full-term; and at least 9 units in a half-term) and will be charged per unit registered. An additional Science Co-op fee will be charged for each work term of a Co-op program. Students compete for employment with participating companies through an application and interview process, as well as conduct a personalized job search. Upon completion of the co-op work term, all students must submit a Final Work Term Report for evaluation and receive a successful employer evaluation.

This course is evaluated on a Complete/Not Complete basis.

Prerequisite(s): SCIENCE 3WWO; and registration in Level IV of the B.H.Sc. Biology and Pharmacology Co-op Program; and completion of all mandatory orientation activities; and permission of Manager, Science Career & Cooperative Education

SCIENCE 5WTO - SCIENCE CO-OP WORK TERM

Full-time, academically relevant, paid work experiences, approved by the Science Career & Cooperative Education office. Students enrolled in Co-op programs must be registered in full-time studies, including all prescribed courses, during the academic terms of their program (a minimum of 18 units in a full-term; and at least 9 units in a half-term) and will be charged per unit registered. An additional Science Co-op fee will be charged for each work term of a Co-op program. Students compete for employment with participating companies through an application and interview process, as well as conduct a personalized job search. Upon completion of the co-op work term, all students must submit a Final Work Term Report for evaluation and receive a successful employer evaluation.

This course is graded on a Complete/Not Complete basis.

Prerequisite(s): SCIENCE 4WTO ; and registration in Level V of an Honours Co-op program in the Faculty of Science; and completion of all mandatory orientation activities; and permission of Manager, Science Career & Cooperative Education

SCIENCE 5WWO - SCIENCE CO-OP WORK TERM

Full-time, academically relevant, paid work experiences, approved by the Science Career & Cooperative Education office.

Students enrolled in Co-op programs must be registered in full-time studies, including all prescribed courses, during the academic terms of their program (a minimum of 18 units in a full-term; and at least 9 units in a half-term) and will be charged per unit registered. An additional Science Co-op fee will be charged for each work term of a Co-op program. Students compete for employment with participating companies through an application and interview process, as well as conduct a personalized job search. Upon completion of the co-op work term, all students must submit a Final Work Term Report for evaluation and receive a successful employer evaluation.

This course is evaluated on a Complete/Not Complete basis.

Prerequisite(s): SCIENCE 4WWO ; and registration in Level V of an Honours Co-op program in the Faculty of Science or the B.H.Sc. Biology and Pharmacology Co-op Program; and completion of all mandatory orientation activities; and permission of Manager, Science Career & Cooperative Education

SCIENCE COMMUNICATION

Courses in Science Communication are administered by the School of Interdisciplinary Science.

General Sciences Building, Room 105, ext. 21181

<https://science.mcmaster.ca/sis/>

SCICOMM 2A03 - FOUNDATIONS IN SCIENCE COMMUNICATION

Students will learn to communicate scientific concepts and basic research findings in terms anyone can understand. They will experiment with strategies for engaging different audiences. They will also explore the possible consequences of good and bad science communication.

Lecture (two hours), tutorials (two hours); one term

Prerequisite(s): Registration in Level II or above

This course is administered by the School of Interdisciplinary Sciences (SIS).

SCICOMM 2M03 - ENGAGING YOUR WORLD: SCIENCE FOR THE GLOBAL CITIZEN

Examines the linkage between science and society. Topics include: How can science address the key challenges in our society? How does society impact the way that science is conducted? Examines basic scientific theories and concepts and highlights the application and interpretation of science in the context of popular media and policy. Since policies on issues relevant to human health and our environment are informed by the work of scientists, we want to establish a common ground of understanding about how science is conducted, how knowledge changes, and how we can be better consumers of scientific information.

Lecture (two hours), tutorials (two hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): SCIENCE 2M03

This course is administered by the School of Interdisciplinary Sciences (SIS).

SCICOMM 3P03 - SCIENCE COMMUNICATION IN LIFE SCIENCES

Science communication is the bridge between scientists and non-scientists; it allows discoveries in the lab or field to shape our world. In this course, students will examine the importance of effective science communication in education, journalism and activism. We will practice communicating science in a way this is accessible and engaging to diverse audiences. We will also experiment with different storytelling formats and mediums.

Lectures (two hours), online tutorials; one term

Prerequisite(s): Registration in Level III or above of an Honours program

Antirequisite(s): LIFESCI 3P03

This course is administered by the School of Interdisciplinary Sciences (SIS).

SMART TECHNOLOGY

Courses in Smart Technology are administered by the W. Booth School of Engineering Practice and Technology.

SMRTTECH 3CC3 - CLOUD COMPUTING AND INTERNET OF THINGS

This course covers advanced sensor and actuator technology, robotics and vision systems, selection and integration of components for autonomous or collaborative smart systems, as well as component that enable data access of smart systems using IoT communication protocols, internet technologies, network security, and cloud computing.

Three lectures, one lab (three hours); first term

Prerequisite(s): ENGTECH 1PR3, PROCTECH 2EE3, 2IC3 and registration in level III or above of Automation Engineering Technology

SMRTTECH 3DE3 - DIGITAL ELECTRONICS

This course covers the theory and principles of electronic devices and digital circuits. Attention is devoted to topics related to logic gates, flip-flops, encoders, decoders, advanced digital systems, power switching and control, and digital control of power electronics.

Three lectures, one lab (three hours); second term

Prerequisite(s): PROC TECH 2EE3 and ENGTECH 2MT3 and registration in level III of Automation Engineering Technology program

SMRTTECH 4AI3 - ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

This course deals with concepts of Artificial Intelligence and Machine Learning. It covers supervised classification based on artificial neural networks - deep Learning, as well as unsupervised learning - clustering, regression, optimization

and reinforcement learning. In addition the course covers application in artificial intelligent systems.

Three lectures, one lab (three hours); first term

Prerequisite(s): ENGTECH 2MT3, 1CP3, 1PR3, 4EE0 SMRTECH 4ID3 and registration in level IV of Automation Engineering Technology

Antirequisite(s): SFWRTECH 4AI3

First offered Fall 2020.

SMRTTECH 4ES3 - EMBEDDED SYSTEMS

This course teaches the design and implementation of embedded hardware and software systems. Topics covered include design of real-time embedded systems, hardware, interfacing a variety of external devices, control systems, real-time operating systems, and real-time issues pertinent to embedded control systems.

Three lectures, one lab (three hours); second term

Prerequisite(s): PROCTECH 2EE3, ENGTECH 1CP3, ENGTECH 1PR3 and registration in level IV of Automation Engineering Technology and permission from the Department

Co-requisite(s): SMRTTECH 4ID3

SMRTTECH 4HM3 - HUMAN MONITORING AND SMART HEALTH SYSTEMS

This project based course covers human monitoring and health data acquisition, monitoring of respiratory activities and other vital signs, wearable and contactless sensors, multi-sensor platform for circadian rhythm analysis, Signal processing, networked and mobile system for vital signs monitoring through wired and wireless Local Area Networks, cloud, and the Internet of Things (IoT).

Three lectures, one lab (1.5 hours), one tutorial (one hour); first term

Prerequisite(s): ENGTECH 4EE0 and registration in level IV of Automation Engineering Technology

First offered Fall 2020.

SMRTTECH 4ID3 - IOT DEVICES AND NETWORKS

This course teaches how the Internet of Things IoT works. Students learn about IoT networks and how things connect to networks, including whether the connection and processing is local (fog computing), is on the network edge (edge computing), or is remote (cloud computing). In addition students learn IoT data networks, connection types, layer models and IoT network protocols and standards.

Three Lectures, one lab (3 hours); second term

Prerequisite(s): PROCTECH 3CC3 and registration in level IV of Automation Engineering Technology and permission from the Department

Co-requisite(s): SMRTTECH 4ES3

First offered Fall 2020.

SMRTTECH 4SC3 - SMART CITIES AND COMMUNITIES

This course covers deployment of city and community networks, computation of data extracted from connected devices on the city, and sharing of analyzed data across agencies. The course also covers city wide system monitoring and predictive modeling to optimize and improve services such as parking and public transportation, low energy consumption, increase safety, reduce traffic congestion, and protect infrastructure.

Three lectures, one lab (1.5 hours); first term

Prerequisite(s): SMRTTECH 4ES3, ENGTECH 4EE0 and registration in level IV of Automation Engineering Technology

First offered Fall 2020.

SOCIAL PSYCHOLOGY

Courses in Social Psychology are administered by the Social Psychology Office. Kenneth Taylor Hall, Room 212, ext. 22241

<https://socialpsychology.mcmaster.ca/>

Courses

If no prerequisite is listed, the course is open.

SOCPSY 1Z03 - AN INTRODUCTION TO SOCIAL PSYCHOLOGY

This course offers an introduction to social psychology from a social sciences perspective. The course will explore the various ways people think about, affect, and relate to one another.

Three hours; one term

SOCPSY 2B03 - THE WELL-LIVED LIFE

An exploration of what social psychological perspectives and research can contribute to the quest for physical, mental, emotional and spiritual well-being.

Three hours; one term

Prerequisite(s): Registration in Level II or above in Honours Social Psychology

SOCPSY 2D03 - MAKING AND BREAKING RULES

An exploration of social psychological perspectives and research on the arenas of law, justice, crime and deviance.

Three hours; one term

Prerequisite(s): Registration in Level II or above in Honours Social Psychology

SOCPSY 2K03 - RESEARCH METHODS IN SOCIAL PSYCHOLOGY

This course is designed to develop those skills necessary to pursue and understand research. Several general methods of research will be examined.

Three hours; one term

Prerequisite(s): Registration in Level II or above in Honours Social Psychology.

Antirequisite(s): CMST 2A03, GEOG 2MA3, HLTHAGE 2A03, SOCIOL 2Z03, SOCSCI 2K03

SOCPSY 2YY3 - THEORIES IN SOCIAL PSYCHOLOGY

An overview of the history and development of various social psychological perspectives and theories.

Three hours; one term

Prerequisite(s): Registration in Level II or above in Honours Social Psychology

Antirequisite(s): SOCSCI 3YY3, SOCPSY 3YY3

SOCPSY 3A03 - MENTAL HEALTH

An exploration of social psychological approaches and research to mental health. Topic areas may range from the social and cultural factors that affect definitions of normal/abnormal to those that affect who experiences mental health issues and/or receives treatment.

Three hours; one term

Prerequisite(s): Registration in Level III or above of an Honours program in the Faculty of Social Sciences

Priority will be given to students registered in Honours Social Psychology.

SOCPSY 3B03 - UNDERSTANDING LIVED EXPERIENCES

An exploration of individuals experiences of everyday life using the theories and methods of social psychology. Changing foci may include experiences of sport and physical activity, health or illness, or stigma, marginalization and exclusion.

Three hours; one term

Prerequisite(s): Registration in Level III or above of an Honours program in the Faculty of Social Sciences.

SOCPSY 3C03 - REGIMES OF SOCIAL CONTROL

An exploration of social psychological approaches and research as they apply to an understanding of the law, the criminal justice system and/or other regimes of social control in society.

Three hours; one term

Prerequisite(s): Enrolment in Level III of any Faculty of Social Sciences Honours program

Priority will be given to students registered in Honours Social Psychology.

SOCPSY 3E03 - BIG IDEAS/GREAT THINKERS IN SOCIAL PSYCHOLOGY

An exploration of social psychology through the lens of individuals whose work has contributed significantly to our understanding of the relationship between individuals and society.

Three hours; one term

Prerequisite(s): Registration in Level III or above of an Honours program in Faculty of Social Sciences

Antirequisite(s): SOCPSY 2L03

SOCPSY 3F03 - WHO AM I? SELF AND IDENTITY

An exploration of one of the central themes in social psychology how we define ourselves. The course emphasizes the relational roots of self and the social processes underlying how identities are formed and change.

Three hours; one term

Prerequisite(s): Registration in Level III or above of an Honours program in the Faculty of Social Sciences

Antirequisite(s): SOCPSY 2M03

SOCPSY 3Y03 - SOCIAL PSYCHOLOGY IN ACTION

An exploration of applied social psychology and the areas in which social psychologists apply their methods, theories, principles and research findings, including education, the justice system, the media and health care.

Three hours; one term

Prerequisite(s): Registration in Level III or above in Honours Social Psychology.

SOCPSY 3Z33 - SMALL WORLDS: CHILDREN AND CHILDHOOD

An exploration of children and childhood from a social psychological perspective, including consideration of childhood as a social construction, socialization and experiences of childhood from a global perspective.

Three hours; one term

Prerequisite(s): Registration in Level III or above of an Honours Program in the Faculty of Social Sciences

SOCPSY 4B03 - SPECIAL TOPICS IN SOCIAL PSYCHOLOGY

Topics of contemporary interest to social psychologists, with emphasis on current research. Students should consult the Social Psychology office for information about topics to be covered.

Three hours (lectures and discussion); one term

Prerequisite(s): Enrolment in Level IV of any Faculty of Social Sciences Honours Program.

Priority will be given to students registered in Honours Social Psychology.

SOCPSY 4D03 - CONTEMPORARY SOCIAL ISSUES

An in-depth look at how social psychological perspectives can illuminate social issues, with foci ranging from sexuality and gender to racism, terrorism and climate change.

Three hours; one term

Prerequisite(s): Registration in Level IV Honours Social Psychology

Antirequisite(s): SOCPSY 3D03

SOCPSY 4E03 - SPECIAL TOPICS IN SOCIAL PSYCHOLOGY

Topics of contemporary interest to social psychologists, with emphasis on current research. Students should consult the Social Psychology office for information about topics to be covered.

Three hours; one term

Prerequisite(s): Enrolment in Level IV of any Faculty of Social Sciences Honours program

Priority will be given to students registered in Honours Social Psychology. This course can be repeated to a maximum of 6 units, if on a different topic.

SOCPSY 4IS3 - INDEPENDENT RESEARCH

Directed study under supervision of McMaster faculty member, involving analysis of published materials, field notes and/or other data. Results to be written up in the form of a scholarly paper.

One term.

Prerequisite(s): Registration in Level IV Honours Social Psychology and approval of Independent Research Form in advance by Program Director.

SOCPSY 4IS6 A/B - INDEPENDENT RESEARCH

Directed study under supervision of McMaster faculty member, involving analysis of published materials, field notes and/or other data. Results to be written up in the form of a scholarly paper.

Two terms.

Prerequisite(s): Registration in Level IV Honours Social Psychology and approval of Independent Research Form in advance by Program Director.

SOCPSY 4MM3 - PUBLIC SOCIAL PSYCHOLOGY

This course examines major figures in social psychology who have had an impact on the public and transformed our culture. It also examines current public debates and controversies about social psychology or particular social psychologists.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level IV Honours Social Psychology

Cross-list(s): SOCIOL 4MM3

SOCPSY 4ZZ6 A/B - SOCIAL PSYCHOLOGY RESEARCH PROJECT

This capstone course allows students to integrate knowledge and skills in a group research project in their area of interest.

Prerequisite(s): Registration in Level IV Honours Social Psychology

SOCIAL SCIENCES

Courses using the subject code SOCSCI are administered by the Faculty of Social Sciences.

Kenneth Taylor Hall, Room 129, ext. 23772

<http://socialsciences.mcmaster.ca>

Notes

1. Students are strongly recommended to complete SOCSCI 2E0. Completion of SOCSCI 2E0 is required to participate in an internship.
2. SOCSCI 2CC3, 2003, and 2P03 may be substituted as units of Level II Sociology.
3. SOCSCI 1SR3 and 1TR3 may be used towards the required Social Sciences units in Level I programs in the Faculty of Social Sciences or as elective courses.
4. Students enrolled in a three- or four-year undergraduate degree program in the Faculty of Social Sciences have the opportunity to take Social Sciences courses towards an affiliated certificate in Business Studies, Leadership and Management in the Not-For-Profit Sector, or Applied Behaviour Analysis (ABA). Students enrolled in a three-year degree program may take a maximum of six of these courses, and students enrolled in a four-year

degree program may take a maximum of eight of these courses. Students who successfully complete one of the following sets of six courses may apply to have their courses recognized by Mohawk College for the awarding of an Affiliated Certificate when they graduate from their McMaster degree program. If granted, this certificate will be issued by Mohawk College.

Courses for the Business Studies Certificate

- SOCSCI 2AC3 - Financial & Managerial Accounting for Social Sciences
- SOCSCI 2BU3 - Introduction to Business for Social Sciences
- SOCSCI 2EN3 - Entrepreneurial Training for Social Sciences
- SOCSCI 2HR3 - Human Resources Management for Social Sciences *
- SOCSCI 2MR3 - Introduction to Marketing for Social Sciences

One of:

- SOCSCI 2BA3 - Introduction to Business Analysis for Social Sciences
- SOCSCI 2PF3

Courses for the Certificate in Leadership and Management in the not-for-Profit Sector

- SOCSCI 2BR3 - Board and Staff Responsibilities for the Not-for-Profit Sector
- SOCSCI 2HR3 - Human Resources Management for Social Sciences *
- SOCSCI 2LC3 - Leadership and Communications for the Not-For-Profit Sector
- SOCSCI 2OP3 - Operational Planning for the Not-For-Profit Sector
- SOCSCI 2RD3 - Resource Development for the Not-For-Profit Sector
- SOCSCI 2SP3 - Strategic and Long Range Planning for the Not-for-Profit Sector

Courses for the Applied Behaviour Analysis (ABA) Certificate

- SOCSCI 2UA3 - Principles of Applied Behaviour Analysis I
- SOCSCI 2UB3 - Principles of Applied Behaviour Analysis 2
- SOCSCI 2UE3 - Ethical Practice in the Field of Applied Behaviour Analysis
- SOCSCI 2UF3 - Professional Relationships with Families and Teams
- SOCSCI 2UR3 - Single Subject Research Design
- SOCSCI 2US3 - Introduction to Autism Spectrum Disorder

**This course is part of both certificates*

SOCSCI 1HS3 - PATHWAYS INTO THE SOCIAL SCIENCES

This course recognizes a set of specialized, cross-applicable and transferable skills acquired by students in their previous education that facilitate and enhance their transition into a Social Sciences program.

Three hours; one term

Prerequisite(s): Completion of a SHSM program in Health and Wellness; Non-Profit; Justice, Community Safety and Emergency Services; Environment; or Business.

SOCSCI 1RM3 - HOW DO WE KNOW? DOING SOCIAL SCIENCES RESEARCH

This course provides students with a glimpse in at the diversity among the types of research methods used within the social sciences. Students will learn how we study the things we do, such as economic inequality, access to health care, changing patterns of crime, the interplay of religious practice and civil rights, by providing students with basic concepts and language related to conducting research.

Three hours; one term

Prerequisite(s): Registration in Social Sciences I, Economics I, or Honours Health and Society I and credit or registration in SOCSCI 1SS3; or registration in Level II or above in a program in the Faculty of Social Sciences.

SOCSCI 1SR3 - INQUIRY: SUCCESSFUL SOCIETIES

This inquiry-style course will guide students through the process of research design by exploring the general theme of Successful Societies. This broad theme will allow the instructor and students alike ample room to explore social sciences issues and research concerning what's better and worse when it comes to communities, economies, societies, and countries. The class community will develop individual research projects on student-selected topics and research will focus on deep questioning, including critical thinking about measurement, criteria, bias, and evaluation. This course will focus on the skills required to succeed at university.

Students can take these transferable skills into other courses, throughout their university career, and beyond.

Three hours; one term

Prerequisite(s): Registration in a Level 1 program in the Faculty of Social Sciences and

permission of the department

SOCSCI 1SS3 - INQUIRY IN THE SOCIAL SCIENCES

The systematic investigation of any subject requires a set of widely applicable and transferrable skills. Students learn how to formulate questions, gather and interpret evidence, and reach well-considered conclusions. The content theme will be drawn from Social Sciences issues and will vary depending on the subject expertise of the instructor.

Three hours; one term

Prerequisite(s): Registration in Social Sciences I, Economics I or Honours Health and Society I

Not open to students with credit in INQUIRY 1HU3, 1SC3, 1SS3

SOCSCI 1T03 - LIFE, THE UNIVERSITY, AND A BIT OF EVERYTHING

In this course, students will build the core academic abilities and habits that are crucial for success in student life and in the transition into and through university.

Through a unique blend of online and active in-person learning,

students will explore issues and ideas from each of the programs in the social sciences in order to develop their academic interests and plan for success.

Three Hours (web modules, weekly tutorials); one term

Prerequisite(s): Registration in Social Sciences I, Economics I or Honours Health and Society I; or registration in Level II Social Sciences General BA with permission of the department.

SOCSCI 1TR3 - SOCIAL SCIENCES FOUNDATIONS

This course focuses on the development of the core skills necessary for success in the Social Sciences, and in the University as a complex learning environment. Course materials will spotlight the many disciplines and programs that make up the social sciences, while applying their key conceptual and analytical tools to the kinds of everyday issues and experiences experienced by contemporary university students themselves. Upon successful completion of this course, students will have developed the skills related to academic writing, library searching, workload management, and problem-solving that are necessary for success in the social sciences and beyond.

Three hours (lectures and tutorial); one term

Prerequisite(s): Registration in a Level 1 program in the Faculty of Social Sciences and permission of the department.

SOCSCI 2AC3 - FINANCIAL & MANAGERIAL ACCOUNTING FOR SOCIAL SCIENCES

An introduction to financial and managerial accounting with a focus on topics relevant to managerial decision making. Focuses on understanding financial statements, and includes an emphasis on costing, budgeting, and control.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences; Grade 11 M or U Math is recommended

Not open to students with credit or registration in COMMERCE 1AA3, 2AB3, 4AK3. Not open to Continuing students.

SOCSCI 2BA3 - INTRODUCTION TO BUSINESS ANALYSIS FOR SOCIAL SCIENCES

The foundation of Business Analysis is planning, stakeholder analysis, structure and cultural awareness of an enterprise. Prepare for Business Analysis projects through needs analysis and business plan development using industry standard strategies such as project charter, interview and focus group techniques.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to Continuing students.

SOCSCI 2BR3 - BOARD AND STAFF RESPONSIBILITIES FOR THE NOT-FOR-PROFIT SECTOR

This course examines the characteristics of non-profit organizations and the relevance of an organization's mission within a changing environment. It will also consider the roles and 70 responsibilities of the Chief Executive Officer and the Board of Directors, management styles appropriate to voluntary organizations, and techniques for productive meetings.

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences.

Not open to Continuing Students.

SOCSCI 2BU3 - INTRODUCTION TO BUSINESS FOR SOCIAL SCIENCES

An overview of the functional areas of business and how they interact. This course is designed to provide an understanding of the role of business in Canada, focusing on the basics of management, organizational theory and structure.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to students with credit in COMMERCE 1B03, 1E03.

Not open to Continuing Students.

SOCSCI 2CC3 - CHILDREN AND FAMILY IN CANADA

This course is designed to look at the evolution of the family in Canadian society and how our children are contextualized within different family forms. Topics include life cycle development, sexism, hurrying children, self-esteem, prejudice and discrimination and sexual abuse.

On-line web modules, tutorials and testing; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): SOCSCI 2003

SOCSCI 2E0 - INTRODUCTION TO CAREER PLANNING THROUGH EXPERIENTIAL LEARNING

Students will engage in exploration activities to provide a foundation for career/education planning. They will better connect the skills acquired through academics, extracurricular activities and work experiences to future occupation choices. Six lectures/workshop (two hours); one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

SOCSCI 2EN3 - ENTREPRENEURIAL TRAINING FOR SOCIAL SCIENCES

This course will offer a careful examination of the process of entrepreneurship, concentrating on both theoretical styles and practical approaches.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Completion of SOCSCI 2BU3 is strongly recommended.

Not open to students with credit in ENGMGT 5E03.

Not open to Continuing students.

SOCSCI 2HR3 - HUMAN RESOURCES MANAGEMENT FOR SOCIAL SCIENCES

Develops comprehensive knowledge and the skills required to carry out Human Resources functions. Includes a variety of methods such as case studies and simulations to enhance learning activities.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to students with credit or registration in COMMERCE 2BC3.

Not open to Continuing students.

SOCSCI 2J03 - INTRODUCTION TO STATISTICS

An introduction to basic statistical concepts and their application to the analysis of data from the social sciences. The use of spreadsheets is emphasized.

Three hours; one term

Prerequisite(s): Registration in Level II or above of Honours Kinesiology (B.Sc. Kin.), Music (Music Cognition), Cognitive Science of Language or a Social Sciences program

Antirequisite(s): COMMERCE 2QA3, EARTHSC 2MB3, ECON 2B03, GEOG 2MB3, NURSING 2R03

Not open to students with credit or registration in: ECON 3U03, HTHSCI 1F03, 2A03, KINESIOL 3C03, PNB 2XE3, 3XE3, POLSCI 2F06, 3N06, PSYCH 2RA3, 2RB3, SOCIOLOG 3H06 A/B or any Level II, III or IV statistics course.

SOCSCI 2LC3 - LEADERSHIP AND COMMUNICATIONS FOR THE NOT-FOR-PROFIT SECTOR

This course examines personal organizational leadership styles. Students will utilize leadership competencies to effectively lead and manage an organization. Students will learn how to develop team building skills, manage productive meetings and form strategic alliances and partnerships.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to continuing students.

SOCSCI 2MR3 - INTRODUCTION TO MARKETING FOR SOCIAL SCIENCES

Examines how environmental forces shape an organization's marketing program. Students will learn to create marketing plans that reflect current consumer behaviour patterns.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to students with credit or registration in COMMERCE 2MA3.

Not open to Continuing students.

SOCSCI 2N03 - CONSPIRACY THEORIES, FAKE NEWS AND CRITICAL INVESTIGATION

An interdisciplinary examination through the lens of the Social Sciences of the role of hoaxes, myths, urban legends, and health scares in our contemporary social media landscape. Focuses on the development of the critical thinking and digital literacy skills needed to evaluate journalistic, academic and alternative media sources.

Prerequisite(s): Registration in Level II or above or permission of the department

Three Hours; one term

SOCSCI 2003 - CANADIAN CHILDREN

This course deals with a spectrum of issues related to Canadian children such as family, socialization, identity formation, moral development, abuse and strategies for a better future.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above in any program

Antirequisite(s): SOCSCI 2CC3

SOCSCI 20P3 - OPERATIONAL PLANNING FOR THE NOT-FOR-PROFIT SECTOR

Students learn to implement and manage an annual operating plan, to set priorities, develop a clear direction for action, assign responsibilities, set out costs and indicate how revenue will be generated to fund annual programs. Students will use the plan as a resource for board, staff and volunteers and to track and evaluate progress.

Seminar (three hours); one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to continuing students.

SOCSCI 2P03 - CANADIAN ADOLESCENTS

This course deals with a spectrum of issues related to Canadian adolescents such as identity formation, sexuality, peer groups and power and the social politics of career formation.

Three hours (lectures and discussion); one term

Prerequisite(s): Registration in Level II or above in any program

SOCSCI 2RD3 - RESOURCE DEVELOPMENT FOR THE NOT-FOR-PROFIT SECTOR

This course will investigate sources of funding for not-for-profit organizations including grants, foundations, corporate partnerships, government programs and fundraising. Students will learn how to create a resource development plan, and how to identify capacity, vision and ethics in order to assess potential resources available to the organization.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to continuing students.

SOCSCI 2SP3 - STRATEGIC AND LONG RANGE PLANNING FOR THE NOT-FOR-PROFIT SECTOR

This course will explore the various models of strategic planning. Based on outcome, evaluation and accountability, students will learn how to select the appropriate model and learn how to conduct environmental analysis in order to manage the organization.

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to Continuing Students.

SOCSCI 2UA3 - PRINCIPLES OF APPLIED BEHAVIOUR ANALYSIS I

This course presents an introductory examination of the principles of applied behaviour analysis, and how they can be applied to clinical populations, such as persons with autism.

Three hours; one term

Prerequisite(s): Registration in Level II or above of a program in the Faculty of Social Sciences

Not open to Continuing Students.

SOCSCI 2UB3 - PRINCIPLES OF APPLIED BEHAVIOUR ANALYSIS 2

Building on knowledge gained in ABA1, this course explores evidence-based applications of ABA to clinical problems.

Three hours; one term

Prerequisite(s): Credit or registration in SOCSCI 2UA3 and registration in Level II or above of a program in the Faculty of Social Sciences

Not open to Continuing Students.

SOCSCI 2UE3 - ETHICAL PRACTICE IN THE FIELD OF APPLIED BEHAVIOUR ANALYSIS

This course introduces students to foundations of ethical thinking and practice, including ethical decision-making tools used in the field.

Three hours; one term

Prerequisite(s): Credit or registration in SOCSCI 2UA3 and registration in Level II or above of a program in the Faculty of Social Sciences

Not open to Continuing Students.

SOCSCI 2UF3 - PROFESSIONAL RELATIONSHIPS WITH FAMILIES AND TEAMS

This course presents students with theories, terminology and applications underlying current approaches to teamwork and working with families of individuals with autism.

Three hours; one term

Prerequisite(s): Credit or registration in SOCSCI 2UA3 and registration in Level II or above of a program in the Faculty of Social Sciences

Not open to Continuing Students.

SOCSCI 2UR3 - SINGLE SUBJECT RESEARCH DESIGN

This course presents an introduction to applied research with a primary focus on single subject design.

Three hours; one term

Prerequisite(s): Credit or registration in SOCSCI 2UA3 and registration in Level II or above of a program in the Faculty of Social Sciences

Not open to Continuing Students.

SOCSCI 2US3 - INTRODUCTION TO AUTISM SPECTRUM DISORDER

This course introduces students to multiple dimensions of autism related to diagnosis, assessment and treatment.

Three hours; one term

Prerequisite(s): Credit or registration in SOCSCI 2UA3 and registration in Level II or above of a program in the Faculty of Social Sciences

Not open to Continuing Students.

SOCSCI 2V03 - THE SOCIAL SCIENCES OF POPULAR CULTURE

This course through a study of popular music, movies, television, and social media applications aims to discover what our popular culture has to say about the aspirations and anxieties that govern our understanding and our lives.

Three hours; one term

Prerequisite(s): Registration in Level II or above or permission of the department

SOCSCI 3EL3 - LEADERSHIP THROUGH EXPERIENTIAL LEARNING

This interactive course explores the various models of leadership, diversity, power and change with an opportunity for students to gain practical experience through community based experiences.

Three hours; one term

Prerequisite(s): Registration in Level III or above in any program in the Faculty of Social Sciences

Antirequisite(s): POLSCI 3HP3, 3PR3, 4FG3

SOCSCI 3F03 - SOCIAL SCIENCES IN ACTION

This is a student driven experiential capstone course. Students will develop and implement their own course of study through planned and approved activities in the campus and greater community.

Seminars, experiential activities; 1-2 terms

Prerequisite(s): Registration in Level III or IV of any Social Sciences program

SOCSCI 3IFO A/B S - FULL-TIME INTERNSHIP

Full-time, non-credit, paid work opportunities of four, eight, twelve, or sixteen months allowing students to explore careers, develop employability skills and make important contacts for both now and after graduation.

Normally 26 to 40 hours per week

Prerequisite(s): Registration in a program in the Faculty of Social Sciences; credit in SOCSCI 2EL0; and permission of the Programming and Outreach Manager. SOCSCI 3IFO may be repeated.

SOCSCI 3IPO A/B S - PART-TIME INTERNSHIP

Part-time, non-credit, paid work opportunities of four, eight, twelve, or sixteen months allowing students to explore careers, develop employability skills and make important contacts for both now and after graduation.

Normally 5 to 25 hours per week

Prerequisite(s): Registration in a program in the Faculty of Social Sciences; credit in SOCSCI 2EL0; and permission of the Programming and Outreach Manager. SOCSCI 3IPO may be repeated.

SOCSCI 4ID3 - ADDRESSING SOCIAL PROBLEMS THROUGH BUSINESS, ENGINEERING AND THE SOCIAL SCIENCES

A final-year course where students work in interdisciplinary teams on an experiential project that incorporates business, engineering and social sciences elements.

Prerequisite(s): Registration in Level IV of a Commerce, Engineering & Society, or Social Sciences program, or Level V of any Engineering and Management Program; and permission of the course instructor

Cross-list(s): COMMERCE 4ID3, ENGINEER 4ID3

SOCIAL WORK

Courses in Social Work are administered by the School of Social Work. Kenneth Taylor Hall, Room 319, ext. 23795

<http://www.socialwork.mcmaster.ca>

School Notes

- SOCWORK 1AA3 and 1BB3 are available to all students.
- The following courses are available to students in a Labour Studies program or for elective credit for students enrolled in Level III or above of a non-Social Work program. SOCWORK 1AA3 and 1BB3 are prerequisites. Space for such students is limited and places are assigned on a first come basis. Not all courses will be offered every year.
 - SOCWORK 3B03 Transnational Lives in a Globalizing World
 - SOCWORK 3C03 Social Aspects of Health and Illness
 - SOCWORK 3I03 - Social Work and Indigenous Peoples
 - SOCWORK 3O03 Social Work and Sexualities
 - SOCWORK 3S03 Social Work, Disability and Dis/Ableism
 - SOCWORK 3T03 Poverty and Homelessness
 - SOCWORK 4C03 Critical Perspectives on Race, Racialization, Racism and Colonialism in Canadian Society
 - SOCWORK 4G03 Selected Topics
 - SOCWORK 4I03
 - SOCWORK 4J03 Social Change: Social Movements and Advocacy
 - SOCWORK 4Q03 - Indigenizing Social Work Practice Approaches
 - SOCWORK 4R03 Feminist Approaches to Social Work and Social Justice
 - SOCWORK 4U03 Immigration, Settlement and Social Work
 - SOCWORK 4W03 Child Welfare
 - SOCWORK 4Y03 Critical Issues in Mental Health & Addiction: Mad & Critical Disability Studies Perspectives for SW
- The following course is available to students enrolled in level III or above of a non-Social Work program. Space for such students is limited and places

are assigned on a first come basis. This course will not be offered every year.

· SOCWORK 3L03 - Violence: Social Justice Perspectives and Responses

Courses

All courses are open only to Social Work students unless otherwise specified. (See *Notes 1, 2, and 3* above.)

SOCWORK 1AA3 - SO YOU THINK YOU CAN HELP? INTRODUCTION TO SOCIAL WORK I

A critical exploration of ideas and values influencing "helping" in social work. Focus on how helping is experienced by people intended to benefit from it.

Lectures and discussions; one term

Antirequisite(s): SOCWORK 1A06 A/B

This course is available to all students.

SOCWORK 1BB3 - RE-IMAGINING HELP: INTRODUCTION TO SOCIAL WORK II

A critical exploration of alternative understandings and practices of 'helping' in social work rooted in inclusive engagement with service users/communities and respect for their knowledge.

Lectures and discussions; one term

Antirequisite(s): SOCWORK 1A06 A/B

This course is available to all students.

SOCWORK 2A06 A/B - THEORY, PROCESS AND COMMUNICATION SKILLS FOR SOCIAL WORK

Knowledge, value base and intervention methods of social work practice; basic skill development in interpersonal communication and interviewing.

Lectures, discussions, group work, exercises; two terms

Prerequisite(s): Enrolment in a Social Work program

Antirequisite(s): SOCWORK 2C03, 2C06, 2D03

SOCWORK 2BB3 - ANTI-OPPRESSIVE SOCIAL WORK

The course provides a grounding in theories and knowledge that underpin anti-oppression, and explores the ways these get taken up in the work that social workers do.

Exercises, lectures, discussion; one term

Prerequisite(s): Enrollment in a Social Work or Labour Studies program

Antirequisite(s): SOCWORK 2B06

SOCWORK 2CC3 - INTRODUCTION TO COMMUNITY PRACTICE

Understanding and analysis of social work practice within a community context that emphasizes the capacity of communities to initiate community action and social change.

Lectures, discussion, exercises; one term

Prerequisite(s): Enrolment in a Labour Studies or Social Work program

Antirequisite(s): SOCWORK 4003

SOCWORK 3B03 - TRANSNATIONAL LIVES IN A GLOBALIZING WORLD

Transnationalism is a novel yet important topic in social work against the background of globalization. This course explores the conditions, politics, and impacts of immigrants', as well as immigrant families', sustained relationships (physical, material, symbolic, and/or imagined) with their homelands, and the implications of such relationships for social work (knowledge, policy, and practice) in this increasingly interdependent world.

Lectures, Discussion, Exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3 and registration in Level III or above of any program

Not Open to students with credit in SOCWORK 4GG3 if the topic was Transnational Lives in a Globalizing World.

SOCWORK 3C03 - SOCIAL ASPECTS OF HEALTH AND ILLNESS

Exploration of issues of health and illness, care delivery, the social determinants of health and contemporary challenges faced by social workers in health care settings.

Lectures, discussion and selective use of community resources; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3 and registration in Level III or above of any program

SOCWORK 3D06 A/B S - GENERAL SOCIAL WORK I

A seminar for critical examination of conceptual and practice issues emerging from the application of contemporary social work knowledge, skills and values in field practice.

Seminars, workshops; two terms; option of equivalent summer block in combination with SOCWORK 3DD6 A/B (summer); priority for summer block given to B.S.W. students

Prerequisite(s): SOCWORK 2B06 or, both SOCWORK 2BB3 and SOCWORK 2CC3; and 2A06 A/B or, both SOCWORK 2C03 and SOCWORK 2D03; and permission of the Department

Co-requisite(s): SOCWORK 3DD6 A/B

Antirequisite(s): SOCWORK 3D09

Credit in this course is dependent on achieving a minimum grade of C+ and a Pass in SOCWORK 3DD6 A/B S.

SOCWORK 3DD6 A/B S - FIELD PRACTICUM I

Field practicum to develop basic intervention and interviewing skills, particularly in the formation of relationships with individuals, families, groups and communities. Students participate in defining learning goals and experiences.

This course is evaluated on a Pass/Fail basis.

Field experience equivalent to 15 hours per week; two terms; Option of equivalent summer block placement in combination with SOCWORK 3D06 A/B taken in the summer. Priority for summer block given to B.S.W. students.

Prerequisite(s): SOCWORK 2B06 or, both SOCWORK 2BB3 and SOCWORK 2CC3; and SOCWORK 2A06 A/B or, both SOCWORK 2C03 and SOCWORK 2D03; and permission of the Department

Co-requisite(s): SOCWORK 3D06 A/B S

Credit in this course is dependent on receiving a Pass and a minimum grade of C+ in SOCWORK 3D06 A/B S.

SOCWORK 3E03 - INDIVIDUAL PRACTICE ACROSS THE LIFESPAN

Examination of theories of social work practice with individuals at various life stages. Exploration of how social location and social context affects individual development and subsequent social work intervention.

Lectures, discussion, exercises; one term

Antirequisite(s): SOCWORK 3A03, 3N03, 3R03, 4N03

SOCWORK 3F03 - SOCIAL WORK WITH GROUPS

Students will develop effective, ethical group practice skills including assessment from multiple perspectives, facilitation and intervention skills, evaluation, to address the needs of diverse populations.

Lectures, discussion, exercises, group work; one term

Prerequisite(s): Enrolment in a Social Work program

Antirequisite(s): SOCWORK 3A03, 3N03, 3R03, 4N03

SOCWORK 3I03 - SOCIAL WORK AND INDIGENOUS PEOPLES

Examination of structural and cultural variables underlying the complex relationships between Indigenous communities and mainstream society, with particular attention to how they are played out in social work practice.

Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program.

Antirequisite(s): SOCWORK 4I03

Not open to students with credit in SOCWORK 4G03 if the topic was Social Work and Indigenous Peoples.

Students are strongly encouraged to take SOCWORK 3I03 before taking SOCWORK 4Q03.

SOCWORK 3L03 - VIOLENCE: SOCIAL JUSTICE PERSPECTIVES AND RESPONSES

This course critically examines the topic of violence, examining individual to systemic, overt to subtle, and socially condemned to socially normalized forms of violence. It centres critical perspectives and the voices of service users and survivors to explore the role of social work in addressing, resisting, and redressing violence. Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or registration in level III or above of any program

Antirequisite(s): SOCWORK 4G03 if the topic was Violence: Social Justice

SOCWORK 3003 - SOCIAL WORK AND SEXUALITIES

Examination of issues related to sexuality across the life course e.g. sexual development, sexual and gender identities/expressions, reproduction, relational and political dynamics associated with sexuality.

Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program

SOCWORK 3S03 - SOCIAL WORK, DISABILITY AND DIS/ABLEISM

A critical engagement with Social Work and Disability Studies' understandings of 'disability' and 'dis/ableism' to explore how they might intersect to inform social work practice.

Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3 and registration in Level III or above of any program

Not Open to students with credit in SOCWORK 4G03 if the topic was Social Work and Disability: Intersections and Exchanges.

SOCWORK 3T03 - POVERTY AND HOMELESSNESS

This course will critically examine social work practices and policies in response to poverty and homelessness including causes, lived experiences, service provision, alternate policy options and activist responses.

Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program

Cross-list(s): LABRST 3T03

Not Open to students with credit in SOCWORK 4G03 if the topic was Poverty and Homelessness.

SOCWORK 4C03 - CRITICAL PERSPECTIVES ON RACE, RACIALIZATION, RACISM AND COLONIALISM IN CANADIAN SOCIETY

This course involves critical analysis of the construction of social relations in Canadian society. Students will have the opportunity to examine variables such as race, ethnicity and cultural specificity in the social ascription and adaptation process. Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program

Not open to students with credit or registration in SOCWORK 4Z03 Selected Issues In Social Welfare Policy if the issue was Racial and Cultural Issues in Canadian Welfare.

SOCWORK 4D06 A/B S - GENERAL SOCIAL WORK II

The course aims to help students to integrate their academic and theoretical work with practice experience as they prepare for graduation into professional practice. Seminar; Two terms; Option of equivalent block placement in combination with SOCWORK 4DD6 A/B S

Prerequisite(s): SOCWORK 3D06 A/B, SOCWORK 3DD6 A/B, and permission of the department

Co-requisite(s): SOCWORK 4DD6 A/B S

Antirequisite(s): SOCWORK 4D12

Credit in this course is dependent on achieving a minimum grade of C+ and a Pass in SOCWORK 4DD6 A/B S.

It is strongly recommended that students complete SOCWORK 3E03 before enrolling in SOCWORK 4D06 A/B, S and SOCWORK 4DD6 A/B, S.

SOCWORK 4DD6 A/B S - FIELD PRACTICUM II

Field experience to refine practice skills. Students spend the equivalent of two days per week in social agencies, or with other organizations, in supervised practice. This course is evaluated on a Pass/Fail basis.

Option of equivalent block placement in conjunction with SOCWORK 4D06 A/B S.

Prerequisite(s): SOCWORK 3D06 A/B, SOCWORK 3DD6 A/B, and permission of the department

Co-requisite(s): SOCWORK 4D06 A/B S

This course is evaluated on a pass/fail basis. Credit in this course is dependent on receiving a Pass and a minimum grade of C+ in SOCWORK 4D06 A/B S.

It is strongly recommended that students complete SOCWORK 3E03 before enrolling in SOCWORK 4D06 A/B, S and SOCWORK 4DD6 A/B, S.

SOCWORK 4G03 - SELECTED TOPICS

Critical examination of social work practice in respect to selected social issues. Topics will vary from year to year and the School should be consulted for details for any particular year.

Lectures, Discussion, Exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program
SOCWORK 4G03 may be repeated, if on a different topic.

SOCWORK 4J03 - SOCIAL CHANGE: SOCIAL MOVEMENTS AND ADVOCACY

Students engage in experiential learning in the community with mentors to examine current theories and practice in the area of social change.

Lectures, discussion, exercises and group work; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program

SOCWORK 4Q03 - INDIGENIZING SOCIAL WORK PRACTICE APPROACHES

This course examines the social worker's role and responsibility in working with diverse Indigenous peoples such as First Nation, Metis and Inuit living on reserve and in urban areas. The concept and process of ethical tensions indigenizing social work practice approaches will be connected to indigenous philosophy and epistemology with the approach of understanding and building relationships and reconciliation between indigenous and non-indigenous peoples, as well practices within the social work profession.

Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program.

Antirequisite(s): SOCWORK 3Q03.

Not open to students with credit in SOCWORK 4G03 if the topic was Indigenizing Social Work Practice Approaches.

Students are strongly encouraged to take SOCWORK 3I03 before taking SOCWORK 4Q03.

SOCWORK 4R03 - FEMINIST APPROACHES TO SOCIAL WORK AND SOCIAL JUSTICE

This course explores feminist frameworks and applies them to social work and social justice practices. Students will consider historical and present day feminist social work practice discourses, feminist critiques of social work practice, and critiques of feminist social work practice. This course will also explore themes of intersectionality, oppression, power, resistance, and activism.

Lectures, Discussion, Exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or SOCWORK 1BB3 and registration in Level III or above of any program

Antirequisite(s): SOCWORK 4E03, 4T03

SOCWORK 4SA3 - CRITICAL CHILD WELFARE: FROM THEORY TO PRACTICE PART I

An advanced course on the development of knowledge, skills, and attitudes needed for child welfare work. Attention to the social/political factors that shape the way practice is imagined and delivered.

Seminars, discussions, group work, case simulation, exercises; one term

Prerequisite(s): SOCWORK 2A06, 2B03, 2BB3 and 4W03 (all with a minimum of C+), and permission of the instructor

SOCWORK 4SB3 - CRITICAL CHILD WELFARE: FROM THEORY TO PRACTICE PART II

An advanced course on the integration and application of knowledge, skills, and attitudes needed for child welfare work, along with an understanding of the way social/political factors constrain/enable intervention options.

Seminars, discussions, group work, case simulation, exercises; one term

Prerequisite(s): SOCWORK 2A06, 2BB3, 4SA3 and 4W03 (all with a minimum of C+); and permission of the instructor for continuation after SOCWORK 4SA3

SOCWORK 4U03 - IMMIGRATION, SETTLEMENT AND SOCIAL WORK

Examination of social and political factors impacting the lives of immigrants and refugees as they settle in Canada; critical assessment of social work responses.

Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program *Not open to students with credit in SOCWORK 4G03 if the topic was Immigration and Settlement.*

SOCWORK 4W03 - CHILD WELFARE

This course analyzes the Canadian child welfare system, its policies and programs and teaches skills for working with children, families and substitute caregivers.

Lectures, discussions, skills development; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program

SOCWORK 4X03 - SOCIAL WORK WITH FAMILIES

Examination and application of family theory and practice models including a critical look at societal definitions of and expectations for families.

Lectures, discussion, exercises; one term

Prerequisite(s): Credit or registration in SOCWORK 3D06 A/B and 3DD6 A/B; or permission of the instructor

Antirequisite(s): SOCWORK 3M03

SOCWORK 4Y03 - CRITICAL ISSUES IN MENTAL HEALTH & ADDICTION: MAD & CRITICAL DISABILITY STUDIES PERSPECTIVES FOR SW

Critical review of contemporary theoretical frameworks, policies and programs in mental health and addiction and the implications for social work research and practice in Canada.

Lectures, discussion, exercises; one term

Prerequisite(s): Registration in a Social Work or Labour Studies program; or SOCWORK 1AA3 or 1BB3; and registration in Level III or above of any program *Not open to students with credit in SOCWORK 4G03 if the topic was Mental Health and Addiction.*

SOCWORK 4ZZ3 - SOCIAL WELFARE: PRACTICE IMPLICATIONS AND ADVOCACY

Provides an overview of Canada's social service system from an historical and contemporary perspective. Explores the purpose and values underlying the development of social welfare programs. Engages in critical analysis of practice implications and policy advocacy for social workers.

Lectures and discussion, one term.

Prerequisite(s): Credit or registration in SOCWORK 3D06 A/B S and SOCWORK 3DD6 A/B S. The School of Social Work strongly suggests that students complete SOCWORK 3D06 A/B S and 3DD6 A/B S before taking this course.

Antirequisite(s): SOCWORK 2B06; SOCWORK 2B03

SOCIOLOGY

Courses in Sociology are administered by the Department of Sociology.

Kenneth Taylor Hall, Room 627, ext. 24481

<http://www.sociology.mcmaster.ca>

Department Notes

1. Prior to registration, students should consult the Department of Sociology's website or individual course outlines for fuller course descriptions and any changes in the list of courses offered in the upcoming year.
2. SOCIOL 1Z03 and several other courses are divided into independent sections.
3. Priority is given in all Level III courses to Sociology students, and in all Level IV courses to Honours Sociology students.
4. All Level IV courses are normally only open to students registered in a Level IV Honours Sociology program on a first come basis. SOCIOL 4M03, 4MM6 A/B S, and 4N03 require permission of the instructor.
5. Students transferring their degree program to Sociology are required to complete SOCIOL 2Z03 and 3FF3, the required methods courses. Students seeking an exemption, based on equivalent methods courses in other programs not listed by Sociology as antirequisites, must apply for permission from the department.
6. With some exceptions (noted below), the courses on the following lists are open to students in Level IV of an Honours Sociology program:

Courses

If no prerequisite is listed, the course is open.

SOCIOL 1C03 - CANADIAN SOCIETY: SOCIAL PROBLEMS, SOCIAL POLICY, AND THE LAW

An examination of Canadian social policy and the law in intimate relationships and families, work, immigration, health, and the criminal justice system.

Two lectures, one tutorial, one term

SOCIOL 1Z03 - AN INTRODUCTION TO SOCIOLOGY

A survey of the areas of research which interest the sociologist. Interpretation of human action from the standpoint of the group.

Two lectures, one tutorial, one term

Antirequisite(s): SOCIOL 1A06 A/B

SOCIOL 2BB3 - SOCIOLOGY OF DEVIANCE

An introduction to the sociological study of deviance covering key concepts, ideas, methods and different forms of deviant behaviour.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): SOCIOL 2C06 A/B

SOCIOL 2CC3 - CONSTRUCTING DEVIANCE

An exploration of how individuals and behaviours are defined as deviant and the consequences of these definitional processes.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): SOCIOL 2C06 A/B

SOCIOL 2DD3 - IMMIGRATION AND THE CANADIAN MOSAIC

This course overviews contemporary international migration and immigrant integration with emphasis on Canada. Topics include migration theories, immigration policies, socioeconomic integration, and the second generation.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

SOCIOL 2EE3 - INTRODUCTION TO INDIGENOUS-SETTLER RELATIONS IN CANADA

An overview of Indigenous-settler relations in Canada, including the history of colonization and the sociological aspects of contemporary identities, inequalities, conflicts, and social movements.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B or one of INDIGST 1A03, 1AA3 and enrollment in Level II or above

SOCIOL 2FF3 - THE SOCIOLOGY OF 'RACE' AND ETHNICITY

An introduction to the study of race and ethnicity. The course examines theoretical, empirical, and policy issues related to racism, discrimination, identity, multiculturalism, and social integration.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): SOCIOL 2E06 A/B

SOCIOL 2GG3 - SOCIOLOGY OF EDUCATION

An exploration of formal schooling and the broader education system in Western society with an emphasis on application of sociological theory to educational practices.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): SOCIOL 2P06 A/B

SOCIOL 2HH3 - SOCIOLOGY OF GENDER

An introduction to the sociology of gender, including empirical and theoretical dimensions. The course will emphasize social construction, social institutions, and cultural dimensions.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): SOCIOL 2Q06 A/B

SOCIOL 2I03 - SOCIOLOGY OF ORGANIZATIONS

A theoretical and empirical analysis of formal and informal organizational structures and processes in the major sectors of modern industrial society.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): LABRST 2I03, 2I06, 3I03, SOCIOL 2I06

SOCIOL 2JJ3 - RACE, CLASS, GENDER, AND SEXUALITY

The sociology of race, class, gender and sexuality examines structural and cultural inequalities through an intersectional lens.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

SOCIOL 2KK3 - INTRODUCTION TO CLASSICAL SOCIOLOGICAL THEORY

An exploration of theories developed up to the early 20th century (including the ideas of Marx, Durkheim, Weber, and the early theorists of gender or race).

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and registration in any Sociology program

Antirequisite(s): SOCIOL 2S06 A/B

SOCIOL 2L03 - MEDIA INSTITUTIONS

An examination of the institutional structure and production processes of the press, television, and radio. Topics include news gathering, television and radio program production and the relationship between media production and management.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): CMST 2L03

SOCIOL 2LL3 - INTRODUCTION TO CONTEMPORARY SOCIOLOGICAL THEORY

An exploration of theories developed from the early 20th century to the present (such as the work of neo-Marxists, symbolic interactionists, feminists, and globalization theorists).

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and SOCIOL 2KK3 and registration in any Sociology program

Antirequisite(s): SOCIOL 2S06 A/B

SOCIOL 2PP3 - SOCIOLOGY OF FAMILIES

An introduction to theoretical, historical, contemporary, and comparative perspectives on intimate relationships, households, and families.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): SOCIOL 2U06 A/B

SOCIOL 2QQ3 - DYNAMICS AND TRANSITIONS IN INTIMATE RELATIONSHIPS AND FAMILIES

An analysis of diversity in intimate relationships and families, including relationship formation and dissolution, caregiving, paid and unpaid labour, and social policy.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): SOCIOL 2U06 A/B

SOCIOL 2R03 - PERSPECTIVES ON SOCIAL INEQUALITY

This course will introduce the student to major theories of social inequality, such as the Marxian, Weberian and structural-functionalist perspectives.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

SOCIOL 2RR3 - CASE STUDIES OF SOCIAL INEQUALITY

This course will introduce the student to the empirical literature on social inequality. Depending on the year, the focus will be on class, status, power and elites, income, education, region, age, gender and race/ethnicity.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

SOCIOL 2SS3 - SOCIOLOGY OF WORK AND OCCUPATIONS

This course examines the nature and meaning of work in relation to labour market, economic, and demographic changes in Canada over the last century.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): SOCIOL 2V06 A/B

SOCIOL 2T03 - SOCIOLOGY OF SPORT

This course provides a detailed theoretical and empirical examination of how sport is culturally organized, experienced and mediated.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Antirequisite(s): KINESIOL 1H03, KINESIOL 3P03

Not open to students with credit or registration in SOCIOL 3J03 if the topic was Sociology of Sport. Priority will be given to students registered in a Sociology program.

SOCIOL 2TA3 - ISLAM IN NORTH AMERICA

This course will explore the history and different expressions of North American Islam. Students will compare and contrast different expressions of Islam in North America.

Two lectures, one tutorial; one term

Cross-list(s): RELIGST 2TA3

SOCIOL 2TT3 - ENVIRONMENTAL SOCIOLOGY

This course introduces students to sociological perspectives on the relationship between societies and the natural environment. Topics include: resource use, wilderness, pollution, and environmental justice.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

SOCIOL 2UU3 - INDIGENOUS ONTOLOGIES AND WAYS OF KNOWING

This course will examine the ways in which Indigenous peoples understand themselves as social beings and societies. Indigenous theories and ways of knowing will be drawn from various Indigenous societies throughout North America.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B or one of INDIGST 1A03, 1AA3, RECONCIL 1A03 and enrollment in Level II or above

SOCIOL 2Z03 - INTRODUCTION TO SOCIOLOGICAL RESEARCH

This course is designed to develop those skills necessary to pursue and understand research. Several general methods of sociological research will be examined.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in a Sociology or Social Work program

Antirequisite(s): ANTHROP 2Z03, CMST 2A03, GEO 2HR3, GEOG 2MA3, GERONTOL 2C03, HLTHAGE 2A03, 2A06, 3Z06, HEALTHST 2B03, SOCSOCI 2K03

SOCIOL 3A03 - ADVANCED ANALYSIS OF CLASSICAL SOCIOLOGICAL THEORY

An advanced examination of classical sociological theory. Work to be discussed might include Marx, Weber, Durkheim, Mead, Cooley, Du Bois and Freud.

Lectures and discussion (three hours); one term

Prerequisite(s): SOCIOL 2KK3 and 2LL3 or 2S06 A/B and registration in Level III of any Honours Sociology program

SOCIOL 3B03 - SELECTED TOPICS IN THE SOCIOLOGY OF EDUCATION

An examination of selected topics in the sociology of education.

Lectures and discussion (three hours); one term

Prerequisite(s): At least 18 units of Sociology (including one of SOCIOL 2GG3, 2P06 A/B)

SOCIOL 3B03 may be repeated, if on a different topic, to a total of six units.

SOCIOL 3CC3 - SOCIOLOGY OF THE FAMILY AND THE LIFE CYCLE

An advanced course allowing detailed study of the family and the life cycle. Special attention will be paid to the mid and later years.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 2PP3, 2QQ3, 2U06 A/B or registration in a Combined Honours in Sociology and Gerontology program or Honours Social Psychology program

Antirequisite(s): GERONTOL 3M03, HLTHAGE 3P03

SOCIOL 3D03 - SPECIAL TOPICS IN THE SOCIOLOGY OF THE FAMILY

An advanced course allowing detailed study of selected topics in the sociology of the family.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 2PP3, 2QQ3, 2U06 A/B

SOCIOL 3D03 may be repeated, if on a different topic, to a total of six units.

Priority will be given to students registered in a Sociology program.

SOCIOL 3FF3 - INTRODUCTORY STATISTICS FOR SOCIOLOGY

This course introduces the basic principles of statistics used in sociological research. The focus will be on selecting, applying, and interpreting statistics for data analyses.

Lectures and labs (three hours); one term

Prerequisite(s): SOCIOL 2Z03 and registration in Level III of any Honours Sociology program

Antirequisite(s): SOCIOL 3H06 A/B

Not open to students with credit or registration in any Statistics courses with the exception of STATS 1L03, 2D03, 3U03.

SOCIOL 3G03 - SOCIOLOGY OF HEALTH CARE

Selected issues concerning forms of providing health care.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Priority will be given to students registered in a Sociology program.

SOCIOL 3GG3 - SPECIAL TOPICS IN THE SOCIOLOGY OF DEVIANCE

An advanced course allowing detailed study of selected topics in the sociology of deviance. Topics will vary from year to year.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 2BB3, 2CC3, 2C06 A/B

SOCIOL 3GG3 may be repeated, if on a different topic, to a total of six units.

Priority will be given to students registered in a Sociology program.

SOCIOL 3HH3 - SOCIOLOGY OF HEALTH

Sociological approaches to the study of health and illness.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Priority will be given to students registered in a Sociology program.

SOCIOL 3J03 - SPECIAL TOPICS IN SOCIOLOGICAL ANALYSIS I

An examination of selected topics of contemporary interest to sociologists. Students should consult the Department concerning the topics to be examined.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

SOCIOL 3J03 may be repeated, if on a different topic, to a total of six units.

SOCIOL 3K03 - SPECIAL TOPICS IN SOCIOLOGICAL ANALYSIS II

Same as SOCIOL 3J03.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

SOCIOL 3K03 may be repeated, if on a different topic, to a total of six units.

SOCIOL 3KK3 - GENOCIDE: SOCIOLOGICAL AND POLITICAL PERSPECTIVES

An examination of genocide and other extreme crimes against humanity.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level III or above

Antirequisite(s): SOCSCI 2C03

Cross-list(s): POLSCI 3KK3

Priority will be given to students registered in a Political Science or Sociology program.

This course is administered by the Department of Political Science.

SOCIOL 3MM3 - POLITICAL SOCIOLOGY

This course examines the field of political sociology, including power, the state, policy, and social change.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Enrolment priority will be given to students registered in a Sociology program.

SOCIOL 3NN3 - POPULAR CULTURE AND INEQUALITY

How the production, reception, and consumption of art and popular culture are shaped by and reinforce race, class, and gender inequalities.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

SOCIOL 3O03 - QUALITATIVE RESEARCH METHODS

This course will provide a detailed study of selected qualitative methods in Sociology. Lectures and discussion (three hours); one term

Prerequisite(s): SOCIOL 2Z03 and registration in Level III of any Honours Sociology program

Antirequisite(s): GERONTOL 3R03, HLTHAGE 3A03, 3B03

SOCIOL 3P03 - ADVANCED ANALYSIS OF CONTEMPORARY SOCIOLOGICAL THEORY

An advanced examination of contemporary sociological theory, with a possible focus on schools of theoretical thought like critical theory, symbolic interactionism, or feminist theory.

Lectures and discussion (three hours); one term

Prerequisite(s): SOCIOL 2KK3 and 2LL3, or 2S06 A/B and registration in Level III of any Honours Sociology program

Antirequisite(s): SOCIOL 3A06

SOCIOL 3U03 - SOCIOLOGY OF SEXUALITIES

An exploration of the social aspects of sexuality and consideration of how sexual experiences are shaped by, and interpreted through, historically specific social contexts.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B. One of SOCIOL 2HH3, 2JJ3, 2Q06 A/B is strongly recommended.

Priority will be given to students registered in a Sociology program.

SOCIOL 3W03 - HISTORICAL METHODS IN SOCIOLOGY

An examination of methods for incorporating historical data and archival sources into sociological argument.

Lectures and discussion (three hours); one term

Prerequisite(s): SOCIOL 2Z03 and registration in Level III of any Honours Sociology program

SOCIOL 3X03 - SOCIOLOGY OF AGING

This course deals with changing population structure, economic support of the aged, family of later life, the sociology of retirement, widowhood, death, bereavement, and institutionalization.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Not open to students registered in a Gerontology program as of September 1998. Priority will be given to students registered in a Sociology program.

SOCIOL 3Z03 - ETHNIC RELATIONS

An analysis of political, social and economic change in selected locales.

Three hours (lectures and discussion); one term

Prerequisite(s): One of SOCIOL 1C03, SOCIOL 1Z03, 1A06 A/B and enrollment in Level II or above

Priority will be given to students registered in a Sociology program.

SOCIOL 4A03 - ETHNIC/RACIAL TENSIONS

The course will investigate the processes by which racial and/or ethnic tensions develop in various societies.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology program; or permission of the Department

SOCIOL 4AA3 - SELECTED TOPICS IN THE SOCIOLOGY OF THE FAMILY

An intensive examination of selected problems in the sociology of the family.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours program or permission of the Department

SOCIOL 4AA3 may be repeated, on a different topic, to a total of six units.

SOCIOL 4BB3 - SELECTED TOPICS IN THE SOCIOLOGY OF EDUCATION

This advanced course offers an intensive examination of selected problems involving the relationship between schooling and society.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program or permission of the Department

Not open to students with credit in SOCIOL 4J03 or 4K03 if on a similar topic.

SOCIOL 4DD3 - SOCIAL MOVEMENTS AND SOCIAL CHANGE

This seminar examines sociological understandings of contentious politics, activism, and social change.

Three hours (seminar); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology program, or permission of the department.

SOCIOL 4E03 - SELF AND IDENTITY

A consideration of theoretical and empirical questions relating to self and identity viewed from historical, cross-cultural and cross-disciplinary perspectives.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, SOCIOL 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology (B.A.) program; or permission of the Department

SOCIOL 4EE3 - SELECTED TOPICS IN THE SOCIOLOGY OF CULTURE

A sociological examination of topics related to the production, dissemination, consumption and/or interpretation of culture. Community service learning may be a component of this course.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology (B.A.) program; or permission of the Department
SOCIOL 4EE3 may be repeated, if on a different topic, to a total of six units.

SOCIOL 4FF3 - APPLICATIONS OF QUANTITATIVE METHODS IN THE SOCIAL SCIENCES

This course introduces students to more advanced language and methods of quantitative analyses in the social sciences, including an introduction to a statistical software program.

Lectures and labs (three hours); one term

Prerequisite(s): SOCIOL 3FF3 and enrolment in Level IV of any Honours Sociology (Specialist Option) program or permission of the Department.

Antirequisite(s): SOCIOL 3H06 A/B

SOCIOL 4G03 - ADVANCED TOPICS IN THE SOCIOLOGY OF HEALTH AND ILLNESS

An examination of the social bases of illness. In different years consideration may be given to topics such as gender, social class and occupational and environmental health issues.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program or permission of the Department
SOCIOL 4G03 may be repeated, if on a different topic, to a total of six units.

SOCIOL 4GG3 - SPECIAL TOPICS IN THE SOCIOLOGY OF DEVIANCE

An advanced course allowing detailed study of selected topics in the sociology of deviance. Topics will vary from year to year.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B, and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology (B.A.) program; or permission of the Department
SOCIOL 4GG3 may be repeated, if on a different topic, to a total of six units.

SOCIOL 4HH3 - SOCIOLOGY STUDENTS AND THE WORK WORLD

This course draws on sociological analysis of work, occupations, and organizations to prepare students for seeking employment and developing careers.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program

To be offered for the first time during the 2018-19 academic year.

SOCIOL 4J03 - SELECTED TOPICS IN SOCIOLOGY I

Topics of contemporary interest to sociologists, with emphasis upon current theory and research. Students should consult the Department concerning the topics to be examined.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program or permission of the Department
SOCIOL 4J03 may be repeated, if on a different topic, to a total of six units.

SOCIOL 4K03 - SELECTED TOPICS IN SOCIOLOGY II

Topics of contemporary interest to sociologists, with emphasis upon current theory and research. Students should consult the Department concerning the topics to be examined.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program or permission of the Department
SOCIOL 4K03 may be repeated, if on a different topic, to a total of six units.

SOCIOL 4KK3 - SOCIOLOGY THROUGH COMMUNITY ENGAGEMENT AND SERVICE

Students are offered a reciprocal opportunity to acquire knowledge and develop skills while providing service and assistance to the community.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program

SOCIOL 4LL3 - SELECTED TOPICS IN THE SOCIOLOGY OF IMMIGRATION

This course focuses on a timely sociological topic on immigrants and immigrant children (the second generation), including labour market integration, transnationalism, and gender and migration.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program

SOCIOL 4M03 - DIRECTED RESEARCH I FOR HONOURS STUDENTS

Directed study of a research problem through published materials and/or field inquiry and/or data analysis. Students will be required to write up the results of their inquiry in scholarly form.

One term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program and permission of the instructor

SOCIOL 4MM3 - PUBLIC SOCIAL PSYCHOLOGY

This course examines major figures in social psychology who have had an impact on the public and transformed our culture. It also examines current public debates and controversies about social psychology or particular social psychologists.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology (B.A.) program; or permission of the Department

Cross-list(s): SOCPSY 4MM3

SOCIOL 4MM6 A/B S - DIRECTED RESEARCH FOR HONOURS STUDENTS

Directed study of a research problem through published material and/or field inquiry and/or data analysis. Students will be required to write up the results of their inquiry in scholarly form.

Two terms

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of the Honours Sociology (Specialist Option) program and permission of the instructor.

SOCIOL 4N03 - DIRECTED RESEARCH II FOR HONOURS STUDENTS

Same as *SOCIOL 4M03*.

One term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program and permission of the instructor

SOCIOL 4Q03 - WOMEN, SEXUALITY AND THE WELFARE STATE

This seminar provides a sociological focus on gender, sexuality, social policy, and the welfare state.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program or permission of the Department

SOCIOL 4R03 - INDIVIDUAL AND SOCIETY

An intensive examination of selected problems involving the relationship of individuals to social structures.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology program; or permission of the Department.

SOCIOL 4RR3 - INDIGENOUS PEOPLES AND CANADA

An intensive examination of selected aspects of Indigenous-settler relations in Canada. Topics may include colonization/decolonization, racism/anti-racism, identity politics, Indigenous and treaty rights, Indigenous-settler alliances, and healing and reconciliation (among others). This course also offers unique opportunities for community engagement.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology (B.A.) program; enrolment in Level IV of the Indigenous Studies program; or permission of the Department; *SOCIOL 2EE3 and/or a background in Indigenous Studies is recommended*

SOCIOL 4SR3 - TOPICS IN THE SOCIOLOGY OF RELIGION

This course will examine sociological perspectives on Islam. Particular attention will be paid to issues of Muslim authority, identity and religious practices in the diaspora.

Seminar (three hours); one term

Cross-lists(s): RELIGST 4SR3

This course is administered by the Department of Religious Studies.

SOCIOL 4SS3 - THE SOCIOLOGY OF THE 1960S

Drawing on the sociology of social movements, culture and reputations, this course looks at the decade of the 1960s in Canada and the United States.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program or permission of the Department

SOCIOL 4TT3 - THE SOCIOLOGY OF MASS MEDIA

This course examines selected issues associated with the sociology of mass media.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program or permission of the Department

SOCIOL 4U03 - SPECIAL TOPICS IN THE SOCIOLOGY OF WOMEN

An intensive examination of selected problems concerning women. Depending upon the instructor, topics may include: stratification, inequality, political participation, sexuality, health and work.

Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology (B.A.) program; or permission of the Department
SOCIOL 4U03 may be repeated, if on a different topic, to a total of six units.

SOCIOL 4UU3 - GLOBAL FAMILY AND SEXUAL POLITICS

This course examines how globalization affects the ways in which family and sexualities are imagined, regulated and experienced through a sociological lens. Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology (B.A.) program; or permission of the Department

SOCIOL 4V03 - ISSUES IN THE SOCIOLOGY OF OCCUPATIONS AND THE PROFESSIONS

An advanced course allowing detailed study of one or more topics of special interest. Seminar (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology (B.A.) program; or permission of the Department

SOCIOL 4W03 - SOCIAL PROBLEMS

The focus of the course will be theories concerning social problems or an empirical examination of specific issues that have become the object of public debate and discussion.

Lectures and discussion (three hours); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology program; or permission of the Department

SOCIOL 4XX3 - SOCIOLOGY OF AT-RISK YOUTH

This course focuses on the social attributes and surrounding conditions associated with at-risk youth in educational, criminal justice, and mental health care institutions. The class may involve an academic placement component with the North Hamilton 'Pathways to Education' project.

Three hours (seminar); one term

Prerequisite(s): One of SOCIOL 3FF3, 3H06 A/B and enrolment in Level IV of any Honours Sociology program; enrolment in Level IV of the Honours Social Psychology program, or permission of the department.

SOFTWARE ENGINEERING

Courses in Software Engineering are administered by the Department of Computing and Software.

Information Technology Building, Room 202, ext. 24614

<http://www.cas.mcmaster.ca>

Department Notes

1. All Software Engineering courses are open to students registered in a Software Engineering or Mechatronics Engineering program, subject to prerequisite requirements. Prior permission of the Department is necessary for other students.
2. Please note that not all elective courses will be offered in each academic year.

SFWRENG 2AA4 - SOFTWARE DESIGN I - INTRODUCTION TO SOFTWARE DEVELOPMENT

Software life cycle, quality attributes, requirements documentation, specifying behavior; classes and objects, interface specification; creation, structural, and

behavioral software design patterns; implementation in code, reviews, testing and verification.

Three lectures, one tutorial (two hours); second term

Prerequisite(s): SFWRENG 2DM3 , 2S03, 2XA3

Antirequisite(s): COMPSCI 2ME3

SFWRENG 2C03 - DATA STRUCTURES AND ALGORITHMS

Basic data structures: stacks, queues, hash tables, and binary trees; searching and sorting; graph representations and algorithms, including minimum spanning trees, traversals, shortest paths; introduction to algorithmic design strategies; correctness and performance analysis.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): SFWRENG 2DM3

Antirequisite(s): COMPSCI 2C03

SFWRENG 2DA4 - DIGITAL SYSTEMS AND INTERFACING

Memory, binary arithmetic, hierarchical design. Hardware/software co-design and application-specific processors. Interfacing to I/O devices.

Three lectures, one lab (three hours); first term

Co-requisite(s): SFWRENG 2DM3

Antirequisite(s): COMPENG 2DI4, ELECENG 2DI4

SFWRENG 2DM3 - DISCRETE MATHEMATICS WITH APPLICATIONS I

Functions, relations and sets; the language of predicate logic, propositional logic; proof techniques, counting principles; induction and recursion, discrete probabilities, graphs, and their application to computing.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): MATH 1ZC3

Antirequisite(s): COMPSCI 2DM3, SFWRENG 2E03, 2F03

SFWRENG 2FA3 - DISCRETE MATHEMATICS AND APPLICATIONS II

Predicate logic and formal proofs, grammars and automata, modular arithmetic, and their applications to computing.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): SFWRENG 2DM3

Antirequisite(s): COMPSCI 2FA3 , SFWR ENG 2E03, 2F03

SFWRENG 2GA3 - COMPUTER ARCHITECTURE

Instruction-set architecture, computer arithmetic, datapath and control, pipelining, memory hierarchies, I/O systems, multiprocessor systems, measures of performance.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): SFWRENG 2DA4

Antirequisite(s): COMPENG 3DR4 , 4DM4 , COMPSCI 2GA3 , SFWRENG 3GA3

SFWRENG 2MD3 - DATA STRUCTURES, ALGORITHMS, AND LANGUAGE CONCEPTS FOR MECHATRONICS

Advanced programming with emphasis on embedded systems. Program specifications: Pre- and post-conditions, loop and datatype invariants; use of tools to demonstrate correctness. Selecting data structures for implementation of mathematical abstractions. Finite state machines, automata and languages; lexing and parsing. Algorithm analysis (time and space). Modelling of graphs, relations, corresponding algorithms.

Three lectures, one tutorial; second term

Prerequisite(s): SFWRENG 2MP3 and registration in a Mechatronics Engineering program

Antirequisite(s): COMPENG 2SI4, COMPSCI 2C03, SFWRENG 2C03

SFWRENG 2MP3 - PROGRAMMING FOR MECHATRONICS

This course focuses on learning programming using the high-level systems programming language C, and on understanding how its features are implemented using the CPU and the memory hierarchy. Mathematical abstractions are implemented

using fundamental data structures such as arrays, stacks, queues, etc., with static and dynamic memory allocation.

Three lectures, one tutorial; first term

Prerequisite(s): ENGINEER 1D04 or IBEHS 1P10 A/B, and registration in a Mechatronics Engineering program

Antirequisite(s): COMPENG 2SH4, COMPSCI 2S03, SFWRENG 2S03

SFWRENG 2S03 - PRINCIPLES OF PROGRAMMING

Fundamental concepts of programming: expressions, statements, procedures, control structures, iteration, recursion, exceptions; precise memory model of traditional imperative programming languages; basic data structures: records, arrays, dynamic structures; use of libraries.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): ENGINEER 1D04 or IBEHS 1P10

Antirequisite(s): COMPENG 2SH4 , COMPSCI 2S03 , SFWRENG 2MP3

SFWRENG 2XA3 - SOFTWARE ENGINEERING PRACTICE AND EXPERIENCE: SOFTWARE DEVELOPMENT SKILLS

Unix and shell programming, makefiles, version control; assembly basics, translating high-level language into assembly, parameter passing, arrays, recursion; compiling, debugging, profiling, and software optimizations.

Two lectures, one lab (three hours per week); first term

Prerequisite(s): ENGINEER 1D04 or IBEHS 1P10

Antirequisite(s): COMPSCI 2XA3

SFWRENG 2XB3 - SOFTWARE ENGINEERING PRACTICE AND EXPERIENCE: BINDING THEORY TO PRACTICE

Open-ended design of computational solutions to practical problems that involve both theoretical (algorithmic) analysis and implementation; solving computational problems through an experiential approach; revision and version control.

One lecture, two labs (two hours); second term

Prerequisite(s): SFWRENG 2S03 , 2XA3

Co-requisite(s): SFWRENG 2AA4 , 2C03

Antirequisite(s): COMPSCI 2XB3

SFWRENG 3A04 - SOFTWARE DESIGN III - LARGE SYSTEM DESIGN

Sustainable architectures; design for change and expansion; software architecture design space; object oriented analysis and design; architectural styles; methodology of making architecture decisions; project organization.

Three lectures, one tutorial (two hours); second term

Prerequisite(s): SFWRENG 3BB4

SFWRENG 3BB4 - SOFTWARE DESIGN II - CONCURRENT SYSTEM DESIGN

Processes, threads, concurrency; synchronization mechanisms, resource management and sharing; objects and concurrency; design, architecture and testing of concurrent systems.

Three lectures, one tutorial (two hours); first term

Prerequisite(s): SFWRENG 2AA4, 2FA3

Antirequisite(s): COMPSCI 3SD3

SFWRENG 3DB3 - DATABASES

Data modeling, integrity constraints, principles and design of relational databases, relational algebra, SQL, query processing, transactions, concurrency control, recovery, security and data storage.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): SFWRENG 2C03 and SFWRENG 2DM3, or registration in Level IV or above of any Mechatronics program

Antirequisite(s): COMPSCI 3DB3, SFWRENG 4DB3

SFWRENG 3DX4 - DYNAMIC SYSTEMS AND CONTROL

Modelling of dynamic continuous physical phenomena in both continuous and discrete time. Control theory, stability analysis and feedback controller design. Application of computer control to continuous processes. System identification. Three lectures, one lab (three hours); second term

Prerequisite(s): SFWRENG 3MX3

Antirequisite(s): ELECENG 3CL4 , ENGINEER 3LO3, IBEHS 4A03 , MECHENG 4R03 , MECHTRON 3DX4 , SFWRENG 3DX3

Cross-list(s): MECHTRON 3DX4

SFWRENG 3FP3 - FUNCTIONAL PROGRAMMING

Functional programming; lists and algebraic data types, pattern matching, parametric polymorphism, higher-order functions, reasoning about programs; lazy and strict evaluation; programming with monads; domain-specific languages.

Three lectures, one tutorial; first term

Prerequisite(s): SFWRENG 2DM3, 2FA3

Antirequisite(s): COMPSCI 3FP3

Cross-list(s): COMPSCI 3FP3

SFWRENG 3GB3 - GAME DESIGN

Game concepts. Creative and expressive play. Storytelling and narratives. User interfaces for games. Gameplay. Core mechanics. Game Balancing. Software architecture of games. Level design. Genres. Physics Engines.

Three lectures, one tutorial (two hours every other week); second term

Prerequisite(s): SFWRENG 3GC3 or COMPSCI 3GC3 and registration in Software Engineering - Game Design, Software Engineering - Game Design Co-op (B.Eng.) or Computer Science

SFWRENG 3GC3 - COMPUTER GRAPHICS

Mathematical foundations, the graphics pipeline, geometrical transformations, 3D visualization, clipping, illumination and shading models and the impact of graphics on society.

Three lectures, one tutorial (two hours every other week); first term

Prerequisite(s): Registration in a program in Software Engineering

Antirequisite(s): COMPSCI 3GC3

Cross-list(s): COMPSCI 3GC3

SFWRENG 3I03 - COMMUNICATION SKILLS

Oral and written presentation skills; types and structure of technical documents; software documentation for the user; formulating and presenting proposals.

Three hours (lectures, discussion, group project, seminars); first term

Prerequisite(s): Registration in Level II or above of a Software Engineering or Mechatronics Engineering program

Antirequisite(s): COMPSCI 2CS3, 3I03

Cross-list(s): COMPSCI 2I03

Not open to students with credit or registration in ISCI 1A24 A/B.

SFWRENG 3K04 - SOFTWARE DEVELOPMENT

Software design process. Professional responsibility. Using specifications. Documentation. Module Specification. Module interfaces. Module internal documentation. Coding styles. Portability. Software inspection. Software testing.

Three lectures, one lab (three hours); first term

Prerequisite(s): One of COMPENG 2SI4, ELECENG 2SI4, SFWRENG 2S03

Antirequisite(s): SFWRENG 2AA4

SFWRENG 3MX3 - SIGNALS AND SYSTEMS

Linear systems, signals, filters; time and frequency domains; single input-single output systems; discrete and continuous time; sampling theorem; Fourier series; Fourier, Laplace, and z transforms; stability.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): MATH 2Z03 or credit in MATH 2M06 (or 2M03 and 2MM3) or 2P04

Antirequisite(s): ELECENG 3TP3

SFWRENG 3003 - LINEAR OPTIMIZATION

Modelling and solutions for engineering and science problems using linear optimization, including networks, transportation, assignment, and scheduling problems. Solution methods include combinatorial algorithms such as simplex methods, primal-dual formulations, branch and bound formulations for mixed integer programming, and heuristics.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): SFWRENG 2C03 or SFWRENG 3K04 , or registration in level IV or above in the Integrated Biomedical Engineering & Health Sciences (IBEHS) program

Antirequisite(s): COMPSCI 4003

Cross-list(s): COMPSCI 4003

SFWRENG 3RA3 - SOFTWARE REQUIREMENTS AND SECURITY CONSIDERATIONS

Software requirements gathering. Critical systems requirements gathering. Security requirements. Traceability of requirements. Verification, validation, and documentation techniques. Software requirements quality attributes. Security policies. Measures for data confidentiality. Design principles that enhance security. Access control mechanisms.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): SFWRENG 2AA4 or SFWRENG 3K04; SFWRENG 2FA3 or SFWRENG 2MD3

Antirequisite(s): COMPSCI 3SR3, 4EF3, SFWRENG 3R03, 4EF3

Cross-list(s): COMPSCI 3RA3

SFWRENG 3S03 - SOFTWARE TESTING

Measurement fundamentals, software measures and metrics, cost and effort estimation, testing strategy, testing plan, testing documentation, slicing and debugging, test coverage, functional testing techniques, system testing techniques, automated testing, maintenance fundamentals, regression testing.

Three lectures, one tutorial (two hours every other week); second term

Prerequisite(s): SFWRENG 3BB4 or COMPSCI 3SD3

SFWRENG 3SH3 - OPERATING SYSTEMS

Processes and threads, synchronization and communication; scheduling, memory management; file systems; resource protection; structure of operating systems.

Three lectures, one lab (three hours every other week); second term

Prerequisite(s): One of SFWRENG 2AA4, 3K04, 3M04

Antirequisite(s): COMPSCI 3MH3, 3SH3, 4SH3

SFWRENG 3XA3 - SOFTWARE ENGINEERING PRACTICE AND EXPERIENCE: SOFTWARE PROJECT MANAGEMENT

Open-ended software development emphasizing concurrent system design; measurement, inspection, software metrics, software project management, refactoring; testing methods.

One lecture, two labs (two hours); second term

Prerequisite(s): SFWRENG 2AA4

SFWRENG 4AA4 - REAL-TIME SYSTEMS AND CONTROL APPLICATIONS

Hard and soft real-time systems. Safety classification. Fail-safe design, hazard analysis. Discrete event systems. Modes. Requirements and design specifications. Tasks and scheduling. Clock synchronization. Data acquisition. Applications in real-time control.

Three lectures, one lab (three hours); first term

Prerequisite(s): SFWRENG 3BB4 or 3SH3; and SFWRENG 3DX3 or 3DX4, or IBEHS 4A03

Antirequisite(s): MECHTRON 4AA4, SFWRENG 4A03, 4AA3, 4GA3

Cross-list(s): MECHTRON 4AA4

SFWRENG 4AD3 - ADVANCED DATABASES

Advanced topics in database systems technology and design. Topics include: query processing; query optimization; data storage; indexing; crash recovery; physical database design; introductory data mining techniques.

Three lectures, one tutorial; second term

Prerequisite(s): SFWRENG 3DB3 or 4DB3

Antirequisite(s): COMPSCI 4AD3

Cross-list(s): COMPSCI 4AD3

Offered on an irregular basis.

SFWRENG 4C03 - COMPUTER NETWORKS AND SECURITY

Physical networks, TCP/IP protocols, switching methods, network layering and components, network services. Information security, computer and network security threats, defense mechanisms, encryption.

Three lectures, one lab (three hours every other week); second term

Prerequisite(s): SFWRENG 3BB4 or 3K04, or COMPSCI 3SH3 or SFWRENG 3SH3

Antirequisite(s): COMPSCI 3CN3, 4C03, COMPENG 4DN4

Cross-list(s): COMPSCI 4C03

SFWRENG 4E03 - PERFORMANCE ANALYSIS OF COMPUTER SYSTEMS

Use of queuing models and simulation to predict computer system performance and find bottlenecks in a system. Types of models, distributions. Markov models. Modelling storage and network behaviour, locks, critical sections, concurrency. Introduction to analytical system reliability.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): STATS 3Y03 or registration in STATS 3Y03 in the same term

Antirequisite(s): COMPSCI 4E03

Cross-list(s): COMPSCI 4E03

SFWRENG 4F03 - PARALLEL COMPUTING

Parallel architectures, design and analysis of parallel algorithms; distributed-memory, shared-memory and GPU computing; communication cost, scalability; MPI, OpenMP and OpenACC; tuning parallel programs for performance.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): Credit or registration in SFWRENG 3BB4 or SFWRENG 3SH3. Completion of SFWRENG 4C03 is recommended.

Antirequisite(s): COMPSCI 4CD3

Cross-list(s): COMPSCI 4F03

SFWRENG 4G06 A/B - SOFTWARE DESIGN IV - CAPSTONE DESIGN PROJECT

Student teams prepare the requirements, design, documentation, and implementation of a software system taking economic, health, safety, legal, marketing factors into account. Students must demonstrate a working system and convincing test results. Software project management.

Lectures, discussion, group project, seminars (three hours); two terms

Prerequisite(s): Registration in final level of a Software Engineering program

Antirequisite(s): SFWRENG 4G03, 4H03, 4GP6 A/B

SFWRENG 4GC3 - SENSORY PERCEPTION, COGNITION AND HUMAN/COMPUTER INTERFACES FOR GAME DESIGN

Human sensory perception, learning and cognition. Game aesthetics. Precise control and feedback mechanisms. Use of music and sounds. Critical analysis of existing interfaces. Alternate input devices.

Three lectures, one tutorial (three hours every other week); second term

Prerequisite(s): SFWRENG 4HC3 and registration in Software Engineering - Game Design, Software Engineering - Game Design Co-op (B.Eng.) or COMPSCI 4HC3

SFWRENG 4GP6 A/B - SOFTWARE DESIGN IV - CAPSTONE COMPUTER GAME DESIGN PROJECT

Student teams prepare the requirements, design, documentation and implementation of a computer game taking economic, health, safety, cultural, legal and marketing factors into account. Students must demonstrate a working system and convincing test results. Software project management.

Lectures, discussion, group project, seminar (three hours); two terms

Prerequisite(s): Registration in Level IV of Software Engineering - Game Design, Software Engineering - Game Design Co-op (B.Eng.)

Antirequisite(s): SFWRENG 4G03, 4H03, 4G06 A/B

SFWRENG 4HC3 - HUMAN COMPUTER INTERFACES

Design of user interfaces. Principles of good interface design. Human input. Displaying complex data using graphics and virtual reality. Modes and mode awareness problem. Health issues, information overload. Special purpose graphics hardware. Interface design tools; on-line help systems.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): Registration in Level III or above of any Software Engineering program

Antirequisite(s): COMPSCI 4HC3, SFWRENG 4D03

Cross-list(s): COMPSCI 4HC3

SFWRENG 4J03 - COMMUNICATIONS SYSTEMS

Fundamental communications concepts: information, entropy, channel capacity, codes, data compression, adaptive channel equalizers, modulation/demodulation of signals, tracking, Kalman filtering, use of specialized signal processing hardware. Software in communication systems.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): SFWRENG 2MX3 or 3MX3; STATS 3N03 or 3Y03 is recommended

SFWRENG 4TE3 - CONTINUOUS OPTIMIZATION

Fundamental algorithms and general duality concepts of continuous optimization. Special attention will be paid to the applicability of the algorithms, their information requirements and computational costs. Practical engineering problems will illustrate the power of continuous optimization techniques.

Three lectures, one tutorial (one hour); first term

Prerequisite(s): One of MATH 2Z03 or 2C03, or registration in level IV or above in the Integrated Biomedical Engineering & Health Sciences (IBEHS) program

Antirequisite(s): COMSPCI 4TE3

Cross-list(s): COMPSCI 4TE3

SFWRENG 4TH3 - THEORY OF COMPUTATION

Formal languages, models of computation, decidability, reduction techniques, time and space complexity classes.

Three lectures, one tutorial (one hour); one term

Prerequisite(s): SFWRENG 2C03, 2FA3

Antirequisite(s): COMPSCI 4TH3

Cross-list(s): COMPSCI 4TH3

Offered on an irregular basis.

SFWRENG 4X03 - SCIENTIFIC COMPUTATION

Computer arithmetic and roundoff error analysis. Interpolation, integration, solving systems of linear and nonlinear equations. Eigenvalues and singular value decomposition. Numerical methods for ordinary differential equations.

Three lectures, one tutorial (one hour); second term

Prerequisite(s): Both MATH 1ZB3 and 1ZC3; or 1ZZ5; or both 1AA3 and 1B03; or both 1H03 and 1NN3

Antirequisite(s): COMPENG 3SK3, 3SK4, COMPSCI 4MN3, 4X03, SFWRENG 3X03

Cross-list(s): COMPSCI 4X03

SOFTWARE ENGINEERING TECHNOLOGY

Courses in Software Engineering Technology are administered by the Bachelor of Technology Program.

Engineering Technology Building (ETB), Room 509, ext. 26401

<https://www.eng.mcmaster.ca/sept>

SFWRTECH 3CS3 - COMPUTER SECURITY

Network and software security, cryptography algorithms, including symmetric and public-key encryption, malware, user authentication, firewalls, vulnerabilities, policies and best practices, attack and defense strategies.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology or permission of the Chair and registration in level 2 in any program in the DeGroot School of Business for students pursuing the Business Technology Management Certificate. *Students that do not have a Networking or IT background from college are strongly encouraged to take SFWRTECH 3IT3 before enrolling in this course.*

SFWRTECH 3IT3 - FUNDAMENTALS OF NETWORKING

Introductory and intermediate topics involving Layers 1-4 in the OSI model including Ethernet, IP addressing, subnetting, routing, VLANs, Spanning-Tree Protocol, and network device configuration.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology or permission of the Chair and registration in level 2 in any program in the DeGroot School of Business for students pursuing the Business Technology Management Certificate. **Antirequisite(s):** COMPTECH 3PR3, 3PD3, SFWRTECH 3PR3

SFWRTECH 3OS3 - OPERATING SYSTEMS

Processes, threads and concurrency, process scheduling, memory management. Protection, access and authentication. File system organization and access methods. Three lectures; one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology or permission of the Chair and registration in level 2 in any program in the DeGroot School of Business for students pursuing the Business Technology Management Certificate.

SFWRTECH 3PR3 - PROCEDURAL AND OBJECT ORIENTED PROGRAMMING CONCEPTS

Procedural and Object Oriented programming fundamentals. Concepts are exemplified with C++ and Java programming languages.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology or permission of the Chair and registration in level 2 in any program in the DeGroot School of Business for students pursuing the Business Technology Management Certificate. **Antirequisite(s):** COMPTECH 3IT3, 3NT3, SFWRTECH 3IT3

SFWRTECH 3RQ3 - SOFTWARE REQUIREMENTS AND SPECIFICATION

Requirements gathering, documentation and validation for computer systems. Modeling paradigms including information, behaviour, domain, function and constraint models. Specification languages.

Three lectures; one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology or permission of the Chair and registration in level 2 in any program in the DeGroot School of Business for students pursuing the Business Technology Management Certificate. Students that do not have a software development background from college are strongly encouraged to take SFWRTECH 3PR3 before enrolling in this course.

SFWRTECH 4AI3 - ARTIFICIAL INTELLIGENCE

Theories and practice of machine intelligence with focus on statistical learning methods, artificial neural networks, naturally inspired algorithms, deep learning, big data management, and pattern recognition.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in level IV of Biotechnology, Automotive and Vehicle Engineering Technology, Civil Engineering Infrastructure Technology, Manufacturing Engineering Technology, Power and Energy Engineering Technology, and Software Engineering Technology

Antirequisite(s): SMRTTECH 4AI3

SFWRTECH 4CC3 - PARALLEL PROGRAMMING

Models of parallel computation. Performance measurement. Shared memory and synchronization. Parallel data structures, searching and sorting. Scheduling and work distribution.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in Level IV Software Engineering Technology Co-op (B.Tech.)

SFWRTECH 4CG3 - COMPUTER GRAPHICS

3D graphics platforms. Languages for computer graphics development: Maya API, Unity, CUDA/Open CL, open source software. Creation of 2D and 3D images. GPU architecture considerations.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology.

SFWRTECH 4DA3 - DATA ANALYTICS AND BIG DATA

Linear approaches to regression and classification - selection and shrinkage methods, linear discriminant approaches, big data system implementations.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): ENGTECH 3ST3 or 3ES3 and registration in Biotechnology or Software Engineering Technology Co-op (B.Tech.)

SFWRTECH 4DM3 - DATA MINING

Classification, association, prediction and clustering of data. Decision trees. Bayesian probability. Supervised and unsupervised learning.

Three lectures, one lab; one term; completely online with in-person exams

Prerequisite(s): SFWRTECH 4DA3 and registration in Software Engineering Technology Co-op (B.Tech.)

SFWRTECH 4DS3 - DATA STRUCTURES AND ALGORITHMS

Formerly SFWRTECH 3DS3

Common abstract data types and associated algorithms. Algorithm design - divide and conquer, greedy algorithms. Algorithm Analysis. Hard problems and NP-completeness.

Three lectures; one term; completely online with in-person exams

Prerequisite(s): ENGTECH 3DM3 and registration in Software Engineering Technology

Students that do not have a software development background from college are strongly encouraged to take SFWRTECH 3PR3 before enrolling in this course.

SFWRTECH 4ES3 - REAL-TIME SYSTEMS

Real Time system characteristics. Dynamic responses of physical processes. Real-time system requirements. Real-time operating systems. Scheduling and concurrency.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in Level IV Software Engineering Technology Co-op (B.Tech.)

SFWRTECH 4NI3 - ADVANCED NETWORKING INFRASTRUCTURE

Enterprise infrastructure concepts and deployment, including virtualization, IPv6, ADCS, QoS, VPNs, advanced routing, wireless networks, software-defined networking, network management, and cloud computing.

Three lectures; one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology or permission of the Chair and registration in level 2 in any program in the DeGroot School of Business for students pursuing the Business Technology Management Certificate. *Students that do not have a Networking or IT background from college are strongly encouraged to take SFWRTECH 3IT3 before enrolling in this course.*

SFWRTECH 4NN3 - NEURAL NETWORKS AND DEEP LEARNING

Neural network architectures and training, parallel implementations and implementations using accelerated hardware, convolutional neural networks, recurrent neural networks and deep learning.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in Level IV Software Engineering Technology

SFWRTECH 4SA3 - SOFTWARE ARCHITECTURE

Architectural structures and views. Modularity. Frameworks, design patterns and components. Distributed architectures. Design of software agents. Modeling, visualization and implementation of architectural components.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): COMPTECH 4SD3, SFWRTECH 4SD3 and registration in Software Engineering Technology Co-op (B.Tech.)

SFWRTECH 4SD3 - SOFTWARE DESIGN

Life-cycle. Quality attributes. Decomposition and interface design. Specification. Design of modules. Design patterns. Design documentation. Implementation. Reviews and inspections. Testing.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): SFWRTECH 3RQ3 (or COMPTECH 3RQ3) and registration in Software Engineering Technology or permission of the Chair and registration in level 2 in any program in the DeGroot School of Business for students pursuing the Business Technology Management Certificate.

Antirequisite(s): COMPTECH 4SD3

SFWRTECH 4VE3 - VISUAL EFFECTS AND TECHNOLOGY FOR ANIMATED PRODUCTION

Applications software: Autodesk Maya, Pixars Renderman, Mitsuba, Foundry Nuke, Unity Game Engine. Texturing, cloning, motion tracking, wire and rig removal, rotoscoping. Visual effects.

Three lectures, one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology

SFWRTECH 4WP3 - ADVANCED WEB PROGRAMMING

Advanced technologies for web development, apps for mobile, desktop and cloud based systems, client and server side web APIs.

Three lectures; one term; completely online with in-person exams

Prerequisite(s): Registration in Software Engineering Technology or permission of the Chair and registration in level 2 in any program in the DeGroot School of Business for students pursuing the Business Technology Management Certificate.

Students that do not have a Networking or IT background from college are strongly encouraged to take SFWRTECH 3IT3 before enrolling in this course.

SPANISH

Courses in Spanish are administered within the Department of Linguistics and Languages.

Togo Salmon Hall, Room 629, ext. 24388

<http://linguistics.humanities.mcmaster.ca/>

Former Hispanic Studies (HISPANIC) courses are now listed as Spanish (SPANISH) courses. Students having credit in Hispanic Studies courses may not take the corresponding course under the Spanish designation.

Notes

1. Students should note that the Department has classified its Spanish language courses under the following categories:

Introductory Level Language Course: SPANISH 1Z06 A/B

Intermediate Level Language Courses: SPANISH 1A03, 1AA3, 2Z03, 2ZZ3

2. Not all courses are offered on an annual basis. Students should consult the timetable for available courses.

3. Students may be required to take a placement test in the Department of Linguistics and Languages to assess their proficiency in the language.

Courses

If no prerequisite is listed, the course is open.

SPANISH 1A03 - INTERMEDIATE SPANISH I

The first part of an intensive review of grammatical structures in Spanish. Emphasis will be on composition, expansion of vocabulary and oral practice. Written works in the original will be studied. The sequel to this course is SPANISH 1AA3. Three hours; one term

Prerequisite(s): Grade 12 Spanish U or equivalent

Antirequisite(s): SPANISH 2Z03

Not open to students with credit or registration in SPANISH 1AA3.

Not open to native speakers of Spanish.

The Department reserves the right to place students in the course most appropriate to their abilities.

SPANISH 1AA3 - INTERMEDIATE SPANISH II

The second part of an intensive review of grammatical structures in Spanish. Emphasis will be on composition, expansion of vocabulary and oral practice. Written works in the original will be studied.

Three hours; one term

Prerequisite(s): SPANISH 1A03

Antirequisite(s): SPANISH 2ZZ3

Not open to native speakers of Spanish. The Department reserves the right to place students in the course most appropriate to their abilities.

SPANISH 1Z06 A/B - BEGINNER'S INTENSIVE SPANISH

This course gives students the ability to express themselves reasonably well in Spanish and acquire the basics of Spanish grammar and gain considerable reading skill. This course is enhanced by a Computer Assisted Language Learning (CALL) module. The sequel to this course is SPANISH 2Z03.

Three hours; two terms

Antirequisite(s): Grade 12 Spanish U or equivalent

Not open to native speakers of Spanish.

The Department reserves the right to place students in the course most appropriate to their abilities.

SPANISH 2Z03 - INTERMEDIATE SPANISH I

First part of an intensive review of the grammatical structures of Spanish. Emphasis will be on composition, expansion of vocabulary and oral practice. Written works in the original will be studied. The sequel to this course is SPANISH 2ZZ3. Four hours; one term

Prerequisite(s): SPANISH 1Z06 A/B

Antirequisite(s): SPANISH 1A03

Not open to native speakers of Spanish.

The Department reserves the right to place students in the course most appropriate to their abilities.

SPANISH 2ZZ3 - INTERMEDIATE SPANISH II

Second part of an intensive review of grammatical structures of Spanish. Emphasis will be on composition, expansion of vocabulary and oral practice. Written works in the original will be studied.

Four hours; one term

Prerequisite(s): SPANISH 2Z03

Antirequisite(s): SPANISH 1AA3

STATISTICS

Courses in Statistics are administered by the Department of Mathematics & Statistics.

Hamilton Hall, Room 218, ext. 27034

<http://www.math.mcmaster.ca/>

Department Notes

1. Course codes ending with * indicate that course is not necessarily offered every session; consult the Chair of the Department or the Associate Dean of Science (Academic).
2. Courses in Mathematics and Statistics are not open to students registered in the Bachelor of Technology (B.Tech.) program.

Courses

If no prerequisite is listed, the course is open.

See also courses in *Mathematics*.

STATS 1L03 - PROBABILITY AND LINEAR ALGEBRA

The algebra of probability, conditional probability and independence, discrete and continuous random variables, mean and variance, matrices, determinants, Cramer's rule, solution of linear equations.

Three lectures, one tutorial; one term

Prerequisite(s): OSS Grade 11 Mathematics

Not open to students with credit in Grade 12 Mathematics of Data Management U or STATS 1CC3, 2B03, 2D03, 2MA3, 2MB3.

Not open to students registered in the Faculty of Science or Faculty of Engineering.

STATS 2B03 - STATISTICAL METHODS FOR SCIENCE

Applied statistics, with emphasis on inferential methods relevant to the environmental and life sciences. Use of a computer statistics package.

Three lectures, one lab; one term

Prerequisite(s): One of Grade 12 Data Management U, STATS 1A03, 1L03 or registration in Level II or above of a program in the Faculty of Science

Not open to students with credit or registration in ARTSSCI 2R03, COMMERCE 2QA3, EARTHSC 2MB3, ECON 2B03, ENVIRSC 2MB3, GEOG 2MB3, HTHSCI 1F03, 2A03, KINESIOL 3C03, PNB 2XE3, STATS 2D03, 2MA3, 2MB3.

STATS 2D03 - INTRODUCTION TO PROBABILITY

Combinatorics, independence, conditioning; Poisson-process; discrete and continuous distributions with statistical applications; expectation, transformations

moment-generating functions joint, marginal and conditional distributions; covariance and correlation; central limit theorem.

Three lectures, one tutorial; one term

Prerequisite(s): One of ARTSSCI 1D06 A/B, MATH 1AA3, 1LT3, 1NN3, 1XX3, 1ZB3, 1ZZ5 or ISCI 1A24 A/B

Not open to students with credit or registration in PSYCH 2RA3.

STATS 2MB3 - STATISTICAL METHODS AND APPLICATIONS

Estimation; sampling distributions; confidence intervals; hypothesis testing, power; linear regression; graphical and computational methods.

Three lectures, one tutorial; one term

Prerequisite(s): STATS 2D03

Not open to students with credit or registration in ARTSSCI 2R03 or PNB 3XE3.

STATS 3A03 - APPLIED REGRESSION ANALYSIS WITH SAS

Introduction to SAS; linear regression model; least squares method; model fitting and diagnostics; influential analysis; model building; one-way and two-way ANOVA; applications. This course includes a scientific communication component.

Three lectures, one lab; one term

Prerequisite(s): ARTSSCI 2R03 or STATS 2MB3

STATS 3D03 - MATHEMATICAL STATISTICS

Multivariate distributions; distributions related to normal inference; point estimation; sampling distributions; consistency and limiting distributions; interval estimation; hypothesis testing; single parameter maximum likelihood methods; Rao-Cramer Lower Bound and Efficiency.

Three lectures; one term

Prerequisite(s): STATS 2D03 and one of ISCI 2A18 A/B, MATH 2A03, 2L03, 2Q04, 2X03, 2ZZ3

STATS 3DS3 - INTRODUCTION TO DATA SCIENCE THEORY

An introduction to data science theory is provided with some focus on analytics. Topics covered include an introduction to R and other appropriate computational platforms, data types, data manipulation, data frames, data visualization, data reporting, statistical/machine learning, classification, clustering, cross-validation, classification and regression trees, gradient boosting, ridge regression, LASSO, and generalized additive models. Familiarity with some computer package, e.g. SAS, Python or MatLab is required. This course includes a scientific communication component.

Two lectures, one lab (one hour); one term

Prerequisite(s): One of ECON 3EE3, PNB 3XE3, SFWRTECH 4DA3, STATS 3A03

STATS 3G03 - ACTUARIAL MATHEMATICS I

Survival distributions, life tables, life insurance, life annuities, net premiums and reserves.

Three lectures, one tutorial; one term

Prerequisite(s): STATS 2D03; and one of MATH 2FM3, 2K03

STATS 3H03 - ACTUARIAL MATHEMATICS II

Multiple life functions, multiple decrement models, valuation theory for pension plans.

Three lectures, one tutorial; one term

Prerequisite(s): STATS 3G03

STATS 3J04 - PROBABILITY AND STATISTICS FOR CIVIL ENGINEERING

Introduction to probability, data analysis, statistical inference, regression, correlation and analysis of variance, applications to civil and environmental engineering.

Four lectures; one term

Prerequisite(s): Registration in Level II or above of any program in Engineering

Antirequisite(s): ENGINEER 3JR4, STATS 3N03, 3Y03

STATS 3PG3 - PROBABILITY AND GAMES OF CHANCE

Probabilistic treatment of games of chance. Selected topics from: conditional expectation, discrete martingales, Markov chains, game theory, house advantage, craps, video poker, gambler's ruin, slots, betting systems. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): One of ISCI 2A18 A/B, MATH 2A03, 2X03; and STATS 2D03

STATS 3S03* - SURVEY SAMPLING

Survey design; simple random sampling; stratified sampling; proportional allocation; ratio estimation; cluster sampling; systematic sampling and sample size determination. Exposure to real surveys.

Three lectures; one term

Prerequisite(s): STATS 2D03; and one of ARTSSCI 2R03, STATS 2MB3

STATS 3U03* - STOCHASTIC PROCESSES

Random walk, Markov chains, discrete and continuous parameter Markov processes, branching processes, birth and death processes, queuing processes.

Three lectures; one term

Prerequisite(s): One of ISCI 2A18 A/B, MATH 2A03, 2X03; and STATS 2D03

STATS 3Y03 - PROBABILITY AND STATISTICS FOR ENGINEERING

Introduction to probability, data analysis, statistical inference, regression, correlation and analysis of variance.

Three lectures; one term

Prerequisite(s): Registration in a program in Engineering above Level I

Antirequisite(s): ENGINEER 3JR4, STATS 3J04, 3N03

STATS 4A03 - TIME SERIES

Stationary, auto-regressive and moving-average series, Box-Jenkins methods, trend and seasonal effects, tests for white noise, estimation and forecasting methods, introduction to time series in the frequency domain. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): STATS 3A03, 3D03

STATS 4C03 - GENERALIZED LINEAR MODELS

Normal linear model, exponential family, iteratively-reweighted least squares, logistic regression, Poisson regression and log-linear models, other families of GLM's, analysis of deviance and model checking, residual analysis.

Three lectures; one term

Prerequisite(s): STATS 3A03 and STATS 3D03

STATS 4CI3* - COMPUTATIONAL METHODS FOR INFERENCE

Monte Carlo methods; bootstrap and jackknife methods; multi-parameter maximum likelihood; computation in nonlinear likelihood inference; The EM Algorithm; sufficiency and its applications; optimal hypothesis tests; Bayesian inference; Markov Chain Monte Carlo.

Three lectures; one term

Prerequisite(s): STATS 3D03

Antirequisite(s): STATS 3CI3

STATS 4D03* - INTERMEDIATE PROBABILITY THEORY

Construction of probability spaces and random variables, integration, conditional expectation, law of large numbers, convergence of series, weak convergence, characteristic functions and central limit theorems, martingales.

Three lectures; one term

Prerequisite(s): MATH 3A03, STATS 2D03

STATS 4I03 - INFERENCE

Maximum Likelihood Estimation, Cramer-Rao bound, Likelihood Ratio tests, Multi-parameter likelihood methods, Sufficient Statistics, Completeness and MVUE, Exponential Family, Functions of parameters, Uniformly Most Powerful Tests, Generalized likelihood ratio tests, Quadratic forms, Analysis of variance, Introduction to Bayesian Inference.

Three lectures; one term

Prerequisite(s): STATS 3D03

STATS 4M03 - MULTIVARIATE ANALYSIS

Multivariate distributions: Normal, Wishart, T2 and others; regression; correlation; principal components; general linear hypothesis. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): MATH 2R03; and STATS 3D03 (or 3D06)

STATS 4P03 - ADVANCED APPLIED STATISTICS

Statistical computing; statistical software packages; working with large data sets; exploratory data analysis; graphical methods; statistical consulting practice. This course includes a scientific communication component.

Three lectures; one term

Prerequisite(s): Credit or registration in STATS 3A03 or 3D03

STATS 4T06 A/B - SENIOR RESEARCH PROJECT

A project in statistics to be carried out under the supervision of a faculty member from the Department of Mathematics and Statistics. A written report and oral presentation will be required. This course includes a scientific communication component.

One occasional tutorial; two terms

Prerequisite(s): Registration in Level IV of any Honours Mathematics and Statistics program; and a GPA of at least 9.0; and permission of the Chair of the Department *Not open to students with credit or registration in MATH 4P06 A/B or ISCI 4A12 A/B.*

STATS 4W03 - READING IN STATISTICS

Directed reading in areas of statistics of interest to the student and the instructor. This course includes a scientific communication component.

Prerequisite(s): GPA of at least 7.0 and permission of the Chair of the Department STATS 4W03 may be repeated, if on a different topic.

SUSTAINABILITY

Courses with the SUSTAIN designation are administered by the Faculty of Engineering.

SUSTAIN 1S03 - INTRODUCTION TO SUSTAINABILITY

An introduction to sustainability from an interdisciplinary perspective which examines the historical and societal lenses through which sustainability is viewed. Students will learn terminology, theories and concepts to effectively communicate across disciplines and on various topics of sustainability.

One three hour lecture; one one-hour tutorial; one term

Antirequisite(s): SUSTAIN 2A03

SUSTAIN 2S03 - EVALUATING PROBLEMS & SUSTAINABLE SOLUTIONS

Students will learn how to identify problems and evaluate sustainable solutions to societal problems from an interdisciplinary perspective. The course will involve active experiential learning which emphasizes actions on local projects.

One three-hour lecture, one one-hour tutorial; second term

SUSTAIN 3S03 - IMPLEMENTING SUSTAINABLE CHANGE

Exploring agency, leadership, and strategy effectiveness within the context of sustainability. The course will include interdisciplinary perspectives, experiential learning and community engagement projects.

One three-hour lecture, one one-hour tutorial; first term

Prerequisite(s): Registration in Level III or above or permission of the Academic Sustainability Programs Office

Antirequisite(s): SUSTAIN 3A03

SUSTAIN 4S06 A/B - LEADERSHIP IN SUSTAINABILITY

Final-year course where students gain leadership skills and apply them by working in interdisciplinary teams to develop and implement a sustainability-focused project within the community.

One three-hour lecture; both terms

Prerequisite(s): Registration in Level IV or above or permission of the Academic Sustainability Programs Office

THEATRE & FILM

Courses in Theatre & Film Studies are administered by the School of the Arts.

Togo Salmon Hall, Room 414, ext. 27671

<http://sota.humanities.mcmaster.ca/>

Department Notes

- The following are courses open as electives to students registered in Level II or above of any undergraduate program.
 - THTRFLM 2CP3 - Culture and Performance
 - THTRFLM 2FA3 - Film Analysis
 - THTRFLM 3AA3 - Modernist Drama and Theatre in Europe
 - THTRFLM 3DD3 - Contemporary Canadian Drama and Theatre
 - THTRFLM 3FF3 - Early Cinema History
- The following courses, offered by other departments, directly pertain to Theatre & Film Studies. These are recommended as electives. Up to nine units of courses from this list may be available as substitutes for Theatre & Film courses, and counted toward the fulfillment of a program in Theatre & Film Studies. Students are advised that there may be restrictions on enrolment in these courses.
 - FRENCH 3Q03 Seventeenth-Century French Literature
 - INDIGST 3EE3 - Indigenous Representations in Film
 - INDIGST 3G03 - Indigenous Creative Arts and Drama: Selected Topics
 - RELIGST 2Y3 - The Bible and Film
- Courses restricted to students registered in programs in Theatre & Film Studies may be available to qualified students in other programs if space permits. Students interested in such courses should request permission from the program counsellor.
- Students are advised to note carefully the prerequisites for all courses, and take note which courses are offered in alternate years.

Courses

If no prerequisite is listed, the course is open.

THTRFLM 1T03 - INTRODUCTION TO THEATRE, CINEMA AND SOCIETY

An exploration of how different forms of theatre and cinema tell stories and of the social impact of these forms.

Two lectures, one tutorial; one term

THTRFLM 2AA3 - ACTING AS DEVSING

Students work in studio to explore how the actor's creative process reflects and challenges the norms that structure contemporary social relationships.

Two studios; one term

Prerequisite(s): Registration in a program in Theatre and Film Studies

THTRFLM 2BB3 - DESIGNING AS DEVSING

Students work in studio to learn basic techniques for using visual and sound design as a basis for creating performance pieces.

Two studios; one term

Prerequisite(s): THTRFLM 1T03 and registration in Level II or above

THTRFLM 2CP3 - CULTURE AND PERFORMANCE

A critical examination of performances that produce social and cultural thought and of the artists' strategic practices, particularly in terms of challenges to artistic and social norms.

Lectures and discussion (three hours); one term

Prerequisite(s): Registration in Level II or above

THTRFLM 2DP3 - DEVISING PROCESSES

Students learn basic processes for scripting devised performance through theatre games, archival research and analytical exercises.

Two studios; one term

Prerequisite(s): Registration in a program in Theatre and Film Studies

Antirequisite(s): THTRFLM 3G03

THTRFLM 2FA3 - FILM ANALYSIS

An introduction to an interrelated set of approaches to film study, all of which are defined by their attention to the filmic text and which provide students with a grasp of the fundamentals of film analysis.

Two lectures, plus one weekly film screening; one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): ARTHIST 2FA3

THTRFLM 3AA3 - MODERNIST DRAMA AND THEATRE IN EUROPE

This course studies representative dramas and theatre productions that highlight the diversity of plays on the 20th century stage.

One seminar (two hours), plus weekly play readings/screenings (two hours); one term

Prerequisite(s): Registration in Level II or above

Offered in alternate years.

THTRFLM 3DD3 - CONTEMPORARY CANADIAN DRAMA AND THEATRE

An examination of changing approaches to plays and performances in contemporary Canadian theatre, with an emphasis on post-colonialism, cultural diversity and the performance of gender and class.

Three lectures; one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): ENGLISH 3DD3, THTRFLM 3F03

Offered in alternate years.

THTRFLM 3FF3 - EARLY CINEMA HISTORY

An introduction to the history of narrative film from its beginnings to the Second World War. It focuses on narrative cinema's development from aesthetic, social, technological and economic perspectives while also touching on a selected number of issues in film theory.

Two lectures, plus one weekly film screening; one term

Prerequisite(s): Registration in Level II or above

Cross-list(s): ARTHIST 3FL3

Antirequisite(s): ARTHIST 2FL3, THTRFLM 2FF3

THTRFLM 3L03 - CINEMA HISTORY FROM WWII

An exploration of narrative film from 1941 to the present day, incorporating a study of a variety of narrative cinema styles. Theoretical issues will include questions of cinema's relationship to other art forms, narrative, genre and authorship.

Two lectures, plus one weekly film screening; one term

Prerequisite(s): One of ARTHIST 2FL3, ARTHIST 3FL3, THTRFLM 2FF3 or THTRFLM 3FF3 is recommended

Antirequisite(s): CMST 3XX3

Cross-list(s): ARTHIST 3XX3

THTRFLM 3N03 - ARTISTS' ALTERNATIVE FILM AND VIDEO

An exploration of artists' film and video produced outside of dominant institutions, including such practices as documentary, autobiography, community projects, experimental film, short film and video art.

Lecture and discussion (two hours), plus one weekly film screening; one term

Prerequisite(s): Registration in Level III or above and one of CMST 2BB3 or THTRFLM 2CP3, 2FA3

Antirequisite(s): CMST 3UU3

Offered in alternate years.

THTRFLM 30P6 A/B - ORGANIZING THE PERFORMANCE SPACE

Students explore the contributions of design, production and stage management to theatrical production through studio exercises and work on department productions. Two Studios plus practicum work (includes evenings and weekends as determined by production schedules); two terms

Prerequisite(s): THTRFLM 2BB3 or 2DP3, and registration in Level II or above

Not to be taken concurrently with THTRFLM 4A06 A/B.

THTRFLM 3P03 - WOMEN AND VISUAL CULTURE

Students will explore ideas about representation, spectatorship and production in relation to issues of social difference, such as gender, race and class. Emphasis is on visuality in forms such as film, video, television, advertising, et cetera.

Lecture and discussion (two hours), plus one weekly film screening; one term

Prerequisite(s): Registration in Level III or above; and one of ARTHIST 2A03, CMST 2BB3, 2G03, 2H03, THTRFLM 1T03, 2FA3, WOMENST 1A03, 1AA3

Antirequisite(s): CMST 3BB3

Cross-list(s): WOMENST 3BB3

Not open to students with credit or registration in WOMENST 3B03, if the topic was Images of Women: Reading Art, Media and Popular Culture.

This course is administered by Women's Studies.

THTRFLM 3PC3 - PERFORMANCE AND COMMUNITY ENGAGEMENT

Working in collaboration with the Student Success Centre, the class will conduct theatre workshops to gather material about the lived experiences of McMaster students. They will learn how to organize and analyze the material they gather, and use it to create short scenes for the following year's production of the Welcome Week play, IRIS, which is presented to most incoming McMaster undergraduates within days of their arrival on campus.

Two studios (four hours), plus one lecture; one term

Prerequisite(s): Registration in Level III or IV of any program

THTRFLM 3PR3 - TEXT-BASED DEVISING: RESEARCH AND DEVELOPMENT

Students will learn the basic skills necessary for the research and planning phase of public performance through preparatory work for departmental productions. Students will learn the research and studio skills necessary to devise productions from previously scripted texts. This class will begin the creative process for the departmental production in the Fall term. Studio fees are a course requirement. Check with instructor what these costs are before end of drop and add period.

Studio and lectures (three hours); one term

Prerequisite(s): Nine units of Level II Theatre & Film Studies, including one of THTRFLM 2AA3, 2BB3, or 2DP3

Offered during the Spring/Summer term only.

Alternates with THTRFLM 3PS3.

THTRFLM 3PS3 - DEVISING NEW PLAYS: RESEARCH AND DEVELOPMENT

Students will learn the research and studio skills necessary to devise new plays. This class will begin the creative process for the departmental production in the Fall term. Studio fees are a course requirement. Check with instructor what these costs are before end of drop and add period.

Studio and lectures (three hours); one term

Prerequisite(s): Nine units of Level II Theatre & Film Studies, including one of THTRFLM 2AA3, 2BB3, or 2DP3

Offered during the Spring/Summer term only.

Alternates with THTRFLM 3PR3.

THTRFLM 3S06 - MAJOR PRODUCTION WORKSHOP

Students will form the core artistic team for the School's November Major Production. This course is reserved for students with a demonstrated ability to collaborate in creative teams. Students wishing to register in this course must submit an application form to the School of the Arts by the end of April to guarantee consideration for the following year.

Eight hours (including two two-hour studios, one four-hour rehearsal), plus production hours; one term

Prerequisite(s): Registration in Level III of any program in Theatre & Film Studies and permission of the School of the Arts

Antirequisite(s): THTRFLM 3S03

THTRFLM 3SD3 - SCRIPTING THE DEVISED PERFORMANCE

A practical study of the structural qualities and social impact of different dramatic forms and their use in scripting performances for specific audiences.

Studio (two hours), lecture and discussion (one hour); one term

Prerequisite(s): A grade of at least B- in THTRFLM 2AA3, 2BB3, or 2DP3; and registration in Level III or above of a program in Theatre & Film Studies

THTRFLM 3U03 - PLEASURE AND CRITIQUE IN DRAMATIC PERFORMANCE

An exploration of the relationship between pleasure and critique in a range of dramatic performances for theatre, cinema and related art forms.

Lecture and discussion (three hours); one term

Prerequisite(s): THTRFLM 1T03; and registration in Level III or above

THTRFLM 3VS3 - VISUAL STORYTELLING

This course examines the theories underlying the visual aesthetics of cinema and theatre. These are analyzed alongside narrative structure and put into practice by students in projects.

Lectures and demonstrations (three hours); one term

Prerequisite(s): THTRFLM 2FA3

Offered in alternate years.

THTRFLM 3WW3 - ACTING AND THE VOICE: DEVISING FROM CLASSICAL TEXTS

Using classical texts as a springboard, students will learn to use their voices as an important resource in the devising of new work.

Two studios; one term

Prerequisite(s): Registration in a program in Theatre & Film Studies; and a grade of at least B- in THTRFLM 2AA3

Alternates with THTRFLM 3XX3.

THTRFLM 3XX3 - ACTING AND THE BODY: DEVISING PHYSICAL THEATRE

A practical investigation of the ways actors can use their own bodies as a central resource in the devising of new work.

Two studios; one term

Prerequisite(s): Registration in a program in Theatre & Film Studies; and a grade of at least B- in THTRFLM 2AA3

Alternates with THTRFLM 3WW3.

THTRFLM 4A06 A/B - THEATRE AND SOCIETY: A PERFORMANCE PROJECT

Students will work in small groups to create and critique public performances.

Two lectures, one lab; total of 6 hours

Prerequisite(s): Registration in Level IV of an Honours program in Theatre & Film Studies and permission of the School of the Arts. Starting in 2010, students proposing an original script must have taken THTRFLM 3SD3.

Admission to THTRFLM 4A06 will be based primarily on academic standing. In addition, students must complete a written application on a form provided by the School of the Arts, which must be submitted in March of the academic year prior to registration. Final selection will be made by Theatre and Film Studies faculty.

THTRFLM 4C03 - PERFORMANCE AND SOCIETY

Senior Seminar: Contemporary theories about the relationship of performance and social structures.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Theatre & Film Studies

Priority will be given to students registered in Level IV of any Theatre & Film Studies program.

Offered in alternate years.

THTRFLM 4D03 - THEATRE, SOCIETY AND EARLY CINEMA

Senior seminar: A study of the relationship between theatre and film. It is organized by topics that have been the focus of recent scholarship.

Seminar (two hours), plus weekly film screening; one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Theatre & Film Studies

Priority will be given to students registered in Level IV of any Theatre & Film Studies program.

THTRFLM 4E03 - CINEMA AND SOCIETY

Senior seminar: Students work with interdisciplinary theories and examine how selected films produce social meanings.

Seminar (two hours); one term

Prerequisite(s): Registration in Level III or IV of an Honours program in Theatre & Film Studies; or registration in Level IV of an Honours program in Communication Studies

THTRFLM 3FF3 is recommended. Priority will be given first to students registered in Level IV of any Theatre & Film Studies program and then to students registered in Level IV of the Communication Studies program.

WHMIS**WHMIS 1A00 - INTRODUCTION TO HEALTH AND SAFETY**

Introduction to safety guidelines at McMaster University, acceptable safety conduct and positive safety attitudes and practices in laboratories and Workplace Hazardous Materials Information System (WHMIS).

This course is evaluated on a Complete/Fail basis.

Web modules

Antirequisite(s): ART 1HS0, ENGINEER 1A00, ENGTECH 1A00, NURSING 1A00, SCIENCE 1A00

This requirement must be completed prior to the start of the first lab. Students who fail the quiz must reattempt it and will not be permitted in any course with a lab component or any Level II ART course until the requirement has been successfully completed.

WOMEN'S STUDIES

The following courses in Women's Studies are administered by the Office of Interdisciplinary Studies (Togo Salmon Hall Room 308, ext. 27734, <http://gsfr.humanities.mcmaster.ca/minor-in-womensstudies/>): WOMENST 1A03, 1AA3, 2AA3, 3BB3, 4D03.

All other WOMENST courses that appear in this calendar are administered by the cross-listed department.

Courses

If no prerequisite is listed, the course is open.

WOMENST 1A03 - WOMEN, CULTURE, POWER

An interdisciplinary introduction to Women's Studies focusing on how women and men shape and are shaped by culture (including popular culture), systems of power and institutional ideologies.

Two lectures, one tutorial (three hours); one term

WOMENST 1AA3 - WOMEN TRANSFORMING THE WORLD

An interdisciplinary introduction to Women's Studies that explores women's historic and current collective efforts to transform social, economic and political conditions both nationally and globally.

Two lectures, one tutorial (three hours); one term

WOMENST 2AA3 - INTRODUCTION TO FEMINIST THOUGHT

An introduction to the history of feminist theorizing, including liberal, radical, socialist, multiracial, poststructural, postcolonial, third wave, queer and global feminist approaches.

Two lectures, one tutorial (three hours); one term

Prerequisite(s): Registration in Level II or above

Antirequisite(s): ENGLISH 2AA3

WOMENST 2B03 - WOMEN IN THE BIBLICAL TRADITION

This course will focus on the portrayal of women in the Hebrew Scriptures and the New Testament. Among the texts to be dealt with are examples of biblical narrative and legal material, the gospels, the letters of Paul and extra-biblical material.

Two lectures, one tutorial; one term

Cross-list(s): RELIGST 2B03

This course is administered by the Department of Religious Studies.

WOMENST 2BB3 - IMAGES OF THE DIVINE FEMINE

An examination of some of the ways the divine has been portrayed as feminine in diverse cultures.

Two lectures, one tutorial; one term

Cross-list(s): RELIGST 2BB3

This course is administered by the Department of Religious Studies.

WOMENST 3BB3 - WOMEN AND VISUAL CULTURE

Students will explore ideas about representation, spectatorship and production in relation to issues of social difference, such as gender, race and class. Emphasis is on visibility in forms such as film, video, television, advertising, et cetera.

Two hour lecture and discussion, plus one weekly film screening; one term

Prerequisite(s): Registration in Level III or above; and one of ARTHIST 2A03, CMST 2BB3, 2G03, 2H03, THTRFLM 1T03, 2FA3, WOMENST 1A03, 1AA3

Antirequisite(s): CMST 3BB3

Cross-list(s): THTRFLM 3P03

Not open to students with credit or registration in WOMENST 3B03, if the topic was Images of Women: Reading Art, Media and Popular Culture.

WOMENST 3FF3 - GENDER AND RELIGION

A study of gender in several religions, such as Hinduism, Buddhism, Confucianism, Christianity, Judaism and Islam. Important female religious figures and feminist theology will also be studied.

Two lectures, one tutorial; one term

Antirequisite(s): RELIGST 2SS3

Cross-list(s): RELIGST 3FF3

This course is administered by the Department of Religious Studies.

OFFICE OF THE REGISTRAR, STUDENT FINANCIAL AID & SCHOLARSHIPS

Gilmour Hall, Room 120

McMaster University

Hamilton, Ontario, L8S 4L8

Telephone: (905) 525-9140, ext. 24319

<http://sfas.mcmaster.ca/>

sfas@mcmaster.ca

SENIOR ASSOCIATE REGISTRAR

Tracie Long

ASSOCIATE REGISTRAR

Leanne Ruiz

The Office of the Registrar, Student Financial Aid & Scholarships (SFAS) is committed to professional student service. We deliver government and University aid and award programs that support financial wellness and excellence at the post-secondary level. Government student aid such as the Ontario Student Assistance Program (OSAP) is administered on behalf of the Ministry of Training Colleges and Universities. McMaster aid and awards programs include academic grants, awards, bursaries and work programs. For more information about our programs and services, visit the SFAS website at <http://sfas.mcmaster.ca>.

Regulations for Aid and Awards

The University promotes access to available Aid and Awards and seeks to maximize opportunities for students while ensuring equity and consistency in administration. In doing so, the University operates within the Senate approved University Aid and Awards Policy to ensure its responsibilities to students and donors are met. While all regulations for Aid and Awards are established within this approved policy, the University may choose to offer additional Aid and Award programs, establish regulations through which to administer these programs, and/or modify

existing regulations with Senate approval after the Undergraduate Calendar has been published.

It is important to note that Financial Awards are not covered by the University Aid and Awards Policy and are not administered through the Aid and Award regulations that follow. Financial Awards support students in a manner consistent with the goals of the University, but do not necessarily meet all of the policy regulations of established Aid and Award programs. Financial Awards may be administered centrally through the Office of the Registrar, Student Financial Aid & Scholarships (SFAS), through the School of Graduate Studies (SGS), or through designated representatives in University faculties and departments that have established processes to administer their own funds (e.g. Athletics and Recreation). Financial Awards are not Senate-approved awards and thus, are not recognized at convocation or included on University transcripts. Information about Financial Awards is made available through department websites.

The following regulations apply to all Undergraduate Aid and Award Programs (and excludes Financial Awards, as detailed above):

Application Requirements

Some Aid and Awards require students to submit an application:

1. Application records for Aid and Awards, supporting documentation (e.g. transcripts, letters of reference, income tax notices of assessment, student loan entitlements, etc.) and responses to applications shall be handled by the administering office in accordance with the *Freedom of Information and Protection of Privacy Act (FIPPA)*.
2. Where advertised Aid and Award application deadlines fall on a non-business day (i.e. Saturday, Sunday or University-recognized holiday), the deadline is 8:30 am the next business day.
3. Requirements for Aid and Awards by application typically include -
 - An online application submitted electronically through Mosaic with a completed and signed cover page, or a completed signed paper-based application form

- A statement of eligibility
 - A curriculum vitae/academic resume
 - A transcript (McMaster University transcripts may be unofficial)
 - In addition, for the types of awards noted below, at least one academic or personal (non-family member) letter of reference may be required -
 - i. University-wide Aid and Awards
 - ii. Aid and Awards with a value exceeding \$2000
 - iii. Renewable Aid and Awards
 - iv. Aid and Awards at the discretion of the Office of the Registrar, Student Financial Aid & Scholarships
4. The University may choose to audit and verify any or all information provided to complete an Aid or Award Application.
 5. Application records and supporting documentation is used by the Office of the Registrar, Student Financial Aid & Scholarships, Award Chairs and Selection Committees for the sole purpose of administering Aid and Award programs, including, but not limited to, determining student eligibility.
 6. All application records and supporting documentation submitted by unsuccessful applicants will be retained for a minimum period of twelve months after last use. All application records and supporting documentation submitted by successful applicants will be retained for a minimum period of seven years after last use.
 7. All application records and supporting documentation remain the property of McMaster University.

Gender Criteria

For the purpose of Aid and Award criteria and eligibility, references to "Woman" or "Female" include all students who identify as Woman/Female and references to "Man" or "Male" include all students who identify as a Man or Male.

Maximums

To ensure a fair and wide allocation of Undergraduate Aid and Awards, the University restricts the number and value of aid and awards which students may receive for an academic year.

An eligible entering student may receive:

- a. One Entrance Award granted solely on the basis of academic merit (e.g. a McMaster Honour Award); and
- b. One Indigenous Student Entrance Award or one Entrance Award granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition; and
- c. One Entrance Academic Grant or Indigenous Student Entrance Academic Grant; and
- d. One Entrance Bursary granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition, and additional bursary funding up to the amount eligible; and
- e. Fall/Winter and Summer Work Program funding; and
- f. Any number of Financial Awards

An eligible in-course or graduating student may receive:

- a. Awards granted on the basis of academic merit, limited to either one award greater than or equal to \$800 (considered a 'major' award) and one academic award less than \$800 (considered a 'minor' award), or two academic awards less than \$800; and
- b. Two awards granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition; and
- c. Academic Awards continued from a previous year to a maximum of one Entrance and one In-Course Renewable Award; and
- d. Any number of prizes, which include non-monetary awards such as books and medals, and awards of nominal monetary value (currently \$100 or

less), whether based on academic merit or an additional assessment process; and

- e. One Travel or Exchange Award; and
- f. One Academic Grant (including any renewable Entrance, Indigenous Student Entrance, or In-Course Academic Grant continued from a previous year); and
- g. One Community Contribution Award; and
- h. One In-Course Bursary granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition, and additional bursary funding (including any renewable Entrance or In-Course Bursary continued from a previous year) up to the amount eligible; and
- i. Fall/Winter and Summer Work program funding; and
- j. Any number of Financial Awards

T4A tax slips are issued to students for all Aid and Award amounts received during the tax year.

It is important to note that Aid and Award income may affect federal and/or provincial student aid (e.g. full-time OSAP) entitlements. Students are advised to review the status of their government student aid applications often and refer to the appropriate government website for further information.

Review of Aid and Award Decisions

1. Decisions made by Aid and Award selection committees are final. Students may not appeal these decisions.
2. Students who believe an error occurred at the University, that may have impacted an Aid and/or Award decision, are asked to write to the Senior Associate Registrar, Student Financial Aid & Scholarships requesting a review of their file.
3. Students who have compelling personal circumstances that preclude them from receiving initial payment and/or renewal of Aid and/or Award funding may submit a petition for special consideration to request that an exception to the policy and/or regulations be made. Petitions should be submitted to the Senior Associate Registrar, Student Financial Aid & Scholarships and should include a cover letter explaining the need for special consideration, as well as any relevant documentation. Petitions must be submitted in a prompt and timely manner and will be accepted no later than one year after the decision being petitioned.

Privacy

1. The *Freedom of Information and Protection of Privacy Act (FIPPA)* and McMaster University's *Notice of Collection* statement shall govern the information provided to donors and others concerning award recipients, including publications such as convocation programs and Award booklets. As such, the University is permitted to publish an individual's name, Faculty, program, plan, level, and Award information. The University may publish the names of recipients of scholarships listed in the Undergraduate Calendar in the University's convocation program and other Award publications.
2. With permission, the University may also release an Aid recipient's first name, last name, Faculty, program, plan, level, Aid received and amount to the donor(s) of the Aid.
3. With permission, the University may also release an academic grant recipient's first name, last name, email id, faculty, program, plan, level, Academic Grant received and amount to the Faculty for the purpose of Faculty award ceremony invitations and Award booklets.
4. From time to time, the Office of the Registrar, Student Financial Aid & Scholarships may reach out to Award recipients with requests for thank you letters, invitations to donor luncheons and events, invitations to discuss summer job opportunities or internships, interviews for McMaster University Advancement or Communications and Public Affairs, etc.

Responses to these requests and/or attendance at these functions is entirely voluntary. While a response is appreciated, acceptance or rejection of these offers in no way impacts Aid and Award eligibility.

5. Mandatory annual reporting to Undergraduate Council Awards Committee, Undergraduate Council, and Senate include the release of an Award recipient's first name, last name, Faculty, program, plan, level, Award received and amount, submitted Travel Award reports, Aid and Award summary information and identification of participating University-wide Selection Committee members.
6. Students with concerns regarding Aid and Award privacy, are asked to write to the Senior Associate Registrar, Student Financial Aid & Scholarships.

AID FOR UNDERGRADUATE STUDENTS

Bursaries

Entrance Bursaries

ENTRANCE BURSARY REGULATIONS

1. Entrance Bursaries are non-repayable grants allocated on the basis of demonstrated financial need, which may also include a minimum expectation of academic achievement or other miscellaneous criteria.
2. Entrance Bursaries are available to students admitted on the basis of high school admission requirements.
3. Entrance Bursaries are available to full-time and part-time students entering Level I of their first baccalaureate degree program.
4. Entrance Bursaries requiring full-time status are available to students enrolled in a full-time OSAP eligible full-time course load or equivalent in both the fall and winter terms.
5. Students who have enrolled at any post-secondary institution after graduation from high school are not eligible for Entrance Bursaries, unless:
 - i. They are completing a certificate or diploma at McMaster University as a requirement of admission (e.g. the McMaster English Language Diploma), and/or
 - ii. They have withdrawn from post-secondary studies before attending or before the deadline to drop and add courses in their first term of study.
6. Entrance Bursaries are available to students who are Canadian Citizens or Permanent Residents of Canada regardless of where they completed their high school education.
7. Entrance Bursaries are allocated on the basis of financial need, as demonstrated through a completed full-time OSAP application, for the academic year in which the student is entering Level I of their program.
8. Entrance Bursaries are allocated in adherence with the Ministry of Training, Colleges and Universities (MTCU) policies, procedures and guidelines in place for the given academic year. The MTCU Student Access Guarantee (SAG) currently specifies bursary amounts and payment deadlines for students in high tuition programs (e.g. Engineering, Business).
9. Entrance Bursary funds are limited.
10. Students may receive more than one Entrance Bursary to fill their Student Access Guarantee obligation or to meet the total bursary amount for their level of financial need.
11. In some cases, students may receive more than one Entrance Bursary (e.g. where a student meets a particular donor fund requirement or applies via a separate earned merit application process). In these cases, the bursary is awarded to the eligible student who demonstrates the greatest financial need as determined by the Office of the Registrar, Student Financial Aid & Scholarships.
12. Entrance Bursaries may specify a minimum admission average requirement and may consider one or more McMaster University calculated admission averages. An admission audition or portfolio score or equivalent may be included in the calculation of an average. Final grades for courses completed after June 30th in the year of admission application will not be considered in assessing eligibility for Entrance Bursaries.
13. Entrance Bursaries may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application.
14. In order to be considered for an Entrance Bursary by application, students must submit a completed application by the specified deadline date.
15. Entrance Bursary applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
16. The greater calculated financial need is used to break any tie.
17. Students may receive a maximum of one Entrance Bursary by application.
18. Students must be enrolled in at least the full-time OSAP eligible course load used to determine their eligibility for the Entrance Bursary to have the Entrance Bursary payment processed.
19. All Entrance Bursary payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
20. All Entrance Bursaries are disbursed September through the end of December.
21. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the Entrance Bursary. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
22. Students who withdraw before November 1 may see an adjustment in the value of their Entrance Bursary or see the full amount returned to the University.
23. Any adjustment made to a student's account, in order to return all or a portion of an Entrance Bursary to the University, will be calculated on the balance available at the time of the adjustment and will not put a student's account into deficit.
24. Some Entrance Bursaries may be renewable (see In-Course and Renewal Bursary Regulations).
25. The University may choose not to grant an Entrance Bursary in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for bursaries by application, where complete applications have not been received.
26. The University may remove specific Entrance Bursaries from the University Calendar, may revise the terms and stated value and/or suspend the granting of Entrance Bursaries (e.g. donor funds).
27. Entrance Bursaries supported by donor funds may have additional eligibility requirements.

OPEN TO THE FACULTY OF HEALTH SCIENCES

THE RON AND GINA FRASER HEALTH SCIENCES BURSARY

The Ronald K. Fraser Foundation and Gina E. Fraser established The Ron and Gina Fraser Health Sciences Bursary with a mandate to fund university tuition for students in the highest financial need who enter full-time study in the Bachelor of Health Sciences Program. The HWSB and HWCSB will participate in the selection

of recipients. The bursary is valued at one year of tuition and is available for the four years in the BHSc program and if the recipient decides to pursue a career in medicine (bursary for a further 3 years) or is accepted into the Graduate Program in Biomedical Engineering (bursary for a further 5 years); on the condition of both continued good academic standing and financial need.

OPEN TO THE FACULTY OF HUMANITIES

THE DON AND LOIS GASSE MEMORIAL ENTRANCE BURSARY

Established in 2017 by Dr. Rosanne Gasse, B.A. Hon. (Class of '80), M.A. (Class of '81), Ph.D. (Class of '89), in memory of her parents.

Requirements: To be granted to a student entering Level I in the Faculty of Humanities who demonstrates financial need. Preference will be given to an Indigenous student.

THE ROBERT AND RUTH MILLER ENTRANCE BURSARY

Established in 2016 by Ruth Miller (Class of '79), lifetime resident of Burlington who had a career dedicated to education in the Halton School Board; and Robert Miller (Class of '76), who had a career in engineering and business management, to assist students that demonstrate wise use of time, energy and skill.

Requirements: To be awarded to a student entering a Level I program in the Faculty of Humanities who graduated from a Burlington high school and demonstrates financial need. Preference to be given to students who graduated from M.M. Robinson High School.

Value: \$7,500

In-Course Bursaries

IN-COURSE AND RENEWAL BURSARY REGULATIONS

- In-Course Bursaries are non-repayable grants, allocated on the basis of demonstrated financial need, which may also include a minimum expectation of academic achievement or other miscellaneous criteria.
- In-Course Bursaries are available to full-time and part-time students enrolled in an undergraduate degree program, excluding the Physician Assistant and M.D. Programs. A limited number of bursaries are also available to true part-time students enrolled in diploma and certificate programs offered through McMaster's Centre for Continuing Education, who have completed at least 50% of that course work on a part-time basis.
- In-Course Bursaries requiring full-time status are available to students enrolled in an OSAP eligible full-time course load or equivalent in both the fall and winter terms.
- Second degree students are eligible for In-Course Bursaries
- In-Course Bursaries are available to students who are Canadian Citizens, Permanent Residents, Convention Refugees and Protected Persons of Canada.
- Students who are not Canadian Citizens, Permanent Residents, Convention Refugees or Protected Persons of Canada, who are enrolled in Level II or higher, are eligible for a limited number of In-Course Bursaries for International students.
- In-Course Bursaries are allocated on the basis of financial need, as demonstrated through a completed Canadian federal and/or provincial government student aid application (e.g. full-time OSAP), completed standard University need profiles and/or discussions with designated staff on campus (e.g. a Student Loans Officer) who confirm the need for bursary assistance through submission of additional supporting documentation, for the academic year in which the student is being considered.
- In-Course Bursaries are allocated in adherence with the Ministry of Training, Colleges and Universities (MTCU) policies, procedures and guidelines in place for the given academic year. The MTCU Student Access Guarantee (SAG) currently specifies bursary amounts and payment deadlines for students in high tuition programs (e.g. Engineering, Business).
- In-Course Bursaries for non-SAG students are allocated according to financial need based on government student aid entitlements, or equivalent, with higher bursary amounts assigned to students demonstrating higher levels of financial need. Bursary amounts are set by the Office of the Registrar, Student Financial Aid & Scholarships annually.
- In-Course Bursary funds are limited.
- Students may receive more than one In-Course or Renewal Bursary to cover their Student Access Guarantee obligation or up to the total bursary amount for which they are eligible.
- In some cases, students may receive more than one bursary (e.g. where a student meets a particular donor fund requirement or applies via a separate earned merit application process). In these cases, the bursary is awarded to the eligible student who demonstrates the greatest financial need as determined by the Office of the Registrar, Student Financial Aid & Scholarships.
- The greater demonstrated financial need is used to break any tie.
- In-Course Bursaries may consider one or more McMaster University calculated averages (e.g. Cumulative Grade Point Average).
- In-Course Bursaries may specify a minimum average requirement.
- In-Course Bursaries may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application.
- In order to be considered for an In-Course Bursary by application, students must submit a completed application by the specified deadline date.
- In-Course Bursary applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
- Students must be enrolled in at least the course load used to determine their eligibility for the In-Course Bursary to have the In-Course Bursary payment processed.
- Students must meet the renewal requirements specified in the terms of their Entrance or In-Course Bursary to receive a renewal payment.
- All In-Course Bursary payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
- MAPS bursary payments are disbursed in the fall, winter and spring/summer terms, once the drop and add period for the term has passed. All In-Course Bursaries are typically disbursed no later than mid-February (the MTCU winter term payment deadline).
- Forfeiture of a renewable Entrance or In-Course Bursary also cancels all future instalments of the bursary.
- Students wishing to defer the benefits of bursary renewal to the next academic year should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships. Approval is not automatic and deferrals are not normally granted for more than one academic year.
- Students holding a renewable Entrance or In-Course Bursary who choose to accelerate their program and to complete their degree earlier than normal by completing Spring/Summer courses and who wish to employ the benefits of their renewable bursary to defray the tuition and compulsory fees for those courses should make the request in writing to The Office of the Registrar, Student Financial Aid & Scholarships.
- Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the In-Course Bursary. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.

27. Students who withdraw may see an adjustment in the value of their In-Course or Renewal Bursary or see the full amount returned to the University.
28. Any adjustment made to a student's account, in order to return all or a portion of an In-Course or Renewal Bursary to the University, will be calculated on the balance available at the time of the adjustment and will not put a student's account into deficit.
29. The University may choose not to grant an In-Course Bursary in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for bursaries by application, where complete applications have not been received.
30. The University may remove specific In-Course Bursaries from the University Calendar, may revise the terms and stated value and/or suspend the granting of In-Course Bursaries (e.g. donor funds).
31. In-Course Bursaries supported by donor funds may have additional eligibility requirements.

Application details are available in Mosaic.

OPEN TO TWO OR MORE FACULTIES

THE 4 WINDS BURSARIES

Established in 1997 by John F. Evans, Q.C. and Patricia Peacock-Evans in recognition of John's long-standing association with McMaster as Chair of The President's Club Executive Committee.

Requirements: The Bursary is named after the island where the family's cottage is located. A variable number of bursaries to be granted to students who demonstrate financial need.

THE ACCESSIBILITY BURSARY

Established in 2015 by Daphne (Class of '87) to celebrate the work done by her father, Dr. Harry Botterell, in Neurosurgery and Paraplegia both during WWII and thereafter in Canada.

Requirements: To be granted to a student in any program who demonstrates financial need and is registered with Student Accessibility Services.

THE AINSWORTH BURSARIES

Established in 1996. To be granted to undergraduate students in any program who demonstrate financial need.

Requirements: Preference to be given to female students.

THE PHYLLIS MAY AITKEN BURSARY FUND

Established in 1997 by the bequest of Phyllis May Aitken.

Requirements: A variable number of bursaries to be granted to students enrolled in any program who demonstrate financial need.

THE JAMES N. ALLAN FOUNDATION BURSARY

Established in 1996 from funds donated by the James N. Allan Foundation, Dunville, Ontario, in support of its belief that all students should have the opportunity to achieve their educational goals.

Requirements: To provide assistance to McMaster students who demonstrate financial need. Preference will be given to students from Haldimand Norfolk County.

THE AMEX CANADA BURSARY

Established in 1997 by AMEX Canada Inc. in support of its belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be granted to a student enrolled in any program who demonstrates financial need.

THE AUBURN INDUSTRIAL SERVICES LTD BURSARY

Established in 1997 by Auburn Industries Services Ltd. under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to students enrolled in any program who demonstrate financial need. Preference will be given to the recipient of The Auburn Industrial Services Ltd. Award.

THE JOY BÂBY BURSARY

Established in 1997 by Joy Bâby under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in any program who demonstrates financial need.

THE CHARLES MURRAY BALL BURSARIES

Established in 1993 by bequest of May Alexandra Ball in memory of her brother Charles Murray Ball.

Requirements: To assist students in any program who demonstrate financial need.

THE BIRGIT AND ROBERT BATEMAN BURSARY

Established in 1997 by Birgit and Robert Bateman under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in the Arts and Science program, the Faculty of Social Sciences or the Faculty of Science. Preference to be given to students who are studying Environmental Studies or Environmental Science.

THE BEALE-LINCOLN-HALL EXCHANGE PROGRAM BURSARIES

Established in 1996 by Arnold A. Beale in memory of his parents, F. Arnold Beale and Margaret S. Beale and, Mr. and Mrs. Walter Gould Lincoln and Commander Harley H. Hall., U.S.N.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in a program in Commerce, Biochemistry, Biology, English, Chemistry, Earth Sciences, History, Materials Science, Mathematics, Physics, Engineering Physics or Religious Studies. Preference will be given to students who are participating in one of McMaster's formal exchange programs, and who have demonstrated a lively interest in the humanities and the human and social implications of scientific developments.

THE LARRY BEARE BURSARY

Established in 2011 by Larry Beare, B.A. (Class of '66).

Requirements: To be granted to students who demonstrate financial need.

THE DR. C. HOWARD AND DR. SHIRLEY F. BENTALL BURSARIES

Established in 1999 by Dr. C. Howard Bentall (Class of '37) and Dr. Shirley F. Bentall (Class of '46) under the McMaster Student Opportunity Fund initiative.

Requirements: A variable number of bursaries to be granted to students enrolled in any program who demonstrate financial need.

THE BETZNER FAMILY MEMORIAL BURSARIES

Established in 1996 by the Betzner Family of Dundas, Ontario.

Established in 2011 by Camp XIII, McMaster University in celebration of its 50th Anniversary through contributions from alumni, friends and Camp XIII funds in support of its belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be granted to students enrolled in the Faculty of Engineering who demonstrate financial need.

THE CANADIAN SOCIETY FOR MECHANICAL ENGINEERING BURSARY

Established in 1997 by The Canadian Society for Mechanical Engineering in support of its belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be granted to a student enrolled in the Faculty of Engineering who demonstrates financial need. Preference will be given to a student enrolled in Mechanical Engineering.

THE CRS ROBOTICS CORPORATION BURSARIES

Established in 1997 by CRS Robotics Corporation Inc. in support of its belief that all students should have the opportunity to pursue their educational goals.

Requirements: A variable number of bursaries to be granted to students enrolled in the Faculty of Engineering who demonstrate financial need.

THE ENGINEERING AND SOCIETY TRAVEL BURSARY

Established in 1994 by the Department of Engineering and Society. To assist students with travel costs associated with their summer placement in the Engineering and Society program.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in the Faculty of Engineering. Applications will be reviewed by the Director, Engineering and Society and the Office of the Registrar, Student Financial Aid & Scholarships.

THE ENGINEERING BURSARY FUND

Established in 2014.

Requirements: To be granted to students in the Faculty of Engineering who demonstrate financial need.

THE ENGINEERING CLASS OF '97 LEGACY BURSARY

Established in 1997 by the graduating class in Engineering under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in the Faculty of Engineering who demonstrates financial need.

THE GENERAL CONTRACTORS ASSOCIATION OF HAMILTON BURSARIES

Established in 1997 by the General Contractors Association of Hamilton under the McMaster Student Opportunity Fund initiative.

Requirements: A variable number of bursaries to be granted to students enrolled in the Faculty of Engineering who demonstrate financial need.

THE GENNUM CORPORATION BURSARIES

Established in 1997 by the Gennum Corporation in support of its belief that all students should have the opportunity to pursue their educational goals.

Requirements: A variable number of bursaries to be granted to students who are enrolled in the Faculty of Engineering and who demonstrate financial need.

THE GRAY FAMILY BURSARY

Established in 1997 by Donald Gray (Class of '70) and Glenn Gray (Class of '73) and Kerry Gray (Class of '77 and '82 (M.B.A.)) under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a third year student enrolled in the Engineering and Management program who demonstrates financial need. Preference to be given to students who permanently reside in the Hamilton-Wentworth Region.

THE HATCH ASSOCIATES BURSARY

Established in 1997 by Hatch Associates in support of its belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be granted to a student enrolled in the Faculty of Engineering who demonstrates financial need.

THE IODE JIM THOMSON ENGINEERING BURSARY

Established in 2007 by the Imperial Order of the Daughters of the Empire (IODE)-Angela Bruce Chapter in memory of Jim Thomson.

Requirements: To be granted to a student enrolled in the Faculty of Engineering who demonstrates financial need. Preference will be given to students from Oakville.

THE E. ANTHONY JAMES BURSARY

Established in 2017 by E. Anthony James, B.Eng. Civil Engineering (Class of '73), in recognition of the excellent education that McMaster University provided him.

Requirements: To be granted to students in the Faculty of Engineering who demonstrate financial need.

THE EMMANUEL AND GERTRUDE JAMES BURSARY

Established in 2010 by Emmanuel James Jr. (Class of '73) in honour of his parents, Emmanuel Sr. and Gertrude James.

Requirements: To be granted to students who demonstrate financial need and are enrolled in the Department of Civil Engineering.

THE SZE-WAI LEE MEMORIAL BURSARY

Established in 1997 under the McMaster Student Opportunity Fund initiative in honour of Sze-Wai Lee.

Requirements: To be granted to a student enrolled in the Faculty of Engineering who demonstrates financial need and has shown involvement in support of the community, particularly multicultural events.

THE LIBURDI ENGINEERING LIMITED BURSARY

Established in 1997 by Liburdi Engineering Limited under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in an Engineering program who demonstrates financial need.

THE ALBERT LOVAS MEMORIAL BURSARY

Established in 2008 by Reta Lovas, Glenn Gray (McMaster Class of '73) and Susan Gray (Mohawk Class of '72).

Requirements: To be granted to students enrolled in a Bachelor of Technology program who demonstrate financial need. Preference to be given to students residing in the City of Hamilton.

THE MCMASTER ENGINEERING SOCIETY BURSARY

Established in 1999 by the McMaster Engineering Society.

Requirements: To be granted to a student in the Faculty of Engineering who demonstrates financial need.

THE MERITOR AUTOMOTIVE INC. BURSARY

Established in 1999 by Meritor Automotive Inc. under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in a Mechanical Engineering program who demonstrates financial need.

THE ANN MINER MEMORIAL BURSARY

Established in 2005 in memory of Ann Miner by her brother Jim Sweetman (Class of '77) and his wife Sheila.

Requirements: To be granted to students enrolled in a program in Chemical Engineering in the Faculty of Engineering who demonstrate financial need.

THE ROBERT JOHN MORRIS BURSARIES

Established in 1996 by family, friends and colleagues of Robert John Morris.

Requirements: A variable number of bursaries to be granted to students who demonstrate financial need and are enrolled in the Faculty of Engineering. Preference will be given to in-course recipients and/or entrance level recipients of The Robert John Morris Awards in the year they receive the award.

THE ARCHIE MOUGHALIAN BURSARIES

Established by bequest in 1998.

Requirements: A variable number of bursaries to be granted to students enrolled in the Faculty of Engineering who demonstrate financial need.

THE NCR (WATERLOO) BURSARY

Established in 1998 by NCR (Waterloo) under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in an Engineering and Management program who demonstrates financial need.

THE ORLICK INDUSTRIES LIMITED BURSARIES

Established in 1997 by Orlick Industries in support of its belief that all students should have the opportunity to pursue their educational goals.

Requirements: A variable number of bursaries to be granted to students enrolled in a Mechanical Engineering program who demonstrate financial need.

THE OTIS CANADA BURSARIES IN ENGINEERING AND MANAGEMENT

Established in 1996 by OTIS Canada Inc., the world's largest elevator company with over 50,000 employees and more than 1,700 worldwide locations.

Requirements: A variable number of bursaries to be granted to students enrolled in Level II of a program in Engineering and Management who demonstrate financial need. Preference to be given to students who demonstrate a lively interest in the university and community through their involvement in extracurricular activities.

THE PATRIOT FORGE INC. BURSARY

Established in 1997 by Patriot Forge Inc. in support of McMaster students.

Requirements: To be granted to a student enrolled in the Faculty of Engineering who demonstrates financial need. Preference will be given to a student enrolled in Mechanical, Chemical or Materials Engineering.

THE MARC ANDRE ADRIEN PINEAULT BURSARY

Established in 1995 by family and friends in memory of Marc Pineault and augmented in 1996 in conjunction with the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in a program in Engineering who demonstrates financial need. Preference will be given to a student who is involved in one of the following University activities or issues: the McMaster Choir, varsity wrestling, karate club, the environment or social justice.

THE EVELYN QUIRT MEMORIAL BURSARY

Established in 2016 by Jennifer Chapin (Class of 2003).

Requirements: To be awarded to a student enrolled in the Faculty of Engineering who demonstrates financial need. Preference to be given to a female student.

THE LEO W. SETO BURSARY

Established in 2003 by Leo W. Seto, B.Eng.Mgt. (Class of '87) and M.Eng. (Class of '90) under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to a student in the Faculty of Engineering who demonstrates financial need.

THE LESLIE W. AND ELIZABETH SHEMILT BURSARY

Established in 1997 under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in an Engineering program.

THE SHOUKRI ENGINEERING AND SOCIETY BURSARY

Established by Dr. Mamdouh Shoukri, M.Eng. (Class of '74), Ph.D. (Class of '77), alumnus and former Dean of the Faculty of Engineering at McMaster University.

Requirements: A variable number of bursaries to be granted to students enrolled in the Mechanical Engineering and Society Program who demonstrate financial need.

THE FRANK STERN/STERN LABORATORIES BURSARY

Established in 2005 in memory of Frank Stern, Chairman and CEO of Stern Laboratories Inc.

Requirements: To be granted to students enrolled in a program in Mechanical Engineering who demonstrate financial need.

THE TURKSTRA LUMBER BURSARY

Established in 1996 by the Turkstra Lumber Company Limited.

Requirements: A variable number of bursaries to be granted to students enrolled in an Engineering and Society program who demonstrate financial need. Preference will be given to students who attain a Fall-Winter Average of at least 7.0 at the most recent review.

THE CAROLE J. WILSON BURSARY

Established in 2018 by Carole J. Wilson, B.Eng.Mgt. (Class of '84) and MBA (Class of '92) to inspire women to pursue an education in engineering and achieve their full potential.

Requirements: To be granted to students enrolled in the Faculty of Engineering who demonstrate financial need and are Canadian citizens. Preference given to female students who are enrolled in underrepresented programs.

THE ZEUNER FAMILY BURSARY

Established in 2018 by Alf Zeuner, B.Eng. (Class of '80) and M.Eng. Engineering Physics (Class of '84) in honour of the Zeuner Family.

Requirements: To be awarded to a student entering a full-time program in the Faculty of Engineering who demonstrates financial need. Preference is to be given to a student who permanently resides in Hamilton. This award is renewable for three years at the same value, provided the student remains enrolled full-time in the Faculty of Engineering.

OPEN TO THE FACULTY OF HEALTH SCIENCES

THE ANGELA DALZIEL AXELSON BURSARY IN NURSING

Established in 2006 by Angela (Bonnie) Dalziel Axelson, B.Sc.N. (Class of '62) to mark the 45th anniversary of her graduation.

Requirements: To be awarded to a student enrolled in the Nursing program who demonstrates financial need.

THE BACHELOR OF HEALTH SCIENCES (HONOURS) BURSARY

Established in 2004 by the Bachelor of Health Sciences (Honours) Program in the Faculty of Health Sciences through the generosity of its alumni and friends under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to a student in the Bachelor of Health Sciences (Honours) program who demonstrates financial need.

THE MARY BRIDGMAN MEMORIAL NURSING BURSARY

Established in 2011 by Donald Honey in memory of his wife, Mary Bridgman, B.Sc.N. (Class of '60) to recognize her lifelong commitment to educating students in the Nursing profession.

Requirements: To be granted to a student in the School of Nursing who demonstrates financial need.

THE DOUGLAS IAN BROWN BURSARY

Established in 1997 by Douglas A. and Lois Aileen Brown in honour of their son Douglas Ian Brown.

Requirements: To be granted to a McMaster student enrolled in the Faculty of Health Sciences who demonstrates financial need.

THE ED BUFFETT BURSARY

Established in 1997 under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to students enrolled in a program in Health Sciences who demonstrate financial need. Preference will be given to students who have demonstrated leadership in their school and community.

THE CIBC NURSING BURSARIES

Established in 2009 by CIBC in support of its commitment to breast cancer care.

Requirements: A variable number of bursaries to be granted to students enrolled in the School of Nursing who demonstrate financial need. Preference will be given to students with a specific interest in breast cancer through oncology placements and/or community involvement.

THE COMMUNITY NURSING REGISTRY - HAMILTON BURSARIES

Established in 2000 by the Community Nursing Registry - Hamilton in support of students pursuing a professional career in nursing.

Requirements: A variable number of bursaries to be granted to students enrolled in Level II in the School of Nursing in the Faculty of Health Sciences who demonstrate financial need. Preference will be given to students who demonstrate volunteer service in the area of health care.

THE STRUMMER CYPHER POND MEMORIAL BURSARY IN MIDWIFERY

Established in 2005 in memory of Strummer Cypher Pond by her parents, family, and friends, in recognition of the tremendous support and care provided to them by their midwives.

Requirements: To be granted to a student enrolled in the final clinical year of the Midwifery Education Program who demonstrates financial need to help defray the cost of tuition.

THE JEAN, MARTHA AND LAURIE DOUCET MEMORIAL BURSARIES

Established in 1998 by the family in memory of Jean, Martha and Laurie Doucet for their years of service and commitment to the nursing profession.

Requirements: A variable number of bursaries to be granted to students enrolled in the School of Nursing at both the undergraduate and graduate level and who demonstrate financial need. Preference will be given to students from the Regional Municipality of Niagara.

THE ELEANOR ENKIN MIDWIFERY BURSARY

Established in 2004 by Dr. Murray Enkin in support of Midwifery students.

Requirements: To be granted to Midwifery students who have completed at least Level I with notable academic standing and demonstrate financial need.

THE ALLAN FANG AND ALANNA JIN BURSARY FOR NEW CANADIANS

Established in 2014 by Allan Fang, MBA (Class of '03) and Alanna Jin, B.Sc. (Class of '04) to express gratitude for their time at McMaster as new Canadians.

Requirements: To be awarded to a student in Level II or above in the Faculty of Health Sciences who demonstrates financial need and has attained a minimum Cumulative Average of 10.0. Preference will be given to students who have obtained Canadian citizenship within the past 15 years.

THE MARGO AND FRASER FELL BURSARIES

Established in 1999 by Margot (Class of '52) and Fraser Fell (Class of '49).

Requirements: A variable number of bursaries to be granted to students enrolled in the School of Nursing in the Faculty of Health Sciences who demonstrate financial need.

THE JACK AND THELMA HEATH MEMORIAL BURSARIES

Established in 1985 by Norton Canada Inc. in memory of Jack and Thelma Heath, former employees of the Company, who were tragically killed in a boating accident.

Requirements: The fund provides up to four awards to assist students, with demonstrated financial need, in Level III or IV of the B.Sc.N. program (basic and/or post-diploma stream).

THE HAZEL MAY HINKS BURSARIES

Established in 1996 by bequest of Hazel May Hinks of Burlington, Ontario.

Requirements: A variable number of bursaries to be granted to students enrolled in a program in Nursing who demonstrate financial need. Preference will be given to students who have graduated from a high school located in the City of Burlington.

THE IDA MARIETTA HOUSTON BURSARY

Established in 2007 by Ida Marietta Houston. To be granted to a student who has completed Level II in the School of Nursing and demonstrates financial need.

Requirements: Preference will be given to a student with a particular interest in palliative or end-of-life care.

THE HUTTON KAUFMAN MIDWIFERY BURSARY

Established in 2018 by patients, colleagues, friends, and family of Dr. Eileen Hutton in celebration of her retirement. This award recognizes the profound influence of both Dr. Hutton, assistant dean of the Midwifery Education Program at McMaster from 2007-2018 and of founding assistant dean of the program, Dr. Karyn Kaufman; together with their peers, these two luminaries paved the way for midwifery care, midwifery education and midwifery research in Canada.

Requirements: To be granted to undergraduate students enrolled in the Midwifery Education Program at McMaster who demonstrate financial need.

THE IODE JEAN HENDERSON NURSING BURSARY

Established in 2007 by the Imperial Order of the Daughters of the Empire (IODE)-Angela Bruce Chapter in memory of Jean Henderson.

Requirements: To be granted to a student enrolled in the B.Sc.N. program who demonstrates financial need. Preference will be given to a student from Oakville.

THE HENRY AND FRANCES JEKEL BURSARY

Established in 2012 by Henry and Frances Jekel to provide financial assistance to students wishing to pursue a career in nursing.

Requirements: To be granted to students enrolled in the School of Nursing who demonstrate financial need.

THE KENTS FAMILY BURSARY

Established in 1997 by the Kents Family under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in the School of Medicine, the School of Nursing or the School of Rehabilitation Science.

THE PHILLIP GORDON KETTLE BURSARY

Established in 1996 in memory of Phillip Gordon Kettle.

Requirements: To be granted to a student enrolled in a Nursing program who demonstrates financial need. Preference to be given to a student studying herbal medicine as alternative therapies.

THE LOUCKS FAMILY BACHELOR OF HEALTH SCIENCES BURSARY

Established in 2000 by Mr. Ron Loucks and family in recognition of their support of Bachelor of Health Sciences students.

Requirements: To be granted to Bachelor of Health Sciences students who have completed at least Level I with notable academic standing and demonstrated financial need.

THE HARRISON MAYNARD MEMORIAL BURSARY IN MIDWIFERY

Established in 2005 in memory of Harrison Maynard by his family and friends.

Requirements: To be granted to students enrolled in Level II or above of the Midwifery Education Program who demonstrate financial need.

THE JANET MCKNIGHT MEMORIAL BURSARIES

Established in 1996 in memory of Janet McKnight by the Pember Family.

Requirements: A variable number of bursaries to be granted to students enrolled in the final level of the Nursing program who demonstrate financial need.

THE MCMASTER NURSING ALUMNI CLASS BURSARY FUND

A variable number of bursaries to be granted.

Requirements: To be granted to students enrolled in a Nursing program and who demonstrate financial need.

THE MCMASTER WOMEN'S CLUB BURSARY

Established in 1983 by the McMaster Women's Club and augmented in 1996 in conjunction with the McMaster Student Opportunity Fund initiative.

Requirements: To assist a student beyond Level I in the University's Bachelor of Science in Nursing program.

THE KATHERINE M. COLLYER MCNALLY BURSARY

Established in 1997 by her children in honour of Katherine M. Collyer McNally under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in Level II or above in the Midwifery, Physiotherapy or Nursing program.

THE MDS INC. BURSARY

Established in 1997 by MDS Inc., under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in the Faculty of Health Sciences who demonstrates financial need.

THE MIDWIFERY BURSARY

Established in 1999 by the Midwifery Education Program to support Midwifery students.

Requirements: To be granted to Midwifery students with notable academic standing and demonstrates financial need.

THE RUTH MURRAY MEMORIAL BACHELOR OF HEALTH SCIENCES BURSARY

Established in 1999 by Mr. Alex Murray and family in memory of Ruth Murray and in recognition of their support to Bachelor of Health Sciences students.

Requirements: To be granted to Bachelor of Health Sciences students who have completed at least Level I with notable academic standing and demonstrated financial need.

THE PERC AND JOAN NORMAN NURSING BURSARY

Established in 2005 by Perc and Joan Norman in support of students pursuing a career in healthcare.

Requirements: To be granted to students who demonstrate financial need and are enrolled in the Nursing program.

THE NURSING CLASS OF '69 BURSARY

Established in 2009 by the Nursing Class of 1969 in honour of their 40th anniversary.

Requirements: To be granted to students enrolled in Level III or IV in the School of Nursing who demonstrate financial need.

THE NURSING CLASS OF '86 BURSARY FUND

Established in 2006 by the Nursing Class of 1986 in honour of their 20th reunion.

Requirements: To be granted to students enrolled in the School of Nursing who demonstrate financial need.

THE NURSING PROGRAM BURSARY

Established in 1997 in recognition of the contribution of McMaster students under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to students enrolled in the Nursing program who demonstrate financial need. Preference will be given to the recipient of the Nursing Program Award.

THE OAKRUN FARM BAKERY BURSARY

Established in 2004 by Oakrun Farm Bakery, under the McMaster Student Opportunity Trust Fund II initiative.

Requirements: To be granted to students enrolled in the Faculty of Health Sciences who demonstrate financial need. Preference to be given to a student in the Hamilton area.

THE LORI OSTRANDER MEMORIAL BURSARY

Established in 2017 by the bequest of Dr. Albert Ostrander in memory of his late wife, Mrs. Lori Ostrander (nee Maude Lorene Hewitt), who completed her nursing training at Hamilton General Hospital in the 1940s.

Requirements: To be granted to students enrolled in the School of Nursing who demonstrate financial need.

THE O'SHAUGHNESSY BURSARY

Established in 1986 by the family and friends of the late Margaret O'Shaughnessy, RN.

Requirements: This bursary is to be used to alleviate financial need for students pursuing an education in Nursing (basic or post-diploma stream) in Level II, III, or IV.

THE E.J. RANKIN BURSARY

Established in 2016 from the Estate of Eleanor Jean Rankin (Class of '83).

Requirements: To be granted to full time undergraduate and graduate students enrolled in the School of Nursing who demonstrate financial need. Funding

allocation to undergraduate and graduate students to be recommended by the Associate Dean, Nursing.

THE WALLACE M. RANKIN BURSARY IN THE SCHOOL OF NURSING

Established in 2006 by an anonymous donor.

Requirements: To be granted to students in the School of Nursing who demonstrate financial need.

THE ANITA AND JOSEPH ROBERTSON BURSARY

Established in 2019 from the Estates of Anita Robertson, B.Sc.N. (Class of '89) and Joseph Robertson.

Requirements: To be granted to students enrolled in the School of Nursing who demonstrate financial need.

THE SCHOOL OF NURSING BURSARY

Established in 2004 by the School of Nursing through the generosity of its alumni and friends under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to a student in the School of Nursing who demonstrates financial need.

THE SOROPTIMIST INTERNATIONAL OF HAMILTON - BURLINGTON MIDWIFERY BURSARY

Established in 2015 by S.I. of Hamilton-Burlington who are committed to improving the lives of women and girls in our community and around the world.

Requirements: To be granted to students in the Midwifery program who demonstrate financial need. Preference will be given to a female student.

THE AUDREY AND BOB WAUGH BURSARY

Established in 1997 by Audrey and Bob Waugh under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in the Faculty of Health Sciences who demonstrates financial need. Preference to be given to a student involved in Gerontological research.

THE DR. JANET WEISZ BURSARY

Established in 2004 by Dr. Janet Weisz, under the McMaster Student Opportunity Trust Fund II initiative.

Requirements: To be granted to students enrolled in the Faculty of Health Sciences who demonstrate financial need.

OPEN TO THE FACULTY OF HUMANITIES

THE JENNIFER AND THEODORE ARCAND ENGLISH BURSARY

Established in 1997 by Theodore Arcand (Class of '57), in memory of his wife, Jennifer (Class of '57), whose interest was Baroque English poetry.

Requirements: To be granted to an undergraduate or graduate student enrolled in a program in English, who demonstrates financial need.

THE ESTELLE AND CHUB BAXTER BURSARY

Established in 2003 by Estelle and Chub Baxter under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to a student in the Faculty of Humanities who demonstrates financial need. Preference will be given to a student enrolled in an Art History program in the School of the Arts.

THE MARJORIE E. (WATSON) BEATTIE BURSARY

Established in 1997 by William W. Beattie (Class of '68) in honour of his mother, Marjorie E. (Watson) Beattie (Class of '33), under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student enrolled in any program who demonstrates financial need. Preference to be given to students enrolled in the Faculty of Humanities.

THE FRED AND NORMA BIDWELL BURSARY

Established in 2007 by Norma Bidwell, B.A. (Class of '38).

Requirements: To be granted to a student enrolled in Level III or IV in the Faculty of Humanities who demonstrates financial need. Preference will be given to a student in the Department of Communication Studies and Multimedia.

THE SYLVIA BOWERBANK MEMORIAL BURSARY

Established in 2005 by family and friends in memory of Dr. Sylvia Bowerbank.

Requirements: To be granted to female students enrolled in the Department of English and Cultural Studies who demonstrate financial need. Preference will be given to female students who reside in a native community in Canada.

THE WILLIAM DAVID BROADHEAD MEMORIAL BURSARY

Established in 2003 by family in memory of William David Broadhead (Class of '39) under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to a student in the Faculty of Humanities who demonstrates financial need. Preference will be given to a student enrolled in a program in the Department of English and Cultural Studies.

THE MARIE IRELAND BUSH MEMORIAL BURSARIES

Established in 1996 by Helen Ireland Caldwell in memory of Marie Ireland Bush, (Class of '48) and dedicated teacher, who instilled in her students a love of learning.

Requirements: A variable number of bursaries to be granted to students enrolled in a program in English who demonstrate financial need.

THE HELEN CALDWELL BURSARY

Established in 2000 by Helen Caldwell (Class of '42, Faculty of Humanities.)

Requirements: To be granted to a student enrolled in a Women's Studies course who demonstrates financial need.

THE NORMAN NATHANIEL CASKEY BURSARIES

Established in 1996 by June Caskey of Hamilton in memory of her father.

Requirements: A variable number of bursaries to be granted to students enrolled in a program in Music who demonstrate financial need.

THE DAVID COOK CANADIAN LITERATURE BURSARY

Established in 2016 in honour of David Cook who was a devotee of Canadian Literature and long-time librarian at McMaster University.

Requirements: To be awarded to students enrolled in the Department of English and Cultural Studies who demonstrate financial need. Preference will be given to students with an interest in English Literature.

THE GERALDINE LORETTA COSFORD BURSARIES

Established in 1997 by Geraldine Loretta Cosford under the McMaster Student Opportunity Fund initiative.

Requirements: A variable number to be granted to students enrolled in the Faculty of Humanities who demonstrate financial need. Preference to be given to students who have completed Level I.

THE SUZANNE E. CRAVEN BURSARY

Established in 1997 by Mrs. Suzanne Craven in support of McMaster students.

Requirements: To be granted to students enrolled in the Faculty of Humanities who demonstrate financial need.

THE EARL FRANKLIN DAMUDE BURSARY

Established in 1993 by Dr. Christa Saas, in memory of Earl Franklin Damude (Class of '36.)

Requirements: To be granted to a student who demonstrates financial need and has completed Level II of a program in English or History.

THE DARVILLE BURSARY

Established in 2004 by Jack S. Darville (Class of '68) under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to a student in the Faculty of Humanities who demonstrates financial need. Preference will be given to a student enrolled in a music or art program in the School of the Arts.

THE MARGERY E. DIXON MEMORIAL BURSARY

Established in 2003 in loving memory of Margery E. Dixon (Class of '35) by Geraldine Phenix under the McMaster Student Opportunity Fund II initiative.

Requirements: A variable number of bursaries to be granted to students in the Faculty of Humanities who demonstrate financial need. Preference will be given to students enrolled in a program in the Department of English and Cultural Studies.

THE ALAN AND CLAIRE EATOCK BURSARIES

Established in 1999 by Alan Eatock (Class of '47) and Claire Eatock under the McMaster Student Opportunity Fund initiative.

Requirements: A variable number of bursaries to be granted to students in the Faculty of Humanities who demonstrate financial need.

THE ENERSYSTEM INSULATION LTD. BURSARY

Established in 1997 by EnerSystem Insulation Ltd. in support of its belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be granted to a student enrolled in a program in French who demonstrates financial need.

THE FESTITALIA CORPORATION BURSARY

Established in 1997 by the Festitalia Corporation under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted, in alternating years, to a student who demonstrates financial need and is enrolled in the Department of Linguistics and Languages, specializing in Italian, or is enrolled in the School of the Arts.

THE MICHAEL GILLESPIE BURSARY

Established in 2010 by Michael Gillespie.

Requirements: To be awarded to an undergraduate student enrolled in the Faculty of Humanities who demonstrates financial need.

THE GUENTHER FAMILY BURSARY

Established in 2012 by Jack and June Guenther (Class of 1949) in honour of their family.

Requirements: A variable number of bursaries to be awarded to students enrolled in the Faculty of Humanities who demonstrate financial need.

THE BILL AND HELEN HAIGHT BURSARY

Established in 2004 by Helen (Class of '49) and Bill Haight under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to students enrolled in the Faculty of Humanities who demonstrate financial need. Preference to be given to students in Level II or III of a Music program.

THE HALL FAMILY BURSARY

Established in 2004 by Frederick A. Hall under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to a student enrolled in the Faculty of Humanities who demonstrates financial need.

THE HAMILTON COMMUNITY FOUNDATION MUSIC BURSARY

Established in 2013 by the Hamilton Community Foundation with bequests from Irene Norris and Merle Williams.

Requirements: To be granted to students enrolled in a Music program who demonstrate financial need.

THE HAMILTON PERFORMING ARTS BURSARY

Established in 1997 by the Hamilton Performing Arts Foundation Inc. under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to students enrolled in Level II or above of a program in the School of the Arts, who has shown service to the community-at-large and who demonstrates financial need. Preference to be given to students who are currently on the Deans' Honour list.

THE HARWOOD BURSARIES

Established in 1990 by bequest of Dr. William Harwood of Hamilton in memory of his beloved wife Grace and devoted daughter Willa Ruth Laurie (Class of '50).

Requirements: A variable number of bursaries to be granted to students studying Music who demonstrate financial need.

Value: Not to exceed \$1,000

THE ORRA ROSE HENAN BURSARY

Established in 2014 through the bequest of Orra Rose Henan (Class of '53).

Requirements: To be granted to students enrolled in the Faculty of Humanities who demonstrate financial need.

THE GENERAL HUMANITIES BURSARY FUND

The General Humanities Bursary Fund, established in 1997 by Humanities alumni.

Requirements: Will be granted to undergraduate students at McMaster enrolled in any Humanities program who demonstrate financial need.

THE JULIA HURTIG BURSARY

Established by family and friends of the late Julia Hurtig in 1985.

Requirements: This bursary will be granted to a student entering Level II of the Faculty of Humanities, in good standing, who has made a special contribution to the McMaster community through involvement in University affairs. Preference will be given to a female student.

THE J. BEVERLY KRUGEL BURSARIES IN GERMAN STUDIES

Established in 2010 by Mrs. J. Beverly Krugel, B.A. (Class of '53).

Requirements: To be granted to students in the Faculty of Humanities who demonstrate financial need. Preference to be given to students who are enrolled in one or more German courses within the Department of Linguistics and Languages.

THE HAROLD J.L. KRUGEL BURSARY

Established in 2000 by Mrs. J. Beverly Krugel (Class of '53) in honour of her husband, Harold J.L. Krugel.

Requirements: To be granted to a student enrolled in the Faculty of Humanities who demonstrates financial need. Preference will be given to a student in the Department of Linguistics and Languages.

THE LAHREN LAMB MEMORIAL BURSARY

Established in 2007 by family and friends in loving memory of Lahren Lamb, B.A. (Class of '06), a gifted young artist and graduate of the Honours Art and Multi-media program who did not live to fulfill her potential. She was a truly loved and admired young woman.

Requirements: To be granted to a Level III student enrolled in the School of the Arts who demonstrates financial need.

THE JAMES R. A. LANGS BURSARIES IN THE ARTS

Established by family in memory of James R. A. Langs (Class of '37), a Hamilton business leader and great supporter of the Hamilton Community.

Requirements: A variable number of bursaries to be granted to students enrolled in a program in Art, Theatre & Film Studies or Music who demonstrate financial need.

THE DR. ALBERT MARTIN BURSARIES

Established in 1996 by Joyce Beverly Krugel, a former student of Dr. Albert Martin who was a Professor of German in the Faculty of Arts and Science from 1939 to 1961.

Scandlan, valued member of the United Steelworkers of America for 44 years including terms as International Representative (1953) and Area Supervisor (1976 to 1986), Alderman to the City of Hamilton (1964-1976) and Regional Councillor (1973-1976).

Requirements: To be granted to students enrolled in any program who demonstrate financial need. Preference to be given to students enrolled in a Labour studies program.

THE SOCIAL SCIENCES BURSARY

Established in 2004 by the Dean of the Faculty of Social Sciences through the generosity of its alumni and friends under the McMaster Student Opportunity Fund II initiative.

Requirements: To be granted to students enrolled in the Faculty of Social Sciences who demonstrate financial need.

THE SOCIAL SCIENCES SOCIETY BURSARIES

Established in 1990 by the Social Sciences Society Executive in recognition of the outstanding efforts of Dr. Peter George in establishing the Social Sciences Society.

Requirements: A variable number of bursaries to be granted to full-time students enrolled in a Social Sciences program involving Anthropology, Economics, Geography, Gerontology, Labour Studies, Political Science, Psychology, Religious Studies, Social Work or Sociology and who demonstrate financial need.

THE EDWIN A. TAYLOR BURSARY

Established in 2005 by Edwin A. Taylor, B.A. (Class of '54) and M.B.A. (Class of '63).

Requirements: To be granted to a student in the Faculty of Social Sciences who demonstrates financial need.

THE HERMAN TEN CATE MEMORIAL BURSARY

Established in 2002 in memory of Herman Ten Cate by his family, in support of his belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be granted to a student enrolled in the Faculty of Social Sciences who demonstrates financial need.

THE TRILLIUM NON PROFIT VENTURES FOR YOUTH BURSARY

Established in 2004 by Trillium Non Profit Ventures for Youth.

Requirements: To be granted to students who demonstrate financial need. Preference will be given to students enrolled in the School of Social Work.

THE THOMAS TRUMAN BURSARY

Established in 1992 by friends and colleagues in memory of Professor Thomas Truman, a member of the Department of Political Science from 1966 to 1990.

Requirements: To be granted to students enrolled in an Honours program in Political Science who demonstrate financial need. Preference will be given to the recipient of The Thomas Truman Memorial Prize.

THE UNITED STEELWORKERS OF AMERICA BURSARY

Established in 1997 by the United Steelworkers of America.

Requirements: To be granted to students enrolled in any program who demonstrate financial need. Preference will be given to students enrolled in a program in Labour Studies.

THE LYNN R. WILLIAMS BURSARY

Established in 1997 as a tribute to Lynn R. Williams (Class of '44), International President of the United Steelworkers of America from 1983-1994, in recognition of his outstanding contributions to labour and labour studies.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in a program in Labour Studies.

Value: The value of this bursary shall be no less than \$300.

THE STUART AND PAULA WINN BURSARY

Established in 2016 by the McMaster University Retirees Association (MURA) following a bequest from the estate of Stuart and Paula Winn. Stuart (Class of '72) was the principal founding member of MURA and its first honorary president.

Requirements: To be granted to a student in the Department of Health, Aging, and Society who demonstrates financial need. Preference will be given to students enrolled in an Aging and Society program.

Emergency Bursaries

EMERGENCY BURSARY REGULATIONS

1. An Emergency Bursary is a non-repayable grant sometimes available to enrolled students who find themselves in extreme circumstances or are experiencing unexpected financial hardship.
2. Students with emergency needs must meet with a representative in the Office of the Registrar, Student Financial Aid & Scholarships, during drop-in counselling hours to discuss their financial circumstances. Indigenous students may choose to meet with representatives in Indigenous Student Services to discuss their financial circumstances.
3. Students are required to complete a bursary application.
4. Students may be required to submit supporting documentation to confirm financial need and/or extreme circumstances, as determined by the Office of the Registrar, Student Financial Aid & Scholarships.
5. All Emergency Bursary payments are disbursed through the McMaster Student Account.
6. The University may remove specific Emergency Bursaries from the University Calendar, may revise the terms and stated value and/or suspend the granting of Emergency Bursaries (e.g. donor funds).
7. Emergency Bursaries supported by donor funds may have additional eligibility requirements.

THE MCMASTER EMERGENCY BURSARY FUND

Funding provided by McMaster operating funding.

Requirements: To be granted to students who demonstrate urgent financial need due to exceptional circumstances as determined by the Office of the Registrar, Student Financial Aid & Scholarships.

THE MCMASTER STUDENTS UNION EMERGENCY BURSARY FUND

Established in 2016 by the MSU Board of Directors and members of the McMaster Students Union.

Requirements: To be granted to full-time undergraduate students who are members of the MSU and who demonstrate urgent financial need due to exceptional circumstances as determined by the Office of Student Financial Aid & Scholarships.

Exchange Bursaries

EXCHANGE BURSARY REGULATIONS

1. Exchange Bursaries are non-repayable grants intended to assist students who otherwise would not be able to participate in exchange opportunities due to financial hardship.
2. Exchange Bursaries are allocated on the basis of demonstrated financial need, which may also include a minimum expectation of academic achievement or other miscellaneous criteria for students approved for exchange.
3. Exchange Bursaries are available to full-time and part-time students enrolled in Level II or above of their first undergraduate degree program, at the time of bursary application and selection, who are returning to McMaster to continue their studies.
4. Exchange Bursaries requiring full-time status are available to students enrolled in a full-time OSAP eligible course load or equivalent at the time of bursary application and selection.
5. Exchange Bursaries are only available to students who are Canadian Citizens, Permanent Residents, Convention Refugees and Protected Persons of Canada.
6. Exchange Bursaries are allocated on the basis of financial need, as demonstrated through a completed Canadian federal and/or provincial government student aid application (e.g. full-time OSAP) or completed standard University need profiles and an Exchange Bursary Application for the academic year in which the student is being considered.
7. Exchange Bursaries are allocated according to financial need, with higher bursary amounts assigned to students demonstrating higher levels of financial need. Bursary amounts are set by the Office of the Registrar, Student Financial Aid & Scholarships.
8. Exchange Bursary funds are limited.
9. Students are limited to one Exchange Bursary in their first undergraduate degree program.
10. The greater demonstrated financial need is used to break any tie.
11. Exchange Bursaries may consider one or more McMaster University calculated averages (e.g. Cumulative Grade Point Average).
12. Exchange Bursaries may specify a minimum average requirement.
13. Exchange Bursaries may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application.
14. In order to be considered for an Exchange Bursary by application, students must submit a completed application by the specified deadline date.
15. Exchange Bursary applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
16. Students must be enrolled in at least the course load used to determine their eligibility for the Exchange Bursary to have the Exchange Bursary payment processed.

17. All Exchange Bursary payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
18. Exchange Bursaries are typically disbursed no later than the end of April.
19. Exchange Bursaries are available to students participating in an approved formal exchange program during the academic year immediately following the application deadline.
20. It is the responsibility of Exchange Bursary recipients to make all exchange arrangements. Recipients are required to assess travel risks, have a plan of action in place for emergencies, and ensure they have proper medical and other insurance in place prior to departure.
21. Exchange Bursaries will not be issued for travel to areas deemed as 'do not travel areas' per Global Affairs Canada.
22. Exchange Bursary recipients may be required to complete a risk assessment and/or safety component and/or waiver prior to departure as dictated by other University policies and must attend mandatory Exchange Pre-Departure Orientation sessions and complete Terms for Participation Forms, Liability Waivers, and Statement of Responsibilities Forms.
23. Students who do not participate in their formal exchange as identified on their application will forfeit their bursary.
24. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture of an Exchange Bursary. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
25. Students who forfeit their Exchange Bursary must return the full bursary amount to their McMaster Student Account.
26. The University may choose not to grant an Exchange Bursary in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for bursaries by application where complete applications have not been received.
27. The University may remove specific Exchange Bursaries from the University Calendar, may revise the terms and stated value and/or suspend the granting of Exchange Bursaries.
28. Exchange Bursaries supported by donor funds may have additional eligibility requirements.

THE BEALE-LINCOLN-HALL EXCHANGE PROGRAM BURSARIES

Established in 1996 by Arnold A. Beale in memory of his parents, F. Arnold Beale and Margaret S. Beale and, Mr. and Mrs. Walter Gould Lincoln and Commander Harley H. Hall., U.S.N.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in a program in Commerce, Biochemistry, Biology, English, Chemistry, Earth Sciences, History, Materials Science, Mathematics, Physics, Engineering Physics or Religious Studies. Preference will be given to students who are participating in one of McMaster's formal exchange programs, and who have demonstrated a lively interest in the humanities and the human and social implications of scientific developments.

THE CHAN YIN CHAK BURSARY

Established in 1997 by Tak Chan in honour of his great grandfather, Mr. Chan Yin Chak.

Requirements: This bursary will be used to help defray expenses of Level III Commerce students or M.B.A. students, who demonstrate financial need, and are participating in one of the international exchange programs at the DeGroote School of Business.

THE JAMES R.A. LANGS STUDENT EXCHANGE PROGRAM BURSARIES

Established in 1996 by family in memory of James R.A. Langs (Class of '37), a Hamilton business leader and great supporter of the Hamilton Community.

Requirements: A variable number of bursaries to be granted to students enrolled in a program in Humanities who demonstrate financial need and who are participating in a formal McMaster Exchange Program.

THE MCLAY BURSARY

Established in 1997 by David and Jean McLay under the McMaster Student Opportunity Fund initiative.

Requirements: To be granted to a student in any program who demonstrates financial need and who is participating in one of McMaster's formal exchange programs. Preference to be given to students who have been active in international clubs and associations.

THE MCLEAN FAMILY EXCHANGE BURSARIES

Established in 1997 by the McLean Family under the McMaster Student Opportunity Fund initiative, in gratitude for the learning and relationship enrichment which they obtained first at McMaster University, and subsequently through international travel.

Requirements: To be granted to students who wish to participate in exchange programs, who demonstrate financial need and who are enrolled in Level II or III of a program. Preference to be given to international exchanges, for students from the Faculty of Engineering or the Faculty of Humanities with a GPA above 7.0 at the most recent review and who have shown leadership and involvement in university and/or community activities.

THE MCMASTER GLOBAL EXPERIENCE EXCHANGE BURSARY

Established in 2018 by McMaster University to support global learning opportunities.

Requirements: To be granted to undergraduate students enrolled in any program who are participating in a formal McMaster Exchange and who demonstrate financial need.

THE QUEEN ELIZABETH II INTERNATIONAL TRAVEL BURSARY

Established in 2015 by Arnold Beale, B.Sc. (Class of '68), B.A. (Class of '83) in honour of Her Majesty Queen Elizabeth II, who became the longest-reigning British monarch on September 9, 2015.

Requirements: To be granted to an undergraduate student participating in an international exchange program who demonstrates financial need. Preference will be given to a student travelling to a Commonwealth country.

THE RANDOLPH E. ROSS MEMORIAL BURSARY

Established in 1998 by family and friends in memory of Dr. Randolph E. Ross, who was a dedicated and cherished faculty member for over 25 years at McMaster University.

Requirements: To be granted to a student enrolled in the School of Business or the Engineering and Management Program. Preference will be given to a McMaster student participating in an international exchange program.

THE JAMES MASON YOUNG BURSARY

Established in 1996 by James Mason Young in honour of his family's long-standing association with McMaster University.

Requirements: A variable number of bursaries to be granted to students enrolled in the Faculty of Business who demonstrate financial need. Preference to be given to students participating in a formal McMaster Exchange Program.

Bursaries for the Michael G. DeGroot School of Medicine

MICHAEL G. DEGROOTE SCHOOL OF MEDICINE AID REGULATIONS

Emergency Bursary Regulations for School Of Medicine (M.D) Students

1. An Emergency Bursary is a non-repayable grant sometimes available to students enrolled in the M.D. Program who find themselves in extreme circumstances or are experiencing unexpected financial hardship.
2. Students with emergency needs must meet with the designated representative from their M.D. Program Office to discuss their financial circumstances.
3. Students are required to complete a bursary application.
4. Students may be required to submit supporting documentation to confirm financial need and/or extreme circumstances, as determined by their M.D. Program Office.
5. The M.D. Program Office determines eligibility for emergency support.
6. All Emergency Bursary payments are disbursed through the McMaster Student Account.

Medicine (M.D) Bursary Regulations

1. M.D. Bursaries are non-repayable grants, allocated on the basis of demonstrated financial need, which may also include a minimum expectation of academic achievement or other miscellaneous criteria.
2. M.D. Bursaries are available to students in good standing enrolled in the M.D. Program.
3. M.D. Bursaries are available to students who are Canadian Citizens, Permanent Residents, Convention Refugees or Protected Persons of Canada.
4. Students who are not Canadian Citizens, Permanent Residents, Convention Refugees or Protected Persons of Canada are not eligible for M.D. Bursaries.
5. M.D. Bursaries are allocated on the basis of highest financial need, as demonstrated through a completed Canadian federal and/or provincial government student aid application (e.g. full-time OSAP), completed standard University need profiles and/or discussions with designated staff on campus (e.g. the M.D. Program Office) who confirm the need for bursary assistance through submission of additional supporting documentation, for the academic year in which the student is being considered.
6. M.D. Bursaries are allocated in adherence with the Ministry Training, Colleges and Universities (MTCU) policies, procedures and guidelines in place for the given academic year. The MTCU Student Access Guarantee (SAG) currently specifies bursary amounts and payment deadlines for M.D. Program students. M.D. Program students who are eligible for SAG will receive bursary support without need of an application.
7. M.D. Program students may receive more than one M.D. Bursary up to the amount for which they are eligible.
8. The greater demonstrated financial need is used to break any tie.
9. M.D. Bursaries may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements.
10. In order to be considered for an M.D. Bursary that is a named donor bursary, students must submit a completed application by the specified deadline date.
11. All M.D. Bursary applications are evaluated for eligibility, and reviewed and ranked according to level of financial need. A selection committee may be struck depending on the bursary and donor requirements.
12. Students must be enrolled in the M.D. Program to have the M.D. Bursary payment processed.
13. If an M.D. Bursary is renewable, students must meet the renewal requirements specified in the bursary terms to receive a renewal payment.

14. All M.D. Bursary payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the M.D. Program Office.
15. All M.D. Bursaries are typically disbursed no later than the end of November.
16. Forfeiture of a renewable M.D. Bursary also cancels all future instalments of the bursary.
17. Change in course load may result in forfeiture or adjustment in the value of the M.D. Bursary. Students are advised to consult with their M.D. Program Office prior to making any changes to their course load.
18. Students who withdraw or take a leave of absence from the program may see an adjustment in the value of their M.D. Bursary or see the full amount returned to the University.
19. Any adjustment made to a student's account, in order to return all or a portion of an M.D. Bursary to the University, will be calculated on the balance available at the time of the adjustment and will not put a student's account into deficit.
20. The University may choose not to grant an M.D. Bursary in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for bursaries by application, where complete applications have not been received.
21. The University may remove specific M.D. Bursaries from the University Calendar, may revise the terms and stated value and/or suspend the granting of M.D. Bursaries (e.g. donor funds).
22. M.D. Bursaries supported by donor funds may have additional eligibility requirements.

THE AVERBUCH FAMILY MD BURSARY FOR NEW CANADIANS

Established in 2016 by Max and Wendy Averbuch.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine, who is a permanent resident of Canada and demonstrates financial need. Preference will be given to students who are new to Canada. Applicants must declare their immigrant status.

THE IVANA BALDELLI BURSARY

Established in 2015 by Ivana Baldelli, B.A. (Class of '70).

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need. Preference will be given to a student participating in medical research, attending the Niagara Regional Campus. Students must submit a separate letter outlining their research.

THE JOANNE BOMBEN BURSARY

Established in 2008 by Frank Bomben and his children Kayley and Jeffrey, in recognition and memory of a loving wife and mother, Joanne (nee Butters).

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine in good academic standing who demonstrate financial need. Preference will be given to students with an interest in pediatrics. Applicants must submit a separate letter indicating the details of their interest in pediatrics; for example, by taking an approved elective or an educational or research project in the field of pediatrics.

THE DR. KEYNA BRACKEN BURSARY

Established in 2015 by Dr. Keyna Bracken to provide financial assistance to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

Requirements: Preference will be given to a student with an interest in primary care in women's and children's health.

THE J.W. HARRY BUTCHER BURSARY

Established in 1991 in memory of Joseph William Henry Butcher, commonly known as Harry Butcher, who died at the age of 79 after a long battle with cancer. **Requirements:** To be granted to students enrolled in the Michael G. DeGroot School of Medicine. One (or more) bursaries of approximately one year's tuition to assist a medical student who is a permanent resident of Canada and in need of financial assistance.

THE MOLSON C. CAIN MEDICAL BURSARY

Established in 2017 by the estate of Molson C. Cain. **Requirements:** To be granted to students enrolled in the Michael G. DeGroot School of Medicine at McMaster University who demonstrate financial need.

THE CANADIAN MEDICAL ASSOCIATION 150TH ANNIVERSARY BURSARY

Established in 2017 by the Canadian Medical Association Foundation in honour of the CMA's 150th anniversary. **Requirements:** To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine, who demonstrates significant financial need, and is Canadian citizen, permanent resident, or person with protected/refugee status. Preference may be given to members of the Canadian Medical Association.

THE CANADIAN MEDICAL FOUNDATION (CMF) BURSARY

Established in 2015 by the Canadian Medical Foundation. **Requirements:** To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Preference will be given to Indigenous students.

THE DR. LEO CELLINI CLASS OF '84 BURSARY

Established in 2004 in honour of the memory of Dr. Leo Cellini by his classmates, M.D. Class of 1984, at their Class Reunion. **Requirements:** To be granted to a third year student in the Michael G. DeGroot School of Medicine who aspires to work with less fortunate patients in the inner-city. Awarded to a medical student in financial need. Must be a resident of Ontario for at least one year.

THE MARY LILLIAN CHAPMAN MEMORIAL FUND

Established in 2018 by the estate of Nancy Mary Chapman. **Requirements:** To be granted to students enrolled in the Michael G. DeGroot School of Medicine at McMaster University who demonstrate financial need.

THE PATRICK SHING LUNG CHEUNG AND IVY HEONG NGAN CHAN AWARD

Established in 2011 by Dr. Francesca Ting Yan Cheung, M.D. (Class of '06) CCFP, to honour her parents, Mr. Patrick Shing Lung Cheung and Mrs. Ivy Heong Ngan Chan. **Requirements:** To be granted to students enrolled in the Michael G. DeGroot School of Medicine with an interest in Family Medicine who are in good academic standing and demonstrate financial need. Preference will be given to students who are newcomers to Canada. Applicants must submit a separate letter indicating the details of their interest in Family Medicine and their immigrant status.

THE CHOLOWSKY FAMILY MULTIPLE SCLEROSIS BURSARY

Established in 2002 by Mrs. Tania Cholowsky. **Requirements:** To be granted to students enrolled in the Michael G. DeGroot School of Medicine who are in good academic standing and are completing an approved elective, educational or research project in the field of Multiple Sclerosis or the broader area of Neurology.

THE CIBC MEDICAL BURSARIES IN BREAST CANCER

Established in 2004 by CIBC in support of CIBC's belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be granted first to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need and are completing an approved elective, educational or research project in the field of breast cancer and, alternatively, to students who are completing an approved elective, educational or research project in the field of women's health, obstetrics, gynecology or medical oncology.

THE CLINICAL EDUCATION LEADERS BURSARY FUND

Established in 2017 by clinical educators in the Niagara region. **Requirements:** To be awarded to a student from the Niagara Regional Campus of the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE DR. MARK COHEN PRIZE IN OPHTHALMOLOGY

Established in 2010 by Dr. Mark Cohen. **Requirements:** To be awarded to an undergraduate medical student in the Michael G. DeGroot School of Medicine who has been accepted into an ophthalmology residency program in Canada and demonstrates academic excellence.

THE COMMUNITY LEADERS FOUNDATION BURSARY

Established in 2013 by the Community Leaders Foundation. **Requirements:** To be awarded to students enrolled at the Niagara Regional Campus of the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE RICHARD DAY BURSARY

Established in 2018 by Dr. Richard Day, MD (Class of '79) in recognition of the goodwill that was shown to him during his days at McMaster. **Requirements:** To be granted to students enrolled in the Michael G. DeGroot School of Medicine, in the Faculty of Health Sciences, who demonstrate financial need.

THE MICHAEL G. DEGROOTE SCHOOL OF MEDICINE BURSARY

Established in 2005. **Requirements:** To be granted to an undergraduate student in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE DEPARTMENT OF BIOCHEMISTRY & BIOMEDICAL SCIENCES BURSARY

Established in 2004. **Requirements:** This bursary is available to Medical students with financial need who have resided in Ontario for one year prior to receiving the bursary. The award will recognize the student's capacity to contribute to the study of cancer through their learning.

THE DEPARTMENT OF MEDICINE BURSARY

Established in 2004. **Requirements:** The bursary is available to Medical students with financial need who have resided in Ontario for one year prior to receiving the bursary. The award will recognize the student's excellence in academic endeavour and capacity to contribute to the field of medicine through their learning.

THE SAVITRI DEVI BURSARY

Established in 2013 by Dr. Indra Rastogi in honour of her mother Savitri Devi. **Requirements:** To be granted to female students in the Michael G. DeGroot School of Medicine who demonstrate financial need and maintain a good academic standing.

THE SEETA ETWAROO MEMORIAL BURSARY

Established in 2017 by Brendan Singh and Chad Singh to honour their aunt, Seeta Etwaroo, and her courageous fight against cancer. **Requirements:** To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

Value: \$1,000

THE RON AND GINA FRASER HEALTH SCIENCES BURSARY

Established in 2005 by The Ronald K. Fraser Foundation and Gina E. Fraser with a mandate to provide university tuition funding for students in the highest financial need who enter full-time study in the Bachelor of Health Sciences Program in the Faculty of Health Sciences at McMaster University.

Requirements: The amount of the bursary is equivalent to one year of tuition and would be available for each of the four years in the Bachelor of Health Sciences Program on the condition of both continued good academic standing and financial need. If the bursary recipient decides to pursue a career in medicine and is accepted into the Michael G. DeGroot School of Medicine, the tuition bursary would be available for each of the three years in medical school or if the bursary recipient decides to pursue a career in biomedical engineering and is accepted into the Graduate Program in Biomedical Engineering, the tuition bursary would be available for each of the five years in biomedical engineering at McMaster University.

THE GENERAL MEDICAL BURSARY

Established in 1970 by the School of Medicine and its associated faculty members and physicians.

Requirements: To be awarded to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE FRIEDMAN-GROSSMAN BURSARY

Established in 2012 by Dr. Yael Friedman and Paul Grossman, in honour of Musia Friedman and in loving memory of Jasza Friedman, Pola and Zysia Zylber, Ann and Harold Linton, and Irvine and Hannah Grossman.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE DANIEL GIANNINI BURSARY

Established in 1998 by Mr. Daniel Giannini.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine to provide financial assistance with tuition fees in order to further education in the medical field. A student who receives the award in the first year would be eligible to continue to receive the award for their second and third years of study, providing they maintain a good academic standing. Student must be a graduate from a publicly-funded secondary school in the Hamilton or Burlington area and participate in community activities in the Hamilton or Burlington area.

THE DR. JOHN GRANTON MEDICAL BURSARY

Established in 2009 by Dr. John Granton, M.D. (Class of '87) to provide financial support for medical students who wish to pursue their educational goals.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE SAYRA AND ABDUL HAI BURSARY FOR INSPIRING CHANGE

Established in 2013 by Sayma Hai to honour her parents who instilled in her the importance of education and giving back to one's community.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need and maintains good academic standing. To be granted to students who have demonstrated an interest in pursuing a career in Cardiology or Internal Medicine. Applicants must submit a separate letter indicating the details of their interest in Cardiology or Internal Medicine.

THE ALFRED THEODORE HAINES AND FORSTER HAINES BURSARY

Established in 2014 through the bequest of Alfreda Haines (Class of '35).

Requirements: To be granted to students in the Michael G. DeGroot School of Medicine at McMaster University who demonstrate financial need. Preference will be given to a student who demonstrates interest in homeopathic medicine.

THE DR. GAIL HENNING MEMORIAL BURSARY

Established in 2000 by William J. Henning in loving memory of his daughter, Dr. Gail Patricia Henning, who worked on the staff of McMaster Medical Centre and in private practice as a psychiatrist from 1978 until her death in 1990.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine in financial need who choose to complete electives in Psychiatry with the intention to pursue a career in psychoanalysis.

THE FERRARA KENNEDY BURSARY

Established in 2007 by Mario Ferrara, B.Com. (Class of '70), M.B.A. (Class of '74) and Annabel Kennedy.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need. Preference will be given to a student attending the Niagara campus.

THE KILPATRICK SCHOLARSHIP IN MEDICINE

Established in 2018 from the estate of Eleanor Jean McLeish.

Requirements: To be awarded to students enrolled in the Michael G. DeGroot School of Medicine who best exhibit academic excellence and demonstrate financial need.

THE JOSEPH & JOANNE LEE BURSARY

Established by Joseph (Class of '72) and Joanne Lee.

Requirements: To provide financial assistance for Undergraduate Medical students in the Michael G. DeGroot School of Medicine who demonstrate financial need and would like to further their education and training in the area of Inflammatory Bowel Disease or Crohn's Disease by way of an elective or research.

THE SAU-MI LEE MEMORIAL BURSARY

Established in 2005 by Dr. Carl Lee (M.D. Class of '99) in memory of his mother Sau-Mi Lee.

Requirements: To be granted to a medical student in good standing who is enrolled in the second or third year of the Michael G. DeGroot School of Medicine, is planning to continue training in Family Medicine, and has demonstrated participation in extracurricular activities.

THE DR. VICTORIA LEE BURSARY

Established in 2005 by Victoria Lee (M.D. Class of 1982), FRCPC.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need and are completing an approved elective, educational or research project in the field of psychiatry or geriatric medicine. Preference will be given to students completing an approved elective, educational or research project in geriatric psychiatry.

THE DR. VICTORIA LEE BURSARY FOR INDIGENOUS MD STUDENTS

Established in 2016 by Victoria Lee (Class of '82) in support of her belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be granted to indigenous students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Note: Students may be asked to provide proof of indigenous ancestry.

THE DR. LEONARD E. LEVINE BURSARY

Established in 2006 by the Estate of Dr. Leonard E. Levine, retired McMaster University Professor.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Preference will be given to students showing interest in Lymphoma or Leukemia research or participating in a related elective.

THE LEW-KING LI AND YUN-FANG LI AWARD

Established in 2012 by Dr. Shao-Jin Gene Li to honour his parents, Lew-King Li, and Yun-Fang Li.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need and maintains good academic standing. Preference will be given to students who are new to Canada within the last five years. Applicants must declare their immigrant status.

THE MAGENHEIM FAMILY MEDICAL EDUCATION TRAVEL BURSARY

Established in 2006 by Dr. Mark J. Magenheimer, M.D. (Class of 1974), in honour of his parents Milton David and Dolores Ella Magenheimer.

Requirements: To be granted to an undergraduate medical student taking an international elective in Public Health and/or Preventative Medicine outside Canada who demonstrates financial need. Electives in the US are acceptable provided they focus primarily on addressing needs in an underserved rural urban area with documented disproportionately high public health problems and low resources. Students must submit an application, separate cover letter outlining how the elective meets these criteria and a letter of acceptance from the proposed supervisor. Upon completion of the elective, the successful candidate will work with the Program Administrator of the Undergraduate Medical Program to identify an appropriate venue to share his/her experience in a public forum with others. Recipients of the bursary are required to prepare a report of their elective experience which the Administrator of the Undergraduate Medical Program will forward to the founder of the award. The report can be brief (2-5 pages) and should indicate where the elective time was spent, with whom, knowledge acquired from the experience, overview of activities conducted, assessment of health issues observed and/or addressed, evaluative analysis and overview of goals attained or not, and recommendations plus lessons learned to assist other McMaster M.D. Students. Must be a resident of Ontario for at least one year.

THE DR. CHERYL AND KYLE MARSHALL BURSARY

Established in 2010 by Dr. C.P. Marshall, MBBS (UW), FRCP (C).

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine at McMaster University who demonstrates financial need. Preference will be given to a sole support parent.

THE PETER MAURER NORTHERN HEALTH BURSARY

Established in 1991 in memory of Peter Maurer, Administrative Officer for the Faculty of Health Sciences at McMaster and later, Administrator of the Lakehead/McMaster Link Project in Thunder Bay.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need and are pursuing electives in northern Ontario via the Northern Ontario School of Medicine (NOSM).

THE DR. BARBARA MCAULEY MEMORIAL BURSARY

Established in 2012 by the family, friends and colleagues of Dr. Barbara McAuley, a respected physician from the Niagara region.

Requirements: To be granted to a student enrolled at the Niagara Regional Campus of the Michael G. DeGroot School of Medicine who demonstrates financial need. Preference will be given to students who are mothers and/or students with a nursing background.

THE DRs. ANDREW AND ANNETTE MCCALLUM MEDICAL BURSARY

Established in 2016 by Dr. Andrew McCallum (Class of '80, MD), and Dr. Annette McCallum (Class of '91, MD) to provide financial support for medical students who wish to pursue their educational goals.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine at McMaster University who demonstrates financial need.

THE EVELYN MCGLOIN SCHOLARSHIP

Established in 2014 by the Heart and Stroke Foundation of Canada. To be awarded to students enrolled in the Michael G. DeGroot School of Medicine who have completed at least their first year of medical school.

Requirements: The award will provide valuable research training and experience over the summer (June through August) under the supervision and tutelage of established scientific investigators.

THE MCMASTER UNIVERSITY M.D. PROGRAM BURSARY

Established in 2007.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1972 BURSARY

Established in 2012 by the M.D. Class of 1972 to commemorate their 40th anniversary.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1973 BURSARY

Established in 2013 by the McMaster University M.D. Class of 1973.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1974 BURSARY

Established in 2013 by the McMaster University M.D. Class of 1974.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE M.D. CLASS OF 1975 BURSARY

Established in 2005 by the M.D. Class of 1975 in honour of their 30th reunion.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Student must be a resident of Ontario for at least one year.

THE M.D. CLASS OF 1976 BURSARY

Established in 2006 by the M.D. Class of 1976 in honour of their 30th reunion.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Student must be a resident of Ontario for at least one year.

THE M.D. CLASS OF 1977 BURSARY

Established in 2007 by the M.D. Class of 1977 in honour of their 30th reunion.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Student must be a resident of Ontario for at least one year.

THE MCMASTER M.D. CLASS OF 1978 BURSARY

Established in 2013 by the McMaster University M.D. Class of 1978.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1979 BURSARY

Established in 2013 by the McMaster University M.D. Class of 1979.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE M.D. CLASS OF 1980 GYAN AHUJA BURSARY

Established in 2005 by the M.D. Class of 1980 in honour of their 25th reunion and in memory of their classmate Gyan Ahuja.

Requirements: To be granted to students enrolled in the M.D. Undergraduate Program who demonstrate financial need and who, in the judgment of the Michael G. DeGroot School of Medicine, demonstrate a lively interest in humanitarian contributions to society and issues affecting third world developing countries.

THE M.D. CLASS OF 1981 BURSARY

Established in 2006 by the M.D. Class of 1981 in honour of their 25th reunion.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Student must be a resident of Ontario for at least one year.

THE M.D. CLASS OF 1982 BURSARY

Established in 2007 by the M.D. Class of 1982 in honour of their 25th reunion.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Must be a resident of Ontario for at least one year.

THE MCMASTER M.D. CLASS OF 1983 BURSARY

Established in 2013 by the McMaster University M.D. Class of 1983.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1987 BURSARY

Established in 2012 by the M.D. Class of 1987 to commemorate their 25th anniversary.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1988 BURSARY

Established in 2013 by the McMaster University M.D. Class of 1988.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1989 BURSARY

Established in 2013 by the McMaster University M.D. Class of 1989.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1990 BURSARY

Established in 2013 by the McMaster University M.D. Class of 1990.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER UNIVERSITY M.D. CLASS OF 1991 BURSARY

Established by the M.D. Class of 1991 to commemorate their 20th anniversary.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 1992 BURSARY

Established in 2012 by the M.D. Class of 1992 to commemorate their 20th anniversary.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE M.D. CLASS OF 1995 BURSARY

Established in 2007 by the M.D. Class of 1995 in honour of their 10th reunion.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Preference will be given to a mature student.

THE M.D. CLASS OF 1996 BURSARY

Established in 2006 by the M.D. Class of 1996 in honour of their 10th reunion.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE MCMASTER M.D. CLASS OF 2002 BURSARY

Established in 2012 by the M.D. Class of 2002 to commemorate their 10th anniversary.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER UNIVERSITY M.D. CLASS OF 2011 BURSARY

Established by the M.D. Class of 2011 as a class gift to the M.D. Program.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER M.D. CLASS OF 2012 BURSARY

Established in 2012 by the McMaster University M.D. Class of 2012.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER UNIVERSITY M.D. CLASS OF 2013 SHANE DANIELL AND ISKREN KANTCHEV MEMORIAL BURSARY

Established in 2011 by the M.D. Class of 2013 to honour the memory of their classmates, Shane Daniell and Iskren Kantchev.

Requirements: To be granted to students enrolled in the M.D. undergraduate program who demonstrate financial need. Preference will be given to students who have demonstrated an interest in Global Health.

THE MCMASTER MD CLASS OF 2014 BURSARY

Established in 2014 by the McMaster University MD Class of 2014.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER MD CLASS OF 2015 BURSARY

Established in 2015 by the McMaster University MD Class of 2015.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE MCMASTER MD CLASS OF 2016 BURSARY

Established in 2016 by the McMaster University MD Class of 2016.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE DR. JOHN THOMAS WILLIAM MCWHINNIE BURSARY

Established in 2014 by the estate of Betty Milne McWhinnie.

Requirements: To be awarded to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need and show an interest in human sexuality through study and/or research.

THE MEDICAL STUDENT OPPORTUNITY TRUST BURSARY

Established in 2001 from a variety of financial contributions which were donated to help medical students.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine in financial need.

THE FRANK C. MILLER JR. BURSARY

Established in 2011 by the Hamilton Community Foundation.

Requirements: To be granted annually to provide financial assistance to cover up to fifty percent of tuition and up to fifty percent of compulsory fees to up to four

undergraduate medical students in the Michael G. DeGroot School of Medicine who demonstrate financial need, a desire to learn, and a willingness to participate in the Hamilton community. Preference will be given to entry level students.

THE ORVILLE J. MIREHOUSE MEMORIAL BURSARY

Established in 2007 by family and friends in memory of Dr. Orville J. Mirehouse, M.D., a pioneering plastic surgeon and mentor.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE ADRACHES (ARCHIE) YIAN MOUGHALIAN MEMORIAL BURSARY

Established in 1998 from the estate of Mr. Adraches (Archie) Yian Moughalian.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine to provide financial assistance to further their education in the medical field.

THE DRS. RICHARD AND TAMAR PACKER M.D. BURSARY

Established by Dr. Tamar Packer and Dr. Richard Packer to commemorate their 25th anniversaries as graduates of the McMaster M.D. Program in 2011/2012.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Preference will be given to a student who is a Hamilton resident.

THE DR. ADRIAN PARK MEDICAL BURSARY

Established in 2018 by Dr. Adrian Park, MD (Class of '87).

Requirements: To be granted to students in the Michael G. DeGroot School of Medicine who demonstrate financial need and an interest in a career in surgery. Preference will be given to students with an interest in mission-based surgery.

THE JANET PATERSON MUIR BURSARY

Established in 2009 by the bequest of Janet Paterson Muir.

Requirements: One or more bursaries to be granted to full-time students in the undergraduate medical program of the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE JOSEPH AND EDITH NAGY BURSARY

Established in 2018 by Jo-Anne Ferns in memory of her parents who always held medical doctors in high regard and were grateful for their cardiology and oncology care.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need. Preference will be given to students who demonstrate professionalism and compassion.

THE DR. BRYAN PEARSE FAMILY BURSARY

Established in 2013 by Dr. Bryan Pearse, M.D. (Class of '75) in memory of his sister Nancy Katherine.

Requirements: To be granted to an undergraduate medical student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE DR. SUSAN BEVERLEY PLANK MEMORIAL BURSARY

Established in 1997 by Mr. William J. Plank, family and friends, in memory of Dr. Susan Beverley Plank (Class of '90).

Requirements: To be granted to a student who demonstrates financial need and is enrolled in the Faculty of Health Sciences, School of Medicine.

THE RONALD PYE BURSARY

Established in 2000 by Dr. Ronald Pye (Class of 1979).

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine based on good academic standing and financial need.

THE BENJAMIN, SAMANTHA, THOMAS AND KATE RAGONETTI MEDICAL BURSARY

Established in 1999 by Dr. Chris Ragonetti and family.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need and maintains good academic standing.

THE RIPLEY BURSARIES

Established in 1998.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE SALENA FAMILY BURSARY

Established in 1997 under the McMaster Student Opportunity Fund initiative by Dr. Bruno Salena (Class of '81), full-time faculty member in the Faculty of Health Sciences, and his family.

Requirements: To be granted to a student who demonstrates financial need and is enrolled in the Faculty of Health Sciences, School of Medicine.

THE SCHENKEL MEDICAL ASSISTANCE BURSARY

Established in 1982.

Requirements: To provide books, equipment and bursaries for female students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE SHOALTS FAMILY BURSARY

Established in 2016 by Todd and Kerry Shoalts.

Requirements: To be granted to a student enrolled in the Niagara Regional Campus (NRC) of the Michael G. DeGroot School of Medicine who demonstrates financial need. Preference will be given to individuals (a) from the Niagara region (or another small community, i.e. population < 100,000), and (b) with a demonstrated interest in elder care or family medicine.

THE SCOTIABANK BREAST CANCER SCHOLARSHIP

Established in 1999 by the Bank of Nova Scotia.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine to further their education and training in the area of breast cancer.

THE SCOTIABANK MEDICAL SCHOLARSHIPS/BURSARIES

Established in 1999 by the Bank of Nova Scotia.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine based on good academic standing and financial need.

THE SCOTIABANK MEDICAL SCHOLARSHIPS

Established in 2004 by Scotiabank.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine based on good academic standing and financial need.

THE SCOTIABANK PEDIATRIC MEDICAL BURSARY

Established in 2004 by Scotiabank.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who are residents of Ontario, in good academic standing, demonstrate financial need and who are completing an approved elective, educational or research project in the field of Pediatrics.

THE ALBERT JOHN SMITH MEDICAL BURSARY

Established in 2015 by the bequest of Albert John Smith.

Requirements: To be awarded to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE STOBBE GLOBAL HEALTH BURSARY FUND

Established in 2017 by faculty, students, staff and friends of Dr. Karl Stobbe, the inaugural Regional Assistant Dean of the Niagara Regional Campus (NRC) of the Michael G. DeGroot School of Medicine.

Requirements: To be granted to students enrolled at the NRC who demonstrate financial need and will be pursuing further education in the area of global health.

THE GERRY AND SYLVIA SMITH BURSARY

Established in 2007 by Gerry Smith, B.Com. (Class of '71), M.B.A. (Class of '75) and Sylvia Smith because of their belief in the value of education.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need. Preference will be given to students from Simcoe County.

THE DR. GARY STEIN BURSARY IN MEDICINE

Established in 2011 by Gary Stein, M.D. (Class of '77).

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE STOBBE BURSARY

Established in 2016 by Karl and Julie Stobbe.

Requirements: To be granted to a student enrolled in the Niagara Regional Campus (NRC) of the Michael G. DeGroot School of Medicine who demonstrates financial need. If there are no eligible students from the NRC in a given year, no bursary will be granted and funds will be carried forward to support NRC students in future years.

THE DANIEL AND NATALIE STRUB BURSARY

Established in 1999 by the nieces and nephews of Daniel and Natalie Strub in their honour.

Requirements: To be granted to an undergraduate student enrolled in the Michael G. DeGroot School of Medicine to provide financial assistance to further their education in the medical field. Awarded to medical students in financial need who have completed an academic elective, or have special interest, in stroke recovery, leukemia or blood disorders.

THE ANDREW TALALLA MEMORIAL BURSARY FUND

Established in 2000 in the memory of Dr. Andrew Talalla, a Neurosurgeon at McMaster University.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine to provide financial assistance in the payment of their tuition fees in order to further education in the medical field. Preference will be given to students who are interested in a career in Neurosurgery.

THE MARY THOMAS BURSARY

Established in 2015 by bequest of Lilian Mary Eleanor Thomas.

Requirements: To be awarded to a female student in the Michael G. DeGroot School of Medicine who is a resident of Ontario, and who demonstrates financial need.

THE RUTH TOMLINSON MEMORIAL BURSARIES

Established in 1995 through a bequest of the late Ruth Nourse Tomlinson Wilson. Ruth Tomlinson was a professional artist born in Chicago, USA in 1908. She resided in Canada from 1917 to 1957 and moved to Chelsea, England until her death in 1994. Ruth Tomlinson was proud of her Canadian citizenship and, after attending the opening ceremony of the Medical School at McMaster University, she decided to bequeath a portion of her estate to create bursaries for medical students.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who are in good academic standing and who show evidence

that they require financial support to complete their medical education training program.

THE UCHIDA FUND FOR MD ELECTIVES

Established in 2014 from the estate of Dr. Irene A. Uchida, Professor Emeritus at McMaster, in recognition of her years of service in the Faculty of Health Sciences, and as a contribution to the promotion of good health care by graduates of McMaster University.

Requirements: To be awarded to students enrolled in the Michael G. DeGroot School of Medicine who are pursuing electives in underserved areas of Canada or in developing countries.

THE WILLIAM A. VANDERBURGH ESTATE BURSARY

Established in 1968 via the estate of Mr. William Andrew Vanderburgh Jr. in honour of his father.

Requirements: To be awarded to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE WANG MD BURSARY FOR NEWCOMERS

Established in 2015 by the Wang family. To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

Requirements: Preference will be given to students who are new to Canada within the last 5 years. Applicants must declare their immigrant status.

THE WENDY WANG BURSARY IN MEDICINE

Established in 2007 by Stanley Yip, B.Sc. (Class of '86) in honour of his wife, Wendy Wang.

Requirements: To be granted to a student enrolled in the Michael G. DeGroot School of Medicine who demonstrates financial need.

THE HENRY AND SYLVIA WONG BURSARY IN MEDICINE

Established in 2004 by Dr. Henry Wong and Mrs. Sylvia Wong.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE DR. HENRY AND SYLVIA WONG FAMILY BURSARY

Established in 2017 by Dr. Henry Wong and Mrs. Sylvia Wong.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who demonstrate financial need.

THE WALLY ZIMMERMAN CML HEALTHCARE BURSARY

Established in 2009 in honour of Wally Zimmerman by CML Healthcare Inc.

Requirements: To be granted to students enrolled in the Michael G. DeGroot School of Medicine who best exhibit a combination of academic excellence and community service. Applicants must submit a separate letter indicating the details of their community service and financial need.

Physician Assistant Education Program Bursaries**PHYSICIAN ASSISTANT PROGRAM BURSARY REGULATIONS**

1. Physician Assistant Bursaries are non-repayable grants, allocated on the basis of demonstrated financial need, which may also include a minimum expectation of academic achievement or other miscellaneous criteria.
2. Physician Assistant Bursaries are available to students enrolled in the Physician Assistant Program.
3. Physician Assistant Bursaries are available to students who are Canadian Citizens, Permanent Residents, Convention Refugees or Protected Persons of Canada.

4. Physician Assistant Bursaries are automatically allocated on the basis of financial need as demonstrated through a completed full-time OSAP application.
5. Physician Assistant Bursaries are allocated in adherence with the Ministry of Training, Colleges and Universities (MTCU) policies, procedures and guidelines in place for the given academic year. The MTCU Student Access Guarantee (SAG) currently specifies bursary amounts and payment deadlines for Physician Assistant Bursaries.
6. Physician Assistant Program students may receive more than one bursary up to the amount for which they are eligible.
7. The greater demonstrated financial need is used to break any tie.
8. Students must be enrolled in the Physician Assistant Program to have a bursary payment processed.
9. If a Physician Assistant Bursary is renewable, students must meet the renewal requirements specified in the bursary terms to receive a renewal payment.
10. All Physician Assistant Bursary payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
11. All Physician Assistant Bursary payments are typically disbursed no later than the end of November.
12. Forfeiture of a renewable Physician Assistant Bursary also cancels all future instalments of the bursary.
13. Students wishing to defer the benefits of bursary renewal to the next academic year should make the request in writing to the Physician Assistant Program Office. Approval is not automatic and deferrals are not normally granted for more than one academic year.
14. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the Physician Assistant Bursary.
15. Students who withdraw may see an adjustment in the value of their Physician Assistant Bursary or see the full amount returned to the University.
16. Any adjustment made to a student's account, in order to return all or a portion of a Physician Assistant Bursary to the University, will be calculated on the balance available at the time of the adjustment and will not put a student's account into deficit.
17. The University may choose not to grant a Physician Assistant Bursary in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for bursaries by application, where complete applications have not been received.
18. The University may remove specific Physician Assistant Bursaries from the University Calendar, may revise the terms and stated value and/or suspend the granting of Physician Assistant Bursaries (e.g. donor funds).
19. Physician Assistant Bursaries supported by donor funds may have additional eligibility requirements.

THE BIRCH ISLAND PHYSICIAN ASSISTANT BURSARY

Established in 2014 by R.B. (Biff) and Sue Matthews.

Requirements: To be awarded to students enrolled in the Physician Assistant Education Program of the Michael G. DeGroote School of Medicine who demonstrate financial need.

Value: \$1,000

Work Programs

McMASTER WORK PROGRAM REGULATIONS

1. Work Programs provide meaningful employment opportunities, with approved University employers, to students who demonstrate financial need.
2. Students with completed full-time Canadian federal and/or provincial government student aid applications (e.g. full-time OSAP) with a calculated entitlement of at least \$1 demonstrate financial need for the purpose of Work Program participation.
3. Students without government aid applications, including Indigenous students, International students, students with government aid restrictions, students with permanent disabilities studying at a lesser course load, Nursing students at the Mohawk site, and students on Social Assistance who complete a standard University need profile and show at least \$1 in need demonstrate financial need for the purpose of Work Program participation.
4. Students who meet with designated staff on campus (e.g. a Student Loans Officer) who confirm the need for Work Program assistance through submission of additional supporting documentation demonstrate financial need for the purpose of Work Program participation.
5. International Students with a valid study permit are able to participate in Work Programs.
6. Students wishing to participate in the fall and/or winter terms must be enrolled in the terms in which they wish to participate and must submit a complete Fall/Winter Work Program application through Mosaic by the specified deadline date.
7. Students wishing to participate in the summer term must have been in a full-time OSAP eligible course load in the preceding fall or winter term and must submit a complete Summer Work Program application through Mosaic by the specified deadline date.
8. Students are encouraged to apply for Work Program Approval as soon as the Work Program applications open, as there are more students interested in participating in Work Programs than jobs available.
9. Students approved for Work Program participation are provided a Work Program Approval notification in Mosaic.
10. Students approved for Work Program participation apply for approved positions posted under Career Opportunities in Mosaic. Job posting dates are advertised on the Office of the Registrar, Student Financial Aid & Scholarships website.
11. Students review approved positions and apply for those for which they feel they are qualified.
12. Students must provide a copy of their Work Program Approval when they apply to a position with a prospective employer.
13. Prospective employers review job applications and invite students to participate in their employee selection and hiring process. University employers use their own criteria for selecting eligible Work Program students for interview and/or hire.
14. Approval for Work Program participation does not guarantee the student will be hired for an approved Work Program position.
15. Approved Work Program students are restricted to accepting one Fall/Winter position and one Summer Work position in a given academic year.
16. Once hired, students may work no earlier than the published start date of the Work Program and no later than the published end date of the Work Program.
17. Employers and students must adhere to all applicable employment legislation and McMaster Human Resources' policies.
18. Students must maintain satisfactory work performance and attendance.

19. University employers have the right to terminate student employment where work performance and/or attendance is unsatisfactory.
20. Students are advised that employers may or may not recognize University mid-term recesses as a scheduled break from work and may or may not be able to accommodate requests for time off. Students should discuss work requirements with their employers.
21. Students must report enrolment status and work program earnings, as required, by their government aid program.
22. Students earn at least minimum wage and are paid by the hiring employer through Payroll.
23. The Office of the Registrar, Student Financial Aid & Scholarships, provides partial reimbursement of an approved Work Program student's salary to the employer from operating monies and donor trust funds.
24. The University may choose to no longer offer Work Programs and may choose to limit the number of approved participants due to funding limitations.
25. The University may remove specific Work Program funds from the University Calendar, may revise the terms and stated value and/or suspend the allocation of Work Program funds (e.g. donor funds).
26. Work Program participation supported by donor funds may have additional eligibility requirements.

Fall/Winter Work Programs

FALL/WINTER SPECIFIC REGULATIONS

1. The Fall/Winter Work Program is available to students who are Canadian Citizens, Permanent Residents, Conventional Refugees and Protected Persons of Canada enrolled in OSAP eligible Graduate and Medicine degree programs.
2. The Fall/Winter Work Program is available to students who are Canadian Citizens, Permanent Residents, Conventional Refugees and Protected Persons of Canada in OSAP eligible Undergraduate degree programs (including Nursing students at the Mohawk Site). Students who are not Canadian Citizens, Permanent Residents, Conventional Refugees or Protected Persons of Canada, in OSAP eligible Undergraduate degree programs (excluding Nursing students at the Mohawk Site), may participate in Level II or above.
3. Students may work no more than 10 hours per week on average, during the fall and/or winter terms, through an approved Work Program.
4. To maintain Fall/Winter Work Program eligibility, students must be enrolled in a full-time OSAP eligible course load or equivalent in the term(s) in which they would like to participate in the Work Program, from the time of application through approval, hiring and start of employment.
5. Students must remain enrolled in the term(s) in which they participate in the Work Program, from start of employment to end of employment. Should a student drop all classes in a term or withdraw from the institution, their Fall/Winter Work Program participation ends on the date of withdrawal.

Application details are available in Mosaic. Further information about our Work Programs is available at <http://sfas.mcmaster.ca>.

THE MCMASTER FALL/WINTER WORK PROGRAM

Established in 1996 by the University with the goal of creating meaningful employment opportunities for current students who demonstrate financial need.

Requirements: Students must be approved for the Fall/Winter Work Program through the Office of the Registrar, Student Financial Aid & Scholarships.

Summer Work Programs

SUMMER SPECIFIC REGULATIONS

1. The Summer Work Program is open to students who are Canadian Citizens, Permanent Residents, Conventional Refugees and Protected Persons of Canada enrolled in OSAP eligible Medicine programs.
2. The Summer Work Program is available to students who are Canadian Citizens, Permanent Residents, Conventional Refugees and Protected Persons of Canada in OSAP eligible Undergraduate degree programs (including Nursing students at the Mohawk Site) beginning in Level I.
3. In order to be eligible to participate in the Summer Work Program, students must be returning to continue their studies the following academic year (i.e. their degree will not be conferred in the June of the Summer Work Program term nor in the November immediately following the Summer Work Program).
4. Summer work positions may be part-time or full-time. Students may work no more than 40 hours per week during the summer term.

Application details are available in Mosaic. Further information about our Work Programs is available at <http://sfas.mcmaster.ca>.

THE R. ROSS CRAIG MEMORIAL FUND WORK PROGRAM

Established in 1997 in memory of R. Ross Craig. A variable number of employment opportunities made available to students in any program who demonstrate financial need.

Requirements: Students must be approved for the Summer Work Program through the Office of the Registrar, Student Financial Aid & Scholarships.

THE HAMLIN FAMILY FOUNDATION WORK PROGRAM

Established in 1996 by the Hamlin Family Foundation. A variable number of employment opportunities made to students in any program who demonstrate financial need.

Requirements: Preference will be given to students in disciplines related to the fields of Health Sciences and Engineering. To be eligible for consideration, students must be approved for the Summer Work Program through the Office of the Registrar, Student Financial Aid & Scholarships.

THE SALLY HORSFALL WORK PROGRAM

Established in 1996, the Offord Centre for Child Studies, McMaster University has a variable number of employment opportunities made available to students demonstrating financial need. These jobs will provide an opportunity for students to pursue research and/or assist with activities sponsored by the Centre.

Requirements: Students must be approved for the Summer Work Program through the Office of the Registrar, Student Financial Aid & Scholarships.

THE HUMANITIES COMMUNICATIONS CENTRE WORK ENDOWMENT

Established in 1997 by Edward and Margaret Lyons, McMaster alumni of the Class of '49 and later augmented by friends of The Edward and Margaret Lyons Humanities Communications Centre.

Requirements: A variable number of employment opportunities will be made available to students in any program who demonstrate financial need. Preference will be given to students in Humanities and Social Sciences. Students must be approved for the Summer Work Program through the Office of the Registrar, Student Financial Aid & Scholarships.

THE MCMASTER SUMMER WORK PROGRAM

Established in 1996 by the University with the goal of creating meaningful employment opportunities for current students who demonstrate financial need.

Requirements: Students must be approved for the Summer Work Program through the Office of the Registrar, Student Financial Aid & Scholarships.

AWARDS FOR UNDERGRADUATE STUDENTS

Academic Grants

Entrance Academic Grants

ENTRANCE ACADEMIC GRANT REGULATIONS

- Entrance Academic Grants are monetary awards allocated on the basis of academic merit, and in some cases other forms of earned merit, and demonstrated financial need.
- Entrance Academic Grants are available to students admitted full-time on the basis of high school admission requirements.
- Entrance Academic Grants are available to full-time and part-time students entering Level I of their first baccalaureate degree program.
- Students who have enrolled at any post-secondary institution after graduation from high school are not eligible for Entrance Academic Grant, unless:
 - They are completing a certificate or diploma at McMaster University as a requirement of admission (e.g. the McMaster English Language Diploma), and/or
 - They have withdrawn from post-secondary studies before attending or before the deadline to drop and add courses in their first term of study.
- Entrance Academic Grants are available to students who are Canadian Citizens or Permanent Residents of Canada regardless of where they completed their high school education.
- Students who are not Canadian Citizens or Permanent Residents of Canada are not eligible for Entrance Academic Grants regardless of where they completed their high school education.
- Entrance Academic Grants first consider one or more McMaster University calculated admission and scholarship averages (e.g. final admission average).
- Students must achieve a minimum 80% in the average(s) used to determine Entrance Academic Grant eligibility. An admission audition, portfolio score, or equivalent may be included in the calculation of an average.
- Averages for Entrance Academic Grants are calculated using the course grades that form the basis for admission to the Level I program. Final grades for courses completed after June 30th in the year of admission application will not be considered in assessing eligibility for Entrance Academic Grants.
- Entrance Academic Grants requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter.
- Entrance Academic Grants may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application, participating in an interview, performing an audition, or developing a portfolio.
- In order to be considered for an Entrance Academic Grant by application, students must submit a complete application by the specified deadline date.
- Entrance Academic Grant applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
- Entrance Academic Grants are allocated on the basis of an eligible course load and financial need as determined by a completed full-time OSAP

application for the academic year in which the student is entering Level I of their program.

- The greater calculated financial need is used to break any tie.
- Students may receive a maximum of one Entrance Academic Grant.
- Students must be enrolled in at least the full-time OSAP eligible course load used to determine their eligibility to have an Entrance Academic Grant payment processed.
- All Entrance Academic Grant payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
- Entrance Academic Grants are disbursed September through the end of December.
- Entrance Academic Grant recipients will have their awards noted on their University transcript.
- Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the Entrance Academic Grant. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
- Students who withdraw before November 1 will forfeit their Entrance Academic Grant.
- Students who forfeit their Entrance Academic Grant will have their grant cancelled and their transcript notation removed. Students must return the Entrance Academic Grant funding to their McMaster Student Account.
- Some Entrance Academic Grants are renewable (see In-Course and Renewal Academic Grant Regulations).
- The University may choose not to grant an Entrance Academic Grant in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for awards by application, where complete applications have not been received.
- The University may remove specific Entrance Academic Grants from the University Calendar, may revise the terms and stated value and/or suspend the granting of Entrance Academic Grants (e.g. donor funds).
- Entrance Academic Grants supported by donor funds may have additional eligibility requirements.

OPEN TO THE DEGROOTE SCHOOL OF BUSINESS

Requirements: To be awarded annually to a student enrolled in Level I of a program of study in the Faculty of Engineering who achieves a minimum admission average of 90%, and who demonstrates financial need and community leadership. The recipient must be a Canadian citizen. Preference will be given to a student from a rural location. The grant is tenable for up to three years provided the recipient remains enrolled in at least 24 units and maintains a minimum Fall-Winter Average of 9.5.

Typically Available: 1 x \$5,000 per year

Community Contribution Awards

COMMUNITY CONTRIBUTION AWARDS REGULATIONS

1. Community Contribution Awards are non-monetary, non-academic awards allocated on the basis of demonstrated qualities of leadership or innovative skills, service to the University or community at large, or outstanding athletic or artistic participation.
2. Community Contribution Awards are available to full-time and part-time students enrolled in Level II or above of their first undergraduate degree program at the time of award application and selection.
3. Community Contribution Awards requiring full-time status are available to students enrolled full-time or equivalent in both fall and winter terms.
4. Community Contribution Awards intended for true part-time students are available to students who have completed at least 50% of all units attempted in their undergraduate degree program at McMaster on a part-time basis.
5. Community Contribution Awards are available to all domestic and international students.
6. Community Contribution Awards are not available to second degree students.

7. Students are limited to one Community Contribution Award per academic year.
8. Community Contribution Awards are available to students with a minimum Cumulative Grade Point Average of 4.0 on a minimum of 18 graded units.
9. Community Contribution Awards seek to recognize current contributions of 75 hours or more during the year leading up to the application deadline.
10. In order to be considered for a Community Contribution Award, students must submit a complete application by the specified deadline date to a MAXIMUM of three Awards. If a student submits more than three completed applications, the Office of the Registrar, Student Financial Aid & Scholarships will determine which applications, if any, are forwarded for review.
11. Community Contribution Award applications which meet award eligibility criteria are forwarded to a selection committee for review and ranking.
12. Community Contribution Award recipients receive a letter of recognition.
13. Letters of recognition are typically available no later than the end of September.
14. Community Contribution Award recipients will have their awards noted on their University transcripts.
15. A Community Contribution Award recipient may be eligible to receive a corresponding donor bursary of the same name if the student is able to demonstrate financial need (see In-Course Bursary Regulations).
16. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture of a Community Contribution Award. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
17. Students who forfeit their award will have their award cancelled and their transcript notation removed. Students must return their letter of recognition to the Office of the Registrar, Student Financial Aid & Scholarships.
18. The University may choose not to grant a Community Contribution Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools where complete applications have not been received.
19. The University may remove specific Community Contribution Awards from the University Calendar, may revise the terms and stated number available for allocation and/or suspend the granting of Community Contribution Awards.
20. The terms of individual Community Contribution Awards may specify additional eligibility requirements.

Community Contribution Awards by Application

Application details are available in Mosaic.

OPEN TO TWO OR MORE FACULTIES

THE AUBURN INDUSTRIAL SERVICES LTD. COMMUNITY CONTRIBUTION AWARDS

Established in 1997 by Auburn Industrial Services Ltd.

Requirements: To be awarded to students enrolled in any program who display superior leadership or innovative skills.

Typically Available: 2

THE BRANTFORD ALUMNI BRANCH COMMUNITY CONTRIBUTION AWARDS

Established in 2000 by the Brantford Alumni Branch of the McMaster Alumni Association.

Requirements: A variable number of awards to be granted to students enrolled in any program who demonstrate leadership and innovative skills through par-

ticipation in either university or community activities. Preference will be given to students from the Brant County area high schools.

Typically Available: 1

THE ELVA CARROL COMMUNITY CONTRIBUTION AWARD

Requirements: A variable number of awards to be granted to students enrolled in any program who, in the judgment of a selection committee, have demonstrated superior leadership and innovative skills through participation in either university and/or community activities.

Typically Available: 6

OPEN TO THE ARTS AND SCIENCE PROGRAM

THE SAM WATSON MEMORIAL COMMUNITY CONTRIBUTION AWARD

Established in 1996 by his wife Irene M. Watson and friends of Samuel Watson.

Requirements: One or two awards to be granted to students enrolled in a program in Arts and Science who, in the judgment of the selection committee, have made a notable contribution in the community-at-large through participation in extra-curricular activities.

Typically Available: 1

OPEN TO THE FACULTY OF ENGINEERING

THE ROBERT JOHN MORRIS COMMUNITY CONTRIBUTION AWARDS

Established in 1996 by family, friends and colleagues of Robert John Morris.

Requirements: Six awards: three to be granted to students upon completion of Level I or higher of a program in Engineering, and three to be granted to students upon completion of Level II or higher of a program in Engineering Physics who, in the judgment of the appropriate selection committee in the Faculty of Engineering, have demonstrated leadership or innovative skills in the field of Engineering or, through their participation in campus and community activities, have had a significant influence on the lives of Engineering students at McMaster University.

Typically Available: 6

THE MEENA AND NARESH SINHA COMMUNITY CONTRIBUTION AWARD

Established in 1996 by Meena and Naresh Sinha.

Requirements: To be awarded to a student enrolled in the Faculty of Engineering who, in the judgment of selection committee, has demonstrated superior leadership or innovative skills through participation in either University and/or community activities.

Typically Available: 1

THE TKK INC. COMMUNITY CONTRIBUTION AWARDS

Established in 1997 by TKK Inc. in recognition of the contributions of McMaster students.

Requirements: To be awarded to students enrolled in the Faculty of Engineering who demonstrate outstanding athletic participation and display superior leadership or innovative skills.

Typically Available: 2

THE WESCAST INDUSTRIES CONTINUOUS LEARNING COMMUNITY CONTRIBUTION AWARD

Established in 1997 by Wescast Industries Inc. in recognition of the contributions of McMaster students.

Requirements: To be awarded to a student enrolled in the Faculty of Engineering who is involved in activities displaying superior leadership or innovative skills. Preference will be given to a student enrolled in Materials Engineering.

Typically Available: 1

THE ZENON ENVIRONMENTAL COMMUNITY CONTRIBUTION AWARDS

Established in 1997 by Zenon Environmental Inc. in recognition of the contributions of McMaster students.

Requirements: To be awarded to students enrolled in the Faculty of Engineering who display superior leadership or innovative skills.

Typically Available: 2

OPEN TO THE FACULTY OF HEALTH SCIENCES

THE HELEN K. MUSSALLEM COMMUNITY CONTRIBUTION AWARD

Established in 1996 by Dr. Helen K. Mussallem (C.C., B.N., Ed.D., LL.D (Queen's), D.Sc., D.St.J., F.R.C.N., M.R.S.H.) to stimulate interest in professional nursing affairs through participation in meetings, conferences, professional associations and societies related to the field of nursing.

Requirements: A variable number of awards granted to students who have completed Nursing I and who, in the judgment of the School of Nursing, have demonstrated notable involvement in extracurricular activities.

Typically Available: 1

THE NURSING PROGRAM COMMUNITY CONTRIBUTION AWARDS

Established in 1997 in recognition of the contribution of McMaster students.

Requirements: To be awarded to students enrolled in the Nursing program who display superior leadership or innovative skills. Preference to be given to students who are working in under-resourced communities and who must travel long distances to participate in the program.

Typically Available: 1

OPEN TO THE FACULTY OF HUMANITIES

THE STUART AND MARJORIE IVisON COMMUNITY CONTRIBUTION AWARDS

Established in 1997 by Donald Ivison (Class of '53) and Betty Ivison (Class of '52) in honour of his parents Stuart and Marjorie Ivison (Class of '28 (Arts)).

Requirements: A variable number of awards to be granted to students enrolled in a program in the Department of English and Cultural Studies who demonstrate a lively interest in English/Cultural Studies, involvement in extra-curricular activities and service to the University or community-at-large.

Typically Available: 1

THE LORNA AND DAVID SOMERS COMMUNITY CONTRIBUTION AWARD

Established in 1997 by Lorna Somers (Class of '81) and David Somers (Class of '88) under the McMaster Student Opportunity Fund initiative.

Requirements: To be awarded to a student enrolled in the Faculty of Humanities who, in the judgment of a selection committee, has demonstrated one or more of the following: service to McMaster or the community-at-large; superior leadership or innovative skills; outstanding athletic or artistic participation. Preference will be given to a student enrolled in Art and Art History.

Typically Available: 1

THE ADAM SUDAR PRINTMAKING COMMUNITY CONTRIBUTION AWARD

Established in 1997 in memory of Adam Sudar by his friends.

Requirements: To be awarded to students entering Level III or IV of the Honours Art Program at McMaster who, in the judgment of the selection committee, have demonstrated outstanding achievement or promise in the area of printmaking, and who have contributed significantly to the School's cultural presentations within the community.

Typically Available: 1

THE ALLAN AND JOY WILLIAMS COMMUNITY CONTRIBUTION AWARD

Established in 1996 by Mary Williams (Class of '87), Anne Williams (Class of '89) and Ellen and Dan Walker in honour of their parents.

Requirements: To be awarded to a student enrolled in a program in the Department of English and Cultural Studies who, in the judgment of the selection committee, has made a notable contribution to campus and community life and demonstrates a lively interest in English studies.

Typically Available: 1

OPEN TO THE FACULTY OF SCIENCE

Established in 1997 by the McMaster Social Sciences Society Executive Committee to recognize Dr. James A. Johnson, Dean of Social Sciences (1989-97), for his outstanding service to the Faculty of Social Sciences and the broader campus community.

Requirements: One award to be granted annually to a Social Sciences student enrolled in a program involving Anthropology, Economics, Geography, Gerontology, Labour Studies, Political Science, Psychology, Religious Studies, Social Work or Sociology who, in the judgment of the selection committee, has provided outstanding service to McMaster University or the community-at-large. Preference will be given to students whose service has been undertaken within the Faculty of Social Sciences at McMaster University.

Typically Available: 1

Entrance Awards

ENTRANCE AWARDS REGULATIONS

Entrance Awards are monetary awards allocated on the basis of academic merit and, in some cases, other forms of earned merit.

- Entrance Awards are available to students admitted full-time on the basis of high school admission requirements.
- Entrance Awards are available to students entering Level I of their first baccalaureate degree program.
- Students who have enrolled at any post-secondary institution after graduation from high school are not eligible for Entrance Awards unless:
 - They are completing a certificate or diploma at McMaster University as a requirement of admission (e.g. the McMaster English Language Diploma), and/or
 - They have withdrawn from post-secondary studies before attending or before the deadline to drop and add courses in their first term of study.
- Entrance Awards are available to students (including WUSC sponsored students) who are Canadian Citizens or Permanent Residents of Canada regardless of where they completed their high school education.
- Canadian Citizens and Permanent Residents of Canada may receive a maximum of one Entrance Award granted solely on the basis of academic merit (e.g. a McMaster Honour Award) and one Entrance Award granted on the basis of an application or other earned merit.
- Students who are not Canadian Citizens or Permanent Residents of Canada who complete their final year and graduate from a high school in Canada are eligible for Entrance Awards open to Canadian Citizens and Permanent Residents.
- Students who are not Canadian Citizens or Permanent Residents of Canada who complete their final year and/or graduate from a high school outside of Canada are limited to one award from a limited number of International Student Entrance Awards. See International Student Entrance Awards section.
- Entrance Awards first consider one or more McMaster University calculated admission and scholarship averages (e.g. final admission average).
- Students must achieve a minimum 80% in the average(s) used to determine Entrance Award eligibility. An admission audition or portfolio score, or equivalent, may be included in the calculation of an average.
- Averages for Entrance Awards are calculated using the course grades that form the basis for admission to the Level I program. Final grades for courses completed after June 30th in the year of admission application will not be considered in assessing eligibility for Entrance Awards.
- Entrance Awards may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements, including, but not limited to, submitting an application, participating in an interview, performing an audition or developing a portfolio.
- In order to be considered for an Entrance Award by application, students must submit a complete application by the specified deadline date.

- Entrance Award applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
- Students must enrol in the fall term to have an Entrance Award payment processed.
- All Entrance Award payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
- Entrance Awards are typically disbursed no later than the end of September.
- Entrance Award recipients will have their awards noted on their University transcript.
- Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the award. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
- Students who withdraw before November 1 will forfeit their Entrance Award.
- Students who forfeit their Entrance Award will have their award cancelled and their transcript notation removed. Students must return the Entrance Award funding to their McMaster Student Account.
- Some Entrance Awards are renewable (see In-Course Award and Renewals Regulations).
- Students wishing to defer the benefits of an Entrance Award to the following academic year should apply to the Office of the Registrar, Admissions, for deferral of both admission and stated scholarship value. Approval of applications for deferral is not automatic, and deferrals are not normally granted for more than one academic year.
- The University may choose not to grant an Entrance Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for awards by application, where complete applications have not been received.
- The University may remove specific Entrance Awards from the University Calendar, may revise the terms and stated value, and/or suspend the granting of Entrance Awards (e.g. donor funds).
- Entrance Awards supported by donor funds may have additional eligibility requirements.

President's Awards and Honour Awards Program

An unlimited number of President's Awards and Honour Awards are automatically assessed on the basis of final admission averages. No application is required. The value awarded corresponds to the final admission average range in which the Level I entering student's average falls:

President's Award	95.0 - 100.00%	\$2500
Honour Award	90.0 - 94.99%	\$1000
Honour Award	85.0 - 89.99%	\$ 750
Honour Award	80.0 - 84.99%	\$ 500

The President's Awards and the Honour Awards program are generously supported by the following funds:

Automatically Assessed

OPEN TO TWO OR MORE FACULTIES

THE CLASS OF 1956 50TH ANNIVERSARY ENTRANCE SCHOLARSHIPS

Established in 2006 by the Class of 1956 in honour of its 50th anniversary.

Requirements: Two scholarships to be awarded to students entering any Level I program.

Typically Available: 2 x \$1,000

THE HELEN M. CURREY SCHOLARSHIP

Established in 1941 by bequest of Helen Maud Currey of Drumbo, Ontario.

Requirements: A variable number of scholarships to be awarded to students entering any program of study. To be awarded every four years.

Typically Available: 1 x \$750

THE DE VILLIERS - MAHAFFY MERIT AWARDS

Established in 1991 in memory of Nina De Villiers and Leslie Mahaffy of Burlington, by contributions from the local community and the employees of several area companies including Searle Canada, Boehringer Ingelheim, Smithkline Beecham, Monsanto and the Royal Bank.

Requirements: Grade 12 U or M subjects to be included are English and either Latin or French.

Typically Available: 1 x \$750

THE TYNOWSKI SCHOLARSHIP

Established in 1989 by the University, friends and colleagues of Olga Tynowski, for her outstanding contributions to McMaster University during 46 years of service.

Requirements: To be awarded to an outstanding student entering any program of study.

Typically Available: 1 x \$1,000

THE WALLINGFORD HALL ENTRANCE SCHOLARSHIP

Established in 1993.

Requirements: To be awarded to a student entering any program of study.

Typically Available: 3 x \$750

THE WHEELER SCHOLARSHIP

Established in 1915.

Requirements: Grade 12 U or M subjects to be included are: History, English and a language other than English.

Typically Available: 1 x \$500

OPEN TO THE FACULTY OF BUSINESS**THE FORTINOS SCHOLARSHIP**

Established in 1990 by John Fortino.

Requirements: To be awarded to an outstanding student entering the School of Business.

Typically Available: 1 x \$1,400

OPEN TO THE FACULTY OF ENGINEERING**THE A.H. ATKINSON EDUCATION FUND SCHOLARSHIP**

Established in 2001 by the A.H. Atkinson Education Fund.

Requirements: To be awarded to a student entering the Faculty of Engineering.

Typically Available: 5 x \$750

THE GENERAL MOTORS ENTRANCE SCHOLARSHIPS

Established in 1999 by General Motors of Canada Limited.

Requirements: A variable number to be awarded to female students entering the Faculty of Engineering.

Typically Available: 11 x \$750

THE JOHN HODGINS MEMORIAL SCHOLARSHIP

Established in 1985 by his wife, Jean, in memory of Dr. John W. Hodgins in recognition of his extraordinary contributions in founding the Faculty of Engineering which he served with distinction as the first Dean.

Requirements: To be awarded to an outstanding student entering the Faculty of Engineering.

Typically Available: 1 x \$1,000

THE ONTARIO PROFESSIONAL ENGINEERS FOUNDATION FOR EDUCATION ENTRANCE SCHOLARSHIP

Established in 1961 by the Ontario Professional Engineers Foundation for Education.

Requirements: Two scholarships to be awarded, one to a female student and one to a male student, enrolled in a CEAB (Canadian Engineering Accreditation Board) accredited program in the Faculty of Engineering who have demonstrated a combination of high academic achievement and exhibit characteristics of leadership. Recipients must have an Ontario Secondary School Diploma with overall final admission average of at least 90 percent.

Typically Available: 2 x \$1,500 each

OPEN TO THE FACULTY OF HUMANITIES**THE MARION LAING-KNOX ENTRANCE SCHOLARSHIP**

Established in 2000 by bequest of Marion Laing-Knox.

Requirements: To be awarded to a student entering the Faculty of Humanities in a program of study who presents an outstanding final admission average.

Typically Available: 2 x \$1,000

OPEN TO THE FACULTY OF SCIENCE**THE LILLIAN AND LEROY PAGE SCHOLARSHIP**

Established in 1982 by donation of the Lillian and Leroy Page Foundation.

Requirements: For a student from the Hamilton area entering the Faculty of Science.

Typically Available: 5 x \$1,000

Entrance Awards by Application**OPEN TO TWO OR MORE FACULTIES****THE ASHBAUGH SCHOLARSHIPS**

Established in 1989 by bequest of Frederick K. Ashbaugh of St. Petersburg, Florida, in memory of Mary Eliza Kingston.

Requirements: A variable number of scholarships to be awarded to students entering any program of study.

Typically Available: 5 x \$5,000 by award application through Faculty

THE CLASS OF 1952 MEL HAWKRIGG HONOUR AWARDS

The scholarship is renewable for three years at the same value provided the recipient remains enrolled full-time and demonstrates notable academic achievement.

Typically Available:

- 1 x \$100,000 (\$25,000 per year) Faculty of Engineering
- 1 x \$ 80,000 (\$20,000 per year) Faculty of Science

Note: See www.schulichleaders.com for application information.

OPEN TO THE DEGROOTE SCHOOL OF BUSINESS

THE DAVID FEATHER FAMILY SCHOLARSHIP

Established in 2016 by David Feather, B.A. (Class of '85) and MBA (Class of '89).

Requirements: To be awarded to a student entering the Honours Bachelor of Commerce in Integrated Business and Humanities program and, who in the judgment of the DeGroot School of Business, has demonstrated community engagement and high academic achievement.

Typically Available: 2 x \$5,000 by admission application

THE KEVIN A. LOCKHART FAMILY SCHOLARSHIP

Established in 2017 by Kevin A. Lockhart, BA '87 and Past Vice-President of the McMaster Students Union.

Requirements: To be awarded to a student entering the Honours Bachelor of Commerce in Integrated Business and Humanities program and, who in the judgment of the DeGroot School of Business, has demonstrated community engagement and high academic achievement.

Typically Available: 2 x \$5,000 by admission application

OPEN TO THE FACULTY OF ENGINEERING

THE ARCELORMITTAL DOFASCO FIRST ROBOTICS ENGINEERING ENTRANCE SCHOLARSHIP

Established in 2018 by ArcelorMittal Dofasco.

Requirements: To be awarded to students who permanently reside or attended high school in the Greater Toronto and Hamilton Area, City of Brantford or Region of Niagara, who enroll in a first year program in the Faculty of Engineering, achieve a minimum final admission average of 90% and demonstrate leadership experience and involvement in extracurricular activities through FIRST Robotics.

Typically Available: 2 x \$15,000

THE HATCH SCHOLARSHIPS

Established in 2008 by HATCH Ltd.

Requirements: Four scholarships to be awarded annually to students entering the Faculty of Engineering. These awards are renewable for three years at the same value provided the students remain in 24 units or more, and achieve a Fall-Winter Average of 9.5 with no failures.

Value: 4 x \$32,000 each (\$8,000 per year) by award application through the Faculty of Engineering

THE JOSEPH IP ENTRANCE SCHOLARSHIP

Established in 2014 by Joe Ip, B.Eng. (Class of '79), M.Eng (Class of '81).

Requirements: To be awarded to students entering the Faculty of Engineering who achieve a minimum final admission average of 95%, and who demonstrate leadership experience and involvement in extracurricular activities.

Typically Available: 4 x \$10,000 by award application through the Faculty of Engineering

OPEN TO THE FACULTY OF HUMANITIES

THE JOAN FRANCES BOWLING ENTRANCE SCHOLARSHIPS

Established in 1997 from the estate of Marie Bowling in memory of her daughter, Joan Frances Bowling.

Requirements: Two scholarships to be awarded to students entering Music I, who in the judgment of the School of the Arts, have demonstrated excellence in classical music.

Typically Available: 2 x \$1,800 by admission audition

THE MERRILL FRANCIS GAGE ENTRANCE SCHOLARSHIP

Established in 1982 from the estate of Merrill Francis Gage of Hamilton.

Requirements: To be awarded to a keyboard student entering Music I who, in the judgment of the School of the Arts, has attained outstanding musical proficiency.

Typically Available: 2 x \$1,000 by admission audition

THE FRANK THOROLFSON MEMORIAL SCHOLARSHIPS

Established in 1978 in memory of Professor Frank Thorolfson, first Chair of the Department of Music.

Requirements: Two scholarships to be awarded to students entering Music I who, in the judgment of the School of the Arts, have attained high scholastic achievement and musical proficiency.

Typically Available: 2 x \$1,500 by admission audition

Requirements: A variable number to be awarded to students entering Level I from Columbia International College.

Typically Available: 4 x \$5,000

INDIGENOUS STUDENT ENTRANCE AWARD REGULATIONS

1. Indigenous Student Entrance Awards are monetary awards allocated on the basis of academic merit and, in some cases, other forms of earned merit.
2. Indigenous Student Entrance Awards are available to students entering Level I of their first baccalaureate degree program, whether direct from high school or an alternate pathway, including, but not limited to college, an Indigenous post-secondary institution or other University.
3. Indigenous Student Entrance Awards are available to students who are Canadian Citizens or Permanent Residents of Canada, and those who self-identify as First Nations, Metis, or Inuit, regardless of status under the Indian Act or where they completed their high school education.
4. Indigenous students may receive a maximum of one Entrance Award granted solely on the basis of academic merit (e.g. a McMaster Honour Award), and either one Entrance Award granted on the basis of earned merit that requires an additional assessment process, including, but not limited to, application, interview and/or audition, or one Indigenous Student Entrance Award.
5. Indigenous Student Entrance Awards may consider one or more McMaster University calculated admission and scholarship averages (e.g. final admission average).
6. Students must achieve the minimum final admission average required for their program to be eligible for an Indigenous Student Entrance Award.
7. Averages for Indigenous Student Entrance Awards are calculated using the course grades that form the basis for admission to the Level I program. Final grades for courses completed after June 30th in the year of admission application will not be considered in assessing eligibility for Indigenous Student Entrance Awards.
8. Indigenous Student Entrance Awards may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements, including, but not limited to, submitting an application, participating in an interview, performing an audition or developing a portfolio.
9. In order to be considered for an Indigenous Student Entrance Award by application, students must submit a complete application by the specified deadline date.
10. Indigenous Student Entrance Award applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
11. Indigenous Students must enrol in the fall term to have an Indigenous Student Entrance Award payment processed.
12. All Indigenous Student Entrance Award payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
13. Indigenous Student Entrance Awards are typically disbursed no later than the end of September.
14. Indigenous Student Entrance Award recipients will have their awards noted on their University transcript.
15. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the award. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
16. Students who withdraw before November 1 will forfeit their Indigenous Student Entrance Award.

17. Students who forfeit their Indigenous Student Entrance Award will have their award cancelled and their transcript notation removed. Students must return the Indigenous Student Entrance Award funding to their McMaster Student Account.
18. Some Indigenous Student Entrance Awards are renewable (see In-Course Award and Renewals Regulations).
19. Students wishing to defer the benefits of an Indigenous Student Entrance Award to the following academic year should apply to the Office of the Registrar, Admissions, for deferral of both admission and stated scholarship value. Approval of applications for deferral is not automatic, and deferrals are not normally granted for more than one academic year.
20. The University may choose not to grant an Indigenous Student Entrance Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for awards by application, where complete applications have not been received.
21. The University may remove specific Indigenous Student Entrance Awards from the University Calendar, may revise the terms and stated value, and/or suspend the granting of Indigenous Student Entrance Awards (e.g. donor funds).
22. Indigenous Student Entrance Awards supported by donor funds may have additional eligibility requirements.

Indigenous Student Entrance Awards

By Application

OPEN TO TWO OR MORE FACULTIES

THE ADELLA MARGARET BRAGG SCHOLARSHIP

Established in 2010 by bequest of Adella Margaret Bragg.

Requirements: To be awarded to a female student from the Six Nations of the Grand River territory entering McMaster University in any undergraduate program. The award is tenable up to four years.

Typically Available: 1 x \$12,000 (\$3,000 per year) by award application through the Office of the Registrar, Student Financial Aid & Scholarships

THE HATCH SCHOLARSHIP FOR INDIGENOUS STUDENTS

Established in 2012 by HATCH.

Requirements: To be awarded to an Indigenous (status or non-status First Nations, Métis, or Inuit) student entering at McMaster University in any undergraduate program. Preference is to be given to a student enrolled in the Faculty of Engineering. These awards are renewable for three years at the same value provided the students remain enrolled full-time, and achieve a Grade Point Average of 8.0 with no failures.

Typically Available: 1 x \$32,000 (\$8,000 per year) by award application through the Office of the Registrar, Student Financial Aid & Scholarships

Graduating Student Awards

Graduating Student Awards Regulations

1. Graduating Student Awards are monetary and non-monetary awards allocated on the basis of academic merit and, in some cases, other forms of earned merit.
2. Graduating Student Awards are normally available to all full-time and part-time students graduating from their first undergraduate degree program. Graduating Student Awards are not available to second degree

students unless the terms of a particular donor award specify eligibility and the student has not received the award previously.

3. Graduating Student Awards requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter terms.
4. Graduating Student Awards intended for true part-time students are available to students who have completed at least 50% of all units attempted in their undergraduate degree program at McMaster on a part-time basis.
5. Graduating Student Awards are available to all domestic and international students.
6. Students are considered for all available Graduating Student Awards in the spring following their graduating term.
7. While students typically apply for Graduating Student Awards in Mosaic, students with degrees conferred at Fall Convocation are only able to apply for Graduating Student Awards by application the following spring using paper application forms available through the Office of the Registrar, Student Financial Aid & Scholarships.
8. Graduating Student Awards are available to students with a minimum Cumulative Grade Point Average of 8.0 calculated on at least 60 graded units.
9. Available averages, units upon which averages are calculated, program level, and enrolled units may be used to break any ties in an award competition.
10. Graduating Student Awards may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application.
11. In order to be considered for a Graduating Student Award by application, students must submit a complete application by the specified deadline date.
12. Graduating Student Award applications which meet award eligibility criteria are forwarded to a selection committee for review and ranking.
13. All Graduating Student Award payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
14. Graduating Student Awards are typically disbursed no later than the end of May.
15. Graduating Student Award recipients will have their awards noted on their University transcripts.
16. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture of a Graduating Student Award. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study.
17. Graduating Student Award recipients who do not have their degree conferred as expected will forfeit their award.
18. Students who forfeit their awards will have their award cancelled and their transcript notation removed. Students must return any non-monetary award to the Office of the Registrar, Student Financial Aid & Scholarships and any award funding to their McMaster Student Account.
19. The University may choose not to grant a Graduating Student Award in the absence of a suitable candidate; may choose to limit the number of recipients where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools where complete applications have not been received.
20. The University may remove specific Graduating Student Awards from the University Calendar, may revise the terms and stated value and/or suspend the granting of Graduating Student Awards (e.g. donor funds).

21. Graduating Student Awards supported by donor funds may have additional eligibility requirements.

Requirements: Three prizes to be awarded: (a) one to the student who attains the highest Grade Point Average in an Honours B.A. program in Psychology or Psychology, Neuroscience & Behaviour; (b) one to the student who attains the highest Grade Point Average in the Honours B.Sc. program in Psychology or Psychology, Neuroscience & Behaviour; (c) one to the student who attains the highest Grade Point Average in the Honours Biology and Psychology (Life Sciences) program.
Typically Available: 3 x \$200

THE LEONE BETTY BLACKWELL MEMORIAL BOOK PRIZE

Established in 1999 by Dr. Bonnie Blackwell in memory of her mother, Leone Betty Blackwell.

Requirements: To be awarded to a graduating student with the highest grade in EARTHSC 4P03.

Typically Available: 1 x \$85 for books

THE GOVERNOR GENERAL'S ACADEMIC MEDAL

Given by His Excellency the Governor General of Canada.

Requirements: To be awarded to the student graduating from a first baccalaureate degree program who has attained the highest standing throughout the program.

Typically Available: 1 x Medal

THE MAPS GOLD MEDAL

Established in 1996 by the McMaster Association of Part-time Students.

Requirements: To be awarded to the graduating student completing studies primarily on a part-time basis and who attains the highest Grade Point Average.

Typically Available: 1 x Medal

THE WILLIAM J. MCCALLION SCHOLARSHIPS

Established in 1984 in honour of Professor McCallion, B.A. (Class of '43), M.A. (Class of '46), first Dean of the School of Adult Education from 1970 to 1978, in recognition of his outstanding contribution to adult education and to the Department of Mathematical Sciences during 41 years of service.

Requirements: To be awarded to graduating students who have completed a program primarily on a part-time basis with high averages.

Typically Available: 2 x \$800

THE P.L. NEWBIGGING PRIZE

Established in 1982 in recognition of Dr. Lynn Newbigging for his outstanding contributions to the Department of Psychology, Neuroscience & Behaviour (Faculty of Science).

Requirements: Four prizes to be awarded to students graduating from a program in the Department of Psychology, Neuroscience & Behaviour with high averages.

Typically Available: 4 x \$100 each

THE LLOYD REEDS PRIZES

Established in 1983 in recognition of Dr. Lloyd G. Reeds for his outstanding contributions to the Department of Geography during 35 years of service.

Requirements: To be awarded to graduating students who, in the judgment of the School of Geography and Earth Sciences, have demonstrated outstanding achievement in GEOG 4MT6 A/B or EARTHSC 4MT6 A/B.

Typically Available: 4 x \$100 each

THE SOCIETY OF CHEMICAL INDUSTRY MERIT AWARDS

Established in 1961.

Requirements: Three certificates to be awarded: (a) one to a Chemical Engineering graduand, (b) one to an Honours Biochemistry graduand, and (c) one to an Honours Chemistry or Chemical Biology graduand, who have attained the highest Grade Point Average (at least 9.5) and have completed the program in the normal number of years.

Typically Available: 3 x Certificates

THE UNIVERSITY SCHOLARSHIPS

Established in 1978.

Requirements: To be awarded to graduating students who have completed a program primarily on a part-time basis with high averages.

Typically Available: 6 x \$800

OPEN TO THE ARTS AND SCIENCE PROGRAM

THE LAURA DODSON PRIZE

Established in 1985 by Laura Dodson (Class of '56).

Requirements: To be awarded to the student graduating from the Honours Arts and Science Program who has displayed outstanding achievement in both arts and science.

Typically Available: 1 x \$200

OPEN TO THE DEGROOTE SCHOOL OF BUSINESS

THE BASU MEDAL

Established in 1984 in memory of Professor Sanjoy Basu by friends, colleagues and accounting organizations.

Requirements: To be awarded to the graduating student who, in the judgment of the School of Business, has displayed outstanding achievement in accounting and has attained an average of at least 10.0 in any four of COMMERCE 4AA3, 4AC3, 4AD3, 4AE3, 4AF3.

Typically Available: 1 x \$1,000 and Medal

THE JOHN DEERE LIMITED SCHOLARSHIP

Established in 1992 by John Deere Limited.

Requirements: To be awarded to a graduating student who, in the judgment of the DeGroote School of Business, has demonstrated outstanding academic achievement in courses offered by the Human Resource/Labour Relations Area.

Typically Available: 1 x \$2,000

THE BURTON R. JAMES MEMORIAL PRIZE

Established in 1974 by his friends and colleagues in honour of Burton R. James (Class of '39), Controller, 1963-71, Assistant Vice-President - Administration, 1971-73, McMaster University.

Requirements: To be awarded to the student who, has attained the highest Grade Point Average in a program in Commerce.

Typically Available: 1 x \$200

OPEN TO THE FACULTY OF ENGINEERING

THE BINKLEY MEDAL

Established in 2000 by the University, friends and colleagues of Margaret Belec (nee Binkley) on the occasion of her retirement and for her outstanding contributions to McMaster University during her 43 years of service.

Requirements: To be awarded to a student graduating from an Honours program in Computer Science who attains the highest Grade Point Average.

Typically Available: 1 x \$350 and a Medal

THE GERALD L. KEECH MEDAL

Established in 1994 by his friends and colleagues as a tribute to Gerald L. Keech in recognition of his outstanding contributions to McMaster University during his 33 years of service in Computer Science and computer services.

Requirements: To be awarded to the graduating student from a program in Computer Science who attains the highest Grade Point Average.

Typically Available: 1 x Medal

THE ONTARIO PROFESSIONAL ENGINEERS FOUNDATION FOR EDUCATION GOLD MEDAL

Established in 1961 by the Ontario Professional Engineers Foundation for Education.

Requirements: To be awarded to the graduate of a CEAB (Canadian Engineering Accreditation Board) accredited program in the Faculty of Engineering who attains the highest Cumulative Grade Point Average.

Typically Available: 1 x Medal

THE SHELL CANADA PRIZES IN ENGINEERING AND MANAGEMENT

Established in 1983.

Requirements: Three prizes to be awarded to students graduating from an Engineering and Management program. Awards will be based on scholarship and on the quality of and creativity shown in written communication.

Typically Available: 3 x \$300

OPEN TO THE FACULTY OF HEALTH SCIENCES

THE CHRISTINE DITTA MEMORIAL AWARD

Established in 2017 in memory of Christine Ditta.

Requirements: To be awarded to a student graduating from a Nursing program, who in the judgement of the School of Nursing, intends to pursue a career in ICU, or excels in this specialty area.

Typically Available: 1 x \$1,000

THE PIONEER ENERGY LP PRIZES IN NURSING

Established in 1989 by the Pioneer Group Limited in conjunction with the R. Samuel McLaughlin Centre for Gerontological Health Research.

Requirements: Two prizes to be awarded to students graduating from the Nursing program who, in the judgment of the School of Nursing, have achieved notable standing and demonstrated practical aptitude for a career in the health care of the elderly.

Requirements: To be awarded to students graduating from a program in the Department of Health, Aging and Society, who in the judgment of the Department, demonstrate leadership in the field of Gerontology.

Typically Available: 1 x \$120 each

In-Course Academic Grants

In-Course and Renewal Academic Grant Regulations

1. In-Course Academic Grants are monetary awards allocated on the basis of academic merit, and in some cases other forms of earned merit, and demonstrated financial need.
2. In-Course Academic Grants are available to full-time and part-time students enrolled in their first baccalaureate degree program who are not in their graduating term.
3. In-Course Academic Grants requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter terms.
4. In-Course Academic Grants will require either a minimum Cumulative Grade Point Average of 8.0 calculated on at least 18 graded units or a Fall-Winter Average of 9.5 calculated on the basis of graded units in at least a full-time OSAP eligible course load per term in the prior academic year.
5. In-Course Academic Grants first consider available averages, units upon which averages are calculated, program level and enrolled units in the ranking of academic merit.
6. In-Course Academic Grants may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application, participating in an interview, performing an audition or developing a portfolio.
7. In order to be considered for an In-Course Academic Grant by application, students must submit a complete application by the specified deadline date.
8. In-Course Academic Grant applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
9. In-Course Academic Grants are allocated on the basis of an eligible course load and financial need as determined by a completed full-time OSAP application for the current academic year.
10. The greater calculated financial need is used to break any tie.
11. Some In-Course Academic Grants are renewable.
12. Entrance, Indigenous Student Entrance and In-Course Academic Grant renewals may be based on a minimum Cumulative Grade Point Average of 8.0, or a minimum Fall-Winter Average of 9.5 from the prior academic year based on their full-time OSAP eligible course load or equivalent. An OSAP application for the current year is not required to renew an Entrance or In-Course Academic Grant.
13. Students may receive a maximum of one In-Course Academic Grant or renewal of a prior year Entrance, Indigenous Student Entrance or In-Course Academic Grant.
14. Students must be enrolled in at least the full-time OSAP eligible course load or equivalent used to determine their eligibility to have an In-Course Academic Grant payment processed. Students must be enrolled in the fall term in a full-time OSAP eligible course load or equivalent to have the renewal of a prior year Entrance or In-Course Academic Grant payment processed.
15. All In-Course Academic Grants and Academic Grant renewal payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
16. In-Course Academic Grants are typically disbursed no later than the end of December. Academic Grant renewal payments are typically disbursed no later than the end of September.
17. In-Course Academic Grant recipients will have their awards noted on their University transcript. Academic Grant renewals are not noted on transcripts.
18. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the In-Course Academic Grant or Entrance or In-Course Academic Grant renewal. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
19. Students who withdraw before November 1 will forfeit their Academic Grant renewal.
20. Students who forfeit their Academic Grant will have their grant cancelled and their transcript notation removed if forfeited in first year of payment only. Students must return the Academic Grant funding to their McMaster Student Account.
21. Forfeiture of a renewable Academic Grant also cancels all future instalments of the Academic Grant.
22. Students wishing to defer the benefits of an Academic Grant renewal to the next academic year should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships. Approval is not automatic and deferments are not normally granted for more than one academic year.
23. Students holding renewable Academic Grants who choose to accelerate their program and to complete their degree earlier than normal by completing Spring/Summer courses and who wish to employ the benefits of their renewable Academic Grant to defray the tuition and compulsory fees for those courses should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships.
24. The University may choose not to grant an In-Course Academic Grant in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for awards by application, where complete applications have not been received.
25. The University may remove specific In-Course Academic Grants from the University Calendar, may revise the terms and stated value and/or suspend the granting of In-Course Academic Grants (e.g. donor funds).
26. In-Course Academic Grants supported by donor funds may have additional eligibility and renewal requirements.

Academic Grants for In-Course Students

OPEN TO TWO OR MORE FACULTIES

THE WILLIAM F. CAMPBELL ACADEMIC GRANT

Established in 2005 by Margaret Campbell, M.Sc. (Class of '72) and David F. Campbell in memory of their father William F. Campbell, B.A. (Class of '36) of Ottawa.

Requirements: To be awarded to students entering Level II in the Faculty of Engineering and the Faculty of Science who have completed Level I with high Fall-Winter Averages and demonstrate financial need. Tenable in Levels III and IV provided that the recipients remain enrolled in their Faculty and maintain

a minimum Fall-Winter Average of 9.5. These awards will be divided equally between the Faculty of Engineering and the Faculty of Science.

Typically Available: 1 x \$6,000 (\$2,000 each year)

THE HANS GROH ACADEMIC GRANT

Established in 2011 by Dr. Catherine Groh, B.Sc. (Class of '93) and M.D. (Class of '96), in honour of her father Hans Groh to encourage students in their pursuit of education.

Requirements: To be awarded to a student who has completed at least Level I with a high Fall-Winter Average, and who demonstrates financial need.

Typically Available: 1 x \$2,000

Requirements: To be awarded to a student who has completed Level II or III of the Bachelor of Commerce program, attains a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$800

THE REHANA AND KHALID MASUD ACADEMIC GRANT

Established in 2011 by Omar Masud, B.Sc. (Class of '11) in honour of his parents Rehana and Khalid Masud, for their unparalleled dedication and commitment towards their children's education.

Requirements: To be awarded to a student in the DeGroot School of Business who has completed at least Level I with a high Fall-Winter Average and who demonstrates financial need.

Typically Available: 1 x \$1,000

THE BARRIE REID ACADEMIC GRANT

Established in 2006 by friends and family in memory of Barrie Reid, B.A. (Class of '75).

Requirements: To be awarded to a student in a Commerce program, who attains a high standing in either marketing course, COMMERCE 2MA3 or COMMERCE 3Mc3, and who demonstrates financial need.

Typically Available: 2 x \$300

THE TROY FAMILY ACADEMIC GRANT

Established in 2004 by Kenneth, B.Com. (Class of '75) and Drenda Troy in honour of Anthony and Marie Troy in support of their belief that all students should have the opportunity to pursue their educational goals.

Requirements: To be awarded to a student who has completed Business I, is continuing in the Bachelor of Commerce program, attains a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$2,500

THE WONG FAMILY ACADEMIC GRANT

Established in 2015 by Wilfred Wong, B.Com. (Class of '97) and his wife, Dorothy Tong, B.Com. (Hon.) (Class of '99), in memory of Wilfred's father, Yue Pak Wong, for his dedication and commitment towards his children's education.

Requirements: To be awarded to a student enrolled in the DeGroot School of Business who has completed at least Level I and is enrolled in a Bachelor of Commerce program, who attained a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$1,000

THE DIANE AND COLIN WOOD ACADEMIC GRANT IN BUSINESS

Established in 2008 by Diane Wood and Colin Wood, B.Com. (Class of '78).

Requirements: To be awarded to students in the DeGroot School of Business who have completed Business I with a high Fall-Winter Average, are enrolled in a Level II Commerce program, and have demonstrated financial need.

Typically Available: 1 x \$1,800

OPEN TO THE FACULTY OF ENGINEERING

THE GORDON AND AGNES (TWAMBLEY) BRASH ACADEMIC GRANT

Established in 2008 by the bequest of Ron Brash, B.Eng. (Class of '64) in memory of his parents.

Requirements: A variable number to be awarded to students enrolled in an Electrical Engineering program who attained a high Fall-Winter Average and demonstrate financial need.

Typically Available: 7 x \$8,000

THE CANADIAN PROCESS CONTROL ASSOCIATION ACADEMIC GRANT

Established in 2012 by The Canadian Process Control Association.

Requirements: To be awarded to students enrolled in the Bachelor of Technology, Process Automation Technology program who have achieved notable academic standing and who demonstrate financial need.

Typically Available: 1 x \$2,500

THE CHAMBERS ACADEMIC GRANT

Established in 2012 by Dean Chambers, B.Eng.Mgt. (Class of '78) and his wife, Carol-Lynn Chambers, in memory of Dean's father, Leslie Wayne Chambers, who inspired his son's educational and career choices.

Requirements: To be awarded to a student who has completed at least Level II in a Chemical Engineering and Management program with a high Fall-Winter Average, and who demonstrates financial need.

Typically Available: 2 x \$2,000

THE NESMITH AND INGRID CHINGCUANCO ACADEMIC GRANT

Established in 2013 by Nesmith and Ingrid Chingcuanco.

Requirements: To be awarded to a student who has completed at least Level II of an Electrical Engineering program with a high Fall-Winter Average and who demonstrates financial need.

Typically Available: 1 x \$2,500

THE KRISTINA FERRIS ACADEMIC GRANT

Established in 2011 by Kristina Ferris, B.Sc. (Class of '94) and B.Eng. (Class of '99) to encourage students to pursue and continue studies in Engineering Physics.

Requirements: To be awarded to a student who has completed at least Level II with a high Fall-Winter Average and is continuing in an Engineering Physics program, and who demonstrates financial need.

Typically Available: 1 x \$1,500

THE HATCH ACADEMIC GRANT IN ENGINEERING

Established in 2005 by Hatch to celebrate their 50th anniversary and their success in providing engineering expertise to clients around the world.

Requirements: Two grants to be awarded to students in a program in Civil, Chemical, Materials or Mechanical Engineering who have a high Fall-Winter Average and demonstrate financial need: a) one to a student in Level III, and b) one to a student in Level IV or above.

Typically Available: 2 x \$5,000 each

THE JACK HOWETT ACADEMIC GRANT

Established in 2005 by the Organization of CANDU Industries (OCI) in honour of Jack Howett, a founding member.

Requirements: To be awarded to a student who has completed at least Level II with a high Fall-Winter Average and is continuing in an Engineering Physics program specializing in the Nuclear Engineering and Energy Systems Stream, and who demonstrates financial need.

Typically Available: 1 x \$2,000

THE JONES FAMILY ACADEMIC GRANT

Established in 2015 by Dr. Richard Jones, B.Eng. (Class of '82), Ph.D. (Class of '93) and Kathryn Jones, B. Eng. (Class of '81), M.Eng. (Class of '86) to allow the opportunity for education to McMaster Students.

Requirements: To be awarded to a student in the Faculty of Engineering who has completed at least Level II with a high Fall-Winter Average and who demonstrate financial need.

Typically Available: 1 x \$5,000

THE JOYCE AND ROSS KELLY ACADEMIC GRANT

Established in 2008 by Joyce and Ross Kelly to provide support for students who wish to pursue their educational goals.

Requirements: To be awarded to a student who has completed Level I with a high Fall-Winter Average, is enrolled in the Department of Materials Science and Engineering, and demonstrates financial need.

Typically Available: 1 x \$2,000

THE TERENCE JAMES KENNETT ACADEMIC GRANT

Established in 2015 by friends of Dr. Kennett (1927-2013).

Requirements: To be awarded to a student in the Faculty of Engineering, Department of Engineering Physics who has completed at least Level II with a high Fall-Winter Average and demonstrates financial need.

Typically Available: Variable

THE JOHN B. MCDUGALL ACADEMIC GRANT

Established in 2009 in memory of the late John B. McDougall, B.Sc. (Class of '40) by his family and friends in recognition of his 25 years of service to McMaster. After 10 years at the Chalk River Reactor, John returned to McMaster in 1957 where, in 1959, he helped open the first university-based research reactor in the British Commonwealth.

Requirements: To be awarded to students who use the nuclear reactor in their course work, have attained high academic standing in ENGPYHS 3D03, are currently enrolled in ENGPYHS 4U02, and demonstrate financial need.

Typically Available: 1 x \$3,000

THE PETER MILNE ACADEMIC GRANT

Established in 2016 by Peter Milne, B.Eng. (Class of '79) to encourage students to pursue their goals and aspirations.

Requirements: To be awarded to students enrolled in the Faculty of Engineering who have completed Level I with a high Fall-Winter Average and who demonstrate financial need.

Typically Available: 1 x \$1,000

THE RICHARD C. NEWMAN ACADEMIC GRANT

Established in 2007 by the Newman family in memory of Richard Carson Newman, father of Mark Newman, B.Sc. (Class of '86) and Toni Newman, B.A. (Class of '83).

Requirements: To be awarded to a student in the Faculty of Engineering who has completed at least Level I, attains a high Fall-Winter Average, and demonstrates financial need.

Typically Available: 1 x \$1,500

THE LYNN NICKERSON '97 ACADEMIC GRANT

Established in 2012 in memory of Lynn Nickerson, B.Eng. Society (Class of '97).

Requirements: To be awarded to a student in the Faculty of Engineering who has completed Level II or Level III of an Engineering and Society program and who has achieved notable academic standing and demonstrates financial need.

Typically Available: 1 x \$2,000

THE POLLOCK FAMILY ACADEMIC GRANT

Established in 2006 by Dr. Ken Pollock, Dr. Gary Pollock, Dr. Mark Pollock and Dr. Ted Pollock.

Requirements: To be awarded to students in the Faculty of Engineering who have completed Level I, attained high Fall-Winter Averages and demonstrate financial need.

Typically Available: 5 x \$2,500

THE PATRICK TAN ACADEMIC GRANT

Established in 2008 by Dr. Patrick Guong-Ching Tan, B.Eng. (Class of '70), M.Eng. (Class of '72), LL.D. (2003).

Requirements: Two grants to be awarded to students in a program in Engineering who have a high Fall-Winter Average and demonstrate financial need.

Typically Available: 2 x \$2,000

OPEN TO THE FACULTY OF HEALTH SCIENCES

THE MARGARET ELIZABETH BURKE MEMORIAL ACADEMIC GRANT

Established in 2005 by Dr. Dennis Burke in memory of his wife, Margaret.

Requirements: To be awarded to a student who has completed Level I in the B.Sc.N. program and who, in the judgment of the School of Nursing, has attained the highest grade in the required Level I Anatomy/Physiology courses and demonstrates financial need.

Typically Available: 1 x \$3,500

THE PAT FITZHENRY NURSING ACADEMIC GRANT

Established in 2016 by Sean Fitzhenry in honour of his mother, Pat Fitzhenry, in honour of her lifelong commitment to providing the best care.

To be granted to students who have completed at least Level I in the School of Nursing with a high Fall-Winter Average, and demonstrate financial need.

Typically Available: 2 x \$10,000

THE CYNTHIA AND RUTH GOULD ACADEMIC GRANT

Established in 2016 by I. David Gould, (Class of 1962), and his wife Ruth Gould as a tribute to Cynthia, their daughter.

Requirements: To be awarded to a student enrolled in the Faculty of Health Sciences who attains a high average and demonstrates financial need.

Typically Available: 1 x \$1,000

THE KAREN M. MASON ACADEMIC GRANT IN NURSING

Established in 2017 by Ross Mason ('59), in loving memory of his wife and in honour of her compassionate palliative care nurse, Mona.

Requirements: To be awarded to a student in the School of Nursing who has attained a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$1,000

THE WILLIAM MCKEON MEMORIAL ACADEMIC GRANT IN PHYSICS

Established in 2007 by Mary McKeon, B.A. (Class of '46) in honour of her cousin William McKeon.

Requirements: To be awarded to a student in a Level II Honours Physics program who attained a high Fall-Winter Average in Level I and demonstrates financial need.

Typically Available: 1 x \$2,000

THE ELEANOR MORRIS ACADEMIC GRANT

Established in 2005 by Sandra Morris, B.A. (Class of '82) in memory of her mother, Eleanor Morris.

Requirements: To be awarded to a student in the B.Sc.N. program in the School of Nursing who has completed Level I with a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$1,000

THE ROBERT AND DONNA WEST FAMILY ACADEMIC GRANT IN NURSING

Established in 2015 by Robert West B.A. (Class of '93) and Donna West.

Requirements: To be granted to students enrolled in the School of Nursing who have attained a high Fall-Winter Average and demonstrate financial need.

Typically Available: 1 x \$2,000

OPEN TO THE FACULTY OF HUMANITIES

THE DONALD H.L. BANNERMAN ACADEMIC GRANT

Established in 2017 in honour of Donald Bannerman, B.A. (Class of '69).

Requirements: To be awarded to a student enrolled in a Communication Studies or Multimedia program who attained a high average and demonstrates financial need.

Typically Available: 1 x \$1,000

THE MARGARET C. DIXON ACADEMIC GRANT

Established in 2006 by Mrs. Geraldine Phenix in memory of her mother, Margaret C. Dixon, to honour her love of music and the piano.

Requirements: To be awarded to a student in an Honours Music program who attains a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$1,600

THE FARQUHAR/FIRTH ACADEMIC GRANT

Established in 2011 by Andrea and Craig Farquhar in honour of Ben Firth, B.A. (Class of '56).

Requirements: To be awarded to a student enrolled in Level III of an Honours English or History program, who attains a high Fall-Winter Average, and demonstrates financial need.

Typically Available: 1 x \$1,000

THE P.J. FERGUSON ACADEMIC GRANT

Established in 2007 by P. J. Ferguson, B.A. (Class of '87), President of ABL Employment Inc. in support of her belief that all students should be able to pursue their educational goals.

Requirements: To be awarded to a student enrolled in Level III of a History program, who attains a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$1,000

THE JAMES R. (JAMIE) GREILICH MEMORIAL ACADEMIC GRANT

Established in 2014 by Mr. George and Mrs. Rita Greilich in memory of their son Jamie Greilich B.A. (Class of '88) who passed away at the age of 25 years old.

Requirements: The intent of the award is to provide the opportunity of education. To be awarded to a student enrolled in a program within the Faculty of Humanities with a high Fall-Winter Average and who demonstrates financial need.

Typically Available: 1 x \$5,000

THE KUDSIA ACADEMIC GRANT

Established in 2016 by Mrs. Wendy and Dr. Chandra Kudsia.

Requirements: To be awarded to a student enrolled in a Classics program in the Faculty of Humanities who has attained a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$5,000

THE LINARDIC FAMILY ACADEMIC GRANT

Established in 2007 by Daniel Linardic, B.A. (Class of '91) and Kim Linardic.

Requirements: To be awarded to a student enrolled in Level III or above in an Honours Philosophy program, who attained a high Fall-Winter Average, and demonstrates financial need.

Typically Available: 1 x \$1,700

THE GRAEME MACQUEEN ACADEMIC GRANT

Established in 2012 by Dr. Paul McArthur, B.Sc. (Class of '88) and Dr. Susan McArthur in recognition of their friend Graeme MacQueen, a retired McMaster professor who taught from 1974-2003 and was the Director, Centre for Peace Studies from 1989-1996.

Requirements: To be granted to a student who has obtained a high Fall-Winter Average in a Peace Studies program and who demonstrates financial need.

Typically Available: 1 x \$1,500

THE MARION D. MAITLAND MEMORIAL ACADEMIC GRANT IN ART HISTORY

Established in 2010 by John O. Maitland, in memory of his beloved wife, Marion D. Maitland, in support of her belief that all students should have the opportunity to achieve their educational goals.

Requirements: To be granted to a student enrolled in the School of the Arts who has completed Level I, achieved academic excellence in any Level I Art History course, and demonstrates financial need.

Typically Available: 1 x \$1,750

THE BARBARA PATRICIA PECKHAM ACADEMIC GRANT

Established in 2008 by John Marinucci, B.Com. (Class of '80) and Tracy Marinucci in memory of her mother, Barbara Patricia Peckham, who had a passion for dance and music and was always willing to help those who were prepared to help themselves.

Requirements: To be awarded to students who have completed Level I in the Faculty of Humanities with high Fall-Winter Averages, are enrolled in a Level II Honours program in the School of the Arts, and demonstrate financial need. The

grant is tenable for up to three years provided the recipient remains enrolled full-time, maintains a minimum Fall-Winter Average of 9.5 and continues to be enrolled in the School of the Arts.

Typically Available: 1 x \$15,000 (\$5,000 per year)

THE CARRIE SCHAMEHORN ACADEMIC GRANT

Established in 2009 to honour Carrie Schamehorn, a proud grandmother and life-long music lover.

Requirements: To be awarded to a student in a Music program who attained a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$800

THE CLIFFORD AND ALINE SMITH ACADEMIC GRANT

Established in 2011 by Joyce and Ross Kelly in memory of Joyce's parents, Clifford and Aline Smith, to provide support for students who wish to pursue their educational goals.

Requirements: To be awarded to a student who is enrolled in at least a Level II Honours English program in the Department of English and Cultural Studies, attained a high Fall-Winter Average, and demonstrates financial need.

Typically Available: 1 x \$1,000

THE MARCUS UDOKANG ACADEMIC GRANT

Established in 2014 by Marcus Udokang, B.A. (Class of '98).

Requirements: To be awarded to a student in the Department of English and Cultural Studies with a high Fall-Winter Average who demonstrates financial need.

Typically Available: 1 x \$1,000

OPEN TO THE FACULTY OF SCIENCE

THE ART JEROME ACADEMIC GRANT

Established in 2014 by his family in memory of Art Jerome (Class of '49) who was a McMaster Hall of Fame Inductee and an athlete who was very passionate about sport as well as education.

Requirements: To be awarded to students enrolled in the Kinesiology program in the Faculty of Science with high Fall-Winter Averages and who demonstrate financial need.

Typically Available: 1 x \$2,500

THE LIVING PROOF ACADEMIC GRANT

Established in 2012 by Dr. Sachin B. Patel (Class of '01).

Requirements: To be awarded to a student in a Kinesiology program who attained a high Fall-Winter Average and demonstrates financial need.

Typically Available: 3 x \$2,000

THE MANSON OLSON ACADEMIC GRANT

Established in 2005 by Marguerite Olson (Class of '50) in honour of her father Gordon Manson (Class of '38), her brother John Manson (Class of '56) and her husband Theodore Olson (Class of '51).

Requirements: To be awarded to a student in the Faculty of Science who has attained a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$1,000

THE LINDA (PAOLIN) TONINI '71 ACADEMIC GRANT

Established in 2013 by Lenora Paolin, B.A. (Class of '77).

Requirements: To be awarded to a student who is enrolled in Level II of a Kinesiology program, attained a high Fall-Winter Average, and demonstrates financial need.

Typically Available: 1 x \$1,000

THE WALLER FAMILY ACADEMIC GRANT

Established in 2014 by the Waller Family in memory of Thomas Edward and Norma Waller.

Requirements: To be awarded to a student in a Biology program who has attained a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$2,000

THE DR. JOHN WARKENTIN ACADEMIC GRANT

Established in 2014 by friends and family in memory of Dr. John Warkentin.

Requirements: To be awarded to students who have completed at least Level II in an Honours Chemistry program with a high Fall-Winter Average and demonstrate financial need.

Typically Available: 1 x \$1,000

OPEN TO THE FACULTY OF SOCIAL SCIENCES

THE MCMASTER AMICUS ACADEMIC GRANT IN SOCIOLOGY

Established in 2014 by a Bachelor of Arts alumnus (Class of '85).

Requirements: To be granted to a student who has completed at least Level II of a Sociology program with a high Fall-Winter Average and who demonstrates financial need.

Typically Available: 1 x \$1,000

THE DOREEN MORRISON ACADEMIC GRANT

Established in 2007 in memory of Doreen O'Neill Morrison by her children, Rod, Brent and Jane, and the Morrison and Collis families.

Requirements: To be awarded to a student who has completed at least Level II of any program in the Department of Health, Aging and Society, and who attains a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$1,200

THE ALAN RENNER ACADEMIC GRANT

Established in 2018 by Alan Renner, B.A. (Class of '63) to encourage students to pursue their goals and aspirations.

Requirements: To be awarded to students enrolled in an Economics program in the Faculty of Social Sciences who attained high averages and demonstrate financial need.

Typically Available: 1 x \$1,000

THE T.H.B. SYMONS ACADEMIC GRANT IN CANADIAN POLITICS

Established in 2018 by Thomas H.B. Symons.

Requirements: To be awarded to students who meet provincial residency requirements, are enrolled in level 2 or above of a Political Science program and in at least six units of Canadian Politics courses, attain a high average and demonstrate financial need.

Typically Available: 1 x \$2,000

THE BRENDA SYMONS-MOULTON ACADEMIC GRANT

Established in 2018 by family to honour Brenda Symons-Moulton B.A./B.S.W (Class of '76) for her dedication to the social work community in Hamilton.

Requirements: To be granted to a student enrolled in Level III or above of a Social Work program who attains a high average and demonstrates financial need.

Typically Available: 1 x \$3,000

THE THOMPSON ACADEMIC GRANT

Established in 2006 by family and friends in memory of Professor Robert Thompson (Economics) and his wife, Dorothy Thompson.

Requirements: To be awarded to a student enrolled in Level III or above in an Honours Economics program, who attains a high Fall-Winter Average and demonstrates financial need.

Typically Available: 1 x \$1,000

Indigenous Student Entrance Academic Grants

INDIGENOUS STUDENT ENTRANCE ACADEMIC GRANT REGULATIONS

1. Indigenous Student Entrance Academic Grants are monetary awards allocated on the basis of academic merit, and in some cases other forms of earned merit, and demonstrated financial need.
2. Indigenous Student Entrance Academic Grants are available to students entering Level I of their first baccalaureate degree program whether direct from high school or an alternate pathway including, but not limited to, college, an Indigenous post-secondary institution or other University.
3. Indigenous Student Entrance Academic Grants are available to students who are Canadian Citizens or Permanent Residents of Canada, and those who self-identify as First Nations, Metis, or Inuit, regardless of status under the Indian Act or where they completed their high school education.
4. Indigenous Student Entrance Academic Grants are available to full-time and part-time students entering Level I of their first baccalaureate degree program.
5. Indigenous Student Entrance Academic Grants first consider one or more McMaster University calculated admission and scholarship averages (e.g. final admission average).
6. Students must achieve the minimum final admission average required for their program to be eligible for an Indigenous Student Entrance Academic Grant.
7. Averages for Indigenous Student Entrance Academic Grants are calculated using the course grades that form the basis for admission to the Level I program. Final grades for courses completed after June 30th in the year of admission application will not be considered in assessing eligibility for Entrance Academic Grants.
8. Indigenous Student Entrance Academic Grants requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter.
9. Indigenous Student Entrance Academic Grants may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application, participating in an interview, performing an audition or developing a portfolio.
10. In order to be considered for an Indigenous Student Entrance Academic Grant by application, students must submit a complete application by the specified deadline date.
11. Indigenous Student Entrance Academic Grant applications which meet eligibility criteria are forwarded to a selection committee for review and ranking.
12. Indigenous Student Entrance Academic Grants are allocated on the basis of an eligible course load and financial need as demonstrated through a completed Canadian federal and/or provincial government student aid application (e.g. full-time OSAP) or a completed standard University need profile for the academic year in which the student is entering Level I of their program.
13. The greater calculated financial need is used to break any tie.
14. Students may receive a maximum of one Entrance Academic Grant or Indigenous Student Entrance Academic Grant.
15. Students must be enrolled in at least the full-time OSAP eligible course load used to determine their eligibility to have an Indigenous Student Entrance Academic Grant payment processed.
16. All Indigenous Student Entrance Academic Grant payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.

17. Indigenous Student Entrance Academic Grants are disbursed September through the end of December.
18. Indigenous Student Entrance Academic Grant recipients will have their awards noted on their University transcript.
19. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture or adjustment in the value of the Indigenous Student Entrance Academic Grant. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
20. Students who withdraw before November 1 will forfeit their Indigenous Student Entrance Academic Grant.
21. Students who forfeit their Indigenous Student Entrance Academic Grant will have their grant cancelled and their transcript notation removed. Students must return the Indigenous Student Entrance Academic Grant funding to their McMaster Student Account.
22. Some Indigenous Student Entrance Academic Grants are renewable (see In-Course and Renewal Academic Grant Regulations).
23. The University may choose not to grant an Indigenous Student Entrance Academic Grant in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for awards by application, where complete applications have not been received.
24. The University may remove specific Indigenous Student Entrance Academic Grants from the University Calendar, may revise the terms and stated value and/or suspend the granting of Indigenous Student Entrance Academic Grants (e.g. donor funds).
25. Indigenous Student Entrance Academic Grants supported by donor funds may have additional eligibility requirements.

Academic Grants by Application

Application details are available in Mosaic.

OPEN TO TWO OR MORE FACULTIES

THE MARJORIE ANDERSON ACADEMIC GRANT FOR INDIGENOUS STUDENTS

Established in 2017 by McMaster University in honour of Marjorie Anderson (Class of '35), from the Six Nations of the Grand River, who was the first Indigenous woman to graduate from McMaster. The establishment of the academic grant allows McMaster University to recognize and acknowledge that it is located on the traditional territories of the Mississaugas and Haudenosaunee nations, and within the lands protected by the "Dish With One Spoon" wampum agreement. It also allows the University to recognize the City of Hamilton's role in treating Inuit peoples with tuberculosis after the Second World War. The Hamilton Sanatorium on the Mountain was once home to the largest year-round community of Inuit anywhere in the country.

Requirements: To be awarded to students who self-identify as Inuit, or as Status/ Non-status First Nations from the Six Nations of the Grand River or the Mississaugas of the New Credit, who are entering a Level I baccalaureate degree program with a minimum average of 75%, and demonstrate financial need. The academic grant is renewable for three additional years at the same value for those who remain enrolled full-time and achieve a minimum Grade Point Average of 8.0.

Typically Available: 4 x \$80,000 (\$20,000 per year) by award application through the Office of the Registrar, Student Financial Aid & Scholarships

In-Course Awards

IN-COURSE AND RENEWAL AWARD REGULATIONS

1. **In-Course Awards** are monetary and non-monetary awards allocated on the basis of academic merit and, in some cases, other forms of earned merit. Non-monetary awards such as medals and books as well as monetary awards of nominal value (currently \$100 or less) are called prizes.
2. **In-Course Awards** are available to full-time and part-time students enrolled in an undergraduate degree program (excluding the Physician Assistant and M.D. Programs), at the time of award application and selection, who are returning to McMaster to continue their studies.
3. **In-Course Awards** requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter terms.
4. **In-Course Awards** requiring part-time status are available to students who are not enrolled full-time in the fall and/or winter terms. In addition, true part-time awards are only available to students who have completed at least 50% of all units attempted at McMaster on a part-time basis.
5. **In-Course Awards** are available to all domestic and international students.
6. **In-Course Awards** are not available to second degree students unless the terms of a particular donor award specify eligibility and they have not received the award previously.
7. **In-Course Awards** are not available to students in their graduating term.
8. **In-Course Awards** may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements, including, but not limited to, submitting an application.
9. **In-Course Awards** requiring an application that are determined by Cumulative Grade Point Average require a minimum Cumulative Grade Point Average of 8.0 on at least 18 graded units, while those determined by Fall-Winter Average require a minimum Fall-Winter Average of 9.5 on at least 18 graded units.
10. **In-Course Awards** adjudicated without need of an application that are determined by Cumulative Grade Point Average require a minimum 8.0 on at least 24 graded units, while those determined by Fall-Winter Average require a minimum 9.5 on at least 24 graded units.
11. Available averages, units upon which averages are calculated, program level, and enrolled units, may be used to break any ties in an award competition.
12. In order to be considered for an In-Course Award by application, students must submit a complete application by the specified deadline date.
13. In-Course Award applications which meet award eligibility criteria are forwarded to a selection committee for review and ranking.
14. Some **In-Course Awards** are renewable.
15. Entrance, Indigenous Entrance, and In-Course Award renewals determined by Cumulative Grade Point Average or Fall-Winter Average require a minimum 8.0 on at least 18 graded units.
16. All In-Course Award payments are disbursed through the McMaster Student Account and applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
17. **In-Course Awards** are typically disbursed no later than the end of September.
18. **In-Course Awards** will be disbursed if the recipient continues to be enrolled in a McMaster degree program, or a specific McMaster program, when explicitly required by the terms of the award, or the student's record reflects they are on exchange, on letter of permission, or participating in a coop or internship opportunity at McMaster University.

19. In-Course Award recipients will have their awards noted on their University transcripts. Entrance and In-Course renewals are not noted on transcripts.
20. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture of an In-Course Award or Entrance or In-Course Award renewal. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
21. If a student is approved to graduate or transfers to graduate in the fall, after the awarding decision and/or disbursement is made, the student will forfeit the award.
22. Students who withdraw before November 1 will forfeit their In-Course Award or Entrance or In-Course Award renewal.
23. Students who forfeit their In-Course award will have their award cancelled and their transcript notation removed if forfeited in first year of payment only. Students must return the In-Course Award or Entrance or In-Course Award renewal funding to their McMaster Student Account.
24. Forfeiture of a renewable Entrance or In-Course Award also cancels all future instalments of the award.
25. Students wishing to defer the stated value of an In-Course Award or Entrance or In-Course Award renewal to the next academic year should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships. Approval is not automatic and deferments are not normally granted for more than one academic year.
26. Students holding renewable Entrance or **In-Course Awards** who choose to accelerate their program and to complete their degree earlier than normal by completing Spring/Summer courses and who wish to employ the benefits of their renewable Entrance and/or **In-Course Awards** to defray the tuition and compulsory fees for those courses should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships.
27. The University may choose not to grant an In-Course Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools where complete applications have not been received.
28. The University may remove specific **In-Course Awards** from the University Calendar, may revise the terms and stated value and/or suspend the granting of **In-Course Awards** (e.g. donor funds).
29. **In-Course Awards** supported by donor funds may have additional eligibility and renewal requirements.

Requirements: To be awarded to the student in a Civil Engineering program who achieves the highest average in CIVENG 3G04 and CIVENG 3J04, taken in one term.

Typically Available: 1 x \$200

THE DR. CHRIS BART SCHOLARSHIP

Established in 2010 by Tom Jenkins, B.Eng.Mgt. (Class of '82) and Toby Jenkins to honour Tom's Business Policy professor, Dr. Chris Bart.

Requirements: To be awarded to students who have completed Level I with the highest Fall-Winter Average and who are entering in a Level II Engineering and Management program. The recipient may not hold another scholarship of equal or greater value.

Typically Available: 1 x \$6,500

THE CANADIAN SOCIETY FOR CHEMICAL ENGINEERING PRIZE

Established in 1947 by the Chemical Institute of Canada.

Requirements: To be awarded to the student who is entering his/her final year of study of a program in Chemical Engineering and who attained the highest Fall-Winter Average.

Typically Available: 1 x \$50, Medal and Certificate

THE CANADIAN SOCIETY FOR CHEMICAL ENGINEERING (CSCHE) SCHOLARSHIP

Established in 2004 by the organizing committee of the 2003 CSCHE Annual Meeting.

Requirements: To be awarded to a student entering Level II of a program in the Department of Chemical Engineering who has attained the highest academic standing in Level I.

Typically Available: 1 x \$600

THE GRACE DOROTHY AND WILLIAM P. CARPENTER AWARD

Established in 2001 by the Hamilton Community Foundation.

Requirements: To be awarded to a student entering Level II in Mechanical Engineering who has demonstrated outstanding academic achievement in a Level I program. Preference will be given to a student who has graduated from a publicly funded secondary school in the Hamilton or Burlington area.

Typically Available: 1 x \$1,500

THE CANADIAN SOCIETY OF CIVIL ENGINEERS (HAMILTON SECTION) PRIZE

Established in 1987.

Requirements: To be awarded to a student entering the final level of a program in Civil Engineering who, in the judgment of the Department of Civil Engineering, has demonstrated participation in extracurricular activities and has attained high academic standing.

Typically Available: 1 x Plaque

THE CFUW-HAMILTON PAST PRESIDENT'S PRIZE

Established in 1976 by the Past Presidents of the University Women's Club of Hamilton which became the CFUW (Hamilton) on the occasion of the Club's 50th anniversary.

Requirements: To be awarded to the woman student enrolled in Level III of a program in Engineering with the highest Grade Point Average.

Typically Available: 1 x \$1,000

THE CREATECH SCHOLARSHIP IN COMPUTER SCIENCE

Established in 2009 by The Createch Group.

Requirements: To be awarded to a student in the Faculty of Engineering who is enrolled in Level II or above of the Honours Computer Science (B.A.Sc.) or the Business Informatics program with the highest Fall-Winter Average. Preference to students who have completed Level II in the current term.

Typically Available: 1 x \$1,000

THE DR. CAMERON M. CROWE SCHOLARSHIP

Established in 2013 by Dr. Cameron M. Crowe, professor emeritus in the Faculty of Engineering.

Requirements: To be awarded to students who have completed Level I with the highest Fall-Winter Average and who are entering a Level II program in the Department of Chemical Engineering.

Typically Available: 1 x \$5,000

THE RUTH AND JACK HALL PRIZE

Established in 1983 by Jackie MacDonald in memory of her parents.

Requirements: To be awarded to a student enrolled in Level III of an Honours program in Computer Science, or enrolled in Level III of a program in Computer Engineering, and who attains the highest Fall-Winter Average.

Typically Available: 1 x \$225

THE RONALD K. HAM MEMORIAL PRIZE

Established in 1971 in memory of Professor R.K. Ham by his friends and former colleagues.

Requirements: Awarded to the student enrolled in Level III or above and who, in the judgment of the Department of Materials Science and Engineering, shows most promise as a materials scientist or engineer.

Typically Available: 1 x \$125

THE HAMILTON AND DISTRICT HEAVY CONSTRUCTION ASSOCIATION SCHOLARSHIPS

Established in 2003 by the Hamilton and District Heavy Construction Association.

Requirements: To be awarded to students who, in the judgment of the Department of Civil Engineering, have demonstrated outstanding academic achievement and who have attained a grade of at least A- in CIVENG 4CM4.

Typically Available: 1 x \$1,000

THE PROFESSOR TERENCE HOFFMAN SCHOLARSHIP

Established in 2013 by Dr. Terrence Hoffman, professor emeritus in the Faculty of Engineering.

Requirements: To be awarded to the student who has completed Level I with the highest Fall-Winter Average and who is entering a Level II program in the Department of Chemical Engineering.

Typically Available: 1 x \$5,000

THE INTERNETCO LIMITED SCHOLARSHIP

Established in 1977.

Requirements: To be awarded to the student enrolled in Level III of a program in Mechanical Engineering and who, in the judgment of the Department of Mechanical Engineering, has attained notable standing.

Typically Available: 1 x \$625

THE LORNA AND ALVIN KINNEAR SCHOLARSHIP

Established in 2007 by Scott Kinnear, B.Eng. (Class of '88) and Betty Ann Kinnear in honour of his parents, Lorna and Alvin Kinnear.

Requirements: To be awarded to a student entering Level II of a program in the Department of Chemical Engineering who attained the highest Fall-Winter Average in Level I. The scholarship is tenable for up to three years. (To be awarded every three years.)

Typically Available: 1 x 1,000

THE KUDSIA FAMILY SCHOLARSHIP

Established in 2009 by Dr. & Mrs. Chandra & Wendy Kudsia.

Requirements: To be awarded to students enrolled in the Department of Electrical and Computer Engineering who demonstrate outstanding academic achievement.

Typically Available: 1 x \$2,000

THE RAY LAWSON SCHOLARSHIPS

Established in 1975 by the Honourable Ray Lawson, O.B.E., D.C.L., D.Cn.L., LL.D., K.G.St.J., Lieutenant-Governor of Ontario from 1946 to 1952.

Requirements: Two scholarships to be awarded for the highest Fall-Winter Averages in an Engineering and Management program: (a) one to a student enrolled in Level III, and (b) one to a student enrolled in Level IV or above.

Typically Available: 2 x \$275

THE JOHN MAYBERRY SCHOLARSHIPS

Established in 1998 by John Mayberry.

Requirements: One scholarship to be awarded to a student who has completed Level II or III of a program in Chemical Engineering, Mechanical Engineering or Materials Engineering and who, in the judgment of the Faculty of Engineering, has demonstrated outstanding academic achievement. The recipients must attain a minimum Fall-Winter Average of 9.5 at the most recent Fall/Winter terms.

Typically Available: 1 x \$1,000

THE DR. F.A. MIRZA SCHOLARSHIP

Established in 1997 in memory of Farooque Mirza by family, friends and colleagues.

Requirements: To be awarded to a student enrolled in a Civil Engineering program who achieves the highest average in CIVENG 2C04 and ENGINEER 2P04 taken in the Fall/Winter terms.

Typically Available: 1 x \$250

THE JOHN F. MOORE PRIZE

Established in 1990 by the Steel Founders' Society of America in honour of John Moore's contributions to the Society over the past 25 years.

Requirements: To be awarded to the student who attains the highest grade in MATLS 3F03.

Typically Available: 1 x \$125

THE PARKER CANADA DIVISION ENGINEERING EXCELLENCE AWARD

Established in 2014 by Parker Canada.

Requirements: To be awarded to a student in the Faculty of Engineering enrolled in Level III or above in a Mechanical Engineering program and who, in the judgment of the Department of Mechanical Engineering, has demonstrated outstanding academic achievement. Preference will be given to a student who demonstrates community involvement through volunteerism.

Typically Available: 1 x \$1,000

THE LEO SETO SCHOLARSHIP

Established in 2017 by Leo Seto, B.Eng.Mgt. (Class of '87) and M.Eng. (Class of '90).

Requirements: To be awarded to a student who has completed Level II or above of an Engineering Physics program with a high average.

Typically Available: 1 x \$1,000

THE SHELL CANADA SCHOLARSHIPS IN ENGINEERING AND MANAGEMENT

Established in 1983.

Requirements: Three scholarships to be awarded to students enrolled in Level IV or above of a program in Engineering and Management. Awards will be based on scholarship and on the quality of and creativity shown in written and oral reports.

Typically Available: 3 x \$1,100

THE STANTEC CONSULTING LTD. ENGINEERING SCHOLARSHIP

Established in 2005 by Stantec Consulting Ltd. (Hamilton office).

Requirements: To be awarded to a student who has completed Level I with the highest Fall-Winter Average and who is entering a Level II program in Civil Engineering.

Typically Available: 1 x \$3,000

THE MARK JOHN STOJIC SCHOLARSHIPS

Established in 1997 by bequest of Mark John Stojic.

Requirements: Two scholarships to be awarded to students who have completed Level III of a Materials Science and Engineering program who, have attained the highest Fall-Winter Average.

Typically Available: 2 x \$1,800

THE ROBERT SOWERBY MEMORIAL SCHOLARSHIP

Established in 2002 by family, friends and colleagues, in memory of Dr. R. Sowerby, a professor of Mechanical Engineering.

Requirements: To be awarded to a student who has completed at least Level I in the Bachelor of Technology program with the highest Grade Point Average.

Typically Available: 1 x \$150

THE DR. DAVID THOMPSON SCHOLARSHIP

Established in 2010 by Tom Jenkins, B.Eng.Mgt. (Class of '82) and Toby Jenkins to honour Tom's Engineering Physics professor, Dr. David Thompson.

Requirements: To be awarded to students who have completed Level I with the highest Fall-Winter Average and who are entering a Level II Engineering Physics program. The recipient may not hold another scholarship of equal or greater value.

Typically Available: 1 x \$5,000

THE PROFESSOR DAVID THOMPSON SCHOLARSHIP

Established in 2016 by Robert Walker (M.Eng. '75, Ph.D. '77 & D.Sc. 2013) and Karen Walker to honour Robert's Engineering Physics graduate supervisor Dr. David Thompson. Robert Walker was Dr. Thompson's first Ph.D. student.

Requirements: To be awarded to a student who has completed Level I Engineering with a high Fall-Winter Average and who is entering a Level II Engineering Physics program.

Typically Available: 1 x \$5,000

THE WALTERS INC. SCHOLARSHIP

Established in 2018 by Walters Inc.

Requirements: To be awarded to students who have completed Level IV of a Civil Engineering and Management program and attained high averages.

Typically Available: 2 x \$5,000

OPEN TO THE FACULTY OF HEALTH SCIENCES

THE HENRIETTA ALDERSON SCHOLARSHIP

Established in 2002 in memory of Henrietta Jane Alderson.

Requirements: Two scholarships to be awarded to students in the B.Sc.N. program who are enrolled in Level II (A Stream) or Level IV (B and C Streams) and, in the judgment of the School of Nursing, have demonstrated exceptional achievement in required science courses.

Typically Available: 2 x \$3,500 each

THE STEVE BAXTER MEMORIAL SCHOLARSHIP

Established in 2017 in memory of Steve Baxter.

Requirements: To be awarded to a student in the B.Sc.N. program who, in the judgement of the School of Nursing, has demonstrated exceptional humble leadership qualities.

Typically Available: 1 x \$1,000

THE CHARU LATE BHADURI SCHOLARSHIP IN NURSING

Established in 2011 by Dr. Basanti Majumdar, M.Sc. (Class of '87) and faculty member of the School of Nursing since 1971, in memory of her mother.

Requirements: To be awarded to a student enrolled in the McMaster nursing program who, in the judgment of the School of Nursing, demonstrates academic excellence and a commitment to the patient-nurse relationship. Preference will be given to students who have enrolled in, or completed, an overseas clinical placement in a developing country.

Typically Available: 1 x \$800

THE DR. GARTH BOULTER MEMORIAL AWARD

Established in 2007 by G. Stanley Boulter, B.A. (Class of '49) and Irma E. Boulter in memory of their son, Garth E. Boulter, Associate Professor of Obstetrics and Gynecology in the School of Medicine.

Requirements: A variable number to be awarded to students who have completed an overseas' clinical placement elective in Level III of the Midwifery program and who, in the judgment of the Midwifery Program, have demonstrated academic excellence, leadership and social awareness. Preference will be given to students who have completed their electives in Africa.

Typically Available: 5 x \$2,000

THE DEBORAH M. BROWN SCHOLARSHIP IN BIOMEDICAL DISCOVERY AND COMMERCIALIZATION

Established in 2012 by Canada's Research-Based Pharmaceutical Companies (Rx&D) and EMD Inc., Canada in honour of Ms. Deborah M. Brown, Past Chair of the Rx&D Board of Directors and President and Managing Director, EMD Inc., Canada.

Requirements: To be awarded to a student in the Bachelor of Biomedical Discovery and Commercialization who, in the judgment of a selection committee from the program, has demonstrated excellence in academic achievement.

Typically Available: 3 x \$5,000

THE CLASS OF 1966 NURSING SCHOLARSHIP

Established in 2012 by the School of Nursing, Class of '66.

Requirements: One scholarship to be awarded to a student in the School of Nursing who, in the judgment of the School of Nursing, has demonstrated outstanding academic achievement in any level.

Typically Available: 1 x \$1,000

THE ELIZABETH PETRA COOKE MEMORIAL SCHOLARSHIP

Established in 2006 in memory of Elizabeth Petra Cooke, B.Sc.N. (Class of '03).

Requirements: To be awarded to a student in a Post R.N. or Post R.P.N. program who, in the judgment of the School of Nursing, has demonstrated a commitment to the nursing profession as a frontline healthcare provider and/or to mentoring nurses as they further their education.

Typically Available: 1 x \$1,000

THE CLARA I. ELMAN SCHOLARSHIPS

Established in 2002 by Clara I. (Graham) Elman (Class of '46), faculty member of the School of Nursing from 1949 to 1953.

Requirements: A variable number of scholarships to be awarded to students who have completed at least Level II in a program in Nursing who, in the judgment of the School of Nursing, demonstrate academic excellence and a commitment to the patient nurse relationship.

Typically Available: 5 x \$5,000

THE MICHAEL KAMIN HART MEMORIAL FUND

Established in 2011 by the Michael G. DeGroot Institute for Infectious Disease Research along with family, friends and donors in memory of Michael Kamin Hart, who was a student within the Institute.

Requirements: Aligned with Michael's academic trajectory, to be awarded to: (a) an undergraduate summer student in either their third or fourth year of study who plans to go on to graduate work at McMaster; and (b) an MSc student; and (c) a PhD student and (d) a recipient of the Staff Award of Excellence. The recipients must be associated with the Michael G. DeGroot Institute for Infectious Disease Research and have demonstrated academic excellence. To be awarded on the recommendation of the Executive Committee of the Michael G. DeGroot Institute for Infectious Disease Research.

Typically Available: 1 x \$500

THE DR. SHIGEAKI HINOHARA SCHOLARSHIP

Established in 2003 by Dr. Shigeaki Hinohara and the School of Nursing.

Requirements: To be awarded every three years to a student who has completed Level I in the B.Sc.N. Program and who, in the judgment of the School of Nursing, has demonstrated outstanding academic achievement in health sciences and behavioural science courses. The scholarship is tenable for up to three years provided the recipient maintains a Grade Point Average of 8.0.

Typically Available: 1 x \$2,400 (\$800 each year)

THE DONALD LAVIGNE MEMORIAL SCHOLARSHIP

Established in 2007 by Willis McConnell and Ray Skelton in memory of Donald Lavigne to honour his dedication as a registered practical nurse at Chedoke Hospital ('65-'89).

Requirements: A variable number to be awarded to students in their first year of study who, in the judgment of the School of Nursing, have demonstrated academic excellence in a Post Registered Nursing or Post Registered Practical Nursing program.

Typically Available: 4 x \$800

THE JANET MCKNIGHT AWARD

Established in 1994 by faculty, friends and students in memory of Janet McKnight, beloved colleague and teacher, a recognized expert in educational methodology and small-group, problem-based learning.

Requirements: To be awarded to a student entering Level IV of a program in Nursing who, in the judgment of the School of Nursing has demonstrated notable academic achievement and leadership in clinical and educational aspects of gerontology or, problem based, self-directed learning in nursing education.

Typically Available: 2 x \$600

THE DR. O.W. NIEMEIER SCHOLARSHIP

Established in 1938 and augmented in 1952 by Dr. O.W. Niemeier, M.D.FRCPS(E).
Requirements: To be awarded to the student who has completed Level II in the Nursing program with the highest Grade Point Average.
Typically Available: 2 x \$1,100

THE LORIE SCOTT NURSING SCHOLARSHIP

Established in 2016 by Lorie Scott, B.Sc.N. (Class of '79) CD.
Requirements: To be awarded to students in the School of Nursing who have completed at least Level I and who, in the judgment of the School of Nursing, have demonstrated a significant commitment to community through service, teaching, advocacy and/or health promotion in Canada. This award is open to second degree students.
Typically Available: 1 x \$5,000

THE FRED AND DOROTHY O'LEARY SCHOLARSHIP

Established in 2017 by Jennifer O'Leary, BSc (Class of '90), MA, MLT in honour of her grandparents, Fred and Dorothy O'Leary, who though unable to attend higher education themselves, valued its role in the lives of individuals and Canadian society.
Requirements: This scholarship continues her grandparents' tradition of supporting education for others, and is to be awarded to an undergraduate student enrolled in the Bachelor of Health Sciences (Honours).
Typically Available: 1 x \$1,000

THE DARREN LEE PRATT MEMORIAL AWARD FOR ACADEMIC/CLINICAL ACHIEVEMENT

Established in 2017 by Maria Pratt (Class of '98, 2004, & 2016), faculty member of the School of Nursing, in loving memory of her husband.
Requirements: To be awarded to an undergraduate student who has completed Level II or higher of a Nursing program who, in the judgment of the School of Nursing demonstrates academic excellence, an interest in Oncology nursing and commitment to patient and family-centered care.
Typically Available: 1 x \$1,000

THE CLARENCE L. STARR PRIZE

Established in 1946 in memory of Dr. C.L. Starr, M.D., LL.D., F.A.S.S., Professor of Surgery at the University of Toronto, and an honorary alumnus of McMaster University (LL.D. 1922).
Requirements: To be awarded to the student who has completed Nursing I and who attains the highest Fall-Winter Average.
Typically Available: 1 x \$150

THE CORELENE HELEN TOSTEVIN SCHOLARSHIPS

Established in 1998 by bequest of Corelene Tostevin.
Requirements: To be awarded to students enrolled in an accelerated BScN program and who, in the judgment of the School of Nursing, have demonstrated notable academic achievement.
Typically Available: 5 x \$250

OPEN TO THE FACULTY OF HUMANITIES

THE MARGARET E. ORR AND EDWARD C. ALLEN PRIZE

Established in 2011 in memory of Margaret Elizabeth Orr and Edward Charles Allen.
Requirements: To be awarded to a student enrolled in a program in English who, in the judgment of the Department of English and Cultural Studies, has submitted an essay on Irish literature that demonstrates the highest degree of analytical skill and critical insight.
Typically Available: 1 x \$1,000

THE MAQBOOL AZIZ MEMORIAL SCHOLARSHIP

Established in 2001 by family, friends and colleagues in memory of Maqbool Aziz, Professor of English from 1969 to 2000.
Requirements: To be awarded to a student in an English program who attains the highest grade in ENGLISH 2LB3-Twentieth and Twenty-First Century British Literature and Film.
Typically Available: 2 x \$450

THE LAURA BALDWIN SCHOLARSHIP

Established in 2005 from the bequest of Laura Baldwin.
Requirements: To be awarded to a student enrolled in a program in English who, in the judgment of the Department of English and Cultural Studies, has submitted an original literary work or poem that demonstrates the highest degree of literary excellence.
Typically Available: 1 x \$650

THE BANK OF MONTREAL HUMANITIES MULTIMEDIA SCHOLARSHIPS

Established in 1999 by the Bank of Montreal.
Requirements: A variable number of scholarships to be awarded to students entering Level II, III or IV of the Humanities Combined Honours Multimedia program who, in the judgment of the Department of Communication Studies and Multimedia, demonstrate outstanding academic achievement in the Humanities Multimedia program or great promise in the area of Humanities multimedia.
Typically Available: 8 x \$1,000

THE LOUISE E. BETTGER SCHOLARSHIPS IN MUSIC

Established in 1982 in memory of Louise E. Bettger of New Hamburg, Ontario, by her nieces and nephews.
Requirements: Three scholarships to be awarded to students in an Honours program in Music who, in the judgment of the School of the Arts, are outstanding: (a) one in the area of choral or vocal music to a student enrolled in Level II or above; (b) one to a keyboard student enrolled in Level II or above; and (c) one to a student who has completed Music 1 and who has demonstrated overall musical excellence.
Typically Available: 3 x \$500 each

THE BRIAN BLAKEY MEMORIAL SCHOLARSHIP

Established in 1979 in memory of Dr. Brian Blakey, Professor of French, by his friends, colleagues and former students, on behalf of his wife, Dorothy.
Requirements: To be awarded to the student who attains the highest Fall-Winter Average in Level III of an Honours program in Classics, Theatre & Film Studies, English, French or Linguistics and Languages. Students must have achieved a B- in either LINGUIST 1A03 or LINGUIST 1AA3.
Typically Available: 1 x \$500

THE HILDA DOROTHY BORMAN SCHOLARSHIP

Established in 1998 by bequest of Hilda Dorothy Borman.
Requirements: To be awarded to a student studying piano who, in the judgment of the School of the Arts, has attained high academic standing.
Typically Available: 1 x \$1,050

THE JOAN FRANCES BOWLING SCHOLARSHIPS

Established in 1997 from the estate of Marie Bowling in memory of her daughter, Joan Frances Bowling.
Requirements: Two scholarships to be awarded to outstanding classical music scholars enrolled in Level II and above of a Music program and who, in the judgment of the School of the Arts, have demonstrated excellence in Music.
Typically Available: 2 x \$1,500

THE BRIEN SCHOLARSHIP IN PHILOSOPHY

Established in 1944 by Dr. J.W. Brien of Windsor.

Requirements: To be awarded to the student who is enrolled in Level II of an Honours program in Philosophy and who, in the judgment of the Department of Philosophy, shows the most academic promise.

Typically Available: 1 x \$475

THE TEN BROEKE-BENSEN MEMORIAL SCHOLARSHIP

Established in 1990 in memory of Dr. James Ten Broeke and Dr. Roy C. Bensen, former Heads of the Department of Philosophy.

Requirements: To be awarded to a student enrolled in Level II or above of an Honours Program in Philosophy who, in the judgment of the Department of Philosophy, has demonstrated outstanding academic achievement.

Typically Available: 2 x \$1,000

THE ELLA HALSTEAD CAMPBELL PRIZE

Established in 1978 by Mrs. Verna Caskey and Miss June Caskey in memory of Ella Halstead Campbell and augmented by Mrs. Edna M. Miller in 1987.

Requirements: To be awarded to a keyboard student, enrolled in any level of a solo performance course, who is outstanding in the judgment of the School of the Arts.

Typically Available: 1 x \$200

THE CANADIAN ITALIAN PROFESSIONAL ASSOCIATION OF HAMILTON-HALTON SCHOLARSHIP IN ITALIAN STUDIES

Established in 2011 by the Canadian Italian Business and Professional Association of Hamilton-Halton.

Requirements: A variable number to be awarded to students who, in the judgment of the Department of Linguistics and Languages, have demonstrated high academic achievement in Italian studies.

Typically Available: 1 x \$1,000

THE NORMAN N. CASKEY MEMORIAL PRIZE

Established in 1983 by Mrs. Verna Caskey and Miss June Caskey in memory of husband and father.

Requirements: To be awarded to a student enrolled in Level II or above of an Honours program in Music and who, in the judgment of the School of the Arts, has demonstrated musical excellence.

Typically Available: 1 x \$150

THE CHIN-CHIN AWARD IN ELECTROACOUSTIC STUDIES/SOUND ART

Established in 2011, the award celebrates the continuing artistic contribution of Chin-Chin Chen, the Taiwanese-American composer whose music degree is in both performance and composition.

Requirements: To be awarded to a student who has completed the Introduction to Digital Audio (MMEDIA 2G03/MUSIC 2Z03) or equivalent and at least Level II of any program in the Faculty of Humanities who, in the judgment of the Faculty, has demonstrated a deep interest in the area of electroacoustic studies or sound art. Preference given to a student in an Honours program.

Typically Available: 1 x \$800

THE COMPARATIVE LITERATURE PRIZE

Established in 1988.

Requirements: To be awarded to a student who, in the judgment of the Department of English and Cultural Studies, has achieved notable standing in Level II comparative literary studies courses.

Typically Available: 1 x \$250

THE CRANSTON PRIZES

Established in 1958 by William H. Cranston of Midland in honour of his parents, J. Herbert Cranston (Class of '05) and Eva Wilkins Cranston (Class of '07).

Requirements: Two prizes to be awarded for excellence in the study of Canadian literature: (a) one for the highest grade in ENGLISH 2G06 A/B, and (b) one for the highest grade in ENGLISH 2C03.

Typically Available: 2 x \$175 each

THE MARGERY E. DIXON MEMORIAL SCHOLARSHIP

Established in 2003 in loving memory of Margery E. Dixon (Class of '35) by Geraldine Phenix.

Requirements: To be awarded to a student who has completed Level II of an Honours English program and who attains the highest Fall-Winter Average.

Typically Available: 2 x \$2,000

THE ROSEMARY DOUGLAS-MERCER MEMORIAL PRIZE

Established in 1989.

Requirements: To be awarded to a student enrolled in Level II of an Honours program in French and who has attained the highest average in FRENCH 2BB3 and one of FRENCH 2J03 or FRENCH 2JJ3.

Typically Available: 2 x \$175

THE HORACE A. DULMAGE PRIZE IN PHILOSOPHY

Established in 1976 in honour of Professor Horace A. Dulmage by his colleagues and friends upon the occasion of his retirement from McMaster University.

Requirements: To be awarded to the full-time student in Level II of an Honours program in Philosophy who attained the most notable standing in his or her Level I program.

Typically Available: 1 x \$200

THE HAROLD AND GERTRUDE FREEMAN SCHOLARSHIP IN FRENCH

Established in 1981 by members of the Class of '43 as a grateful tribute to Harold A. and Gertrude Freeman; Professor Freeman was honorary president of the Class of '43 and was a long-time teacher of French at McMaster University.

Requirements: To be awarded to the student returned from completing Level III abroad as part of the Humanities Study Abroad Program and entering the final term of an Honours program in French who, in the judgment of the Department of French, has attained the highest level of accomplishment in knowledge of French language, literature and culture. The recipient must obtain a Grade Point Average of at least 8.0 and no failures in the review at the end of the Fall/Winter terms immediately prior to enrolling in the Humanities Study Abroad Program.

Typically Available: 2 x \$1,000

THE FRENCH GOVERNMENT BOOK PRIZES

Requirements: To be awarded from time to time to in-course students for proficiency in Level I French.

Typically Available: 3 x Book

THE FRENCH SCHOLARSHIP

Established in 2006 by James McCollum, M.A. (Class of '67).

Requirements: To be awarded to a student who is enrolled in a program in French and who, in the judgment of the Department of French, demonstrates high academic achievement.

Typically Available: 1 x \$6,000

THE MERRILL FRANCIS GAGE SCHOLARSHIPS

Established in 1982 from the estate of Merrill Francis Gage of Hamilton.

Requirements: Two scholarships to be awarded to a student enrolled in Level II or above of an Honours program in Music and who, in the judgment of the School of the Arts, has demonstrated excellence in performance on a keyboard or orchestral instrument.

Typically Available: 2 x \$1,000 each

THE SAMUEL GELLER MEMORIAL BOOK PRIZE

Established in 1999 by Libby Geller in memory of her husband Samuel Geller (Class of '33).

Requirements: To be awarded to a student who has completed Level III of an Honours Program in History and who, in the judgment of the Department of History, has attained notable academic standing.

Typically Available: 1 x \$425 for books

THE GERMAN CONSULATE TORONTO BOOK AWARD

Established in 2012 by the Consulate General of the Federal Republic of Germany, Toronto.

Requirements: To be awarded from time to time to in-course students for proficiency in German.

Typically Available: 1 Book

THE DAPHNE ETHERINGTON GRAHAM MEMORIAL SCHOLARSHIP IN ENGLISH

Established in 1989, in memory of a former student and dedicated servant of the University, by her friends, family, and Professor Emeritus R.P. Graham.

Requirements: To be awarded to the student, enrolled for a first degree after completing Level I, who attains the highest standing in 18 units of English, all taken in the same Fall/Winter terms, with an average standing of at least A-, provided that the recipient is not the holder of another scholarship of equal or greater value.

Typically Available: 1 x \$975

THE DAPHNE ETHERINGTON GRAHAM MEMORIAL SCHOLARSHIP IN HISTORY

Established in 1997 in memory of a former student and dedicated servant of the University, by her friends, family and Professor Emeritus R.P. Graham.

Requirements: To be awarded to the student, enrolled for a first degree after completing Level I, who attains the highest standing in 15 units of History, all taken in the same Fall/Winter terms, with an average of at least A-.

Typically Available: 1 x \$1,000

THE H.B. GREENING BOOK PRIZE

Established in 1969 by bequest of Gladys Powis Greening in memory of her husband, Herald Benjamin Greening.

Requirements: To be awarded to the student enrolled in Level II of an Honours program in Music and who, in the judgment of the School of the Arts, has demonstrated excellence in music.

Typically Available: 1 x \$100 for books

THE FRED AND BARBARA HACKER SCHOLARSHIP

Established in 2015 by Fred Hacker, B.A. (Class of '68), J.D., Q.C. and Barbara (Macaulay) Hacker, B.A. (Class of '69) to recognize students for their achievements and inspire them to contribute to the cultural fabric of their communities.

Requirements: To be awarded to a student enrolled in the School of the Arts who has attained a high Fall-Winter Average.

Typically Available: 2 x \$1,000

THE ALISE ALEXANIAN HASSEL MEMORIAL SCHOLARSHIP

Established in 2007 by family and friends in memory of Alise Alexanian Hassel, B.A. (Class of '98). A gifted young artist and graduate of the Studio Art Program who did not live to fulfill her potential.

Requirements: To be awarded to a student enrolled in Level II or above in an Honours Art program who, in the judgment of the School of the Arts, has demonstrated outstanding achievement in Studio Arts.

Typically Available: 2 x \$800

THE BERTRAM OSMER HOOPER SCHOLARSHIP

Established in 1957 by bequest of Isobel F. Hooper.

Requirements: To be awarded in Arts.

Typically Available: 1 x \$250

THE HUGHES SCHOLARSHIP

Established in 1993 by Heidi Dickensen-Hughes in memory of her husband Peter Hughes (Class of '69).

Requirements: To be awarded to a student enrolled in Level II or above of the Music Program who, in the judgment of the School of the Arts, has displayed outstanding achievement in Music Education.

Typically Available: 1 x \$200

THE JOSH AND JANE HUNTER SCHOLARSHIP

Established in 2015 by Josh Hunter, B.A.Hon. (Class of '99), and Jane (Sterling) Hunter, B.Eng.Mgt. (Class of '99), MBA (Class of '02), M.Sc. (Class of '13), to recognize outstanding academic achievement.

Requirements: To be awarded to a student in a Classics or English program with the highest GPA.

Typically Available: 1 x \$1,000

THE ROBERT H. JOHNSTON UNDERGRADUATE SCHOLARSHIP IN HISTORY

Established in 2005 to honour Bob Johnston's contribution to undergraduate teaching in history.

Requirements: To be awarded to a student entering Level II of an Honours History program who, in the judgment of the Faculty of Humanities, has achieved the highest Fall-Winter Average in a Level I program.

Typically Available: 1 x \$800

THE JURY PRIZE

Established in 1941 by bequest of J.H. Jury of Bowmanville.

Requirements: To be awarded to the student enrolled in Level II of the Honours History program and who attains the highest Fall-Winter Average.

Typically Available: 1 x \$1,500

THE KILPATRICK SCHOLARSHIP IN ENGLISH

Established in 2018 from the estate of Eleanor Jean McLeish.

Requirements: To be awarded to undergraduate students enrolled in a Level I program in the Faculty of Humanities who attain high grades in one or more Level I English courses.

Typically Available: 1 x \$4,000

THE KIT MEMORIAL SCHOLARSHIP

Established in 1936 by the Hamilton Branch of the Canadian Women's Press Club (now the Media Club of Canada, Hamilton Branch) in memory of the brilliant journalist and writer, the first president of the Canadian Women's Press Club, Kathleen Blake Coleman, widely known on this continent as Kit.

Typically Available: 1 x \$200

THE E. DORIS LAWRENCE SCHOLARSHIP

Established in 1999 in memory of E. Doris Lawrence (Class of '47).

Requirements: To be awarded to a student who, in the judgment of the Department of French, has demonstrated academic excellence in French.

Typically Available: 2 x \$2,200

THE LINGUISTICS PRIZE

Established in 1988.

Requirements: To be awarded to a student in an Honours program in Linguistics who, in the judgment of the Department of Linguistics and Languages, has achieved notable standing in Level II courses in Linguistics.

Typically Available: 2 x \$250

THE ELEANOR DORNBUSH MARPLES PRIZE IN ART HISTORY

Established in 1985 by Mrs. Barbara Niedermeier and her family in memory of her sister.

Requirements: To be awarded to a student who, in the judgment of the School of the Arts, has demonstrated outstanding achievement.

Typically Available: 2 x \$175

THE ELEANOR DORNBUSH MARPLES PRIZE IN THEATRE & FILM STUDIES

Established in 1987 by Vaughan W. Marples in memory of his wife.

Requirements: To be awarded to a student in Level II of a Theatre & Film program who, in the judgment of the School of the Arts, has achieved academic excellence.

Typically Available: 1 x \$125

THE H.W. MCCREADY PRIZE IN BRITISH HISTORY

Established in 1981 in memory of Professor H.W. McCreedy, a member of the Department of History from 1943 to 1975, by former students, colleagues, and friends.

Requirements: To be awarded to a Level II student who, in the judgment of the Department of History, attains notable standing in British History courses.

Typically Available: 1 x \$100

THE MCGREGOR-SMITH-BURR MEMORIAL SCHOLARSHIP

Established in 1910 by the Class of 1912 in Arts, in memory of their classmates, Percy Neil McGregor, Lee Wilson Smith and George William Burr, and supplemented in 1944 by bequest from Professor R. Wilson Smith, father of Lee Wilson Smith.

Requirements: To be awarded to the student enrolled in Level III of the Honours English and History program and who has the highest Fall-Winter Average.

Typically Available: 1 x \$525

THE ALEXANDER GORDON MCKAY SCHOLARSHIP

Established in 1990 by friends and colleagues of Professor A.G. McKay, first Dean of the Faculty of Humanities from 1968 to 1973, to mark his retirement after 33 years of service at McMaster University.

Requirements: To be awarded to a student enrolled in Level III of an Honours Classics program and who, in the judgment of the Department of Classics, has attained high academic standing. Preference will be given to students from the Regional Municipality of Hamilton-Wentworth.

Typically Available: 1 x \$500

THE EVELYN RUTH MCLEAN SCHOLARSHIP IN CANADIAN HISTORY

Established in 2012 by Laurie R. McLean (Class of '74) in memory of her mother Evelyn Ruth McLean who loved teaching, believed in the value of education and had a passion for Canadian history.

Requirements: To be awarded to a student taking courses in Canadian history who, in the judgment of the Department of History, has demonstrated outstanding academic achievement and the desire to excel in the study of Canada's past.

Typically Available: 1 x \$1,150

THE PETER MCPHATER MEMORIAL SCHOLARSHIP

Established in 1988 by Peter McPhater's friends in recognition of his art, craftsmanship and humanitarianism.

Requirements: To be awarded to a student enrolled in Level III of a program in Honours Art or Honours Art History and who, in the judgment of the School of the Arts, is outstanding.

Typically Available: 1 x \$450

THE MERRIAM SCHOOL OF MUSIC SCHOLARSHIP

Established in 2003 by the Merriam School of Music.

Requirements: To be awarded to an Honours Music student enrolled in Level II or above and who, in the judgment of the School of the Arts, has demonstrated good academic standing, excellent musicianship skills, a strong commitment to teaching and community service.

Typically Available: 2 x \$1,000

THE ANNE MURRAY SCHOLARSHIP

Established in 1985 in memory of Anne M. Murray (Class of '82) by her family.

Requirements: To be awarded to a student enrolled in Level II or above and who, in the judgment of the Department of Linguistics and Languages, has attained notable standing in at least nine units of German courses above Level I.

Typically Available: 2 x \$300

THE ORDER SONS OF ITALY - TRIESTE LODGE #4 SCHOLARSHIP IN ITALIAN STUDIES

Established in 2014 by the Order Sons of Italy - Trieste Lodge #4, in Hamilton.

Requirements: To be awarded to a student who, in the judgment of the Department of Linguistics and Languages, has demonstrated high academic achievement in Italian studies.

Typically Available: 1 x \$1,000

THE IRENE PEARCE SCHOLARSHIP

Established in 1994 by Centenary United Church of Hamilton in honour of Irene Pearce, organist and choir director for fifty-four years.

Requirements: To be awarded to a student enrolled in Level I or above of an Honours Music Program who, in the judgment of the School of the Arts, has attained notable academic standing and demonstrated excellence in keyboard performance.

Typically Available: 1 x \$1,500

THE BRIAN POCKNELL MEMORIAL SCHOLARSHIP

Established in 2004 in memory of Brian Pocknell.

Requirements: To be awarded to an undergraduate student who has completed Level II in a French program and, in the judgment of the Department of French, has achieved notable academic standing.

Typically Available: 1 x \$750

THE DR. JOHN A. PYLYPIUK SCHOLARSHIP

Established in 1967 in memory of Dr. John A. Pylypiuk and in recognition of Canada's Centennial Year.

Requirements: To be awarded to the student who has completed Level II of an Honours program in History with the highest Fall-Winter Average and who in that term achieves a grade of at least A- in HISTORY 2T03 and HISTORY 2TT3.

Typically Available: 1 x \$700

THE RAND MEMORIAL PRIZE OF CLASS '98

Established by the Class of 1898 in Arts, on the occasion of the 25th anniversary of graduation, 1923, in memory of Chancellor Theodore Harding Rand, to encourage original literary work.

Requirements: To be awarded to the student enrolled in Level III and who, in the judgment of the Department of English and Cultural Studies, has made the most notable original contribution to student publications.

Typically Available: 2 x \$250

THE HELEN RAY SCHOLARSHIP IN FINE ARTS

Established in 2012 by Dr. Jim Ray (Class of '75) and Annette Ray, in honour of Jim's mother, Helen (Burkholder) Ray, and in recognition of her lifelong passion for the fine arts.

Requirements: To be awarded to a student in the Studio Art program who has completed Studio Art I and who, in the judgment of the School of the Arts, has demonstrated outstanding academic achievement in Studio Art.

Typically Available: 1 x \$2,000

THE SHARON REEVES SCHOLARSHIP

Established in 1987 by Kevin W. Reeves (Class of '80) in memory of his wife, Sharon (Class of '79).

Requirements: To be awarded to a student entering Level III or IV of an Honours program in Music (Education) and who, in the judgment of the School of the Arts, has attained notable standing.

Typically Available: 1 x \$425

THE ELLA JULIA REYNOLDS SCHOLARSHIPS

Established in 1984 by bequest of Ella Julia Reynolds of Hamilton.

Requirements: Two scholarships to be awarded on the basis of scholarship and character to students enrolled in Level II or above of the Honours English or the Honours English and History programs with a Fall-Winter Average of at least 9.5. The recipients must not be holders of another scholarship.

Typically Available: 2 x \$1,000

THE GLADYS RICHARDS SCHOLARSHIP

Established in 2002 by bequest of Gladys Richards.

Requirements: Two scholarships to be awarded to students who have completed at least Level II of a single Honours program in English or a Combined Honours English and History program who, in the judgment of the Departments, have demonstrated outstanding academic achievement. Students may not hold another scholarship of equal or greater value.

Typically Available: 2 x \$2,000

THE RONALD J. ROLLS SCHOLARSHIP

Established in 2012 by bequest to recognize the exceptional achievements of Ronald J. Rolls, B.A. (Class of '54), LL.B., Q.C., L.S.M.

Requirements: To be awarded to a student who has completed Humanities I with the highest Fall-Winter Average and who is entering an Honours English program.

Typically Available: 2 x \$2,000

THE E. TOGO SALMON PRIZE IN HISTORY

Established in 1973 by friends and colleagues of Professor E.T. Salmon on his retirement, in recognition of his outstanding contribution to the Department of History.

Requirements: To be awarded to the student enrolled in Level III and who, in the judgment of the Department of History, attains notable standing in an Honours program in History.

Typically Available: 1 x \$200

THE NOEL SANDUSKY MEMORIAL PRIZE

Established in 1994 by family and friends in memory of Noel Sandusky.

Requirements: To be awarded to a student enrolled in Level II of a program in History who, in the judgment of the Department of History, attains notable academic standing in at least nine units of History courses.

Typically Available: 1 x \$150 for books

THE LARRY SAYERS PRIZE IN EAST ASIAN HISTORY

Established in 1983 in memory of Larry P. Sayers (Class of '82) by his friends.

Requirements: To be awarded to the student who, in the judgment of the Department of History, has demonstrated outstanding achievement in at least six units of courses work in East Asian history.

Typically Available: 1 x \$275

THE FEDOR SCHNEIDER SCHOLARSHIP IN ITALIAN

Established in 2004 by bequest of Mary Anna Schneider.

Requirements: To be awarded to a student entering Level III who, in the judgment of the Department of Linguistics and Languages, has achieved notable academic standing in Italian courses. Open to non-native speakers of Italian only.

Typically Available: 3 x \$2,000

THE SCHOOL OF THE ARTS SCHOLARSHIP IN MUSIC

Established in 1993 by the Department of Music which later became part of the School of the Arts.

Requirements: To be awarded to a student who, in the judgment of the School of the Arts, has demonstrated academic excellence in Music.

Typically Available: 1 x \$1,000

THE SHEILA SCOTT SCHOLARSHIP IN ENGLISH

Established in 1983 by graduates of McMaster University and friends in honour of Sheila Scott, Dean of Women from 1965 to 1982, in recognition of her outstanding contribution to the University community during 25 years of service.

Requirements: To be awarded to the student enrolled in Level III of the Honours English program, and who attains the highest Fall-Winter Average.

Typically Available: 2 x \$800

THE LOUIS J. SHEIN SCHOLARSHIP

Established in 1990 by family and friends in memory of Dr. L.J. Shein, founding chair of the Russian Studies program and faculty member from 1958 to 1980.

Requirements: To be awarded to a student who, in the judgment of the Department of Linguistics and Languages, has achieved notable standing in a Russian language course.

Typically Available: 1 x \$375

THE LEONA ALLERSTON RYAN AND GORDON HENRY STEVENS MEMORIAL SCHOLARSHIP

Established in 1995 by Elaine Keillor in memory of Leona and Gordon Stevens.

Requirements: To be awarded to a student enrolled in Level II or above of an Honours program in Music or Art who, in the judgment of the School of the Arts, has demonstrated outstanding achievement.

Typically Available: 1 x \$525

THE MARIE L. STOCK SCHOLARSHIP

Established in 1987 by the French Section of the Department of Romance Languages in honour of Marie L. Stock, Professor Emeritus of French, and Chair of the Department of Romance Languages from 1962 to 1965.

Requirements: To be awarded to the student enrolled in Level III of an Honours program in French and who, in the judgment of the Department of French, has achieved notable academic standing.

Typically Available: 1 x \$450

THE JOHN TOTH MEMORIAL PRIZE

Established in 1983 in memory of John Toth by his friends.

Requirements: To be awarded to the student who attains the highest average in any six units of Level III or IV Latin courses.

Typically Available: 1 x \$50

THE JOHN H. TRUEMAN SCHOLARSHIP

Established in 1989 as a tribute to Professor John H. Trueman by his many friends, colleagues and students on the occasion of his retirement from McMaster University.

Requirements: To be awarded to the student who has completed Level 1, and who in the judgment of the Department of History, has achieved notable academic standing in Level 1 History courses.

Typically Available: 1 x \$250

THE VAREY SCHOLARSHIP

Established in 1978 by J.C. Varey, Dundas, in memory of Albert E. Varey.

Requirements: To be awarded to a student in an Honours Program in Classics who, in the judgment of the Department of Classics has achieved notable academic standing.

Typically Available: 1 x \$300

THE WALLER FAMILY MUSIC SCHOLARSHIP

Established in 2014 by the Waller Family in memory of Thomas Edward and Norma Waller.

Requirements: To be awarded to a student in Honours Music who, in the judgment of the School of the Arts, has attained notable academic standing and musical proficiency. Preference will be given to students studying brass instruments.

Typically Available: 1 x \$2,000

THE F.W. WATERS SCHOLARSHIP IN PHILOSOPHY

Established in 1990 by the former students, colleagues and friends of Dr. F.W. Waters, Professor from 1935 to 1959.

Requirements: To be awarded to the student entering Level IV of an Honours Program in Philosophy who, in the judgment of the Department of Philosophy, shows the most academic promise.

Typically Available: 1 x \$750

THE THOMAS E. WILLEY SCHOLARSHIP

Established in memory of Dr. Thomas E. Willey in 1996 by his family, colleagues and friends.

Requirements: To be awarded to an undergraduate student who, in the judgment of the Department of History and the Department of Linguistics and Languages, has demonstrated excellence in German studies.

Typically Available: 2 x \$400

OPEN TO THE FACULTY OF SCIENCE

THE W.K. ALLAN MEMORIAL SCHOLARSHIP

Established in 1994 in memory of William Kellock Allan (Class of '31) by his wife, Yvonne and augmented in 2002 by his family.

Requirements: To be awarded to a student entering in the final level of a program in Mathematics or Physics who attains the highest Fall-Winter Average.

Typically Available: 1 x \$1,100

THE CHARLES MURRAY BALL SCHOLARSHIPS IN EARTH SCIENCES

Established in 1991 by May A. Ball in memory of her brother Murray Ball.

Requirements: Four scholarships to be awarded to students entering Level II, III, IV or V of a B.Sc. program in the School of Geography and Earth Sciences who, in the judgment of the School of Geography and Earth Sciences, have attained notable standing. Ordinarily, not more than one scholarship will be awarded to any one program.

Typically Available: 4 x \$2,300

THE J. DOUGLAS BANKIER MEMORIAL SCHOLARSHIP

Established in 1977 in memory of Professor J. Douglas Bankier by his friends, colleagues, and former students.

Requirements: To be awarded to the student enrolled in Level III or above of an Honours program in the Department of Mathematics and Statistics, who attains the highest Fall-Winter Average and who in that term achieves a grade of at least B in STATS 3D03.

Typically Available: 1 x \$400

THE STANLEY T. BAYLEY SCHOLARSHIP IN BIOLOGY

Established in 2007 by the friends, former students and colleagues of Stanley T. Bayley in recognition of contributions to research and leadership in the Department of Biology.

Requirements: To be awarded to a student enrolled in Level II or above of an Honours Biology program who, in the judgment of the Department of Biology, has demonstrated outstanding academic achievement and has focused on studies in Cell Biology.

Typically Available: 2 x \$800

THE BEAUTY COUNSELORS OF CANADA SCHOLARSHIP

Established in 1956 by Beauty Counselors of Canada Limited.

Requirements: To be awarded to the student who has completed Science I with the highest Fall-Winter Average and who is entering in Level II of the Honours Biochemistry, Honours Chemistry, or Honours Chemical Biology program.

Typically Available: 1 x \$350

THE DR. AND MRS. F.R. BRITTON SCHOLARSHIP IN MATHEMATICS

Established in 1962 by Dr. and Mrs. F.R. Britton and augmented by Mrs. Britton's bequest in 1982.

Requirements: To be awarded to the student enrolled in Level II of an Honours program in Mathematical Sciences who attains the highest Fall-Winter Average. Tenable in Levels 3 and 4 provided that the recipient maintains satisfactory standing in an Honours program in which mathematics, pure or applied, is the major subject of study.

Typically Available: 1 x \$1,200 (\$600 each year)

THE CRISPIN CALVO SCHOLARSHIPS

Established in 1992 by Dr. J.S. Kirkaldy and Dr. W.W. Smeltzer.

Requirements: Two scholarships to be awarded, one to a student with the highest combined average in CHEM 2LB3 and CHEM 2PD3, the other to a student with the highest combined average in MATLS 2B03 and 2D03.

Typically Available: 2 x \$1,700 each

THE CANADIAN SOCIETY FOR CHEMISTRY PRIZES

Established in 1947 by the Chemical Institute of Canada.

Requirements: Two awards to be made to students who are entering their final year of study: (a) one to a student in an Honours Chemistry program who attained high standing; (b) one to a student in an Honours Biochemistry or Honours Chemical Biology program who attained high standing.

Typically Available: 2 x Medal and Certificate

THE DOUGLAS DAVIDSON SCHOLARSHIP IN GENETICS

Established in 2006 by the friends and colleagues of Dr. D. Davidson in recognition of his many years of contributions to research and undergraduate teaching.

Requirements: To be awarded to a student enrolled in Honours Molecular Biology and Genetics who obtains the highest grade in MOLBIOL 2C03.

Typically Available: 1 x \$400

THE DUBECK BIOCHEMISTRY AWARD

Established in 2004 by Dr. Michael Dubeck, B.Sc. (Class of '51) and M.Sc. (Class of '52).

Requirements: To be awarded to a student enrolled in Level III or above of an Honours program in Biochemistry who, in the judgment of the Department of Biochemistry and Biomedical Sciences, has achieved notable academic standing and has an interest in pursuing an academic career in basic biochemical research.

Typically Available: 2 x \$3,000

THE DUBECK CHEMISTRY AWARD

Established in 2004 by Dr. Michael Dubeck, B.Sc. (Class of '51) and M.Sc. (Class of '52).

Requirements: To be awarded to a student in Level III or above of an Honours program in Chemistry or Chemical Biology who, in the judgment of the Department of Chemistry and Chemical Biology, has achieved notable academic standing and has an interest in pursuing an academic career in basic chemical research.

Typically Available: 1 x \$3,000

THE KLAUS FRITZE MEMORIAL PRIZE

Established in 1980 by friends of Professor K. Fritze.

Requirements: To be awarded to the student enrolled in Level II of an Honours Chemistry or Chemical Biology program with the highest Fall-Winter Average.

Typically Available: 1 x \$350

THE J.L.W. GILL PRIZES

Established in 1944 by bequest of J.L.W. Gill, B.A., Principal of Hamilton Technical School.

Requirements: Nine scholarships to be awarded on the basis of Grade Point Averages to students enrolled in Level III of Honours B.Sc. programs. Ordinarily, not more than one scholarship will be awarded in any one discipline.

Typically Available: 9 x \$325

THE HAMILTON CHEMICAL ASSOCIATION PRIZE

Established in 1953 by the Trustees of the Hamilton Chemical Association in memory of Dean C.E. Burke.

Requirements: To be awarded to the student who has completed Level I and an additional 30 - 45 units of an Honours program in Chemistry or Chemical Biology and who attains the highest Grade Point Average.

Typically Available: 1 x \$150

THE BILL AND RIA HART SCHOLARSHIP

Established in 2011 by bequest of Ria Maude Hart.

Requirements: To be awarded to a student in an Honours B.Sc. program in the School of Geography and Earth Sciences who, in the judgment of the School of Geography and Earth Sciences, has demonstrated outstanding academic achievement in the area of environmental or ecological studies.

Typically Available: 2 x \$1,000

THE RUSSELL AND WINIFRED HEWETSON SCHOLARSHIP

Established in 2017 by the estate of Winifred Patricia Hewetson.

Requirements: Scholarships to be awarded to students enrolled in Level III and above in an Earth and Environmental Sciences program.

Typically Available: 1 x \$2,500

THE H.L. JACKSON MEMORIAL SCHOLARSHIP

Established in 1989 in memory of Professor H.L. Jackson by his friends and colleagues.

Requirements: To be awarded to the student enrolled in Level III or above of an Honours program in the Department of Mathematics and Statistics, who in the judgment of the department has demonstrated achievement in MATH 3A03 and MATH 3X03 taken in the same Fall/Winter terms.

Typically Available: 1 x \$450

THE STANFORD N. KATAMBALA EARTH SCIENCES PRIZE

Established in 1965 by contributions from friends and associates of Stanford N. Katambala, a Year 3 Honours Geology student from Tanzania, killed in a mine accident in Northern Ontario in September 1964.

Requirements: To be awarded to a student enrolled in Level III of the Honours Earth and Environmental Sciences program and who attains high standing.

Typically Available: 1 x \$75

THE KINESIOLOGY PRIZE

Established in 1982.

Requirements: To be awarded to a student who has completed Level III Kinesiology with a high Grade Point Average and who, in the judgment of the Department of Kinesiology, demonstrates outstanding academic achievement.

Typically Available: 1 x \$100

THE GEORGE P. AND LEATHA M. KEYS SCHOLARSHIPS

Established in 1982 by Mrs. Leatha Keys.

Requirements: Two scholarships to be awarded to students who, in the judgment of the Department of Mathematics and Statistics, have demonstrated outstanding achievement in an Honours program in that Department: (a) one to a student enrolled in Level II; (b) one to a student enrolled in Level III.

Typically Available: 2 x \$750

THE JOHN N.A. LOTT SCHOLARSHIP IN BIOLOGY

Established in 2007 by the friends and colleagues of John N.A. Lott in recognition of his many years of contributions to the Department of Biology.

Requirements: To be awarded to a student enrolled in Level II or above of an Honours Biology program who, in the judgment of the Department of Biology, has demonstrated outstanding academic achievement and shows an interest in biological structure (sub cellular to ecosystem) and function. Preference to be given to a student who demonstrates an interest in plants.

Typically Available: 1 x \$500

THE JOHN AND HELEN MAXWELL SCHOLARSHIP

Established in 2012 by the bequest of Helen Catharine Maxwell.

Requirements: To be awarded to students in a Chemistry or Chemical Biology program who, in the judgment of the Department of Chemistry and Chemical Biology, demonstrate an aptitude in analytical chemistry.

Typically Available: 4 x \$5,000

THE A.B. MCLAY SCHOLARSHIP IN PHYSICS

Established in 1991 by C. Lucy McLay in memory of her late husband, A. Boyd McLay (Ph.D., F.R.S.C.), a member of the Department of Physics from 1930 to 1967.

Requirements: To be awarded to a student enrolled in Level II of an Honours program in Physics and who, in the judgment of the Department of Physics and Astronomy, has attained notable standing.

Typically Available: 1 x \$500

THE BOYD MCLAY SCHOLARSHIP IN PHYSICS

Established in 1977 to commemorate the contributions of Dr. A. Boyd McLay (Class of '22) to teaching and research in optics and spectroscopy at McMaster University from 1930 to 1967.

Requirements: To be awarded to a student enrolled in Level III of an Honours program in Physics with a high Fall-Winter Average.

Typically Available: 1 x \$625

THE DONALD G. MCNABB SCHOLARSHIP

Established in 1989 in memory of Donald G. McNabb (Class of '42) by friends, family and business associates.

Requirements: To be awarded to the student enrolled in Level III of an Honours program in Chemistry or Chemical Biology who, in the judgment of the Department of Chemistry and Chemical Biology, has achieved notable academic standing. Preference will be given to students who demonstrate leadership, self-motivation, and practical aptitude appropriate for a future in the chemical industry.

Typically Available: 1 x \$925

THE J.J. MILLER PRIZE

Established in 1984 by friends, colleagues and former students in recognition of Professor J.J. Miller for his outstanding contribution to the Department of Biology during 37 years of service.

Requirements: To be awarded to a student in an Honours Biology program with an outstanding Fall-Winter Average and a minimum grade of A- in BIOLOGY 2EE3.

Typically Available: 1 x \$575

THE MICHAEL J. MORTON MEMORIAL BOOK PRIZE

Established in 1979 in memory of Dr. M.J. Morton.

Requirements: To be awarded to a student enrolled in Level III in an Honours program in Chemistry or Chemical Biology and who, in the judgment of the Department of Chemistry and Chemical Biology, is outstanding in the field of inorganic chemistry.

Typically Available: 1 x \$175 for books

THE FREDRIC P. OLSEN BOOK PRIZE

Established in 1974 in memory of Professor F.P. Olsen by his family, friends and former colleagues.

Requirements: To be awarded to a student enrolled in Level III of an Honours program in Chemistry or Chemical Biology and who, in the judgment of the Department of Chemistry and Chemical Biology, shows particular promise as an experimental scientist.

Typically Available: 1 x \$150 for books

THE BILL PRESTWICH SCHOLARSHIP IN MEDICAL PHYSICS

Established in 2003 by friends, colleagues and students in recognition of Bill Prestwich and his career as a teacher and researcher.

Requirements: To be awarded to a student entering Level II of the Medical and Biological Physics program with the highest Fall-Winter Average in any Level I program.

Typically Available: 2 x \$800

THE CATHERINE AND ALBERT ROEDER MEMORIAL SCHOLARSHIP

Established in 2007 by Dr. Robert Roeder, B.Sc. (Class of '59), M.Sc. (Class of '60) in memory of his parents.

Requirements: To be awarded to the student in an Honours Physics program with the highest Grade Point Average.

Typically Available: 1 x \$1,200

THE DR. SINA SAZGAR MEMORIAL SCHOLARSHIP

Established in 1999 in memory of Dr. Sina Sazgar, Hon. B.Sc. (Class of '93), a young, exceptionally gifted and caring medical doctor who tragically passed away on October 26, 1993.

Requirements: One scholarship to be awarded to a student enrolled in an Honours Bachelor of Science program who, in the judgment of the Faculty of Science, has demonstrated outstanding academic performance.

Typically Available: 1 x \$1,000

THE SHENSTONE PRIZE

Established in 1903 by J.N. Shenstone of Toronto, and continued by members of his family.

Requirements: To be awarded to the student who has completed Science I and who attains the highest average in any four of the Level I courses in Chemistry, Physics and Biology.

Typically Available: 1 x \$200

THE GERALD AND VERNA SIMPSON MEMORIAL SCHOLARSHIP

Established in 1957 by the children in memory of their parents.

Requirements: To be awarded to the student enrolled in Level II of an Honours Physics program with the highest Fall-Winter Average.

Typically Available: 3 x \$600

THE S.L. SQUIRE SCHOLARSHIPS

Established in 1938 by bequest of S.L. Squire of Toronto.

Requirements: Two scholarships to be awarded to students entering Level II of a Mathematics and Statistics program who, in the judgment of the Department of Mathematics and Statistics, attained notable standing in Mathematics and Statistics Gateway.

Typically Available: 2 x \$850

THE DR. R.A. THOMPSON PRIZE IN MATHEMATICS

Established in 1954 by bequest of Dr. William Bethune, in memory of R.A. Thompson, B.A., LL.D., Principal of Central Collegiate Institute, Hamilton, from 1897-1919, in recognition of his contribution to education in Hamilton.

Requirements: To be awarded to the student enrolled in Level III of an Honours program in Mathematics and/or Statistics, who attains a high Fall-Winter Average.

Typically Available: 1 x \$300

THE VALLEY CITY MANUFACTURING CO. LTD. SCHOLARSHIPS

Established in 1991 by the Valley City Manufacturing Co. Ltd. of Dundas, Ontario.

Requirements: Two scholarships to be awarded to the students enrolled in an Honours B.Sc. program: one to the student entering Level II and one to the student entering Level III who attain the highest Fall-Winter Average. Recipients may not hold another scholarship of equal or greater value.

Typically Available: 2 x \$1,600

THE JIM WADDINGTON PRIZE IN PHYSICS AND ASTRONOMY

Established in 2004 by friends, colleagues and students in recognition of Jim Waddington and his career as a teacher and researcher.

Requirements: To be awarded to a student entering Level II of an Honours program in the Department of Physics and Astronomy who has attained the highest grade in PHYSICS 1CC3.

Typically Available: 3 x \$1,000

THE WALLER FAMILY MUSIC COGNITION SCHOLARSHIP

Established in 2014 in memory of Thomas Edward and Norma Waller.

Requirements: To be awarded to a student in the Faculty of Science who has completed at least Level II in the Music Cognition Program, and who demonstrates outstanding academic achievement.

Typically Available: 1 x \$2,000

THE EMANUEL WILLIAMS SCHOLARSHIP IN PHYSICS

Established in 1948 by Arabel M. Williams of Port Colborne as a memorial to her brother.

Requirements: To be awarded to the student enrolled in Level II of an Honours program in Physics with the highest Fall-Winter Average.

Typically Available: 1 x \$1,200

THE GLADYS A. YOUNG SCHOLARSHIP

Established in 1991 by T.G. Harvey in honour of his wife, Gladys B.Sc., (Class of '37), M.Sc., (Class of '38), one of a group of researchers who commenced radio astronomy research with the National Research Council of Canada.

Requirements: To be awarded to the student enrolled in Level II or above of an Honours program in Mathematics or Physics with the highest Fall-Winter Average. The recipient must not hold another scholarship of equal or greater value.

Typically Available: 1 x \$1,600

OPEN TO THE FACULTY OF SOCIAL SCIENCES

THE CITIZEN ACTION GROUP AWARD IN MEMORY OF HARRY PENNY

Established in 1984 by the Citizen Action Group, Hamilton, to honour Professor Harry L. Penny, founding Director of the School of Social Work and Board Member of Citizen Action Group.

Requirements: To be awarded to the student in a program in Social Work who achieves the highest grade in SOCWORK 4003.

Typically Available: 1 x \$1,000

THE HUGH CLARK SCHOLARSHIP

Established in 1989 by Hugh Clark in celebration of McMaster's fiftieth year since moving to Hamilton.

Requirements: To be awarded to the student enrolled in Level III of an Honours program in Social Sciences who attains the highest Fall-Winter Average.

Typically Available: 1 x \$1,950

THE MARGARET CUDMORE SCHOLARSHIP IN POLITICAL SCIENCE

Established in 2010 by bequest of Margaret Georgina Cudmore.

Requirements: To be awarded to a student in the Faculty of Social Sciences enrolled in Level III of an Honours Political Science program with a high Fall-Winter Average.

Typically Available: 1 x \$2,000

THE ALICE AND WALTER DAY SCHOLARSHIP

Established in 2012 by Dr. Graham Knight in honour of his grandparents.

Requirements: To be awarded to students enrolled in a Labour Studies program who attain high averages.

Typically Available: 1 x \$500

THE SUSAN FARLEY AND BETH FARLEY-GROVES SCHOLARSHIP

Established in 2009 by the parents of Susan Farley (Class of '08) in her memory. Susan earned her B.A in Gerontology.

Requirements: To be awarded to a student in a program in the Department of Health, Aging and Society who, in the judgment of the Department, has demonstrated notable academic achievement.

Typically Available: 1 x \$1,000

THE CHRISTINE FEAVER SCHOLARSHIP IN ECONOMICS

Requirements: Three scholarships to be awarded to students in the Labour Studies program who, in the judgment of the Committee of Instruction for Labour Studies, have achieved notable standing in any level.

Typically Available: 3 x \$500

Part-Time **In-Course Awards**

In-Course and Renewal Award Regulations

- In-Course Awards** are monetary and non-monetary awards allocated on the basis of academic merit and, in some cases, other forms of earned merit. Non-monetary awards such as medals and books as well as monetary awards of nominal value (currently \$100 or less) are called prizes.
- In-Course Awards** are available to full-time and part-time students enrolled in an undergraduate degree program (excluding the Physician Assistant and M.D. Programs), at the time of award application and selection, who are returning to McMaster to continue their studies.
- In-Course Awards** requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter terms.
- In-Course Awards** requiring part-time status are available to students who are not enrolled full-time in the fall and/or winter terms. In addition, true part-time awards are only available to students who have completed at least 50% of all units attempted at McMaster on a part-time basis.
- In-Course Awards** are available to all domestic and international students.
- In-Course Awards** are not available to second degree students unless the terms of a particular donor award specify eligibility and they have not received the award previously.
- In-Course Awards** are not available to students in their graduating term.
- In-Course Awards** may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements, including, but not limited to, submitting an application.
- In-Course Awards** requiring an application that are determined by Cumulative Grade Point Average require a minimum Cumulative Grade Point Average of 8.0 on at least 18 graded units, while those determined by Fall-Winter Average require a minimum Fall-Winter Average of 9.5 on at least 18 graded units.
- In-Course Awards** adjudicated without need of an application that are determined by Cumulative Grade Point Average require a minimum 8.0 on at least 24 graded units, while those determined by Fall-Winter Average require a minimum 9.5 on at least 24 graded units.
- Available averages, units upon which averages are calculated, program level, and enrolled units, may be used to break any ties in an award competition.
- In order to be considered for an In-Course Award by application, students must submit a complete application by the specified deadline date.
- In-Course Award applications which meet award eligibility criteria are forwarded to a selection committee for review and ranking.
- Some **In-Course Awards** are renewable.
- Entrance, Indigenous Entrance, and In-Course Award renewals determined by Cumulative Grade Point Average or Fall-Winter Average require a minimum 8.0 on at least 18 graded units.
- All In-Course Award payments are disbursed through the McMaster Student Account and applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
- In-Course Awards** are typically disbursed no later than the end of September.
- In-Course Awards** will be disbursed if the recipient continues to be enrolled in a McMaster degree program, or a specific McMaster program, when explicitly required by the terms of the award, or the student's record reflects they are on exchange, on letter of permission, or participating in a coop or internship opportunity at McMaster University.
- In-Course Award recipients will have their awards noted on their University transcripts. Entrance and In-Course renewals are not noted on transcripts.
- Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture of an In-Course Award or Entrance or In-Course Award renewal. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
- If a student is approved to graduate or transfers to graduate in the fall, after the awarding decision and/or disbursement is made, the student will forfeit the award.

22. Students who withdraw before November 1 will forfeit their In-Course Award or Entrance or In-Course Award renewal.
23. Students who forfeit their In-Course award will have their award cancelled and their transcript notation removed if forfeited in first year of payment only. Students must return the In-Course Award or Entrance or In-Course Award renewal funding to their McMaster Student Account.
24. Forfeiture of a renewable Entrance or In-Course Award also cancels all future instalments of the award.
25. Students wishing to defer the stated value of an In-Course Award or Entrance or In-Course Award renewal to the next academic year should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships. Approval is not automatic and deferrals are not normally granted for more than one academic year.
26. Students holding renewable Entrance or **In-Course Awards** who choose to accelerate their program and to complete their degree earlier than normal by completing Spring/Summer courses and who wish to employ the benefits of their renewable Entrance and/or **In-Course Awards** to defray the tuition and compulsory fees for those courses should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships.
27. The University may choose not to grant an In-Course Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools where complete applications have not been received.
28. The University may remove specific **In-Course Awards** from the University Calendar, may revise the terms and stated value and/or suspend the granting of **In-Course Awards** (e.g. donor funds).
29. **In-Course Awards** supported by donor funds may have additional eligibility and renewal requirements.

AUTOMATICALLY ASSESSED

OPEN TO TWO OR MORE FACULTIES

THE ALUMNI ASSOCIATION SCHOLARSHIP

Established in 1974 by the McMaster University Alumni Association and later augmented by bequest of Harold E. Amy.

Typically Available: 3 x \$500 each

Awards for Physician Assistant Education Program

IN-COURSE AND RENEWAL AWARD REGULATIONS

1. **In-Course Awards** are monetary and non-monetary awards allocated on the basis of academic merit and, in some cases, other forms of earned merit. Non-monetary awards such as medals and books as well as monetary awards of nominal value (currently \$100 or less) are called prizes.
2. **In-Course Awards** are available to full-time and part-time students enrolled in an undergraduate degree program (excluding the Physician Assistant and M.D. Programs), at the time of award application and selection, who are returning to McMaster to continue their studies.
3. **In-Course Awards** requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter terms.
4. **In-Course Awards** requiring part-time status are available to students who are not enrolled full-time in the fall and/or winter terms. In addition, true part-time awards are only available to students who have completed at least 50% of all units attempted at McMaster on a part-time basis.
5. **In-Course Awards** are available to all domestic and international students.
6. **In-Course Awards** are not available to second degree students unless the terms of a particular donor award specify eligibility and they have not received the award previously.
7. **In-Course Awards** are not available to students in their graduating term.
8. **In-Course Awards** may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements, including, but not limited to, submitting an application.
9. **In-Course Awards** requiring an application that are determined by Cumulative Grade Point Average require a minimum Cumulative Grade Point Average of 8.0 on at least 18 graded units, while those determined by Fall-Winter Average require a minimum Fall-Winter Average of 9.5 on at least 18 graded units.
10. **In-Course Awards** adjudicated without need of an application that are determined by Cumulative Grade Point Average require a minimum 8.0 on at least 24 graded units, while those determined by Fall-Winter Average require a minimum 9.5 on at least 24 graded units.
11. Available averages, units upon which averages are calculated, program level, and enrolled units, may be used to break any ties in an award competition.
12. In order to be considered for an In-Course Award by application, students must submit a complete application by the specified deadline date.
13. In-Course Award applications which meet award eligibility criteria are forwarded to a selection committee for review and ranking.
14. Some **In-Course Awards** are renewable.
15. Entrance, Indigenous Entrance, and In-Course Award renewals determined by Cumulative Grade Point Average or Fall-Winter Average require a minimum 8.0 on at least 18 graded units.
16. All In-Course Award payments are disbursed through the McMaster Student Account and applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
17. **In-Course Awards** are typically disbursed no later than the end of September.
18. **In-Course Awards** will be disbursed if the recipient continues to be enrolled in a McMaster degree program, or a specific McMaster program, when explicitly required by the terms of the award, or the student's record reflects they are on exchange, on letter of permission, or participating in a coop or internship opportunity at McMaster University.
19. In-Course Award recipients will have their awards noted on their University transcripts. Entrance and In-Course renewals are not noted on transcripts.
20. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture of an In-Course Award or Entrance or In-Course Award renewal. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
21. If a student is approved to graduate or transfers to graduate in the fall, after the awarding decision and/or disbursement is made, the student will forfeit the award.
22. Students who withdraw before November 1 will forfeit their In-Course Award or Entrance or In-Course Award renewal.
23. Students who forfeit their In-Course award will have their award cancelled and their transcript notation removed if forfeited in first year of payment only. Students must return the In-Course Award or Entrance or In-Course Award renewal funding to their McMaster Student Account.
24. Forfeiture of a renewable Entrance or In-Course Award also cancels all future instalments of the award.
25. Students wishing to defer the stated value of an In-Course Award or Entrance or In-Course Award renewal to the next academic year should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships. Approval is not automatic and deferments are not normally granted for more than one academic year.
26. Students holding renewable Entrance or **In-Course Awards** who choose to accelerate their program and to complete their degree earlier than normal by completing Spring/Summer courses and who wish to employ the benefits of their renewable Entrance and/or **In-Course Awards** to defray the tuition and compulsory fees for those courses should make the request in writing to the Office of the Registrar, Student Financial Aid & Scholarships.
27. The University may choose not to grant an In-Course Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools where complete applications have not been received.
28. The University may remove specific **In-Course Awards** from the University Calendar, may revise the terms and stated value and/or suspend the granting of **In-Course Awards** (e.g. donor funds).
29. **In-Course Awards** supported by donor funds may have additional eligibility and renewal requirements.

Awards for the Michael G. DeGroot School of Medicine

MICHAEL G. DEGROOTE SCHOOL OF MEDICINE AWARD REGULATIONS

1. M.D. Awards are monetary awards allocated on the basis of specific criteria, which may include a minimum expectation of academic achievement, earned merit or other miscellaneous criteria.

2. M.D. Awards are available to students in good standing enrolled in the M.D. Program.
3. M.D. Awards are available to students who are Canadian Citizens, Permanent Residents, Convention Refugees or Protected Persons of Canada.
4. Students who are not Canadian Citizens, Permanent Residents, Convention Refugees or Protected Persons of Canada are not eligible for M.D. Awards.
5. M.D. Program students may receive more than one M.D. Award up to the amount for which they are eligible as determined by the M.D. Program Office.
6. M.D. Awards may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements, including but not limited to, submitting an application.
7. In order to be considered for an M.D. Award that is a named donor award, students must submit a completed application by the specified deadline date.
8. All M.D. Award applications are evaluated for eligibility, and reviewed and ranked according to specific criteria. A selection committee may be struck depending on the award and donor requirements.
9. Students must be enrolled in the M.D. Program to have the M.D. Award payment processed.
10. If an M.D. Award is renewable, students must meet the renewal requirements specified in the award terms to receive a renewal payment.
11. All M.D. Award payments are disbursed through the McMaster Student Account and are applied to outstanding charges. A few exceptions to this regulation may be approved by the M.D. Program Office.
12. All M.D. Awards are typically disbursed no later than the end of November.
13. Forfeiture of a renewable M.D. Award also cancels all future instalments of the award.
14. Change in course load may result in forfeiture or adjustment in the value of the M.D. Award. Students are advised to consult with their M.D. Program Office prior to making any changes to their course load.
15. Students who withdraw or take a leave of absence from the program may see an adjustment in the value of their M.D. Award or see the full amount returned to the University.
16. Any adjustment made to a student's account, in order to return all or a portion of an M.D. Award to the University, will be calculated on the balance available at the time of the adjustment and will not put a student's account into deficit.
17. The University may choose not to grant an M.D. Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools for awards by application, where complete applications have not been received.
18. The University may remove specific M.D. Awards from the University Calendar, may revise the terms and stated value and/or suspend the granting of M.D. Awards (e.g. donor funds).
19. M.D. Awards supported by donor funds may have additional eligibility requirements.

Automatically Assessed

THE DR. ROBERT CHU MEMORIAL AWARD

Established in 2017 by Mr. Terrence Donnelly in memory of the late Dr. Robert Chu. **Requirements:** To be awarded to a graduating student in the Michael G. DeGroot School of Medicine who is pursuing a residency program in radiology. To be awarded annually by the Faculty of Health Sciences on the recommendation of

the Dean and Vice-President (or delegate) and the Chair of the Department of Radiology (or delegate).

THE DR. HENRY CHAIM WITELSON MEMORIAL PRIZE IN OPHTHALMOLOGY

Established in 1997 by family and friends of the late Dr. Henry Chaim Witelson, former Chief of Service in Ophthalmology for Hamilton Civic Hospitals, to honour his memory and work.

Requirements: To be granted to a student enrolled in the Faculty of Health Sciences who has demonstrated academic excellence and an interest in ophthalmology. The prize is intended to provide an opportunity for an in-depth experience in a block elective for a minimum of two weeks in a clinical or research aspect of ophthalmology and to increase interest in the specialty of eye medicine and surgery. **Typically Available:** 1 x \$2500

Awards by Application

THE JAISAL CHAUHAN RESEARCH BOOK AWARD

Established in 2015 by medical professionals in the Niagara region.

Requirements: To be awarded to a student from the Niagara Regional Campus of the Michael G. DeGroot School of Medicine who, in the judgment of the Assistant Dean of the Niagara Regional Campus, has demonstrated inspiring leadership during their undergraduate medical program; exceeded expectations of medical students as researchers; contributed to a successful quality improvement project in health care. **Typically Available:** 1 x \$500

THE CANADIAN MEDICAL ASSOCIATION 150TH ANNIVERSARY AWARD

Established in 2017 by the Canadian Medical Association Foundation in honour of the CMA's 150th anniversary.

Requirements: To be awarded to a student enrolled in the Michael G. DeGroot School of Medicine, and is Canadian citizen, permanent resident, or person with protected/refugee status. The Award will be given to students who demonstrate values of medical professionalism, including: honesty and integrity, respect, responsibility and accountability, commitment to self-improvement and collaboration. Preference may be given to members of the Canadian Medical Association. **Typically Available:** 1 x \$15,000

Travel and Exchange Awards

TRAVEL AND EXCHANGE AWARD REGULATIONS

1. Travel and Exchange Awards are monetary awards allocated on the basis of academic merit and, in some cases, other forms of earned merit.
2. Travel and Exchange Awards are available to full-time and part-time students enrolled in Level II or above of their first undergraduate degree program, at the time of award application and selection, who are returning to McMaster to continue their studies.
3. Travel and Exchange Awards requiring full-time status are available to students enrolled full-time or equivalent in both the fall and winter terms.
4. Travel and Exchange Awards are available to all domestic and international students.
5. Travel and Exchange Awards are not available to second degree students.
6. Travel and Exchange Awards are not available to students in their graduating term.
7. Students are limited to one Travel and Exchange Award per application cycle.
8. Travel and Exchange Awards are available to students with a minimum Cumulative Grade Point Average of 7.0 on a minimum of 18 graded units.

9. Available averages, units upon which averages are calculated, program level, and enrolled units may be used to break any ties in an award competition.
10. Exchange Awards are available to students participating in an approved formal exchange program during the academic year immediately following the application deadline.
11. Travel Awards are available to students travelling to earn academic credit, pursue experiential learning opportunities, complete research or projects, participate in relief efforts, volunteer or work. Some Travel Awards may be for travel within Canada, while others may support the student outside Canada or internationally. Travel Award recipients must travel during the summer, fall and/or winter terms immediately following the application deadline.
12. Travel and Exchange Awards may also consider other forms of earned merit. In order to evaluate earned merit, students may need to complete one or more additional requirements including, but not limited to, submitting an application.
13. In order to be considered for a Travel and Exchange Award by application, students must submit a complete application by the specified deadline date.
14. Travel and Exchange Award applications which meet award eligibility criteria are forwarded to a selection committee for review and ranking.
15. All Travel and Exchange Award payments are disbursed through the McMaster Student Account and applied to outstanding charges. A few exceptions to this regulation may be approved by the Office of the Registrar, Student Financial Aid & Scholarships.
16. Travel and Exchange Awards are typically disbursed no later than the end of April.
17. Travel and Exchange Award recipients will have their awards noted on their University transcripts.
18. It is the responsibility of Travel and Exchange Award recipients to make all travel and exchange arrangements. Recipients are required to assess travel risks, have a plan of action in place for emergencies, and ensure they have proper medical and other insurance in place prior to departure.
19. Travel and Exchange Awards will not be issued for travel to areas deemed as 'do not travel areas' per Global Affairs Canada.
20. Travel and Exchange Award recipients may be required to complete a risk assessment and/or safety component and/or waiver prior to departure as dictated by other University policies. Those participating in exchange opportunities must attend mandatory Exchange Pre-Departure Orientation sessions and complete Terms for Participation Forms, Liability Waivers, and Statement of Responsibilities Forms.
21. Travel and Exchange Award recipients are asked to submit, and consent to the publication of, a report of their travel or exchange experience when they return to their studies at McMaster. Reports are submitted to the Office of the Registrar, Student Financial Aid & Scholarships. Student submitted reports are included in the annual reports made to the Undergraduate Council Awards Committee, Undergraduate Council and Senate, and are shared with donors.
22. Travel and Exchange Awards allocated to students who do not travel or participate in their formal exchange as indicated on their application will forfeit their award.
23. Registration in, or transfer to, another program of study and/or a change in course load may result in forfeiture of a Travel and Exchange Award. Students are advised to consult with the Office of the Registrar, Student Financial Aid & Scholarships, prior to making any changes to their program of study or course load.
24. Students who forfeit their award will have their award cancelled and their transcript notation removed. Students must return the Travel and Exchange Award funding to their McMaster Student Account.
25. The University may choose not to grant a Travel and Exchange Award in the absence of a suitable candidate; may choose to limit the number of recipients selected where funding is limited; may choose to limit the number of recipients selected where too few suitable candidates exist; and/or may choose to generate applicant pools where complete applications have not been received.
26. The University may remove specific Travel and Exchange Awards from the University Calendar, may revise the terms and stated value and/or suspend the granting of Travel and Exchange Awards.
27. Travel and Exchange Awards supported by donor funds may have additional eligibility requirements.

Travel and Exchange Awards by Application

Application details are available on Mosaic.

OPEN TO TWO OR MORE FACULTIES

THE BEALE-LINCOLN-HALL TRAVEL SCHOLARSHIP

Established in 1996 by Arnold A. Beale in memory of his parents F. Arnold Beale and Margaret S. Beale and Mr. and Mrs. Walter Gould Lincoln and Commander Harley H. Hall, U.S.N.

Requirements: To be awarded to students who demonstrate high academic standing and are participating in one of McMaster's formal exchange programs. Preference will be given to students enrolled in a program in Biochemistry, Biology, Chemistry, Cognitive Science of Language, Commerce, Earth and Environmental Sciences, Engineering Physics, English, French, Geography, History, Linguistics, Materials Science, Mathematics, Physics or Religious Studies and who demonstrate a lively interest in the humanities and the human and social implications of scientific developments.

Typically Available: 1 x \$2,000

THE JOHN P. EVANS TRAVEL SCHOLARSHIP

Established in 1991 by many friends, colleagues, students and graduates of McMaster University as a tribute to John (Jack) P. Evans upon his retirement as Associate Vice-President, University Services and Secretary of the Board of Governors in recognition of his 25 years of outstanding contribution to the University Community.

Requirements: To be awarded to a student enrolled in Level II or above of an Honours program with notable academic standing and has demonstrated a scholarly interest in some aspect of Asian languages, history or cultures, with preference being given to a student wishing to study in China.

Typically Available: 1 x \$1,500

THE JIMMY FONG INTERNATIONAL OUTREACH TRAVEL AWARD IN ENGINEERING

Established in 2006 by Jimmy Fong, B.Eng.Mgt. (Class of '82).

Requirements: To be awarded to students who, in the judgment of a selection committee, demonstrate high academic achievement, and are pursuing either an international relief and development project in an underdeveloped, disadvantaged area or a study, work or co-op placement outside of North America. Preference to be given to students in the Faculty of Engineering.

Typically Available: 5 x \$2,500

THE DRS. JOLIE RINGASH AND GLEN BANDIERA RENAISSANCE AWARD

Established in 2012 by Drs. Jolie Ringash and Glen Bandiera. The award, with its emphasis on experiential learning, is intended to create transformative opportunities for students from all Faculties and programs, from undergraduate to graduate and professional.

Requirements: The recipient of the award shall be an individual who wishes to engage in a 4-12 month, self-directed, enrichment experience outside his/

her chosen program of study, and who wishes to explore a project of personal significance that will amplify the recipient's University experience while engaging in experiential learning at home or abroad.

Typically Available: 1 x \$25,000

THE RUNDLE FOREIGN STUDY SCHOLARSHIP

Established in 2011 by the Rundle Foreign Study Bursary at the Hamilton Community Foundation.

Requirements: To be awarded to a student enrolled in Level II or above and who, in the judgment of the Selection Committee, has attained notable academic achievement. The purpose of the scholarship is to provide financial assistance to students who are participating in one of McMaster's formal exchange programs in a country where English is not the first language and who have graduated from a publicly funded secondary school in the Hamilton-Wentworth area.

Typically Available: 1 x \$2,500
